NOTES TO UNAUDITED INTERIM FINANCIAL STATEMENTS

1) BASIS OF PRESENTATION

The accompanying unaudited interim financial statements as of June 30, 2018 and for the three and six months ended June 30, 2018 and 2017 have been prepared in conformity with accounting principles generally accepted in the United States (“GAAP”) for interim financial statements. The financial information as of December 31, 2017 is derived from the audited financial statements presented in the Willamette Valley Vineyards, Inc. (the “Company”) Annual Report on Form 10-K for the year ended December 31, 2017. Certain information or footnote disclosures normally included in financial statements prepared in accordance with U.S. GAAP have been condensed or omitted pursuant to the rules and regulations of the Securities and Exchange Commission. In the opinion of management, the accompanying financial statements include all adjustments necessary (which are of a normal recurring nature) for the fair statement of the results of the interim periods presented. The accompanying financial statements should be read in conjunction with the Company’s audited financial statements for the year ended December 31, 2017, as presented in the Company’s Annual Report on Form 10-K.

Operating results for the three and six months ended June 30, 2018 are not necessarily indicative of the results that may be expected for the entire year ending December 31, 2018, or any portion thereof.

The Company’s revenues include direct-to-consumer sales and national sales to distributors. These sales channels utilize shared resources for production, selling and distribution.

Earnings per share after preferred stock dividends are computed based on the weighted-average number of common shares outstanding each period.

The following table presents the earnings per share after preferred stock dividends calculation for the periods shown:

Recently issued accounting standards (adopted) – In May 2014, the FASB issued ASU No. 2014-09, Revenue from Contracts with Customers (Topic 606) (“ASU 2014-09”), a new standard to achieve a consistent application of revenue recognition within the U.S., resulting in a single revenue model to be applied by reporting companies under GAAP. The original effective date for ASU 2014-09 would have required adoption by the Company in the first quarter of fiscal 2017 with early adoption prohibited. In August 2015, the FASB issued ASU No. 2015-14, Revenue from Contracts with Customers (Topic 606) - Deferral of the Effective Date (“ASU 2015-14”), which defers the effective date of ASU 2014-09 for one year and permits early adoption in accordance with the original effective date of ASU 2014-09.

The new revenue standard is required to be applied retrospectively to each prior reporting period presented or prospectively with the cumulative effect of initially applying the standard recognized at the date of initial application. The Company adopted the standard in the first quarter of 2018 using the modified prospective method. The Company has evaluated the effect of the standard and concluded it will not be material to the Company’s financial reporting. Additionally, the Company has concluded that the application of the standard does not have a material effect that would require a retrospective adjustment.

The Company recognizes revenue when obligations under the terms of a contract with its customer are satisfied, generally, this occurs when the product is shipped and title passes to the customer. The Company's standard terms are 'FOB' shipping point, with no customer acceptance provisions. Revenue is measured as the amount of consideration expected to be received in exchange for transferring products. The cost of price promotions and rebates are treated as reductions of revenue. No products are sold on consignment. Credit sales are recorded as trade accounts receivable and no collateral is required. Revenue from items sold through the Company's retail locations is recognized at the time of sale. Net revenue reported herein is shown net of sales allowances and excise taxes. If the conditions for revenue recognition are not met, the Company defers the revenue until all conditions are met. As of June 30, 2018 and December 31, 2017, the Company has recorded deferred revenue in the amount of \$128,708 and \$103,246, respectively, which is included in accrued expenses on the balance sheet.

The Company has price incentive programs with its distributors to encourage product placement and depletions. When recording a sale to the customer, an incentive program liability is recorded to accrued liabilities and sales are reported net of incentive program expenses. Incentive program payments are made when completed incentive program payment requests are received from the customers. Incentive payments to a customer reduce the incentive program accrued liability. For the three months ended June 30, 2018 and 2017, the Company recorded incentive program expenses of \$397,325 and \$213,286, respectively, as a reduction in sales on the Statements of Operations. For the six months ended June 30, 2018 and 2017, the Company recorded incentive program expenses of \$483,139 and \$365,653, respectively, as a reduction in sales on the income statement. As of June 30, 2018 and December 31, 2017, the Company has recorded an incentive program liability in the amount of \$44,533 and \$49,075, respectively, which is included in accrued expenses on the balance sheet. Estimates are based on historical and projected experience for each type of program or customer and have historically been in line with actual costs incurred.

