

AMERICAN NATIONAL BANKSHARES INC.

Form 10-K

March 15, 2016

UNITED STATES SECURITIES AND EXCHANGE COMMISSION

Washington, D.C. 20549

FORM 10-K

ANNUAL REPORT PURSUANT TO SECTION 13 OR 15(d)

OF THE SECURITIES EXCHANGE ACT OF 1934

For the fiscal year ended December 31, 2015

Commission file number 0-12820

AMERICAN NATIONAL BANKSHARES INC.

(Exact name of registrant as specified in its charter)

Virginia

(State of incorporation)

628 Main Street, Danville, VA

(Address of principal executive offices)

434-792-5111

54-1284688

(I.R.S. Employer Identification No.)

24541

(Zip Code)

Registrant's telephone number, including area code

Securities registered pursuant to Section 12(b) of the Act:

Title of Each Class

Common Stock, \$1 par value

Name of Exchange on Which Registered

NASDAQ Global Select Market

Securities registered pursuant to section 12(g) of the Act: None

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act.

Yes No

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the

Act. Yes No

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Website, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§ 232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K (§ 229.405 of this chapter) is not contained herein, and will not be contained, to the best of registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K.

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See definitions of "large accelerated filer," "accelerated filer," and "smaller reporting company" in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer Accelerated filer Non-accelerated filer Smaller reporting company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Act.) Yes No

The aggregate market value of the voting stock held by non-affiliates of the registrant at June 30, 2015, based on the closing price, was \$190,436,023.

The number of shares of the registrant's common stock outstanding on March 7, 2016 was 8,610,721.

DOCUMENTS INCORPORATED BY REFERENCE

Portions of the Proxy Statement of the Registrant for the Annual Meeting of Shareholders to be held on May 17, 2016, are incorporated by reference in Part III of this report.

PART I

Forward-Looking Statements

This report contains forward-looking statements with respect to the financial condition, results of operations and business of American National Bankshares Inc. (the "Company") and its wholly owned subsidiary, American National Bank and Trust Company (the "Bank"). These forward-looking statements involve risks and uncertainties and are based on the beliefs and assumptions of management of the Company and on information available to management at the time these statements and disclosures were prepared. Forward-looking statements are subject to numerous assumptions, estimates, risks, and uncertainties that could cause actual conditions, events, or results to differ materially from those stated or implied by such forward-looking statements.

A variety of factors, some of which are discussed in more detail in Item 1A – Risk Factors, may affect the operations, performance, business strategy, and results of the Company. Those factors include but are not limited to the following:

• Financial market volatility including the level of interest rates could affect the values of financial instruments and the amount of net interest income earned;

• General economic or business conditions, either nationally or in the market areas in which the Company does business, may be less favorable than expected, resulting in deteriorating credit quality, reduced demand for credit, or a weakened ability to generate deposits;

• Competition among financial institutions may increase and competitors may have greater financial resources and develop products and technology that enable those competitors to compete more successfully than the Company;

• Businesses that the Company is engaged in may be adversely affected by legislative or regulatory changes, including changes in accounting standards;

• The ability to retain key personnel;

• The failure of assumptions underlying the allowance for loan losses; and

• Risks associated with mergers, acquisitions, and other expansion activities.

ITEM 1 – BUSINESS

American National Bankshares Inc. is a one-bank holding company organized under the laws of the Commonwealth of Virginia in 1984. On September 1, 1984, the Company acquired all of the outstanding capital stock of American National Bank and Trust Company, a national banking association chartered in 1909 under the laws of the United States. American National Bank and Trust Company is the only banking subsidiary of the Company.

On July 1, 2011, the Company completed its acquisition of MidCarolina Financial Corporation ("MidCarolina") pursuant to the terms and conditions of the Agreement and Plan of Reorganization, dated December 15, 2010, between the Company and MidCarolina. MidCarolina was headquartered in Burlington, North Carolina, and engaged in banking operations through its subsidiary bank, MidCarolina Bank. The transaction has expanded the Company's footprint in North Carolina, adding eight branches in Alamance and Guilford Counties.

On January 1, 2015, the Company completed its acquisition of MainStreet BankShares, Inc. ("MainStreet") pursuant to the terms and conditions of the Agreement and Plan of Reorganization, dated as of August 24, 2014, between the Company and MainStreet. Immediately after the merger of MainStreet into the Company, Franklin Community Bank, N.A. ("Franklin Bank"), MainStreet's wholly-owned bank subsidiary, merged with and into the Bank.

Pursuant to the MainStreet Merger Agreement, the former holders of shares of MainStreet common stock received \$3.46 in cash and 0.482 shares of the Company's common stock for each share of MainStreet common stock held immediately prior to the effective date of the merger, plus cash in lieu of fractional shares. Each option to purchase shares of MainStreet common stock that was outstanding immediately prior to the effective date of the merger vested upon the merger and was converted into an option to purchase shares of the Company's common stock, adjusted based on a 0.643 exchange ratio. Each share of the Company's common stock outstanding immediately prior to the merger remained outstanding and was unaffected by the merger. The cash portion of the merger consideration was funded through a cash dividend of \$6,000,000 from the Bank to the Company, and no borrowing was incurred by the Company or the Bank in connection with the merger.

MainStreet was the holding company for Franklin Bank. Immediately prior to the Company's acquisition of MainStreet on January 1, 2015, MainStreet had total net loans of approximately \$122,000,000, total assets of approximately \$164,000,000, and total deposits of approximately \$137,000,000. Franklin Bank provided banking

services to its customers from three banking offices located in Rocky Mount, Hardy, and Union Hall, Virginia, which are now branch offices of the Bank.

3

As of December 31, 2015, the operations of the Company are conducted at twenty-five banking offices and two loan production offices in Roanoke, Virginia and Raleigh, North Carolina. The Bank provides a full array of financial products and services, including commercial, mortgage, and consumer banking; trust and investment services; and insurance. Services are also provided through thirty-three Automated Teller Machines ("ATMs"), "Online Banking," and "Telephone Banking."

The Company has two reportable segments, (i) community banking and (ii) trust and investment services. For more financial data and other information about each of the Company's operating segments, refer to "Note 21 - Segment and Related Information" of the Consolidated Financial Statements contained in Item 8 of this Form 10-K.

Competition and Markets

Vigorous competition exists in the Company's service areas. The Company competes not only with national, regional, and community banks, but also with other types of financial institutions including savings banks, finance companies, mutual and money market fund providers, brokerage firms, insurance companies, credit unions, and mortgage companies.

The Company has the largest deposit market share in the City of Danville, Virginia. The Company had a deposit market share in the Danville Micropolitan Statistical Area of 32.8% at June 30, 2015, based on Federal Deposit Insurance Corporation ("FDIC") data. The Company has the second largest deposit market share in Pittsylvania County, Virginia. The Company had a deposit market share in Pittsylvania County of 21.1% at June 30, 2015, based on FDIC data.

The Southern Virginia market, in which the Company has a significant presence, continues to experience slow economic growth, like much of the country. The region's economic base continues to be weighted toward the manufacturing sector. Although the region was negatively impacted by the elimination of many textile plant closings over several decades, the area has experienced some new manufacturing plant openings as well as job growth in the technology area. Other important industries include farming, tobacco processing and sales, food processing, and packaging tape production.

The Company's market areas in North Carolina are Alamance County and Guilford County, North Carolina, where there is strong competition in attracting deposits and making loans. Its most direct competition for deposits comes from commercial banks, savings institutions and credit unions located in the market area, including large financial institutions that have greater financial and marketing resources available to them. The Company had a deposit market share in Alamance County of 13.6% at June 30, 2015, based on FDIC data, which was the second largest of any FDIC-insured institution.

Supervision and Regulation

The Company and the Bank are extensively regulated under federal and state law. The following information describes certain aspects of that regulation applicable to the Company and the Bank and does not purport to be complete. Proposals to change the laws and regulations governing the banking industry are frequently raised in U.S. Congress, in state legislatures, and before the various bank regulatory agencies. The likelihood and timing of any changes and the impact such changes might have on the Company and the Bank are impossible to determine with any certainty. A change in applicable laws or regulations, or a change in the way such laws or regulations are interpreted by regulatory agencies or courts, may have a material impact on the business, operations, and earnings of the Company and the Bank.

American National Bankshares Inc.

American National Bankshares Inc. is qualified as a bank holding company ("BHC") within the meaning of the Bank Holding Company Act of 1956, as amended (the "BHC Act"), and is registered as such with the Board of Governors of the Federal Reserve System (the "FRB"). As a bank holding company, American National Bankshares Inc. is subject to supervision, regulation and examination by the FRB and is required to file various reports and additional information with the FRB. American National Bankshares Inc. is also registered under the bank holding company laws of Virginia and is subject to supervision, regulation and examination by the Virginia State Corporation Commission (the "SCC").

Under the Gramm-Leach-Bliley Act, a BHC may elect to become a financial holding company and thereby engage in a broader range of financial and other activities than are permissible for traditional BHC's. In order to qualify for the election, all of the depository institution subsidiaries of the BHC must be well capitalized, well managed, and have

achieved a rating of "satisfactory" or better under the Community Reinvestment Act (the "CRA"). Financial holding companies are permitted to engage in activities that are "financial in nature" or incidental or complementary thereto as determined by the FRB. The Gramm-Leach-Bliley Act identifies several activities as "financial in nature," including insurance underwriting and sales, investment advisory services, merchant banking and underwriting, and dealing or making a market in securities. American National Bankshares Inc. has not elected to become a financial holding company, and has no plans to become a financial holding company.

