Description of Business

Powder River Basin Gas Corp. ("PRVB" or the "Company") was incorporated as Celebrity Sports Network ("Celebrity Sports") in the State of Colorado on August 27, 1999. On September 5, 2001; Celebrity Sports Network acquired PRVB, a private corporation incorporated in the State of Colorado on June 13, 2001. Subsequently, Celebrity Sports Network changed its name from Celebrity Sports Network to Powder River Basin Gas Corp. Celebrity Sports was formed in an effort to broaden the scope of appearances available to current and former professional athletes. It intended to assist athletes in refining their speaking and presentation skills to increase marketability, gain a market for the athletes, and market the athletes for speaking engagements. From inception, Celebrity Sports remained a development stage company, with primary focus on organizational matters, acquiring candidate athletes as clients, and developing its marketing and business plans. Due to disappointing results; operational losses, lack of working capital, and less than acceptable results from initial business plan implementations; Celebrity Sports decided to explore other business opportunities, both within and outside the sports management industry. Ultimately, Celebrity Sports acquired and became Powder River Basin Gas Corp.

Business

PRVB is an oil and gas exploration company that is engaged in the evaluation and development of coalbed methane ("CBM") reserves as well as shallow oil reserves within the Powder River Basin in the State of Wyoming. PRVB's focus has been in obtaining leasehold interests in acreage within the Powder River Basin, currently a prolific coal bed methane gas exploration play in the domestic United States. Its attributes include low cost, shallow depth drilling and completion; a proven play with major operators and an existing and expanding infrastructure; greater and longer production yields when comparing cost/benefit analyses to other basins and, a low exploration risk.

As of December 31, 2002, PRVB owns a total of 14,622 acres in fourteen different leases within Converse, Crook, Johnson, and Sheridan counties. The company has a 80 percent to 100 percent working interests in all of its leases to date. The Company's leases are adjacent to larger CBM developers and operators such as Western Gas Resources, Williams Companies, Phillips Petroleum, J.M. Huber and others. This close proximity to other operators allows PRVB to benefit from the established infrastructure of gathering systems, pipelines, electricity sources, roads, etc.

In January 2002, the Company drilled and completed two CBM wells in their Zullig Lease, located just west of Clearmont, Wyoming in Sheridan County. Both wells are completed in the Monarch coal seam, which is located at a depth of approximately 800 feet. One of the two wells was tested and produced at an initial rate of 702 Mcf (thousand cubic) per day. In addition, the Company drilled eleven other wells on the lease to a minimal depth of ten percent of their total depth in order to meet certain state requirements in reducing the well spacing from eighty acres to forty acres. Because the pipeline did not arrive during 2002, as expected, the Company did not sell any gas during the year. In January 2003, the Company entered into an agreement with Rimrock Pipeline to provide pipeline services to the Company.

Pricing

PRVB's average cost to drill, complete and tie-in a CBM well to existing infrastructure is estimated to be \$75,000, which is below the basin's average cost of \$89,000 per CBM well. The projected costs are less due to the fact that a majority of their coal seam objectives are at depths less than 800 feet. The Company anticipates that the development of its CBM assets can generate a substantial profit.

Plan of Operation

PRVB's short-term focus will continue to be on developing and monetizing its CBM and shallow oil assets within the Powder River Basin and to seek additional opportunities to expand its current asset base as well as pursue other acquisitions that will enhance shareholder.

Marketing

Edgar Filing: POWDER RIVER BASIN GAS CORP - Form 10KSB

The Company intends to review and analyze its available options to sell at the wellhead or transport its production to the highest value markets and intends to implement those options that generate the highest overall value for the Company. The available natural gas pipelines near the Company's acreage include: Rimrock Pipeline, Bitter Creek Pipeline, Williston Basin Interstate Pipeline, Fort Union, MIGC, and Northern Pipeline. It is anticipated that no additional processing or treating will be necessary to meet pipeline specifications.

Description of Properties

The Company's offices are located in Dallas, Texas and it has non-exclusive use of desks and storage space and available business services. The Company's Chairman has been providing these office facilities at no cost to the Company.

As of December 31, 2002 and 2001, Powder River Basin Gas Corp. had 80 to 100 percent working interests in the following CBM and shallow oil leases:

Lease	County	Net Acres	Gross Acres
Bell	Converse	907	907
Haefele	Converse	640	640

		10,361	14,622

Legal Proceedings

PRVB has never been in bankruptcy, receivership or any similar legal proceeding, and is not subject to any pending legal proceedings. Powder River Basin Gas Corp. is not aware of any threatened legal proceedings. The foregoing is also true with respect to each officer, director and control shareholder as well as any entity owned by any officer, director and control shareholder, over the last five years.

During 2002 the Company filed a lawsuit against a former service provider, alleging violations of Section 16 of the Securities and Exchange Act of 1934 and Section 5 of the Securities Act of 1933. In order to avoid the additional expense and uncertainty of litigation, agreed to settle and resolve all of the claims between them. As part of the settlement agreement, the Company recorded a \$50,000 liability, of which, \$40,000 remains outstanding at December 31, 2002.

