Net interest income increased 1.5% during the quarter and 18.5% compared to 4Q10. Loan portfolio quality continues showing a good trend. Loan deterioration during 4Q11 was COP 89 billion, and past due loans as a percentage of total loans were 2.2%. Net provision charges for past due loans and foreclosed assets totaled COP 328 billion for the quarter.

The balance sheet remains strong. Loan loss reserves represented 4.6% of total loans and 210% of past due loans at the end of 4Q11. The capital adequacy ratio ended the quarter at 12.5% (Tier 1 of 9%).

4Q11

1. BALANCE SHEET

1.1. Assets

As of December 31, 2011, Bancolombia's assets totaled COP 85,463 billion, which represents an increase of 6% compared to 3Q11 and of 26% compared to 4Q10.

Prepaid expenses and deferred charges increased 146% in 4Q11 versus 4Q10. This increase is explained by the recording of deferred expenses for COP 469 billion in 1Q11, related to the wealth tax that Bancolombia and its subsidiaries will pay from 2011 to 2014. The value recorded in this line will be amortized during the next four years and will be shown mainly as a reduction in the reappraisal and others account, although a portion will be reflected on the administrative expenses and others account. As of December 2011, the prepaid expenses and deferred charges account had COP 343 billion related to this wealth tax.

The property, plant and equipment account increased 2% during 4Q11 and 38% with respect to 4Q10. These variations are mainly explained by the increase in the import of equipment for leasing operations, and also by investments and capitalized expenses related to technology.

1.2. Loan Portfolio

The most relevant aspects regarding the evolution of the loan portfolio during 4Q11 were:

- The dynamic growth of consumer loans in Colombia during 4Q11 and compared to 4Q10. Conversely, consumer loans in USD, which correspond to the operation in El Salvador, decreased 1% during 4Q11 and 0.5% during the past 12 months.
- Demand for loans denominated in USD by Colombian companies. The increase in international trade flows played an important role in the growth of loans denominated in USD as companies demanded credit to finance their exporting activities and the working capital needs associated with them. The Colombian government, in an effort to control external debt in dollars that could result in further appreciation of the COP, imposed a withholding tax on the interest paid by Colombian companies on loans granted to them by banks domiciled outside Colombia. This tax motivated companies with loans in USD granted by foreign banks to start taking loans in USD with domestic banks, which was one of the reasons for the growth in Bancolombia's USD denominated loan book.
- Net loans in USD correspond to loans originated in Colombia (USD 3,553 million, 42%), El Salvador (USD 2,358 million, 28%) and other countries (USD 2,621 million, 31%).
- The COP depreciated 1% against the USD during 4Q11.

4Q11

· Mortgage loans denominated in COP showed a positive performance. The increased dynamism of mortgage lending in Colombia is explained by optimism regarding the economy, lower long-term interest rates, as well as by the Colombian government's interest rate subsidy programs, which have produced higher credit demand in this segment. On the other hand, the outstanding mortgage balances denominated in USD from our operation in El Salvador remained stable in 4Q11, and decreased slightly in the past 12 months.

· Financial leases, 90% of which are denominated in COP, increased 6% during the quarter and 23% as compared to 4Q10. Operating leases, net of depreciation, increased 16% during the quarter and 37% during the year.

When analyzing the performance of the loan portfolio according to the categories established by Bancolombia to manage its commercial strategy, it becomes clear that retail and SME loans were key drivers of the growth of the total loan portfolio during the quarter as they increased 7% with respect to 3Q11. This increase is explained by higher demand for working capital and financing by SMEs, personal loans and car loans. On the other hand, corporate loans increased 7% in the same period due to higher demand for working capital and financing by corporations.

Reserves for loan losses increased 6% during 4Q11 and totaled COP 2,813 billion, or 4.6% of total loans at the end of the quarter. For further explanation regarding coverage of the loan portfolio and credit quality trends, please see Section 2.4. "Asset Quality, Provision Charges and Balance Sheet Strength" of this report.

