### General Dynamics Reports Strong Results for Fourth Quarter, Full-Year 2009

#### **Operating margins increase in Q4 as company maintains focus on effective execution**

#### **Cash generation exceeds earnings from continuing operations**

#### **Management provides 2010 full-year EPS guidance**

**FALLS CHURCH, Va.** General Dynamics (NYSE: GD) today reported 2009 fourth-quarter earnings from continuing operations of \$618 million, or \$1.58 per share on a fully diluted basis, compared to 2008 fourth-quarter earnings from continuing operations of \$630 million, or \$1.62 per share fully diluted. Full-year 2009 earnings from continuing operations were \$2.41 billion, or \$6.20 per share on a fully diluted basis, compared to \$2.48 billion and \$6.22 per share, respectively, for 2008. Revenue was \$7.9 billion in the fourth quarter and \$32 billion for the full-year, an increase of 9.2 percent over full-year 2008.

#### **Margins**

Company-wide operating margins increased to 12 percent for the fourth quarter of 2009, driven by improved performance at each of the company's defense businesses. Notably, operating margins increased in Combat Systems by 160 basis points; Marine Systems and Information Systems and Technology also improved margin performance, by 50 and 80 basis points, respectively, in the quarter.

#### **Cash**

Net cash provided by operating activities totaled \$1.5 billion in the fourth quarter and \$2.86 billion for the full year. Free cash flow from operations, defined as net cash provided by operating activities less capital expenditures, was \$1.36 billion in the quarter and \$2.47 billion for the year. Free cash flow as a percentage of earnings from continuing operations was 103 percent for the year.

more

### **Backlog**

The company's total backlog was \$65.5 billion at the end of the fourth quarter, reflecting increases in both Aerospace and Combat Systems over the end of the third quarter. In Aerospace, new-aircraft order activity continued to be strong in the fourth quarter. Combat Systems received significant orders in the quarter as well, including a \$2.2 billion contract for a foreign military sale of light armored vehicles, and \$320 million for design, engineering, modernization and enhancements of Stryker vehicles for the U.S. Army.

Funded backlog at the end of fourth-quarter 2009 was \$45.9 billion. In addition, the estimated potential contract value, representing management's estimate of the value of unfunded indefinite delivery, indefinite quantity (IDIQ) contracts and unexercised options, was \$17.6 billion at year-end 2009. Total potential contract value, the sum of all backlog components, was \$83.1 billion at the end of the year.

### **Net Earnings**

General Dynamics' net earnings for the fourth quarter of 2009 were \$614 million, compared to fourth-quarter 2008 net earnings of \$612 million. Net earnings for the full year were \$2.39 billion in 2009, compared to \$2.46 billion in 2008.

General Dynamics performed well in 2009, said Jay L. Johnson, president and chief executive officer. The strength of our diverse portfolio was evident as continuing customer demand for our defense-related products balanced the impact of the global economic challenges on business aviation. By marrying that strength with our commitment to financial performance and effective execution, the business generated strong margins and excellent cash flow in the fourth quarter and for the full year.

Based on the company's performance in 2009 and our current understanding of the year ahead, we expect 2010 earnings to be in the range of \$6.40 to \$6.50 per share, fully diluted, Johnson said.

General Dynamics, headquartered in Falls Church, Virginia, employs approximately 91,700 people worldwide. The company is a market leader in business aviation; land and expeditionary combat systems, armaments and munitions; shipbuilding and marine systems; and information systems and technologies. More information about the company is available on the Internet at [www.generaldynamics.com](http://www.generaldynamics.com).

Shares outstanding	385,704,691		386,710,589	

- (A) We believe free cash flow from operations is a measurement that is useful to investors, because it portrays our ability to generate cash from our core businesses for such purposes as repaying maturing debt, funding business acquisitions and paying dividends. We use free cash flow from operations to assess the quality of our earnings and as a performance measure in evaluating management. The most directly comparable GAAP measure to free cash flow from operations is net cash provided by operating activities.
- (B) We believe return on invested capital is a measurement that is useful to investors, because it reflects our ability to generate returns from the capital we have deployed in our operations. We use ROIC to evaluate investment decisions and as a performance measure in evaluating management. We define ROIC as net operating profit after taxes for the latest 12-month period divided by the sum of the average debt and shareholders' equity for the same period. Net operating profit after taxes is defined as earnings from continuing operations plus after-tax interest and amortization expense. The most directly comparable GAAP measure to net operating profit after taxes is earnings from continuing operations.
- (C) Return on equity is calculated by dividing earnings from continuing operations for the latest 12-month period by our average equity during that period.
- (D) Debt-to-equity ratio is calculated as total debt divided by total equity as of the end of the period.
- (E) Debt-to-capital ratio is calculated as total debt divided by the sum of total debt plus total equity as of the end of the period.

## Edgar Filing: GENERAL DYNAMICS CORP - Form 8-K

- (F) Book value per share is calculated as total equity divided by total outstanding shares as of the end of the period.
- (G) Includes independent research and development and bid and proposal costs and Gulfstream product development costs.
- (H) Sales per employee is calculated by dividing revenues for the latest 12-month period by our average number of employees during that period.

\* The estimated potential contract value represents management's estimate of our future contract value under unfunded indefinite delivery, indefinite quantity (IDIQ) contracts and unexercised options associated with existing firm contracts, including aircraft fleet customers' options to purchase new aircraft. Because the value in the unfunded IDIQ arrangements is subject to the customer's future exercise of an indeterminate quantity of delivery orders, we recognize these contracts in backlog only when they are funded. Unexercised options are recognized in backlog when the customer exercises the option and establishes a firm order.

**EXHIBIT I**

**FOURTH QUARTER 2009 SIGNIFICANT ORDERS (UNAUDITED)**

**DOLLARS IN MILLIONS**

We received the following significant contract orders during the fourth quarter of 2009:

**Combat Systems**

Approximately \$2.2 billion from the U.S. Army for Light Armored Vehicles for a Foreign Military Sale (FMS).

Approximately \$190 from the Army for the Stryker wheeled armored vehicle modernization program, bringing the total contract value to over \$210.

Approximately \$160 from the Army to build M1A1 Situational Awareness (SA) tanks for Iraq. The contract has a potential value of approximately \$200.

Approximately \$130 from the Army for design and engineering work and enhancements for Stryker vehicles in support of Operating Enduring Freedom.

**Marine Systems**

Approximately \$80 from the U.S. Navy for management and support of nuclear-maintenance work for submarines.

Approximately \$80 from the Navy for additional engineering services associated with the detail design and construction of the DDG-1000 Zumwalt-class destroyer. The contract award has a potential value of approximately \$190.

**Information Systems and Technology**

Approximately \$210 from the Army for initial outfitting and transition support of the newly renovated Walter Reed National Military Medical Center and the newly constructed Fort Belvoir Community Hospital. The contract has a potential value of over \$320.

A task order worth approximately \$110 from the Army to modernize classroom training technology under the Information Technology Enterprise Technology Solutions-2 Services (ITES-2S) indefinite delivery, indefinite quantity (IDIQ) contract.

An IDIQ contract from the Army with a potential value of \$200 to develop the Consolidated Product-Line Management system, which will improve the Army's ability to manage its live combat training system product lines.

Edgar Filing: GENERAL DYNAMICS CORP - Form 8-K

An IDIQ contract from the Federal Aviation Administration with a potential value of approximately \$220 to maintain its legacy telephony system.