Submission of Matters to a Vote of Security Holders

None during the years ended December 31, 2002 and 2001.

Market for Common Equity and Related Stockholder Matters

Market Information

The common stock of Powder River Basin Gas Corp. is traded on the OTC Bulletin Board under the symbol PRVB.

Holdings

Powder River Basin Gas Corp. had 20,437,833 and 19,907,833 shares of common stock outstanding as of December 31, 2002 and 2001, respectively and had approximately 320 and 278 shareholders at the end of 2002 and 2001, respectively.

Dividend Policy

PRVB has never paid dividends on its common stock and does not anticipate paying any dividends in the foreseeable future. Management anticipates that earnings will be retained to fund the company's working capital needs and expansion of the business.

Management's Discussion and Analysis

The following discussion of the Company's financial condition and the results of operations should be read in conjunction with the Financial Statements and Notes thereto appearing elsewhere in this document.

The Private Securities Litigation Reform Act of 1995 provides a safe harbor for forward-looking statements. In order to comply with the terms of the safe harbor, the Company notes that in addition to the description of historical facts contained herein, this report contains certain forward-looking statements that involve risks and uncertainties as detailed herein and from time to time in the Company's other filings with the Securities and Exchange Commission and elsewhere. Such statements are based on management's current expectations and are subject to a number of factors and uncertainties, which could cause actual results to differ materially from those, described in the forward-looking statements.

These factors include, among others: (a) the availability of financing or additional investment capital; (b) the retention of qualified operational management; (c) drilling and operational hazards; (d) pricing fluctuations (e) ability to develop additional reserves.

The Company's operations consist primarily of exploration and development of oil and gas properties. While oil and natural gas are the principal products currently produced by the Company, the Company does not refine or process the oil and natural gas that it produces. The Company sells the gas it produces under short-term contracts at market prices in the areas in which the producing properties are located, generally at F.O.B. field prices posted by the principal purchaser of oil in such areas.

Results of Operations

During 2002 we discovered accounting inaccuracies in certain prior period financial statements, requiring restatement of the financial statements for these periods. We conducted an internal investigation under the direction of our Board of Directors to determine the scope and magnitude of these inaccuracies.

As a result of the internal accounting investigation, our consolidated statements of operations, cash flows and stockholders' equity for the year ended December 31, 2001 and the consolidated balance sheet as of December 31, 2001 have been restated. In addition, to give effect to accumulated prior period adjustments and their related tax impacts, and to give effect of additional treasury stock issuances during 2002, the consolidated statements of operations, cash flows and stockholders' equity for the periods ended March 31, 2002, June 30, 2002 and September 30, 2002 and the consolidated balance sheets for the periods then ended, have also been restated.

Revenues

The Company has not yet generated significant revenue from the sale of natural gas. This is primarily due to the fact the infrastructure required to realize these sales has not yet been extended to the Company's properties. The Company has drilled two gas wells that will produce commercially viable gas resources once the appropriate infrastructure (i.e., pipeline) is in place. The Company plans on implementing its drilling plan and begin recognizing revenues during 2003.

Costs and Expenses

The Company's general and administrative expenses for the fiscal years ended December 31, 2002 and 2001 were \$414,568 and \$25,927, respectively, which represents 30.9% and 1.5% of total expenses. The increase is because 2002 included a full year of operations, while 2001 was a short year and did not include any management salaries and 2002 includes significant costs associated with being a public company.

The Company incurred legal and professional expenses of \$673,293 and \$1,597,563 for the years ending December 31, 2002 and 2001, respectively, which amounts are not included in the general and administrative expenses noted above and represent 50.2% and 89.5% of the total expenses incurred by the Company. The decrease is because the Company completed its merger with Celebrity Sports in 2001 and incurred significant legal and professional fees in the form of common stock and treasury stock.

The Company incurred lease operating expenses totaling \$231,517 and \$95,451 during 2002 and 2001, respectively, which represents 17.3% and 5.3% of the total expenses. In 2002, the Company drilled a few wells and performed procedures related to making several properties operational, including working with various operators in the Powder River Basin. The Company's travel expenses were \$21,835 and \$66,655 for the years ended December 31, 2002 and 2001, respectively, which represents 1.6% and 3.7% of the total expenses incurred by the Company during the respective fiscal years, because 2001 included many trips between Texas and Wyoming to acquire leasehold interests, while 2002 had less such activity.

In 2002, the management of the Company was unable to secure financing for the proposed drilling programs which was primarily due to general market conditions and the fact that the Chief Executive Officer, which the Company hired during 2002, resigned in the 3rd Quarter for personal reasons. The Company, however, anticipates that it will be able to raise the necessary funds to commence drilling operations on its leasehold properties during the 2003 fiscal year.

