The ExOne Company and Subsidiaries

Notes to the Condensed Consolidated Financial Statements (Unaudited)

(dollars in thousands, except per-share and share amounts)

Note 1. Basis of Presentation and Principles of Consolidation

Organization

The ExOne Company (ExOne) is a corporation organized under the laws of the state of Delaware. ExOne was formed on January 1, 2013, when The Ex One Company, LLC, a Delaware limited liability company, merged with and into a Delaware corporation, which survived and changed its name to The ExOne Company (the Reorganization). As a result of the Reorganization, The Ex One Company, LLC became ExOne, the common and preferred interest holders of The Ex One Company, LLC became holders of common stock and preferred stock, respectively, of ExOne, and the subsidiaries of The Ex One Company, LLC became the subsidiaries of ExOne.

On February 6, 2013, the Company commenced an initial public offering of 6,095,000 shares of its common stock at a price to the public of \$18.00 per share, of which 5,483,333 shares were sold by the Company and 611,667 were sold by a selling stockholder (including consideration of the exercise of the underwriters over-allotment option). Following completion of the offering on February 12, 2013, the Company received net proceeds of approximately \$91,996 (net of underwriting commissions).

On September 9, 2013, the Company commenced a secondary public offering of 3,054,400 shares of its common stock at a price to the public of \$62.00 per share, of which 1,106,000 shares were sold by the Company and 1,948,400 were sold by selling stockholders (including consideration of the exercise of the underwriters over-allotment option). Following completion of the offering on September 13, 2013, the Company received net proceeds of approximately \$65,315 (net of underwriting commissions).

The condensed consolidated financial statements include the accounts of ExOne, its wholly-owned subsidiaries, ExOne Americas LLC (United States), ExOne GmbH (Germany), ExOne KK (Japan); effective in August 2013, ExOne Property GmbH (Germany); effective in March 2014, MWT Gesellschaft für Industrielle Mikrowellentechnik mbH (Germany); and through March 27, 2013 (see further description below) two variable interest entities (VIEs) in which ExOne was identified as the primary beneficiary, Lone Star Metal Fabrication, LLC (Lone Star) and Troy Metal Fabricating, LLC (TMF). Collectively, the consolidated group is referred to as the Company .

At December 31, 2012, and through March 27, 2013, ExOne leased property and equipment from Lone Star and TMF. ExOne did not have an ownership interest in Lone Star or TMF and the assets of Lone Star and TMF could only be used to settle obligations of Lone Star and TMF. ExOne was identified as the primary beneficiary of Lone Star and TMF in accordance with guidance issued by the Financial Accounting Standards Board (FASB) on the consolidation of VIEs, as ExOne guaranteed certain long-term debt of both Lone Star and TMF and governed these entities through common ownership. FASB guidance requires certain VIEs to be consolidated when an enterprise has the power to direct the activities of the VIE that most significantly impact VIE economic performance and who has the obligation to absorb losses or the right to receive benefits of the VIE that could potentially be significant to the VIE. The condensed consolidated financial statements therefore include the accounts of Lone Star and TMF through March 27, 2013.

On March 27, 2013, ExOne Americas LLC acquired certain assets, including property and equipment (principally land, buildings and machinery and equipment) held by the two VIEs, and assumed all outstanding debt of such VIEs.

Following this transaction, neither of the entities continued to meet the definition of a VIE with respect to ExOne, and as a result, the remaining assets and liabilities of both entities were deconsolidated following the transaction.

The condensed consolidated financial statements of the Company are unaudited. The condensed consolidated financial statements include all adjustments, consisting of normal recurring adjustments, considered necessary by management to fairly state the results of operations, financial position and cash flows of the Company. All material intercompany transactions and balances have been eliminated in consolidation. The results reported in these condensed consolidated financial statements are not necessarily indicative of the results that may be expected for the entire year. The December 31, 2013 condensed consolidated balance sheet data was derived from the audited financial statements but does not include all disclosures required by accounting principles generally accepted in the United States of America (GAAP). This Quarterly Report on Form 10-Q should be read in connection with the Company's Annual Report on Form 10-K for the year ended December 31, 2013, which includes all disclosures required by GAAP.

Liquidity

The Company has incurred net losses of approximately \$6,317, \$9,688, and \$7,617 for the years ended December 31, 2013, 2012 and 2011, respectively. As shown in the accompanying condensed consolidated financial statements, the Company incurred a net loss of approximately \$5,527 for the quarter ended March 31, 2014. Prior to Reorganization the Company operated as a limited liability company and was substantially supported by the continued financial support provided by its majority member. As noted above, in connection with the completion of its initial public offering and secondary public offering in 2013, the Company received unrestricted net proceeds from the sale of its common stock of approximately \$157,311. Management believes that the unrestricted net proceeds obtained through these transactions will be sufficient to support the Company's operations through April 1, 2015.

Recently Adopted Accounting Guidance

On January 1, 2014, the Company adopted FASB guidance changing the requirements of the Company's reporting of amounts reclassified out of accumulated other comprehensive income (loss). These changes require an entity to report the effect of significant reclassifications out of accumulated other comprehensive income (loss) on the respective line items in net income (loss) if the amount being reclassified is required to be reclassified in its entirety to net income (loss). For other amounts that are not required to be reclassified in their entirety to net income (loss) in the same reporting period, an entity is required to cross-reference other disclosures that provide additional detail about those amounts. These requirements are to be applied to each component of accumulated other comprehensive income (loss). Other than additional disclosure requirements, the adoption of these changes did not have a significant impact on the condensed consolidated financial statements of the Company.

Note 2. Accumulated Other Comprehensive Loss

The following table summarizes changes in the components of accumulated other comprehensive loss:

	Quarter Ended March 31,	
	2014	2013
Foreign currency translation adjustments		
Balance at beginning of period	\$ (352)	\$ (174)
Other comprehensive income (loss)*	112	(141)
Balance at end of period	\$ (240)	\$ (315)

* There were no tax impacts related to income tax rate changes and no amounts were reclassified to earnings for either of the periods presented.

Note 3. Earnings Per Share

The Company presents basic and diluted loss per common share amounts. Basic loss per share is calculated by dividing net loss available to ExOne common shareholders by the weighted average number of common shares outstanding during the applicable period. Diluted loss per share is calculated by dividing net loss available to ExOne common shareholders by the weighted average number of common shares and common equivalent shares outstanding during the applicable period.

The weighted average shares outstanding for the quarter ended March 31, 2013, include (i) the exchange of common units in the former limited liability company for common shares in the Company on a 0.58:1.00 basis in connection with the Reorganization of the Company on January 1, 2013, (ii) the issuance of 5,483,333 common shares in connection with the commencement of the initial public offering of the Company on February 6, 2013, and (iii) the conversion of preferred shares to common shares in the Company on a 9.5:1.0 basis in connection with the closing of the initial public offering of the Company on February 12, 2013. The weighted average shares outstanding for the quarter ended March 31, 2014, additionally include (i) the issuance of 1,106,000 common shares in connection with the commencement of the secondary public offering of the Company on September 9, 2013 (ii) the annual vesting of 10,000 shares of restricted stock on March 11, 2014, (iii) the issuance of 5,000 shares of common stock to the independent members of the Board of Directors in the form of a stock bonus award on March 20, 2014 and (iv) the

issuance of 17,696 shares of common stock during the quarter ended March 31, 2014, as a result of employee exercises of incentive stock options.

As ExOne incurred a net loss during each of the quarters ended March 31, 2014 and 2013, basic average shares outstanding and diluted average shares outstanding were the same because the effect of potential shares of common stock, including incentive stock options (155,637) and unvested restricted stock issued (25,834), was anti-dilutive.

The information used to compute basic and diluted net loss attributable to ExOne per common share was as follows:

	Quarter Ended March 31,	
	2014	2013
Net loss attributable to ExOne	\$ (5,527)	\$ (1,914)
Less: Preferred stock dividends declared		(152)
Net loss available to ExOne common shareholders	\$ (5,527)	\$ (2,066)
Weighted average shares outstanding (basic and diluted)	14,392,403	10,094,821
Net loss attributable to ExOne per common share:		
Basic	\$ (0.38)	\$ (0.20)
Diluted	\$ (0.38)	\$ (0.20)

Note 4. Acquisitions

MAM

On March 3, 2014, the Company, through its wholly-owned subsidiary ExOne Americas LLC, entered into an Asset Purchase Agreement to acquire (i) substantially all the assets of Machin-A-Mation Corporation (MAM), a specialty machine shop located in Chesterfield, Michigan, and (ii) the real property on which the MAM business is located from Metal Links, LLC, a Michigan limited liability company. The total purchase price was approximately \$4,995, which includes approximately \$4,618 in cash and \$377 in contingent consideration in the form of a two-year earn-out provision. The two-year earn-out provision is based on a combination of achievement of revenues and gross profit for the acquired business for which the Company assumed full achievement of both targets for each of the respective years on the date of acquisition.