American National Bank and Trust Company

American National Bank and Trust Company is a federally chartered national bank and is a member of the Federal Reserve System. It is subject to federal regulation by the Office of the Comptroller of the Currency (the "OCC"), the FRB, and the FDIC.

Depository institutions, including the Bank, are subject to extensive federal and state regulations that significantly affect their business and activities. Regulatory bodies have broad authority to implement standards and initiate proceedings designed to prohibit depository institutions from engaging in unsafe and unsound banking practices. The standards relate generally to operations and management, asset quality, interest rate exposure, and capital. The bank regulatory agencies are authorized to take action against institutions that fail to meet such standards.

As with other financial institutions, the earnings of the Bank are affected by general economic conditions and by the monetary policies of the FRB. The FRB exerts a substantial influence on interest rates and credit conditions, primarily through open market operations in U.S. Government securities, setting the reserve requirements of member banks, and establishing the discount rate on member bank borrowings. The policies of the FRB have a direct impact on loan and deposit growth and the interest rates charged and paid thereon. They also impact the source, cost of funds, and the rates of return on investments. Changes in the FRB's monetary policies have had a significant impact on the operating results of the Bank and other financial institutions and are expected to continue to do so in the future; however, the exact impact of such conditions and policies upon the future business and earnings cannot accurately be predicted.

The Dodd-Frank Act

On July 21, 2010, President Obama signed into law the Dodd-Frank Wall Street Reform and Consumer Protection Act (the "Dodd-Frank Act"). The Dodd-Frank Act significantly restructures the financial regulatory regime in the United States and has a broad impact on the financial services industry as a result of the significant regulatory and compliance changes required under the act. While significant rulemaking under the Dodd-Frank Act has occurred, certain of the act's provisions require additional rulemaking by the federal bank regulatory agencies, a process which will take years to fully implement. The Company believes that short- and long-term compliance costs for the Company will be greater because of the Dodd-Frank Act.

A summary of certain provisions of the Dodd-Frank Act is set forth below:

Increased Capital Standards. The federal banking agencies are required to establish minimum leverage and risk-based capital requirements for banks and bank holding companies. See "Capital Requirements" below. Among other things, the Dodd-Frank Act provides for newer and stronger standards.

Deposit Insurance. The Dodd-Frank Act makes permanent the \$250,000 deposit insurance limit for insured deposits. Amendments to the Federal Deposit Insurance Act also revise the assessment base against which an insured depository institution's deposit insurance premiums paid to the Deposit Insurance Fund (the "DIF") will be calculated. Under the amendments, the assessment base will no longer be the institution's deposit base, but rather its average consolidated total assets less its average tangible equity during the assessment period. Additionally, the Dodd-Frank Act makes changes to the minimum designated reserve ratio of the DIF, increasing the minimum from 1.15% to 1.35% of the estimated amount of total insured deposits and eliminating the requirement that the FDIC pay dividends to depository institutions when the reserve ratio exceeds certain thresholds. The Dodd-Frank Act also provides that depository institutions may pay interest on demand deposits.

The Consumer Financial Protection Bureau ("CFPB"). The CFPB is charged with establishing rules and regulations under certain federal consumer protection laws with respect to the conduct of providers of certain consumer financial products and services.

Compensation Practices. The Dodd-Frank Act provides that the appropriate federal regulators must establish standards prohibiting as an unsafe and unsound practice any compensation plan of a bank holding company or bank that provides an insider or other employee with "excessive compensation" or could lead to a material financial loss to such firm. In June 2010, prior to the Dodd-Frank Act, the federal bank regulatory agencies promulgated the Interagency Guidance on Sound Incentive Compensation Policies, which requires that financial institutions establish metrics for measuring the impact of activities to achieve incentive compensation with the related risk to the financial institution of such behavior.

Although a significant number of the rules and regulations mandated by the Dodd-Frank Act have been finalized, certain of the act's requirements have yet to be implemented. Given the uncertainty associated with the manner in

which the provisions of the Dodd-Frank Act will be implemented by the federal bank regulatory agencies in the future, the full extent of the impact such requirements will have on the operations of the Company and the Bank is unclear. The changes resulting from the Dodd-Frank Act may affect the profitability of business activities, require changes to certain business practices, impose more

stringent regulatory requirements or otherwise adversely affect the business and financial condition of the Company and the Bank. These changes may also require the Company to invest significant management attention and resources to evaluate and make necessary changes to comply with new statutory and regulatory requirements.

Deposit Insurance

The deposits of the Bank are insured up to applicable limits by the Deposit Insurance Fund of the FDIC and are subject to deposit insurance assessments to maintain the DIF. On April 1, 2011, the deposit insurance assessment base changed from total deposits to average total assets minus average tangible equity, pursuant to a rule issued by the FDIC as required by the Dodd-Frank Act.

The Federal Deposit Insurance Act (the "FDIA"), as amended by the Federal Deposit Insurance Reform Act and the Dodd-Frank Act, requires the FDIC to set a ratio of deposit insurance reserves to estimated insured deposits of at least 1.35%. The FDIC utilizes a risk-based assessment system that imposes insurance premiums based upon a risk matrix that takes into account a bank's capital level and supervisory rating. On February 27, 2009, the FDIC introduced three possible adjustments to an institution's initial base assessment rate: (i) a decrease of up to five basis points for long-term unsecured debt, including senior unsecured debt (other than debt guaranteed under the Temporary Liquidity Guarantee Program) and subordinated debt and, for small institutions, a portion of Tier 1 capital; (ii) an increase not to exceed 50% of an institution's assessment rate before the increase for secured liabilities in excess of 25% of domestic deposits; and (iii) for non-Risk Category I institutions, an increase not to exceed 10 basis points for brokered deposits in excess of 10% of domestic deposits. In 2015 and 2014, the Company paid only the base assessment rate for "well capitalized" institutions, which totaled \$750,000 and \$647,000, respectively, in regular deposit insurance assessments. In addition, all FDIC insured institutions are required to pay assessments to the FDIC at an annual rate of approximately one basis point of insured deposits to fund interest payments on bonds issued by the Financing Corporation, an agency of the federal government established to recapitalize the predecessor to the Savings Association Insurance Fund. These assessments will continue until the Financing Corporation bonds mature in 2017 through 2019.

Capital Requirements

The FRB, the OCC and the FDIC have issued substantially similar risk-based and leverage capital guidelines applicable to all banks and bank holding companies. In addition, those regulatory agencies may from time to time require that a banking organization maintain capital above the minimum levels because of its financial condition or actual or anticipated growth. Under the risk-based capital requirements of these federal bank regulatory agencies that were effective through December 31, 2015, American National Bankshares Inc. and American National Bank were required to maintain a minimum ratio of total capital (which is defined as core capital and supplementary capital less certain specified deductions from total capital such as reciprocal holdings of depository institution capital instruments and equity investments) to risk-weighted assets of at least 8.0%. In determining the amount of risk-weighted assets, all assets, including certain off-balance sheet activities, recourse obligations, residual interests and direct credit substitutes, were multiplied by a risk-weight factor assigned by the capital regulation based on the risks believed inherent in the type of asset.

On June 7, 2012, the FRB issued a series of proposed rules intended to revise and strengthen its risk-based and leverage capital requirements and its method for calculating risk-weighted assets. The rules were proposed to implement the Basel III regulatory capital reforms from the Basel Committee on Banking Supervision and certain provisions of the Dodd-Frank Act. On July 2, 2013, the Federal Reserve approved certain revisions to the proposals and finalized new capital requirements for banking organizations.

Effective January 1, 2015, the final rules required the Company and the Bank to comply with the following new minimum capital ratios: (i) a new common equity Tier 1 capital ratio of 4.5% of risk-weighted assets; (ii) a Tier 1 capital ratio of 6% of risk-weighted assets (increased from the prior requirement of 4%); (iii) a total capital ratio of 8% of risk-weighted assets (unchanged from the prior requirement); and (iv) a leverage ratio of 4% of total assets (unchanged from the prior requirement). These are the initial capital requirements, which will be phased in over a four-year period. When fully phased in on January 1, 2019, the rules will require the Company and the Bank to maintain (i) a minimum ratio of common equity Tier 1 to risk-weighted assets of at least 4.5%, plus a 2.5% "capital conservation buffer" (which is added to the 4.5% common equity Tier 1 ratio as that buffer is phased in, effectively resulting in a minimum ratio of common equity Tier 1 to risk-weighted assets of at least 7% upon full

implementation), (ii) a minimum ratio of Tier 1 capital to risk-weighted assets of at least 6.0%, plus the 2.5% capital conservation buffer (which is added to the 6.0% Tier 1 capital ratio as that buffer is phased in, effectively resulting in a minimum Tier 1 capital ratio of 8.5% upon full implementation), (iii) a minimum ratio of total capital to risk-weighted assets of at least 8.0%, plus the 2.5% capital conservation buffer (which is added to the 8.0% total capital ratio as that buffer is phased in, effectively resulting in a minimum total capital ratio of 10.5% upon full implementation), and (iv) a minimum leverage ratio of 4%, calculated as the ratio of Tier 1 capital to average assets.

