- Pre-commencement communications pursuant to Rule 13e-4(c) under the Exchange Act (17 CFR 240.13e-4(c))

**Item 2.05**

On February 5, 2008, the Board of Directors of Zebra Technologies Corporation (the Company) approved a plan to (1) establish regional distribution and configuration centers, (2) consolidate its supplier base, and (3) transfer final assembly of thermal printers to Jabil Circuit, Inc. As part of the realignment, the Company will eliminate approximately 650 production-related positions from its Camarillo, California and Vernon Hills, Illinois locations during the next 18 to 24 months. These steps are part of a strategic initiative designed to optimize the Company's global printer product supply chain.

The Company's preliminary estimates of the total costs of the realignment range from \$24 to \$26 million in pre-tax expense, all of which will be cash charges. These costs consist of approximately \$6.0 million for severance, \$5.0 million for professional services costs associated with the plan, \$6.0 million for the cost of relocating and moving tools and the Company's manufacturing lines to Jabil and building new test fixtures for printed circuit board assemblies, and \$8.0 million for certain transition costs and other non-recurring costs associated with the plan, including costs for travel for the transition team and tool and equipment dispositioning. Of the total expected expense, the Company expects to recognize approximately \$18 million in 2008, and the remaining amount in 2009. These estimates are preliminary and subject to change and actual costs may be more or less than these estimated costs.
