PART 1 FINANCIAL INFORMATION

ITEM 1 FINANCIAL STATEMENTS

EVANS BANCORP, INC. AND SUBSIDIARIES

NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS

THREE AND NINE MONTHS ENDED SEPTEMBER 30, 2011 AND 2010

1. ORGANIZATION AND SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The accounting and reporting policies followed by Evans Bancorp, Inc. (the Company), a financial holding company, and its two direct, wholly-owned subsidiaries: (i) Evans Bank, National Association (the Bank), and the Bank's subsidiaries, Evans National Leasing, Inc. (ENL), Evans National Holding Corp. (ENHC) and Suchak Data Systems, LLC (SDS); and (ii) Evans National Financial Services, LLC (ENFS), and ENFS's subsidiary, The Evans Agency, LLC (TEA) and TEA's subsidiaries, Frontier Claims Services, Inc. (FCS) and ENB Associates Inc. (ENBA), in preparation of the accompanying interim unaudited consolidated financial statements conform with U.S. generally accepted accounting principles (GAAP) and with general practice within the industries in which it operates. Except as the context otherwise requires, the Company and its direct and indirect subsidiaries are collectively referred to in this report as the Company.

The accompanying consolidated financial statements are unaudited. In the opinion of management, all adjustments necessary for a fair presentation of the Company's financial position and results of operations for the interim periods have been made. Certain reclassifications have been made to the 2010 unaudited consolidated financial statements to conform to the presentation used in 2011.

The results of operations for the three and nine month periods ended September 30, 2011 are not necessarily indicative of the results to be expected for the full year. The accompanying unaudited consolidated financial statements should be read in conjunction with the Audited Consolidated Financial Statements and the Notes thereto included in our Annual Report on Form 10-K for the year ended December 31, 2010. The Company has evaluated subsequent events for potential recognition and/or disclosure through the date of filing.

2. SECURITIES

The amortized cost of securities and their approximate fair value at September 30, 2011 and December 31, 2010 were as follows:

Total securities	\$ 88,236	\$ 1,805	\$ (489)	\$ 89,552
------------------	-----------	----------	----------	-----------

**Table of Contents**

Available for sale securities with a total fair value of \$72.1 million and \$65.6 million at September 30, 2011 and December 31, 2010, respectively, were pledged as collateral to secure public deposits and for other purposes required or permitted by law.

The Company uses the Federal Home Loan Bank of New York ( FHLBNY ) as its primary source of overnight funds and also has several long-term advances with FHLBNY. The Company had a total of \$22.0 million and \$35.6 million in borrowed funds with FHLBNY at September 30, 2011 and December 31, 2010, respectively. The Company has placed sufficient collateral in the form of residential and commercial real estate loans at FHLBNY that meet FHLB collateral requirements. As a member of the Federal Home Loan Bank ( FHLB ) System, the Bank is required to hold stock in FHLBNY. The Bank held \$1.8 million and \$2.4 million in FHLBNY stock as of September 30, 2011 and December 31, 2010, respectively.

The scheduled maturities of debt and mortgage-backed securities at September 30, 2011 are summarized below. All maturity amounts are contractual maturities. Actual maturities may differ from contractual maturities because certain issuers have the right to call or prepay obligations with or without call premiums.

Information regarding unrealized losses within the Company's available for sale securities at September 30, 2011 and December 31, 2010, is summarized below. The securities are primarily U.S. government-guaranteed agency securities or municipal securities. All unrealized losses are considered temporary and related to market interest rate fluctuations.

## Table of Contents

In regard to municipal securities, the Company's general investment policy is that in-state securities must be rated at least Moody's Baa (or equivalent) at the time of purchase. The Company reviews the ratings report and municipality financial statements and prepares a pre-purchase analysis report before the purchase of any municipal securities. Out-of-state issues must be rated by Moody's at least Aa (or equivalent) at the time of purchase. The Company did not own any out-of-state municipal bonds at September 30, 2011 or December 31, 2010. Bonds rated below A are reviewed periodically to ensure their continued credit worthiness. While purchase of non-rated municipal securities is permitted, such purchases are limited to bonds issued by municipalities in the Company's general market area. Those municipalities are typically customers of the Bank whose financial situation is familiar to management. The financial statements of the issuers of non-rated securities are reviewed by the Bank and a credit file of the issuers is kept on each non-rated municipal security with relevant financial information.

