Form 10-Q

November 04, 2014

UNITED STATES

SECURITIES AND EXCHANGE COMMISSION

Washington, D. C. 20549

FORM 10-Q

QUARTERLY Report Pursuant to Section 13 or 15 (d) of the Securities Exchange Act of 1934

For the quarterly period ended September 30, 2014

Commission File Number I-4383

ESPEY MFG. & ELECTRONICS CORP.

(Exact name of registrant as specified in its charter)

NEW YORK **14-1387171**

(State of incorporation) (I.R.S. Employer's Identification No.)

233 Ballston Avenue, Saratoga Springs, New York 12866

(Address of principal executive offices)

518-245-4400

Edgar Filing: ESPEY MFG & ELECTRONICS CORP - Form 10-Q

(Registrant's telephone number, including area code)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15 (d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days.

☒ Yes ☐ No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§ 232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files).

☒ Yes ☐ No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company:

☐ Large accelerated filer ☐ Non-accelerated filer
☐ Accelerated file ☒ Smaller reporting company

Indicate by check mark whether the registrant is a shell company.

☐ Yes ☒ No

At November 3, 2014, there were 2,359,001 shares outstanding of the registrant's Common stock, \$.33-1/3 par value.

ESPEY MFG. & ELECTRONICS CORP.

Notes to Financial Statements (Unaudited)

Note 1. Basis of Presentation

In the opinion of management the accompanying unaudited financial statements contain all adjustments (consisting of only normal recurring adjustments) necessary for a fair presentation of the results for such periods. The results for any interim period are not necessarily indicative of the results to be expected for the full fiscal year. Certain information and footnote disclosures normally included in financial statements prepared in accordance with United States generally accepted accounting principles have been condensed or omitted. The preparation of these financial statements requires us to make estimates and judgments that affect the reported amounts of assets, liabilities, revenues and expenses, and related disclosure of assets and liabilities. On an ongoing basis, we evaluate our estimates and judgments, including those related to revenue recognition, inventories, income taxes, and stock-based compensation. Management bases its estimates on historical experience and on various other factors that are believed to be reasonable under the circumstances, the results of which form the basis for making judgments about the carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates under different assumptions or conditions. These financial statements should be read in conjunction with the Company's most recent audited financial statements included in its report on Form 10-K for the year ended June 30, 2014. Certain reclassifications may have been made to the prior year financial statements to conform to the current year presentation.

Note 2. Net Income per Share

Basic net income per share excludes dilution and is computed by dividing net income available to common stockholders by the weighted average number of common shares outstanding for the period. Diluted net income per share reflects the potential dilution that could occur if securities or other contracts to issue common stock were exercised or converted into common stock or resulted in the issuance of common stock that then shared in the income of the Company. As unearned ESOP shares are released or committed-to-be-released the shares become outstanding for earnings-per-share computations.

Note 3. Stock Based Compensation

The Company follows ASC 718 in establishing standards for the accounting for transactions in which an entity exchanges its equity instruments for goods or services, as well as transactions in which an entity incurs liabilities in exchange for goods or services that are based on the fair value of the entity's equity instruments or that may be settled by the issuance of those equity instruments. ASC 718 requires that the cost resulting from all share-based payment transactions be recognized in the financial statements based on the fair value of the share-based payment. ASC 718 establishes fair value as the measurement objective in accounting for share-based payment transactions with employees, except for equity instruments held by employee share ownership plans.

Total stock-based compensation expense recognized in the statements of comprehensive income for the three-month periods ended September 30, 2014 and 2013 were \$13,029 and \$26,765, respectively, before income taxes. The related total deferred tax benefits were approximately \$1,371 and \$3,005 for the same periods. ASC 718 requires the tax benefits resulting from tax deductions in excess of the compensation cost recognized for those options to be classified and reported as both an operating cash outflow and a financing cash inflow.

As of September 30, 2014, there was approximately \$47,771 of unrecognized compensation cost related to stock option awards that is expected to be recognized as expense over the next year. The total deferred tax benefit related to these awards is approximately \$5,024.