The following table summarizes the preliminary allocation of purchase price:

Accounts receivable	\$ 222
Inventories	246
Prepaid expenses and other current assets	15
Property and equipment	2,491
Intangible assets	200
Goodwill	2,261
Total assets	5,435
Accounts payable	49
Accrued expenses and other current liabilities	53
Long-term debt	338
Total liabilities	440
Total purchase price	\$ 4,995

The Company estimates that all of the goodwill associated with the MAM acquisition will be deductible for income tax purposes. Goodwill associated with the MAM acquisition relates principally to the complementary nature of the assets acquired in relation to the existing business held by the Company in Troy, Michigan, the combination of which is expected to further enhance the post-printing capabilities of ExOne. As the Company operates as a single operating segment (also a single reporting unit), there is no further assignment of goodwill to a reportable segment.

Intangible assets identified by the Company as part of its preliminary allocation of purchase price include customer relationships which are to be amortized over a period of five years. Intangible assets are included in other noncurrent assets in the condensed consolidated balance sheets. The Company is in the process of evaluating the MAM acquisition for identification of additional intangible assets in finalizing its purchase price allocation. The Company expects to complete its purchase accounting exercise by the end of 2014.

Immediately following the completion of the MAM acquisition, the Company elected to repay all of the long-term debt assumed as part of the transaction. Prepayment penalties associated with this repayment were not significant and no gain or loss was recorded by the Company.

The Company incurred total acquisition-related expenses of approximately \$80 in connection with the MAM acquisition, of which \$68 was recognized by the Company during the quarter ended March 31, 2014 (the remainder recognized during the year ended December 31, 2013). Acquisition-related expenses are expensed as incurred in accordance with FASB guidance associated with business combination activities, with amounts included in selling, general and administrative expenses in the condensed statement of consolidated operations and comprehensive loss.

The results of operations and pro forma effects of the MAM acquisition are not significant relative to the Company and as such, have been omitted.

MWT

On March 6, 2014, the Company, through its wholly-owned subsidiary ExOne GmbH, entered into a Purchase and Assignment Contract to acquire all of the shares of MWT - Gesellschaft für Industrielle Mikrowellentechnik mbH (MWT), a pioneer in industrial-grade microwaves with design and manufacturing experience based in Elz, Germany. The total purchase price was approximately 3,557 (\$4,891), which includes approximately 3,500 (\$4,813) in cash and approximately 57 (\$78) in other net liabilities settled at the date of acquisition.

The following table summarizes the preliminary allocation of purchase price:

Cash and cash equivalents	\$ 201
Accounts receivable	1
Inventories	525
Prepaid expenses and other current assets	29
Property and equipment	25
Goodwill	4,842
Total assets	5,623
Accounts payable	127
Accrued expenses and other current liabilities	605
Total liabilities	732
Total purchase price	\$ 4,891

None of the goodwill associated with the MWT acquisition will be deductible for income tax purposes. Goodwill associated with the MWT acquisition relates principally to the complementary nature of the industrial microwave technologies acquired in relation to the existing business held by the Company in Augsburg, Germany, the combination of which is expected to further enhance the post-printing capabilities of ExOne. As the Company operates as a single operating segment (also a single reporting unit), there is no further assignment of goodwill to a reportable segment.

The Company is in the process of evaluating the MWT acquisition for identification of intangible assets in finalizing its purchase price allocation. The Company expects to complete its purchase accounting exercise by the end of 2014.

The Company incurred total acquisition-related expenses of approximately \$141 in connection with the MWT acquisition, of which \$136 was recognized by the Company during the quarter ended March 31, 2014 (the remainder recognized during the year ended December 31, 2013). Acquisition-related expenses are expensed as incurred in accordance with FASB guidance associated with business combination activities, with amounts included in selling, general and administrative expenses in the condensed statement of consolidated operations and comprehensive loss.

The results of operations and pro forma effects of the MWT acquisition are not significant relative to the Company and as such, have been omitted.

Goodwill

Goodwill represents the excess of purchase price over the fair value of identifiable net assets of acquired entities. Goodwill is not amortized; instead, it is reviewed for impairment annually or more frequently if indicators of impairment exist (a triggering event) or if a decision is made to sell or exit a business. A significant amount of judgment is involved in determining if an indicator of impairment has occurred. Such indicators may include deterioration in general economic conditions, negative developments in equity and credit markets, adverse changes in the markets in which an entity operates, increases in input costs that have a negative effect on earnings and cash flows, or a trend of negative or declining cash flows, among others.

Goodwill is allocated among and evaluated for impairment at the reporting unit level, which is defined as an operating segment or one level below an operating segment. The Company operates as both a single operating segment and reporting unit.

In reviewing goodwill for impairment, an entity has the option to first assess qualitative factors to determine whether the existence of events or circumstances leads to a determination that it is more likely than not (greater than 50%) that the estimated fair value of a reporting unit is less than its carrying amount. If an entity elects to perform a qualitative assessment and determines that an impairment is more likely than not, the entity is then required to perform a two-step quantitative impairment test (described below), otherwise no further analysis is required however, it will continue to be evaluated at least annually as described above. An entity also may elect not to perform the qualitative assessment and, instead, proceed directly to the two-step quantitative impairment test. The ultimate outcome of the goodwill impairment review for a reporting unit should be the same whether an entity chooses to perform the qualitative assessment or proceeds directly to the two-step quantitative impairment test.

Under the qualitative assessment, various events and circumstances (or factors) that would affect the estimated fair value of a reporting unit are identified (similar to impairment indicators above). These factors are then classified by the type of impact they would have on the estimated fair value using positive, neutral, and adverse categories based on current business conditions. Additionally, an assessment of the level of impact that a particular factor would have on the estimated fair value is determined using high, medium, and low weighting.

Under the two-step quantitative impairment test, the evaluation of impairment involves comparing the current fair value a reporting unit to its carrying value, including goodwill (step 1). The Company plans to use a discounted cash flow model to estimate the fair value of its reporting unit when testing for impairment, as management believes forecasted cash flows are the best indicator of such fair value. A number of significant assumptions and estimates are involved in the application of the discounted cash flow model to forecast operating cash flows, including, sales volumes and prices, production and other operating costs, effective tax rates, capital spending, discount rate, and working capital changes. Cash flow forecasts are generally based on approved operating plans for the current year in combination with future forecasts of profitability.

In the event the estimated fair value of a reporting unit per the discounted cash flow model is less than the carrying value (step 1), additional analysis would be required (step 2). The additional analysis (step 2) would compare the carrying amount of the reporting unit's goodwill with the implied fair value of that goodwill, which may involve the use of valuation experts. The implied fair value of goodwill is the excess of the fair value of the reporting unit over the fair value amounts assigned to all of the assets and liabilities of that unit as if the reporting unit was acquired in a business combination and the fair value of the reporting unit represented the purchase price. If the carrying value of goodwill exceeds its implied fair value, an impairment loss equal to such excess would be recognized, which could significantly and adversely impact reported results of operations.

The Company plans to complete its initial annual test of impairment related to goodwill during its fourth fiscal quarter absent indicators (a trigger event) requiring an earlier test to be performed. There were no such indicators identified during the quarter ended March 31, 2014.

Contingent Consideration

The Company records contingent consideration resulting from a business combination at its fair value on the date of acquisition. Each reporting period thereafter, the Company revalues these obligations and records increases or decreases in their fair value as a charge (credit) to selling, general and administrative costs within the condensed statement of consolidated operations and comprehensive loss. Changes in the fair value of contingent consideration obligations can result from adjustments to (i) forecast revenues, profitability or a combination thereto or (ii) discount rates. These fair value measurements represent Level 3 measurements, as they are based on significant unobservable inputs.

