Cautionary Statement Regarding Forward-looking Statements

This quarterly report contains forward-looking statements within the meaning of the U.S. federal securities laws. We intend these forward-looking statements to be covered by the safe harbor provisions for forward-looking statements in the United States securities laws. In some cases, these statements can be identified by the use of forward-looking words such as may, should, could, anticipate, estimate, expect, plan, believe, predict, potential, and intend. Forward-looking statements contained in this report include information regarding our estimates of losses related to hurricanes and other catastrophes, our expectations regarding pricing and other market conditions, our growth prospects, the amount of our acquisition costs, the amount of our net losses and loss reserves, the projected amount of our capital expenditures, managing interest rate and foreign currency risks, valuations of potential interest rate shifts and foreign currency rate changes and measurements of potential losses in fair market values of our investment portfolio. Forward-looking statements only reflect our expectations and are not guarantees of performance. These statements involve risks, uncertainties and assumptions. Actual events or results may differ materially from our expectations. Important factors that could cause actual events or results to be materially different from our expectations include (1) our limited operating history, (2) the occurrence of natural and man-made disasters, (3) actual claims exceeding our loss reserves, (4) the failure of any of the loss limitation methods we employ, (5) the effects of emerging claims and coverage issues, (6) the failure of our cedants to adequately evaluate risks, (7) the loss of one or more key executives, (8) a decline in our ratings with rating agencies, (9) loss of business provided to us by our major brokers, (10) changes in governmental regulations, (11) increased competition, (12) general economic conditions, (13) changes in the political environment of certain countries in which we operate or underwrite business and (14) the other matters set forth under Item 1A, Risk Factors and Item 7, Management's Discussion and Analysis of Financial Condition and Results of Operations included in our Annual Report on Form 10-K for the year ended December 31, 2006 filed with the SEC on March 1, 2007. We undertake no obligation to update or revise publicly any forward-looking statements, whether as a result of new information, future events or otherwise.

AXIS CAPITAL HOLDINGS LIMITED
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

1. BASIS OF PRESENTATION AND ACCOUNTING POLICIES

Basis of Presentation

Our consolidated balance sheet at June 30, 2007 and the consolidated statements of operations, comprehensive income, shareholders' equity and cash flows for the periods ended June 30, 2007 and 2006 have not been audited. The balance sheet at December 31, 2006 is derived from the audited financial statements.

These statements have been prepared in accordance with U.S. Generally Accepted Accounting Principles (U.S. GAAP) for interim financial information and with the instructions to Form 10-Q and Article 10 of Regulation S-X. Accordingly, they do not include all of the information and footnotes required by U.S. GAAP for complete financial statements. In the opinion of management, these financial statements reflect all adjustments (consisting of normal recurring accruals) considered necessary for a fair presentation of our financial position and results of operations as at the end of and for the periods presented. The results of operations for any interim period are not necessarily indicative of the results for a full year. All significant inter-company accounts and transactions have been eliminated. In these notes, the terms we, us, our, or the Company refer to AXIS Capital Holdings Limited and its direct and indirect subsidiaries.

The following information is unaudited and should be read in conjunction with our Annual Report on Form 10-K for the year ended December 31, 2006. Tabular dollars are in thousands, except per share amounts. Certain reclassifications have been made to prior period amounts to conform to the current period presentation. In particular, we reclassified the additional capital above par value on our Series A and B preferred shares from additional paid-in capital to the preferred shares caption in our Consolidated Balance Sheets and Statements of Changes in Shareholders' Equity.

Adoption of New Accounting Standards

The terms FAS and FASB used in these notes refer to Statements of Financial Accounting Standards issued by the United States Financial Accounting Standards Board.

On July 13, 2006, the FASB issued Interpretation No. 48, Accounting for Uncertainty in Income Taxes - An Interpretation of FASB Statement No. 109 (FIN 48). This Interpretation prescribes detailed guidance for the financial statement recognition, measurement and disclosure of uncertain tax positions recognized in an enterprise's financial statements in accordance with FASB Statement No. 109, Accounting for Income Taxes. Under FIN 48, the tax benefits of uncertain tax positions may only be recognized when the position is more-likely-than-not to be sustained upon audit by the relevant taxing authorities. The amount recognized represents the largest amount of tax benefit that is greater than fifty percent likely of being recognized. We adopted the provisions of FIN 48 on January 1, 2007. There were no unrecognized tax benefits as of the date of adoption and there was no change in the liability for unrecognized tax benefits. Our U.S. subsidiaries are not under examination but remain subject to examination in the U.S. for tax years 2003-2006. Our various European operating subsidiaries and branch operations in Ireland, the United Kingdom, and Switzerland are not under examination in any of these tax jurisdictions, but generally remain subject to examination for tax years 2002-2006.

Accounting Standards Not Yet Adopted

In September 2006, the FASB issued FAS No. 157, Fair Value Measurement (FAS 157). This Statement provides guidance for using fair value to measure assets and liabilities. Under this standard, the definition of fair value focuses on the price that would be received to sell the asset or paid to transfer the liability (an exit price), not the price that would be paid to acquire the asset or received to assume the liability (an entry price). FAS 157 clarifies that fair value is a market-based measurement, not an entity-specific measurement, and sets out a fair value hierarchy with the highest priority being quoted prices in active markets and the lowest priority to unobservable data. Further, FAS 157 requires tabular disclosures of the fair value measurements by level within the fair value hierarchy. FAS 157 was effective for fiscal years beginning after November 15, 2007, and interim periods within those fiscal years. Although early adoption was permitted as of January 1, 2007, we have not yet adopted FAS 157 and are evaluating the potential impact of adoption on our financial condition and results of operations.

1. BASIS OF PRESENTATION AND ACCOUNTING POLICIES (continued)

In February 2007, the FASB issued FAS No. 159, *The Fair Value Option for Financial Assets and Financial Liabilities* (FAS 159). This standard permits an entity to irrevocably elect fair value on a contract-by-contract basis as the initial and subsequent measurement attribute for many financial instruments and certain other items including insurance contracts. An entity electing the fair value option would be required to recognize changes in fair value in earnings and provide disclosure that will assist investors and other users of financial information to more easily understand the effect of the company's choice to use fair value on its earnings. Further, the entity is required to display the fair value of those assets and liabilities for which the company has chosen to use fair value on the face of the balance sheet. This standard does not eliminate the disclosure requirements about fair value measurements included in FAS 157 and FAS No. 107, *Disclosures about Fair Value of Financial Instruments*. FAS 159 was effective for fiscal years beginning after November 15, 2007. Although early adoption was permitted as of January 1, 2007, we have not yet adopted FAS 159.