The Tier 1 and total capital to risk-weighted asset ratios of the Company were 15.23% and 16.34%, respectively, as of December 31, 2015, thus exceeding the minimum requirements. The common equity Tier 1 capital ratio of the Company was 12.88% and the Bank was 14.58% as of December 31, 2015. The Tier 1 and total capital to risk-weighted asset ratios of the Bank were 14.58% and 15.67%, respectively, as of December 31, 2015 also exceeding the minimum requirements.

The capital conservation buffer requirement will be phased in beginning January 1, 2016, at 0.625% of risk-weighted assets, increasing by the same amount each year until fully implemented at 2.5% on January 1, 2019. The capital conservation buffer is designed to absorb losses during periods of economic stress. Banking institutions with a ratio of common equity Tier 1 to risk-weighted assets above the minimum but below the conservation buffer will face constraints on dividends, equity repurchases, and compensation based on the amount of the shortfall.

With respect to the Bank, the rules also revised the "prompt corrective action" regulations pursuant to Section 38 of the FDIA by (i) introducing a common equity Tier 1 capital ratio requirement at each level (other than critically undercapitalized), with the required ratio being 6.5% for well-capitalized status; (ii) increasing the minimum Tier 1 capital ratio requirement for each category, with the minimum ratio for well-capitalized status being 8.0% (as compared to the prior ratio of 6.0%); and (iii) eliminating the current provision that provides that a bank with a composite supervisory rating of 1 may have a 3.0% Tier 1 leverage ratio and still be well-capitalized. These new thresholds were effective for the Bank as of January 1, 2015. The minimum total capital to risk-weighted assets ratio (10.0%) and minimum leverage ratio (5.0%) for well-capitalized status were unchanged by the final rules.

The new capital requirements also included changes in the risk weights of assets to better reflect credit risk and other risk exposures. These include a 150% risk weight (up from 100%) for certain high volatility commercial real estate acquisition, development and construction loans and nonresidential mortgage loans that are 90 days past due or otherwise on nonaccrual status, a 20% (up from 0%) credit conversion factor for the unused portion of a commitment with an original maturity of one year or less that is not unconditionally cancelable, a 250% risk weight (up from 100%) for mortgage servicing rights and deferred tax assets that are not deducted from capital, and increased risk-weights (from 0% to up to 600%) for equity exposures.

Based on management's understanding and interpretation of the new capital rules, it believes that, as of December 31, 2015, the Company and the Bank meet all capital adequacy requirements under such rules on a fully phased-in basis as if such requirements were in effect as of such date.

Dividends

The Company's principal source of cash flow, including cash flow to pay dividends to its shareholders, is dividends it receives from the Bank. Statutory and regulatory limitations apply to the Bank's payment of dividends to the Company. As a general rule, the amount of a dividend may not exceed, without prior regulatory approval, the sum of net income in the calendar year to date and the retained net earnings of the immediately preceding two calendar years. A depository institution may not pay any dividend if payment would cause the institution to become "undercapitalized" or if it already is "undercapitalized." The OCC may prevent the payment of a dividend if it determines that the payment would be an unsafe and unsound banking practice. The OCC also has advised that a national bank should generally pay dividends only out of current operating earnings.

Permitted Activities

As a bank holding company, American National Bankshares Inc. is limited to managing or controlling banks, furnishing services to or performing services for its subsidiaries, and engaging in other activities that the FRB determines by regulation or order to be so closely related to banking or managing or controlling banks as to be a proper incident thereto. In determining whether a particular activity is permissible, the FRB must consider whether the performance of such an activity reasonably can be expected to produce benefits to the public that outweigh possible adverse effects. Possible benefits include greater convenience, increased competition, and gains in efficiency. Possible adverse effects include undue concentration of resources, decreased or unfair competition, conflicts of interest, and unsound banking practices. Despite prior approval, the FRB may order a bank holding company or its subsidiaries to terminate any activity or to terminate ownership or control of any subsidiary when the FRB has reasonable cause to believe that a serious risk to the financial safety, soundness or stability of any bank subsidiary of that bank holding company may result from such an activity.

Banking Acquisitions; Changes in Control

The BHC Act requires, among other things, the prior approval of the FRB in any case where a bank holding company proposes to (i) acquire direct or indirect ownership or control of more than 5% of the outstanding voting stock of any bank or bank holding company (unless it already owns a majority of such voting shares), (ii) acquire all or substantially all of the assets of another bank or bank holding company, or (iii) merge or consolidate with any other bank holding company. In determining whether to approve a proposed bank acquisition, the FRB will consider, among other factors, the effect of the acquisition on competition, the public benefits expected to be received from the acquisition, the projected capital ratios and levels on a post-acquisition basis, and the acquiring institution's performance under the Community Reinvestment Act of 1977 (the "CRA") and its compliance with fair housing and other consumer protection laws.

Subject to certain exceptions, the BHC Act and the Change in Bank Control Act, together with the applicable regulations, require FRB approval (or, depending on the circumstances, no notice of disapproval) prior to any person or company acquiring "control" of a bank or bank holding company. A conclusive presumption of control exists if an individual or company acquires the power, directly or indirectly, to direct the management or policies of an insured depository institution or to vote 25% or more of any class of voting securities of any insured depository institution. A rebuttable presumption of control exists if a person or company acquires 10% or more but less than 25% of any class of voting securities of an insured depository institution and either the institution has registered its securities with the Securities and Exchange Commission under Section 12 of the Securities Exchange Act of 1934 (the "Exchange Act") or no other person will own a greater percentage of that class of voting securities immediately after the acquisition. The Company's common stock is registered under Section 12 of the Exchange Act.

In addition, Virginia law requires the prior approval of the SCC for (i) the acquisition of more than 5% of the voting shares of a Virginia bank or any holding company that controls a Virginia bank, or (ii) the acquisition by a Virginia bank holding company of a bank or its holding company domiciled outside Virginia.

Source of Strength

FRB policy has historically required bank holding companies to act as a source of financial and managerial strength to their subsidiary banks. The Dodd-Frank Act codified this policy as a statutory requirement. Under this requirement, the Company is expected to commit resources to support the Bank, including at times when the Company may not be in a financial position to provide such resources. Any capital loans by a bank holding company to any of its subsidiary banks are subordinate in right of payment to depositors and to certain other indebtedness of such subsidiary banks. In the event of a bank holding company's bankruptcy, any commitment by the bank holding company to a federal bank regulatory agency to maintain the capital of a subsidiary bank will be assumed by the bankruptcy trustee and entitled to priority of payment.

Safety and Soundness

There are a number of obligations and restrictions imposed on bank holding companies and their subsidiary banks by law and regulatory policy that are designed to minimize potential loss to the depositors of such depository institutions and the FDIC insurance fund in the event of a depository institution default. For example, under the Federal Deposit Insurance Corporation Improvement Act of 1991, to avoid receivership of an insured depository institution subsidiary, a bank holding company is required to guarantee the compliance of any subsidiary bank that may become "undercapitalized" with the terms of any capital restoration plan filed by such subsidiary with its appropriate federal bank regulatory agency up to the lesser of (i) an amount equal to 5% of the institution's total assets at the time the institution became undercapitalized or (ii) the amount that is necessary (or would have been necessary) to bring the institution into compliance with all applicable capital standards as of the time the institution fails to comply with such capital restoration plan.

Under the FDIA, the federal bank regulatory agencies have adopted guidelines prescribing safety and soundness standards. These guidelines establish general standards relating to internal controls and information systems, internal audit systems, loan documentation, credit underwriting, interest rate exposure, asset growth and compensation, fees and benefits. In general, the guidelines require, among other things, appropriate systems and practices to identify and manage the risk and exposures specified in the guidelines.

The Federal Deposit Insurance Corporation Improvement Act

Under the Federal Deposit Insurance Corporation Improvement Act of 1991 ("FDICIA"), the federal bank regulatory agencies possess broad powers to take prompt corrective action to resolve problems of insured depository institutions. The extent of these powers depends upon whether the institution is "well capitalized," "adequately capitalized," "undercapitalized," "significantly undercapitalized," or "critically undercapitalized," as defined by the law.

Reflecting changes under the new Basel III capital requirements, the relevant capital measures that became effective on January 1, 2015 for prompt corrective action are the total capital ratio, the common equity Tier 1 capital ratio, the Tier 1 capital ratio and the leverage ratio. A bank will be (i) "well capitalized" if the institution has a total risk-based capital ratio of 10.0% or greater, a common equity Tier 1 capital ratio of 6.5% or greater, a Tier 1 risk-based capital ratio of 8.0% or greater, and a leverage ratio of 5.0% or greater, and is not subject to any capital directive order; (ii) "adequately capitalized" if the institution has a total risk-based capital ratio of 8.0% or greater, a common equity Tier 1 capital ratio of 4.5% or greater, a Tier 1 risk-based capital ratio of 6.0% or greater, and a leverage ratio of 4.0% or greater and is not "well capitalized"; (iii) "undercapitalized" if the institution has a total risk-based capital ratio that is less than 8.0%, a common equity Tier 1 capital ratio less than 4.5%, a Tier 1 risk-based capital ratio of less than 6.0% or a leverage ratio of less than 4.0%; (iv) "significantly undercapitalized" if the institution has a total risk-based capital ratio of less than 6.0%, a common equity Tier 1 capital ratio less than 3.0%, a Tier 1 risk-based capital ratio of less than 4.0% or a leverage ratio of less than 3.0%; and (v) "critically undercapitalized" if the institution's tangible equity is equal to or less than 2.0% of average quarterly tangible assets. An institution may be downgraded to, or deemed to be in, a capital category that is lower than indicated by its capital ratios if it is determined to be in an unsafe or unsound condition or if it receives an unsatisfactory examination rating with respect to certain matters. A bank's capital category is determined solely for the purpose of applying prompt corrective action regulations, and the capital category may not constitute an accurate representation of the bank's overall financial condition or prospects for other purposes. Management believes, as of December 31, 2015 and 2014, the Company met the requirements for being classified as "well capitalized."