The Company has one employee stock option plan under which options may be granted, the 2007 Stock Option and Restricted Stock Plan (the "2007 Plan"). The Board of Directors may grant options to acquire shares of common stock to employees of the Company at the fair market value of the common stock on the date of grant. Generally, options granted have a two-year vesting period based on two years of continuous service and have a ten-year contractual life. Option grants provide for accelerated vesting if there is a change in control. Shares issued upon the exercise of options are from those held in Treasury. The 2007 Plan was approved by the Company's shareholders at the Company's Annual Meeting on November 30, 2007 and supersedes the Company's 2000 Stock Option Plan (the "2000 Plan"). Options covering 400,000 shares are authorized for issuance under the 2007 Plan, of which 190,100 have been granted and 124,575 are outstanding as of September 30, 2014. While no further grants of options may be made under the 2000 Plan, as of September 30, 2014, 27,330 options remain outstanding, vested and exercisable from the 2000 Plan.

ASC 718 requires the use of a valuation model to calculate the fair value of stock-based awards. The Company has elected to use the Black-Scholes option valuation model, which incorporates various assumptions including those for volatility, expected life and interest rates.

Index

There were no options awarded for the three months ended September 30, 2014. The table below outlines the weighted average assumptions that the Company used to calculate the fair value of the option award for the three months ended September 30, 2013.

	2013
Dividend yield	3.67%
Expected stock price volatility	25.31%
Risk-free interest rate	1.23%
Expected option life (in years)	3.8 yrs
Weighted average fair value per share of options granted during the period	\$3.777

The Company pays dividends quarterly and has paid a special cash dividend of \$1.00 per share in each of fiscal years 2014 and 2013. Our Board of Directors assesses the Company's dividend policy periodically. There is no assurance that the Board of Directors will either maintain the amount of the regular cash dividend or declare a special dividend during the fiscal year ending June 30, 2015 or any future years. Expected stock price volatility is based on the historical volatility of the Company's stock. The risk-free interest rate is based on the implied yield available on U.S. Treasury issues with an equivalent term approximating the expected life of the options. The expected option life (in years) represents the estimated period of time until exercise and is based on actual historical experience.

The following table summarizes stock option activity during the three months ended September 30, 2014:

	Employee Stock Options Plan			
	Number of Shares Subject To Options	Weighted Average Exercise Price	Weighted Average Remaining Contractual Term	Weighted Average Aggregate Intrinsic Value
Balance at July 1, 2014	161,555	\$ 22.43	6.02	—
Granted	—	—	—	—
Exercised	(800)	\$ 11.25	—	—
Forfeited or expired	(8,850)	\$ 25.16	—	—
Outstanding at September 30, 2014	151,905	\$ 22.33	5.71	\$114,437
Vested or expected to vest at September 30, 2014	148,806	\$ 22.22	5.64	\$114,437
Exercisable at September 30, 2014	126,030	\$ 21.32	5.05	\$114,437

The aggregate intrinsic value in the table above represents the total pretax intrinsic value (the difference between the closing sale price of the Company's common stock as reported on the NYSE MKT on September 30, 2014 and the exercise price, multiplied by the number of in-the-money options) that would have been received by the option holders if all option holders had exercised their options on September 30, 2014. This amount changes based on the fair market value of the Company's common stock. The total intrinsic values of the options exercised during the three months ended September 30, 2014 and 2013 were \$10,249 and \$41,250, respectively.

The following table summarizes changes in non-vested stock options during the three months ended September 30, 2014:

Weighted Number of Shares Subject to Option	Average Grant Date Fair Value (per Option)
---	--

Edgar Filing: ESPEY MFG & ELECTRONICS CORP - Form 10-Q

Non-vested at July 1, 2014	25,975	\$ 3.777
Granted	—	—
Vested	—	—
Forfeited or expired	(100)	\$ 3.777
Non-vested at September 30, 2014	25,875	\$ 3.777

