BANCFIRST CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Unaudited)

(1) GENERAL

The accompanying consolidated financial statements include the accounts of BancFirst Corporation, Council Oak Partners, LLC, Wilcox, Jones & McGrath, Inc., and BancFirst and its subsidiaries (the Company). The operating subsidiaries of BancFirst are Council Oak Investment Corporation, BancFirst Agency, Inc., Lenders Collection Corporation, BancFirst Community Development Corporation and Council Oak Real Estate, Inc. All significant intercompany accounts and transactions have been eliminated. Assets held in a fiduciary or agency capacity are not assets of the Company and, accordingly, are not included in the consolidated financial statements. Certain amounts for 2007 have been reclassified to conform to the 2008 presentation.

The unaudited interim financial statements contained herein reflect all adjustments which are, in the opinion of management, necessary to provide a fair statement of the financial position and results of operations of the Company for the interim periods presented. All such adjustments are of a normal and recurring nature. There have been no significant changes in the accounting policies of the Company since December 31, 2007, the date of the most recent annual report.

The preparation of financial statements in conformity with accounting principles generally accepted in the United States inherently involves the use of estimates and assumptions that affect the amounts reported in the financial statements and the related disclosures. These estimates relate principally to the determination of the allowance for loan losses, income taxes and the fair values of financial instruments. Such estimates and assumptions may change over time and actual amounts realized may differ from those reported.

(2) RECENT ACCOUNTING PRONOUNCEMENTS

FAS No. 162 (FAS 162), The Hierarchy of Generally Accepted Accounting Principles identifies the sources of accounting principles and the framework for selecting the principles to be used in the preparation of financial statements of nongovernmental entities that are presented in conformity with generally accepted accounting principles (GAAP) in the United States (the GAAP hierarchy). The hierarchical guidance provided by FAS 162 will be effective 60 days following the Securities Exchange Commission's approval of the Public Company Accounting Oversight Board's amendment to AU Section 411, The Meaning of Present Fairly in Conformity With Generally Accepted Accounting Principles. The implementation of FAS 162 is not expected to have a significant impact on the Company's financial statements.

FAS No. 161 (FAS 161), Disclosures About Derivative Instruments and Hedging Activities, and Amendment of FASB Statement No. 133 amends FAS 133, Accounting for Derivative Instruments and Hedging Activities, to amend and expand the disclosure requirements of FAS 133 to provide greater transparency about (i) how and why an entity uses derivative instruments, (ii) how derivative instruments and related hedge items are accounted for under FAS 133 and its related interpretations, and (iii) how derivative instruments and related hedged items affect an entity's financial position, results of operations and cash flows. To meet those objectives, FAS 161 requires qualitative disclosures about objectives and strategies for using derivatives, quantitative disclosures about fair value amounts of gains and losses on derivative instruments and disclosures about credit-risk-related contingent features in derivative agreements. FAS 161 is effective for the Company on January 1, 2009 and is not expected to have a significant impact on the Company's financial statements.

FAS No. 157, Fair Value Measurements defines fair value, establishes a framework for measuring fair value in generally accepted accounting principles, and expands disclosures about fair value measurements (see Note 14 Fair Value Measurements).

In February 2007, the FASB issued FAS No. 159 (FAS 159), The Fair Value Option for Financial Assets and Financial Liabilities, including an amendment of FASB Statement No. 115. FAS 159 allows entities to irrevocably elect fair value as the initial and subsequent measurement attribute for certain financial assets and financial liabilities that are not otherwise required to be measured at fair value, with changes in fair value recognized in earnings as they

occur. FAS 159 also requires entities to report those financial assets and financial liabilities measured at fair value in a manner that separates those reported fair values from the carrying amounts of similar assets and liabilities measured using another measurement attribute on the face of the statement of financial position. Lastly, FAS 159 establishes presentation and disclosure requirements designed to improve comparability between entities that elect different measurement attributes for similar assets and liabilities. FAS 159 is effective for fiscal years beginning after November 15, 2007, with early adoption permitted if an entity also early adopts the provisions of FAS 157. The Company has determined that it does not intend to elect to use the fair value option to value financial assets and liabilities in accordance with FAS 159.