Related to contingent consideration issued in connection with the MAM acquisition, there were no changes in fair value between the date of acquisition and March 31, 2014, and as such, no amount (charge or credit) has been recorded by the Company.

Acquisition of Net Assets of VIEs

On March 27, 2013, ExOne Americas LLC acquired certain assets, including property and equipment (principally land, buildings and machinery and equipment) held by two VIEs of the Company, TMF and Lone Star, and assumed all outstanding debt of such VIEs.

Payments of approximately \$1,900 and \$200 were made to TMF and Lone Star, respectively, including a return of capital to the entities of approximately \$1,400. As the parties subject to this transaction were determined to be under common control, property and equipment acquired in the transaction were recorded at their net carrying value on the date of acquisition (approximately \$5,400) similar to a pooling-of-interests. As the VIEs were consolidated by the Company in previous periods, no material differences exist due to the change in reporting entity, and as such, no restatement of prior period financial statements on a combined basis is considered necessary. There was no gain or loss or goodwill generated as a result of this transaction, as the total purchase price was equal to the net book value of assets at the VIE level (previously consolidated by the Company). Simultaneous with the completion of this transaction, the Company also repaid all of the outstanding debt assumed from the VIEs, resulting in a payment of approximately \$4,700. Subsequent to this transaction, neither TMF or Lone Star continued to meet the definition of a VIE with respect to ExOne, and as a result, the remaining assets and liabilities of both entities were deconsolidated following the transaction, resulting in a reduction to equity (through noncontrolling interest) of approximately \$2,724.

Note 5. Inventories

Inventories consist of the following:

	March 31, 2014	December 31, 2013
Raw materials and components	\$ 7,435	\$ 6,253
Work in process	7,650	5,957
Finished goods	737	554
	\$ 15,822	\$ 12,764

At March 31, 2014 and December 31, 2013, the allowance for slow-moving and obsolete inventories was approximately \$683 and \$750, respectively, and has been reflected as a reduction to inventories (raw materials and components).

Note 6. Line of Credit

The Company has a line of credit and security agreement with a German bank collateralized by certain assets of the Company for approximately \$1,800 (1,300). Of the total amount available under this facility, approximately \$700 (500) is available for short-term borrowings or cash advances (overdrafts) with the additional \$1,100 (800) available for additional bank transactions requiring security (i.e. bank guarantees, letters of credit, etc.). Interest rates were 2.56%, 6.20% and 1.75% for short-term borrowings, overdrafts and transactions requiring security, respectively, at March 31, 2014. There is no commitment fee associated with this agreement. At March 31, 2014 and December 31, 2013, there were no outstanding short-term borrowings or overdrafts on the line of credit. At March 31, 2014 and December 31, 2013, the Company had transactions guaranteed by the security agreement of approximately \$682 (496) and \$982 (713), respectively.

Note 7. Contingencies and Commitments

The Company and its subsidiaries are subject to various litigation, claims, and proceedings which have been or may be instituted or asserted from time to time in the ordinary course of business. Management does not believe that the outcome of any pending or threatened matters will have a material adverse effect, individually or in the aggregate, on the financial position, results of operations or cash flows of the Company.

Note 8. Income Taxes

The provision for income taxes for the quarters ended March 31, 2014 and 2013 was \$164 and \$19, respectively. The Company has completed a discrete period computation of its provision for income taxes for each of the periods presented. Discrete period computation is as a result of (i) jurisdictions with losses before income taxes for which no tax benefit can be recognized and (ii) an inability to generate reliable estimates for results in certain jurisdictions as a result of inconsistencies in generating net operating profits (losses) in those jurisdictions.

The effective tax rate for the quarters ended March 31, 2014 and 2013 was 3.1% (provision on a loss) and 1.1% (provision on a loss), respectively. The effective tax rate differs from the U.S. federal statutory rate of 34.0% for each of the periods presented primarily due to net changes in valuation allowances for the periods.

The Company has provided a valuation allowance for its net deferred tax assets as a result of the Company not generating consistent net operating profits in jurisdictions with which it operates. As such, any benefit from deferred taxes in either quarterly period has been fully offset by changes in the valuation allowance for net deferred tax assets. The Company continues to assess its future taxable income by jurisdiction based on (i) recent historical operating results (ii) the expected timing of reversal of temporary differences (iii) various tax planning strategies that the Company may be able to enact in future periods (iv) the impact of potential operating changes on the business and (v) forecast results from operations in future periods based on available information at the end of each reporting period. To the extent that the Company is able to reach the conclusion that deferred tax assets are realizable based on any combination of the above factors, a reversal of existing valuation allowances may occur.

The Company has a liability for uncertain tax positions related to certain capitalized expenses and intercompany transactions. At March 31, 2014 and December 31, 2013, the liability for uncertain tax positions was approximately \$767 and \$768, respectively, and is included in accrued expenses and other current liabilities in the condensed consolidated balance sheets. In addition, at March 31, 2014, the Company had a liability for uncertain tax positions related to its ExOne GmbH (Germany) and ExOne KK (Japan) subsidiaries of \$63 and \$111, respectively, which were fully offset against net operating loss carryforwards of the the respective subsidiaries. At December 31, 2013, the Company had a liability for uncertain tax positions related to its ExOne KK (Japan) subsidiary of \$93, which was fully offset against net operating loss carryforwards of this subsidiary.

Note 9. Equity-Based Compensation

On January 24, 2013, the Board of Directors of the Company adopted the 2013 Equity Incentive Plan (the Plan). In connection with the adoption of the Plan, 500,000 shares of common stock were reserved for issuance pursuant to the Plan, with automatic increases in such reserve available each year annually on January 1 from 2014 through 2023 equal to the lesser of (i) 3.0% of the total outstanding shares of common stock as of December 31 of the immediately preceding year or (ii) a number of shares of common stock determined by the Board of Directors, provided that the maximum number of shares authorized under the Plan will not exceed 1,992,242 shares, subject to certain adjustments.

On January 2, 2014, the Board of Directors authorized the award of 7,500 shares of restricted stock under the Plan to three executives of the Company. The awards vest in one-third increments on the first, second and third anniversaries of the grant date, respectively.

On March 20, 2014, the Board of Directors authorized the award of 5,000 shares of restricted stock under the Plan to an executive of the Company. This award vests in one-third increments on the first, second and third anniversaries of the grant date, respectively.

Also on March 20, 2014, the Board of Directors separately authorized the award of 5,000 shares of common stock in the form of a stock bonus award to the independent members of the Board of Directors. The stock bonus awards vested immediately upon issuance.

The following table summarizes the total equity-based compensation expense recognized for all ISOs, restricted stock and stock bonus awards:

	Quarter Ended, March 31	
	2014	2013
Equity-based compensation expense recognized:		
ISOs	\$ 160	\$ 96
Restricted stock	83	15
Stock bonus awards	197	
Total equity-based compensation expense before income taxes	\$ 440	\$ 111
Benefit for income taxes*		
Total equity-based compensation expense net of income taxes	\$ 440	\$ 111

* The benefit for income taxes from equity-based compensation for both periods has been determined to be \$0 based on a full valuation allowance against net deferred tax assets. In the absence of a full valuation allowance, the tax benefit derived from equity-based compensation would be approximately \$149 and \$17 for the quarters ended March 31, 2014 and 2013, respectively.

At March 31, 2014, total future compensation expense related to unvested awards yet to be recognized by the Company was approximately \$1,173 for ISOs and \$917 for restricted stock awards. Total future compensation expense related to unvested awards yet to be recognized by the Company is expected to be recognized over a weighted-average remaining vesting period of approximately 2.2 years.

The activity for ISOs for the quarter ended March 31, 2014, was as follows:

	Number of ISOs	Weighted Average Exercise Price	Weighted Average Grant Date Fair Value
Outstanding at December 31, 2013	173,333	\$ 18.00	\$ 11.03
ISOs granted		\$	\$
ISOs exercised	(17,696)	\$ 18.00	\$ 11.03
ISOs forfeited		\$	\$
Outstanding at March 31, 2014	155,637	\$ 18.00	\$ 11.03
ISOs exercisable	40,637	\$ 18.00	\$ 11.03
ISOs expected to vest, net of forfeitures	106,519	\$ 18.00	\$ 11.03

At March 31, 2014, the aggregate intrinsic value of ISOs exercisable and ISOs expected to vest was approximately \$725 and \$1,899, respectively. The weighted average remaining contractual term of ISOs both exercisable and expected to vest at March 31, 2014, was approximately 8.9 years. ISOs with an aggregate intrinsic value of approximately \$306 were exercised by employees during the quarter ended March 31, 2014, resulting in proceeds to the Company from the exercise of stock options of approximately \$318. The Company received no income tax benefit related to these exercises. There were no exercises during the quarter ended March 31, 2013.