Index

Note 4. Commitments and Contingencies

The Company at certain times enters into standby letters of credit agreements with financial institutions primarily relating to the guarantee of future performance on certain contracts. Contingent liabilities on outstanding standby letters of credit agreements aggregated to zero at September 30, 2014 and 2013. The Company, as a U.S. Government contractor, is subject to audits, reviews, and investigations by the U.S. Government related to its negotiation and performance of government contracts and its accounting for such contracts. Failure to comply with applicable U.S. Government standards by a contractor may result in suspension from eligibility for award of any new government contract and a guilty plea or conviction may result in debarment from eligibility for awards. The government may, in certain cases, also terminate existing contracts, recover damages, and impose other sanctions and penalties. As a result of a pending U.S. government audit, the Company has determined a range of possible outcomes none of which the Company believes would have a materially adverse effect on the Company's financial position or results of operations. In accordance with ASC 450 "Contingencies" the Company has accrued the amount within the range that appears to be its best estimate of a possible outcome.

Note 5. Recently Issued Accounting Standards

In May 2014, the FASB issued Accounting Standards Update No. 2014-09, "Revenue from Contracts with Customers" (ASU 2014-09), which supersedes nearly all existing revenue recognition guidance under U.S. GAAP. The core principle of ASU 2014-09 is to recognize revenues when promised goods or services are transferred to customers in an amount that reflects the consideration to which an entity expects to be entitled for those goods or services. ASU 2014-09 defines a five step process to achieve this core principle and, in doing so, more judgment and estimates may be required within the revenue recognition process than are required under existing U.S. GAAP.

The standard is effective for annual periods beginning after December 15, 2016, and interim periods therein, using either of the following transition methods: (i) a full retrospective approach reflecting the application of the standard in each prior reporting period with the option to elect certain practical expedients, or (ii) a retrospective approach with the cumulative effect of initially adopting ASU 2014-09 recognized at the date of adoption (which includes additional footnote disclosures). We are currently evaluating the impact of our pending adoption of ASU 2014-09 on our financial statements and have not yet determined the method by which we will adopt the standard in fiscal 2017.

Note 6. Employee Stock Ownership Plan

The Company sponsors a leveraged employee stock ownership plan (the "ESOP") that covers all non-union employees who work 1,000 or more hours per year and are employed on June 30. The Company makes annual contributions to the ESOP equal to the ESOP's debt service less dividends on unallocated shares received by the ESOP. All dividends on unallocated shares received by the ESOP are used to pay debt service. Dividends on allocated ESOP shares are recorded as a reduction of retained earnings. As the debt is repaid, shares are released and allocated to active employees, based on the proportion of debt service paid in the year. The Company accounts for its ESOP in accordance with FASB ASC 718-40. Accordingly, the shares purchased by the ESOP are reported as unearned ESOP shares in the statement of financial position. As shares are released or committed-to-be-released, the Company reports compensation expense equal to the current average market price of the shares, and the shares become outstanding for earnings-per-share (EPS) computations. ESOP compensation expense was \$111,191 for the three-month period ended September 30, 2014 and \$130,428 for the three-month period ended September 30, 2013. The ESOP shares as of September 30, 2014 and 2013 were as follows:

	September 30, 2014	September 30, 2013
Allocated shares	445,175	469,338

Edgar Filing: ESPEY MFG & ELECTRONICS CORP - Form 10-Q

Committed-to-be-released shares	4,583	4,792
Unreleased shares	92,917	111,874
Total shares held by the ESOP	542,675	586,004
Fair value of unreleased shares	\$ 1,870,419	\$ 3,199,596

Index

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

Overview

Espey Mfg. & Electronics Corp. ("Espey") is a power electronics design and original equipment manufacturing (OEM) company with a long history of developing and delivering highly reliable products for use in military and severe environment applications. All design, manufacturing, and testing is performed in our 150,000+ square foot facility located at 233 Ballston Ave, Saratoga Springs, New York. Espey is classified as a "smaller reporting company" for purposes of the reporting requirements under the Securities Exchange Act of 1934, as amended. Espey's common stock is publicly-traded on the NYSE MKT under the symbol "ESP."

Espey began operations after incorporation in New York in 1928. We strive to remain competitive as a leader in high power energy conversion and transformer solutions through the design and manufacture of new and improved products by using advanced and "cutting edge" electronics technologies.