Although concerns have been raised in the marketplace recently about the health of municipal bonds, the Company has not experienced any credit troubles in this portfolio and does not believe any credit troubles are imminent. Aside from the non-rated municipal securities to local municipalities discussed above that are considered held-to-maturity, all of the Company's available-for-sale municipal bonds are investment-grade government obligation (G.O.) bonds. G.O. bonds are generally considered safer than revenue bonds because they are backed by the full faith and credit of the government while revenue bonds rely on the revenue produced by a particular project. All of the Company's municipal bonds are to municipalities in New York State. To the Company's knowledge, there has never been a default of a NY G.O. in the history of the state. Historical performance does not guarantee future performance, but the Company believes that it does indicate that the risk of loss on default of a G.O. municipal bond for the Company is relatively low.

Management has assessed the securities available for sale in an unrealized loss position at September 30, 2011 and December 31, 2010 and determined the decline in fair value below amortized cost to be temporary. In making this determination, management considered the period of time the securities were in a loss position, the percentage decline in comparison to the securities' amortized cost, and the financial condition of the issuer (primarily government or government-sponsored enterprises). In addition, management does not intend to sell these securities and it is not more likely than not that the Company will be required to sell these securities before recovery of their amortized cost. Management believes the decline in fair value is primarily related to market interest rate fluctuations and not to the credit deterioration of the individual issuers.

The Company has not recorded any other-than-temporary impairment charges in 2011 or 2010, the gross unrealized losses amounted to less than 0.1% of the total fair value of the securities portfolio at September 30, 2011 and December 31, 2010, and the gross unrealized loss position decreased by \$0.5 million from December 31, 2010 to September 30, 2011. Nevertheless, it remains possible that there could be deterioration in the asset quality of the securities portfolio in the future. The credit worthiness of the Company's portfolio is largely reliant on the ability of U.S. government sponsored agencies such as FHLB, Federal National Mortgage Association (FNMA), Government National Mortgage Association (GNMA), and Federal Home Loan Mortgage Corporation (FHLMC), and municipalities throughout New York State to meet their obligations. In addition, dysfunctional markets could materially alter the liquidity, interest rate, and pricing risk of the portfolio. The relatively stable past performance is not a guarantee for similar performance of the Company's securities portfolio going forward.

### 3. FAIR VALUE MEASUREMENTS

The Company follows the provisions of ASC Topic 820, Fair Value Measurements and Disclosures. Those provisions relate to financial assets and liabilities carried at fair value and fair value disclosures related to financial assets and liabilities. ASC Topic 820 defines fair value and specifies a hierarchy of valuation techniques based on the nature of the inputs used to develop the fair value measures. Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date.

There are three levels of inputs to fair value measurements:

Level 1, meaning the use of quoted prices for identical instruments in active markets;

Level 2, meaning the use of quoted prices for similar instruments in active markets or quoted prices for identical or similar instruments in markets that are not active or are directly or indirectly observable; and

**Table of Contents**

Level 3, meaning the use of unobservable inputs.  
Observable market data should be used when available.

**FINANCIAL INSTRUMENTS MEASURED AT FAIR VALUE ON A RECURRING BASIS**

The following table presents for each of the fair-value hierarchy levels as defined in this footnote, those financial instruments which are measured at fair value on a recurring basis at September 30, 2011 and December 31, 2010:

	Level 1	Level 2	Level 3	Fair Value
<b>September 30, 2011</b>				
Securities available-for-sale:				
U.S. government agencies	\$	\$ 26,237	\$	\$ 26,237
States and political subdivisions		33,616		33,616
Mortgage-backed securities		31,929		31,929
Mortgage servicing rights			353	353
<b>December 31, 2010</b>				
Securities available-for-sale:				
U.S. government agencies	\$	\$ 23,644	\$	\$ 23,644
States and political subdivisions		36,297		36,297
Mortgage-backed securities		27,481		27,481
Mortgage servicing rights			388	388
<b>Securities available for sale</b>				

Fair values for securities are determined using independent pricing services and market-participating brokers. The pricing service and brokers use a variety of techniques to arrive at fair value including market maker bids, quotes, and pricing models. Inputs to their pricing models include recent trades, benchmark interest rates, spreads, and actual and projected cash flows. Management obtains a single market quote or price estimate for each security. Management has a sufficient understanding of the third party service's valuation models, assumptions and inputs used in determining the fair value of securities to enable management to maintain an appropriate system of internal control. Securities available for sale are classified as Level 2 in the fair value hierarchy as the valuation provided by the third-party provider uses observable market data.