2. SEGMENT INFORMATION

Our underwriting operations are organized around our two global underwriting platforms, AXIS Insurance and AXIS Re and therefore we have determined that we have two reportable segments, insurance and reinsurance. We do not allocate our assets by segment as we evaluate the underwriting results of each segment separately from the results of our investment portfolio.

Insurance

Our insurance segment provides insurance coverage on a worldwide basis. In January 2007, we announced the reorganization of AXIS Insurance to further strengthen the global operations of the segment. This reorganization reflects the management of AXIS Insurance along global product lines rather than by geographical location. The new structure enables us to design insurance programs on a global basis in alignment with the global needs of many of our clients. Through December 31, 2006, we subdivided our insurance segment into two sub-segments: global insurance and U.S insurance. However, as a result of the reorganization such sub-segment information is no longer relevant.

The following are the lines of business in our insurance segment:

- *Property*: provides physical damage and business interruption coverage for industrial and commercial properties and physical damage, business interruption and liability coverage for onshore energy properties and operations. The book consists of both primary and excess risks, some of which are catastrophe-exposed.
- *Marine*: provides coverage for hull, liability, cargo and specie and recreational marine risks. These risks include property damage or physical loss to ships, pollution damage caused by vessels on a sudden and accidental basis, protection for general cargo and the contents of armored cars, vaults, exhibitions and museums, and specific war related risks. This line of business also provides physical damage, business interruption and liability coverage for offshore energy property and operations.
- *Terrorism*: provides coverage for physical damage and business interruption of an insured following an act of terrorism.
- *Aviation*: includes hull and liability and specific war coverage for passenger and cargo airlines and privately owned aircraft as well as select aviation product liability coverage.
- *Political risk*: generally provides protection against sovereign default or sovereign actions resulting in impairment of cross-border investments for banks and major corporations. It also provides protection on structured credit based transactions where lenders seek to mitigate some of the non-payment risk of their borrowers, both public and private.

2. **SEGMENT INFORMATION (continued)**

- *Professional lines:* primarily consists of coverage for directors and officers liability, errors and omissions liability and employment practices liability.
- *Liability:* primarily targets general liability and umbrella and excess liability in the U.S. excess and surplus lines markets. Target classes include mercantile, manufacturing and building/premises, with particular emphasis on commercial and consumer products, commercial construction and miscellaneous general liability.
- *Accident & Health:* primarily provides employee medical coverage for self-insured, small and medium sized employers for losses in excess of a retention.

Reinsurance

Edgar Filing: AXIS CAPITAL HOLDINGS LTD - Form 10-Q

Our reinsurance segment provides property and casualty reinsurance to insurance companies on a worldwide basis. The following are the lines of business we write on both a treaty and facultative basis in our reinsurance segment:

- *Catastrophe*: provides protection for most catastrophic losses that are covered in the underlying insurance policies written by our ceding company clients. The exposure in the underlying policies is principally property exposure but also covers other exposures including workers compensation, personal accident and life. The principal perils in this portfolio are hurricane and windstorm, earthquake, flood, tornado, hail and fire. In some instances, terrorism may be a covered peril or the only peril. We underwrite catastrophe reinsurance principally on an excess of loss basis, meaning that our exposure only arises when our customers' claims exceed a certain retained amount.
- *Property*: includes reinsurance written on both a pro rata and a per risk basis and covers underlying personal lines and commercial property exposures. Property pro rata treaty reinsurance covers a cedent's aggregate losses from all events in the covered period on a proportional basis. Property per risk treaty reinsurance reinsures a portfolio of particular property risks of ceding companies on an excess of loss basis.
- *Professional Liability*: covers directors' and officers' liability, employment practices liability, medical malpractice and miscellaneous errors and omissions insurance risks.
- *Credit and Bond*: consists principally of reinsurance of trade credit insurance products and includes both proportional and excess-of loss structures. The underlying insurance indemnifies sellers of goods and services against a payment default by the buyer of those goods and services. Also included in this book is coverage for ceding insurers against losses arising from a broad array of surety bonds issued by bond insurers principally to satisfy regulatory demands in a variety of jurisdictions around the world, but predominantly in Europe.
- *Motor*: provides coverage to insurers for motor liability losses arising out of any one occurrence. The occurrence can involve one or many claimants where the ceding insurer aggregates the claims from the occurrence.
- *Liability*: provides coverage to insurers of standard casualty lines, including auto liability, general liability, personal and commercial umbrella and workers' compensation.
- *Other*: includes aviation, engineering, marine, personal accident and crop reinsurance.

At June 30, 2007, 2,336 securities (2006: 1,945) were in an unrealized loss position with a fair value of \$5,686 million (2006: \$4,418 million) of which 1,473 securities (2006: 1,497) have been in an unrealized loss position for 12 months or greater and have a fair value of \$2,310 million (2006: \$2,639 million). The unrealized losses from these securities were not a result of credit, collateral or structural issues. In the first six months of 2007, we recorded an impairment charge of \$1.8 million (2006: \$0.6 million) relating to 8 securities (2006: 13) that we determined to be other than temporarily impaired which were included in net realized investment losses in the Consolidated Statements of Operations.

4. RESERVE FOR LOSSES AND LOSS EXPENSES

The following table represents an analysis of paid and unpaid losses and loss expenses and a reconciliation of the beginning and ending unpaid losses and loss expenses for the six months ended June 30:

	2007	2006
Gross unpaid losses and loss expenses at beginning of period	\$ 5,015,113	\$ 4,743,338
Less reinsurance recoverable balances	(1,293,660)	(1,455,248)
Less reinsurance recoverable balances on paid losses	(65,494)	(62,862)
Net balance at beginning of period	3,655,959	3,225,228
Net incurred losses related to:		
Current year	914,305	856,180
Prior years	(162,784)	(125,540)
	751,521	730,640
Net paid losses related to:		
Current year	(36,771)	(33,906)
Prior years	(359,890)	(489,008)
	(396,661)	(522,914)
Foreign exchange loss	11,534	9,664
Net unpaid losses and loss expenses at end of period	4,022,353	3,442,618
Reinsurance recoverable balances	1,217,807	1,271,452
Reinsurance recoverable balances on paid losses	119,904	121,091
Gross unpaid losses and loss expenses at end of period	\$ 5,360,064	\$ 4,835,161

Net incurred losses include net favorable prior period reserve development of \$163 million, and \$126 million during the six months ended June 30, 2007 and 2006, respectively. Prior period development arises from changes to loss estimates recognized in the current period that relate to loss reserves first reported in previous calendar years. These reserve changes were made as part of our regular quarterly reserving process and primarily arose from better than expected emergence of actual claims relative to expectations. The net favorable development in 2007 was predominately related to our property lines from accident year 2006. For these lines, accident year 2006 has largely proven to be a benign loss year with limited late reported loss activity and minimal deterioration of previously reported claims. The net favorable development in 2006 was related to our short tail lines of business and was primarily generated from accident years 2004 and 2005.