Espey is ISO 9001:2008 and AS9100:2009 certified. Our primary products are power supplies, power converters, filters, power transformers, magnetic components, power distribution equipment, ups systems, antennas and high power radar systems. The applications of these products include AC and DC locomotives, shipboard power, shipboard radar, airborne power, ground-based radar, and ground mobile power. The Company received AS9100:2009 certification, a quality management system specific to the aerospace industry, in fiscal 2014. Major aerospace manufacturers and suppliers worldwide require compliance to AS9100 as a condition of doing business with them. Obtaining certification will allow the Company to maintain current business and provides an opportunity to expand the Company's qualification to bid on more work in the aerospace industry.

Espey services include design and development to specification, build to print, design services, design studies, environmental testing services, metal fabrication, painting services, and development of automatic testing equipment. Espey is vertically integrated, meaning that the Company produces individual components (including inductors), populates printed circuit boards, fabricates metalwork, paints, wires, qualifies, and fully tests items, mechanically, electrically and environmentally, in house. Portions of the manufacturing process are subcontracted to vendors from time to time.

The Company markets its products primarily through its own direct sales organization. Business is solicited from large industrial manufacturers and defense companies, the government of the United States, foreign governments and major foreign electronic equipment companies. In certain countries the Company has external sales representatives to help solicit and coordinate foreign contracts. Espey is also on the eligible list of contractors with the United States Department of Defense and generally is automatically solicited by Defense Department procurement agencies for their needs falling within the major classes of products produced by the Company. In addition, the Company directly pursues opportunities from the United States Department of Defense for prime contracts. Espey contracts with the Federal Government under cage code 20950 as Espey Mfg. & Electronics Corp. and cage code 98675 as Espey Mfg. & Electronics Corp., Saratoga Industries Division.

There is competition in all classes of products manufactured by the Company from divisions of the largest electronic companies, as well as many small companies. The Company's sales do not represent a significant share of the industry's market for any class of its products. The principal methods of competition for electronic products of both a military and industrial nature include, among other factors, price, product performance, the experience of the particular company and history of its dealings in such products. Our business is not seasonal. The Company, as well as other companies engaged in supplying equipment for military applications are exposed to on-going associated risks including, without limitation, dependence on appropriations from the United States Government and the governments of foreign nations, program allocations, and the potential of governmental termination of orders for convenience.

The Company's backlog was approximately \$35.1 million at September 30, 2014 which includes \$24.5 million from two significant customers compared to \$40.5 million at September 30, 2013 which included \$27.7 million from two significant customers. The backlog for the Company represents the estimated remaining sales value of work to be performed under firm contracts. This includes items that have been authorized and appropriated by Congress and/or funded by the customer. The unfunded portions of the backlog at September 30, 2014 and 2013 were \$2.3 million and zero, respectively, representing firm multi-year orders for which funding had not yet been appropriated by Congress or funded by our customer. While there is no guarantee that future budgets and appropriations will provide funding for a given program, management has included in unfunded backlog only those programs that it believes are likely to receive funding based on discussions with customers and program status.

Our backlog has declined due to several factors. First, the unresolved process for addressing the U.S.'s fiscal imbalances is a risk, not unique to Espey, and is common to all defense contractors. The Congressional sequestration and subsequent budget compromise has established a level of uncertainty associated with large-scale defense cuts and has caused delays in program management including the processing of new orders and requests for proposals associated with new procurement.

Index

Declining federal defense spending has caused new incidents of competition in the industry. Based upon discussions during contract negotiations with our major customers, we believe that many of our competitors are aggressively investing in upfront product design costs and lowering profit margins as a strategic means of maintaining existing business and enhancing market share at the expense of short term profit. This change in the market place has put pressure on the pricing of our current products and will likely result in lower margins on new business and some of our legacy business. In order to compete effectively for new business, we may similarly need to invest in upfront design costs, thereby reducing initial profitability as a means of procuring new long-term programs. Accordingly, we have adjusted our pricing strategy in order to achieve a balance which enables us both to retain repeat programs while being more competitive in bidding on new programs. We continue to refine this strategy as we move forward.

Moreover, engineering development contracts frequently have an element of uncertainty associated with the status of the applicable defense program, whether it will be approved for ultimate production and the timing of production, and whether the particular program will be funded by Congress. It is not uncommon for there to be a lapse of several years or more between engineering development work and production work. Or, as we have recently observed, production work may be delayed indefinitely or never occur.