In December 2007, the FASB issued FAS No. 141R, Business Combinations (FAS 141R), which establishes principles and requirements for the reporting entity in a business combination, including recognition and measurement in the financial statements of the identifiable assets acquired, the liabilities assumed, and any noncontrolling interest in the acquiree. This statement also establishes disclosure requirements to enable financial statement users to evaluate the nature and financial effects of the business combination. FAS 141R applies prospectively to business combinations for which the acquisition date is on or after fiscal years beginning after December 15, 2008. FAS 141R will become effective for our fiscal year beginning January 1, 2009. The Company will evaluate the effect that the adoption of FAS 141R will have on future acquisitions.

(3) RECENT DEVELOPMENTS: MERGERS, ACQUISITIONS AND DISPOSALS

In November 2006, the Company announced its intent to exercise the optional prepayment terms of its 9.65% Junior Subordinated Debentures. The securities were redeemed effective January 15, 2007 for a redemption price equal to 104.825% of the aggregate \$25 million liquidation amount of the trust securities plus all accrued and unpaid interest to the redemption date. As a result of the prepayment, the Company incurred a loss of approximately, \$1.9 million or \$1.2 million after taxes in the first quarter of 2007. The loss reflects the premium paid and the acceleration of the unamortized issuance costs.

During the first quarter of 2007 the Company entered into an agreement to acquire Armor Assurance Company (Armor), an insurance agency in Muskogee, Oklahoma for cash of approximately \$3.3 million and a \$372,000 note payable in three equal annual installments. The transaction was consummated in April 2007. Armor had total assets of approximately \$364,000. As a result of the acquisition, Armor was merged with the Company's existing property casualty agency, Wilcox & Jones, to form Wilcox, Jones & McGrath, Inc. The acquisition was accounted for as a purchase. Accordingly, the effects of the acquisition are included in the Company's consolidated financial statements from the date of acquisition forward. The acquisition did not have a material effect on the results of operations of the Company for 2007 or the first six months of 2008.

In September 2007, the Company completed a modified Dutch Auction self-tender offer and purchased 539,453 shares of its common stock for the maximum offer price of \$45.00 per share. Cash on hand was used to pay for the purchase of the stock.

In March 2008, the Company, as a member bank of Visa, recorded a \$1.8 million pre-tax gain from the mandatory partial redemption of the Company's Visa shares received in the first quarter initial public offering. The gain was included in gain on sale of other assets.

In April 2008, the Company completed an \$80 million sale of securities resulting in a securities pre-tax gain of \$6.1 million. The transaction resulted in the sale of \$80 million of US Treasury securities and the purchase of Government Sponsored Enterprises (GSE) senior debt securities of similar amounts and maturities. The after-tax impact of these transactions was approximately \$3.8 million for the second quarter and \$3.3 million for the year.

The Company held 209, 133 and 230 debt securities available for sale that had unrealized gains as of June 30, 2008 and 2007 and December 31, 2007, respectively. These securities had a market value totaling \$281.8 million, \$69.9 million and \$270.6 million, respectively, and unrealized gains totaling \$4.8 million, \$299,000 and \$8.4 million, respectively. The Company also held 62, 185 and 74 debt securities available for sale that had unrealized losses, respectively. These securities had a market value totaling \$128.5 million, \$327.5 million and \$160.1 million and unrealized losses totaling \$2.1 million, \$5.4 million and \$699,000, respectively. These unrealized losses occurred due to increases in interest rates and spreads and not as a result of a decline in credit quality. The Company has both the intent and ability to hold these debt securities until the unrealized losses are recovered.