Investment Portfolio

As of December 31, 2011, Bancolombia's net investment portfolio totaled COP 9,958 billion, decreasing 10% compared to 3Q11 and increasing 15% compared to 4Q10. The investment portfolio is mainly composed of debt investment securities, which represented 92% of Bancolombia's total investments and 11% of assets at the end of 4Q11. Investments denominated in USD totaled USD 1,027 million and represented 20% of the investment portfolio. Additionally, the Bank has COP 1,861 billion in mortgage backed securities, which represent 19% of the investment portfolio. The duration of the debt securities portfolio was 21 months with a yield to maturity of 4.39% at the end of 4Q11.

4Q11

1.4. Goodwill

As of 4Q11, Bancolombia's goodwill totaled COP 680 billion and decreased 5% compared to the amount reported in 3Q11. This variation is explained by the amortization of goodwill reported during the past year (under COL GAAP, goodwill is amortized within a period of 20 years). As of December 31, 2011, Bancolombia's goodwill included USD 342 million related mostly to the acquisition of Banagrícola in 2007.

1.5. Funding

As of December 31, 2011, Bancolombia's liabilities totaled COP 76.470 billion and increased 6% compared to 3Q11 and 27% compared to 4Q10. The ratio of net loans to deposits (including borrowings from domestic development banks) was 105% at the end of 4Q11, decreasing compared to the figure reported in 3Q11 (106%), and increasing compared to the figure for 4Q10 (100%). The growth of the loan portfolio and Bancolombia's ability to obtain funds through long-term bond issuances resulted in the higher ratio of net loans to deposits for the quarter.

Deposits totaled COP 52,434 billion (or 69% of liabilities) at the end of 4Q11 and increased 8% during the quarter and 20% over the last 12 months. CDs represented 35% of deposits in 4Q10, and 34% of deposits in 4Q11. This decrease is in line with the funding strategy executed by the Bank during the past year, which has consisted of taking advantage of the greater liquidity and low interest rates through increasing savings and checking accounts. As a result of this recomposition of the funding mix, demand deposits went from representing 65% of the Bank's total deposits in 4Q10, to representing 66% as of the end of 4Q11.

At the end of 4Q11, Bancolombia had outstanding bonds for USD 2,540 million in international markets and COP 5,375 billion in local markets. The maturities of these bonds range from 2 to 10 years.

1.6. Shareholders' Equity and Regulatory Capital

Shareholders' equity at the end of 4Q11 was COP 8,993 billion, increasing 13% or COP 1,046 billion with respect to the COP 7,947 billion reported at the end of 4Q10.

Bancolombia's capital adequacy ratio was 12.46%, 51 basis points below the 12.97% for 3Q11 and 221 bps below the 14.67% for 4Q10. The decrease in the capital adequacy ratio is explained by the dynamic growth of the Bank's loan portfolio and assets.

Bancolombia's capital adequacy ratio was 346 basis points above the minimum level required by Colombia's regulator, while the basic capital ratio (tier 1) was 8.98% and the tangible capital ratio, which is equal to shareholders' equity minus goodwill and intangible assets divided by tangible assets, was 8.96% at the end of 4Q11.

2. INCOME STATEMENT

Net income totaled COP 504 billion in 4Q11, or COP 640 per share – USD 1.32 per ADR, which represents an increase of 19% compared to 3Q11 and of 17% compared to 4Q10. Bancolombia's ROE was 23.1% for 4Q11, higher than the annualized ROE of 20.6% for 3Q11 and the 22% of 4Q10.

2.1. Net Interest Income

Net interest income totaled COP 1,020 billion in 4Q11, 1% higher than that reported in 3Q11, and 19% higher than the figure for 4Q10. Interest income increased 6% during the quarter, and interest expense increased 11%. The increase of interest paid on liabilities was lead by the interest on bonds outstanding, which increased 17% in 4Q11 due to growth in the amount of bonds outstanding resulting from the issuance that took place in November 2011, and the payment of coupons in dollars at a higher exchange rate.