5. STOCK-BASED COMPENSATION

In May 2007, our shareholders approved the AXIS Capital Holdings Limited 2007 Long-Term Equity Compensation Plan (2007 Plan). The 2007 Plan provides for, among other things, the grant of restricted stock awards and units, non-qualified and incentive stock options, and other equity based awards to our employees, directors and consultants. The maximum number of our common shares that may be delivered under our 2007 Plan is 5,000,000. As a result of this 2007 Plan, the 2003 Long-Term Equity Compensation and 2003 Directors Long-Term Equity Compensation Plan were terminated, except that all related outstanding awards will remain in effect.

During the three months ended June 30, 2007 and 2006, we incurred compensation costs of \$9.1 million and \$6.6 million, respectively, for all stock compensation plans, and recorded tax benefits thereon of \$1.7 million and \$1.2 million, respectively. For the first six months of 2007 and 2006, we incurred compensation costs of \$16.5 million and \$12.7 million, respectively, for all stock compensation plans, and recorded tax benefits thereon of \$3.6 million and \$2.6 million, respectively.

The following is a summary of activity under our existing stock compensation plans for the first six months in 2007 and 2006:

Restricted Stock

	2007		2006	
	Number of Restricted Stock	Weighted Average Grant Date Fair Value	Number of Restricted Stock	Weighted Average Grant Date Fair Value
Unvested - beginning of year	2,229	\$ 29.95	1,176	\$ 28.40
Granted	1,572	32.93	1,279	31.01
Vested	(432)	29.61	(86)	27.75
Forfeited	(41)	31.29	(77)	25.42
Unvested - end of period	3,328	\$ 31.39	2,292	\$ 29.98

At June 30, 2007, there was \$63.1 million of unrecognized compensation cost related to restricted stock awards which is expected to be recognized over the weighted average period of 1.5 years. The total fair value of shares vested during the first six months of 2007 was \$12.8 million.

Stock Options

	2007		2006	
	Number of Stock Options	Weighted Average Exercise Price	Number of Stock Options	Weighted Average Exercise Price
Outstanding - beginning of year	5,147	\$ 18.75	6,174	\$ 19.11
Granted			45	26.90
Exercised	(287)	22.09	(763)	18.79
Forfeited	(5)	28.02	(58)	27.32
Outstanding - end of period	4,855	\$ 18.54	5,398	\$ 19.13

At June 30, 2007, there was \$0.5 million of unrecognized compensation cost related to the stock option awards which will be fully recognized during the remainder of 2007. The total intrinsic value of options exercised during the first six months of 2007 was \$4.2 million, and we received proceeds of \$6.3 million.

6. EARNINGS PER COMMON SHARE

The following table sets forth the comparison of basic and diluted earnings per common share:

	Three months ended June 30		Six months ended June 30	
	2007	2006	2007	2006
Basic earnings per common share				
Net income available to common shareholders	\$ 251,590	\$ 223,400	\$ 479,168	\$ 418,585

Weighted average common shares outstanding - diluted	166,320	163,325	166,175	163,442
Diluted earnings per common share	\$ 1.51	\$ 1.37	\$ 2.88	\$ 2.56

For the three and six months ended June 30, 2006, there were 1,620,168 and 1,763,959 restricted shares and options, respectively, which would have resulted in the issuance of common shares that were excluded in the computation of diluted earnings per share because the effect would be anti-dilutive. There were no such anti-dilutive restricted shares or options for the three or six months ended June 30, 2007.

7. SHAREHOLDERS EQUITY

On May 10, 2007, we repurchased from Trident II, L.P and affiliated entities, an aggregate of 2,700,000 shares of our common stock at \$37.25 per share, for a total purchase price of \$100,575,000. These shares were subsequently cancelled.

8. COMMITMENTS AND CONTINGENCIES

(i) Legal Proceedings

Except as noted below, we are not a party to any material legal proceedings. From time to time, we are subject to routine legal proceedings, including arbitrations, arising in the ordinary course of business. These legal proceedings generally relate to claims asserted by or against us in the ordinary course of insurance or reinsurance operations. In our opinion, the eventual outcome of these legal proceedings is not expected to have a material adverse effect on our financial condition or results of operations.

In 2005, a putative class action lawsuit was filed against our U.S. insurance subsidiaries. In re Insurance Brokerage Antitrust Litigation was filed on August 15, 2005 in the United States District Court for the District of New Jersey and includes as defendants numerous insurance brokers and insurance companies, including our U.S. insurance subsidiaries. The lawsuit alleges antitrust and Racketeer Influenced and Corrupt Organizations Act (RICO) violations in connection with the payment of contingent commissions and manipulation of insurance bids and seeks damages in an unspecified amount. On October 3, 2006, the District Court granted, in part, motions to dismiss filed by the defendants, and ordered plaintiffs to file supplemental pleadings setting forth sufficient facts to allege their antitrust and RICO claims. After plaintiffs filed their supplemental pleadings, defendants renewed their motions to dismiss. On April 15, 2007, the District Court dismissed without prejudice plaintiffs' complaint, as amended, and granted plaintiff thirty (30) days to file another amended complaint and/or revised RICO Statement and Statements of Particularity. In May 2007, plaintiffs filed (i) a Second Consolidated Amended Commercial Class Action complaint, (ii) a Revised Particularized Statement Describing the Horizontal Conspiracies Alleged in the Second Consolidated Amended Commercial Class Action Complaint, and (iii) a Third Amended Commercial Insurance Plaintiffs' RICO Case Statement Pursuant to Local Rule 16.1(B)(4). On June 21, 2007, the defendants filed renewed motions to dismiss, which are pending before the court. We believe that the lawsuit is completely without merit and we continue to vigorously defend the filed action.

(ii) Dividends for Common Shares and Preferred Shares

On May 11, 2007 the Board of Directors declared a dividend of \$0.165 per common share to shareholders of record at June 29, 2007 and payable on July 16, 2007. Additionally, the Board of Directors declared a dividend of \$0.453125 per Series A 7.25% Preferred share and a dividend of \$1.875 per Series B 7.5% Preferred share. The Series A Preferred share is payable on July 16, 2007, to shareholders of record at June 29, 2007 and the Series B Preferred share is payable on September 3, 2007 to shareholders of record at August 15, 2007.