The Company's loans are mostly to customers within Oklahoma and over half of the loans are secured by real estate. Credit risk on loans is managed through limits on amounts loaned to individual borrowers, underwriting standards and loan monitoring procedures. The amounts and types of collateral obtained, if any, to secure loans are based upon the Company's underwriting standards and management's credit evaluation. Collateral varies, but may include real estate, equipment, accounts receivable, inventory, livestock and securities. The Company's interest in collateral is secured through filing mortgages and liens, and in some cases, by possession of the collateral. The amount of estimated loss due to credit risk in the Company's loan portfolio is provided for in the allowance for loan losses. The amount of the allowance required to provide for all existing losses in the loan portfolio is an estimate based upon evaluations of loans, appraisals of collateral and other estimates which are subject to rapid change due to changing economic conditions and the economic prospects of borrowers. It is reasonably possible that a material change could occur in the estimated allowance for loan losses in the near term.

Changes in the allowance for loan losses are summarized as follows (**dollars in thousands**):

(8) CAPITAL

The Company is subject to risk-based capital guidelines issued by the Board of Governors of the Federal Reserve System. These guidelines are used to evaluate capital adequacy and involve both quantitative and qualitative evaluations of the Company's assets, liabilities, and certain off-balance-sheet items calculated under regulatory practices. Failure to meet the minimum capital requirements can initiate certain mandatory or discretionary actions by the regulatory agencies that could have a direct material effect on the Company's financial statements. The required minimums and the Company's respective ratios are shown below (dollars in thousands).

	Minimum Required	June 30,		December 31,
		2008	2007	2007
Tier 1 capital		\$ 367,399	\$ 348,663	\$ 348,564

As of June 30, 2008 and 2007, and December 31, 2007, BancFirst was considered to be well capitalized. There are no conditions or events since the most recent notification of BancFirst's capital category that management believes would change its category.

(9) STOCK REPURCHASE PLAN

In November 1999, the Company adopted a new Stock Repurchase Program (the SRP) authorizing management to repurchase up to 600,000 shares of the Company's common stock. The SRP was amended in May 2001, August 2002, and September 2007 to increase the shares authorized to be purchased by 555,832 shares, 364,530 shares and 366,948 shares, respectively. The SRP may be used as a means to increase earnings per share and return on equity, to purchase treasury stock for the exercise of stock options or for distributions under the Deferred Stock Compensation Plan, to provide liquidity for optionees to dispose of stock from exercises of their stock options, and to provide liquidity for shareholders wishing to sell their stock. The timing, price and amount of stock repurchases under the SRP may be determined by management and approved by the Company's Executive Committee. At June 30, 2008 there were 560,000 shares remaining that could be repurchased under the SRP. Below is a summary of the shares repurchased under the program.

	Three Months Ended June 30,		Six Months Ended June 30,

(10) SHARE-BASED COMPENSATION

BancFirst Corporation adopted a nonqualified incentive stock option plan (the BancFirst ISOP) in May 1986. In May 2006, the Company amended the BancFirst ISOP to increase the number of shares to be issued under the plan to 2,500,000 shares. At June 30, 2008, 83,410 shares are available for future grants. The BancFirst ISOP will terminate December 31, 2011. The options are exercisable beginning four years from the date of grant at the rate of 25% per year for four years. Options granted prior to 1996 expire at the end of eleven years from the date of the grant. Options granted after January 1, 1996 expire at the end of fifteen years from the date of grant. Options outstanding as of June 30, 2008 will become exercisable through the year 2015. The option price must be no less than 100% of the fair market value of the stock relating to such option at the date of grant.

In June 1999, the Company adopted the BancFirst Corporation Non-Employee Directors' Stock Option Plan (the BancFirst Directors' Stock Option Plan). Each non-employee director is granted an option for 10,000 shares. In May 2006, the Company amended the BancFirst Directors' Stock Option Plan to increase the number of shares to be issued under the plan to 180,000 shares. At June 30, 2008, 25,000 shares are available for future grants. The options are

exercisable beginning one year from the date of grant at the rate of 25% per year for four years, and expire at the end of fifteen years from the date of grant. Options outstanding as of June 30, 2008 will become exercisable through the year 2012. The option price must be no less than 100% of the fair value of the stock relating to such option at the date of grant.