During 4Q11, income generated by the investment portfolio totaled COP 120 billion, a figure 33% lower than the COP 181 billion for 3Q11 and 11% higher than the COP 109 billion for 4Q10. The decrease in income from investments during the quarter is explained by the lower value of Colombian government securities, associated presumably to the lower appetite of investors for these titles due to the uncertainty that the European crisis generated in the markets.

Net Interest Margin

Annualized net interest margin ended 4Q11 at 5.6%. Annualized net interest margin for investments was 1.4%, while the annualized net interest margin for loans, financial leases and overnight funds was 6.3%.

Annualized Interest Margin	1Q10	2Q10	3Q10	4Q10	1Q11	2Q11	3Q11	4Q11

Net interest margin	6.2 %	6.4 %	6.2 %	6.0 %	5.9 %	6.2 %	6.0 %	5.6 %

The funding cost increased during 4Q11 as deposits continued to reflect the increase in interest rates by the Colombian Central Bank. The annualized weighted average cost of deposits reached 2.8% in 4Q11, higher than the 2.7% for 3Q11 and the 2.4% for 4Q10.

In particular, fees from credit and debit cards increased 12% with respect to 3Q11, and 21% with respect to 4Q10, and fees from banking services increased 5% with respect to 3Q11 and 20% with respect to 4Q10. Fees from brokerage services increased 197% in 4Q11 and 190% compared to 4Q10 due to the income generated from the distribution of the different equity issuances that took place in Colombia during the quarter.

Other Operating Income

Total other operating income was COP 342 billion in 4Q11, 192% higher than in 3Q11, and 113% higher than in 4Q10. Income from foreign exchange gains and derivatives denominated in foreign currencies increased 35% in the quarter due to the depreciation of the COP against the USD.

Notably, revenues aggregated in the communication, postage, rent and others totaled COP 66 billion in 4Q11, 17% higher as compared to 3Q11 and 37% higher as compared to 4Q10. This line includes commercial discounts and operating leases payments, which have grown as the value of assets rented under operating leasing contract has increased. Finally, a gain of COP 138 billion was recorded for the sale of AFP Crecer in El Salvador.

2.4.

Asset Quality, Provision Charges and Balance Sheet Strength

The deterioration of the loan portfolio (new past due loans before charge-offs) was COP 89 billion in 4Q11. The new vintages of loans have a low deterioration and contribute to the improvement of the loan portfolio quality.

Past due loans (those overdue more than 30 days) totaled COP 1,341 billion at the end of 4Q11, which represents 2.2% of total gross loans. The PDL ratio decreased from 2.5% in 3Q11 and 2.9% at the end of 4Q10. Loan charge-offs totaled COP 188 billion in 4Q11.

Provision charges (net of recoveries) totaled COP 328 billion in 4Q11. The greater provision charges in 4Q11 are explained by countercyclical provisions associated to the new loans originated in 2011, and to the change in the parameters used in the models required by the Superintendency of Finance for calculating expected loss. The change in these parameters resulted in additional provisions of COP 25 billion in 4Q11.

4Q11

Bancolombia maintains a strong balance sheet in terms of loan loss reserves. Allowances for loan losses totaled COP 2,812 billion, or 4.6% of total loans at the end of 4Q11, remaining stable with respect to the 4.6% presented at the end of 3Q11, and decreasing with respect to the 5.2% at the end of 4Q10. Additionally, coverage, measured by the ratio of allowances for loans losses (principal) to PDLs (overdue 30 days), was 210% at the end of 4Q11. Likewise, coverage measured by the ratio of allowances for loans losses to loans classified as C, D and E, was 120% at the end of 4Q11.

For all other loans and financial leasing operations of any type, interest is no longer accumulated after they are more than 30 days past due.

(2) Under Colombian Bank regulations, a loan is past due when it is at least 31 days past the actual due date.