The activity for restricted stock awards for the quarter ended March 31, 2014, was as follows:

	Shares of Restricted Stock	Weighted Average Grant Date Fair Value
Outstanding at December 31, 2013	20,000	\$ 23.26
Restricted shares granted	12,500	\$ 53.28
Restricted shares vested*	(6,666)	\$ 23.26
Restricted shares forfeited		\$
Outstanding at March 31, 2014	25,834	\$ 37.78
Restricted shares expected to vest	25,834	\$ 37.78

* Restricted shares vesting during the quarter ended March 31, 2014, had a fair value of approximately \$282.

Note 10. Fair Value Measurements

Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. When determining the fair value measurements for assets and liabilities which are required to be recorded at fair value, the Company considers the principal or most advantageous market in which the Company would transact and the market-based risk measurements or assumptions that market participants would use in pricing the asset or liability, such as inherent risk, transfer restrictions and credit risk.

The Company applies the following fair value hierarchy, which prioritizes the inputs used to measure fair value into three levels and bases the categorization within the hierarchy upon the lowest level of input that is available and significant to the fair value measurement:

Level 1 Observable inputs such as quoted prices in active markets for identical investments that the Company has the ability to access.

Level 2 Inputs include:

Quoted prices for similar assets or liabilities in active markets;

Quoted prices for identical or similar assets or liabilities in inactive markets;

Inputs, other than quoted prices in active markets, that are observable either directly or indirectly;

Inputs that are derived principally from, or corroborated by, observable market data by correlation or other means.

Level 3 Inputs that are generally unobservable and typically reflect management's estimates of assumptions that market participants would use in pricing the asset or liability.

The Company is required to disclose its estimate of the fair value of material financial instruments, including those recorded as assets or liabilities in its consolidated financial statements, in accordance with GAAP.

The following table sets forth the fair value of the Company's liabilities measured on a recurring basis by level:

	Level	March 31, 2014	December 31, 2013
Accrued expenses and other current liabilities:			
MAM contingent consideration	3	\$ 200	\$
Other noncurrent liabilities			
MAM contingent consideration	3	\$ 177	\$

The fair value of contingent consideration associated with the MAM acquisition is determined by using certain forecasts of future profitability of MAM (an unobservable input). The valuation technique utilized by the Company with respect to this instrument is a discounted cash flow model, principally based on the assumption of achievement of the profitability targets stipulated in the earn-out provision. Future expected payments (\$200 for each of the two respective earn-out periods) have been discounted using a market interest rate assumption.

Terms of the earn-out provision require minimum achievement of revenues and gross profit for the year ended December 31 as follows:

	2014*	2015
Revenue	\$ 2,490	\$ 3,500
Gross profit	\$ 623	\$ 875

*

Edgar Filing: ExOne Co - Form 10-Q

For 2014, targets are representative of revenues and gross profit for the period from the date of acquisition (March 3, 2014) through December 31, 2014.

The following table sets forth a summary of changes in the fair value of the Company's Level 3 financial instruments:

	Quarter Ended March 31,	
	2014	2013
Beginning balance	\$	\$
Realized gains (losses)		
Unrealized gains (losses)		
Purchases		
Sales		
Issuances	377	
Settlements		
Transfers into Level 3		
Transfers out of Level 3		
Ending balance	\$ 377	\$

The carrying values and fair values of other financial instruments (assets and liabilities) not required to be recorded at fair value were as follows:

	March 31, 2014		December 31, 2013	
	Carrying Value	Fair Value	Carrying Value	Fair Value
Cash and cash equivalents	\$ 77,590	\$ 77,590	\$ 98,445	\$ 98,445
Current portion of long-term debt	\$ 128	\$ 128	\$ 127	\$ 127
Current portion of capital and financing leases	\$ 557	\$ 557	\$ 549	\$ 549
Long-term debt - net of current portion	\$ 2,050	\$ 1,992	\$ 2,082	\$ 1,666
Capital and financing leases - net of current portion	\$ 332	\$ 332	\$ 475	\$ 475

The carrying amounts of cash and cash equivalents, current portion of long-term debt and current portion of capital and financing leases approximate fair value due to their short-term maturities. Cash and cash equivalents are classified in Level 1; current portion of long-term debt, current portion of capital and financing leases, long-term debt - net of current portion and capital and financing leases - net of current portion are classified in Level 2.

Note 11. Customer Concentrations

During the quarters ended March 31, 2014 and March 31, 2013, the Company conducted a significant portion of its business with a limited number of customers. For the quarters ended March 31, 2014 and March 31, 2013, the Company's five most significant customers represented approximately 39.0% and 58.5% of total revenue, respectively. At March 31, 2014 and December 31, 2013, accounts receivable from the Company's five most significant customers were approximately \$5,153 and \$5,912, respectively.

Note 12. Subsequent Events

The Company has evaluated all of its activities and concluded that no subsequent events have occurred that would require recognition in the condensed consolidated financial statements or disclosure in the notes to the condensed consolidated financial statements.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations.
(dollars in thousands, except per-share amounts)

The following discussion and analysis should be read together with our unaudited condensed consolidated financial statements and related notes thereto set forth in this Quarterly Report on Form 10-Q as well as our Annual Report on Form 10-K for the year ended December 31, 2013. Certain statements contained in this discussion may constitute forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended. These statements involve a number of risks, uncertainties and other factors that could cause actual results to differ materially from those reflected in any forward-looking statements, as a result of a variety of risks and uncertainties, including those described under

Cautionary Statements Regarding Forward Looking Statements and Risk Factors in Item 1A of our Annual Report on Form 10-K for the year ended December 31, 2013.

The forward looking information set forth in this Quarterly Report on Form 10-Q is provided as of the date of this filing, and, except as required by law, we undertake no duty to update that information.

Overview

Organization

ExOne is a corporation organized under the laws of the state of Delaware. ExOne was formed on January 1, 2013, when The Ex One Company, LLC, a Delaware limited liability company, merged with and into a Delaware corporation, which survived and changed its name to The ExOne Company. As a result of the Reorganization, The Ex One Company, LLC became ExOne, the common and preferred interest holders of The Ex One Company, LLC became holders of common stock and preferred stock, respectively, of ExOne, and the subsidiaries of The Ex One Company, LLC became the subsidiaries of ExOne.

On February 6, 2013, we commenced an initial public offering of 6,095,000 shares of our common stock at a price to the public of \$18.00 per share, of which 5,483,333 shares were sold by us and 611,667 were sold by a selling stockholder (including consideration of the exercise of the underwriters' over-allotment option). Following completion of the offering on February 12, 2013, we received net proceeds of approximately \$91,996 (net of underwriting commissions).

On September 9, 2013, we commenced a secondary public offering of 3,054,400 shares of our common stock at a price to the public of \$62.00 per share, of which 1,106,000 shares were sold by us and 1,948,400 were sold by selling stockholders (including consideration of the exercise of the underwriters' over-allotment option). Following completion of the offering on September 13, 2013, we received net proceeds of approximately \$65,315 (net of underwriting commissions).

The condensed consolidated financial statements include the accounts of ExOne, its wholly-owned subsidiaries, ExOne Americas LLC (United States), ExOne GmbH (Germany), ExOne KK (Japan); effective in August 2013, ExOne Property GmbH (Germany); effective in March 2014, MWT Gesellschaft für Industrielle Mikrowellentechnik mbH (Germany); and through March 27, 2013 (see further description below) two VIEs in which ExOne was identified as the primary beneficiary, Lone Star and TMF.