(iii) Reinsurance Purchase Commitment

During the second quarter of 2007, we purchased reinsurance coverage for our insurance lines of business. The minimum reinsurance premiums are contractually due on a quarterly basis in advance. Accordingly at June 30, 2007, we have an outstanding reinsurance purchase commitment of \$139 million (2006: \$47 million).

Item 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following is a discussion and analysis of our financial condition and results of operations. This should be read in conjunction with the consolidated financial statements and related notes included in Item 1 of this report and also our Management's Discussion and Analysis of Results of Operations and Financial Condition contained in our Annual Report on Form 10-K for the year ended December 31, 2006. Tabular dollars are in thousands, except per share amounts. Amounts in tables may not reconcile due to small rounding differences.

Financial Measures

Edgar Filing: AXIS CAPITAL HOLDINGS LTD - Form 10-Q

We believe the following financial indicators are important in evaluating our performance and measuring the overall growth in value generated for our common shareholders:

Annualized return on average common equity (ROACE): ROACE represents the level of net income available to common shareholders generated from the average of the opening and closing common shareholders equity during the period. Our objective is to generate superior returns on capital that appropriately reward our shareholders for the risks we assume and to grow revenue only when we deem the returns meet or exceed our requirements. ROACE was 24.1% and 23.6% for the three and six months ended June 30, 2007, respectively, compared to 27.6% and 26.4% for the same periods of 2006.

Diluted book value per common share: This is a non-GAAP financial measure; for further information refer to Non-GAAP Financial Measures at the end of Item 2. We consider diluted book value per common share an appropriate measure of our returns to common shareholders, as we believe growth in our book value on a diluted basis ultimately translates into growth of our stock price. Diluted book value per share increased from \$24.02 at December 31, 2006 to \$25.76 at June 30, 2007. The increase was substantially due to earnings generated in the first six months of 2007.

Cash dividends per common share: Our dividend policy is an integral part of the value we create for our shareholders. Our quarterly cash dividend was \$0.165 per common share in the first two quarters of 2007 compared to \$0.15 per common share in the first two quarters of 2006. In December 2006, our Board of Directors authorized a 10% increase in the quarterly dividend.

RESULTS OF OPERATIONS: THREE AND SIX MONTHS ENDED JUNE 30, 2007 AND 2006

The increases in net income available to common shareholders in the three and six months ended June 30, 2007 over the corresponding periods of 2006 were largely driven by the same factors. These were as follows:

- Additional underwriting income in our reinsurance segment, primarily due to increased net *favorable prior period reserve development*.
- An increase in net investment income driven by a combination of a larger investment base and higher investment yields.

These increases were partially offset by:

- *Reduced underwriting income in our insurance segment. This was largely in relation to the year-to-date results, for which there was a lower level of favorable prior period reserve development.*
- *Higher interest expenses and lower foreign exchange gains (included in other revenues and expenses).*

The above factors, including changes in the individual components of our combined ratio, are discussed further below.

Total	\$ 755,342	\$ 820,732	(8)%	\$ 1,894,700	\$ 1,813,060	5 %

Gross premiums written decreased in the second quarter of 2007 compared to the same quarter in 2006 as we reduced insurance business under competitive pricing pressure and as reinsurance clients increased their retentions. Also, with respect to our reinsurance segment, the second quarter of 2006 included significant upward adjustments to prior year premium estimates on our property pro rata book. The year-to-date increase in gross premiums written is driven by growth of our property and casualty reinsurance business in the U.S and Europe. Approximately 4 percentage points of the increase in reinsurance for the six months related to the impact of exchange rate movements.

The increase in premiums ceded in our insurance segment in the three and six months ended June 30, 2007 compared to the same periods of 2006 relate to additional cover purchased in our professional lines, terrorism and property lines of business. In late 2006, we created an integrated Ceded Reinsurance Unit within our insurance segment that coordinates our reinsurance purchasing to improve efficiency of reinsurance purchasing activities and take advantage of any new opportunities in the marketplace. As a result, we were able to expand our reinsurance coverage during 2007 at cost effective levels.

The table below breaks out net premiums earned by segment:

	Net premiums earned				Six months ended June 30			
	Three months ended June 30		2006		2007		2006

Changes in net premiums earned reflect period to period changes in net premiums written and business mix, together with normal variability in premium earning patterns. Net premiums earned increased 2% and 5% in the three and six months ended June 30, 2007, respectively, from the same periods in 2006. The increases reflect the continued growth of our reinsurance business in the U.S and Europe, including significantly greater premiums written on January 1, 2007 compared to 2006, a major renewal date for our reinsurance business. The reductions in net premiums earned in our insurance segment primarily reflect changes in business mix.

Prior period development	(14.0))%	(9.5))%	(11.8))%	(9.6))%
Loss ratio	51.7	%	54.8	%	54.5	%	55.7	%

Our current year loss ratio can vary from period to period depending on a number of variables that include the level of estimated losses, changes in our mix of business and changes in the benchmark assumptions used to establish our loss ratios. These benchmarks are developed by our independent actuaries primarily using broader market data that is adjusted for changes in underlying rates, terms and conditions.

Prior period development was the net favorable result of several underlying reserve developments from prior accident years, identified during our quarterly reserving process. The following tables break out our prior period development by segment for the periods indicated:

	Three months ended		Six months ended	
	June 30		June 30	
	2007	2006	2007	2006
Insurance	\$ 55,814	\$ 58,186	\$ 84,541	\$ 124,132
Reinsurance	41,006	6,285	78,243	1,408
Total	\$ 96,820	\$ 64,471	\$ 162,784	\$ 125,540

For further detail on the prior period development refer to the segment discussions below. While we believe that our loss reserves at June 30, 2007 are adequate, new information may lead to future developments in ultimate loss and loss expenses significantly greater or less than the reserves currently provided. In addition, conditions and trends that affected the development of liabilities in the past may not necessarily occur in the future. Accordingly, it is inappropriate to anticipate future redundancies or deficiencies based on historical experience.

Acquisition cost ratio: The decreases in our acquisition cost ratio were primarily due to an increase in commissions received on ceded premiums associated with the additional reinsurance coverage purchased in our insurance segment during 2007.

General and Administrative ratio: The increases in our general and administrative ratio reflect the costs associated with supporting the growth of our business. In particular, we incurred higher staffing costs in 2007 relating to the expansion of our insurance operations in the U.S., including those related with our acquisition of the Media Pro business during the second quarter. For further information on Media Pro refer to the insurance segment discussion below.

Net Investment Income and Net Realized Investment Gains/Losses

Our investment portfolio is structured to preserve capital and provide us with a high level of liquidity. Additionally we invest our portfolio with a focus on total return rather than establishing yield or income targets.

The following table provides a breakdown of net investment income, net realized investment gains/losses and also the associated yields and returns, for the periods indicated:

(1) Includes accrued interest receivable and is net of unsettled trades.