Recently issued accounting standards (not yet adopted) - In February 2016, the FASB issued ASU 2016-02, Leases ("ASU 2016-02"). This update requires that lessees recognize assets and liabilities on the balance sheet for the rights and obligations created by all leases with terms of more than 12 months. ASU 2016-02 also will require disclosures designed to give financial statement users information on the amount, timing, and uncertainty of cash flows arising from leases. These disclosures include both qualitative and quantitative information. The effective date for ASU 2016-02 is for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2018 with earlier adoption permitted. The Company is still evaluating the impact of ASU 2016-02 on its financial position and results of operations.

The accounting standards that have been issued by the FASB or other standards-setting bodies that do not require adoption until a future date are not expected to have a material impact on our financial statements upon adoption.

4) DISTRIBUTION AGREEMENT RECEIVABLE AND DEFERRED REVENUE

Effective September 1, 2011, the Company entered into an agreement with Young's Market Company for distribution of Company-produced wines in Oregon and Washington. The terms of this contract include exclusive rights to distribute Willamette Valley Vineyard's wines in Oregon and Washington for seven years expiring September 1, 2018. To facilitate the transition, with as little disruption as possible, Young's Market Company agreed to compensate Willamette Valley Vineyards for ongoing Oregon sales and branding efforts. As a result, the Company was due to receive \$250,000 per year starting on September 2011 for each of the next four years for a total of \$1,000,000. In October of 2014, the Company received payment of the final \$250,000 under this agreement. The total amount of \$1,000,000 received by the Company related to this agreement is being recognized as revenue on a straight line basis over the seven year life of the agreement. 8) SEGMENT REPORTING

The Company has identified two operating segments, Direct Sales and Distributor Sales, based upon their different distribution channels, margins and selling strategies. Direct Sales includes retail sales in the tasting room and remote sites, Wine Club sales, on-site events, kitchen and catering sales and other sales made directly to the consumer without the use of an intermediary, including sales of bulk wine or grapes. Distributor Sales include all sales through a third party where prices are given at a wholesale rate.

The two segments reflect how the Company's operations are evaluated by senior management and the structure of its internal financial reporting. The Company evaluates performance based on the gross profit of the respective business segments. Selling expenses that can be directly attributable to the segment, including depreciation of segment specific assets, are included, however, centralized selling expenses and general and administrative expenses are not allocated between operating segments. Therefore, net income information for the respective segments is not available. Discrete financial information related to segment assets, other than segment specific depreciation associated with selling, is not available and that information continues to be aggregated.

The following table outlines the sales, cost of sales, gross margin, directly attributable selling expenses, and contribution margin of the segments for the three and six month periods ending June 30, 2018 and 2017. Sales figures are net of related excise taxes.

10) COMMITMENTS AND CONTINGENCIES

Litigation – From time to time, in the normal course of business, the Company is a party to legal proceedings. Management believes that these matters will not have a material adverse effect on the Company’s financial position, results of operations or cash flows, but, due to the nature of litigation, the ultimate outcome of any potential actions cannot presently be determined.

Grape Purchases - The Company has entered into a long-term grape purchase agreement with one of its Willamette Valley wine grape growers. This contract amended and extended three separate contracts for the purchase of fruit through the 2023 harvest year. With this agreement the Company purchases an annually agreed upon quantity of fruit, at pre-determined prices, within strict quality standards and crop loads. The Company cannot calculate the minimum or maximum payment as such a calculation is dependent in large part on unknowns such as the quantity of fruit needed by the Company and the availability of grapes produced that meet the strict quality standards in any given year. If no grapes are produced that meet the contractual quality levels, the grapes may be refused, and no payment would be due.

Lease – The Company has entered a long-term lease to open Willamette Wine Works in Folsom, California which will include food and pairings and a unique hands-on blending experience featuring locally made Natoma wine.

Therefore, actual outcomes and results may differ materially from what is expressed or forecasted in such forward-looking statements due to numerous factors, including, but not limited to: availability of financing for growth, availability of adequate supply of high quality grapes, successful performance of internal operations, impact of competition, changes in wine broker or distributor relations or performance, impact of possible adverse weather conditions, impact of reduction in grape quality or supply due to disease, changes in consumer spending, the reduction in consumer demand for premium wines and the impact of governmental regulatory decisions. In addition, such statements could be affected by general industry and market conditions and growth rates, and general domestic economic conditions. Many of these risks as well as other risks that may have a material adverse impact on our operations and business, are identified in Item 1A in the Company’s Annual Report on Form 10-K for the year ended December 31, 2017, as well as in the Company’s other Securities and Exchange Commission filings and reports. The forward-looking statements in this report are made as of the date hereof, and, except as otherwise required by law, the Company disclaims any intention or obligation to update or revise any forward-looking statements or to update the reasons why the actual results could differ materially from those projected in the forward-looking statements, whether as a result of new information, future events or otherwise.