Another factor contributing to the decline of the backlog has been our inability, thus far, to convert marketing efforts to potential new customers into awards of business. However, during the first quarter of fiscal 2015, we were successful in securing new business to replace a significant portion of outgoing shipments occurring in the same quarter.

New orders received in the first three months of fiscal 2015 were approximately \$5.0 million, as compared to \$5.4 million of new orders received in the first three months of fiscal 2014. Due to the uncertain timing of receipt of new orders, particularly large orders, period to period comparisons are not necessarily indicative of business trends. We continue to quote a large volume of opportunities and are reviewing our cost components and cost structure to become more cost competitive in an attempt to replace anticipated business which has either been deferred indefinitely or lost.

While the sales backlog gives the Company a solid base of future sales, based upon the composition of the backlog and our anticipated schedule for the fulfillment of orders, management expects net sales in fiscal year 2015 to be less than net sales in fiscal year 2014. It is presently anticipated that a minimum of \$18 million of orders comprising the June 30, 2014 backlog will be filled during the fiscal year ending June 30, 2015. The minimum of \$18 million does not include any shipments, which may be made against orders subsequently received during the fiscal year ending June 30, 2015. The estimate of the June 30, 2014 backlog to be shipped in fiscal 2015 is subject to future events, which may cause the amount of the backlog actually shipped to differ from such estimate.

In addition to the backlog, the Company currently has outstanding opportunities representing approximately \$21 million in the aggregate for both repeat and new programs. The outstanding quotations encompass various new and previously manufactured power supplies, transformers, and subassemblies. However, there can be no assurance that the Company will acquire any of the anticipated orders described above, many of which are subject to allocations of the United States defense spending and factors affecting the defense industry and military procurement generally.

Revenues, backlog and outstanding opportunities have declined and we believe may continue to trend down in the foreseeable future due to several ongoing factors discussed above. Management continues to evaluate our sales strategy including professional and technical resources necessary to keep pace with the changing market conditions and needs of our customers. Recently, the company revamped its sales organization and refocused its efforts to concentrate on our core competencies of designing and delivering to customer specification highly reliable power supplies, power magnetics and power distribution electronics for use in military and severe environment applications. In addition, we intend to design and produce some of our own products when we identify a potential need in the marketplace. We are starting to see some benefits from these organizational changes including the identification of

new program opportunities. In some instances, we have already begun the process of preparing competitive quotations.

Net sales to two significant customers represented 58.6% of the Company's total sales for the three-month period ended September 30, 2014 and net sales to four significant customers represented 76.2% of the Company's total sales for the three-month period ended September 30, 2013. This high concentration level with two customers presents significant risk. A loss of one of these customers or programs related to these customers could significantly impact the Company. Historically, a small number of customers have accounted for a large percentage of the Company's total sales in any given fiscal year. Management continues to pursue opportunities with current and new customers with an overall objective of lowering the concentration of sales, mitigating excessive reliance upon a single major product of a particular program and minimizing the impact of the loss of a single significant customer. Management continues to evaluate its business development functions and potential revised courses of action in order to diversify its customer base.

Index

Management, along with the Board of Directors, continues to evaluate the need and use of the Company's working capital. Capital expenditures are expected to be approximately \$200,000 for fiscal 2015, of which \$18,588 was expended through September 30, 2014. These expenditures are primarily being made to expand the production capability for transformers. Expectations are that working capital will be adequate to fund orders, regular quarterly dividend payments, and general operations of the business consistent with past practice. There is no guarantee that the Board of Directors will either maintain the amount of the regular cash dividend or declare a special dividend during any future years.

Critical Accounting Policies and Estimates

Management believes our most critical accounting policies include revenue recognition and cost estimates to completion.

A significant portion of our business is comprised of engineering design and production contracts. Generally, revenues on these long-term fixed-price contracts are recorded on a percentage of completion basis using units of delivery as the measurement basis for progress toward completion.