Net Income (Loss)

Net loss for the fiscal years ended December 31, 2002 and 2001 were \$1,344,796 and \$1,786,236, respectively or \$0.07 and \$0.19 per share. The majority of the net loss is categorized in general and administrative expenses, lease operating costs, legal and professional services and travel, as more fully described above.

Liquidity and Capital Resources

Net cash used in operating activities was \$241,720 and \$176,967 for the fiscal years ended December 31, 2002 and 2001, respectively. Cash used in investing activities was \$283,400 and \$843,400 for the same periods and cash provided by investing activities was \$535,353 and \$1,022,690 for the fiscal years ended December 31, 2002 and 2001, respectively.

The Company's working capital deficit on December 31, 2002 and 2001 was \$1,094,517 and \$880,271, respectively. This deficit resulted primarily from the use of short-term debt and accounts payable to finance the acquisition of leasehold interests in the Powder River Basin, which as noted above, amounted to \$283,400 and \$843,400 during 2002 and 2001, respectively, as well as the ongoing operations of the Company and costs associated with being a public company.

The Company has no established revenue sources and continues to rely on loans from shareholders, sales of equity and other financing to sustain operations as a going concern. There is currently no agreement from any officer or shareholder to continue to provide working capital as required, to maintain operations.

Non-Cash Transactions

The non cash transactions for the year ended December 31, 2002 were as follows: 250,000 shares of treasury stock was issued to a vendor to satisfy an accounts payable and 630,000 shares of treasury stock were issued in January 2002 for services at \$0.61 per share; 1,130,000 shares of treasury stock were issued March 2002 for services at \$0.59 per share; 630,000 shares of treasury stock were issued in July 2002 for services at \$0.09 per share; and 500,000 shares of common stock were issued in July 2002 to a related party for reduction of debt at \$0.20 per share.

The non cash transactions for the year ended December 31, 2001 were as follows: 3,350,000 shares of common stock were issued on June 13, 2001 for organizational expenses at \$0.001 per share; 5,650,000 shares of common stock were issued in September, 2001 for the acquisition of Powder River Basin Gas Corp. at \$0.001 per share; 5,040,000 shares of common stock were returned due to non-completion of services in connection with the acquisition of Powder River Basin Gas Corp. at \$0.001 per share; 100,000 shares of common stock issued in September, 2001 for satisfaction of certain accounts payable at \$0.81 per share; 560,000 shares of treasury stock were issued in October, 2001 for services at \$0.81 per share; 920,000 shares of treasury stock were issued in November, 2001 for services at \$1.11 per share; and 247,833 shares of common stock issued in December, 2001 to satisfy debt associated with the acquisition of oil and gas leases at \$1.00 per share.

Current Liabilities

On December 31, 2002 and 2001, the Company had approximately \$1,107,073 and \$882,594, respectively, in current liabilities. \$317,700 and \$332,700 at December 31, 2002 and 2001, respectively, was due Taghmen Ventures, Ltd. Mr. Gregory C. Smith, Chairman of the Company is the General Partner for Taghmen Ventures Ltd. and owns approximately 1% of Taghmen Ventures Ltd. These amounts represent funds advanced to the Company in 2001 by Taghmen Ventures, Ltd. for working capital purposes.

History of Losses

The Company incurred net losses of \$1.3 million and \$1.8 million for the years ended December 31, 2002 and 2001, respectively. Prior to 2001, the Company had no previous net losses due to its formation in 2001. The Company may continue to incur net losses during 2003 and, to the extent that it remains without operational funding, such losses may continue.

Operational Management

The Company currently has no operational management and will require the retention of qualified individuals in the field of oil and gas exploration in order for it to realize the full potential of its leasehold assets and therefore maximize shareholder value. The Company has been actively recruiting experienced personnel in this area and believes it has identified a management team to initiate its development plans.

Need for Additional Financing for Growth

The growth of the Company's business will require substantial capital on a continuing basis, and there is no assurance that any such required additional capital will be available on satisfactory terms and conditions, if at all. The Company may pursue, from time to time, opportunities to acquire oil and natural gas properties and businesses that may utilize the capital currently expected to be available for its present operations. The amount and timing of the Company's future capital requirements, if any, may depend upon a number of factors, including drilling costs, transportation costs, equipment costs, marketing expenses, staffing levels and competitive conditions, and any purchases or dispositions of assets, many of which are not within the Company's control. Failure to obtain any required additional financing could materially adversely affect the growth, cash flow and earnings of the Company. In addition, the Company's pursuit of additional capital could result in the incurrence of additional debt or potentially dilutive issuances of additional equity securities.

The Company's ability to meet any future debt service obligations will be dependent upon the Company's future performance, which will be subject to oil and natural gas prices, the Company's level of production, general economic conditions and financial, business and other factors affecting the operations of the Company, many of which are beyond its control. There can be no assurance that the Company's future performance will not be adversely affected by such changes in oil and natural gas prices and/or production nor by such economic conditions and/or financial, business and other factors. In addition, there can be no assurance that the Company's business will generate sufficient cash flow from operations or that future bank credit will be available in an amount to enable the Company to service its indebtedness or make necessary expenditures. In such event, the Company would be required to obtain such financing from the sale of equity securities or other debt financing. There can be no assurance that any such financing will be available on terms acceptable to the Company. Should sufficient capital not be available, the Company may not be able to continue to implement its business strategy.