Below is a summary of the activity under both the BancFirst ISOP and the BancFirst Directors' Stock Option Plan (**dollars in thousands, except per share data**):

Tax benefit realized from options exercised	29	16	92	150

Effective January 1, 2006 the Company adopted, on a modified prospective basis, the fair value provisions of FAS 123R. The fair value of each option grant is estimated on the date of grant using the Black-Scholes option-pricing model and is based on certain assumptions including risk-free rate of return, dividend yield, stock price volatility, and the expected term. The fair value of each option is expensed over its vesting period.

For the three months ended June 30, 2008 and 2007, the Company recorded share-based employee compensation expense of approximately \$192,000 and \$199,000 respectively, net of tax and approximately \$367,000 and \$373,000 for the six months ended June 30, 2008 and 2007, respectively.

The Company will continue to amortize the remaining fair value of these stock options of approximately \$3.6 million, net of tax, over the remaining vesting period of approximately seven years. Share-based employee compensation expense under the fair value method was measured using the following assumptions for the options granted:

	2008	2007
Risk-free interest rate	3.57%	4.73%
Dividend yield	1.50%	1.50%
Stock price volatility	38.68%	25.85%
Expected term	10 Yrs	10 Yrs

The risk-free interest rate is determined by reference to the spot zero-coupon rate for the U.S. Treasury security with a maturity similar to the expected term of the options. The dividend yield is the expected yield for the expected term. The stock price volatility is estimated from the recent historical volatility of the Company's stock. The expected term is estimated from the historical option exercise experience.

(11) COMPREHENSIVE INCOME

The only component of comprehensive income reported by the Company is the unrealized gain or loss on securities available for sale. The amount of this unrealized gain or loss, net of tax, has been presented in the statement of income for each period as a component of other comprehensive income. Below is a summary of the tax effects of this unrealized gain or loss **(dollars in thousands)**.

(13) SEGMENT INFORMATION

The Company evaluates its performance with an internal profitability measurement system that measures the profitability of its business units on a pre-tax basis. The four principal business units are metropolitan banks, community banks, other financial services, and executive, operations and support. Metropolitan and community banks offer traditional banking products such as commercial and retail lending, and a full line of deposit accounts. Metropolitan banks consist of banking locations in the metropolitan Oklahoma City and Tulsa areas. Community banks consist of

banking locations in communities throughout Oklahoma. Other financial services are specialty product business units including guaranteed small business lending, guaranteed student lending, residential mortgage lending, trust services, securities brokerage, electronic banking and insurance. The executive, operations and support groups represent executive management, operational support and corporate functions that are not allocated to the other business units.

The results of operations and selected financial information for the four business units are as follows (**dollars in thousands**):

	Metropolitan Banks	Community Banks	Other Financial Services	Executive, Operations & Support	Elimin- ations	Consol- idated

The financial information for each business unit is presented on the basis used internally by management to evaluate performance and allocate resources. The Company utilizes a transfer pricing system to allocate the benefit or cost of funds provided or used by the various business units. Certain revenues related to other financial services are allocated to the banks whose customers receive the services and, therefore, are not reflected in the income for other financial services. Certain services provided by the support group to other business units, such as item processing, are allocated at rates approximating the cost of providing the services. Eliminations are adjustments to consolidate the business units and companies.

(14) FAIR VALUE MEASUREMENTS

Effective January 1, 2008, the Company adopted the provisions of FAS No. 157 (FAS 157), Fair Value Measurements, for financial assets and financial liabilities. In accordance with Financial Accounting Standards Board Staff Positions (FSP) No. 157-2, Effective Date of FASB Statement No. 157, the Company will delay application of FAS 157 for non-financial assets and non-financial liabilities, until January 1, 2009. FAS 157 defines fair value, establishes a framework for measuring fair value in generally accepted accounting principles and expands disclosures about fair value measurements.