**Mortgage servicing rights**

Mortgage servicing rights (MSRs) do not trade in an active, open market with readily observable prices. Accordingly, the Company obtains the fair value of the MSRs using a third-party pricing provider. The provider determines the fair value by discounting projected net servicing cash flows of the remaining servicing portfolio. The valuation model used by the provider considers market loan prepayment predictions and other economic factors. The fair value of MSRs is mostly affected by changes in mortgage interest rates since rate changes cause the loan prepayment acceleration factors to increase or decrease. All assumptions are market driven. Management has a sufficient understanding of the third party service's valuation models, assumptions and inputs used in determining the fair value of MSRs to enable management to maintain an appropriate system of internal control. Mortgage servicing rights are classified within Level 3 of the fair value hierarchy as the valuation is model driven and primarily based on unobservable inputs.

The following table summarizes the changes in fair value for items measured at fair value (Level 3) on a recurring basis using significant unobservable inputs during the three and nine month periods ended September 30, 2011:

**Table of Contents**

Mortgage servicing rights June 30, 2011	\$ 442
Gains (losses) included in earnings	(108)
Additions from loan sales	19
 Mortgage servicing rights September 30, 2011	 \$ 353
Mortgage servicing rights December 31, 2010	\$ 388
Gains (losses) included in earnings	(145)
Additions from loan sales	110
 Mortgage servicing rights September 30, 2011	 \$ 353

**FINANCIAL INSTRUMENTS MEASURED AT FAIR VALUE ON A NONRECURRING BASIS**

The Company is required, on a nonrecurring basis, to adjust the carrying value of certain assets or provide valuation allowances related to certain assets using fair value measurements. The following table presents for each of the fair-value hierarchy levels as defined in this footnote, those financial instruments which are measured at fair value on a nonrecurring basis at September 30, 2011 and December 31, 2010:

	Level 1	Level 2	Level 3	Fair Value
September 30, 2011				
Impaired loans	\$	\$	\$ 11,569	\$ 11,569
December 31, 2010				
Impaired loans	\$	\$	\$ 7,787	\$ 7,787

**Impaired loans**

The Company evaluates and values impaired loans at the time the loan is identified as impaired, and the fair values of such loans are estimated using Level 3 inputs in the fair value hierarchy. Fair value is estimated based on the value of the collateral securing these loans. Collateral may consist of real estate and/or business assets including equipment, inventory and/or accounts receivable and the value of these assets is determined based on appraisals by qualified licensed appraisers hired by the Company. Appraised and reported values may be discounted based on management's historical knowledge, changes in market conditions from the time of valuation, estimated costs to sell, and/or management's expertise and knowledge of the client and the client's business. The Company has an appraisal policy in which appraisals are obtained upon a loan being downgraded on the Company's internal loan rating scale to a 5 (special mention) or a 6 (substandard) depending on the amount of the loan, the type of loan and the type of collateral. All impaired loans are either graded a 6 or 7 on the internal loan rating scale. Subsequent to the downgrade, if the loan remains outstanding and impaired for at least one year more, management may require another follow-up appraisal. Between receipts of updated appraisals, if necessary, management may perform an internal valuation based on any known changing conditions in the marketplace such as sales of similar properties, a change in the condition of the collateral, or feedback from local appraisers. Impaired loans had a gross value of \$12.7 million, with a valuation allowance of \$1.1 million, at September 30, 2011, compared with a gross value of \$9.3 million, with a valuation allowance of \$1.5 million, at December 31, 2010.

**FAIR VALUE OF FINANCIAL INSTRUMENTS**

At September 30, 2011 and December 31, 2010, the estimated fair values of the Company's financial instruments, including those that are not measured and reported at fair value on a recurring basis or nonrecurring basis, were as follows:

**Table of Contents**

	September 30, 2011		December 31, 2010	
	Carrying Amount	Fair Value	Carrying Amount	Fair Value
	(in thousands)		(in thousands)	
<b>Financial assets:</b>				
Cash and cash equivalents	\$ 30,369	\$ 30,369	\$ 13,722	\$ 13,722
Available for sale securities	91,782	91,782	87,422	87,422
Held to maturity securities	2,400	2,416	2,140	2,130
FHLB and FRB stock	3,255	3,255	3,770	3,770
Loans and leases, net	557,867	583,401	517,554	535,338
Mortgage servicing rights	353	353	388	388
<b>Financial liabilities:</b>				
Deposits	\$ 613,238	\$ 616,660	\$ 544,457	\$ 544,889
Other borrowed funds and securities sold under agreements to repurchase	27,831	28,910	40,896	41,710
Junior subordinated debentures	11,330	11,330	11,330	11,330
Commitments to extend credit	199	199	120	120

The following methods and assumptions were used to estimate the fair value of each class of financial instruments for which it is practical to estimate that value:

**Cash and Cash Equivalents.** For these short-term instruments, the carrying amount is a reasonable estimate of fair value. Cash and Cash Equivalents includes interest-bearing deposits at other banks.

**Securities available for sale.** Fair values for available-for-sale securities are determined using independent pricing services and market-participating brokers. The pricing service and brokers use a variety of techniques to arrive at fair value including market maker bids, quotes, and pricing models. Inputs to their pricing models include recent trades, benchmark interest rates, spreads, and actual and projected cash flows. Management obtains a single market quote or price estimate for each security. These quoted prices reflect current information based on orderly transactions. These are considered Level 2 inputs under ASC Topic 820.

**Securities held to maturity.** The Company holds certain municipal bonds as held-to-maturity. These bonds are generally small in dollar amount and are issued only by certain local municipalities within the Company's market area. The original terms are negotiated directly and on an individual basis consistent with our loan and credit guidelines. These bonds are not traded on the open market and management intends to hold the bonds to maturity. The fair value of held-to-maturity securities is estimated by discounting the future cash flows using the current rates at which similar agreements would be made with municipalities with similar credit ratings and for the same remaining maturities.

**FHLB and FRB stock.** The carrying value of FHLB and FRB stock approximate fair value.

**Loans and Leases, net.** The fair value of fixed rate loans is estimated by discounting the future cash flows using the current rates at which similar loans would be made to borrowers with similar credit ratings and for the same remaining maturities, net of the appropriate portion of the allowance for loan losses. For variable rate loans, the carrying amount is a reasonable estimate of fair value. This fair value calculation is not necessarily indicative of the exit price, as defined in ASC Topic 820.

**Mortgage servicing rights.** Mortgage servicing rights do not trade in an active, open market with readily observable prices. Accordingly, the Company obtains the fair value of the MSR's using a third-party pricing provider. The provider uses a combination of market and income valuation methodologies. All assumptions are market driven.

**Deposits.** The fair value of demand deposits, NOW accounts, muni-vest accounts and regular savings accounts is the amount payable on demand at the reporting date. The fair value of time deposits is estimated using the rates currently offered for deposits of similar remaining maturities.

---

**Table of Contents**

**Other Borrowed Funds and Securities Sold Under Agreement to Repurchase.** The fair value of the short-term portion of other borrowed funds approximates its carrying value. The fair value of the long-term portion of other borrowed funds is estimated using a discounted cash flow analysis based on the Company's current incremental borrowing rates for similar types of borrowing arrangements.

**Junior Subordinated Debentures.** The carrying amount of Junior Subordinated Debentures is a reasonable estimate of fair value due to the fact that they bear a floating interest rate that adjusts on a quarterly basis.

**Commitments to extend credit and standby letters of credit.** As described in Note 7 Contingent Liabilities and Commitments to these Unaudited Consolidated Financial Statements, the Company was a party to financial instruments with off-balance sheet risk at September 30, 2011 and December 31, 2010. Such financial instruments consist of commitments to extend permanent financing and letters of credit. If the options are exercised by the prospective borrowers, these financial instruments will become interest-earning assets of the Company. If the options expire, the Company retains any fees paid by the counterparty in order to obtain the commitment or guarantee. The fees collected for these commitments are recorded as unearned commitment fees in Other Liabilities. The carrying value approximates the fair value.

**4. LOANS, LEASES, AND THE ALLOWANCE FOR LOAN AND LEASE LOSSES**

**Loans**

Loans that management has the intent and ability to hold for the foreseeable future, or until maturity or pay-off, generally are reported at their outstanding unpaid principal balances adjusted for unamortized deferred fees or costs. Interest income is accrued on the unpaid principal balance and is recognized using the interest method. Loan origination fees, net of certain direct origination costs, are deferred and recognized as an adjustment of the related loan yield using the effective yield method of accounting.