Acquisition Risks

The Company's business strategy includes focused acquisitions of , and drilling operations may be curtailed, delayed or canceled as a result of a variety of factors, including unexpected drilling conditions, pressure or irregularities in formations, equipment failures or accidents, weather conditions and shortages or delays in the delivery of equipment. In addition, any use by the Company of 3-dimensional seismic and other advanced technology requires greater pre-drilling expenditures than traditional drilling strategies. There can be no assurance as to the success of the Company's future drilling activities.

Geographic Concentration of Operations

All of the Company's current operations are located in Wyoming. Because of this concentration, any regional events that increase costs or competition, reduce availability of equipment or supplies, reduce demand or limit production will impact the Company more adversely than if the Company was geographically diversified.

Inability to Develop Additional Reserves

The Company's future success as an oil and natural gas producer depends upon its ability to find, develop and acquire additional oil and natural gas reserves that are economically recoverable. Except to the extent that the Company conducts successful development activities or acquires properties containing proved reserves, the Company's proved reserves will generally decline as reserves are produced. There can be no assurance that the Company will be able to

locate additional reserves or that the Company will drill economically productive wells or acquire properties containing proved reserves.

Certain Industry and Marketing Risks

The Company's operations are subject to the risks and uncertainties associated with drilling for, producing and transporting of oil and natural gas. The Company's future ability to market its natural gas and oil production will depend upon the availability and capacity of natural gas gathering systems and pipelines and other transportation facilities. Federal and state regulation of oil and natural gas production and transportation, general economic conditions, changes in supply and in demand all could materially adversely affect the Company's ability to market its oil and natural gas production.

Effects of Changing Prices

The future financial condition and results of operations of the Company depend upon the prices it receives for its oil and natural gas and the costs of acquiring, developing and producing oil and natural gas. Oil and natural gas prices have historically been volatile and are subject to fluctuations in response to changes in supply, market uncertainty and a variety of additional factors that are also beyond the Company's control. These factors include, without limitation, the level of domestic production, the availability of imported oil and natural gas, actions taken by foreign oil and natural gas producing nations, the availability of transportation systems with adequate capacity, the availability of competitive fuels, fluctuating and seasonal demand for natural gas, conservation and the extent of governmental regulation of production, weather, foreign and domestic government relations, the price of domestic and imported oil and natural gas, and the overall economic environment. A substantial or extended decline in oil and/or natural gas prices could have a material adverse effect on the Company's estimated value of its natural gas and oil reserves, and on its financial position, results of operations and access to capital. The Company's ability to maintain or increase its borrowing capacity, to repay current or future indebtedness and to obtain additional capital on attractive terms is substantially dependent upon oil and natural gas prices.

The Company uses the full cost method of accounting for its investment in oil and gas properties. Under the full cost method of accounting, all costs of acquisition, exploration and development of oil and gas reserves are capitalized into a "full cost pool" as incurred, and properties in the pool are depleted and charged to operations using the unit-of-production method based on the ratio of current production to total proved oil and gas reserves. To the extent that such capitalized costs (net of accumulated depreciation, depletion and amortization) less deferred taxes exceed the SEC PV-10 (present value discounted at 10% as dictated by the SEC) of estimated future net cash flow from proved reserves of oil and gas, and the lower of cost or fair value of unproved properties after income tax effects, such excess costs are charged against earnings. Once incurred, a write-down of oil and gas properties is not reversible at a later date even if oil or gas prices increase.

Operating Hazards and Uninsured Risks

The Company's operations are subject to the risks inherent in the oil and natural gas industry, including the risks of fire, explosions, blow-outs, pipe failure, abnormally pressured formations and environmental accidents such as oil spills, gas leaks, ruptures or discharges of toxic gases, brine or well fluids into the environment (including groundwater contamination). The occurrence of any of these risks could result in substantial losses to the Company due to injury or loss of life, severe damage to or destruction of property, natural resources and, equipment, pollution or other environmental damage, clean-up responsibilities, regulatory investigation and penalties and suspension of operations. In accordance with customary industry practice, the Company maintains insurance against some, but not all, of the risks described above. There can be no assurance that any insurance maintained by the Company will be adequate to cover any such losses or liabilities. Further, the Company cannot predict the continued availability of insurance, or availability at commercially acceptable premium levels. The Company does not carry business interruption insurance. Losses and liabilities arising from uninsured or under-insured events could have a material

adverse effect on the financial condition and operations of the Company. From time to time, due primarily to contract terms, pipeline interruptions or weather conditions, the producing wells in which the Company owns an interest have been subject to production curtailments. The curtailments range from production being partially restricted to wells being completely shut-in. The duration of curtailments varies from a few days to several months. In most cases the Company is provided only limited notice as to when production will be curtailed and the duration of such curtailments. The Company is not currently experiencing any material curtailment on its production.