Percentage of completion accounting requires judgment relative to expected sales, estimating costs and making assumptions related to technical issues and delivery schedule. Contract costs include material, subcontract costs, labor and an allocation of overhead costs. The estimation of cost at completion of a contract is subject to numerous variables involving contract costs and estimates as to the length of time to complete the contract. Given the significance of the estimation processes and judgments described above, it is possible that materially different amounts of expected sales and contract costs could be recorded if different assumptions were used, based on changes in circumstances, in the estimation process. When a change in expected sales value or estimated cost is determined, changes are reflected in current period earnings.

Results of Operations

Net sales decreased for the three months ended September 30, 2014 to \$5,693,472 as compared to \$6,920,955 for the same period in 2013. The decrease in net sales is primarily due to lower electromechanical and transformer shipments for the three months ended September 30, 2014 as compared to the same period ended September 30, 2013.

For the three months ended September 30, 2014 and 2013 gross profits were \$1,810,079 and \$2,195,136, respectively. Gross profit as a percentage of sales was 31.8% and 31.7%, for the three months ended September 30, 2014 and 2013, respectively. The primary factors in determining gross profit and net income are overall sales levels and product mix. The gross profits on mature products and build to print contracts are higher as compared to products which are still in the engineering development stage or in the early stages of production. In any given accounting period the mix of products being produced between higher margin mature programs and less mature programs, including loss contracts, has a significant impact on gross profit and net income. The gross profit percentage remained consistent in the three months ended September 30, 2014 as compared to September 30, 2013.

Selling, general and administrative expenses were \$598,202 for the three months ended September 30, 2014; a decrease of \$169,773, compared to the three months ended September 30, 2013. The decrease for the three months ended September 30, 2014 relates primarily to a reduction in salary expense due to reductions in the number of employees.

Interest and dividend income for the three months ended September 30, 2014 and 2013 remained relatively unchanged at \$7,993 and \$10,769, respectively.

The effective income tax rate at September 30, 2014 and 2013 was 25.9% and 27.8%, respectively. The effective tax rate is less than the statutory tax rate mainly due to the benefit the Company receives on its “qualified production activities” under The American Jobs Creation Act of 2004 and the benefit derived from the ESOP dividends paid on allocated shares.

Net income for the three months ended September 30, 2014, was \$911,221 or \$.40 per share, both basic and diluted, compared to \$1,048,907 or \$.47 and \$.46 per share, basic and diluted, respectively for the three months ended September 30, 2013. The decrease in net income per share was mainly due to lower sales.

Liquidity and Capital Resources

The Company's working capital is an appropriate indicator of the liquidity of its business, and during the past two fiscal years, the Company, when possible, has funded all of its operations with cash flows resulting from operating activities and when necessary from its existing cash and investments. The Company did not borrow any funds during the last two fiscal years. Management has available a \$3,000,000 line of credit to help fund further growth or working capital needs, if necessary, but does not anticipate the need for any borrowed funds in the foreseeable future.

Index

The Company's working capital as of September 30, 2014 and 2013 was approximately \$27.5 million and \$30.1 million. During the three-month period ended September 30, 2014 the Company repurchased 9,909 shares of its common stock from the Company's Employee Retirement Plan and Trust ("ESOP") for a purchase price of \$234,834. During the three-month period ended September 30, 2013 the Company did not repurchase any shares of its common stock. Under existing authorizations from the Company's Board of Directors, as of September 30, 2014, management is authorized to purchase an additional \$1,471,414 of Company stock.

The table below presents the summary of cash flow information for the fiscal years indicated:

	Three Months Ended September 30,	
	2014	2013
Net cash provided by operating activities	\$688,594	\$2,406,578
Net cash provided by (used in) investing activities	397,290	(316,654)
Net cash used in financing activities	(770,613)	(371,115)

Net cash provided by operating activities fluctuates between periods primarily as a result of differences in net income, provisions for income taxes, the timing of the collection of accounts receivable, purchase of inventory, level of sales and payment of accounts payable. Net cash provided by investing activities increased in the first three months of fiscal 2015 due to a reduction in capital expenditures and the timing of the re-investment of matured securities. The increase in cash used in financing activities is due primarily to the purchase of treasury stock and the reduction in proceeds received from exercised stock options as the result of fewer shares exercised.

