CAUTIONARY STATEMENT REGARDING FORWARD-LOOKING INFORMATION

From time to time we make statements concerning our expectations, beliefs, plans, objectives, goals, strategies, future events or performance and underlying assumptions and other statements that are not historical facts. These statements are "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995. Actual results may differ materially from those expressed or implied by these statements. You can generally identify our forward-looking statements by the words "anticipate," "believe," "continue," "could," "estimate," "expect," "forecast," "goal," "intend," "may," "objective," "plan," "potential," "predict," "projection," "should," "will" or other similar words.

We have based our forward-looking statements on our management's beliefs and assumptions based on information available to our management at the time the statements are made. We caution you that assumptions, beliefs, expectations, intentions and projections about future events may and often do vary materially from actual results. Therefore, we cannot assure you that actual results will not differ materially from those expressed or implied by our forward-looking statements.

The following are some of the factors that could cause actual results to differ materially from those expressed or implied in forward-looking statements:

- the resolution of the true-up proceedings, including, in particular, the results of appeals to the Texas Supreme Court regarding rulings obtained to date;

- state and federal legislative and regulatory actions or developments relating to the environment, including those related to global climate change;

- other state and federal legislative and regulatory actions or developments, including, among others, deregulation, re-regulation and health care reform;

- timely and appropriate regulatory actions allowing securitization or other recovery of costs associated with any future hurricanes or natural disasters;

- timely and appropriate rate actions and increases, allowing recovery of costs and a reasonable return on investment;

- problems with construction, implementation of necessary technology or other issues with respect to major capital projects that result in delays or in cost overruns that cannot be recouped in rates;

- industrial, commercial and residential growth in our service territory and changes in market demand, including the effects of energy efficiency measures, and demographic patterns;

- the timing and extent of changes in commodity prices, particularly natural gas and natural gas liquids;

- the timing and extent of changes in the supply of natural gas, including supplies available for gathering by our field services business and transporting by our interstate pipelines;

- the timing and extent of changes in natural gas basis differentials;

- weather variations and other natural phenomena;

- changes in interest rates or rates of inflation;

commercial bank and financial market conditions, our access to capital, the cost of such capital, and the results of our financing and refinancing efforts, including availability of funds in the debt capital markets;

- actions by rating agencies;
- effectiveness of our risk management activities;
- inability of various counterparties to meet their obligations to us;

Table of Contents

- non-payment for our services due to financial distress of our customers;
- the ability of RRI Energy, Inc. (RRI) (formerly known as Reliant Energy, Inc. and Reliant Resources, Inc.) and its subsidiaries to satisfy their obligations to us, including indemnity obligations, or in connection with the contractual arrangements pursuant to which we are their guarantor;
- the ability of retail electric providers, and particularly the two largest customers of CenterPoint Houston Electric LLC, which are subsidiaries of NRG Retail LLC and TXU Energy Retail Company LLC, to satisfy their obligations to us and our subsidiaries;
- the outcome of litigation brought by or against us;
- our ability to control costs;
- the investment performance of our pension and postretirement benefit plans;
- our potential business strategies, including restructurings, acquisitions or dispositions of assets or businesses, which we cannot assure will be completed or will have the anticipated benefits to us;
- acquisition and merger activities involving us or our competitors; and
- other factors we discuss in “Risk Factors” in Item 1A of Part I of our Annual Report on Form 10-K for the year ended December 31, 2009, which is incorporated herein by reference, and other reports we file from time to time with the Securities and Exchange Commission.

You should not place undue reliance on forward-looking statements. Each forward-looking statement speaks only as of the date of the particular statement.

CENTERPOINT ENERGY, INC. AND SUBSIDIARIES

NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

(1) Background and Basis of Presentation

General. Included in this Quarterly Report on Form 10-Q (Form 10-Q) of CenterPoint Energy, Inc. are the condensed consolidated interim financial statements and notes (Interim Condensed Financial Statements) of CenterPoint Energy, Inc. and its subsidiaries (collectively, CenterPoint Energy). The Interim Condensed Financial Statements are unaudited, omit certain financial statement disclosures and should be read with the Annual Report on Form 10-K of CenterPoint Energy for the year ended December 31, 2009 (CenterPoint Energy Form 10-K).

Background. CenterPoint Energy, Inc. is a public utility holding company. CenterPoint Energy's operating subsidiaries own and operate electric transmission and distribution facilities, natural gas distribution facilities, interstate pipelines and natural gas gathering, processing and treating facilities. As of March 31, 2010, CenterPoint Energy's indirect wholly owned subsidiaries included:

CenterPoint Energy Houston Electric, LLC (CenterPoint Houston), which engages in the electric transmission and distribution business in a 5,000-square mile area of the Texas Gulf Coast that includes the city of Houston; and

CenterPoint Energy Resources Corp. (CERC Corp. and, together with its subsidiaries, CERC), which owns and operates natural gas distribution systems in six states. Subsidiaries of CERC Corp. own interstate natural gas pipelines and gas gathering systems and provide various ancillary services. A wholly owned subsidiary of CERC Corp. offers variable and fixed-price physical natural gas supplies primarily to commercial and industrial customers and electric and gas utilities.

Basis of Presentation. The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

CenterPoint Energy's Interim Condensed Financial Statements reflect all normal recurring adjustments that are, in the opinion of management, necessary to present fairly the financial position, results of operations and cash flows for the respective periods. Amounts reported in CenterPoint Energy's Condensed Statements of Consolidated Income are not necessarily indicative of amounts expected for a full-year period due to the effects of, among other things, (a) seasonal fluctuations in demand for energy and energy services, (b) changes in energy commodity prices, (c) timing of maintenance and other expenditures and (d) acquisitions and dispositions of businesses, assets and other interests.

For a description of CenterPoint Energy's reportable business segments, reference is made to Note 15.

(2) New Accounting Pronouncements

In June 2009, the Financial Accounting Standards Board (FASB) issued new accounting guidance on consolidation of variable interest entities (VIEs) that changes how a reporting entity determines a primary beneficiary that would consolidate the VIE from a quantitative risk and rewards approach to a qualitative approach based on which variable interest holder has the power to direct the economic performance related activities of the VIE as well as the obligation to absorb losses or right to receive benefits that could potentially be significant to the VIE. This new guidance requires the primary beneficiary assessment to be performed on an ongoing basis and also requires enhanced disclosures that will provide more transparency about a company's involvement in a VIE. This new guidance is effective for a

reporting entity's first annual reporting period that begins after November 15, 2009. CenterPoint Energy's adoption of this new guidance did not have a material impact on its financial position, results of operations or cash flows.

In January 2010, the FASB issued new accounting guidance to require additional fair value related disclosures including transfers into and out of Levels 1 and 2 and separate disclosures about purchases, sales, issuances, and

Table of Contents

settlements relating to Level 3 measurements. It also clarifies existing fair value disclosure guidance about the level of disaggregation and about inputs and valuation techniques. This new guidance is effective for the first reporting period beginning after December 15, 2009 except for the requirement to separately disclose purchases, sales, issuances and settlements relating to Level 3 measurements, which is effective for the first reporting period beginning after December 15, 2010. CenterPoint Energy's adoption of this new guidance did not have a material impact on its financial position, results of operations or cash flows. CenterPoint Energy expects that the adoption of the Level 3 related gross disclosure requirement, which is effective in 2011, will not have a material impact on the financial position, results of operations or cash flows.

Management believes the impact of other recently issued standards, which are not yet effective, will not have a material impact on CenterPoint Energy's consolidated financial position, results of operations or cash flows upon adoption.

(3) Employee Benefit Plans

CenterPoint Energy's net periodic cost includes the following components relating to pension and postretirement benefits:

	Three Months Ended March 31,			
	2009		2010	
	Pension Benefits	Postretirement Benefits	Pension Benefits (1)	Postretirement Benefits
	(in millions)			
Service cost	\$ 6	\$ —	\$ 8	\$ —
Interest cost	28	7	25	6
Expected return on plan assets	(24)	(2)	(27)	(2)
Amortization of prior service credit	1	1	1	1
Amortization of net loss	17	—	15	—
Amortization of transition obligation	—	2	—	2
Net periodic cost	\$ 28	\$ 8	\$ 22	\$ 7

(1) Net periodic cost in these tables is before considering amounts subject to overhead allocations for capital expenditure projects or for amounts subject to deferral for regulatory purposes. CenterPoint Houston's actuarially determined pension expense for 2010 in excess of the 2007 base year amount is being deferred for rate making purposes until its next general rate case pursuant to Texas law. CenterPoint Houston deferred as a regulatory asset \$4 million and \$6 million, respectively, in pension expense during the three months ended March 31, 2009 and 2010.

CenterPoint Energy expects to contribute approximately \$9 million to its pension plans in 2010, of which \$2 million was contributed during the three months ended March 31, 2010.

CenterPoint Energy expects to contribute approximately \$19 million to its postretirement benefits plan in 2010, of which \$6 million was contributed during the three months ended March 31, 2010.

(4) Regulatory Matters

(a) Recovery of True-Up Balance

In March 2004, CenterPoint Houston filed its true-up application with the Public Utility Commission of Texas (Texas Utility Commission), requesting recovery of \$3.7 billion, excluding interest, as allowed under the Texas Electric Choice Plan (Texas electric restructuring law). In December 2004, the Texas Utility Commission issued its final order (True-Up Order) allowing CenterPoint Houston to recover a true-up balance of approximately \$2.3 billion, which included interest through August 31, 2004, and provided for adjustment of the amount to be recovered to include interest on the balance until recovery, along with the principal portion of additional excess mitigation credits (EMCs) returned to customers after August 31, 2004 and certain other adjustments.

Table of Contents

CenterPoint Houston and other parties filed appeals of the True-Up Order to a district court in Travis County, Texas. In August 2005, that court issued its judgment on the various appeals. In its judgment, the district court:

- reversed the Texas Utility Commission's ruling that had denied recovery of a portion of the capacity auction true-up amounts;
- reversed the Texas Utility Commission's ruling that precluded CenterPoint Houston from recovering the interest component of the EMCs paid to retail electric providers (REPs); and
- affirmed the True-Up Order in all other respects.

The district court's decision would have had the effect of restoring approximately \$650 million, plus interest, of the \$1.7 billion the Texas Utility Commission had disallowed from CenterPoint Houston's initial request.

CenterPoint Houston and other parties appealed the district court's judgment to the Texas Third Court of Appeals, which issued its decision in December 2007. In its decision, the court of appeals:

- reversed the district court's judgment to the extent it restored the capacity auction true-up amounts;
- reversed the district court's judgment to the extent it upheld the Texas Utility Commission's decision to allow CenterPoint Houston to recover EMCs paid to RRI Energy, Inc. (RRI) (formerly known as Reliant Energy, Inc. and Reliant Resources, Inc.);
- ordered that the tax normalization issue described below be remanded to the Texas Utility Commission as requested by the Texas Utility Commission; and
- affirmed the district court's judgment in all other respects.

In April 2008, the court of appeals denied all motions for rehearing and reissued substantially the same opinion as it had rendered in December 2007.

In June 2008, CenterPoint Houston petitioned the Texas Supreme Court for review of the court of appeals decision. In its petition, CenterPoint Houston seeks reversal of the parts of the court of appeals decision that (i) denied recovery of EMCs paid to RRI, (ii) denied recovery of the capacity auction true-up amounts allowed by the district court, (iii) affirmed the Texas Utility Commission's rulings that denied recovery of approximately \$378 million related to depreciation and (iv) affirmed the Texas Utility Commission's refusal to permit CenterPoint Houston to utilize the partial stock valuation methodology for determining the market value of its former generation assets. Two other petitions for review were filed with the Texas Supreme Court by other parties to the appeal. In those petitions parties contend that (i) the Texas Utility Commission was without authority to fashion the methodology it used for valuing the former generation assets after it had determined that CenterPoint Houston could not use the partial stock valuation method, (ii) in fashioning the method it used for valuing the former generating assets, the Texas Utility Commission deprived parties of their due process rights and an opportunity to be heard, (iii) the net book value of the generating assets should have been adjusted downward due to the impact of a purchase option that had been granted to RRI, (iv) CenterPoint Houston should not have been permitted to recover construction work in progress balances without proving those amounts in the manner required by law and (v) the Texas Utility Commission was without authority to award interest on the capacity auction true-up award.

In June 2009, the Texas Supreme Court granted the petitions for review of the court of appeals decision. Oral argument before the court was held in October 2009, and the parties have filed post-submission briefs to the

court. Although CenterPoint Energy and CenterPoint Houston believe that CenterPoint Houston's true-up request is consistent with applicable statutes and regulations and, accordingly, that it is reasonably possible that it will be successful in its appeal to the Texas Supreme Court, CenterPoint Energy can provide no assurance as to the ultimate court rulings on the issues to be considered in the appeal or with respect to the ultimate decision by the Texas Utility Commission on the tax normalization issue described below.

To reflect the impact of the True-Up Order, in 2004 and 2005, CenterPoint Energy recorded a net after-tax extraordinary loss of \$947 million. No amounts related to the district court's judgment or the decision of the court of

Table of Contents

appeals have been recorded in CenterPoint Energy's consolidated financial statements. However, if the court of appeals decision is not reversed or modified as a result of further review by the Texas Supreme Court, CenterPoint Energy anticipates that it would be required to record an additional loss to reflect the court of appeals decision. The amount of that loss would depend on several factors, including ultimate resolution of the tax normalization issue described below and the calculation of interest on any amounts CenterPoint Houston ultimately is authorized to recover or is required to refund beyond the amounts recorded based on the True-Up Order, but could range from \$180 million to \$410 million (pre-tax) plus interest subsequent to December 31, 2009.