Inflation and Changing Prices

The impact of inflation, as always, is difficult to assess. The Company cannot anticipate whether the present level of inflation will remain, however, a sudden increase in inflation and/or an increase in operating costs or drilling costs coupled with a reversal of current pricing could have an adverse effect on the operations of the Company.

INDEPENDENT AUDITORS' REPORT

To the Stockholders and Board of Directors

Powder River Basin Gas Corp.

Dallas, TX

We have audited the accompanying consolidated balance sheets of Powder River Basin Gas Corp. as of December 31, 2002 and 2001 and the related consolidated statements of operations, stockholders' equity and cash flows for the period ended December 31, 2002 and from inception on June 13, 2001 through December 31, 2001 and 2002. These consolidated financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these consolidated financial statements based on our audits.

We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the

consolidated financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the consolidated financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall consolidated financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the consolidated financial position of Powder River Basin Gas Corp. as of December 31, 2002 and 2001 and the consolidated results of their operations and their cash flows for the period ended December 31, 2002 and from inception on June 13, 2001 through December 31, 2001 and 2002, in conformity with accounting principles generally accepted in the United States of America.

The accompanying consolidated financial statements have been prepared assuming that the Company will continue as a going concern. As discussed in Note to the consolidated financial statements, the Company has suffered recurring operating losses and is dependent upon financing to continue operations, which raises substantial doubt about its ability to continue as a going concern. Management's plans with regard to these matters are also described in Note 2. The consolidated financial statements do not include any adjustments that might result from the outcome of this uncertainty.

F-6

POWDER RIVER BASIN GAS CORP.
Notes to the Consolidated Financial Statements
December 31, 2002 and 2001

NOTE 1 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

a. Organization

The Company was incorporated under the laws of Colorado on August 27, 1999 as Celebrity Sports Network, Inc. The principal activities since inception have been organizational matters and obtaining financing. The Company was formed in an effort to broaden the scope of public appearances available to current and former professional athletes.

The Company, however, changed their operations in 2001 through a reverse acquisition with Powder River Basin Gas Corp., an oil and gas company.

Power River Basin Gas Corp. (PRBG) was incorporated in the state of Colorado on June 13, 2001. The Company is engaged in the business of assembling and managing a portfolio of undeveloped acreage in the Powder River basin coal bed methane (CBM) play in Sheridan County, Wyoming. This acreage is located in a proven geological setting and near operators such as Western Gas Resources, Barrett Resources, Phillips Petroleum, J.M. Huber and others. The Company has leasehold interests in 8,096.83 net acres. Two wells have been drilled on one lease and eleven additional wells have been spudded.

Pursuant to a reverse acquisition and reorganization agreement, PRBG was acquired by Celebrity Sports on September 5, 2001. At the time of the acquisition, the Company changed its name to Power River Basin Gas Corp. The Company issued 9,000,000 shares of common stock for all the issued and outstanding stock of PRBG; thus, making PRBG a wholly-owned subsidiary of the Company.

Because PRBG is the accounting acquirer in the reverse acquisition, all financial history in these financial statements are that of PRBG.

The Company issued 9,000,000 shares of common stock for the receipt of 9,000,000 shares of PRBG, therefore, an adjustment to the shares outstanding was necessary to reflect the other shareholders of the Company at the time of acquisition. No goodwill was recorded in the acquisition, and the purchase method of accounting was used in recording the business combination.

b. Revenue and Cost Recognition

The Company's consolidated financial statements are prepared using the accrual method of accounting. The Company has elected a December 31, year end.

F-7

POWDER RIVER BASIN GAS CORP.
Notes to the Consolidated Financial Statements
December 31, 2002 and 2001

NOTE 1 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

Oil and Gas Properties

The full cost method is used in accounting for oil and gas properties. Accordingly, all costs associated with acquisition, exploration, and development of oil and gas reserves, including directly related overhead costs, are capitalized. In addition, depreciation on property and equipment used in oil and gas exploration and interest costs incurred with respect to financing oil and gas acquisition, exploration and development activities are capitalized in accordance with full cost accounting. Capitalized interest for the year ended December 31, 2002 was \$0. All capitalized costs of proved oil and gas properties subject to amortization are being amortized on the unit-of-production method using estimates of proved reserves. Investments in unproved properties and major development projects not subject to amortization are not amortized until proved reserves associated with the projects can be determined or until impairment occurs. If the results of an assessment indicate that the properties are impaired, the amount of the impairment is added to the capitalized costs to be amortized. As of December 31, 2002, proved oil and gas reserves had been identified on one of the Companies oil and gas properties, however, no extraction has begun; therefore, no amortization has been recorded for the year ending December 31, 2002. All other wells are incomplete as of

December 31, 2002.

c. Bad Debts

Bad debts on receivables are charged to expense in the year the receivable is determined uncollectible, therefore, no allowance for doubtful accounts is included in the financial statements. Amounts determined as uncollectible are not significant to the overall presentation of the financial statements.

d. Basis of Consolidation

The consolidated financial statements include the accounts of Celebrity Sports Network, Inc. and PRBG. All significant inter-company accounts and transactions have been eliminated in the consolidation.

e. Earnings (Loss) Per Share

The computation of earnings per share of common stock is based on the weighted average number of shares outstanding at the date of the financial statements.