Loans become past due when the payment date has been missed. If payment has not been received within 30 days, then the loan is delinquent. Delinquent loans are placed into three categories; 30-59 days past due, 60-89 days past due, or 90+ days past due. Loans 90 or more days past due are considered non-performing.

The accrual of interest on loans is discontinued at the time the loan is 90 days delinquent, unless the credit is well secured and in process of collection. If the credit is not well secured and in the process of collection, the loan is placed on non-accrual status and is subject to charge-off if collection of principal or interest is considered doubtful.

All interest due but not collected for loans that are placed on non-accrual status or charged off is reversed against interest income. The interest on these loans is accounted for on the cost-recovery method, until it again qualifies for an accrual basis. Any cash receipts on non-accrual loans reduce the carrying value of the loans. Loans are returned to accrual status when all principal and interest amounts contractually due are brought current, the adverse circumstances which resulted in the delinquent payment status are resolved, and payments are made in a timely manner for a period of time sufficient to reasonably assure their future dependability. At a minimum, this period of time is at least six months.

The Bank considers a loan impaired when, based on current information and events, it is probable that it will be unable to collect principal or interest due according to the contractual terms of the loan. Commercial mortgage, commercial and industrial ( C&I ), and large balance leases (greater than \$50,000) are identified for evaluation and individually considered impaired. These loans and leases are assessed for any impairment. Loan impairment is measured based on the present value of expected cash flows discounted at the loan's effective interest rate or, as a practical expedient, at the loan's observable market price or the fair value of the collateral if the loan is collateral dependent. Consumer loans and smaller balance leases are collectively evaluated for impairment. Since these loans and leases are not individually identified and evaluated, they are not considered impaired loans. The one exception is for consumer loans and smaller balance direct financing leases that are considered troubled debt restructurings ( TDR ) since all TDR loans and leases are considered impaired.

The Bank monitors the credit risk in its loan portfolio by reviewing certain credit quality indicators ( CQI ). The

---

**Table of Contents**

primary CQI for its commercial mortgage and C&I portfolios is the individual loan's credit risk rating. The following list provides a description of the credit risk ratings that are used internally by the Bank when assessing the adequacy of its allowance for loan and lease losses:

1-3-Pass: Risk Rated 1-3 loans are loans with a slight risk of loss. The loan is secured by collateral of sufficient value to cover the loan by an acceptable margin. The financial statements of the company demonstrate sufficient net worth and repayment ability. The company has established an acceptable credit history with the bank and typically has a proven track record of performance. Management is experienced, and has an at least average ability to manage the company. The industry has an average or less than average susceptibility to wide fluctuations in business cycles.

This risk rating includes all accruing consumer loans, including residential mortgages and home equities, that are less than 60 days past due.

4-Watch: Although generally acceptable, a higher degree of risk is evident in these watch credits. Obligor assessment factors may have elements which reflect marginally acceptable conditions warranting more careful review and analysis and monitoring.

The obligor's balance sheet reflects generally acceptable asset quality with some elements weak or marginally acceptable. Liquidity may be somewhat strained, but is at an acceptable level to support operations. Obligor may be fully leveraged with ratios higher than industry averages. High leverage is negatively impacting the company, leaving it vulnerable to adverse change. Inconsistent or declining capability to service existing debt requirements evidenced by debt service coverage temporarily below or near acceptable level. The margin of collateral may be adequate, but declining or fluctuating in value. Company management may be unproven, but capable. Rapid expansion or acquisition may increase leverage or reduce cash flow.

Negative industry conditions or weaker management could also be characteristic. Proper consideration should be given to companies in a high growth phase or in development business segments that may not have achieved sustainable earnings.

Obligors demonstrate sufficient financial flexibility to react to and positively address the root cause of the adverse financial trends without significant deviations from their current business strategy. The rating is also used for borrowers that have made significant progress in resolving their financial weaknesses.

5-O.A.E.M. (Other Assets Especially Mentioned): Special Mention ( SM ) A special mention asset has potential weaknesses that warrant management's close attention. If left uncorrected, these potential weaknesses may result in deterioration of the repayment prospects for the asset or in the institution's credit position at some future date. SM assets are not adversely classified and do not expose an institution to sufficient risk to warrant adverse classification.