In the True-Up Order, the Texas Utility Commission reduced CenterPoint Houston's stranded cost recovery by approximately \$146 million, which was included in the extraordinary loss discussed above, for the present value of certain deferred tax benefits associated with its former electric generation assets. CenterPoint Energy believes that the Texas Utility Commission based its order on proposed regulations issued by the Internal Revenue Service (IRS) in March 2003 that would have allowed utilities owning assets that were deregulated before March 4, 2003 to make a retroactive election to pass the benefits of Accumulated Deferred Investment Tax Credits (ADITC) and Excess Deferred Federal Income Taxes (EDFIT) back to customers. However, the IRS subsequently withdrew those proposed normalization regulations and, in March 2008, adopted final regulations that would not permit utilities like CenterPoint Houston to pass the tax benefits back to customers without creating normalization violations. In addition, CenterPoint Energy received a Private Letter Ruling (PLR) from the IRS in August 2007, prior to adoption of the final regulations, that confirmed that the Texas Utility Commission's order reducing CenterPoint Houston's stranded cost recovery by \$146 million for ADITC and EDFIT would cause normalization violations with respect to the ADITC and EDFIT.

If the Texas Utility Commission's order relating to the ADITC reduction is not reversed or otherwise modified on remand so as to eliminate the normalization violation, the IRS could require CenterPoint Energy to pay an amount equal to CenterPoint Houston's unamortized ADITC balance as of the date that the normalization violation is deemed to have occurred. In addition, the IRS could deny CenterPoint Houston the ability to elect accelerated tax depreciation benefits beginning in the taxable year that the normalization violation is deemed to have occurred. Such treatment, if required by the IRS, could have a material adverse impact on CenterPoint Energy's results of operations, financial condition and cash flows in addition to any potential loss resulting from final resolution of the True-Up Order. In its opinion, the court of appeals ordered that this issue be remanded to the Texas Utility Commission, as that commission requested. No party has challenged that order by the court of appeals although the Texas Supreme Court has the authority to consider all aspects of the rulings above, not just those challenged specifically by the appellants. CenterPoint Energy and CenterPoint Houston will continue to pursue a favorable resolution of this issue through the appellate and administrative process. Although the Texas Utility Commission has not previously required a company subject to its jurisdiction to take action that would result in a normalization violation, no prediction can be made as to the ultimate action the Texas Utility Commission may take on this issue on remand.

The Texas electric restructuring law allowed the amounts awarded to CenterPoint Houston in the Texas Utility Commission's True-Up Order to be recovered either through securitization or through implementation of a competition transition charge (CTC) or both. Pursuant to a financing order issued by the Texas Utility Commission in March 2005 and affirmed by a Travis County district court, in December 2005, a new special purpose subsidiary of CenterPoint Houston issued \$1.85 billion in transition bonds with interest rates ranging from 4.84% to 5.30% and final maturity dates ranging from February 2011 to August 2020. Through issuance of the transition bonds, CenterPoint Houston recovered approximately \$1.7 billion of the true-up balance determined in the True-Up Order plus interest through the date on which the bonds were issued.

In July 2005, CenterPoint Houston received an order from the Texas Utility Commission allowing it to implement a CTC designed to collect the remaining \$596 million from the True-Up Order over 14 years plus interest at an annual rate of 11.075% (CTC Order). The CTC Order authorized CenterPoint Houston to impose a charge on REPs to

recover the portion of the true-up balance not recovered through a financing order. The CTC Order also allowed CenterPoint Houston to collect approximately \$24 million of rate case expenses over three years without a return through a separate tariff rider (Rider RCE). CenterPoint Houston implemented the CTC and Rider RCE effective September 13, 2005 and began recovering approximately \$620 million. The return on the CTC portion of the true-up balance was included in CenterPoint Houston's tariff-based revenues beginning September 13, 2005. Effective August 1, 2006, the interest rate on the unrecovered balance of the CTC was reduced from 11.075% to 8.06%

Table of Contents

pursuant to a revised rule adopted by the Texas Utility Commission in June 2006. Recovery of rate case expenses under Rider RCE was completed in September 2008.

Certain parties appealed the CTC Order to a district court in Travis County. In May 2006, the district court issued a judgment reversing the CTC Order in three respects. First, the court ruled that the Texas Utility Commission had improperly relied on provisions of its rule dealing with the interest rate applicable to CTC amounts. The district court reached that conclusion based on its belief that the Texas Supreme Court had previously invalidated that entire section of the rule. The 11.075% interest rate in question was applicable from the implementation of the CTC Order on September 13, 2005 until August 1, 2006, the effective date of the implementation of a new CTC in compliance with the revised rule discussed above. Second, the district court reversed the Texas Utility Commission's ruling that allows CenterPoint Houston to recover through Rider RCE the costs (approximately \$5 million) for a panel appointed by the Texas Utility Commission in connection with the valuation of electric generation assets. Finally, the district court accepted the contention of one party that the CTC should not be allocated to retail customers that have switched to new on-site generation. The Texas Utility Commission and CenterPoint Houston appealed the district court's judgment to the Texas Third Court of Appeals, and in July 2008, the court of appeals reversed the district court's judgment in all respects and affirmed the Texas Utility Commission's order. Two parties appealed the court of appeals decision to the Texas Supreme Court which heard oral argument in October 2009. The ultimate outcome of this matter cannot be predicted at this time. However, CenterPoint Energy does not expect the disposition of this matter to have a material adverse effect on CenterPoint Energy's or CenterPoint Houston's financial condition, results of operations or cash flows.

During the 2007 legislative session, the Texas legislature amended statutes prescribing the types of true-up balances that can be securitized by utilities and authorized the issuance of transition bonds to recover the balance of the CTC. In June 2007, CenterPoint Houston filed a request with the Texas Utility Commission for a financing order that would allow the securitization of the remaining balance of the CTC, adjusted to refund certain unspent environmental retrofit costs and to recover the amount of the final fuel reconciliation settlement. CenterPoint Houston reached substantial agreement with other parties to this proceeding, and a financing order was approved by the Texas Utility Commission in September 2007. In February 2008, pursuant to the financing order, a new special purpose subsidiary of CenterPoint Houston issued approximately \$488 million of transition bonds in two tranches with interest rates of 4.192% and 5.234% and final maturity dates of February 2020 and February 2023, respectively. Contemporaneously with the issuance of those bonds, the CTC was terminated and a transition charge was implemented.

As of March 31, 2010, CenterPoint Energy has not recognized an allowed equity return of \$190 million on CenterPoint Houston's true-up balance because such return will be recognized as it is recovered in rates. During the three months ended March 31, 2009 and 2010, CenterPoint Houston recognized approximately \$2 million and \$3 million, respectively, of the allowed equity return not previously recognized.

(b) Rate Proceedings

Texas. The final order in its 2006 rate proceeding requires CenterPoint Houston to file a general rate case with the Texas Utility Commission by June 30, 2010 unless the Texas Utility Commission Staff and certain other parties determined by March 31, 2010 that no such filing would be necessary. Those parties have advised CenterPoint Houston that a rate case filing is necessary, and, accordingly, CenterPoint Houston plans to file its application to change rates no later than the June 30, 2010 deadline. The amount and other terms of the rate filing have not been established at this time. Based on the prescribed timeline for processing such an application, CenterPoint Houston anticipates that a final order on that application would be entered in early 2011.

In May 2009, CenterPoint Houston filed an application at the Texas Utility Commission seeking approval of certain estimated 2010 energy efficiency program costs, an energy efficiency performance bonus for 2008 programs, and

carrying costs, totaling approximately \$10 million. The application sought to begin recovery of these costs through a surcharge effective July 1, 2010. In October 2009, the Texas Utility Commission issued its order approving recovery of the 2010 energy efficiency program costs and a partial performance bonus, plus carrying costs, but refused to permit CenterPoint Houston to recover a performance bonus of \$2 million on approximately \$10 million in 2008 energy efficiency costs expended pursuant to the terms of a settlement agreement reached in CenterPoint Houston's 2006 rate proceeding. CenterPoint Houston has appealed the denial of the full 2008 performance bonus to the 98th district court in Travis County, Texas, where the case remains pending.

Table of Contents

In April 2010, CenterPoint Houston filed an application with the Texas Utility Commission to recover a total of approximately \$14.4 million in costs related to its energy efficiency programs. The filing seeks authorization to recover certain projected costs for its 2011 energy efficiency programs, an energy efficiency performance bonus for 2009 programs, and revenue losses related to the implementation of the 2009 energy efficiency program. The application seeks to begin recovery of these costs through a surcharge beginning in January 2011. A final order is not expected until later this year.

In March 2008, the natural gas distribution business of CERC (Gas Operations) filed a request to change its rates with the Railroad Commission of Texas (Railroad Commission) and the 47 cities in its Texas Coast service territory, an area consisting of approximately 230,000 customers in cities and communities on the outskirts of Houston. In 2008, the Railroad Commission approved the implementation of rates increasing annual revenues by approximately \$3.5 million. The implemented rates were contested by nine cities in an appeal to the 353rd District Court in Travis County, Texas. In January 2010, that court reversed the Railroad Commission's order in part and remanded the matter to the Railroad Commission. In its final judgment the court ruled that the Railroad Commission lacked authority to impose the approved cost of service adjustment mechanism in both those nine cities and in those areas in which the Railroad Commission has original jurisdiction. The Railroad Commission and Gas Operations have appealed the court's ruling on the cost of service adjustment mechanism to the court of appeals, but CenterPoint Energy and CERC do not expect the outcome of this matter to have a material adverse impact on the financial condition, results of operations or cash flows of either CenterPoint Energy or CERC.

In July 2009, Gas Operations filed a request to change its rates with the Railroad Commission and the 29 cities in its Houston service territory, consisting of approximately 940,000 customers in and around Houston. The request sought to establish uniform rates, charges and terms and conditions of service for the cities and environs of the Houston service territory. As finally submitted to the Railroad Commission and the cities, the proposed new rates would have resulted in an overall increase in annual revenue of \$20.4 million, excluding carrying costs on gas inventory of approximately \$2 million. In January 2010, Gas Operations withdrew its request for an annual cost of service adjustment mechanism due to the uncertainty caused by the court's ruling in the above-mentioned Texas Coast appeal. In February 2010, the Railroad Commission issued its decision authorizing a revenue increase of \$5.1 million annually, reflecting reduced depreciation rates as well as adjustments to pension and benefits, accumulated deferred income taxes and other items. The Railroad Commission also approved a surcharge of \$0.9 million per year to recover Hurricane Ike costs over three years. Gas Operations and other parties filed motions for rehearing, which, except for minor corrections to the order, were denied by the Railroad Commission in May 2010. The parties are entitled to petition for judicial review by a district court in Travis County, Texas, within thirty days of the Railroad Commission's order on rehearing.

Minnesota. In November 2008, Gas Operations filed a request with the Minnesota Public Utilities Commission (MPUC) to increase its rates for utility distribution service by \$59.8 million annually. In addition, Gas Operations sought an adjustment mechanism that would annually adjust rates to reflect changes in use per customer. In December 2008, the MPUC accepted the case and approved an interim rate increase of \$51.2 million, which became effective on January 2, 2009, subject to refund. In January 2010, the MPUC issued its decision authorizing a revenue increase of \$41 million per year, with an overall rate of return of 8.09% (10.24% return on equity). The MPUC also authorized Gas Operations to implement a pilot program for residential and small volume commercial customers that is intended to decouple gas revenues from customers' natural gas usage. In February 2010, CERC filed a request for rehearing of the order by the MPUC. No other party to the case filed such a request. In March 2010, the MPUC declined to act on CERC's request for rehearing and a final order was issued. The difference between the amounts approved by the MPUC and amounts collected, \$15 million as of March 31, 2010, is recorded in other current liabilities and will be refunded to customers when final tariffs are approved this summer.

CenterPoint Energy is exposed to various market risks. These risks arise from transactions entered into in the normal course of business. CenterPoint Energy utilizes derivative instruments such as physical forward contracts, swaps and options to mitigate the impact of changes in commodity prices and weather on its operating results and cash flows. Such derivatives are recognized in CenterPoint Energy's Condensed Consolidated Balance Sheets at their fair value unless CenterPoint Energy elects the normal purchase and sales exemption for qualified physical transactions. A derivative may be designated as a normal purchase or sale if the intent is to physically receive or deliver the product for use or sale in the normal course of business.

Table of Contents

CenterPoint Energy has a Risk Oversight Committee composed of corporate and business segment officers that oversees all commodity price, weather and credit risk activities, including CenterPoint Energy's marketing, risk management services and hedging activities. The committee's duties are to establish CenterPoint Energy's commodity risk policies, allocate board-approved commercial risk limits, approve use of new products and commodities, monitor positions and ensure compliance with CenterPoint Energy's risk management policies and procedures and limits established by CenterPoint Energy's board of directors.

CenterPoint Energy's policies prohibit the use of leveraged financial instruments. A leveraged financial instrument, for this purpose, is a transaction involving a derivative whose financial impact will be based on an amount other than the notional amount or volume of the instrument.

(a) Non-Trading Activities

Derivative Instruments. CenterPoint Energy enters into certain derivative instruments to manage physical commodity price risks but does not engage in proprietary or speculative commodity trading. CenterPoint Energy has not elected to designate these instruments as cash flow or fair value hedges.

During the three months ended March 31, 2009, CenterPoint Energy recorded increased natural gas revenues from unrealized net gains of \$3 million and increased natural gas expense from unrealized net losses of \$22 million, resulting in a net unrealized loss of \$19 million. During the three months ended March 31, 2010, CenterPoint Energy recorded increased natural gas revenues from unrealized net gains of \$30 million and increased natural gas expense from unrealized net losses of \$27 million, resulting in a net unrealized gain of \$3 million.

Weather Hedges. CenterPoint Energy has weather normalization or other rate mechanisms that mitigate the impact of weather on its gas operations in Arkansas, Louisiana, Oklahoma and a portion of Texas. The remaining Gas Operations jurisdictions do not have such mechanisms. As a result, fluctuations from normal weather may have a significant positive or negative effect on the results of the gas operations in the remaining jurisdictions and in CenterPoint Houston's service territory.