As required by FDICIA, the federal bank regulatory agencies also have adopted guidelines prescribing safety and soundness standards relating to, among other things, internal controls and information systems, internal audit systems, loan documentation, credit underwriting, and interest rate exposure. In general, the guidelines require appropriate systems and practices to identify and manage the risks and exposures specified in the guidelines. In addition, the agencies adopted regulations that authorize, but do not require, an institution which has been notified that it is not in compliance with safety and soundness standard to submit a compliance plan. If, after being so notified, an institution fails to submit an acceptable compliance plan, the agency must issue an order directing action to correct the deficiency and may issue an order directing other actions of the types to which an undercapitalized institution is subject under the prompt corrective action provisions described above.

Branching

The Riegle-Neal Interstate Banking and Branching Efficiency Act of 1994, as amended (the "Interstate Banking Act"), generally permits well capitalized bank holding companies to acquire banks in any state, and preempts all state laws restricting the ownership by a bank holding company of banks in more than one state. The Interstate Banking Act also permits a bank to merge with an out-of-state bank and convert any offices into branches of the resulting bank if both states have not opted out of interstate branching; and permits a bank to acquire branches from an out-of-state bank if the law of the state where the branches are located permits the interstate branch acquisition. Under the Dodd-Frank Act, a bank holding company or bank must be well capitalized and well managed to engage in an interstate acquisition. Bank holding companies and banks are required to obtain prior FRB approval to acquire more than 5% of a class of voting securities, or substantially all of the assets, of a bank holding company, bank or savings association. The Interstate Banking Act and the Dodd-Frank Act permit banks to establish and operate de novo interstate branches to the same extent a bank chartered by the host state may establish branches.

Transactions with Affiliates

Pursuant to Sections 23A and 23B of the Federal Reserve Act and Regulation W, the authority of the Bank to engage in transactions with related parties or "affiliates" or to make loans to insiders is limited. Loan transactions with an affiliate generally must be collateralized and certain transactions between the Bank and its affiliates, including the sale of assets, the payment of money or the provision of services, must be on terms and conditions that are substantially the same, or at least as favorable to the Bank, as those prevailing for comparable nonaffiliated transactions. In addition, the Bank generally may not purchase securities issued or underwritten by affiliates.

Loans to executive officers, directors or to any person who directly or indirectly, or acting through or in concert with one or more persons, owns, controls or has the power to vote more than 10% of any class of voting securities of a bank (a "10% Shareholders"), are subject to Sections 22(g) and 22(h) of the Federal Reserve Act and their

corresponding regulations (Regulation O) and Section 13(k) of the Exchange Act relating to the prohibition on personal loans to executives (which exempts financial institutions in compliance with the insider lending restrictions of Section 22(h) of the Federal Reserve Act). Among other things, these loans must be made on terms substantially the same as those prevailing on transactions made to unaffiliated individuals and certain extensions of credit to those persons must first be approved in advance by a disinterested majority of the entire board of directors. Section 22(h) of the Federal Reserve Act prohibits loans to any of those individuals where the aggregate amount exceeds an amount equal to 15% of an institution's unimpaired capital and surplus plus an

additional 10% of unimpaired capital and surplus in the case of loans that are fully secured by readily marketable collateral, or when the aggregate amount on all of the extensions of credit outstanding to all of these persons would exceed the Bank's unimpaired capital and unimpaired surplus. Section 22(g) of the Federal Reserve Act identifies limited circumstances in which the Bank is permitted to extend credit to executive officers.

Consumer Financial Protection

The Company is subject to a number of federal and state consumer protection laws that extensively govern its relationship with its customers. These laws include the Equal Credit Opportunity Act, the Fair Credit Reporting Act, the Truth in Lending Act, the Truth in Savings Act, the Electronic Fund Transfer Act, the Expedited Funds Availability Act, the Home Mortgage Disclosure Act, the Fair Housing Act, the Real Estate Settlement Procedures Act, the Fair Debt Collection Practices Act, the Service Members Civil Relief Act, laws governing flood insurance, federal and state laws prohibiting unfair and deceptive business practices, foreclosure laws, and various regulations that implement some or all of the foregoing. These laws and regulations mandate certain disclosure requirements and regulate the manner in which financial institutions must deal with customers when taking deposits, making loans, collecting loans and providing other services. If the Company fails to comply with these laws and regulations, it may be subject to various penalties. Failure to comply with consumer protection requirements may also result in failure to obtain any required bank regulatory approval for merger or acquisition transactions the Company may wish to pursue or being prohibited from engaging in such transactions even if approval is not required.

The Dodd-Frank Act centralized responsibility for consumer financial protection by creating a new agency, the CFPB, and giving it responsibility for implementing, examining, and enforcing compliance with federal consumer protection laws. The CFPB focuses on (i) risks to consumers and compliance with the federal consumer financial laws, (ii) the markets in which firms operate and risks to consumers posed by activities in those markets, (iii) depository institutions that offer a wide variety of consumer financial products and services, and (iv) non-depository companies that offer one or more consumer financial products or services. The CFPB has broad rule making authority for a wide range of consumer financial laws that apply to all banks, including, among other things, the authority to prohibit "unfair, deceptive or abusive" acts and practices. Abusive acts or practices are defined as those that materially interfere with a consumer's ability to understand a term or condition of a consumer financial product or service or take unreasonable advantage of a consumer's (i) lack of financial savvy, (ii) inability to protect himself in the selection or use of consumer financial products or services, or (iii) reasonable reliance on a covered entity to act in the consumer's interests. The CFPB can issue cease-and-desist orders against banks and other entities that violate consumer financial laws. The CFPB may also institute a civil action against an entity in violation of federal consumer financial law in order to impose a civil penalty or injunction.

Community Reinvestment Act

The CRA requires the appropriate federal banking agency, in connection with its examination of a bank, to assess the bank's record in meeting the credit needs of the communities served by the bank, including low and moderate income neighborhoods. Furthermore, such assessment is also required of banks that have applied, among other things, to merge or consolidate with or acquire the assets or assume the liabilities of an insured depository institution, or to open or relocate a branch. In the case of a BHC applying for approval to acquire a bank or BHC, the record of each subsidiary bank of the applicant BHC is subject to assessment in considering the application. Under the CRA, institutions are assigned a rating of "outstanding," "satisfactory," "needs to improve," or "substantial non-compliance." The Company was rated "satisfactory" in its most recent CRA evaluation.

Anti-Money Laundering Legislation

The Company is subject to the Bank Secrecy Act and other anti-money laundering laws and regulations, including the USA Patriot Act of 2001. Among other things, these laws and regulations require the Company to take steps to prevent the use of the Company for facilitating the flow of illegal or illicit money, to report large currency transactions, and to file suspicious activity reports. The Company is also required to carry out a comprehensive anti-money laundering compliance program. Violations can result in substantial civil and criminal sanctions. In addition, provisions of the USA Patriot Act require the federal bank regulatory agencies to consider the effectiveness of a financial institution's anti-money laundering activities when reviewing bank mergers and BHC acquisitions.

Privacy Legislation

Several recent laws, including the Right to Financial Privacy Act, and related regulations issued by the federal bank regulatory agencies, also provide new protections against the transfer and use of customer information by financial institutions. A financial institution must provide to its customers information regarding its policies and procedures with respect to the handling of customers' personal information. Each institution must conduct an internal risk assessment of its ability to protect customer information. These privacy provisions generally prohibit a financial institution from providing a customer's personal financial information to unaffiliated parties without prior notice and approval from the customer.

Incentive Compensation

In June 2010, the federal bank regulatory agencies issued comprehensive final guidance on incentive compensation policies intended to ensure that the incentive compensation policies of financial institutions do not undermine the safety and soundness of such institutions by encouraging excessive risk-taking. The Interagency Guidance on Sound Incentive Compensation Policies, which covers all employees that have the ability to materially affect the risk profile of a financial institutions, either individually or as part of a group, is based upon the key principles that a financial institution's incentive compensation arrangements should (i) provide incentives that do not encourage risk-taking beyond the institution's ability to effectively identify and manage risks, (ii) be compatible with effective internal controls and risk management, and (iii) be supported by strong corporate governance, including active and effective oversight by the financial institution's board of directors.