SM assets have potential weaknesses that may, if not checked or corrected, weaken the asset or inadequately protect the institution's position at some future date. These assets pose elevated risk, but their weakness does not yet justify a substandard classification. Borrowers may be experiencing adverse operating trends (declining revenues or margins) or an ill proportioned balance sheet (e.g. increasing inventory without an increase in sales, high leverage, tight liquidity).

Adverse economic or market conditions, such as interest rate increases or the entry of a new competitor, may also support a special mention rating.

Nonfinancial reasons for rating a credit exposure special mention include management problems, pending litigation, an ineffective loan agreement or other material structural weakness, and any other significant deviation from prudent lending practices.

The SM rating is designed to identify a specific level of risk and concern about asset quality. Although an

## **Table of Contents**

SM asset has a higher probability of default than a pass asset, its default is not imminent.

This risk rating includes the pool of consumer loans, including residential mortgages and home equities, that are 60-89 days past due.

6-Substandard: A substandard asset is inadequately protected by the current sound worth and paying capacity of the obligor or of the collateral pledged, if any. Assets so classified must have a well-defined weakness, or weaknesses, that jeopardize the liquidation of the debt. They are characterized by the distinct possibility that the bank will sustain some loss if the deficiencies are not corrected.

Substandard assets have a high probability of payment default, or they have other well-defined weaknesses. They require more intensive supervision by bank management.

Substandard assets are generally characterized by current or expected unprofitable operations, inadequate debt service coverage, inadequate liquidity, or marginal capitalization. Repayment may depend on collateral or other credit risk subsidies. For some substandard assets, the likelihood of full collection of interest and principal may be in doubt; such assets should be placed on non-accrual. Although substandard assets in the aggregate will have distinct potential for loss, an individual asset's loss potential does not have to be distinct for the asset to be rated substandard. These loans are periodically reviewed and tested for impairment.

This risk rating includes the pool of consumer loans, including residential mortgages and home equities, that are 90 or more days past due or in non-accrual status.

7-Doubtful: An asset classified doubtful has all the weaknesses inherent in one classified substandard with the added characteristic that the weaknesses make collection or liquidation in full, on the basis of currently existing facts, conditions, and values, highly questionable and improbable.

A doubtful asset has a high probability of total or substantial loss, but because of specific pending events that may strengthen the asset, its classification of loss is deferred.

Doubtful borrowers are usually in default, lack adequate liquidity or capital, and lack the resources necessary to remain an operating entity. Pending events can include mergers, acquisitions, liquidations, capital injections, the perfection of liens on additional collateral, the valuation of collateral, and refinancing.

Generally, pending events should be resolved within a relatively short period and the ratings will be adjusted based on the new information. Because of high probability of loss, non-accrual accounting treatment is required for doubtful assets.

8-Loss: Assets classified loss are considered uncollectable and of such little value that their continuance as bankable assets is not warranted. This classification does not mean that the assets have absolutely no recovery or salvage value, but rather that it is not practical or desirable to defer writing off this basically worthless asset even though partial recovery may be achieved in the future.

With loss assets, the underlying borrowers are often in bankruptcy, have formally suspended debt repayments, or have otherwise ceased normal business operations. Once an asset is classified loss, there is little prospect of collecting either its principal or interest. When access to collateral, rather than the value of the collateral, is a problem, a less severe classification may be appropriate. However, management should not maintain an asset on the balance sheet if realizing its value would require long-term litigation or other lengthy recovery efforts. Losses are to be recorded in the period an obligation becomes uncollectible.

## **Leases**

The Bank's leasing operations consist principally of the leasing of various types of small ticket commercial

**Table of Contents**

equipment. The Company follows ASC Topic 840, Leases, for all of its direct financing leases. The net investment in direct financing leases is the sum of all minimum lease payments and estimated residual values, less unearned income, net of the remaining mark. In the third quarter of 2009, the Company announced its intention to sell the leasing portfolio. As a result, the Company classified the leasing portfolio as held-for-sale and marked the portfolio down to its fair market value as of June 30, 2009. As of September 30, 2009, management decided to service the portfolio to maturity. As a result, the portfolio was transferred to held-for-investment. The carrying value of the leasing portfolio amounted to \$7.8 million and \$15.5 million at September 30, 2011 and December 31, 2010, respectively. The CQI used for leases are delinquency and accruing status. The leasing CQI s are discussed in more detail in the *Credit Quality Indicators* section of this footnote.