In 2008 and 2009, CenterPoint Energy entered into heating-degree day swaps to mitigate the effect of fluctuations from normal weather on its financial position and cash flows for the respective winter heating seasons. The swaps were based on ten-year normal weather. During the three months ended March 31, 2009 and 2010, CenterPoint Energy recognized losses of \$3 million and \$7 million, respectively, related to these swaps. The losses were substantially offset by increased revenues due to colder than normal weather. Weather hedge losses are included in revenues in the Condensed Statements of Consolidated Income.

(b) Derivative Fair Values and Income Statement Impacts

The following tables present information about CenterPoint Energy's derivative instruments and hedging activities. The first tables provide a balance sheet overview of CenterPoint Energy's Derivative Assets and Liabilities as of December 31, 2009 and March 31, 2010, while the latter tables provide a breakdown of the related income statement impact for the three months ended March 31, 2009 and March 31, 2010.

Fair Value of Derivative Instruments

Total derivatives not designated as hedging instruments	Balance Sheet Location	December 31, 2009	
		Derivative Assets Fair Value (2) (3)	Derivative Liabilities Fair Value (2) (3)

(in millions)			
Natural gas contracts (1)	Current Assets	\$ 46	\$ (7)
Natural gas contracts (1)	Other Assets	16	(1)
Natural gas contracts (1)	Current Liabilities	20	(123)
Natural gas contracts (1)	Other Liabilities	1	(86)
Indexed debt securities derivative	Current Liabilities	—	(201)
Total		\$ 83	\$ (418)

Table of Contents

- (1) Natural gas contracts are subject to master netting arrangements and are presented on a net basis in the Condensed Consolidated Balance Sheets. This netting causes derivative assets (liabilities) to be ultimately presented net in a liability (asset) account within the Condensed Consolidated Balance Sheets.
- (2) The fair value shown for natural gas contracts is comprised of derivative gross volumes totaling 674 billion cubic feet (Bcf) or a net 152 Bcf long position. Of the net long position, basis swaps constitute 71 Bcf and volumes associated with price stabilization activities of the Natural Gas Distribution business segment comprise 51 Bcf.
- (3) The net of total non-trading derivative assets and liabilities is a \$39 million liability as shown on CenterPoint Energy's Condensed Consolidated Balance Sheets, and is comprised of the natural gas contracts derivative assets and liabilities separately shown above offset by collateral netting of \$95 million.

Total derivatives not designated as hedging instruments	Fair Value of Derivative Instruments		
	Balance Sheet Location	March 31, 2010 Derivative Assets Fair Value (2) (3)	Derivative Liabilities Fair Value (2) (3)
(in millions)			
Natural gas contracts (1)	Current Assets	\$ 61	\$ (1)
Natural gas contracts (1)	Other Assets	18	—
Natural gas contracts (1)	Current Liabilities	20	(179)
Natural gas contracts (1)	Other Liabilities	1	(81)
Indexed debt securities derivative	Current Liabilities	—	(228)
Total		\$ 100	\$ (489)

- (1) Natural gas contracts are subject to master netting arrangements and are presented on a net basis in the Condensed Consolidated Balance Sheets. This netting causes derivative assets (liabilities) to be ultimately presented net in a liability (asset) account within the Condensed Consolidated Balance Sheets.
- (2) The fair value shown for natural gas contracts is comprised of derivative gross volumes totaling 717 billion cubic feet (Bcf) or a net 181 Bcf long position. Of the net long position, basis swaps constitute 73 Bcf and volumes associated with price stabilization activities of the Natural Gas Distribution business segment comprise 46 Bcf.
- (3) The net of total non-trading derivative assets and liabilities is a \$7 million liability as shown on CenterPoint Energy's Condensed Consolidated Balance Sheets, and is comprised of the natural gas contracts derivative assets and liabilities separately shown above offset by collateral netting of \$154 million.

For CenterPoint Energy's price stabilization activities of the Natural Gas Distribution business segment, the settled costs of derivatives are ultimately recovered through purchased gas adjustments. Accordingly, the net unrealized gains and losses associated with these contracts are recorded as net regulatory assets. Realized and unrealized gains and losses on other derivatives are recognized in the Condensed Statements of Consolidated Income as revenue for retail sales derivative contracts and as natural gas expense for natural gas derivatives and non-retail related physical gas derivatives. Unrealized gains and losses on indexed debt securities are recorded as Other Income (Expense) on the Condensed Statements of Consolidated Income.

Income Statement Impact of Derivative Activity

Three Months Ended March 31,

Edgar Filing: CENTERPOINT ENERGY INC - Form 10-Q

Total derivatives not designated as hedging instruments	Income Statement Location	2009 (in millions)	2010 (in millions)
Natural gas contracts	Gains (Losses) in Revenue	\$ 77	\$ 44
Natural gas contracts (1)	Gains (Losses) in Expense: Natural Gas	(149)	(61)
Indexed debt securities derivative	Gains (Losses) in Other Income (Expense)	22	(27)
Total		\$ (50)	\$ (44)

12

Table of Contents

(1) The Gains (Losses) in Expense: Natural Gas includes \$(78) and \$(25) million of costs in 2009 and 2010, respectively, associated with price stabilization activities of the Natural Gas Distribution business segment that will be ultimately recovered/refunded through purchased gas adjustments.

(c) Credit Risk Contingent Features

CenterPoint Energy enters into financial derivative contracts containing material adverse change provisions. These provisions require CenterPoint Energy to post additional collateral if the Standard & Poor's Rating Services or Moody's Investors Service, Inc. credit rating of CenterPoint Energy is downgraded. The total fair value of the derivative instruments that contain credit risk contingent features that are in a net liability position at March 31, 2010 is \$173 million compared to \$140 million at December 31, 2009. The aggregate fair value of assets that are already posted as collateral at March 31, 2010 is \$92 million compared to \$65 million at December 31, 2009. If all derivative contracts (in a net liability position) containing credit risk contingent features were triggered at March 31, 2010, \$79 million of additional assets would be required to be posted as collateral compared to \$75 million at December 31, 2009.

(6) Fair Value Measurements

Assets and liabilities are recorded at fair value in the Condensed Consolidated Balance Sheets and are categorized based upon the level of judgment associated with the inputs used to measure their value. Hierarchical levels, as defined in this guidance and directly related to the amount of subjectivity associated with the inputs to fair valuations of these assets and liabilities, are as follows:

Level 1: Inputs are unadjusted quoted prices in active markets for identical assets or liabilities at the measurement date. The types of assets carried at Level 1 fair value generally are financial derivatives, investments and equity securities listed in active markets.

Level 2: Inputs, other than quoted prices included in Level 1, are observable for the asset or liability, either directly or indirectly. Level 2 inputs include quoted prices for similar instruments in active markets, and inputs other than quoted prices that are observable for the asset or liability. Fair value assets and liabilities that are generally included in this category are derivatives with fair values based on inputs from actively quoted markets. A market approach is utilized to value CenterPoint Energy's Level 2 assets or liabilities.

Level 3: Inputs are unobservable for the asset or liability, and include situations where there is little, if any, market activity for the asset or liability. In certain cases, the inputs used to measure fair value may fall into different levels of the fair value hierarchy. In such cases, the level in the fair value hierarchy within which the fair value measurement in its entirety falls has been determined based on the lowest level input that is significant to the fair value measurement in its entirety. Unobservable inputs reflect CenterPoint Energy's judgments about the assumptions market participants would use in pricing the asset or liability since limited market data exists. CenterPoint Energy develops these inputs based on the best information available, including CenterPoint Energy's own data. A market approach is utilized to value CenterPoint Energy's Level 3 assets or liabilities. CenterPoint Energy's Level 3 derivative instruments primarily consist of options that are not traded on recognized exchanges and are valued using option pricing models.

CenterPoint Energy determines the appropriate level for each financial asset and liability on a quarterly basis and recognizes any transfers at the end of the reporting period. For the quarter ended March 31, 2010, there were no significant transfers between levels.

Table of Contents

The following tables present information about CenterPoint Energy's assets and liabilities (including derivatives that are presented net) measured at fair value on a recurring basis as of December 31, 2009 and March 31, 2010, and indicate the fair value hierarchy of the valuation techniques utilized by CenterPoint Energy to determine such fair value.

	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3) (in millions)	Netting Adjustments (1)	Balance as of December 31, 2009
Assets					
Corporate equities	\$ 301	\$ —	\$ —	\$ —	\$ 301
Investments in money market funds	41	—	—	—	41

(1) Amounts represent the impact of legally enforceable master netting agreements that allow CenterPoint Energy to settle positive and negative positions and also include cash collateral of \$154 million posted with the same counterparties.

Table of Contents

The following table presents additional information about assets or liabilities, including derivatives that are measured at fair value on a recurring basis for which CenterPoint Energy has utilized Level 3 inputs to determine fair value:

	Fair Value Measurements Using Significant Unobservable Inputs (Level 3)	
	Derivative assets and liabilities, net	
	Three Months Ended March 31,	
	2009	2010
	(in millions)	
Beginning balance	\$ (58)	\$ (6)
Total unrealized gains or (losses):		
Included in earnings	(3)	2
Included in regulatory assets	(17)	(1)
Total purchases, sales, other settlements, net:		
Included in earnings	2	—
Included in regulatory assets	50	9
Ending balance	\$ (26)	\$ 4
The amount of total gains(losses) for the period included in earnings attributable to the change in unrealized gains or losses relating to assets still held at the reporting date	\$ (2)	\$ 2

(7) Goodwill

Goodwill by reportable business segment as of both December 31, 2009 and March 31, 2010 is as follows (in millions):

Natural Gas Distribution	\$746
Interstate Pipelines	579
Competitive Natural Gas Sales and Services	335
Field Services	25
Other Operations	11
Total	\$1,696

(8) Comprehensive Income

The following table summarizes the components of total comprehensive income (net of tax):

	For the Three Months Ended	
	March 31,	
	2009	2010
	(in millions)	
Net income	\$ 67	\$ 114
Other comprehensive income:		
Adjustment related to pension and other postretirement plans (net of tax of \$1 and \$1)	2	3
Total	2	3
Comprehensive income	\$ 69	\$ 117

Table of Contents

The following table summarizes the components of accumulated other comprehensive loss:

	December 31, 2009	March 31, 2010
	(in millions)	
Adjustment related to pension and postretirement plans	\$ (120)	\$ (117)
Net deferred loss from cash flow hedges	(4)	(4)
Total accumulated other comprehensive loss	\$ (124)	\$ (121)

(9) Capital Stock

CenterPoint Energy has 1,020,000,000 authorized shares of capital stock, comprised of 1,000,000,000 shares of \$0.01 par value common stock and 20,000,000 shares of \$0.01 par value preferred stock. At December 31, 2009, 391,746,945 shares of CenterPoint Energy common stock were issued and 391,746,779 shares were outstanding. At March 31, 2010, 394,186,303 shares of CenterPoint Energy common stock were issued and 394,186,137 shares were outstanding. Outstanding common shares exclude 166 treasury shares at both December 31, 2009 and March 31, 2010.

(10) Short-term Borrowings and Long-term Debt

(a) Short-term Borrowings

Receivables Facility. On October 9, 2009, CERC amended its receivables facility to extend the termination date to October 8, 2010. Availability under CERC's 364-day receivables facility now ranges from \$150 million to \$375 million, reflecting seasonal changes in receivables balances. As of December 31, 2009 and March 31, 2010, the facility size was \$150 million and \$375 million, respectively. As of both December 31, 2009 and March 31, 2010, there were no advances under the receivables facility.

Inventory Financing. In October 2009, Gas Operations entered into asset management agreements associated with its utility distribution service in Arkansas, north Louisiana and Oklahoma. Pursuant to the provisions of the agreements, Gas Operations sold \$104 million of its natural gas in storage and agreed to repurchase an equivalent amount of natural gas during the 2009-2010 winter heating season at the same cost, plus a financing charge. This transaction was accounted for as a financing and a principal obligation of \$55 million and \$2 million remained as of December 31, 2009 and March 31, 2010, respectively.

Also in October 2009, Gas Operations entered into asset management agreements associated with its utility distribution service in south Louisiana, Mississippi and Texas. In connection with these asset management agreements, Gas Operations exchanged natural gas in storage for the right to receive an equivalent amount of natural gas during the 2009-2010 winter heating season. Although title to the natural gas in storage was transferred to the third party, the natural gas continues to be accounted for as inventory due to the right to receive an equivalent amount of natural gas during the current winter heating season. As of December 31, 2009 and March 31, 2010, CenterPoint Energy's Consolidated Balance Sheets reflect \$10 million and \$-0-, respectively, in inventory related to these agreements.

(b) Long-term Debt

Pollution Control Bonds. In January 2010, CenterPoint Energy purchased \$290 million principal amount of pollution control bonds issued on its behalf at 101% of their principal amount plus accrued interest pursuant to the mandatory tender provisions of the bonds. Prior to the purchase, the pollution control bonds had a fixed rate of interest of

5.125%.

Convertible Subordinated Debentures. In January 2010, CERC Corp. redeemed \$45 million of its outstanding 6% convertible subordinated debentures due 2012 at 100% of the principal amount plus accrued and unpaid interest to the redemption date.

Revolving Credit Facilities. As of both December 31, 2009 and March 31, 2010, there were no outstanding borrowings under CenterPoint Energy's, CenterPoint Houston's or CERC Corp.'s long-term revolving credit facilities.

16

Table of Contents

In addition, as of December 31, 2009 and March 31, 2010, CenterPoint Energy had approximately \$25 million and \$20 million, respectively, of outstanding letters of credit under its \$1.2 billion credit facility. As of both December 31, 2009 and March 31, 2010 CenterPoint Houston had approximately \$4 million of outstanding letters of credit under its \$289 million credit facility. There was no commercial paper outstanding that would have been backstopped by CenterPoint Energy's \$1.2 billion credit facility or by CERC Corp.'s credit facility as of December 31, 2009 and March 31, 2010. CenterPoint Energy, CenterPoint Houston and CERC Corp. were in compliance with all debt covenants as of March 31, 2010.