	Income (Loss)	Shares	Per-Share
	(Numerator)	(Denominator)	Amount
For the year ended December 31, 2002:			
Basic EPS			
Income (loss) to common stockholders	\$ (1,344,796)	20,161,422	\$ (0.07)
For the year ended December 31, 2001:			
Basic EPS			
Income (loss) to common stockholders	\$ (1,786,236)	9,341,538	\$ (0.19)

POWDER RIVER BASIN GAS CORP.

Notes to the Consolidated Financial Statements

December 31, 2002 and 2001

NOTE 1 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

f. Cash and Cash Equivalents

The Company considers all highly liquid investments with maturities of three months or less to be cash equivalents.

g. Income Taxes

Income taxes are provided for the tax effects of transactions reported in the financial statements and consist of taxes currently due plus deferred taxes. Deferred taxes are provided on a liability method whereby deferred tax assets are recognized for deductible temporary differences and operating loss, tax credit carry-forwards, and deferred tax liabilities are recognized for taxable temporary differences. Temporary differences are the differences between the reported amounts of assets and liabilities and their tax bases. Deferred tax assets are reduced by a valuation allowance when, in the opinion of management, it is more likely than not that some portion or all of the deferred tax will not be realized. Deferred tax assets and liabilities are adjusted for the effects of changes in tax laws and rates on the date of enactment.

	December 31, 2002	December 31, 2001
Deferred tax assets:		
Net operation loss carry-forwards	\$ 3,100,000	\$1,700,000
Total Deferred Tax Assets	1,054,000	578,000
Valuation allowance for deferred tax assets	(1,054,000)	(578,000)
	\$ -	\$-

At December 31, 2002, the Company has net operating losses of \$3,131,032 which expire beginning in 2022.

h. Use of estimates

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect reported amounts of assets and liabilities, disclosure of contingent assets and liabilities at the date of the financial statements and revenues and expenses during the reporting period. In these financial statements assets and liabilities involve extensive reliance on management's estimates. Actual results could differ from those estimates.

i. Property and Equipment

In accordance with Financial Accounting Standards Board Statement No. 121, the Company records impairment of long-lived assets to be held and used or to be disposed of when indicators of impairment are present and the undiscounted cash flows estimated to be generated by those assets are less than the carrying amount. At December 31, 2002 and 2001, no impairments were recognized.

POWDER RIVER BASIN GAS CORP.

Notes to the Consolidated Financial Statements
--

December 31, 2002 and 2001

NOTE 1 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

j. Financial Instruments

The recorded amounts of financial instruments, including cash equivalents, accounts payable and accrued expenses, and long-term debt approximate their market values as of December 31, 2002. The Company has no investments in derivative financial instruments.

k. Newly Issued Pronouncements

In July 2001, the Financial Accounting Standards Board issued two statements - Statement 141, BUSINESS COMBINATIONS, and Statement 142, GOODWILL AND OTHER INTANGIBLE ASSETS.

Statement 141:

Eliminates the pooling method for accounting for business combinations.

Requires that intangible assets that meet certain criteria be reported separately from goodwill.

Requires negative goodwill arising from a business combination to be recorded as an extraordinary gain.

Statement 142:

Eliminates the amortization of goodwill and other intangibles that are determined to have an indefinite life.

Requires, at a minimum, annual impairment tests for goodwill and other intangible assets that are determined to have an indefinite life.

Upon adoption of these Statements, the Company is required to:

Re-evaluate goodwill and other intangible assets that arose from business combinations entered into before July 1, 2001. If the recorded other intangibles assets do not meet the criteria for recognition, they should be reclassified to goodwill. Similarly, if there are other intangible assets that meet the criteria for recognition but were not separately recorded from goodwill, they should be reclassified from goodwill.

Reassess the useful lives of intangible assets and adjust the remaining amortization periods accordingly.

Write-off any remaining negative goodwill.

The Company completed its assessment of the effects of these new pronouncements on its financial statements and believes the effects to be immaterial. The standards were implemented by the Company in its 2002 consolidated financial statements.

NOTE 2 - GOING CONCERN

The accompanying consolidated financial statements have been prepared assuming that the Company will continue as a going concern. The Company has suffered recurring operating losses and is dependent upon raising capital to continue operations. The financial statements do not include any adjustments that might result from the outcome of this uncertainty. It is management's plan to raise additional funds to continue the exploration of the leases, and then to begin extracting methane to sell and generate the necessary funds to continue operations.