FAS 157 establishes a fair value hierarchy for valuation inputs that gives the highest priority to quoted prices in active markets for identical assets or liabilities and the lowest priority to unobservable inputs. The fair value hierarchy is as follows:

Level 1 Inputs to the valuation methodology are quoted prices (unadjusted) for identical assets or liabilities in active markets.

Level 2 Inputs to the valuation methodology include quoted prices for similar assets and liabilities in active markets, and inputs that are observable for the asset and liability, either directly or indirectly, for substantially the full term of the financial instrument.

Level 3 Unobservable inputs for determining the fair values of assets or liabilities that reflect an entity's own assumptions about the assumptions that market participants would use in pricing the assets or liabilities.

A description of the valuation methodologies used for instruments measured at fair value, as well as the general classification of such instruments pursuant to the valuation hierarchy, is set forth below. These valuation methodologies were applied to all of the Company's financial assets and financial liabilities carried at fair value effective January 1, 2008.

Securities Available for Sale

U.S. Treasury Bills are reported at fair value utilizing Level 1 inputs. Other securities classified as available for sale are reported at fair value utilizing Level 2 inputs. For these securities, the Company obtains fair value information from an independent pricing service. The fair value measurements consider observable data that may include dealer quotes, market spreads, cash flows, the U.S. Treasury yield curve, live trading levels, trade execution data, market consensus prepayment speeds, credit information and the bond's terms and conditions, among other things. The Company also invests in equity securities classified as available for sale for which observable information is not readily available. These securities are reported at fair value utilizing Level 3 inputs. For these securities, management determines the fair value based on replacement cost, the income approach or information provided by outside consultants or lead investors.

Derivatives

Derivatives are reported at fair value utilizing Level 2 inputs. The Company obtains dealer quotations to value its oil and gas swaps/options. The Company utilizes internal valuation models with observable market data inputs to estimate fair values.

Loans Held For Sale

The Company originates mortgage loans to be sold in the secondary market. At the time of origination, the acquiring bank has already been determined and the terms of the loan, including interest rate, have already been set by the acquiring bank, allowing the Company to originate the loan at fair value. Mortgage loans are generally sold within 45 days of origination and gains or losses recognized upon the sale of the loans are determined on a specific identification basis.

Impaired Loans

Certain impaired loans are reported at the fair value of the underlying collateral if repayment is expected solely from the collateral. Collateral values are estimated using Level 3 inputs based on customized discounting criteria and are considered in the calculation of the allowance for loan loss reserves.

The following table summarizes financial assets and financial liabilities measured at fair value on a recurring basis as of June 30, 2008, segregated by the level of the valuation inputs within the fair value hierarchy utilized to measure fair value (**dollars in thousands**):

	Level 1 Inputs	Level 2 Inputs	Level 3 Inputs	Total Fair Value
Securities Available for Sale	\$	\$ 414,668	\$ 9,156	\$ 423,824
Derivative Assets		20,505		20,505
Derivative Liabilities		20,011		20,011
Loans Held For Sale		9,721		9,721

(15) DERIVATIVE FINANCIAL INSTRUMENTS

The Company enters into oil and gas swaps and options contracts to accommodate the business needs of its customers. Upon the origination of an oil or gas swap or option contract with a customer, the Company simultaneously enters into an offsetting contract with a counterparty to mitigate the exposure to fluctuations in oil and gas prices.

The Company obtains dealer quotations to value its oil and gas derivative positions. The notional amounts and estimated fair values of oil and gas derivative positions outstanding are presented in the following table (**notional amounts and dollars in thousands**):

		June 30, 2008		June 30, 2007		December 31, 2007	
	Notional Units	Notional Amount	Estimated Fair Value	Notional Amount	Estimated Fair Value	Notional Amount	Estimated Fair Value
Oil and gas swaps and options							
Oil							
Customer	Barrels	(128)	\$ 9,203		\$	(148)	\$ 2,410
Counterparty	Barrels	128	(9,028)			148	(2,362)
Natural Gas							
Customer	MMBTUs	(3,480)	11,303	(2,040)	(587)	(2,570)	(662)
Counterparty	MMBTUs	3,480	(10,983)	2,040	671	2,570	789

The Company's credit exposure on oil and gas swaps and options varies based on the current market prices of oil and natural gas. Changes in the Company's credit exposure will be offset by equal and opposite changes in the hedged position. The net positive fair value of the contracts is the profit derived from the activity and is unaffected by market price movements.