The FRB will review, as part of the regular, risk-focused examination process, the incentive compensation arrangements of financial institutions, such as the Company, that are not "large, complex banking organizations." These reviews will be tailored to each financial institution based on the scope and complexity of the institution's activities and the prevalence of incentive compensation arrangements. The findings of the supervisory initiatives will be included in reports of examination. Deficiencies will be incorporated into the institution's supervisory ratings, which can affect the institution's ability to make acquisitions and take other actions. Enforcement actions may be taken against a financial institution if its incentive compensation arrangements, or related risk-management control or governance processes, pose a risk to the institution's safety and soundness and the financial institution is not taking prompt and effective measures to correct the deficiencies. At December 31, 2015, the Company had not been made aware of any instances of non-compliance with the final guidance.

Volcker Rule

The Volcker Rule under the Dodd-Frank Act prohibits banks and their affiliates from engaging in proprietary trading and investing in and sponsoring hedge funds and private equity funds. The Volcker Rule, which became effective in July 2015, does not significantly impact the operations of the Company or the Bank, as they do not have any significant engagement in the businesses prohibited by the Volcker Rule.

Ability-to-Repay and Qualified Mortgage Rule

Pursuant to the Dodd-Frank Act, the CFPB issued a final rule on January 10, 2013 (effective on January 10, 2014), amending Regulation Z as implemented by the Truth in Lending Act, requiring mortgage lenders to make a reasonable and good faith determination based on verified and documented information that a consumer applying for a mortgage loan has a reasonable ability to repay the loan according to its terms. Mortgage lenders are required to determine consumers' ability to repay in one of two ways. The first alternative requires the mortgage lender to consider the following eight underwriting factors when making the credit decision: (i) current or reasonably expected income or assets; (ii) current employment status; (iii) the monthly payment on the covered transaction; (iv) the monthly payment on any simultaneous loan; (v) the monthly payment for mortgage-related obligations; (vi) current debt obligations, alimony, and child support; (vii) the monthly debt-to-income ratio or residual income; and (viii) credit history. Alternatively, the mortgage lender can originate "qualified mortgages," which are entitled to a presumption that the creditor making the loan satisfied the ability-to-repay requirements. In general, a "qualified mortgage" is a mortgage loan without negative amortization, interest-only payments, balloon payments, or terms exceeding 30 years. In addition, to be a qualified mortgage the points and fees paid by a consumer cannot exceed 3% of the total loan amount. Qualified mortgages that are "higher-priced" (e.g. subprime loans) garner a rebuttable presumption of compliance with the ability-to-repay rules, while qualified mortgages that are not "higher-priced" (e.g. prime loans) are given a safe harbor of compliance. The Company is predominantly an originator of compliant qualified mortgages.

Cybersecurity

In March 2015, federal regulators issued two related statements regarding cybersecurity. One statement indicates that financial institutions should design multiple layers of security controls to establish lines of defense and to ensure that their risk management processes also address the risk posed by compromised customer credentials, including security measures to reliably authenticate customers accessing internet-based services of the financial institution. The other statement indicates that a financial institution's management is expected to maintain sufficient business continuity planning processes to ensure the rapid recovery, resumption and maintenance of the institution's operations after a cyber-attack involving destructive malware. A financial institution is also expected to develop appropriate processes to enable recovery of data and business operations and address rebuilding network capabilities and restoring data if the institution or its critical service providers fall victim to this type of cyber-attack. If the Company fails to observe the regulatory guidance, it could be subject to various regulatory sanctions, including financial penalties.

Effect of Governmental Monetary Policies

The Company's operations are affected not only by general economic conditions, but also by the policies of various regulatory authorities. In particular, the FRB regulates money and credit conditions and interest rates to influence general economic conditions. These policies have a significant impact on overall growth and distribution of loans, investments and deposits; they affect interest rates charged on loans or paid for time and savings deposits. FRB monetary policies have had a significant effect on the operating results of commercial banks, including the Company, in the past and are expected to do so in the future. As a result, it is difficult for the Company to predict the potential effects of possible changes in monetary policies upon its future operating results.

Employees

At December 31, 2015, the Company employed 303 full-time equivalent persons. In the opinion of the management of the Company, the relationship with employees of the Company and the Bank is good.

Internet Access to Company Documents

The Company provides access to its Securities and Exchange Commission (the "SEC") filings through a link on the Investor Relations page of the Company's website at www.amnb.com. Reports available include the annual report on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K, and all amendments to those reports as soon as reasonably practicable after the reports are filed electronically with the SEC. The information on the Company's website is not incorporated into this Annual Report on Form 10-K or any other filing the Company makes with the SEC. The SEC maintains an Internet site that contains reports, proxy and information statements, and other information regarding issuers that file electronically with the SEC at www.sec.gov.

Executive Officers of the Company

The following table lists, as of December 31, 2015, the executive officers of the Company, their ages, and their positions:

Name	Age	Position
Jeffrey V. Haley	55	President and Chief Executive Officer of the Company and Bank since January 2013; prior thereto, President of the Company and Chief Executive Officer of the Bank since January 2012; prior thereto, Executive Vice President of the Company from June 2010 to December 2011; prior thereto, Senior Vice President of the Company from July 2008 to May 2010; President of the Bank since June 2010; prior thereto, Executive Vice President of the Bank, as well as President of Trust and Financial Services from July 2008 to May 2010; prior thereto, Executive Vice President and Chief Operating Officer of the Bank from November 2005 to June 2007.
William W. Traynham	60	Executive Vice President, Chief Financial Officer, Treasurer and Secretary of the Company since January 2015. Executive Vice President, Chief Financial Officer, and Cashier of the Bank since April 2009.
H. Gregg Strader	57	Executive Vice President and Chief Banking Officer of the Company since January 2015. Executive Vice President and Chief Banking Officer of the Bank since January 2014. Executive Vice President of the Bank from June 2013 until December 2013. Executive Vice President and Chief Credit Officer of IBERIABANK Corporation from 2010 to June 2013.
R. Helm Dobbins	64	Executive Vice President and Chief Credit Officer of the Company since January 2015. Executive Vice President and Chief Credit Officer of the Bank since 2005.
Dabney T.P. Gilliam, Jr.	61	Executive Vice President and Chief Administrative Officer of the Company since January 2015. Executive Vice President and Chief Administrative Officer of the Bank since 2008.

ITEM 1A – RISK FACTORS

Risks Related to the Company's Business

The Company's business is subject to interest rate risk, and variations in interest rates may negatively affect financial performance.

Changes in the interest rate environment may reduce the Company's profits. It is expected that the Company will continue to realize income from the spread between the interest earned on loans, securities, and other interest earning assets, and interest paid on deposits, borrowings and other interest bearing liabilities. Net interest spreads are affected by the difference between the maturities and repricing characteristics of interest earning assets and interest bearing liabilities. In addition, loan volume and yields are affected by market interest rates on loans, and the current interest rate environment encourages extreme competition for new loan originations from qualified borrowers. Management cannot ensure that it can minimize the Company's interest rate risk. While an eventual increase in the general level of interest rates may increase the loan yield and the net interest margin, it may adversely affect the ability of certain borrowers with variable rate loans to pay the interest and principal of their obligations. Accordingly, changes in levels of market interest rates could materially and adversely affect the net interest spread, asset quality, loan origination volume, and overall profitability of the Company.

The Company faces strong competition from financial services companies and other companies that offer banking and other financial services, which could negatively affect the Company's business.

The Company encounters substantial competition from other financial institutions in its market area. Ultimately, the Company may not be able to compete successfully against current and future competitors. Many competitors offer the same banking services that the Company offers. These competitors include national, regional, and community banks. The Company also faces competition from many other types of financial institutions, including savings banks, finance companies, mutual and money market fund providers, brokerage firms, insurance companies, credit unions, financial subsidiaries of certain industrial corporations, and mortgage companies. In particular, competitors include several major financial companies whose greater resources may afford them a marketplace advantage by enabling them to

maintain numerous banking locations and ATMs and conduct extensive promotional and advertising campaigns. Increased competition may result in reduced business for the Company.

Additionally, banks and other financial institutions with larger capitalization and financial intermediaries not subject to bank regulatory restrictions have larger lending limits and are thereby able to serve the credit needs of larger customers. Areas of competition include interest rates for loans and deposits, efforts to obtain loans and deposits, and range and quality of products and services provided, including new technology-driven products and services. Technological innovation continues to contribute to greater competition in domestic and international financial services markets as technological advances enable more companies to provide financial services. If the Company is unable to attract and retain banking customers, it may be unable to continue to grow loan and deposit portfolios and its results of operations and financial condition may be adversely affected.

Changes in economic conditions could materially and negatively affect the Company's business.

The Company's business is directly impacted by economic, political, and market conditions, broad trends in industry and finance, legislative and regulatory changes, changes in government monetary and fiscal policies, and inflation, all of which are beyond the Company's control. A deterioration in economic conditions, whether caused by global, national or local events, especially within the Company's market area, could result in potentially negative material consequences such as the following, among others: loan delinquencies increasing; problem assets and foreclosures increasing; demand for products and services decreasing; low cost or noninterest bearing deposits decreasing; and collateral for loans, especially real estate, declining in value, in turn reducing customers' borrowing power, and reducing the value of assets and collateral associated with existing loans. Each of these consequences may have a material adverse effect on the Company's financial condition and results of operations.