At December 31, 2012 and through March 27, 2013, ExOne leased property and equipment from Lone Star and TMF. ExOne did not have an ownership interest in Lone Star or TMF and the assets of Lone Star and TMF could only be used to settle obligations of Lone Star and TMF. ExOne was identified as the primary beneficiary of Lone Star and TMF in accordance with guidance issued by the FASB on the consolidation of VIEs, as ExOne guaranteed certain long-term debt of both Lone Star and TMF and governed these entities through common ownership. FASB guidance

requires certain VIEs to be consolidated when an enterprise has the power to direct the activities of the VIE that most significantly impact VIE economic performance and who has the obligation to absorb losses or the right to receive benefits of the VIE that could potentially be significant to the VIE. The condensed consolidated financial statements therefore include the accounts of Lone Star and TMF through March 27, 2013.

On March 27, 2013, ExOne Americas LLC acquired certain assets, including property and equipment (principally land, buildings and machinery and equipment) held by the two VIEs, and assumed all outstanding debt of such VIEs. Following this transaction, neither of the entities continued to meet the definition of a VIE with respect to ExOne, and as a result, the remaining assets and liabilities of both entities were deconsolidated following the transaction.

Business and Strategy

We are a global provider of 3D printing machines and printed products, materials and other services to industrial customers. Our business primarily consists of manufacturing and selling 3D printing machines and printing products to specifications for our customers using our installed 3D printing machines. We offer pre-production collaboration and print products for customers through our seven production service centers (PSCs), which are located in the United States, Germany and Japan. We build 3D printing machines at our facilities in the United States and Germany, and supply the associated materials, including consumables and replacement parts, and other services, including training and technical support, necessary for purchasers of our machines to print products. We believe that our ability to print in a variety of industrial materials, as well as our industry-leading printing capacity (as measured by build box size and printhead speed) uniquely position us to serve the needs of industrial customers.

As an additive manufacturer, we are an early entrant into an evolving manufacturing technology and marketplace. Our strategy has been to position our manufacturing assets, both in terms of our ability and capacity, to prepare for an anticipated increase of customer acceptance of this form of manufacturing. We have made financial support of this growth strategy a priority. We have invested in both our research and development and infrastructure, including capital investment in 3D printing machines, and hiring key personnel.

As our infrastructure grows, we intend to shift our strategic focus to opening additional PSCs in order to broaden our potential global customer base and to expand our 3D printing capability in an increasing variety of industrial materials. Our growth strategy focuses on growing our PSCs in order to print more products for our existing customers and gain new customers. By the end of 2015, we plan to expand our PSC network from the current seven locations to fifteen locations. Like our current PSCs, we plan to locate the additional PSCs in major industrial centers near existing and potential customers. While we may adjust based upon market considerations, our current plan includes opening two or more additional PSC locations in the first half of 2014.

Our growth strategy includes using our printed products as an introduction of our technology to facilitate 3D printing machine sales. An important part of reaching these goals is to increase our capability to print in a growing number of industrial materials and increase the job box sizes and production speeds (volumetric output) available to our potential customers, which will increase the efficiency and usefulness of our technology. In addition, we use our regional PSCs to educate our potential customers and the marketplace about the advantages of 3D printing.

We also believe expanding the location of our PSCs to high-growth economies and geographic regions that are readily accessible by a significant number of potential customers will help us to increase sales. To better balance our business, we intend to develop our customer base so that revenue is not dependent on any one region (North America, South America and Latin America (collectively, the Americas), Europe and Asia). Likewise, we intend to balance revenue between our 3D printing machines and 3D printed products, materials and other services.

Our next generation 3D printing machine platforms have achieved the volumetric output rate and quality necessary to serve industrial markets on a production scale. We believe that there is an opportunity to similarly advance the pre-print and post-print processing phases of product materialization to more fully exploit the transformative power of our 3D printing machines and drive growth. These opportunities relate to both direct and indirect part materialization. For direct metal production, we believe that enhancing pre-print processes, notably design optimization tools and suitable print material availability, can greatly accelerate our capture of market share in the near-term. Additionally, enhancements to post-print processing will increase the applications for printed parts. Through ExMAL, we are developing post-print processing technologies to achieve fully dense metal product materialization without the need for infiltration, and we are exploring technology-sharing partnerships to further this initiative. In indirect production utilizing 3D printed molds and cores, advanced performance casting technologies can be leveraged to increase yields and reduce weight of casted products. To address the market opportunity and fill the execution gap, we have developed a suite of processes, many of which are proprietary, for producing high-quality castings through a process that we call ExCast. ExCast provides industry guidance and support through all stages of production, from computer-aided drafting at the design stage, through the 3D materialization of molds and cores, metal casting of the end product and rapid delivery to the end-user.

Finally, we intend to opportunistically identify and, through acquisitions, alliances and/or strategic investment, integrate and advance complementary businesses, technologies and capabilities. Our goal is to expand the functionality of our products, provide access to new customers and markets, and increase our production capacity.

2014 Acquisitions

On March 3, 2014, ExOne Americas LLC, entered into an Asset Purchase Agreement to acquire (i) substantially all the assets of MAM, a specialty machine shop located in Chesterfield, Michigan, and (ii) the real property on which the MAM business is located from Metal Links, LLC, a Michigan limited liability company. The total purchase price was approximately \$4,995, which includes approximately \$4,618 in cash and \$377 in contingent consideration in the form of a two-year earn-out provision. The two-year earn-out provision is based on a combination of achievement of revenues and gross profit for the acquired business for which we assumed full achievement of both targets for each of the respective years on the date of acquisition. MAM will remain in its current Michigan location, complementing our nearby PSC in Troy, Michigan. This PSC focuses on advanced 3D printed cores and molds for the aerospace and

shipbuilding industries. In addition, we expect to continue to serve and expand the existing MAM industrial customer base. We believe that MAM's specialty precision machining expertise helps us address the finishing requirements for complex parts which are cast from our 3D printed sand molds.

On March 6, 2014, ExOne GmbH, entered into a Purchase and Assignment Contract to acquire all of the shares of MWT, a pioneer in industrial-grade microwaves with design and manufacturing experience based in Elz, Germany. The total purchase price was approximately \$3,557 (\$4,891), which includes approximately \$3,500 (\$4,813) in cash and approximately \$57 (\$78) in other net liabilities settled at the date of acquisition. We believe that this acquisition enhances our position as the market leader of 3D sand production systems for industry. Industrial grade microwaves are used for thermally processing certain sand molds or cores that are 3D printed using binders, such as phenolic binder, that require a drying process. Importantly, microwave technology improves casting quality and reduces production costs for customers in specific industries, such as magnesium parts for aviation and steel alloy parts for hydraulic components. MWT designs and manufactures equipment that is currently employed in our PSC operations. We also plan to offer this technology to customers in future system sales. MWT's microwave operation will be operationally integrated with our Augsburg, Germany manufacturing operations.

Goodwill

Goodwill represents the excess of purchase price over the fair value of identifiable net assets of acquired entities. Goodwill is not amortized; instead, it is reviewed for impairment annually or more frequently if indicators of impairment exist (a triggering event) or if a decision is made to sell or exit a business. A significant amount of judgment is involved in determining if an indicator of impairment has occurred. Such indicators may include deterioration in general economic conditions, negative developments in equity and credit markets, adverse changes in the markets in which an entity operates, increases in input costs that have a negative effect on earnings and cash flows, or a trend of negative or declining cash flows, among others.

Goodwill is allocated among and evaluated for impairment at the reporting unit level, which is defined as an operating segment or one level below an operating segment. ExOne operates as both a single operating segment and reporting unit.

In reviewing goodwill for impairment, an entity has the option to first assess qualitative factors to determine whether the existence of events or circumstances leads to a determination that it is more likely than not (greater than 50%) that the estimated fair value of a reporting unit is less than its carrying amount. If an entity elects to perform a qualitative assessment and determines that an impairment is more likely than not, the entity is then required to perform a two-step quantitative impairment test (described below), otherwise no further analysis is required however, it will continue to be evaluated at least annually as described above. An entity also may elect not to perform the qualitative assessment and, instead, proceed directly to the two-step quantitative impairment test. The ultimate outcome of the goodwill impairment review for a reporting unit should be the same whether an entity chooses to perform the qualitative assessment or proceeds directly to the two-step quantitative impairment test.

Under the qualitative assessment, various events and circumstances (or factors) that would affect the estimated fair value of a reporting unit are identified (similar to impairment indicators above). These factors are then classified by the type of impact they would have on the estimated fair value using positive, neutral, and adverse categories based on current business conditions. Additionally, an assessment of the level of impact that a particular factor would have on the estimated fair value is determined using high, medium, and low weighting.