(2) Calculated by dividing the net investment income generated from invested assets by the average balance of the assets managed by our external investment managers.

(3) In calculating total return, we include net investment income, net realized investment gains and losses and the change in unrealized gains and losses generated by our average invested assets (and accrued interest thereon) / cash and investments. Refer to the Balance Sheet section for a breakdown of invested assets and cash and investments .

Net investment income: Net investment income in the three and six months ended June 30, 2007 increased 24% and 29%, respectively, over the same periods in 2006. The increases were driven by larger investment bases and higher investment yields (see table above). The growth in our annualized effective yield was primarily due to higher U.S. interest rates at the short end of the yield curve. The yield on our portfolio may vary significantly from period to period due primarily to the timing of cash flows, changes in interest rates and changes in asset allocation. The reduction in investment income on other investments in the second quarter of 2007 was primarily due to the loss on our life settlements investment of \$17 million (\$20 million loss in the first six months of 2007). This was related to the negative mark-to-market impact of rising interest rates on the fair value of this investment. All other significant assumptions in calculating the fair value of our life settlement investments have not changed. Investment income on the remaining other investment portfolio, which consists of collateralized loan obligations, hedge funds, and credit funds increased during 2007 due to larger allocations and higher total returns from those investments.

Net realized investment losses/gains: The majority of our portfolio is invested in the fixed income market and as a result the level of realized gains and losses on these investments are highly correlated to fluctuations in interest rates. The effect of increasing interest rates up to and throughout the first six months of 2007 and 2006 negatively impacted the price of fixed income securities resulting in realized losses.

Total return: Our portfolio is managed to maximize total return within certain guidelines. Our return for the first six months of 2007 benefited from a growing allocation to our higher returning other investments, compared to the same period in 2006. However, our considerable allocation to fixed income securities, which are impacted by changes in intermediate U.S. Treasury yields, significantly impacts the overall returns.

Other Revenues and Expense items

The following tables set forth our other revenues and expenses for the periods indicated:

	Three months ended		Six months ended	
	June 30 2007	2006	June 30 2007	2006
Corporate expenses	\$ (14,184)	\$ (11,283)	\$ (26,524)	\$ (22,925)
Foreign exchange gains	6,883	18,901	9,274	28,165
Interest expense	(14,169)	(8,315)	(29,312)	(16,400)
Income tax expense	(12,519)	(7,912)	(22,266)	(17,359)
	\$ (33,989)	\$ (8,609)	\$ (68,828)	\$ (28,519)

Corporate expenses: Our corporate expenses include holding company costs necessary to support our worldwide insurance and reinsurance operations and costs associated with operating as a publicly-traded company.

Foreign exchange gains: Some of our business is written in currencies other than U.S dollars. The larger foreign exchange gains in 2006 were primarily due to a greater appreciation of the Sterling and Euro during the three and six months ended June 30, 2006 compared to the corresponding periods in 2007. In the second quarter of 2006, the Sterling and Euro appreciated 6.4% and 5.5%, respectively, against the U.S dollar, compared to 2.1% and 1.4%, respectively in the same period of 2007. In the first six months of 2006, the Sterling and Euro appreciated 7.3% and 8.0%, respectively, against the U.S dollar, compared to 2.5% for both currencies in the same period of 2007.

Interest expense: The increase in both periods was primarily due to interest costs incurred on the \$400.0 million repurchase agreement we entered into in December 2006. We renewed the agreement for a further three months in June 2007 at an interest rate of 3-month LIBOR plus 0.75% per annum.

Income tax expense: Income tax expense is generated primarily through our foreign operations in the United States and Europe. Our effective tax on income, which we calculate as income tax expense divided by income before income taxes, was 4.6% and 4.3% in the three and six months ended June 30, 2007, respectively, compared to 3.3% and 3.8% in the same periods of 2006. The increases primarily relate to our U.S operations and a decrease in the proportion of tax-exempt income to total income before income taxes.

The 21% decrease in underwriting income in the first six months of 2007 compared to the corresponding period of 2006 was primarily due to lower prior period reserve development in 2007 (13.8 percentage points) than in 2006 (19.2 percentage points). Prior period reserve development was similar in the second quarter of 2007 compared to the second quarter of 2006, and as a result our combined ratio and underwriting income were relatively flat over these periods.

Edgar Filing: AXIS CAPITAL HOLDINGS LTD - Form 10-Q

The decrease in gross premiums written in the second quarter of 2007 compared to the corresponding period in 2006 was driven by the following:

- The second quarter of 2006 included a substantial political risk contract providing insurance coverage over multiple years. Due to the unpredictable timing and size of these contracts, gross premium written on our political risk book can vary considerably between periods. Additional underwriters dedicated to this line have allowed us to increase the number of contracts written in 2007 compared to 2006.
- We continued to withdraw from the aviation market as pricing remained considerably below our threshold for such business. Terrorism writings also reduced against a significantly more competitive backdrop. Similarly, unfavorable conditions in the marine hull market also led to a significant reduction in this business.

The following partially offset these reductions:

- An increase in premiums associated with U.S catastrophe exposures. This was driven by an improvement in rates, together with additional allocations of capital, relative to the second quarter of 2006. Although pricing was generally strong by June 2006 we were actively engaged in the process of reducing our natural peril exposure which limited our opportunities.
- The acquisition of the Media Pro business, a full-service managing general underwriter, in May 2007. We have been the exclusive carrier for several of Media Pro's E&O liability programs for the past two years. However, with renewal rights to the broader portfolio for May and June, our professional lines premium increased in the second quarter of 2007.

The discussion above also largely explains the 2% decrease in gross premiums written in the first six months of 2007 from the same period in 2006. The reduction in liability business in 2007 reflects increased competition and deterioration of rates for primary business. In the second quarter of 2007, this was offset by our entry into the Bermuda excess casualty marketplace.

Ceded premiums:

We ceded 34% of gross premiums written in the second quarter of 2007 compared to 28% in the second quarter of 2006. The increase was generated in our terrorism, property and professional lines business. For these lines we effectively expanded reinsurance coverage at attractive costs.