Trust division income is a major source of non-interest income for the Company. Trust and Investment Services fee revenue is largely dependent on the fair market value of assets under management and on trading volumes in the brokerage business. General economic conditions and their subsequent effect on the securities markets tend to act in correlation. When general economic conditions deteriorate, securities markets generally decline in value, and the Company's Trust and Investment Service revenues are negatively impacted as asset values and trading volumes decrease.

The Company's credit standards and its on-going credit assessment processes might not protect it from significant credit losses.

The Company takes credit risk by virtue of making loans and extending loan commitments and letters of credit. The Company manages credit risk through a program of underwriting standards, the review of certain credit decisions and an on-going process of assessment of the quality of the credit already extended. The Company's exposure to credit risk is managed through the use of consistent underwriting standards that emphasize local lending while avoiding highly leveraged transactions as well as excessive industry and other concentrations. The Company's credit administration function employs risk management techniques to help ensure that problem loans are promptly identified. While these procedures are designed to provide the Company with the information needed to implement policy adjustments where necessary and to take appropriate corrective actions, and have proven to be reasonably effective to date, there can be no assurance that such measures will be effective in avoiding future undue credit risk. The Company's focus on lending to small to mid-sized community-based businesses may increase its credit risk. Most of the Company's commercial business and commercial real estate loans are made to small business or middle market customers. These businesses generally have fewer financial resources in terms of capital or borrowing capacity than larger entities and have a heightened vulnerability to economic conditions. If general economic conditions in the market areas in which the Company operates negatively impact this important customer sector, the Company's results of operations and financial condition may be adversely affected. Moreover, a portion of these loans have been made by the Company in recent years and the borrowers may not have experienced a complete business or economic cycle. The deterioration of the borrowers' businesses may hinder their ability to repay their loans with the Company, which could have a material adverse effect on the Company's financial condition and results of operations.

The Company depends on the accuracy and completeness of information about clients and counterparties, and its financial condition could be adversely affected if it relies on misleading information.

In deciding whether to extend credit or to enter into other transactions with clients and counterparties, the Company may rely on information furnished to it by or on behalf of clients and counterparties, including financial statements and other financial information, which the Company does not independently verify. The Company also may rely on representations of clients and counterparties as to the accuracy and completeness of that information and, with respect to financial statements, on reports of independent auditors. For example, in deciding whether to extend credit to clients, the Company may assume that a customer's audited financial statements conform with accounting principles generally accepted in the United States ("GAAP") and present fairly, in all material respects, the financial condition, results of operations and cash flows of the customer. The Company's financial condition and results of operations could be negatively impacted to the extent it relies on financial statements that do not comply with GAAP or are materially misleading.

The allowance for loan losses may not be adequate to cover actual losses.

In accordance with accounting principles generally accepted in the United States, an allowance for loan losses is maintained to provide for loan losses. The allowance for loan losses may not be adequate to cover actual credit losses, and future provisions for credit losses could materially and adversely affect operating results. The allowance for loan losses is based on prior experience, as well as an evaluation of the risks in the current portfolio. The amount of future losses is susceptible to changes in economic, operating, and other outside forces and conditions, including changes in interest rates, all of which are beyond the Company's control; and these losses may exceed current estimates. Federal bank regulatory agencies, as a part of their examination process, review the Company's loans and allowance for loan losses. While management believes that the allowance for loan losses is adequate to cover current losses, it cannot make assurances that it will not further increase the allowance for loan losses or that regulators will not require it to increase this allowance. Either of these occurrences could adversely affect earnings.

Nonperforming assets take significant time to resolve and adversely affect the Company's results of operations and financial condition.

The Company's nonperforming assets adversely affect its net income in various ways. The Company does not record interest income on nonaccrual loans, which adversely affects its income and increases credit administration costs.

When the Company receives collateral through foreclosures and similar proceedings, it is required to mark the related asset to the then fair market value of the collateral less estimated selling costs, which may, and often does, result in a loss. An increase in the level of nonperforming assets also increases the Company's risk profile and may impact the capital levels regulators believe are appropriate in light of such risks. The Company utilizes various techniques such as workouts, restructurings and loan sales to manage problem assets. Increases in or negative adjustments in the value of these problem assets, the underlying collateral, or in the borrowers' performance or financial condition, could adversely affect the Company's business, results of operations and financial condition. In addition, the resolution of nonperforming assets requires significant commitments of time from management and staff, which can be detrimental to the performance of their other responsibilities, including generation of new loans. There can be no assurance that the Company will avoid increases in nonperforming loans in the future.

A downturn in the local real estate market could materially and negatively affect the Company's business.

The Company offers a variety of secured loans, including commercial lines of credit, commercial term loans, real estate, construction, home equity lines of credit, consumer and other loans. Many of these loans are secured by real estate (both residential and commercial) located in the Company's market area. A downturn in the real estate market in the areas in which the Company conducts its operations could negatively affect the Company's business because significant portions of its loans are secured by real estate. At December 31, 2015, the Company had approximately \$1.0 billion in loans, of which approximately \$822.0 million (81.8%) were secured by real estate. The ability to recover on defaulted loans by selling the real estate collateral could then be diminished and the Company would be more likely to suffer losses.

Substantially all of the Company's real property collateral is located in its market area. If there is a decline in real estate values, especially in the Company's market area, the collateral for loans would deteriorate and provide significantly less security.

The Company relies upon independent appraisals to determine the value of the real estate which secures a significant portion of its loans, and the values indicated by such appraisals may not be realizable if the Company is forced to foreclose upon such loans.

A significant portion of the Company's loan portfolio consists of loans secured by real estate. The Company relies upon independent appraisers to estimate the value of such real estate. Appraisals are only estimates of value and the independent appraisers may make mistakes of fact or judgment which adversely affect the reliability of their appraisals. In addition, events occurring after the initial appraisal may cause the value of the real estate to increase or decrease. As a result of any of these factors, the real estate securing some of the Company's loans may be more or less valuable than anticipated at the time the loans were made. If a default occurs on a loan secured by real estate that is less valuable than originally estimated, the Company may not be able to recover the outstanding balance of the loan and will suffer a loss.

The Company is dependent on key personnel and the loss of one or more of those key personnel may materially and adversely affect the Company's operations and prospects.

The Company currently depends on the services of a number of key management personnel. The loss of key personnel could materially and adversely affect the results of operations and financial condition. The Company's success also depends in part on the ability to attract and retain additional qualified management personnel.

Competition for such personnel is strong and the Company may not be successful in attracting or retaining the personnel it requires.

The inability of the Company to successfully manage its growth or implement its growth strategy may adversely affect the Company's results of operations and financial condition.

The Company may not be able to successfully implement its growth strategy if it is unable to identify attractive markets, locations or opportunities to expand in the future. In addition, the ability to manage growth successfully depends on whether the Company can maintain adequate capital levels, cost controls and asset quality, and successfully integrate any businesses acquired into the Company.

As the Company continues to implement its growth strategy by opening new branches or acquiring branches or banks, it expects to incur increased personnel, occupancy and other operating expenses. In the case of new branches, the Company must absorb those higher expenses while it begins to generate new deposits; there is also further time lag involved in redeploying new deposits into attractively priced loans and other higher yielding earning assets. The Company's plans to expand could depress earnings in the short run, even if it efficiently executes a branching strategy leading to long-term financial benefits.

Difficulties in combining the operations of acquired entities with the Company's own operations may prevent the Company from achieving the expected benefits from acquisitions.

The Company may not be able to achieve fully the strategic objectives and operating efficiencies expected in an acquisition. Inherent uncertainties exist in integrating the operations of an acquired entity. In addition, the markets and industries in which the Company and its potential acquisition targets operate are highly competitive. The Company may lose customers or the customers of acquired entities as a result of an acquisition; the Company may lose key personnel, either from the acquired entity or from itself; and the Company may not be able to control the incremental increase in noninterest expense arising from an acquisition in a manner that improves its overall operating efficiencies. These factors could contribute to the Company's not achieving the expected benefits from its acquisitions within desired time frames, if at all. Future business acquisitions could be material to the Company and it may issue additional shares of common stock to pay for those acquisitions, which would dilute current shareholders' ownership interests. Acquisitions also could require the Company to use substantial cash or other liquid assets or to incur debt; the Company could therefore become more susceptible to economic downturns and competitive pressures.

The Company is subject to extensive regulation which could adversely affect its business.

The Company's operations as a publicly traded corporation, a bank holding company, and an insured depository institution are subject to extensive regulation by federal, state, and local governmental authorities and are subject to various laws and judicial and administrative decisions imposing requirements and restrictions on part or all of the Company's operations. Because the Company's business is highly regulated, the laws, rules, and regulations applicable to it are subject to frequent and sometimes extensive change. Such changes could include higher capital requirements, increased insurance premiums, increased compliance costs, reductions of non-interest income and

limitations on services that can be provided. Actions by regulatory agencies or significant litigation against the Company could cause it to devote significant time and resources to defend itself and may lead to liability or penalties that materially affect the Company and its shareholders. Any future changes in the laws, rules or regulations applicable to the Company may negatively affect the Company's business and results of operations.

The Dodd-Frank Act substantially changes the regulation of the financial services industry and it could have a material adverse effect upon the Company.