The Company currently believes that the cash flow generated from operations and when necessary, from cash and cash equivalents will be sufficient to meet its long-term funding requirements for the foreseeable future.

During the three months ended September 30, 2014 and 2013, the Company expended \$18,588 and \$328,311, respectively, for plant improvements and new equipment. The Company has budgeted approximately \$200,000 for new equipment and plant improvements in fiscal 2015. Management anticipates that the funds required will be available from current operations.

The Company at certain times enters into standby letters of credit agreements with financial institutions primarily relating to the guarantee of future performance on certain contracts. Contingent liabilities on outstanding standby letters of credit agreements aggregated to zero at September 30, 2014 and 2013.

CAUTIONARY STATEMENT FOR PURPOSES OF THE "SAFE HARBOR" PROVISIONS OF THE PRIVATE
SECURITIES LITIGATION REFORM ACT OF 1995

This report contains "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995. The terms "believe," "anticipate," "intend," "goal," "expect," and similar expressions may identify forward-looking statements. These forward-looking statements represent the Company's current expectations or beliefs concerning future events. The matters covered by these statements are subject to certain risks and uncertainties that could cause actual results to differ materially from those set forth in the forward-looking statements, including the Company's dependence on timely development, introduction and customer acceptance of new products, the impact of competition and price erosion, supply and manufacturing constraints, potential new orders from customers and other risks and uncertainties. The foregoing list should not be construed as exhaustive, and the Company disclaims any obligation subsequently to revise any forward-looking statements to reflect events or circumstances after the date of such statements or to reflect the occurrence of anticipated or unanticipated events. The Company wishes to caution readers not to place undue reliance on any such forward-looking statements, which speak only as of the date made.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

The Company is a smaller reporting company as defined under Securities and Exchange Commission Rule 12b-2. Pursuant to the exemption available to smaller reporting company issuers under Item 305 of Regulation S-K, quantitative and qualitative disclosures about market risk, the Company is not required to provide the information for this item.

Item 4. Controls and Procedures

(a) The Company's management, with the participation of the Company's chief executive officer and chief financial officer, carried out an evaluation of the effectiveness of our disclosure controls and procedures (as defined in Rule 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934) as of the end of the period covered by this Quarterly Report on Form 10-Q. Based on such evaluation, our chief executive officer and chief financial officer have concluded that our disclosure controls and procedures were effective as of the end of the period covered by this report.

(b) There have been no changes in our internal controls over financial reporting during the period covered by this report that have materially affected, or are reasonably likely to materially affect, our internal controls over financial reporting.

PART II: Other Information and Signatures

Item 1. Legal Proceedings

None

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

(a) Securities Sold - None

(c) Securities Repurchased

Purchases of Equity Securities

Period	Total Number of Shares Purchased	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Plan or Program	Maximum Number (or Approximate Dollar Value) of Shares that May Yet Be Purchased Under the Plan or Program (1)
September 1 to September 30, 2014	9,909	\$23.70	9,909	\$1,471,414

(1) Pursuant to a prior Board of Directors authorization, as of September 30, 2014 the Company can repurchase up to \$1,471,414 of its common stock pursuant to an ongoing plan.

Item 3. Defaults Upon Senior Securities

None

Item 4. Mine Safety Disclosures

Not applicable

Item 5. Other Information

None

Item 6. Exhibits

31.1 Certification of the Chief Executive Officer pursuant to Rules 13a-14(a) and 15d-14(a) under the Securities Exchange Act of 1934, as adopted pursuant to Section 302 of the Sarbanes-Oxley Act of 2002

31.2 Certification of the Principal Financial Officer pursuant to Rules 13a-14(a) and 15d-14(a) under the Securities Exchange Act of 1934, as adopted pursuant to Section 302 of the Sarbanes-Oxley Act of 2002

32.1 Certification of the Chief Executive Officer pursuant to 18 U.S.C. Section 1350, as adopted pursuant to Section 906 of the Sarbanes-Oxley Act of 2002

32.2 Certification of the Principal Financial Officer pursuant to 18 U.S.C. Section 1350, as adopted pursuant to Section 906 of the Sarbanes-Oxley Act of 2002