Net premiums earned: The following tables provide net premiums earned by line of business:

	Three months ended June 30			Six months ended June 30					
	2007	2006	%	2007	2006	%			
Property	\$ 77,745	26	%	\$ 86,656	27	%	\$ 171,857	27	%
Marine	37,469	13	%	42,199	13	%	83,478	14	%
Terrorism	14,735	5	%	20,910	6	%	34,047	6	%
Aviation	21,258	7	%	43,371	13	%	47,177	8	%

Accident and Health	8,834	3	%	6,347	2	%	16,958	3	%
Total	\$ 298,245	100	%	\$ 323,571	100	%	\$ 613,177	100	%

Net premiums earned decreased 8% and 5% in the three and six months ended June 30, 2007, respectively, from the same periods in 2006. These reductions were largely attributable to our aviation and terrorism lines where, due to continued deteriorating market conditions, we have reduced net premiums written by 45% and 22%, respectively, in the respective rolling twelve months to June 30. Over the same period we significantly increased our political risk premium, but because this line typically provides multi-year coverage, the earning of this premium is spread over a greater number of periods. The reduction in net premiums earned in our property

Edgar Filing: AXIS CAPITAL HOLDINGS LTD - Form 10-Q

book in 2007 was due to an increase in ceded premiums amortized associated with additional reinsurance cover purchased this quarter and also reinstatement premium protection purchased on July 1, 2006. The increase in net premiums earned in our professional lines book reflects the continued growth of this business.

Loss ratio: The tables below show the components of our loss ratio:

	Three months ended				Six months ended			
	June 30				June 30			
	2007	%	2006	%	2007	%	2006	%
Current year	63.5	%	63.7	%	65.9	%	66.2	%
Prior period development	(18.7))%	(18.0))%	(13.8))%	(19.2))%
Loss ratio	44.8	%	45.7	%	52.1	%	47.0	%

Our current year loss activity during the first six months of 2007 was favorable in comparison to the same period in 2006, most notably on our energy onshore account. Offsetting this was a shift in business mix from aviation and terrorism lines to professional lines of business during 2007 which meant our current year ratios remained largely unchanged. Our professional lines business, outside of any major loss activity, has a higher initial expected loss ratio than our aviation and terrorism lines. There were no significant changes in 2007 to either the initial expected loss ratios or the loss development factors used to establish our estimate of ultimate losses for the current year.

The net favorable development of 18.7 percentage points in the second quarter of 2007 included 5.0 percentage points related to the court dismissal of a 2003 director and officer's liability claim. Otherwise, the development in three and six months ended June 30, 2007 was predominately related to better than expected emergence of claims on our property accounts, almost all of which was generated from accident year 2006. For these lines, accident year 2006 has largely proven to be a benign loss year with limited late reported loss activity and minimal deterioration on previously reported claims.

The net favorable prior period development in the three and six months ended June 30, 2006 was generated from several of our short tail lines, including aviation, property, energy offshore and marine hull, and was derived predominately from accident years 2004 and 2005.

Outlook

Edgar Filing: AXIS CAPITAL HOLDINGS LTD - Form 10-Q

Current rate levels in our catastrophe-exposed property and energy business continue to produce returns above historic levels providing us with continued opportunities to target such business. In our terrorism, aviation, non-U.S. property and non-cat property lines of business, competition is aggressive and we will continue to maintain our cautious posture. We are experiencing increased pricing pressure in our primary casualty, umbrella, and professional lines, particularly on larger accounts. We believe our areas of focus here still contain good profit potential, but risk selection and overall execution strategy have become more critical.

Edgar Filing: AXIS CAPITAL HOLDINGS LTD - Form 10-Q

The decrease in gross premiums written in the second quarter of 2007 compared to the corresponding period of 2006 was driven by the following:

- The non-renewal of several large professional lines contracts due to cedants increasing retention of business. Increased cedant retentions also reduced our participation in renewals for liability and property catastrophe business. However, the negative impact on our catastrophe line was offset with new business in the quarter, including participation in several U.S. coastal wind pools.
- A reduction in gross premiums written in our property account. This was largely due to net upward adjustments on property pro rata prior year premium estimates in the second quarter of 2006. Premium renewals in our property per risk account were also down due to increasing pressure on pricing, terms and conditions.

Gross premiums written increased 11% in the first six months of 2007, from the same period in 2006. This was largely a result of increased participation in the U.S. and European reinsurance markets during the first quarter. The majority of our European reinsurance business and a large portion of our U.S. property and liability reinsurance business are written in the first quarter. Approximately 4% of the six-month increase was due to the favorable impact of exchange rate movements.

Net premiums earned increased by 11% and 15% in the three and six months ended June 30, 2007, respectively, from the same periods in 2006 and largely reflects the additional gross premiums written in the current year. Net premiums earned on our professional lines business in 2007 benefited from more proportional premium continuing to be earned from older underwriting years.

Loss ratio: The tables below show the components of our loss ratio:

	Three months ended		Six months ended	
	June 30	2006	June 30	2006
Current year	67.3	%	64.9	%
Prior period development	(10.4))%	(1.8))%
Loss ratio	56.9	%	63.1	%

The increase in our current year loss ratio in the three and six months ended June 30, 2007 compared to the same periods last year, was primarily due to an increase in mid-sized natural catastrophe events. These were largely associated with UK flood damages and Australian storms in the second quarter and European Windstorm Kyrill in the first quarter of 2007. In contrast, there was limited catastrophe activity in the first six months of 2006. There were also

no significant changes in 2007 to either the initial expected loss ratios or the loss development factors used to establish our estimate of ultimate losses for the current year.

The net favorable development in the three and six months ended June 30, 2007 was predominately related to our property and catastrophe business from accident year 2006. Approximately half of the development in the second quarter of 2007 was due to our exposure to certain events being less than we had originally estimated as resultant claims did not reach the attachment points for potentially impacted treaties. Otherwise, favorable development in 2007 was a result of better than expected emergence of claims identified as part of our regular quarterly reserving process.

Compared to a relatively benign year for catastrophe events in 2006, accident years 2004 and 2005 included significantly greater loss activity. During the three and six months ended June 30, 2006, we increased our loss estimates on certain events related to these years as a result of late reporting and adverse development on previously reported losses. The second quarter of 2006 included reserve strengthening of 4.0 percentage points in relation to Hurricane Charley and other exposures on our property pro rata book, while the first six months of 2006 included 9.3 percentage points of reserve strengthening relating to Hurricanes Katrina, Rita, and Wilma.

Outlook

Edgar Filing: AXIS CAPITAL HOLDINGS LTD - Form 10-Q

Generally, overall discipline throughout the global reinsurance marketplace continues. We continue to experience the ongoing trend of greater risk and retention appetite in the industry bringing to bear modest price reductions. For property catastrophe business, major buyers dropped lower layers in favor of larger limits at the upper end of their programs, while, for liability reinsurance business, cedants tended to retain more business. Critically, we have not seen major slippage in terms and conditions.

Fixed Maturity Investments

At June 30, 2007 and December 31, 2006, all of the fixed maturity securities were investment grade with 82.2% and 84.1%, respectively, rated AA- or better, with an overall weighted average rating of AA+, based on ratings assigned by Standard & Poor's. At June 30, 2007 and December 31, 2006, our fixed maturity investments had an approximate average duration of 3.2 years.

