SALEM COMMUNICATIONS ANNOUNCES STRONG SECOND QUARTER 2004 RESULTS

Second Quarter Same Station Revenue and Same Station Operating Income Increase 9.4% and 23.4%, Respectively

CAMARILLO, CA August 2, 2004 Salem Communications Corporation (Nasdaq: SALM), the leading radio broadcaster focused on religious and family themes programming, announced today results for the second quarter ended June 30, 2004.

Commenting on these results, Edward G. Atsinger III, President and CEO said, "Our second quarter 2004 net broadcasting revenue and station operating income growth of 10.1% and 18.9%, respectively, will, once again, significantly exceed the performance of the overall radio industry. This strong performance is fueled by our start-up and developing stations. In particular, our contemporary Christian music stations achieved an increase of 20.8% in net broadcasting revenue and an increase of 54.3% in station operating income. At the same time, we have continued to post improved operating leverage across our portfolio, as evidenced by a three basis point gain in our station operating income margins during the quarter.

Mr. Atsinger continued, "During the quarter, we also successfully completed a follow-on equity offering of 2.3 million new shares at a price of \$30 per share. This offering achieved several goals for Salem, including strengthening our balance sheet by allowing us to pay down \$55.6 million of 9.0% senior subordinated notes. By improving our leverage ratios, we have created additional acquisition capacity that will allow us to take advantage of attractive and strategic acquisition opportunities.

Forward Looking Statements

Statements used in this press release that relate to future plans, events, financial results, prospects or performance are forward-looking statements as defined under the Private Securities Litigation Reform Act of 1995. Actual results may differ materially from those anticipated as a result of certain risks and uncertainties, including but not limited to the ability of Salem to close and integrate announced transactions, market acceptance of recently launched music formats, competition in the radio broadcast, Internet and publishing industries and from new technologies, adverse economic conditions, and other risks and uncertainties detailed from time to time in Salem's reports on Forms 10-K, 10-Q, 8-K and other filings filed with the Securities and Exchange Commission. Regulation G

Station operating income, EBITDA and Adjusted EBITDA are financial measures not prepared in accordance with generally accepted accounting principles (GAAP). Station operating income is defined as net broadcasting revenues minus broadcasting operating expenses. EBITDA is defined as net income before interest, taxes, depreciation and amortization. Adjusted EBITDA is defined as EBITDA adjusted for the cost of a denied tower site and license upgrade, the loss on early redemption of long-term debt and the loss from discontinued operations, net of tax. In addition, Salem has provided supplemental information as an attachment to this press release, reconciling these non-GAAP financial measures to the most directly comparable financial measures prepared in accordance with GAAP. The company believes these non-GAAP financial measures, when considered in conjunction with the most directly comparable GAAP financial measures, provide useful measures of the company's operating performance. Station operating income, EBITDA and Adjusted EBITDA are generally recognized by the radio broadcasting industry as tools in measuring performance and in applying valuation methodologies for companies in the media, entertainment and communication industries. Investors and analysts who report on the industry use these measures to provide comparisons between broadcasting groups. Station operating income, EBITDA and Adjusted EBITDA are not a measure of liquidity or of performance in accordance with GAAP, and should be viewed as a supplement to and not a substitute for, or superior to, the company's results of operations presented on a GAAP basis such as operating income and net income. In addition, Salem's definition of station operating income, EBITDA and Adjusted EBITDA are not necessarily comparable to similarly titled measures employed by other companies.