CenterPoint Energy's \$1.2 billion credit facility has a first drawn cost of the London Interbank Offered Rate (LIBOR) plus 55 basis points based on CenterPoint Energy's current credit ratings. The facility contains a debt (excluding transition and system restoration bonds) to earnings before interest, taxes, depreciation and amortization (EBITDA) covenant (as those terms are defined in the facility). In February 2010, CenterPoint Energy amended its credit facility to modify the covenant to allow for a temporary increase of the permitted ratio from 5 times to 5.5 times if CenterPoint Houston experiences damage from a natural disaster in its service territory and CenterPoint Energy certifies to the administrative agent that CenterPoint Houston has incurred system restoration costs reasonably likely to exceed \$100 million in a calendar year, all or part of which CenterPoint Houston intends to seek to recover through securitization financing. Such temporary increase in the financial ratio covenant would be in effect from the date CenterPoint Energy delivers its certification until the earliest to occur of (i) the completion of the securitization financing, (ii) the first anniversary of CenterPoint Energy's certification or (iii) the revocation of such certification.

CenterPoint Houston's \$289 million credit facility contains a debt (excluding transition and system restoration bonds) to total capitalization covenant. The facility's first drawn cost is LIBOR plus 45 basis points based on CenterPoint Houston's current credit ratings.

CERC Corp.'s \$915 million credit facility's first drawn cost is LIBOR plus 45 basis points based on CERC Corp.'s current credit ratings. The facility contains a debt to total capitalization covenant.

Under CenterPoint Energy's \$1.2 billion credit facility, CenterPoint Houston's \$289 million credit facility and CERC Corp.'s \$915 million credit facility, an additional utilization fee of 5 basis points applies to borrowings any time more than 50% of the facility is utilized. The spread to LIBOR and the utilization fee fluctuate based on the borrower's credit rating.

(11) Commitments and Contingencies

(a) Natural Gas Supply Commitments

Natural gas supply commitments include natural gas contracts related to CenterPoint Energy's Natural Gas Distribution and Competitive Natural Gas Sales and Services business segments, which have various quantity requirements and durations, that are not classified as non-trading derivative assets and liabilities in CenterPoint Energy's Consolidated Balance Sheets as of December 31, 2009 and March 31, 2010 as these contracts meet the exception to be classified as "normal purchases contracts" or do not meet the definition of a derivative. Natural gas supply commitments also include natural gas transportation contracts that do not meet the definition of a derivative. As of March 31, 2010, minimum payment obligations for natural gas supply commitments are approximately \$308 million for the remaining nine months in 2010, \$484 million in 2011, \$405 million in 2012, \$346 million in 2013, \$254 million in 2014 and \$527 million after 2014.

(b) Capital Commitments

Long-Term Gas Gathering and Treating Agreements. In September 2009, CenterPoint Energy Field Services, Inc. (CEFS) entered into long-term agreements with an indirect wholly-owned subsidiary of Encana Corporation (Encana) and an indirect wholly-owned subsidiary of Royal Dutch Shell plc (Shell) to provide gathering and treating services for their natural gas production from certain Haynesville Shale and Bossier Shale formations in Louisiana. CEFS also acquired jointly-owned gathering facilities from Encana and Shell in De Soto and Red River parishes in northwest Louisiana. Each of the agreements includes acreage dedication and volume commitments for which CEFS has rights to gather Shell's and Encana's natural gas production from the dedicated areas. The gathering facilities are known as the "Magnolia Gathering System."

Table of Contents

In connection with the agreements, CEFS commenced gathering and treating services utilizing the acquired facilities. CEFS is expanding the acquired facilities in order to gather and treat up to 700 million cubic feet (MMcf) per day of natural gas and expects to place those facilities in service by the end of 2010. CEFS estimates that the purchase of existing facilities and construction to gather 700 MMcf per day will cost up to \$325 million. As of March 31, 2010, approximately \$260 million has been spent on this project, including the purchase of existing facilities.

Under the agreements, Encana or Shell can elect to require CEFS to further expand the facilities in order to gather and treat an additional volume of up to 1 billion cubic feet (Bcf) per day, and in March 2010, Encana and Shell exercised initial expansion elections to increase gathering capacity by 200 MMcf per day to 900 MMcf. Total capital expenditures for this expansion are estimated to be \$50 million to \$70 million, and the increased capacity is expected to be in service by the first quarter of 2011. In connection with the expansion, Encana and Shell each made incremental volume commitments for the capacity expansion.

If Encana and Shell elect expansion of the project to gather and process additional future volumes of up to 1 Bcf per day (including the 200 MMcf per day already elected), CEFS estimates that the expansion would cost as much as \$300 million, and Encana and Shell would provide incremental volume commitments.

In April 2010, CEFS entered into additional long-term agreements with Encana and Shell to provide gathering and treating services for their natural gas production from the Haynesville Shale and Bossier Shale formations in Texas and Louisiana. Pursuant to the agreements, CEFS has also acquired existing jointly-owned gathering facilities (the Olympia Gathering System) from Encana and Shell in De Soto and Red River parishes in northwest Louisiana.

CEFS has integrated the acquired facilities with CEFS's Magnolia Gathering System, allowing CEFS to commence gathering and treating services immediately for up to 150 MMcf per day of natural gas. Under the terms of the agreements, CEFS will expand the acquired facilities to gather and treat up to 580 MMcf per day of natural gas. Each of the agreements includes volume commitments and dedicated acreage for which CEFS has exclusive rights to gather Shell's and Encana's natural gas production.

New construction to reach capacity of 580 MMcf per day includes more than 180 miles of pipelines, over 8,000 horsepower of compression and over 680 MMcf per day of treating capacity.

CEFS estimates that the capital cost to purchase the existing facilities and construct new facilities for the Olympia Gathering System to gather 580 MMcf per day will be as much as \$400 million. If Encana and Shell elect, CEFS will expand the project to gather and process additional future volumes of up to 520 MMcf per day, for a total Olympia Gathering System capacity of up to 1.1 Bcf per day. CEFS estimates that an expansion to process 1.1 Bcf would cost as much as an additional \$200 million. Encana and Shell would provide incremental volume commitments in connection with expansions of the Olympia Gathering System.

(c) Legal, Environmental and Other Regulatory Matters

Legal Matters

Gas Market Manipulation Cases. CenterPoint Energy, CenterPoint Houston or their predecessor, Reliant Energy, Incorporated (Reliant Energy), and certain of their former subsidiaries are named as defendants in several lawsuits described below. Under a master separation agreement between CenterPoint Energy and RRI (formerly known as Reliant Resources, Inc. and Reliant Energy, Inc.), CenterPoint Energy and its subsidiaries are entitled to be indemnified by RRI for any losses, including attorneys' fees and other costs, arising out of these lawsuits. Pursuant to the indemnification obligation, RRI is defending CenterPoint Energy and its subsidiaries to the extent named in these lawsuits. A large number of lawsuits were filed against numerous gas market participants in a number of federal and

western state courts in connection with the operation of the natural gas markets in 2000-2002. CenterPoint Energy's former affiliate, RRI, was a participant in gas trading in the California and Western markets. These lawsuits, many of which have been filed as class actions, allege violations of state and federal antitrust laws. Plaintiffs in these lawsuits are seeking a variety of forms of relief, including, among others, recovery of compensatory damages (in some cases in excess of \$1 billion), a trebling of compensatory damages, full consideration damages and attorneys' fees. CenterPoint Energy and/or Reliant Energy were named in approximately

Table of Contents

30 of these lawsuits, which were instituted between 2003 and 2009. CenterPoint Energy and its affiliates have been released or dismissed from all but two of such cases. CenterPoint Energy Services, Inc. (CES), a subsidiary of CERC Corp., is a defendant in a case now pending in federal court in Nevada alleging a conspiracy to inflate Wisconsin natural gas prices in 2000-2002. Additionally, CenterPoint Energy was a defendant in a lawsuit filed in state court in Nevada that was dismissed in 2007, but the plaintiffs appealed the dismissal in March 2010 to the Nevada Supreme Court. CenterPoint Energy believes that neither it nor CES is a proper defendant in these remaining cases and will continue to pursue dismissal from those cases. CenterPoint Energy does not expect the ultimate outcome of these remaining matters to have a material impact on its financial condition, results of operations or cash flows.

In May 2009, RRI sold its Texas retail business to NRG Retail LLC, a subsidiary of NRG Energy, Inc. In connection with the sale, RRI changed its name to RRI Energy, Inc. and no longer provides service as a REP in CenterPoint Houston's service territory. In April 2010, RRI announced its plan to merge with Mirant Corporation in an all-stock transaction. Neither the sale of the retail business nor the merger with Mirant Corporation, if ultimately finalized, alters RRI's contractual obligations to indemnify CenterPoint Energy and its subsidiaries, including CenterPoint Houston, for certain liabilities, including their indemnification regarding certain litigation, nor does it affect the terms of existing guaranty arrangements for certain RRI gas transportation contracts discussed below under Guaranties.

Natural Gas Measurement Lawsuits. CERC Corp. and certain of its subsidiaries are defendants in two mismeasurement lawsuits brought against approximately 245 pipeline companies and their affiliates pending in state court in Stevens County, Kansas. In one case (originally filed in May 1999 and amended four times), the plaintiffs purport to represent a class of royalty owners who allege that the defendants have engaged in systematic mismeasurement of the volume of natural gas for more than 25 years. The plaintiffs amended their petition in this suit in July 2003 in response to an order from the judge denying certification of the plaintiffs' alleged class. In the amendment, the plaintiffs dismissed their claims against certain defendants (including two CERC Corp. subsidiaries), limited the scope of the class of plaintiffs they purport to represent and eliminated previously asserted claims based on mismeasurement of the British thermal unit (Btu) content of the gas. The same plaintiffs then filed a second lawsuit, again as representatives of a putative class of royalty owners in which they assert their claims that the defendants have engaged in systematic mismeasurement of the Btu content of natural gas for more than 25 years. In both lawsuits, the plaintiffs seek compensatory damages, along with statutory penalties, treble damages, interest, costs and fees. In September 2009, the district court in Stevens County, Kansas, denied plaintiffs' request for class certification of their case and, in March 2010, denied the plaintiffs' request for reconsideration of that order.

CERC believes that there has been no systematic mismeasurement of gas and that these lawsuits are without merit. CERC and CenterPoint Energy do not expect the ultimate outcome of the lawsuits to have a material impact on the financial condition, results of operations or cash flows of either CenterPoint Energy or CERC.

Environmental Matters

Manufactured Gas Plant Sites. CERC and its predecessors operated manufactured gas plants (MGPs) in the past. In Minnesota, CERC has completed remediation on two sites, other than ongoing monitoring and water treatment. There are five remaining sites in CERC's Minnesota service territory. CERC believes that it has no liability with respect to two of these sites.

At March 31, 2010, CERC had accrued \$14 million for remediation of these Minnesota sites and the estimated range of possible remediation costs for these sites was \$4 million to \$35 million based on remediation continuing for 30 to 50 years. The cost estimates are based on studies of a site or industry average costs for remediation of sites of similar size. The actual remediation costs will be dependent upon the number of sites to be remediated, the participation of other potentially responsible parties (PRP), if any, and the remediation methods used. CERC has utilized an environmental expense tracker mechanism in its rates in Minnesota to recover estimated costs in excess of insurance

recovery. In January 2010, as part of its Minnesota rate case decision, the MPUC eliminated the environmental expense tracker mechanism and ordered amounts previously collected from ratepayers and related carrying costs refunded to customers. As of March 31, 2010, the balance in the environmental expense tracker account was \$8.3 million. The MPUC provided for the inclusion in rates of approximately \$285,000 annually to fund normal on-going remediation costs. CERC was not required to refund to customers the amount collected from insurance companies, \$5.0 million at March 31, 2010, to be used to mitigate future environmental costs. The MPUC

Table of Contents

further gave assurance that any reasonable and prudent environmental clean-up costs CERC incurs in the future will be rate-recoverable under normal regulatory principles and procedures. This provision had no impact on earnings.

In addition to the Minnesota sites, the United States Environmental Protection Agency and other regulators have investigated MGP sites that were owned or operated by CERC or may have been owned by one of its former affiliates. CERC has been named as a defendant in a lawsuit filed in the United States District Court, District of Maine, under which contribution is sought by private parties for the cost to remediate former MGP sites based on the previous ownership of such sites by former affiliates of CERC or its divisions. CERC has also been identified as a PRP by the State of Maine for a site that is the subject of the lawsuit. In June 2006, the federal district court in Maine ruled that the current owner of the site is responsible for site remediation but that an additional evidentiary hearing would be required to determine if other potentially responsible parties, including CERC, would have to contribute to that remediation. In September 2009, the federal district court granted CERC's motion for summary judgment in the proceeding. Although it is likely that the plaintiff will pursue an appeal from that dismissal, further action will not be taken until the district court disposes of claims against other defendants in the case. CERC believes it is not liable as a former owner or operator of the site under the Comprehensive Environmental, Response, Compensation and Liability Act of 1980, as amended, and applicable state statutes, and is vigorously contesting the suit and its designation as a PRP. CERC and CenterPoint Energy do not expect the ultimate outcome to have a material adverse impact on the financial condition, results of operations or cash flows of either CenterPoint Energy or CERC.

Mercury Contamination. CenterPoint Energy's pipeline and distribution operations have in the past employed elemental mercury in measuring and regulating equipment. It is possible that small amounts of mercury may have been spilled in the course of normal maintenance and replacement operations and that these spills may have contaminated the immediate area with elemental mercury. CenterPoint Energy has found this type of contamination at some sites in the past, and CenterPoint Energy has conducted remediation at these sites. It is possible that other contaminated sites may exist and that remediation costs may be incurred for these sites. Although the total amount of these costs is not known at this time, based on CenterPoint Energy's experience and that of others in the natural gas industry to date and on the current regulations regarding remediation of these sites, CenterPoint Energy believes that the costs of any remediation of these sites will not be material to CenterPoint Energy's financial condition, results of operations or cash flows.