Under the two-step quantitative impairment test, the evaluation of impairment involves comparing the current fair value a reporting unit to its carrying value, including goodwill (step 1). ExOne plans to use a discounted cash flow model to estimate the fair value of its reporting unit when testing for impairment, as management believes forecasted cash flows are the best indicator of such fair value. A number of significant assumptions and estimates are involved in the application of the discounted cash flow model to forecast operating cash flows, including, sales volumes and

prices, production and other operating costs, effective tax rates, capital spending, discount rate, and working capital changes. Cash flow forecasts are generally based on approved operating plans for the current year in combination with future forecasts of profitability.

In the event the estimated fair value of a reporting unit per the discounted cash flow model is less than the carrying value (step 1), additional analysis would be required (step 2). The additional analysis (step 2) would compare the carrying amount of the reporting unit's goodwill with the implied fair value of that goodwill, which may involve the use of valuation experts. The implied fair value of goodwill is the excess of the fair value of the reporting unit over the fair value amounts assigned to all of the assets and liabilities of that unit as if the reporting unit was acquired in a business combination and the fair value of the reporting unit represented the purchase price. If the carrying value of goodwill exceeds its implied fair value, an impairment loss equal to such excess would be recognized, which could significantly and adversely impact reported results of operations.

ExOne plans to complete its initial annual test of impairment related to goodwill during its fourth fiscal quarter absent indicators (a trigger event) requiring an earlier test to be performed. There were no such indicators identified during the quarter ended March 31, 2014.

Contingent Consideration

ExOne records contingent consideration resulting from a business combination at its fair value on the date of acquisition. Each reporting period thereafter, we revalue these obligations and record increases or decreases in their fair value as a charge (credit) to selling, general and administrative costs within the condensed statement of consolidated operations and comprehensive loss. Changes in the fair value of contingent consideration obligations can result from adjustments to (i) forecast revenues, profitability or a combination thereof or (ii) discount rates. These fair value measurements represent Level 3 measurements, as they are based on significant unobservable inputs.

Related to contingent consideration issued in connection with the MAM acquisition, there were no changes in fair value between the date of acquisition and March 31, 2014, and as such, no amount (charge or credit) has been recorded by us.

Results of Operations

Net Loss Attributable to ExOne

Net loss attributable to ExOne for the quarter ended March 31, 2014, was \$5,527, or \$0.38 per basic and diluted share, compared with a net loss attributable to ExOne of \$1,914, or \$0.20 per basic and diluted share, for the quarter ended March 31, 2013. The increase in our net loss was principally due to (i) a decrease in our gross profit, principally as a result of lower 3D printing machine sales volumes and costs incurred in connection with the development of our ExCast strategy and expansion of our PSC network and (ii) higher operating expenses attributed mostly to personnel costs associated with an increased headcount (including salaries and related benefits) and additional research and development spending (related to material qualification activities and 3D printing machine development). Refer to the sections below for further description of these changes.

Revenue

The following table summarizes revenue by product line for each of the quarters ended March 31:

	2014		2013	
3D printing machines and micromachinery	\$ 2,439	33.5%	\$ 4,255	53.6%
3D printed products, materials and other services	4,846	66.5%	3,679	46.4%
	\$ 7,285	100.0%	\$ 7,934	100.0%

Revenue for the quarter ended March 31, 2014, was \$7,285 compared with revenue of \$7,934 for the quarter ended March 31, 2013, a decrease of \$649, or 8.2%. This decrease was principally due to lower volume of 3D printing machines sold in the quarter ended March 31, 2014, as compared to the quarter ended March 31, 2013, as well as the sales mix of machines, as a higher percentage of machines sold for the 2013 period were S-Max units, our highest price point machine. Offsetting this decrease was an increase in revenue from 3D printed products, materials and other services driven by (i) revenues derived from ExCast-related activities during the quarter ended March 31, 2014, (ii) an overall continued increase in customer acceptance of our additive manufacturing technologies, resulting in higher non-machine volumes and (iii) an increase in the number of our 3D printing machines that are installed and active worldwide (resulting in higher aggregate material and service revenues).

The following table summarizes the significant components of the change in revenue by product line for the quarter ended March 31, 2013, compared to the quarter ended March 31, 2014:

	3D printing machines and micromachinery	3D printed products, materials and other services	Total
Quarter Ended March 31, 2013	\$ 4,255	\$ 3,679	\$ 7,934
Change in revenue attributed to:			
Volume	(1,741)	1,185	(556)
Pricing and sales mix	(114)		(114)
Foreign currency	39	(18)	21
	(1,816)	1,167	(649)
Quarter Ended March 31, 2014	\$ 2,439	\$ 4,846	\$ 7,285

The following table summarizes 3D printing machines sold by type for each of the quarters ended March 31 (refer to the Our Machines and Machine Platforms section of Part I Item 1 of our Annual Report on Form 10-K for the year ended December 31, 2013, for a description of 3D printing machines and micromachinery by type):

	2014	2013
Machine units sold:		
S-Max	1	2
S-Print		1
S-15	1	
M-Flex	1	
X1-Lab		1
Micromachinery		1
	3	5

Cost of Sales and Gross Profit

Cost of sales for the quarter ended March 31, 2014, was \$5,666 compared with cost of sales of \$5,096 for the quarter ended March 31, 2013, an increase of \$570, or 11.2%. Cost of sales as a percentage of revenue was 77.8% for the quarter ended March 31, 2014, compared with 64.2% for the quarter ended March 31, 2013, an increase of 13.6%.

Gross profit for the quarter ended March 31, 2014, was \$1,619 compared with gross profit of \$2,838 for the quarter ended March 31, 2013, a decrease of \$1,219, or 43.0%. Gross profit percentage was 22.2% for the quarter ended March 31, 2014, compared with 35.8% for the quarter ended March 31, 2013, a decrease of 13.6%. This decrease was principally due to (i) lower machine sales volume and (ii) costs incurred in connection with the development of our ExCast strategy and expansion of our PSC network.

Operating Expenses

The following table summarizes the significant components of operating expenses for each of the quarters ended March 31:

	2014	2013
Research and development	\$ 1,844	\$ 856
Selling, general and administrative	5,201	3,568
	\$ 7,045	\$ 4,424

Operating expenses for the quarter ended March 31, 2014, were \$7,045 compared with operating expenses of \$4,424 for the quarter ended March 31, 2013, an increase of \$2,621, or 59.2%. Operating expenses as a percentage of revenue were 96.7% for the quarter ended March 31, 2014, compared with 55.8% for the quarter ended March 31, 2013, an increase of 40.9%.

Research and development expenses for the quarter ended March 31, 2014, were \$1,844 compared with research and development expenses of \$856 for the quarter ended March 31, 2013, an increase of \$988, or 115.4%. This increase was primarily due to (i) increased costs associated with our materials qualification activities, including additional research and development headcount, materials usage and facilities costs associated with our new materials development laboratory in the United States and (ii) continued investment in enhancing our 3D printing machine and micromachinery technology for both direct (metal) and indirect (sand) printing.

Selling, general and administrative expenses for the quarter ended March 31, 2014, were \$5,201 compared with selling, general and administrative expenses of \$3,568 for the quarter ended March 31, 2013, an increase of \$1,633, or 45.8%. This increase was principally due to (i) personnel costs associated with an increased headcount (including salaries and related benefits), (ii) an increase in equity-based compensation expense and (iii) expenses associated with merger and acquisition related activities.

Interest Expense

Interest expense for the quarter ended March 31, 2014, was \$29 compared with interest expense of \$230 for the quarter ended March 31, 2013, a decrease of \$201, or 87.4%. This decrease was principally due to a lower average outstanding debt balance for the quarter ended March 31, 2014, as compared to the quarter ended March 31, 2013, mostly due to (i) the retirement of the demand note payable to a member in February 2013 and (ii) the settlement of debt held by VIEs in connection with our acquisition of certain related assets of those entities in March 2013.

Other Income Net

Other income net for the quarter ended March 31, 2014, was \$92 compared with other income net of \$59 for the quarter ended March 31, 2013, an increase of \$33, or 55.9%. Amounts for both periods consisted principally of interest income on cash deposits and other financing activity benefits.

