Item 1.02 Termination of a Material Definitive Agreement

On August 29, 2017, MacroGenics, Inc. (the “Company”) received written notice from Janssen Biotech, Inc. (“Janssen”), informing the Company of Janssen’s termination of a global collaboration and license agreement between Janssen and the Company relating to the development and commercialization of duvortuxizumab, a bispecific CD19 x CD3 DART® molecule for the potential treatment of B-cell malignancies (the “Agreement”). In connection with this termination, Janssen plans to cease enrollment of the Phase 1 dose-escalation study of duvortuxizumab and the Company regained the worldwide rights to the molecule. Pursuant to the terms of the Agreement, unless the period is reduced by the Company, termination of the Agreement will become effective on February 25, 2018, which is 180 days after the effective date of Janssen’s notice of termination.

The Company and Janssen are also parties to a separate collaboration and license agreement for MGD015, a preclinical DART molecule also known as JNJ-9383, that was entered into in May 2016 and is unaffected by termination of the duvortuxizumab Agreement. This product candidate incorporates the Company’s DART platform to simultaneously target CD3 and an undisclosed tumor target for the potential treatment of various hematological malignancies and solid tumors.

On August 31, 2017, the Company issued a press release announcing Janssen’s notice of termination of the Agreement. A copy of the press release is attached as Exhibit 99.1 to this Current Report on Form 8-K and is incorporated herein by reference.