The Dodd-Frank Act provides wide-ranging changes in the way banks and financial services firms generally are regulated and affects the way the Company and its customers and counterparties do business with each other. Among other things, it requires increased capital and regulatory oversight for banks and their holding companies, changes the deposit insurance assessment system, changes responsibilities among regulators, establishes the new Consumer Financial Protection Bureau, and makes various changes in the securities laws and corporate governance that affect public companies, including the Company. The Dodd-Frank Act also requires numerous studies and regulations related to its implementation. The Company is continually evaluating the effects of the Dodd-Frank Act, together with implementing the regulations that have been proposed and adopted. The ultimate effects of the Dodd-Frank Act and the resulting rulemaking cannot be predicted at this time, but it has increased the Company's operating and compliance costs in the short-term, and it could have a material adverse effect on the Company's results of operation and financial condition.

Recently enacted capital standards may have an adverse effect on the Company's profitability, lending, and ability to pay dividends on the Company's securities.

In July 2013, the FRB released its final rules which implement the Basel III regulatory capital reforms from the Basel Committee on Banking Supervision and certain changes required by the Dodd-Frank Act. Under the final rules, minimum requirements for both the quality and quantity of capital held by banking organizations have increased. Consistent with the international Basel framework, the rule includes a new minimum ratio of common equity Tier 1 capital to risk-weighted assets of 4.5% and a common equity Tier 1 capital conservation buffer of 2.5% of risk-weighted assets that applies to all supervised financial institutions. The rule also, among other things, raised the minimum ratio of Tier 1 capital to risk-weighted assets from 4% to 6% and included a minimum leverage ratio of 4% for all banking organizations. The new rules became effective January 1, 2015. The potential impact of the new capital rules includes, but is not limited to, reduced lending and negative pressure on profitability and return on equity due to the higher capital requirements. To the extent the Company is required to increase capital in the future to comply with the new capital rules, its ability to pay dividends on its securities may be reduced.

New regulations issued by the Consumer Financial Protection Bureau could adversely affect the Company's earnings. The CFPB has broad rule making authority to administer and carry out the provisions of the Dodd-Frank Act with respect to financial institutions that offer covered financial products and services to consumers. Pursuant to the Dodd-Frank Act, the CFPB issued a final rule effective January 10, 2014, requiring mortgage lenders to make a reasonable and good faith determination based on verified and documented information that a consumer applying for a mortgage loan has a reasonable ability to repay the loan according to its terms, or to originate "qualified mortgages" that meet specific requirements with respect to terms, pricing and fees. The new rule also contains new disclosure requirements at mortgage loan origination and in monthly statements. These requirements could limit the Company's ability to make certain types of loans or loans to certain borrowers, or could make it more expensive and/or time consuming to make these loans, which could adversely impact the Company's profitability.

Changes in accounting standards could impact reported earnings.

From time to time, with increasing frequency, there are changes in the financial accounting and reporting standards that govern the preparation of the Company's financial statements. These changes can materially impact how the Company records and reports its financial condition and results of operations. In some instances, the Company could be required to apply a new or revised standard retroactively, resulting in the restatement of prior period financial statements.

Failure to maintain effective systems of internal and disclosure control could have a material adverse effect on the Company's results of operation and financial condition.

Effective internal and disclosure controls are necessary for the Company to provide reliable financial reports and effectively prevent fraud and to operate successfully as a public company. If the Company cannot provide reliable financial reports or prevent fraud, its reputation and operating results would be harmed. As part of the Company's ongoing monitoring of internal control, it may discover material weaknesses or significant deficiencies in its internal control that require remediation. A "material weakness" is a deficiency, or a combination of deficiencies, in internal control over financial reporting, such that there is a reasonable possibility that a material misstatement of a company's

annual or interim financial statements will not be prevented or detected on a timely basis.

The Company has in the past discovered, and may in the future discover, areas of its internal controls that need improvement. Even so, the Company is continuing to work to improve its internal controls. The Company cannot be certain

17

that these measures will ensure that it implements and maintains adequate controls over its financial processes and reporting in the future. Any failure to maintain effective controls or to timely effect any necessary improvement of the Company's internal and disclosure controls could, among other things, result in losses from fraud or error, harm the Company's reputation or cause investors to lose confidence in the Company's reported financial information, all of which could have a material adverse effect on the Company's results of operation and financial condition.

The carrying value of goodwill may be adversely impacted.

When the Company completes an acquisition, generally goodwill is recorded on the date of acquisition as an asset. Current accounting guidance requires for goodwill to be tested for impairment, which the Company performs an impairment analysis at least annually, rather than amortizing it over a period of time. A significant adverse change in expected future cash flows or sustained adverse change in the Company's common stock could require the asset to become impaired. If impaired, the Company would incur a non-cash charge to earnings that would have a significant impact on the results of operations. The carrying value of goodwill was approximately \$43.9 million at December 31, 2015.

The Company may need to raise additional capital in the future to continue to grow, but may be unable to obtain additional capital on favorable terms or at all.

Federal and state banking regulators and safe and sound banking practices require the Company to maintain adequate levels of capital to support its operations. Although the Company currently has no specific plans for additional offices, its business strategy calls for it to continue to grow in its existing banking markets (internally and through additional offices) and to expand into new markets as appropriate opportunities arise. Continued growth in the Company's earning assets, which may result from internal expansion and new branch offices, at rates in excess of the rate at which its capital is increased through retained earnings, will reduce the Company's capital ratios. If the Company's capital ratios fell below "well capitalized" levels, the FDIC deposit insurance assessment rate would increase until capital was restored and maintained at a "well capitalized" level. A higher assessment rate would cause an increase in the assessments the Company pays for federal deposit insurance, which would have an adverse effect on the Company's operating results.

Management of the Company believes that its current and projected capital position is sufficient to maintain capital ratios significantly in excess of regulatory requirements for the next several years and allow the Company flexibility in the timing of any possible future efforts to raise additional capital. However, if, in the future, the Company needs to increase its capital to fund additional growth or satisfy regulatory requirements, its ability to raise that additional capital will depend on conditions at that time in the capital markets, economic conditions, the Company's financial performance and condition, and other factors, many of which are outside its control. There is no assurance that the Company will be able to raise additional capital on terms favorable to it or at all. Any future inability to raise additional capital on terms acceptable to the Company may have a material adverse effect on its ability to expand operations, and on its financial condition, results of operations and future prospects.

The Company relies on other companies to provide key components of the Company's business infrastructure. Third parties provide key components of the Company's business operations such as data processing, recording and monitoring transactions, online banking interfaces and services, Internet connections and network access. While the Company has selected these third party vendors carefully, it does not control their actions. Any problem caused by these third parties, including those resulting from disruptions in communication services provided by a vendor, failure of a vendor to handle current or higher volumes, failures of a vendor to provide services for any reason or poor performance of services, could adversely affect the Company's ability to deliver products and services to its customers and otherwise conduct its business. Financial or operational difficulties of a third party vendor could also hurt the Company's operations if those difficulties interface with the vendor's ability to serve the Company. Replacing these third party vendors could also create significant delay and expense. Accordingly, use of such third parties creates an unavoidable inherent risk to the Company's business operations.

The Company's exposure to operational, technological and organizational risk may adversely affect the Company. The Company is exposed to many types of operational risks, including reputation, legal, and compliance risk, the risk of fraud or theft by employees or outsiders, unauthorized transactions by employees or operational errors, clerical or record-keeping errors, and errors resulting from faulty or disabled computer or telecommunications systems.

Negative public opinion can result from the actual or alleged conduct in any number of activities, including lending practices, corporate governance, and acquisitions, and from actions taken by government regulators and community organizations in response to those activities. Negative public opinion can adversely affect the Company's ability to attract and retain customers and can expose it to litigation and regulatory action.

Certain errors may be repeated or compounded before they are discovered and successfully rectified. The Company's necessary dependence upon automated systems to record and process its transactions may further increase the risk that technical system flaws or employee tampering or manipulation of those systems will result in losses that are difficult to detect. The Company may also be subject to disruptions of its operating systems arising from events that are wholly or partially beyond its control (for example, computer viruses or electrical or telecommunications outages), which may give rise to disruption of service to customers and to financial loss or liability. The Company is further exposed to the risk that its external vendors may be unable to fulfill their contractual obligations (or will be subject to the same risk of fraud or operational errors by their respective employees as is the Company) and to the risk that the Company's (or its vendors') business continuity and data security systems prove to be inadequate.

The Company's operations may be adversely affected by cyber security risks.

The Company relies heavily on communications and information systems to conduct business. Any failure, interruption, or breach in security of these systems could result in failures or disruptions in the Company's internet banking, deposit, loan, and other systems. While the Company has policies and procedures designed to prevent or limit the effect of such failure, interruption, or security breach of the Company's information systems, there can be no assurance that they will not occur or, if they do occur, that they will be adequately addressed. The occurrence of any failure, interruption or security breach of the Company's communications and information systems could damage the Company's reputation, result in a loss of customer business, subject the Company to additional regulatory scrutiny, or expose the Company to civil litigation and possible financial liability. Additionally, the Company outsources its data processing to a third party. If the Company's third party provider encounters difficulties or if the Company has difficulty in communicating with such third party, it will significantly affect the Company's ability to adequately process and account for customer transactions, which would significantly affect its business operations.