Provision for Income Taxes

The provision for income taxes for the quarters ended March 31, 2014 and 2013, was \$164 and \$19, respectively. The effective tax rate for the quarters ended March 31, 2014 and 2013, was 3.1% (provision on a loss) and 1.1% (provision on a loss), respectively. For the quarter ended March 31, 2014 and March 31, 2013, the effective tax rate differs from the U.S. federal statutory rate of 34.0% primarily due to net changes in valuation allowances for the period.

We have provided a valuation allowance for our net deferred tax assets as a result of our inability to generate consistent net operating profits in jurisdictions in which we operate. As such, any benefit from deferred taxes in either quarterly period has been fully offset by changes in the valuation allowance for net deferred tax assets. We continue to assess our future taxable income by jurisdiction based on (i) our recent historical operating results (ii) the expected timing of reversal of temporary differences (iii) various tax planning strategies that we may be able to enact in future periods (iv) the impact of potential operating changes on our business and (v) our forecast results from operations in future periods based on available information at the end of each reporting period. To the extent that we are able to reach the conclusion that deferred tax assets are realizable based on any combination of the above factors, a reversal of existing valuation allowances may occur.

Noncontrolling Interests

There was no net income attributable to noncontrolling interests for the quarter ended March 31, 2014, following the acquisition of net assets in the related variable interest entities which was completed during the quarter ended March 31, 2013. Net income attributable to noncontrolling interests was \$138 for the quarter March 31, 2013.

Impact of Inflation

Our results of operations and financial condition are presented based on historical cost. While it is difficult to accurately measure the impact of inflation due to the imprecise nature of the estimates required, we believe the effects of inflation, if any, on our results of operations and financial condition are not significant.

Liquidity and Capital Resources

We incurred net losses of approximately \$6,317, \$9,688 and \$7,617 for the years ended December 31, 2013, 2012 and 2011, respectively. As shown in the accompanying condensed consolidated financial statements we incurred a net loss of approximately \$5,527 for the quarter ended March 31, 2014. Prior to our Reorganization, we operated as a limited liability company and were substantially supported by the continued financial support provided by our majority member. In connection with the completion of our initial public offering in February 2013 and our secondary public offering in September 2013, we received unrestricted net proceeds from the sale of our common stock of approximately \$157,311. We believe that the unrestricted net proceeds obtained through these transactions will be sufficient to support our operations through April 1, 2015.

The following table summarizes the significant components of cash flows for each of the quarters ended March 31 and our cash and cash equivalents balance at March 31, 2014 and December 31, 2013:

	2014	2013
Cash used for operating activities	\$ (6,326)	\$ (3,021)
Cash used for investing activities	(14,371)	(3,058)
Cash (used for) provided by financing activities	(185)	74,432
Effect of exchange rate changes on cash and cash equivalents	27	(43)
Net change in cash and cash equivalents	\$ (20,855)	\$ 68,310

	March 31, 2014	December 31, 2013
Cash and cash equivalents	\$ 77,590	\$ 98,445

Operating Activities

Cash used for operating activities for the quarter ended March 31, 2014, was \$6,326 compared with \$3,021 for the quarter ended March 31, 2013. The increase of \$3,305, or 109.4%, was mostly attributed to an increase in our net loss less depreciation and amortization and equity-based compensation of \$3,261 mostly due to lower gross profits for the period and increases in operating expenses (see further description above). In addition, net changes in assets and liabilities were impacted by (i) a decrease in inflows related to accounts receivable from customers based on the timing of payment and lower selling volume for the end of 2013 compared to the end of 2012, (ii) an increase in outflows associated with inventories (as a result of increases in global machine manufacturing activities, as well as lower sales volume during the quarter ended March 31, 2014), (iii) a decrease in outflows associated with prepaid expenses and other assets, accounts payable and accrued expenses and other current liabilities based on the volume and magnitude of purchasing activities and the timing of payments to vendors and (iv) an increase in inflows associated with deferred revenue and customer prepayments based on the timing of receipt of deposits from customers and the delivery of product to customers.

Investing Activities

Cash used for investing activities for the quarter ended March 31, 2014, was \$14,371 compared with \$3,058 for the quarter ended March 31, 2013. The increase of \$11,313, or 369.9%, was primarily attributed to increased capital expenditures in 2014, mostly due to spending associated with (i) the expansion of our facilities in Germany to increase our 3D printing machine manufacturing, PSC and other administrative facilities located there and (ii) cash paid for acquisitions (MAM and MWT).

Our 2014 capital expenditures plan includes (i) completion of our new multi-use facility in Germany (estimated total costs of approximately \$11,000 for 2014), (ii) the anticipated purchase and expansion of our existing Japanese facilities (estimated total costs of \$7,300 for 2014), (iii) an expansion and further investment in our facilities in the United States (including our planned facility expansion for our direct metal printing operations in North Huntingdon, Pennsylvania), including capital expenditures associated with our materials qualification activities (ExMAL) (total estimated costs of approximately \$4,000 for 2014), (iv) an increase in our global installed base of 3D printing machines and related equipment for our PSC network (estimated total costs of approximately \$8,000 for 2014), (v) deployment of a global ERP system to support our business activities (estimated total costs of approximately

\$2,000 for 2014), and (vi) additional sustaining capital expenditures (estimated total costs of less than \$1,000 for 2014).

Financing Activities

Cash used for financing activities for the quarter ended March 31, 2014, was \$185 compared with cash provided by financing activities of \$74,432 for the quarter ended March 31, 2013.

The principal use of cash for the quarter ended March 31, 2014, was principal payments on outstanding debt (including the payoff of debt assumed in connection with the MAM acquisition) and financing leases offset by cash proceeds from the exercised stock options.

The principal source of cash for the quarter ended March 31, 2013, was net proceeds from our initial public offering of \$91,083. Offsetting this source of cash were outflows of (i) \$528 associated with the repayment of amounts outstanding on our German line of credit, (ii) \$9,885 associated with the repayment of amounts outstanding on the demand note payable to member (which was subsequently retired by us), (iii) \$5,782 associated with the repayment of other outstanding debt and principal payments on financing leases, including repayment of all of the debt assumed from our VIEs in connection with the acquisition of net assets on March 27, 2013, and (iv) \$456 in preferred stock dividends paid prior to conversion of preferred stock to common stock upon closing of our initial public offering.

Off Balance Sheet Arrangements

We are not a party to any off balance sheet arrangements.

Recently Issued and Adopted Accounting Guidance

Refer to Note 1 to the condensed consolidated financial statements in Part I Item 1 of this Quarterly Report on Form 10-Q.

Item 3. Quantitative and Qualitative Disclosures About Market Risk.

We are exposed to market risk from fluctuations in foreign currency exchange rates which may adversely affect our results of operations and financial condition. We seek to minimize these risks through regular operating and financing activities and, when we consider it to be appropriate, through the use of derivative financial instruments. We do not purchase, hold or sell derivative financial instruments for trading or speculative purposes.

The local currency is the functional currency for significant operations outside of the United States. The determination of the functional currency of an operation is made based on the appropriate economic and management indicators.

Foreign currency assets and liabilities are translated into their U.S. dollar equivalents based on year end exchange rates, and are included in stockholders' equity as a component of other comprehensive income (loss). Revenues and expenses are translated at average exchange rates. Transaction gains and losses that arise from exchange rate fluctuations are charged to operations as incurred, except for gains and losses associated with intercompany receivables and payables for which settlement is not planned or anticipated in the foreseeable future, which are included in accumulated other comprehensive loss in the consolidated balance sheets.

We transact business globally and are subject to risks associated with fluctuating foreign exchange rates. Approximately 54.8% and 62.2% of our consolidated revenue was derived from transactions outside the United States for the quarters ended March 31, 2014 and 2013, respectively. This revenue is generated primarily from wholly-owned subsidiaries operating in their respective countries and surrounding geographic areas. This revenue is primarily denominated in each subsidiary's local functional currency, including the Euro and Japanese Yen. A hypothetical change in foreign exchange rates of +/- 10.0% for the quarter ended March 31, 2014 would result in an increase (decrease) in revenue of approximately \$400. These subsidiaries incur most of their expenses (other than intercompany expenses) in their local functional currencies.

At March 31, 2014, we held approximately \$77,590 in cash and cash equivalents, of which, approximately \$73,720 was held by our United States parent in U.S. dollars.

Item 4. Controls and Procedures.