Asbestos. Some facilities owned by CenterPoint Energy contain or have contained asbestos insulation and other asbestos-containing materials. CenterPoint Energy or its subsidiaries have been named, along with numerous others, as a defendant in lawsuits filed by a number of individuals who claim injury due to exposure to asbestos. Some of the claimants have worked at locations owned by CenterPoint Energy, but most existing claims relate to facilities previously owned by CenterPoint Energy's subsidiaries. CenterPoint Energy anticipates that additional claims like those received may be asserted in the future. In 2004, CenterPoint Energy sold its generating business, to which most of these claims relate, to Texas Genco LLC, which is now known as NRG Texas LP. Under the terms of the arrangements regarding separation of the generating business from CenterPoint Energy and its sale to NRG Texas LP, ultimate financial responsibility for uninsured losses from claims relating to the generating business has been assumed by NRG Texas LP, but CenterPoint Energy has agreed to continue to defend such claims to the extent they are covered by insurance maintained by CenterPoint Energy, subject to reimbursement of the costs of such defense from NRG Texas LP. Although their ultimate outcome cannot be predicted at this time, CenterPoint Energy intends to continue vigorously contesting claims that it does not consider to have merit and does not expect, based on its experience to date, these matters, either individually or in the aggregate, to have a material adverse effect on CenterPoint Energy's financial condition, results of operations or cash flows.

Groundwater Contamination Litigation. Predecessor entities of CERC, along with several other entities, are defendants in litigation, *St. Michel Plantation, LLC, et al. v. White, et al.*, pending in civil district court in Orleans Parish, Louisiana. In the lawsuit, the plaintiffs allege that their property in Terrebonne Parish, Louisiana suffered salt

water contamination as a result of oil and gas drilling activities conducted by the defendants. Although a predecessor of CERC held an interest in two oil and gas leases on a portion of the property at issue, neither it nor any other CERC entities drilled or conducted other oil and gas operations on those leases. In January 2009, CERC and the plaintiffs reached agreement on the terms of a settlement that, if ultimately approved by the Louisiana Department of Natural Resources, is expected to resolve this litigation. CenterPoint Energy and CERC do not expect the outcome of this litigation to have a material adverse impact on the financial condition, results of operations or cash flows of either CenterPoint Energy or CERC.

Table of Contents

Other Environmental. From time to time CenterPoint Energy has received notices from regulatory authorities or others regarding its status as a PRP in connection with sites found to require remediation due to the presence of environmental contaminants. In addition, CenterPoint Energy has been named from time to time as a defendant in litigation related to such sites. Although the ultimate outcome of such matters cannot be predicted at this time, CenterPoint Energy does not expect, based on its experience to date, these matters, either individually or in the aggregate, to have a material adverse effect on CenterPoint Energy's financial condition, results of operations or cash flows.

Other Proceedings

CenterPoint Energy is involved in other legal, environmental, tax and regulatory proceedings before various courts, regulatory commissions and governmental agencies regarding matters arising in the ordinary course of business. Some of these proceedings involve substantial amounts. CenterPoint Energy regularly analyzes current information and, as necessary, provides accruals for probable liabilities on the eventual disposition of these matters. CenterPoint Energy does not expect the disposition of these matters to have a material adverse effect on CenterPoint Energy's financial condition, results of operations or cash flows.

(d) Guaranties

Prior to CenterPoint Energy's distribution of its ownership in RRI to its shareholders, CERC had guaranteed certain contractual obligations of what became RRI's trading subsidiary. When the companies separated, RRI agreed to secure CERC against obligations under the guaranties RRI had been unable to extinguish by the time of separation. Pursuant to such agreement, as amended in December 2007, RRI has agreed to provide to CERC cash or letters of credit as security against CERC's obligations under its remaining guaranties for demand charges under certain gas transportation agreements if and to the extent changes in market conditions expose CERC to a risk of loss on those guaranties. The present value of the demand charges under these transportation contracts, which will be effective until 2018, was approximately \$91 million as of March 31, 2010. As of March 31, 2010, RRI was not required to provide security to CERC. If RRI should fail to perform the contractual obligations, CERC could have to honor its guarantee and, in such event, collateral provided as security may be insufficient to satisfy CERC's obligations.

(12) Income Taxes

During the three months ended March 31, 2009 and 2010, the effective tax rate was 42% and 47%, respectively. The most significant item affecting the comparability of the effective tax rate is a non-cash, \$21 million increase in the 2010 income tax expense as a result of a change in tax law upon the enactment in March 2010 of the Patient Protection and Affordable Care Act and the related Health Care and Education Reconciliation Act of 2010. Additionally, the comparability of the effective tax rate is affected by a \$4 million increase in the 2009 income tax expense related to a state tax examination.

The change in tax law, which becomes effective for tax years beginning after December 31, 2012, eliminates the tax deductibility of the portion of retiree health care costs which are reimbursed by Medicare Part D subsidies. Based upon the actuarially determined net present value of lost future retiree health care deductions related to the subsidies, CenterPoint Energy reduced its deferred tax asset related to future retiree health care deductions by approximately \$32 million as of March 31, 2010. The portion of the reduction that CenterPoint Energy believes will be recovered through the regulatory process, or approximately \$11 million, has been recorded as a regulatory asset. The remaining \$21 million of the reduction in CenterPoint Energy's deferred tax asset has been reflected as a charge to income tax expense.

Table of Contents

The following table summarizes CenterPoint Energy's unrecognized tax benefits at December 31, 2009 and March 31, 2010:

	December 31, 2009	March 31, 2010
	(in millions)	
Unrecognized tax benefits	\$ 187	\$ 199
Portion of unrecognized tax benefits that, if recognized, would reduce the effective income tax rate	10	11
Interest accrued on unrecognized tax benefits	3	6

During the three months ended March 31, 2010, the IRS notified CenterPoint Energy that it would perform an examination of CenterPoint Energy's 2008 consolidated federal income tax return.

(13) Estimated Fair Value of Financial Instruments

The fair values of cash and cash equivalents, investments in debt and equity securities classified as "available-for-sale" and "trading" and short-term borrowings are estimated to be approximately equivalent to carrying amounts and have been excluded from the table below. The fair values of non-trading derivative assets and liabilities and the ZENS indexed debt securities derivative are stated at fair value and are excluded from the table below. The fair value of each debt instrument is determined by multiplying the principal amount of each debt instrument by the market price.

	December 31, 2009		March 31, 2010	
	Carrying Amount	Fair Value	Carrying Amount	Fair Value
	(in millions)			
Financial liabilities:				
Long-term debt	\$ 9,900	\$ 10,413	\$ 9,459	\$ 10,087

(14) Earnings Per Share

The following table reconciles numerators and denominators of CenterPoint Energy's basic and diluted earnings per share calculations:

	Three Months Ended March 31, 2009	March 31, 2010
	(in millions, except share and per share amounts)	
Basic earnings per share calculation:		
Net income	\$ 67	\$ 114
Weighted average shares outstanding	347,496,000	392,855,000
Basic earnings per share:		
Net income	\$ 0.19	\$ 0.29

Edgar Filing: CENTERPOINT ENERGY INC - Form 10-Q

Diluted earnings per share calculation:

Net income	\$ 67	\$ 114
Weighted average shares outstanding	347,496,000	392,855,000
Plus: Incremental shares from assumed conversions:		
Stock options (1)	511,000	582,000
Restricted stock	1,150,000	1,641,000
Weighted average shares assuming dilution	349,157,000	395,078,000

Diluted earnings per share:

Net income	\$ 0.19	\$ 0.29
------------	---------	---------

Table of Contents

(1) Options to purchase 2,662,903 and 1,753,239 shares were outstanding for the three months ended March 31, 2009 and 2010, respectively, but were not included in the computation of diluted earnings per share because the options' exercise price was greater than the average market price of the common shares for the respective periods.

(15) Reportable Business Segments

CenterPoint Energy's determination of reportable business segments considers the strategic operating units under which CenterPoint Energy manages sales, allocates resources and assesses performance of various products and services to wholesale or retail customers in differing regulatory environments. The accounting policies of the business segments are the same as those described in the summary of significant accounting policies except that some executive benefit costs have not been allocated to business segments. CenterPoint Energy uses operating income as the measure of profit or loss for its business segments.

CenterPoint Energy's reportable business segments include the following: Electric Transmission & Distribution, Natural Gas Distribution, Competitive Natural Gas Sales and Services, Interstate Pipelines, Field Services and Other Operations. The electric transmission and distribution function (CenterPoint Houston) is reported in the Electric Transmission & Distribution business segment. Natural Gas Distribution consists of intrastate natural gas sales to, and natural gas transportation and distribution for, residential, commercial, industrial and institutional customers. Competitive Natural Gas Sales and Services represents CenterPoint Energy's non-rate regulated gas sales and services operations, which consist of three operational functions: wholesale, retail and intrastate pipelines. The Interstate Pipelines business segment includes the interstate natural gas pipeline operations. The Field Services business segment includes the natural gas gathering, processing and treating operations. Other Operations consists primarily of other corporate operations which support all of CenterPoint Energy's business operations.

Financial data for business segments are as follows (in millions):

	For the Three Months Ended March 31, 2009				Total Assets as of December 31, 2009
	Revenues from External Customers		Net Intersegment Revenues	Operating Income	
Electric Transmission & Distribution	\$ 412	(1)	\$ —	\$ 70	\$ 9,755
Natural Gas Distribution	1,418		3	118	4,535
Competitive Natural Gas Sales and Services	760		5	2	1,176
Interstate Pipelines	117		36	69	3,484
Field Services	56		1	26	1,045
Other Operations	3		—	—	2,261 (2)
Eliminations	—		(45)	—	(2,483)
Consolidated	\$ 2,766		\$ —	\$ 285	\$ 19,773

	For the Three Months Ended March 31, 2010				Total Assets as of March 31, 2010
	Revenues from External Customers		Net Intersegment Revenues	Operating Income	
Electric Transmission & Distribution	\$ 482	(1)	\$ —	\$ 107	\$ 9,597
Natural Gas Distribution	1,533		4	139	4,597

Competitive Natural Gas Sales and Services	844	8	15	1,215
Interstate Pipelines	103	35	72	3,526
Field Services	58	10	23	1,199
Other Operations	3	—	1	2,378 (2)
Eliminations	—	(57)	—	(3,161)
Consolidated	\$ 3,023	\$ —	\$ 357	\$ 19,351

(1) Sales to subsidiaries of NRG Retail LLC, the successor to RRI's Texas retail business, in the three months ended March 31, 2009 and 2010 represented approximately \$142 million and \$135 million, respectively, of CenterPoint Houston's transmission and distribution revenues. Sales to subsidiaries of TXU Energy Retail Company LLC in the three months ended March 31, 2009 and 2010 represented approximately \$37 million and \$42 million, respectively, of CenterPoint Houston's transmission and distribution revenues.

Table of Contents

(2) Included in total assets of Other Operations as of December 31, 2009 and March 31, 2010 are pension and other postemployment related regulatory assets of \$731 million and \$721 million, respectively.

(16) Subsequent Events

On April 22, 2010, CenterPoint Energy's board of directors declared a regular quarterly cash dividend of \$0.195 per share of common stock payable on June 10, 2010, to shareholders of record as of the close of business on May 14, 2010.

Table of Contents

Item 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS OF CENTERPOINT ENERGY, INC. AND SUBSIDIARIES

The following discussion and analysis should be read in combination with our Interim Condensed Financial Statements contained in this Form 10-Q and our Annual Report on Form 10-K for the year ended December 31, 2009 (2009 Form 10-K).

EXECUTIVE SUMMARY

Recent Events

Long-Term Gas Gathering and Treating Agreements

In September 2009, CenterPoint Energy Field Services, Inc. (CEFS) entered into long-term agreements with an indirect wholly-owned subsidiary of Encana Corporation (Encana) and an indirect wholly-owned subsidiary of Royal Dutch Shell plc (Shell) to provide gathering and treating services for their natural gas production from certain Haynesville Shale and Bossier Shale formations in Louisiana. CEFS also acquired jointly-owned gathering facilities from Encana and Shell in De Soto and Red River parishes in northwest Louisiana. Each of the agreements includes acreage dedication and volume commitments for which CEFS has rights to gather Shell's and Encana's natural gas production from the dedicated areas. The gathering facilities are known as the "Magnolia Gathering System."

In connection with the agreements, CEFS commenced gathering and treating services utilizing the acquired facilities. CEFS is expanding the acquired facilities in order to gather and treat up to 700 million cubic feet (MMcf) per day of natural gas and expects to place those facilities in service by the end of 2010. CEFS estimates that the purchase of existing facilities and construction to gather 700 MMcf per day will cost up to \$325 million. As of March 31, 2010, approximately \$260 million has been spent on this project, including the purchase of existing facilities.

Under the agreements, Encana or Shell can elect to require CEFS to further expand the facilities in order to gather and treat an additional volume of up to 1 billion cubic feet (Bcf) per day, and in March 2010, Encana and Shell exercised initial expansion elections to increase gathering capacity by 200 MMcf per day to 900 MMcf. Total capital expenditures for this expansion are estimated to be \$50 million to \$70 million, and the increased capacity is expected to be in service by the first quarter of 2011. In connection with the expansion, Encana and Shell each made incremental volume commitments for the capacity expansion.

If Encana and Shell elect expansion of the project to gather and process additional future volumes of up to 1 Bcf per day (including the 200 MMcf per day already elected), CEFS estimates that the expansion would cost as much as \$300 million, and Encana and Shell would provide incremental volume commitments.

In April 2010, CEFS entered into additional long-term agreements with Encana and Shell to provide gathering and treating services for their natural gas production from the Haynesville Shale and Bossier Shale formations in Texas and Louisiana. Pursuant to the agreements, CEFS has also acquired existing jointly-owned gathering facilities (the Olympia Gathering System) from Encana and Shell in De Soto and Red River parishes in northwest Louisiana.