Customer credit exposure is managed by strict position limits and is primarily offset by first liens on production while the remainder is offset by cash. Counterparty credit exposure is managed by selecting highly rated counterparties (rated A- or better by Standard and Poor's) and monitoring market information.

The Company had credit exposure relating to oil and gas swaps and options with bank customers of approximately \$20.5 million at June 30, 2008 and \$1.7 million at December 31, 2007. Conversely, the Company had exposure to bank counterparties of approximately \$700,000 at June 30, 2007.

The Company entered into a \$30 million five year guaranty with a counterparty on June 4, 2008 for the timely payment of the obligations of the subsidiary Bank related to the settlement of oil and gas positions.

FINANCIAL CONDITION AND RESULTS OF OPERATIONS**

SUMMARY

Net income for the second quarter of 2008 was \$13.7 million compared to \$13.4 million for the second quarter of 2007. Diluted net income per share was \$0.89 and \$0.83 for the second quarter of 2008 and 2007, respectively. For the first six months of 2008, net income was \$25.3 million, compared to \$24.5 million for the first six months of 2007. Diluted net income per share for the first six months of 2008 was \$1.63 compared to \$1.52 for the first six months of 2007.

Total assets at June 30, 2008 were \$3.8 billion, up \$96.8 million from December 31, 2007 and up \$238.0 million from a year ago. Total loans increased to \$2.61 billion, up \$121.8 million from December 31, 2007 and up \$263.1 million from June 30, 2007. Total deposits were \$3.4 billion, up \$78.9 million from December 31, 2007 and up \$215.8 million from June 30, 2007. Stockholders' equity was \$387 million at June 30, 2008, up \$15.2 million from December 31, 2007 and up \$22.6 million compared to June 30, 2007. The Company's liquidity remains strong as its average loan to deposit ratio was 77.2% at quarter end and core deposits represented 91.2% of total deposits. The Company had no brokered deposits and less than \$100,000 of Federal Home Loan Bank borrowings. Stockholder's equity was \$387 million at June 30, 2008 which was 10.2% of total assets.

In April 2008, the Company completed an \$80 million sale of securities resulting in a securities pre-tax gain of \$6.1 million. The transaction resulted in the sale of \$80 million of US Treasury securities and the purchase of Government Sponsored Enterprises (GSE) senior debt securities of similar amounts and maturities. The after-tax impact of these transactions was approximately \$3.8 million or \$0.24 per diluted earnings per share for the second quarter, and \$3.3 million or \$0.21 per diluted earnings per share for the year.

In March 2008, the Company, as a member bank of Visa, recorded a \$1.8 million pre-tax gain from the mandatory partial redemption of the Company's Visa shares received in the first quarter initial public offering. The gain was included in gain on sale of other assets.

During the first quarter of 2007 the Company entered into an agreement to acquire Armor Assurance Company (Armor), an insurance agency in Muskogee, Oklahoma for cash of approximately \$3.3 million and a \$372,000 note payable in three equal annual installments. The transaction was consummated in April 2007. Armor had total assets of approximately \$364,000. As a result of the acquisition, Armor was merged with the Company's existing property casualty agency, Wilcox & Jones, to form Wilcox, Jones & McGrath, Inc. The acquisition was accounted for as a purchase. Accordingly, the effects of the acquisition are included in the Company's consolidated financial statements from the date of acquisition forward. The acquisition did not have a material effect on the results of operations of the Company for 2007 or the first six months of 2008.