The amortized cost and fair values of fixed maturity securities are as follows:

Type of Investment	At June 30, 2007			
	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Fair Value
U.S. government and agency securities	\$ 1,246,716	\$ 586	\$ (22,402)	\$ 1,224,900
Non-U.S. government securities	160,309	10,592	(5,046)	165,855
Corporate debt securities	1,582,198	11,085	(15,859)	1,577,424
Mortgage-backed securities	3,179,775	1,835	(76,428)	3,105,182
Asset-backed securities	573,431	121	(2,599)	570,953
Municipals	507,648	97	(4,715)	503,030

Total fixed maturity investments	\$ 7,322,659	\$ 24,468	\$ (127,291)	\$ 7,219,836

Type of Investment	At December 31, 2006			
	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Fair Value
U.S. government and agency securities	\$ 1,190,700	\$ 3,639	\$ (16,428)	\$ 1,177,911
Non-U.S. government securities	146,847	9,182	(2,771)	153,258
Corporate debt securities	1,423,146	5,470	(10,063)	1,418,553
Mortgage-backed securities	2,896,362	9,758	(37,542)	2,868,578
Asset-backed securities	540,118	549	(2,317)	538,350
Municipals	377,076	1,257	(2,260)	376,073
Total fixed maturity investments	\$ 6,574,249	\$ 29,855	\$ (71,381)	\$ 6,532,723

The overall increase in the gross unrealized losses of \$56 million was due mainly to an increase in the intermediate U.S. Treasury yields which negatively impacted price. For further information on fixed maturity securities in an unrealized loss position at June 30, 2007, refer to Note 3 of the Consolidated Financial Statements in Item 1 of this report.

Other Investments

The table below summarizes the composition of our other investment portfolio:

	June 30, 2007		December 31, 2006		
	\$	%	\$	%	
Life settlement contracts	\$ 374,925	34	\$ 377,767	33	%
Hedge funds	250,290	23	235,377	21	%
Collateralized loan obligations	226,840	20	263,621	23	%
Credit funds	169,435	15	156,337	14	%
Short duration high yield fund	74,675	7	97,562	9	%
Other	10,244	1		0	%
Total other investments	\$ 1,106,409	100	\$ 1,130,664	100	%

The decreases in our collateralized loan obligations and short duration high yield fund were due to sales and redemptions, respectively, in order to reduce our exposure to credit risk. The increase in the carrying value of the credit funds relates to the returns generated by the funds in the first six months of 2007. The increase in the hedge funds is also due to returns generated during this period net of redemptions of \$5.0 million.

We account for other investments at fair value, which is further explained in Item 7, Critical Accounting Estimates - Other Investments in our Annual Report on Form 10-K for the year ended December 31, 2006.

Reserve for loss and loss expenses/Reinsurance recoverable balances

At June 30, 2007, we had \$5.4 billion of gross reserve for loss and loss expenses compared to \$5.0 billion at December 31, 2006. Of this balance, \$3.7 billion, or 69%, was incurred but not reported reserves, compared to \$3.2 billion, or 64%, at December 31, 2006. The total reinsurance recoverable balance at June 30, 2007 was \$1.3 billion (2006: \$1.4 billion), of which 96% (2006: 96%) was due from reinsurers rated A- or better by internationally recognized rating agencies. Our provision for unrecoverable reinsurance at June 30, 2007 of \$34 million was unchanged from December 31, 2006. For an analysis of paid and unpaid losses and loss expenses, including a reconciliation of the opening and closing balances, refer to Note 4 to the Consolidated Financial Statements in item 1 of this report.

During the first six months of 2007 we experienced net favorable development on prior year net loss reserves of \$163 million. For further detail on prior period development refer to the segment discussions above.

LIQUIDITY AND CAPITAL RESOURCES

Edgar Filing: AXIS CAPITAL HOLDINGS LTD - Form 10-Q

There has been no material change in our liquidity and capital resource requirements since December 31, 2006. For more information refer to Liquidity and Capital Resources included under Item 7 of our Annual Report on Form 10-K for the year ended December 31, 2006.

At June 30, 2007, our shareholders equity was \$4,694 million compared to \$4,413 million at December 31, 2006. The following is a summary reconciliation of those balances:

Shareholders equity - December 31, 2006	\$	4,412,647
Net income		497,598
Share repurchases	(103,431)
Change in accumulated other comprehensive loss	(62,055)
Common share dividends	(56,461)
Preferred share dividends	(18,430)
Share-based compensation and other	24,014	
Shareholders equity - June 30, 2007	\$	4,693,882

During the second quarter of 2007, we repurchased \$100.5 million of our common shares under our share repurchase plan. The change in accumulated other comprehensive loss largely relates to the movement in unrealized losses associated with our available for sale fixed maturity securities.

COMMITMENTS AND CONTINGENCIES

Edgar Filing: AXIS CAPITAL HOLDINGS LTD - Form 10-Q

During the second quarter of 2007, we purchased reinsurance coverage for our insurance property line of business. The minimum reinsurance premiums are contractually due on a quarterly basis in advance. Accordingly, at June 30, 2007, we had an outstanding reinsurance purchase commitment of \$139 million (December 31, 2006: \$47 million). There have been no other material changes in our commitments or contingencies since December 31, 2006. Refer to Item 7 included in our Annual Report on Form 10-K for the year ended December 31, 2006 filed with the SEC on March 1, 2007.

On June 19, 2007, we renewed the repurchase agreement relating to our investment in the life settlement contracts for a further 3-month term. We may renew the repurchase agreement at its maturity.

CRITICAL ACCOUNTING ESTIMATES

Edgar Filing: AXIS CAPITAL HOLDINGS LTD - Form 10-Q

There are certain accounting policies that we consider to be critical due to the amount of judgment and uncertainty inherent in the application of those policies. In calculating financial statement estimates, the use of different assumptions could produce materially different estimates. We believe the following critical accounting policies affect significant estimates used in the preparation of our consolidated financial statements:

- Reserve for losses and loss expenses
- Reinsurance recoverable balances
- Premiums
- Other investments

See the Critical Accounting Estimates section of our Management's Discussion and Analysis of Results of Operations and Financial Condition contained in our Annual Report on Form 10-K for the year ended December 31, 2006, for further information.

34

RECENT ACCOUNTING PRONOUNCEMENTS

See Item 1, Note 1 to the Consolidated Financial Statements for a discussion of new accounting standards we have recently adopted and recently issued accounting pronouncements we have not yet adopted.