**Loan and Lease Portfolio Composition**

The following table presents selected information on the composition of the Company s loan and lease portfolio as of the dates indicated:

	September 30, 2011	December 31, 2010
	(in thousands)	
Mortgage loans on real estate:		
Residential mortgages	\$ 70,430	\$ 69,958
Commercial and multi-family	288,808	261,371
Construction residential	2,572	1,320
Construction commercial	30,481	32,332
Home equities	54,618	53,120
<b>Total real estate loans</b>	<b>446,909</b>	<b>418,101</b>

*Residential Mortgages:* The Company originates adjustable-rate and fixed-rate, one-to-four-family residential real estate loans for the construction, purchase or refinancing of a mortgage. These loans are collateralized by owner-occupied properties located in the Company s market area. They are amortized over 10 to 30 years. Loans on one-to-four-family residential real estate are mostly originated in amounts of no more than 80% of appraised value or have private mortgage insurance. Mortgage title insurance and hazard insurance are normally required. Construction loans have a unique risk because they are secured by an incomplete dwelling.

Due to the lack of foreclosure activity and absence of any ongoing litigation, the Company has no accrual for loss contingencies or potential costs associated with foreclosure-related activities.

The Bank sells certain fixed rate residential mortgages to FNMA, while maintaining the servicing rights for those mortgages. During the three month period ended September 30, 2011, the Bank sold mortgages to FNMA totaling \$2.6 million, as compared with \$2.8 million sold during the three month period ended September 30, 2010. During the nine month period ended September 30, 2011, the Bank sold mortgages to FNMA totaling \$15.8 million, as compared with \$7.6 million during the nine month period ended September 30, 2010. At September 30, 2011, the Bank had a loan servicing portfolio principal balance of \$55.8 million upon which it earns servicing fees, as compared with \$54.6 million at June 30, 2011 and \$44.2 million at December 31, 2010. The value of the mortgage

**Table of Contents**

servicing rights for that portfolio was \$0.4 million at September 30, 2011, June 30, 2011, and December 31, 2010. Residential mortgage loans held-for-sale were \$1.7 million at September 30, 2011 compared with \$0 at June 30, 2011 and \$2.9 million at December 31, 2010. The Company has never been contacted by FNMA to repurchase any loans due to improper documentation or fraud and no reserve for FNMA repurchases has been recorded.

*Commercial and Multi-Family Mortgages:* Commercial real estate loans are made to finance the purchases of real estate with completed structures or those in the midst of being constructed. These commercial real estate loans are secured by first liens on the real estate, which may include apartments, hotels, retail stores or plazas, healthcare facilities, and other non-owner-occupied facilities. These loans are less risky than commercial and industrial loans, since they are secured by real estate and buildings. The Company offers commercial mortgage loans with up to an 80% LTV ratio for up to 20 years on a variable and fixed rate basis. Many of these mortgage loans either mature or are subject to a rate call after three to five years. The Company's underwriting analysis includes credit verification, independent appraisals, a review of the borrower's financial condition, and the underlying cash flows. These loans are typically originated in amounts of no more than 80% of the appraised value of the property. Construction loans have a unique risk because they are secured by an incomplete dwelling.

*Home Equities:* The Company originates home equity lines of credit and second mortgage loans (loans secured by a second lien position on owner-occupied one-to-four-family residential real estate). These loans carry a higher risk than first mortgage residential loans as they are in a second position relating to collateral. Risk is reduced through underwriting criteria, which include credit verification, appraisals, a review of the borrower's financial condition, and personal cash flows. A security interest, with title insurance when necessary, is taken in the underlying real estate.

*Direct Financing Leases:* From January 2005 to April 2009 the Company originated direct financing leases of commercial small-ticket general business equipment to companies located throughout the United States. These leases carry a high risk of loss. As a result of the increase in credit risks, poor performance in the portfolio, the lack of strategic fit with the Company's community banking philosophy, and with the intention of reallocating capital back to its core business, management announced its exit from the national leasing business in April 2009. As a result of management's decision to sell the portfolio a mark-to-market adjustment of \$7.2 million was made on June 30, 2009. The mark was charged off against the allowance. The portfolio was subsequently placed back into held-for-investment as of September 30, 2009 after management determined that a greater value for the portfolio would be realized by keeping it and servicing it to maturity rather than selling it. The portfolio was re-classified as held-for-investment using the same \$7.2 million mark. Since that time, leases that are determined to have zero value have been applied to the remaining mark, rather than charged off through the allowance. In addition to the remaining mark, there is an allowance for lease losses of \$1.2 million at September 30, 2011.