In November 2006, the Company announced its intent to exercise the optional prepayment terms of its 9.65% Junior Subordinated Debentures. The securities were redeemed effective January 15, 2007 for a redemption price equal to 104.825% of the aggregate \$25 million liquidation amount of the trust securities plus all accrued and unpaid interest to the redemption date. As a result of the prepayment, the Company incurred a loss of approximately \$1.2 million after taxes in the first quarter of 2007. The loss reflects the premium paid and the acceleration of the unamortized issuance costs.

RESULTS OF OPERATIONS

Second Quarter

Net interest income totaled \$34.8 million, a decrease of \$2.6 million, or 7.0%, compared to the second quarter of 2007. The Company's net interest margin (on a taxable equivalent basis) was 4.08% compared to 4.68% for the same period a year ago. The lower interest rate environment in 2008 compared to the first six months of 2007 as a result of Federal Reserve rate cuts has caused the Company's net interest margin to decline.

The Company's provision for loan losses was \$3.5 million compared to \$132,000 during the same period a year ago. The loan provision was driven primarily by the identification of a small number of commercial credits that were internally downgraded by management and to a lesser extent from the growth in the loan portfolio. Net loan charge-offs were \$220,000 for the second quarter of 2008, compared to \$57,000 for the second quarter of 2007. The net charge-offs represent a rate of 0.03% of average total loans for the second quarter of 2008 compared to 0.01% for the same period in 2007.

During the second quarter, the Company completed an \$80 million sale of securities that resulted in a pre-tax securities gain of \$6.1 million and also recognized a \$1.2 million pre-tax gain on the sale of an asset which were included in noninterest income. Recurring operating noninterest income was \$16.0 million compared to \$15.2 million for the same period a year ago, an increase of 5.3% due to growth in deposit accounts, and cash management and treasury services. Noninterest expense totaled \$33.6 million versus \$31.6 million for the second quarter of 2007, an increase of \$2 million, or 6.3%. The increase is due to the Company's overall growth, including expansion of the Company's insurance agency. The Company's effective tax rate was 34.5% for the second quarter of 2008, compared to 35.9% for the second quarter of 2007. The decrease is a result of additional tax credits realized in 2008.

Year-To-Date

Net interest income for the six months ended June 30, 2008 was \$70.2 million, a decrease of \$3.7 million from the same period in 2007. The net interest margin in 2008 decreased to 4.16% from 4.72% for the first six months of 2007. The lower interest rate environment in 2008 compared to the first six months of 2007 as a result of Federal Reserve rate cuts has caused the Company's net interest margin to decline.

The Company provided a \$5.32 million provision for loan losses in the first six months of 2008, compared to \$101,000 for the same period of 2007. The loan provision was driven primarily by the identification of a small number of commercial credits that were internally downgraded by management and to a lesser extent from the growth in the loan portfolio. Net loan charge-offs were \$934,000 for the first six months of 2008, compared to \$233,000 for the first six months of 2007. The net charge-offs represent an annualized rate of 0.07% of average total loans for the first six months of 2008 compared to 0.02% for the first six months of 2007.

Noninterest income for the six months of 2008 increased \$11.5 million compared to the same period for 2007. Noninterest income during the first six months of 2008 included a one-time gain of approximately \$1.8 million, before taxes, from the Company's interest in the Visa initial public offering, a \$6.1 million gain on the sale of securities, and a \$1.2 million gain on the sale of an asset. Core noninterest income was up \$2.4 million due to growth in deposit accounts, and cash management and treasury services. Noninterest expense increased \$1.5 million compared to the first half of 2007. Last year's expenses included a \$1.9 million charge for the early redemption of the junior subordinated debentures. The increase in the core operating expenses over a year ago was attributable to the increase in salaries and benefits due to the Company's growth, and expenses of an insurance agency acquired in the second quarter of 2007. Income tax expense increased \$295,000 compared to the first six months of 2007. The effective tax rate on income before taxes was 34.9%, compared to 35.1% for the first six months of 2007. The decrease is a result of additional tax credits realized in 2008.