Critical Accounting Policies

The foregoing discussion and analysis of the Company's financial condition and results of operations are based upon our financial statements, which have been prepared in accordance with accounting principles generally accepted in the United States of America. The preparation of these financial statements requires the Company's management to make estimates and judgments that affect the reported amounts of assets, liabilities, revenues and expenses, and related disclosure of contingent assets and liabilities. On an on-going basis, the Company evaluates its estimates, including those related to revenue recognition, collection of accounts receivable, valuation of inventories, and amortization of vineyard development costs. The Company bases its estimates on historical experience and on various other assumptions that are believed to be reasonable under the circumstances. Actual results may differ from these estimates under different assumptions or conditions. A description of the Company's critical accounting policies and related judgments and estimates that affect the preparation of the Company's financial statements is set forth in the Company's Annual Report on Form 10-K for the year ended December 31, 2017. Such policies were unchanged during the six months ended June 30, 2018.

Overview

The Company continues to position itself for strategic growth through property purchases, property development and issuance of Preferred Stock. Management expects near term financial results to be negatively impacted by these activities as a result of incurring costs of accrued preferred stock dividends, strategic planning and development costs and other growth associated costs.

The Company's wines are made from grapes grown in vineyards owned, leased or contracted by the Company, and from grapes purchased from other nearby vineyards. The grapes are harvested, fermented and made into wine at the Company's winery in Turner Oregon (the "Winery") and the wines are sold principally under the Company's Willamette Valley Vineyards label, but also under the Griffin Creek, Elton, Pambrun, Maison Bleue and Tualatin Estates labels. The Company also owns the Tualatin Estate Vineyards and Winery, located near Forest Grove, Oregon. The Company generates revenues from the sales of wine to wholesalers and direct to consumers.

Direct to consumer sales primarily include sales through the Company's tasting rooms and wine club. Direct to consumer sales are more profitable to the Company than sales through distributors due to prices received being closer to retail than those prices paid by wholesalers. The Company continues to emphasize growth in direct to consumer sales through the Company's remodeled 35,642 square foot hospitality facility at the Winery and expansion and growth in wine club membership. Additionally, the Company's preferred stock sales since August 2015 have resulted in approximately 5,775 new preferred stockholders many of which the Company believes are wine enthusiasts. When considering joint ownership, these new shareholders represent approximately 9,000 potential customers of the Company. Additionally, the Company has approximately 8,853 common shareholders representing an estimated 13,700 potential customers when considering joint ownership. Membership in the Company's wine club decreased by approximately 28 net members, or 0.4%, to a total of 7,400 members during the six months ending June 30, 2018. The Company believes the increase in preferred shareholders, who receive enhanced discounts, has reduced the number of people who would otherwise become Wine Club members. However, management anticipates that new preferred shareholders will purchase the Company's wines over a longer period of time, than the average Wine Club member, making their enhanced winery status beneficial to the Company.

Periodically, the Company will sell grapes or bulk wine, due to them not meeting Company standards or being excess to production targets, however this is not a significant part of the Company's activities. The Company had bulk wine sales of \$134,970 for the three months ended June 30, 2018 and \$155,538 in bulk wine sales for the same period of 2017. The Company had bulk wine sales of \$134,970 for the six months ended June 30, 2018 and \$163,788 in bulk wine sales for the same period of 2017.

The Company sold approximately 67,558 and 65,081 cases of produced wine during the six months ended June 30, 2018 and 2017, respectively, an increase of 2,477 cases, or 3.8% in the current year period over the prior year period. The increase in wine case sales was the result of increased sales through distributors as well as increased direct to consumer case sales.

Cases sold in 2018 or 2017 does not include unfulfilled "futures", where a customer prepays for a wine not yet released. Proceeds from these sales are not recognized as revenue until shipped and are reflected as unearned revenue. Selling expenses for these sales are recognized in the period in which the expense is incurred.

Cost of sales includes grape costs, whether purchased or grown at Company vineyards, winemaking and processing costs, bottling, packaging, warehousing and shipping and handling costs. For grapes grown at Company vineyards, costs include farming expenditures and amortization of vineyard development costs.

At June 30, 2018, wine inventory included approximately 140,716 cases of bottled wine and 244,211 gallons of bulk wine in various stages of the aging process. Case wine is expected to be sold over the next 12 to 24 months and generally before the release date of the next vintage. The Winery bottled approximately 124,318 cases during the six months ended June 30, 2018.