Evaluation of Disclosure Controls and Procedures

Our management, with the participation of our Chief Executive Officer and our Chief Financial Officer, evaluated the effectiveness of our disclosure controls and procedures as of March 31, 2014. The term "disclosure controls and procedures," as defined in Rules 13a-15(e) and 15d-15(e) under the Exchange Act, means controls and other procedures of a company that are designed to ensure that information required to be disclosed by a company in the reports that it files or submits under the Exchange Act is recorded, processed, summarized and reported, within the time periods specified in the SEC's rules and forms. Disclosure controls and procedures include, without limitation, controls and procedures designed to ensure that information required to be disclosed by a company in the reports that it files or submits under the Exchange Act is accumulated and communicated to the company's management, including its principal executive and principal financial officers, as appropriate to allow timely decisions regarding required disclosure. Management recognizes that any controls and procedures, no matter how well designed and operated, can

provide only reasonable assurance of achieving their objectives and management necessarily applies its judgment in evaluating the cost benefit relationship of possible controls and procedures. Based on this evaluation, management concluded as of March 31, 2014, that our disclosure controls and procedures were not effective at the reasonable assurance level due to material weaknesses in our internal control over financial reporting as discussed in the Company's Annual Report on Form 10-K filed on March 20, 2014.

As a result of material weaknesses described in our Annual Report on Form 10-K, we performed additional analysis and other post-closing procedures to ensure our condensed consolidated financial statements were prepared in accordance with GAAP. Accordingly, management believes that the financial statements and related notes thereto included in this report fairly present, in all material respects, our financial condition, results of operations and cash flows for the periods presented.

Changes in Internal Control over Financial Reporting

With the oversight of senior management and our audit committee, we continue to take steps and additional measures to remediate the underlying causes of the identified material weaknesses including (i) enhancing our global accounting and reporting process by designing and strengthening the operating effectiveness of internal controls over financial reporting, (ii) evaluating our information technology systems to further integrate existing systems or invest in improvements to our technology sufficient to generate accurate and timely financial information and (iii) adding financial personnel with adequate knowledge and experience in GAAP.

We can provide no assurance at this time that management will be able to report that our internal control over financial reporting is effective as of December 31, 2014. As an emerging growth company, we are exempt from the requirement to obtain an attestation report from our independent registered public

accounting firm on the assessment of our internal controls pursuant to the Sarbanes-Oxley Act of 2002 until 2018, or such time that we no longer qualify as an emerging growth company in accordance with the Jumpstart Our Businesses Startups Act of 2012.

PART II OTHER INFORMATION

Item 1. Legal Proceedings.

ExOne and its subsidiaries are subject to various litigation, claims, and proceedings which have been or may be instituted or asserted from time to time in the ordinary course of business. Management does not believe that the outcome of any pending or threatened matters will have a material adverse effect, individually or in the aggregate, on our financial position, results of operations or cash flows.

Item 1A. Risk Factors.

There have been no material changes from the risk factors as previously disclosed in our Annual Report on Form 10-K for the year ended December 31, 2013.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds.

Unregistered Sales of Equity Securities

None.

Use of Proceeds from Initial Public Offering

On February 6, 2013, our Registration Statement on Form S-1 (File No. 333-185933) was declared effective for our initial public offering (IPO), pursuant to which we offered and sold 5,483,333 shares of common stock at a public offering price of \$18.00 per share; and RHI also offered and sold 611,667 shares of common stock at a public offering price of \$18.00 per share. S. Kent Rockwell, our Chairman and Chief Executive Officer, is the beneficiary of the S. Kent Rockwell Revocable Trust, which is the indirect, sole stockholder of RHI. Accordingly, S. Kent Rockwell is deemed to have beneficial ownership of our common stock owned by RHI. The managing underwriter was FBR Capital Markets & Co. and the co-managers were BB&T Capital Markets and Stephens Inc.

As a result of the completion of our IPO on February 12, 2013, we received net proceeds of approximately \$92.0 million, after deducting underwriting discounts and commissions. We did not receive any proceeds from the sale of 611,667 shares of common stock by RHI, although we bore the costs, other than underwriting discounts and commissions, associated with the sale of these shares. We incurred approximately \$1.6 million in total associated offering costs in connection with the IPO of which \$0.7 million were previously paid and deferred by us at December 31, 2012.

Except as described below, none of such payments were direct or indirect payments to any of our directors or officers or their associates or to persons owning 10.0 percent or more of our common stock or direct or indirect payments to others.

Rockwell Line of Credit (Demand Note Payable to Member)

On February 14, 2013, we paid approximately \$9.9 million of the net proceeds from the IPO to repay a revolving line of credit that we had with RFP for working capital (the Rockwell Line of Credit). The Rockwell Line of Credit provided for borrowing, repayment and reborrowing from time to time. While no limit was specified, borrowings were subject to RFP's approval. Borrowings under the Rockwell Line of Credit bore interest at the rate of 8.0% per annum

and were repayable, in whole or part, upon demand of RFP. As of February 14, 2013, we had approximately \$9.9 million in borrowings and accrued interest outstanding under the Rockwell Line of Credit. S. Kent Rockwell, our Chairman and Chief Executive Officer, is the beneficiary of the S. Kent Rockwell Revocable Trust, which is the indirect, sole stockholder of RFP. The Company no longer maintains the Rockwell Line of Credit.

Acquisition of Net Assets of Variable Interest Entities

On March 27, 2013, our wholly-owned subsidiary, ExOne Americas LLC, acquired certain assets, including property and equipment (principally land, buildings and machinery and equipment) held by our two variable interest entities, TMF and Lone Star and assumed all outstanding debt of the VIEs. Payment of approximately \$1.9 million and \$0.2 million was made to TMF and Lone Star, respectively, including a return of capital to these entities of approximately \$1.4 million. These payments were made using a portion of the net proceeds from the IPO. Simultaneous with the completion of this transaction, we also repaid all of the outstanding debt assumed from the VIEs, resulting in a payment of approximately \$4.7 million using net proceeds from the IPO.

Other

On February 14, 2013, we paid approximately \$0.3 million of the net proceeds from the IPO to retire our building note payable to an unrelated third party with respect to our facility in North Huntingdon, Pennsylvania. There were no prepayment penalties or gains or losses associated with this early retirement of debt.

On April 4, 2013, we paid approximately \$1.4 million of the net proceeds from the IPO to settle a financing lease obligation (including accrued interest) for a 3D printing machine with a related party. There were no prepayment penalties or gains or losses associated with this settlement.

On August 1, 2013, ExOne Property GmbH entered into an agreement with the Municipality of Gersthofen, Germany to purchase certain real property from the Municipality. We paid approximately \$4.0 million (3.0 million) of the net proceeds from the IPO to acquire this property.

On August 14, 2013, ExOne Property GmbH entered into a construction services contract with a turnkey provider of construction services for the design and construction of a new manufacturing facility to be located in the Municipality of Gersthofen, Germany. Through March 31, 2014, we have used approximately \$14.2 million (10.4 million) of net proceeds from the IPO to fund this project. We expect to spend an additional \$7.3 million (5.3 million) of the net proceeds from the IPO in 2014 on this project.

On August 15, 2013, we entered into a purchase agreement for approximately one acre of land and a 17,240 square foot manufacturing facility in North Las Vegas, Nevada. We paid approximately \$1.4 million of the net proceeds from the IPO to acquire this property for a total purchase price of approximately \$1.4 million. This amount was subsequently paid in-full by us in September 2013 with net proceeds from the IPO.

In addition to the amounts identified above, we have used approximately \$30.9 million in net proceeds from the IPO through March 31, 2014, for general corporate purposes, principally to support working capital and our operations (including expected capital expenditures and long-term debt and capital and financing lease repayments).

We had previously disclosed in our IPO an intention to assume the liabilities of our VIEs. Other than our payment of such liabilities described above, rather than the assumption of their debt, there has been no material change in the planned use of the net proceeds from our IPO as described in our final prospectus filed with the SEC pursuant to Rule 424(b). As of March 31, 2014, we held the remainder of the net proceeds from the IPO as cash and cash equivalents.

Item 3. Defaults Upon Senior Securities.

There have been no material defaults in senior securities.

Item 4. Mine Safety Disclosures.

Not applicable.

Item 5. Other Information.

Not applicable.

Item 6. Exhibits.