NOTE 3 - LONG-TERM LIABILITIES

Long-term liabilities are detailed in the following schedules as of December 31, 2002:

Notes payable:

Note payable to a company, due in total in January 2002, including interest at 10%.	\$ 86,400
Note payable to an individual, due in total in January 2003, including interest at 12%	25,000
Note payable to an individual, due in total in May 2003	40,000
Convertible debenture to a Company, due in total by conversion of stock, including interest at 6%	260,000
Note payable to a Company, due in total on March 2003, including interest at 7.10%	215,000

Total Notes Payable	\$ 626,400

POWDER RIVER BASIN GAS CORP.

Notes to the Consolidated Financial Statements

December 31, 2002 and 2001

NOTE 3 - LONG-TERM LIABILITIES (Continued)

Notes payable - related party

Note payable to Taghmen Ventures, LLC a company owned partially by Greg Smith, the Company's president, unsecured and bears no interest.	\$ 317,700

Total notes payable - related party	317,700
Total long-term liabilities	944,100

Less: current portion-related party	(317,700)
Total current portion	(944,100)

Total Long-Term Liabilities	\$ -
Future minimum principal payments on notes payable are as follows:	
2003	\$ 944,100

Total	\$ 944,100

NOTE 4 - RELATED PARTY TRANSACTIONS

During 2001, Taghmen Ventures Ltd. advanced funds to the Company. Gregory C. Smith, the Company's Chairman, is the General Partner of Taghmen Ventures and owns approximately 1%. Advances of \$350,000 and payments of \$17,300 were made during 2001 and payments of \$15,000 were made during 2002. The note has a balance due at December 31, 2002 and 2001 of \$317,700 and \$332,700, respectively. The note is non-interest bearing and due in February 2002. During 2002 Gregory C. Smith converted \$100,000 in accrued compensation into 500,000 shares of common stock.

NOTE 5 - COMMITMENTS AND CONTINGENCIES

The Company has entered into various oil and gas leases from several land owners. Associated with the agreements, the Company is committed to various royalty agreements ranging from 15% to 25% of gross revenue production. Some of the leases also provide for a minimum royalty. As of December 31, 2002, no royalties were due.

NOTE 6 - STOCK TRANSACTIONS

On June 13, 2001, the Company issued 3,350,000 shares of common stock for organization expenses at \$0.001 per share.

In September 2001, the Company issued 5,650,000 shares for services provided in connection with the acquisition of Powder River Basin Gas Corp. at \$0.001 per share.

POWDER RIVER BASIN GAS CORP.

Notes to the Consolidated Financial Statements

December 31, 2002 and 2001

NOTE 6 - STOCK TRANSACTIONS (Continued)

In September 2001, 5,040,000 shares of the Company's common stock was returned due to noncompletion of services in connection with the acquisition of Powder River Basin Gas Corp. at \$.001 per share.

In September 2001, the Company issued 100,000 shares to a vendor for satisfaction of accounts payable at \$0.81 per share.

In October 2001, the Company issued 560,000 shares of treasury stock for services at \$0.81 per share.

In October 2001, the Company authorized the issuance of 600,000 shares for cash of \$664,990 at \$1.10 per share, pursuant to a Reg D 506 exempt offering,

In November 2001, the Company issued 920,000 shares of treasury stock for services at \$1.11 per share.

In December 2001, the Company issued 247,833 shares to satisfy debt associated with the acquisition of oil and gas leases at \$1.00 per share.

In January 2002, the Company issued 250,000 shares of treasury stock to a vendor to satisfy accounts payable at \$0.61 per share.

In January 2002, the Company issued 630,000 shares of treasury stock for services at \$0.61 per share.

In March 2002, the Company issued 30,000 shares of common stock at \$1.00 per share.

In March 2002, the Company issued 1,130,000 shares of treasury stock for services at \$0.59 per share.

In July 2002, the Company issued 630,000 shares of treasury stock for services at \$0.09 per share.

In July 2002, the Company issued 500,000 shares of common stock to a related party for reduction of debt at \$0.20 per share.

NOTE 7 - SUBSEQUENT EVENTS

In March 2003, loans associated with leased properties were in default and as a result properties were given back to satisfy debt, properties were valued at \$455,000.

In January 2003, 4,000,000 shares of common stock was issued to reduce debt in the amount of \$130,000.

NOTE 8 - PRIOR PERIOD RESTATEMENT FOR COMMON STOCK TRANSACTIONS

The Company previously omitted the return of 5,040,000 shares of their common stock to treasury stock and the subsequent issuance of 1,480,000 shares of treasury stock. The 5,040,000 shares were returned to the Company in September at a value of \$5,040. In October and November, the Company issued 1,480,000 shares of treasury stock for services valued at \$1,478,250. Due to the omission of these transactions, the financial statements at December 31, 2001 have been restated.

Changes In and Disagreements With Accountants on Accounting and Financial Disclosure

During 2001, Powder River Basin Gas Corp. elected to change from the auditing accounting firm of:

Cordovano and Harvey, P.C.