CEFS has integrated the acquired facilities with CEFS's Magnolia Gathering System, allowing CEFS to commence gathering and treating services immediately for up to 150 MMcf per day of natural gas. Under the terms of the agreements, CEFS will expand the acquired facilities to gather and treat up to 580 MMcf per day of natural gas. Each of the agreements includes volume commitments and dedicated acreage for which CEFS has exclusive rights to gather Shell's and Encana's natural gas production.

New construction to reach capacity of 580 MMcf per day includes more than 180 miles of pipelines, over 8,000 horsepower of compression and over 680 MMcf per day of treating capacity.

CEFS estimates that the capital cost to purchase the existing facilities and construct new facilities for the Olympia Gathering System to gather 580 MMcf per day will be as much as \$400 million. If Encana and Shell elect, CEFS will expand the project to gather and process additional future volumes of up to 520 MMcf per day, for a total Olympia Gathering System capacity of up to 1.1 Bcf per day. CEFS estimates that an expansion to process 1.1 Bcf would cost as much as an additional \$200 million. Encana and Shell would provide incremental volume commitments in connection with expansions of the Olympia Gathering System.

Table of Contents

Debt Transactions

In January 2010, we purchased \$290 million principal amount of pollution control bonds issued on our behalf at 101% of their principal amount plus accrued interest pursuant to the mandatory tender provisions of the bonds. Prior to the purchase, the pollution control bonds had a fixed rate of interest of 5.125%. The purchase reduces temporary investments and leverage while providing us with the flexibility to finance future capital needs in the tax-exempt market through a remarketing of these bonds.

In January 2010, CERC Corp. redeemed \$45 million of its outstanding 6% convertible subordinated debentures due 2012 at 100% of the principal amount plus accrued and unpaid interest to the redemption date.

Advanced Metering System and Distribution Automation (Intelligent Grid)

In October 2009, the U.S. Department of Energy (DOE) notified CenterPoint Energy Houston Electric, LLC (CenterPoint Houston) that it had been selected for a \$200 million grant for its advanced metering system (AMS) and intelligent grid (IG) projects. In March 2010, CenterPoint Houston and the DOE completed negotiations and finalized the agreement. The DOE will reimburse CenterPoint Houston 50% of its eligible costs until the total amount of the grant has been paid. CenterPoint Houston will use \$150 million of the grant funding to accelerate completion of its current deployment of advanced meters by 2012, instead of 2014 as originally scheduled. CenterPoint Houston will use the other \$50 million from the grant to begin deployment of an electric distribution grid automation strategy in a portion of its service territory over the next three years. It is expected that the portion of the IG project subject to funding by DOE will cost approximately \$115 million. CenterPoint Houston believes the IG has the potential to provide a significant improvement in grid planning, operations, maintenance and customer service for its distribution system.

In March 2010, the Internal Revenue Service (IRS) announced through the issuance of Revenue Procedure 2010-20 that it was providing a safe harbor to corporations who receive a Smart Grid Investment Grant. The IRS stated that it would not challenge a corporation's treatment of the grant as a non-taxable non-shareholder contribution to capital as long as the corporation properly reduced the tax basis of the property acquired with grant funds.

CenterPoint Houston Rate Case

The final order in its 2006 rate proceeding requires CenterPoint Houston to file a general rate case with the Public Utility Commission of Texas (Texas Utility Commission) by June 30, 2010 unless the Texas Utility Commission Staff and certain other parties determined by March 31, 2010 that no such filing would be necessary. Those parties have advised CenterPoint Houston that a rate case filing is necessary, and, accordingly, CenterPoint Houston plans to file its application to change rates no later than the June 30, 2010 deadline. The amount and other terms of the rate filing have not been established at this time. Based on the prescribed timeline for processing such an application, CenterPoint Houston anticipates that a final order on that application would be entered in early 2011.

Table of Contents

CONSOLIDATED RESULTS OF OPERATIONS

All dollar amounts in the tables that follow are in millions, except for per share amounts.

	Three Months Ended March 31,	
	2009	2010
Revenues	\$ 2,766	\$ 3,023
Expenses	2,481	2,666
Operating Income	285	357
Gain (Loss) on Marketable Securities	(34)	38
Gain (Loss) on Indexed Debt Securities	22	(27)
Interest and Other Finance Charges	(129)	(122)
Interest on Transition and System Restoration Bonds	(33)	(36)
Equity in Earnings of Unconsolidated Affiliates	—	5
Other Income, net	4	1
Income Before Income Taxes	115	216
Income Tax Expense	(48)	(102)
Net Income	\$ 67	\$ 114
Basic Earnings Per Share	\$ 0.19	\$ 0.29
Diluted Earnings Per Share	\$ 0.19	\$ 0.29

Three months ended March 31, 2010 compared to three months ended March 31, 2009

We reported consolidated net income of \$114 million (\$0.29 per diluted share) for the three months ended March 31, 2010 compared to \$67 million (\$0.19 per diluted share) for the same period in 2009. The increase in net income of \$47 million was primarily due to a \$72 million increase in operating income (discussed by segment below), a change in net gain (loss) on our indexed debt and marketable securities of \$23 million, a \$7 million decrease in interest expense, excluding transition and system restoration bond-related interest expense and a \$5 million increase in the equity in earnings of unconsolidated affiliates. These increases in net income were partially offset by a \$54 million increase in income tax expense.

Income Tax Expense

During the three months ended March 31, 2009 and 2010, the effective tax rate was 42% and 47%, respectively. The most significant item affecting the comparability of the effective tax rate is a non-cash, \$21 million increase in the 2010 income tax expense as a result of a change in tax law upon the enactment in March 2010 of the Patient Protection and Affordable Care Act and the related Health Care and Education Reconciliation Act of 2010. Additionally, the comparability of the effective tax rate is affected by a \$4 million increase in the 2009 income tax expense related to a state tax examination.

The change in tax law, which becomes effective for tax years beginning after December 31, 2012, eliminates the tax deductibility of the portion of retiree health care costs which are reimbursed by Medicare Part D subsidies. Based upon the actuarially determined net present value of lost future retiree health care deductions related to the subsidies, we reduced our deferred tax asset related to future retiree health care deductions by approximately \$32 million as of March 31, 2010. The portion of the reduction that we believe will be recovered through the regulatory process, or approximately \$11 million, has been recorded as a regulatory asset. The remaining \$21 million of the reduction in our deferred tax asset has been reflected as a charge to income tax expense.

Table of Contents

RESULTS OF OPERATIONS BY BUSINESS SEGMENT

The following table presents operating income (in millions) for each of our business segments for the three months ended March 31, 2009 and 2010. Included in revenues are intersegment sales. We account for intersegment sales as if the sales were to third parties, that is, at current market prices.

	Three Months Ended March 31,	
	2009	2010
Electric Transmission & Distribution	\$ 70	\$ 107
Natural Gas Distribution	118	139
Competitive Natural Gas Sales and Services	2	15

Total	2,082,930	2,104,786

(1) Represents the amount necessary to pay interest on the transition and system restoration bonds.

Table of Contents

Three months ended March 31, 2010 compared to three months ended March 31, 2009

Our Electric Transmission & Distribution business segment reported operating income of \$107 million for the three months ended March 31, 2010, consisting of \$71 million from the regulated electric transmission and distribution utility (TDU) and \$36 million related to transition and system restoration bonds companies. For the three months ended March 31, 2009, operating income totaled \$70 million, consisting of \$37 million from the TDU and \$33 million related to transition and system restoration bond companies. TDU revenues increased \$40 million primarily due to increased usage (\$26 million) in part due to colder weather, revenues from implementation of the AMS (\$9 million), higher transmission-related revenues (\$5 million) and higher revenues due to customer growth (\$4 million) from the addition of nearly 22,000 new customers, partially offset by a credit to customers related to deferred income taxes associated with Hurricane Ike storm restoration costs (\$6 million). Operation and maintenance expenses increased due to higher transmission costs billed by transmission providers (\$3 million) and increased AMS project expenses (\$4 million), partially offset by lower pension costs (\$4 million). Increased depreciation expense is related to increased investment in AMS (\$4 million) and other capital additions (\$1 million).

Natural Gas Distribution

For information regarding factors that may affect the future results of operations of our Natural Gas Distribution business segment, please read "Risk Factors – Risk Factors Affecting Our Natural Gas Distribution, Competitive Natural Gas Sales and Services, Interstate Pipelines and Field Services Businesses," " Risk Factors Associated with Our Consolidated Financial Condition" and " Risks Common to Our Business and Other Risks" in Item 1A of Part I of our 2009 Form 10-K.

The following table provides summary data of our Natural Gas Distribution business segment for the three months ended March 31, 2009 and 2010 (in millions, except throughput and customer data):

	Three Months Ended March 31,	
	2009	2010
Revenues	\$ 1,421	\$ 1,537
Expenses:		
Natural gas	1,045	1,139
Operation and maintenance	169	167
Depreciation and amortization	40	40
Taxes other than income taxes	49	52
Total expenses	1,303	1,398
Operating Income	\$ 118	\$ 139
Throughput (in billion cubic feet (Bcf)):		
Residential	78	96
Commercial and industrial	77	87
Total Throughput	155	183
Number of customers at period end:		
Residential	2,996,455	3,012,856
Commercial and industrial	246,405	246,676
Total	3,242,860	3,259,532

Three months ended March 31, 2010 compared to three months ended March 31, 2009

Our Natural Gas Distribution business segment reported operating income of \$139 million for the three months ended March 31, 2010 compared to \$118 million for the three months ended March 31, 2009. Operating income increased \$21 million primarily as a result of increased margin (revenue less cost of natural gas) and lower bad debt expense. The increase in margin (\$22 million) is due to increased use (\$9 million), primarily caused by colder weather, and higher transportation (\$4 million), non-utility (\$3 million) and other miscellaneous revenues (\$4 million). Revenues related to both energy efficiency programs and gross receipts taxes are substantially offset by the related expenses. Operation and maintenance expense declined \$2 million due to lower bad debt expense (\$5

Table of Contents

million) related to improved collection efforts and lower pension expense (\$2 million), partially offset by higher labor costs (\$2 million) and other expense increases (\$3 million).

Competitive Natural Gas Sales and Services

For information regarding factors that may affect the future results of operations of our Competitive Natural Gas Sales and Services business segment, please read "Risk Factors Risk Factors Affecting Our Natural Gas Distribution, Competitive Natural Gas Sales and Services, Interstate Pipelines and Field Services Businesses," " Risk Factors Associated with Our Consolidated Financial Condition" and " Risks Common to Our Business and Other Risks" in Item 1A of Part I of our 2009 Form 10-K.

The following table provides summary data of our Competitive Natural Gas Sales and Services business segment for the three months ended March 31, 2009 and 2010 (in millions, except throughput and customer data):

	Three Months Ended March 31,	
	2009	2010
Revenues	\$ 765	\$ 852
Expenses:		
Natural gas	752	826
Operation and maintenance	10	9
Depreciation and amortization	1	1
Taxes other than income taxes	—	1
Total expenses	763	837
Operating Income	\$ 2	\$ 15
Throughput (in Bcf):	141	141
Number of customers at period end	10,862	11,369

Three months ended March 31, 2010 compared to three months ended March 31, 2009

Our Competitive Natural Gas Sales and Services business segment reported operating income of \$15 million for the three months ended March 31, 2010 compared to \$2 million for the three months ended March 31, 2009. The increase in operating income of \$13 million is primarily due to the favorable impact of the mark-to-market valuation for non-trading financial derivatives for 2010 of \$3 million versus an unfavorable impact of \$19 million for the same period in 2009. A further favorable impact of \$5 million is attributable to the \$6 million write down of gas in the first quarter of 2009 to the lower of cost or market as compared to a write down of less than \$1 million in the first quarter of 2010. Offsetting these favorable impacts is a \$14 million decrease in margin attributable to reduced basis spreads on pipeline transport opportunities and decreased winter storage spreads.

Interstate Pipelines

For information regarding factors that may affect the future results of operations of our Interstate Pipelines business segment, please read "Risk Factors Risk Factors Affecting Our Natural Gas Distribution, Competitive Natural Gas Sales and Services, Interstate Pipelines and Field Services Businesses," " Risk Factors Associated with Our Consolidated Financial Condition" and " Risks Common to Our Business and Other Risks" in Item 1A of Part I of our 2009 Form 10-K.

Table of Contents

The following table provides summary data of our Interstate Pipelines business segment for the three months ended March 31, 2009 and 2010 (in millions, except throughput data):

	Three Months Ended March 31,	
	2009	2010
Revenues	\$ 153	\$ 138
Expenses:		
Natural gas	29	10
Operation and maintenance	35	35
Depreciation and amortization	12	13
Taxes other than income taxes	8	8
Total expenses	84	66
Operating Income	\$ 69	\$ 72
Transportation throughput (in Bcf)	467	438

Three months ended March 31, 2010 compared to three months ended March 31, 2009

Our Interstate Pipeline business segment reported operating income of \$72 million for the three months ended March 31, 2010 compared to \$69 million for the three months ended March 31, 2009. Margins (revenues less natural gas costs) increased \$4 million primarily due to new contracts on the Carthage to Perryville pipeline (\$12 million), partially offset by reduced other transportation margins and ancillary services (\$8 million). Depreciation and amortization increased by \$1 million due to asset additions.

Equity Earnings. In addition, this business segment recorded equity income (loss) of \$(2) million and \$3 million for the three months ended March 31, 2009 and 2010, respectively, from its 50% interest in the Southeast Supply Header (SESH), a jointly-owned pipeline that went into service in September 2008. The 2009 results include a non-cash pre-tax charge of \$5 million to reflect SESH's decision to discontinue the use of guidance for accounting for regulated operations. Excluding the effect of these adjustments, equity earnings from normal operations was \$3 million in 2009. These amounts are included in Equity in Earnings of Unconsolidated Affiliates under the Other Income (Expense) caption.