In recent months certain events in the national economy have caused credit and liquidity issues, declining home sales, rising oil and gas prices and a declining dollar resulting in an increase in credit losses at many U.S. banks. The deterioration in the economy has led to mixed reviews on whether or not the nation has entered into a recession. While the Oklahoma economy is currently performing better than the national average, it would be reasonable to expect that the state would eventually feel the impact of a national recession. If that were the case, it is reasonable to expect that loan losses of the Company would increase.

FINANCIAL POSITION

The aggregate of cash and due from banks, interest-bearing deposits with banks, and federal funds sold as of June 30, 2008 increased \$277.0 million from December 31, 2007 but decreased \$35.8 million from June 30, 2007. The increase from year-end was mainly from deposit growth in early 2008. The decrease from the previous year mainly resulted from a decrease in federal funds sold to help fund loan growth.

Total securities decreased \$19.4 million compared to December 31, 2007 and \$10.9 million compared to June 30, 2007. The size of the Company's securities portfolio is a function of liquidity management and excess funds available for investment. The Company has maintained a very liquid securities portfolio to provide funds for loan growth. The net unrealized gain on securities available for sale, before taxes, was \$5.8 million at the end of the second quarter of 2008, compared to an unrealized gain of \$10.7 million at December 31, 2007 and an unrealized gain of \$2.1 million at June 30, 2007. The decrease in unrealized gains from year-end to June 30, 2008 was due in part to the realization of securities gains resulting from the \$80 million sale of securities previously discussed. The average taxable equivalent yield on the securities portfolio for the second quarter of 2008 decreased to 4.15% from 4.76% for the same quarter of 2007.

Total loans increased \$121.8 million from December 31, 2007 and increased \$263.1 million from June 30, 2007. The increase compared to year end and second quarter 2007 was due to internal loan growth. The allowance for loan losses increased \$4.4 million from year-end 2007 and \$5.9 million from the second quarter of 2007. The allowance as a percentage of total loans was 1.28%, 1.17% and 1.18% at June 30, 2008, December 31, 2007 and June 30, 2007, respectively. The allowance to nonperforming and restructured loans at the same dates was 240.30%, 215.57% and 177.18%, respectively.

Nonperforming and restructured loans totaled \$13.9 million at June 30, 2008, compared to \$13.5 million at December 31, 2007 and \$15.6 million at June 30, 2007. The ratio of nonperforming and restructured loans to total loans for the same periods was 0.53%, 0.54% and 0.66%, respectively. The level of nonperforming loans and loan losses may rise over time as a result of economic and credit cycles.

Total deposits increased \$78.9 million compared to December 31, 2007, and \$215.8 million compared to June 30, 2007 due to internal growth. The Company's deposit base continues to be comprised substantially of core deposits, with large denomination certificates of deposit being only 10.0% of total deposits at June 30, 2008, compared to 9.2% at December 31, 2007 and 8.8% at June 30, 2007. Noninterest bearing deposits to total deposits were 30.2% at June 30, 2008, compared to 29.4% at December 31, 2007 and 29.0% at June 30, 2007.

Short-term borrowings decreased \$16.0 million from December 31, 2007, and \$21.5 million from June 30, 2007. Fluctuations in short-term borrowings are a function of federal funds purchased from correspondent banks, customer demand for repurchase agreements and liquidity needs of the bank.

Long-term borrowings decreased \$507,000 from year-end 2007 and \$965,000 from the second quarter of 2007. The decrease since the second quarter and year end of 2007 was due to scheduled principal payments and early payoff of the note payable related to the acquisition of Armor Assurance Company.

Stockholders' equity was \$387.2 million at June 30, 2008 which was an increase of \$15.2 million from year-end 2007 and an increase of \$22.6 million from the second quarter of 2007 due to accumulated earnings. Average stockholders' equity to average assets for the second quarter of 2008 was 10.29%, compared to 10.14% for the second quarter of 2007. The Company's leverage ratio and total risk-based capital ratio were 9.67% and 13.44%, respectively, at June 30, 2008, well in excess of the regulatory minimums.