201 Steele Street, Suite 300

Denver, Colorado 80206

To the auditing accounting firm of:

Chisholm & Associates

P.O. Box 540216

North Salt Lake, Utah 84054

The Company's management is familiar with the new firm and felt that the new independent accountant will provide quality and timely service.

The Board of Directors approved the change in accounting firm as of November 27, 2001.

The new accounting firm was not consulted prior to engagement on any specific accounting matter either completed or proposed.

Powder River Basin Gas Corp. has never had nor anticipates having, nor had during the most recent two fiscal years or any subsequent interim period proceeding the date of change, any disagreements with accountants on matters of accounting, financial disclosure, matter of accounting principles or practices, or auditing scope or procedure; nor has any principal accountant, currently or in the past recent years, resigned or declined to stand for reelection.

The financial statements audited by the principal accountant for the past two years do not contain an adverse opinion or disclaimer of opinion or were modified as to uncertainty, audit scope or accounting principles.

Directors, Executive Officers, Promoters and Control Persons; Compliance with Section 16(a) of the Exchange Act

Powder River Basin Gas Corp.'s sole director and principal executive officer is as follows:

Name	Age	Position
Gregory C. Smith	42	President and Chairman of the Board

Gregory C. Smith has been involved in the workout and structured finance business for eighteen years. From 1996 to 1998, Mr. Smith was an independent merchant banker in the real estate industry, where he primarily acted as an investor and developer. Since 1998, he has served as President of Renaissance Companies, Inc., a privately held firm specializing in providing debt and structured finance advisory services to real estate opportunity funds, institutional investors and developers. Previous experience includes work in the commercial real estate field as both a principle and advisor and the financing and ownership of oil and gas properties in Texas and Oklahoma. Currently, Mr. Smith also serves as a Special Consultant to Fossil Bay Resources, a junior oil and gas company listed on the CDNX. Mr. Smith holds a Bachelor of Science in Business from the University of Nevada.

Compliance with Section 16(a) of the Securities Exchange Act of 1934

Section 16(a) of the Securities Exchange Act of 1934 requires the company's directors and officers, and persons who own more than ten-percent (10%) of the company's common stock, to file with the Securities and Exchange Commission reports of ownership on Form 3 and reports of change in ownership on Forms 4 and 5. Such officers, directors and ten-percent stockholders are also required to furnish the company with copies of all Section 16(a) reports they file. Based solely on its review of the copies of such forms received by the company and on written representations from certain reporting persons, the Company believes that all Section 16(a) reports applicable to its officers, directors and ten-percent stockholders with respect to the fiscal years ended December 31, 2002 and 2001 were filed.

Executive Compensation

Since inception, Powder River Basin Gas Corp. has paid no cash compensation to its officers or directors. Officers of the company will be reimbursed for out-of-pocket expenses and may be compensated for the time devoted to the Company. In addition, officers may receive compensation for services performed on behalf of the Company. The terms of any such compensation will be determined on the basis of the nature and extent of the services which may be required and will be no less favorable to the company than the charges for similar services made by independent third parties who are similarly qualified.

Security Ownership of Certain Beneficial Owners and Management

The following table sets forth certain information regarding the beneficial ownership of Powder River Basin Gas Corp.'s common stock as of December 2001, by each person or entity known to be the beneficial owner of more than 5% of the outstanding shares of common stock, each of our directors and named executive officers.

Title of Class	Name of Beneficial Owner	Number Shares	% of Class
Common Stock	Gregory C. Smith	4,430,000	21.68
Common Stock	Alan L. Edgar	1,200,000	5.87
Common Stock	Taghmen Ventures Ltd.	5,455,000	26.69
Total Shares of 5% or more Beneficial Ownership		11,085,000	54.24
Total Shares Issued and Outstanding		20,437,833	

Gregory C. Smith is the General Partner for Taghmen Ventures Ltd. and has dispositive control of those shares and is the beneficial owner of 1% of the outstanding shares thereof.

Certain Relationships and Related Transactions

During 2001, Taghmen Ventures Ltd. advanced funds to the Company. The Company's president is the general partner of Taghmen Ventures Ltd. and is the beneficial owner of one percent (1%) of the entity. Advances of \$350,000 were made in 2001 and payments of \$15,000 and \$17,300 were made during 2002 and 2001, respectively. Controls and Procedures

Within the 90 days prior to the date of this Form 10-KSB, PRVB carried out an evaluation, under the supervision and with the participation of management, including its chief executive officer and chief accounting officer, of the effectiveness of the design and operation of its disclosure controls and procedures pursuant to Exchange Act Rule 13a-14. Based upon that evaluation, its chief executive officer and chief accounting officer concluded that the disclosure controls and procedures are effective in timely alerting them to material information relating to the company required to be included in periodic SEC filings. There have been no significant changes in internal controls or in other factors, which could significantly affect internal controls subsequent to the date management carried out their evaluation