Field Services

For information regarding factors that may affect the future results of operations of our Field Services business segment, please read "Risk Factors – Risk Factors Affecting Our Natural Gas Distribution, Competitive Natural Gas Sales and Services, Interstate Pipelines and Field Services Businesses," " Risk Factors Associated with Our Consolidated Financial Condition" and " Risks Common to Our Business and Other Risks" in Item 1A of Part I of our 2009 Form 10-K.

The following table provides summary data of our Field Services business segment for the three months ended March 31, 2009 and 2010 (in millions, except throughput data):

	Three Months Ended March 31,	
	2009	2010
Revenues	\$ 57	\$ 68
Expenses:		
Natural gas	7	16
Operation and maintenance	19	21

Edgar Filing: CENTERPOINT ENERGY INC - Form 10-Q

Depreciation and amortization	4	6
Taxes other than income taxes	1	2
Total expenses	31	45
Operating Income	\$ 26	\$ 23
Gathering throughput (in Bcf)	104	128

31

Table of Contents

Three months ended March 31, 2010 compared to three months ended March 31, 2009

Our Field Services business segment reported operating income of \$23 million for the three months ended March 31, 2010 compared to \$26 million for the three months ended March 31, 2009. Increased margin from new projects (\$4 million) and increased natural gas liquids prices (\$2 million) were more than offset by the effects of lower natural gas prices for retained volumes on the system (\$3 million) and increased operating expenses (\$5 million) associated with new projects.

Equity Earnings. In addition, this business segment recorded equity income of \$2 million in both the three months ended March 31, 2009 and 2010 from its 50% interest in a jointly-owned gas processing plant. These amounts are included in Equity in Earnings of Unconsolidated Affiliates under the Other Income (Expense) caption.

Other Operations

The following table shows the operating income of our Other Operations business segment for the three months ended March 31, 2009 and 2010 (in millions):

	Three Months Ended March 31,	
	2009	2010
Revenues	\$ 3	\$ 3
Expenses	3	2
Operating Income	\$ —	\$ 1

CERTAIN FACTORS AFFECTING FUTURE EARNINGS

For information on other developments, factors and trends that may have an impact on our future earnings, please read "Management's Discussion and Analysis of Financial Condition and Results of Operations - Certain Factors Affecting Future Earnings" in Item 7 of Part II, "Risk Factors" in Item 1A of Part I of our 2009 Form 10-K and "Cautionary Statement Regarding Forward-Looking Information."

LIQUIDITY AND CAPITAL RESOURCES

Historical Cash Flows

The following table summarizes the net cash provided by (used in) operating, investing and financing activities for the three months ended March 31, 2009 and 2010:

	Three Months Ended March 31,	
	2009	2010
	(in millions)	
Cash provided by (used in):		
Operating activities	\$ 433	\$ 435
Investing activities	(261)	(303)
Financing activities	(274)	(543)

Cash Provided by Operating Activities

Net cash provided by operating activities in the first three months of 2010 increased \$2 million compared to the same period in 2009 primarily due to increased cash provided by fuel cost recovery (\$156 million), increased net income (\$47 million) and decreased tax payments (\$34 million), which were partially offset by decreased cash related to gas storage inventory (\$266 million).

Cash Used in Investing Activities

Net cash used in investing activities in the first three months of 2010 increased \$42 million compared to the same period in 2009 due primarily to a DOE grant receivable of \$27 million and increased investment in unconsolidated affiliates of \$22 million, which were partially offset by insurance proceeds of \$7 million.

Table of Contents

Cash Used in Financing Activities

Net cash used in financing activities in the first three months of 2010 increased \$269 million compared to the same period in 2009 primarily due to decreased proceeds from the issuance of long-term debt (\$500 million), increased repayments of long-term debt (\$331 million), decreased short-term borrowings (\$115 million) and decreased proceeds from commercial paper (\$19 million), which were partially offset by decreased repayments of borrowings under revolving credit facilities (\$706 million).

Future Sources and Uses of Cash

Our liquidity and capital requirements are affected primarily by our results of operations, capital expenditures, debt service requirements, tax payments, working capital needs, various regulatory actions and appeals relating to such regulatory actions. Our principal cash requirements for the remaining nine months of 2010 include the following:

- capital expenditures of approximately \$1.2 billion;
- maturing long-term debt aggregating approximately \$206 million;
- scheduled principal payments on transition and system restoration bonds of \$134 million; and
- dividend payments on CenterPoint Energy common stock and interest payments on debt.

We expect that borrowings under our credit facilities and anticipated cash flows from operations will be sufficient to meet our anticipated cash needs for the remaining nine months of 2010. Cash needs or discretionary financing or refinancing may result in the issuance of equity or debt securities in the capital markets or the arrangement of additional credit facilities. Issuances of equity or debt in the capital markets and additional credit facilities may not, however, be available to us on acceptable terms.

Off-Balance Sheet Arrangements. Other than operating leases and the guaranties described below, we have no off-balance sheet arrangements.

Prior to the distribution of our ownership in RRI Energy, Inc. (RRI) (formerly known as Reliant Energy, Inc. and Reliant Resources, Inc.) to our shareholders, CERC had guaranteed certain contractual obligations of what became RRI's trading subsidiary. When the companies separated, RRI agreed to secure CERC against obligations under the guaranties RRI had been unable to extinguish by the time of separation. Pursuant to such agreement, as amended in December 2007, RRI has agreed to provide to CERC cash or letters of credit as security against CERC's obligations under its remaining guaranties for demand charges under certain gas purchase and transportation agreements if and to the extent changes in market conditions expose CERC to a risk of loss on those guaranties. As of March 31, 2010, RRI was not required to provide security to CERC. If RRI should fail to perform the contractual obligations, CERC could have to honor its guarantee and, in such event, collateral provided as security may be insufficient to satisfy CERC's obligations.

In May 2009, RRI sold its Texas retail business to NRG Retail LLC, a subsidiary of NRG Energy, Inc. In connection with the sale, RRI changed its name to RRI Energy, Inc. and no longer provides service as a REP in CenterPoint Houston's service territory. In April 2010, RRI announced its plan to merge with Mirant Corporation in an all-stock transaction. Neither the sale of the retail business nor the merger with Mirant Corporation, if ultimately finalized, alters RRI's contractual obligations to indemnify CenterPoint Energy and its subsidiaries, including CenterPoint Houston, for certain liabilities, including their indemnification regarding certain litigation, nor does it affect the terms of existing guaranty arrangements for certain RRI gas transportation contracts.

Equity Financing Transactions. During the three months ended March 31, 2010, we received proceeds of approximately \$21 million from the sale of approximately 1.5 million shares of common stock to our defined contribution plan and proceeds of approximately \$3 million from the sale of approximately 0.3 million shares of common stock to participants in our enhanced dividend reinvestment plan.

Table of Contents

Debt Financing Transactions. In January 2010, we purchased \$290 million principal amount of pollution control bonds issued on our behalf at 101% of their principal amount plus accrued interest pursuant to the mandatory tender provisions of the bonds. Prior to the purchase, the pollution control bonds had a fixed rate of interest of 5.125%. The purchase reduces temporary investments and leverage while providing us with the flexibility to finance future capital needs in the tax-exempt market through a remarketing of these bonds.

In January 2010, CERC Corp. redeemed \$45 million of its outstanding 6% convertible subordinated debentures due 2012 at 100% of the principal amount plus accrued and unpaid interest to the redemption date.

Credit and Receivables Facilities. As of April 27, 2010, we had the following facilities (in millions):

Date Executed	Company	Type of Facility	Size of Facility	Amount Utilized at April 27, 2010 (1)	Termination Date
June 29, 2007	CenterPoint Energy	Revolver	\$ 1,156	\$ 20 (2)	June 29, 2012
June 29, 2007	CenterPoint Houston	Revolver	289	4 (2)	June 29, 2012
June 29, 2007	CERC Corp.	Revolver	915	—	June 29, 2012
October 9, 2009	CERC	Receivables	375	—	October 8, 2010

(1)Based on the debt (excluding transition and system restoration bonds) to earnings before interest, taxes, depreciation and amortization (EBITDA) covenant contained in our \$1.2 billion credit facility, we would have been permitted to incur incremental borrowings on a consolidated basis at March 31, 2010 of approximately \$2.0 billion. The EBITDA covenant would have permitted us to utilize the full capacity of our credit facilities of \$2.4 billion at March 31, 2010 if a qualifying natural disaster had occurred during the previous twelve months and securitization financing permitted under Texas law to recover restoration costs had not yet occurred. Amounts advanced under CERC Corp.'s receivables facility are not treated as outstanding indebtedness in the debt to EBITDA covenant calculation.

(2)Represents outstanding letters of credit.

Our \$1.2 billion credit facility has a first drawn cost of London Interbank Offered Rate (LIBOR) plus 55 basis points based on our current credit ratings. The facility contains a debt (excluding transition and system restoration bonds) to EBITDA covenant (as those terms are defined in the facility). In February 2010, we amended our credit facility to modify the covenant to allow for a temporary increase of the permitted ratio from 5 times to 5.5 times if CenterPoint Houston experiences damage from a natural disaster in its service territory and we certify to the administrative agent that CenterPoint Houston has incurred system restoration costs reasonably likely to exceed \$100 million in a calendar year, all or part of which CenterPoint Houston intends to seek to recover through securitization financing. Such temporary increase in the financial ratio covenant would be in effect from the date we deliver our certification until the earliest to occur of (i) the completion of the securitization financing, (ii) the first anniversary of our certification or (iii) the revocation of such certification.

CenterPoint Houston's \$289 million credit facility contains a debt (excluding transition and system restoration bonds) to total capitalization covenant. The facility's first drawn cost is LIBOR plus 45 basis points based on CenterPoint Houston's current credit ratings.

CERC Corp.'s \$915 million credit facility's first drawn cost is LIBOR plus 45 basis points based on CERC Corp.'s current credit ratings. The facility contains a debt to total capitalization covenant.

Under our \$1.2 billion credit facility, CenterPoint Houston's \$289 million credit facility and CERC Corp's \$915 million credit facility, an additional utilization fee of 5 basis points applies to borrowings any time more than 50% of the facility is utilized. The spread to LIBOR and the utilization fee fluctuate based on the borrower's credit rating.

Borrowings under each of the facilities are subject to customary terms and conditions. However, there is no requirement that we, CenterPoint Houston or CERC Corp. make representations prior to borrowings as to the absence of material adverse changes or litigation that could be expected to have a material adverse effect. Borrowings under each of the credit facilities are subject to acceleration upon the occurrence of events of default that we, CenterPoint Houston or CERC Corp. consider customary.

Table of Contents

We, CenterPoint Houston and CERC Corp. are currently in compliance with the various business and financial covenants contained in the respective credit facilities as disclosed above.

Our \$1.2 billion credit facility backstops a \$1.0 billion CenterPoint Energy commercial paper program under which we began issuing commercial paper in June 2005. The \$915 million CERC Corp. credit facility backstops a \$915 million commercial paper program under which CERC Corp. began issuing commercial paper in February 2008. The CenterPoint Energy commercial paper is rated "Not Prime" by Moody's Investors Service, Inc. (Moody's), "A-2" by Standard & Poor's Rating Services (S&P), a division of The McGraw-Hill Companies, and "F3" by Fitch, Inc. (Fitch). The CERC Corp. commercial paper is rated "P-3" by Moody's, "A-2" by S&P, and "F2" by Fitch. As a result of the credit ratings on the two commercial paper programs, we do not expect to be able to rely on the sale of commercial paper to fund all of our short-term borrowing requirements. We cannot assure you that these ratings, or the credit ratings set forth below in "Impact on Liquidity of a Downgrade in Credit Ratings," will remain in effect for any given period of time or that one or more of these ratings will not be lowered or withdrawn entirely by a rating agency. We note that these credit ratings are not recommendations to buy, sell or hold our securities and may be revised or withdrawn at any time by the rating agency. Each rating should be evaluated independently of any other rating. Any future reduction or withdrawal of one or more of our credit ratings could have a material adverse impact on our ability to obtain short- and long-term financing, the cost of such financings and the execution of our commercial strategies.

Securities Registered with the SEC. In October 2008, CenterPoint Energy and CenterPoint Houston jointly registered indeterminate principal amounts of CenterPoint Houston's general mortgage bonds and CenterPoint Energy's senior debt securities and junior subordinated debt securities and an indeterminate number of CenterPoint Energy's shares of common stock, shares of preferred stock, as well as stock purchase contracts and equity units. In addition, CERC Corp. has a shelf registration statement covering \$500 million principal amount of senior debt securities.

Temporary Investments. As of April 27, 2010, CenterPoint Houston had external temporary investments of \$332 million, which excludes funds held in trust for the payment of debt service on transition and system restoration bonds.

Money Pool. We have a money pool through which the holding company and participating subsidiaries can borrow or invest on a short-term basis. Funding needs are aggregated and external borrowing or investing is based on the net cash position. The net funding requirements of the money pool are expected to be met with borrowings under our revolving credit facility or the sale of our commercial paper.

Impact on Liquidity of a Downgrade in Credit Ratings. As of May 3, 2010, Moody's, S&P, and Fitch had assigned the following credit ratings to senior debt of CenterPoint Energy and certain subsidiaries:

Company/Instrument	Rating	Moody's	S&P		Fitch	
		Outlook/Review (1)	Rating	Outlook(2)	Rating	Outlook(3)
CenterPoint Energy		Positive				
Senior Unsecured Debt	Ba1	Outlook	BBB-	Stable	BBB-	Stable
CenterPoint Houston		Upgrade				
Senior Secured Debt	Baa1	Review	BBB+	Stable	A-	Stable
CERC Corp. Senior		Positive				
Unsecured Debt	Baa3	Outlook	BBB	Stable	BBB	Stable

(1) A Moody's rating outlook is an opinion regarding the likely direction of a rating over the medium term. Moody's review for possible upgrade indicates the rating is under review for possible change in the short-term, usually

within 90 days.