*Commercial and Industrial Loans:* These loans generally include term loans and lines of credit. Such loans are made available to businesses for working capital (including inventory and receivables), business expansion (including acquisition of real estate, expansion and improvements) and equipment purchases. As a general practice, a collateral lien is placed on equipment or other assets owned by the borrower. These loans carry a higher risk than commercial real estate loans due to the nature of the underlying collateral, which typically consist of business assets such as equipment and accounts receivable. To reduce the risk, management also attempts to secure real estate as collateral and obtain personal guarantees of the borrowers. To further reduce risk and enhance liquidity, these loans generally carry variable rates of interest, re-pricing in three- to five-year periods, and have a maturity of ten years or less. Lines of credit generally carry floating rates of interest (e.g., prime plus a margin).

*Consumer Loans:* The Company funds a variety of consumer loans, including direct automobile loans, recreational vehicle loans, boat loans, aircraft loans, home improvement loans, and personal loans (collateralized and uncollateralized). Most of these loans carry a fixed rate of interest with principal repayment terms typically ranging up to five years, based upon the nature of the collateral and the size of the loan. The majority of consumer loans are underwritten on a secured basis using the underlying collateral being financed. A minimal amount of loans are unsecured, which carry a high risk of loss.

*Other Loans:* These loans include \$1.5 million and \$0.3 million at September 30, 2011 and December 31, 2010, respectively, of overdrawn deposit accounts classified as loans.

The Company's risk ratings are monitored by the individual relationship managers and changed as deemed appropriate after receiving updated financial information from the borrowers or deterioration or improvement in the performance of a loan is evident in the customer's payment history. Each commercial relationship is individually assigned a risk rating. The Company also maintains a loan review process that monitors the management of the Company's commercial loan portfolio by the relationship managers. The Company's loan review function reviews at least 40% of the commercial and commercial mortgage portfolio annually.

The Company's consumer loans, including residential mortgages and home equity loans, are not individually risk rated or reviewed in the Company's loan review process. Consumers, unlike commercial customers, are not required to provide the Company with updated financial information. Consumer loans are also smaller in balances. Given the lack of updated information since the initial underwriting of the loan and small size of individual loans, the Company uses the delinquency status as the credit quality indicator for consumer loans. The delinquency table is shown below. The Company does not lend to sub-prime borrowers. Unless the loan is well secured and in the process of collection, all consumer loans that are more than 90 days past due are placed in non-accrual status.

Similar to consumer loans, direct financing leases are evaluated in pools according to delinquency and accruing status rather than assigned risk ratings. Given the comparable lower credit quality of the leasing portfolio, leases are rarely kept in accruing status beyond 30 days past due. Non-accrual leases are assigned a reserve percentage based

**Table of Contents**

on the historical loss history of the Company's non-accrual lease portfolio. Evaluating non-accruing leases as a pool is appropriate as they are small-balance and homogeneous in nature. On a quarterly basis, large leases (defined as leases greater than \$50,000 in balances) are evaluated for any deterioration not readily apparent through payment performance. If any risk factors become apparent during the review such as deteriorating financial performance for the customer's business or requests for a restructuring from the original terms of the contract, management places those large leases that are performing from a payment perspective but have some indications of credit deterioration into a second pool. These large leases with additional risk are assigned a reserve percentage reflective of the additional risk characteristics while taking into account the adequate payment performance. The Company performs specific impairment tests for two large leases because they contain significantly different risk characteristics than the remaining leasing portfolio. One of the leases is with a local borrower with whom the Bank has a developed relationship and a restructuring plan is in place. The second lease is with a large public company that declared bankruptcy in the fourth quarter of 2010. The Bank is considered a secured creditor in the bankruptcy and has received payments as scheduled in 2011. While the two large leases have characteristics of troubled credits and are classified as nonaccrual, management does not believe these two leases have similar characteristics as compared with the remaining lease portfolio. Management believes appropriate reserves have been established on an individual basis for the two leases. All other leases are placed in a third pool and assigned a reserve percentage commensurate with the credit history of the Company's leasing portfolio, delinquency trends, non-accrual trends, charge-off trends, and general macro-economic factors.

**Past Due Loans and Leases**