OFF-BALANCE SHEET AND SPECIAL PURPOSE ENTITY ARRANGEMENTS

Edgar Filing: AXIS CAPITAL HOLDINGS LTD - Form 10-Q

At June 30, 2007, we have not entered into any off-balance sheet arrangements, as defined by Item 303 (a) (4) of Regulation S-K.

NON-GAAP FINANCIAL MEASURES

Edgar Filing: AXIS CAPITAL HOLDINGS LTD - Form 10-Q

We have presented diluted book value per common share calculated using the if converted method, which is a non-GAAP financial measure. This method takes into account the effect of the full conversion of our outstanding stock options, warrants, restricted stock and phantom stock units. As we have no present plans to reacquire such dilutive securities, the calculation assumes the retention of all proceeds upon exercise and the resulting issuance of common shares to remain outstanding. Because we had dilutive common shares outstanding in each of the periods presented, we believe diluted book value per share provides useful information for investors to measure shareholder returns. This measure should not be viewed as a substitute for book value per share, the most comparable GAAP generated measure. The following table is a reconciliation of diluted book value per share to book value per share as at:

(in thousands, except per share)	June 30 2007	December 31 2006
Common shareholders equity	\$ 4,193,882	\$ 3,912,647
Shares outstanding	147,924	149,982
Book value per share	\$ 28.35	\$ 26.09
Diluted book value on a if converted basis :		
Common shareholders equity	4,193,882	3,912,647
add in:		
proceeds on exercise of options	90,012	96,485
proceeds on exercise of warrants	244,275	244,363
Adjusted shareholders equity	\$ 4,528,169	\$ 4,253,495
Shares outstanding	147,924	149,982
add in:		
vested phantom stock units	53	46
vesting of restricted stock	3,328	2,229
exercise of options	4,855	5,147
exercise of warrants	19,651	19,644
Diluted shares outstanding	175,811	177,048
Diluted book value per share	\$ 25.76	\$ 24.02

Item 3. Quantitative and Qualitative Disclosure about Market Risk

Except as noted below, there have been no material changes in our market risk exposures or how these exposures are managed, since December 31, 2006. The following discussion should be read in conjunction with Quantitative and Qualitative Disclosures about Market Risk, presented under Item 7A of our Form 10-K for the year ended December 31, 2006.

Interest Rate Risk: Fluctuations in interest rates have a direct impact on the market valuation of fixed income securities included in our investment portfolio. As interest rates rise, the market value of our fixed income portfolio falls, and the converse is also true. We manage interest rate risk by selecting investments with characteristics such as duration, yield, currency and liquidity tailored to the anticipated cash outflow characteristics of our insurance and reinsurance liabilities.

We have calculated the effect that an immediate parallel shift in the U.S. interest rate yield curve would have on our assets under management by third party investment managers at June 30, 2007. The modeling of this effect was performed on each security individually using the security's effective duration and changes in prepayment expectations for mortgage-backed and asset-backed securities. The results of this analysis are summarized in the table below.

Interest Rate Movement Analysis on Market Value of Total Cash and Fixed Maturities (1)

	Interest Rate Shift in Basis Points				
	-100	-50	0	+50	+100
Total Market Value	\$ 9,168,855	\$ 9,055,204	\$ 8,937,006	\$ 8,816,382	\$ 8,694,660
Market Value Change from Base	2.59	% 1.32	% 0.00	% (1.35))% (2.71)
Change in Unrealized Value	\$ 231,849	\$ 118,198	\$	\$ (120,624)	\$ (242,346)

Item 4. Controls and Procedures

The Company's management has performed an evaluation, with the participation of the Company's Chief Executive Officer and Chief Financial Officer, of the effectiveness of the Company's disclosure controls and procedures (as defined in Rule 13a-15(e) of the Securities Exchange Act of 1934 (the Exchange Act)) as of June 30, 2007. Based upon that evaluation, the Company's Chief Executive Officer and Chief Financial Officer concluded that the Company's disclosure controls and procedures are effective to ensure that information required to be disclosed by the Company in reports that it files or submits under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the rules and forms of the SEC and is accumulated and communicated to management, including its principal executive and principal financial officers, as appropriate to allow timely decisions regarding required disclosure.

The Company's management has performed an evaluation, with the participation of the Company's Chief Executive Officer and Chief Financial Officer of changes in the Company's internal control over financial reporting that occurred during the quarter ended June 30, 2007. Based upon that evaluation, there have been no changes to the Company's internal control over financial reporting during the quarter ended June 30, 2007 that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

PART II - OTHER INFORMATION

Item 1. Legal Proceedings

Edgar Filing: AXIS CAPITAL HOLDINGS LTD - Form 10-Q

Except as set forth below, we are not currently a party to any material legal proceedings. From time to time, we are subject to routine legal proceedings, including arbitrations, arising in the ordinary course of business. These legal proceedings generally relate to claims asserted by or against us in the ordinary course of our insurance or reinsurance operations.

In 2005, a putative class action lawsuit was filed against our U.S. insurance subsidiaries. In re Insurance Brokerage Antitrust Litigation was filed on August 15, 2005 in the United States District Court for the District of New Jersey and includes as defendants numerous insurance brokers and insurance companies, including our U.S. insurance subsidiaries. The lawsuit alleges antitrust and Racketeer Influenced and Corrupt Organizations Act (RICO) violations in connection with the payment of contingent commissions and manipulation of insurance bids and seeks damages in an unspecified amount. On October 3, 2006, the District Court granted, in part, motions to dismiss filed by the defendants, and ordered plaintiffs to file supplemental pleadings setting forth sufficient facts to allege their antitrust and RICO claims. After plaintiffs filed their supplemental pleadings, defendants renewed their motions to dismiss. On April 15, 2007, the District Court dismissed without prejudice plaintiffs' complaint, as amended, and granted plaintiff thirty (30) days to file another amended complaint and/or revised RICO Statement and Statements of Particularity. In May 2007, plaintiffs filed (i) a Second Consolidated Amended Commercial Class Action complaint, (ii) a Revised Particularized Statement Describing the Horizontal Conspiracies Alleged in the Second Consolidated Amended Commercial Class Action Complaint, and (iii) a Third Amended Commercial Insurance Plaintiffs' RICO Case Statement Pursuant to Local Rule 16.1(B)(4). On June 21, 2007, the defendants filed renewed motions to dismiss, which are pending before the court. We believe that the lawsuit is completely without merit and we continue to vigorously defend the filed action.

Item 1A. Risk Factors

There were no material changes from the risk factors as previously disclosed in our Annual Report on Form 10-K for the year ended December 31, 2006.

37

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

The following table sets forth information regarding the number of shares we repurchased during each month in the first six months of 2007.