(2) An S&P rating outlook assesses the potential direction of a long-term credit rating over the intermediate to longer term.

(3) A "stable" outlook from Fitch encompasses a one- to two-year horizon as to the likely ratings direction.

A decline in credit ratings could increase borrowing costs under our \$1.2 billion credit facility, CenterPoint Houston's \$289 million credit facility and CERC Corp.'s \$915 million credit facility. If our credit ratings or those of

Table of Contents

CenterPoint Houston or CERC had been downgraded one notch by each of the three principal credit rating agencies from the ratings that existed at March 31, 2010, the impact on the borrowing costs under our bank credit facilities would have been immaterial. A decline in credit ratings would also increase the interest rate on long-term debt to be issued in the capital markets and could negatively impact our ability to complete capital market transactions.

CERC Corp. and its subsidiaries purchase natural gas from their largest supplier under supply agreements that contain an aggregate credit threshold of \$120 million based on CERC Corp.'s S&P senior unsecured long-term debt rating of BBB. Under these agreements, CERC may need to provide collateral if the aggregate threshold is exceeded. Upgrades and downgrades from this BBB rating will increase and decrease the aggregate credit threshold accordingly.

CenterPoint Energy Services, Inc. (CES), a wholly owned subsidiary of CERC Corp. operating in our Competitive Natural Gas Sales and Services business segment, provides comprehensive natural gas sales and services primarily to commercial and industrial customers and electric and gas utilities throughout the central and eastern United States. In order to economically hedge its exposure to natural gas prices, CES uses derivatives with provisions standard for the industry, including those pertaining to credit thresholds. Typically, the credit threshold negotiated with each counterparty defines the amount of unsecured credit that such counterparty will extend to CES. To the extent that the credit exposure that a counterparty has to CES at a particular time does not exceed that credit threshold, CES is not obligated to provide collateral. Mark-to-market exposure in excess of the credit threshold is routinely collateralized by CES. As of March 31, 2010, the amount posted as collateral aggregated approximately \$179 million (\$119 million of which is associated with price stabilization activities of our Natural Gas Distribution business segment). Should the credit ratings of CERC Corp. (as the credit support provider for CES) fall below certain levels, CES would be required to provide additional collateral up to the amount of its previously unsecured credit limit. We estimate that as of March 31, 2010, unsecured credit limits extended to CES by counterparties aggregate \$243 million; however, utilized credit capacity was \$81 million.

Pipeline tariffs and contracts typically provide that if the credit ratings of a shipper or the shipper's guarantor drop below a threshold level, which is generally investment grade ratings from both Moody's and S&P, cash or other collateral may be demanded from the shipper in an amount equal to the sum of three months' charges for pipeline services plus the unrecovered cost of any lateral built for such shipper. If the credit ratings of CERC Corp. decline below the applicable threshold levels, CERC Corp. might need to provide cash or other collateral of as much as \$184 million as of March 31, 2010. The amount of collateral will depend on seasonal variations in transportation levels.

In September 1999, we issued 2.0% Zero-Premium Exchangeable Subordinated Notes due 2029 (ZENS) having an original principal amount of \$1.0 billion of which \$840 million remain outstanding at March 31, 2010. Each ZENS note was originally exchangeable at the holder's option at any time for an amount of cash equal to 95% of the market value of the reference shares of Time Warner Inc. common stock (TW Common) attributable to such note. The number and identity of the reference shares attributable to each ZENS note are adjusted for certain corporate events. As of March 31, 2010, the reference shares for each ZENS note consisted of 0.5 share of TW Common, 0.125505 share of Time Warner Cable Inc. common stock (TWC Common) and 0.045455 share of AOL Inc. common stock (AOL Common). If our creditworthiness were to drop such that ZENS note holders thought our liquidity was adversely affected or the market for the ZENS notes were to become illiquid, some ZENS note holders might decide to exchange their ZENS notes for cash. Funds for the payment of cash upon exchange could be obtained from the sale of the shares of TW Common, TWC Common and AOL Common that we own or from other sources. We own shares of TW Common, TWC Common and AOL Common equal to approximately 100% of the reference shares used to calculate our obligation to the holders of the ZENS notes. ZENS note exchanges result in a cash outflow because tax deferrals related to the ZENS notes and TW Common, TWC Common and AOL Common shares would typically cease when ZENS notes are exchanged or otherwise retired and TW Common, TWC Common and AOL Common shares are sold. The ultimate tax liability related to the ZENS notes continues to increase by the amount of the tax

benefit realized each year, and there could be a significant cash outflow when the taxes are paid as a result of the retirement of the ZENS notes. The American Recovery and Reinvestment Act of 2009 allows us to defer until 2014 taxes due as a result of the retirement of ZENS notes that would have otherwise been payable in 2009 or 2010 and pay such taxes over the period from 2014 through 2018. Accordingly, if on March 31, 2010, all ZENS notes had been exchanged for cash, we could have deferred taxes of approximately \$374 million that would have otherwise been payable in 2010.

Table of Contents

Cross Defaults. Under our revolving credit facility, a payment default on, or a non-payment default that permits acceleration of, any indebtedness exceeding \$50 million by us or any of our significant subsidiaries will cause a default. In addition, four outstanding series of our senior notes, aggregating \$950 million in principal amount as of March 31, 2010, provide that a payment default by us, CERC Corp. or CenterPoint Houston in respect of, or an acceleration of, borrowed money and certain other specified types of obligations, in the aggregate principal amount of \$50 million, will cause a default. A default by CenterPoint Energy would not trigger a default under our subsidiaries' debt instruments or bank credit facilities.

Possible Acquisitions, Divestitures and Joint Ventures. From time to time, we consider the acquisition or the disposition of assets or businesses or possible joint ventures or other joint ownership arrangements with respect to assets or businesses. Any determination to take any action in this regard will be based on market conditions and opportunities existing at the time, and accordingly, the timing, size or success of any efforts and the associated potential capital commitments are unpredictable. We may seek to fund all or part of any such efforts with proceeds from debt and/or equity issuances. Debt or equity financing may not, however, be available to us at that time due to a variety of events, including, among others, maintenance of our credit ratings, industry conditions, general economic conditions, market conditions and market perceptions.

Other Factors that Could Affect Cash Requirements. In addition to the above factors, our liquidity and capital resources could be affected by:

- cash collateral requirements that could exist in connection with certain contracts, including gas purchases, gas price and weather hedging and gas storage activities of our Natural Gas Distribution and Competitive Natural Gas Sales and Services business segments;

- acceleration of payment dates on certain gas supply contracts under certain circumstances, as a result of increased gas prices and concentration of natural gas suppliers;

- increased costs related to the acquisition of natural gas;

- increases in interest expense in connection with debt refinancings and borrowings under credit facilities;

- various legislative or regulatory actions;

- the ability of RRI and its subsidiaries to satisfy their obligations in respect of RRI's indemnity obligations to us and our subsidiaries or in connection with the contractual obligations to a third party pursuant to which CERC is a guarantor;

- the ability of REPs that are subsidiaries of NRG Retail LLC and TXU Energy Retail Company LLC, which are CenterPoint Houston's two largest customers, to satisfy their obligations to us and our subsidiaries;

- slower customer payments and increased write-offs of receivables due to higher gas prices or changing economic conditions;

- the outcome of litigation brought by and against us;

- contributions to pension and postretirement benefit plans;

- restoration costs and revenue losses resulting from natural disasters such as hurricanes and the timing of recovery of such restoration costs; and

- various other risks identified in “Risk Factors” in Item 1A of our 2009 Form 10-K.

Certain Contractual Limits on Our Ability to Issue Securities and Borrow Money. CenterPoint Houston’s credit facilities limit CenterPoint Houston’s debt (excluding transition and system restoration bonds) as a percentage of its total capitalization to 65%. CERC Corp.’s bank facility and its receivables facility limit CERC’s debt as a percentage of its total capitalization to 65%. Our \$1.2 billion credit facility contains a debt, excluding transition and system restoration bonds, to EBITDA covenant. In February 2010, we amended our \$1.2 billion credit facility to

Table of Contents

modify this covenant to allow for a temporary increase in debt capacity if CenterPoint Houston experiences damage from a natural disaster in its service territory that meets certain criteria. Additionally, CenterPoint Houston has contractually agreed that it will not issue additional first mortgage bonds, subject to certain exceptions.

NEW ACCOUNTING PRONOUNCEMENTS

See Note 2 to our Interim Condensed Consolidated Financial Statements for a discussion of new accounting pronouncements that affect us.

Item 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Commodity Price Risk From Non-Trading Activities

We use derivative instruments as economic hedges to offset the commodity price exposure inherent in our businesses. The stand-alone commodity risk created by these instruments, without regard to the offsetting effect of the underlying exposure these instruments are intended to hedge, is described below. We measure the commodity risk of our non-trading energy derivatives using a sensitivity analysis. The sensitivity analysis performed on our non-trading energy derivatives measures the potential loss in fair value based on a hypothetical 10% movement in energy prices. At March 31, 2010, the recorded fair value of our non-trading energy derivatives was a net liability of \$161 million (before collateral). The net liability consisted of a net liability of \$184 million associated with price stabilization activities of our Natural Gas Distribution business segment and a net asset of \$23 million related to our Competitive Natural Gas Sales and Services business segment. Net assets or liabilities related to the price stabilization activities correspond directly with net over/under recovered gas cost liabilities or assets on the balance sheet. A decrease of 10% in the market prices of energy commodities from their March 31, 2010 levels would have increased the fair value of our non-trading energy derivatives net liability by \$24 million. However, the consolidated income statement impact of this same 10% decrease in market prices would be an increase in income of \$1 million.

The above analysis of the non-trading energy derivatives utilized for commodity price risk management purposes does not include the favorable impact that the same hypothetical price movement would have on our physical purchases and sales of natural gas to which the hedges relate. Furthermore, the non-trading energy derivative portfolio is managed to complement the physical transaction portfolio, reducing overall risks within limits. Therefore, the adverse impact to the fair value of the portfolio of non-trading energy derivatives held for hedging purposes associated with the hypothetical changes in commodity prices referenced above is expected to be substantially offset by a favorable impact on the underlying hedged physical transactions.

Interest Rate Risk

As of March 31, 2010, we had outstanding long-term debt, bank loans, lease obligations and obligations under our ZENS that subject us to the risk of loss associated with movements in market interest rates.

We had no floating-rate obligations at December 31, 2009 and March 31, 2010.

At December 31, 2009 and March 31, 2010, we had outstanding fixed-rate debt (excluding indexed debt securities) aggregating \$9.9 billion and \$9.5 billion, respectively, in principal amount and having a fair value of \$10.4 billion and \$10.1 billion, respectively. Because these instruments are fixed-rate, they do not expose us to the risk of loss in earnings due to changes in market interest rates (please read Note 13 to our consolidated financial statements). However, the fair value of these instruments would increase by approximately \$244 million if interest rates were to decline by 10% from their levels at March 31, 2010. In general, such an increase in fair value would impact earnings and cash flows only if we were to reacquire all or a portion of these instruments in the open market prior to their

maturity.

The ZENS obligation was bifurcated into a debt component and a derivative component. The debt component of \$122 million at March 31, 2010 was a fixed-rate obligation and, therefore, did not expose us to the risk of loss in earnings due to changes in market interest rates. However, the fair value of the debt component would increase by approximately \$20 million if interest rates were to decline by 10% from levels at March 31, 2010. Changes in the fair value of the derivative component, a \$228 million recorded liability at March 31, 2010, are recorded in our

38

Table of Contents

Condensed Statements of Consolidated Income and, therefore, we are exposed to changes in the fair value of the derivative component as a result of changes in the underlying risk-free interest rate. If the risk-free interest rate were to increase by 10% from March 31, 2010 levels, the fair value of the derivative component liability would increase by approximately \$5 million, which would be recorded as an unrealized loss in our Condensed Statements of Consolidated Income.

Equity Market Value Risk

We are exposed to equity market value risk through our ownership of 7.2 million shares of TW Common, 1.8 million shares of TWC Common and 0.7 million shares of AOL Common, which we hold to facilitate our ability to meet our obligations under the ZENS. A decrease of 10% from the March 31, 2010 aggregate market value of these shares would result in a net loss of approximately \$6 million, which would be recorded as an unrealized loss in our Statements of Consolidated Income.

Item 4. CONTROLS AND PROCEDURES

In accordance with Exchange Act Rules 13a-15 and 15d-15, we carried out an evaluation, under the supervision and with the participation of management, including our principal executive officer and principal financial officer, of the effectiveness of our disclosure controls and procedures as of the end of the period covered by this report. Based on that evaluation, our principal executive officer and principal financial officer concluded that our disclosure controls and procedures were effective as of March 31, 2010 to provide assurance that information required to be disclosed in our reports filed or submitted under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission's rules and forms and such information is accumulated and communicated to our management, including our principal executive officer and principal financial officer, as appropriate to allow timely decisions regarding disclosure.

There has been no change in our internal controls over financial reporting that occurred during the three months ended March 31, 2010 that has materially affected, or is reasonably likely to materially affect, our internal controls over financial reporting.

PART II. OTHER INFORMATION

Item 1. LEGAL PROCEEDINGS

For a description of certain legal and regulatory proceedings affecting CenterPoint Energy, please read Notes 4 and 11 to our Interim Condensed Financial Statements, each of which is incorporated herein by reference. See also "Business Regulation" and "Environmental Matters" in Item 1 and "Legal Proceedings" in Item 3 of our 2009 Form 10-K.

Item 1A. RISK FACTORS

There have been no material changes from the risk factors disclosed in our 2009 Form 10-K.

Item 5. OTHER INFORMATION

The ratio of earnings to fixed charges for the three months ended March 31, 2009 and 2010 was 1.68 and 2.33, respectively. We do not believe that the ratios for these three-month periods are necessarily indicative of the ratios for the twelve-month periods due to the seasonal nature of our business. The ratios were calculated pursuant to applicable rules of the Securities and Exchange Commission.