In the ordinary course of business, the Company collects and stores sensitive data, including proprietary business information and personally identifiable information of its customers and employees in systems and on networks. The secure processing, maintenance and use of this information is critical to operations and the Company's business strategy. The Company has invested in accepted technologies, and annually reviews processes and practices that are designed to protect its networks, computers and data from damage or unauthorized access. Despite these security measures, the Company's computer systems and infrastructure may be vulnerable to attacks by hackers or breached due to employee error, malfeasance or other disruptions. A breach of any kind could compromise systems and the information stored there could be accessed, damaged or disclosed. A breach in security could result in legal claims, regulatory penalties, disruption in operations, and damage to the Company's reputation, which could adversely affect the Company's business. Furthermore, as cyber threats continue to evolve and increase, the Company may be required to expend significant additional resources to modify or enhance its protective measures, or to investigate and remediate any identified information security vulnerabilities.

Multiple major U.S. retailers, financial institutions, government agencies and departments have recently experienced data systems incursions reportedly resulting in the thefts of credit and debit card information, online account information, and other financial data of tens of millions of individuals and customers. Retailer incursions affect cards issued and deposit accounts maintained by many financial institutions, including the Bank. Although neither the Company's nor the Bank's systems are breached in government or retailer incursions, these events can cause the Bank to reissue a significant number of cards and take other costly steps to avoid significant theft loss to the Bank and its customers. In some cases, the Bank may be required to reimburse customers for the losses they incur. Other possible points of intrusion or disruption not within the Company's nor the Bank's control include internet service providers, electronic mail portal providers, social media portals, distant-server ("cloud") service providers, electronic data security providers, telecommunications companies, and smart phone manufacturers.

The Company's risk-management framework may not be effective in mitigating risk and loss.

The Company maintains an enterprise risk management program that is designed to identify, quantify, monitor, report, and control the risks that it faces. These risks include, but are not limited to: interest-rate, credit, liquidity, operations, reputation, compliance and litigation. While the Company assesses and improves this program on an ongoing basis, there can be no assurance that its approach and framework for risk management and related controls will effectively mitigate all risk and limit losses in its business. If conditions or circumstances arise that expose flaws or gaps in the Company's risk-management program, or if its controls break down, the Company's results of operations and financial

condition may be adversely affected.

Current and proposed regulation addressing consumer privacy and data use and security could increase the Company's costs and impact its reputation.

The Company is subject to a number of laws concerning consumer privacy and data use and security, including information safeguard rules under the Gramm-Leach-Bliley Act. These rules require that financial institutions develop, implement and maintain a written, comprehensive information security program containing safeguards that are appropriate to the financial institution's size and complexity, the nature and scope of the financial institution's activities, and the sensitivity of any customer information at issue. The United States has experienced a heightened legislative and regulatory focus on privacy and data security, including requiring consumer notification in the event of a data breach. In addition, most states have enacted security breach legislation requiring varying levels of consumer notification in the event of certain types of security breaches. New regulations in these areas may increase our compliance costs, which could negatively impact our earnings. In addition, failure to comply with the privacy and data use and security laws and regulations to which we are subject, including by reason of inadvertent disclosure of confidential information, could result in fines, sanctions, penalties or other adverse consequences and loss of consumer confidence, which could materially adversely affect our results of operations, overall business, and reputation.

Consumers may increasingly decide not to use the Bank to complete their financial transactions because of technological and other changes, which would have a material adverse impact on the Company's financial condition and operations.

Technology and other changes are allowing parties to complete financial transactions through alternative methods that historically have involved banks. For example, consumers can now maintain funds that would have historically been held as bank deposits in brokerage accounts, mutual funds or general-purpose reloadable prepaid cards. Consumers can also complete transactions such as paying bills and/or transferring funds directly without the assistance of banks. The process of eliminating banks as intermediaries, known as "disintermediation," could result in the loss of fee income, as well as the loss of customer deposits and the related income generated from those deposits. The loss of these revenue streams and the lower cost of deposits as a source of funds could have a material adverse effect on the Company's financial condition and results of operations.

Negative perception of the Company through social media may adversely affect the Company's reputation and business.

The Company's reputation is critical to the success of its business. The Company believes that its brand image has been well received by customers, reflecting the fact that the brand image, like the Company's business, is based in part on trust and confidence. The Company's reputation and brand image could be negatively affected by rapid and widespread distribution of publicity through social media channels. The Company's reputation could also be affected by the Company's association with clients affected negatively through social media distribution, or other third parties, or by circumstances outside of the Company's control. Negative publicity, whether true or untrue, could affect the Company's ability to attract or retain customers, or cause the Company to incur additional liabilities or costs, or result in additional regulatory scrutiny.

The Company is subject to claims and litigation pertaining to fiduciary responsibility.

From time to time, customers make claims and take legal action pertaining to the performance of the Company's fiduciary responsibilities. Whether customer claims and legal action related to the performance of the Company's fiduciary responsibilities are founded or unfounded, if such claims and legal actions are not resolved in a manner favorable to the Company, they may result in significant financial liability and/or adversely affect the market perception of the Company and its products and services, as well as impact customer demand for those products and services. Any financial liability or reputation damage could have a material adverse effect on the Company's business, which, in turn, could have a material adverse effect on the Company's financial condition and results of operations.

Risks Related to the Company's Common Stock

While the Company's common stock is currently traded on the NASDAQ Global Select Market, it has less liquidity than stocks for larger companies quoted on a national securities exchange.

The trading volume in the Company's common stock on the NASDAQ Global Select Market has been relatively low when compared with larger companies listed on the NASDAQ Global Select Market or other stock exchanges. There is no assurance that a more active and liquid trading market for the common stock will exist in the future.

Consequently, shareholders may not be able to sell a substantial number of shares for the same price at which shareholders could sell a smaller number of shares. In addition, we cannot predict the effect, if any, that future sales of the Company's common stock in the market, or the availability of shares of common stock for sale in the market, will have on the market price of the common stock.

Economic and other conditions may cause volatility in the price of the Company's common stock.

In the current economic environment, the prices of publicly traded stocks in the financial services sector have been volatile. However, even in a more stable economic environment the price of the Company's common stock can be affected by a variety of factors such as expected or actual results of operations, changes in analysts' recommendations or projections, announcements of developments related to its businesses, operating and stock performance of other companies deemed to be peers, news or expectations based on the performance of others in the financial services industry, and expected impacts of a changing regulatory environment. These factors not only impact the price of the Company's common stock but could also affect the liquidity of the stock given the Company's size, geographical footprint, and industry. The price for shares of the Company's common stock may fluctuate significantly in the future, and these fluctuations may be unrelated to the Company's performance. General market price declines or market volatility in the future could adversely affect the price for shares of the Company's common stock, and the current market price of such shares may not be indicative of future market prices.

Future issuances of the Company's common stock could adversely affect the market price of the common stock and could be dilutive.

The Company is not restricted from issuing additional shares of common stock, including any securities that are convertible into or exchangeable for, or that represent the right to receive, shares of common stock. Issuances of a substantial number of shares of common stock, or the expectation that such issuances might occur, including in connection with acquisitions by the Company, could materially adversely affect the market price of the shares of the common stock and could be dilutive to shareholders. Because the Company's decision to issue common stock in the future will depend on market conditions and other factors, it cannot predict or estimate the amount, timing or nature of possible future issuances of its common stock. Accordingly, the Company's shareholders bear the risk that future issuances will reduce the market price of the common stock and dilute their stock holdings in the Company.

The primary source of the Company's income from which it pays cash dividends is the receipt of dividends from its subsidiary bank.

The availability of dividends from the Company is limited by various statutes and regulations. It is possible, depending upon the financial condition of the Bank and other factors, that the OCC could assert that payment of dividends or other payments is an unsafe or unsound practice. In the event the Bank was unable to pay dividends to the Company, or be limited in the payment of such dividends, the Company would likely have to reduce or stop paying common stock dividends. The Company's reduction, limitation or failure to pay such dividends on its common stock could have a material adverse effect on the market price of the common stock.

The Company's governing documents and Virginia law contain anti-takeover provisions that could negatively impact its shareholders.

The Company's Articles of Incorporation and Bylaws and the Virginia Stock Corporation Act contain certain provisions designed to enhance the ability of the Company's Board of Directors to deal with attempts to acquire control of the Company. These provisions and the ability to set the voting rights, preferences and other terms of any series of preferred stock that may be issued, may be deemed to have an anti-takeover effect and may discourage takeovers (which certain shareholders may deem to be in their best interest). To the extent that such takeover attempts are discouraged, temporary fluctuations in the market price of the Company's common stock resulting from actual or rumored takeover attempts may be inhibited. These provisions also could discourage or make more difficult a merger, tender offer, or proxy contest, even though such transactions may be favorable to the interests of shareholders, and could potentially adversely affect the market price of the Company's common stock.

ITEM 2 – PROPERTIES

As of December 31, 2015, the Company maintained twenty-five banking offices. The Company's Virginia banking offices are located in the cities of Danville, Martinsville and Lynchburg, and in the counties of Bedford, Campbell, Franklin, Halifax, Henry, Nelson and Pittsylvania. In North Carolina, the Company's banking offices are located in the cities of Burlington, Greensboro, Mebane and Graham and in the counties of Alamance, Caswell, and Guilford. The Company also operates two loan production offices.

The principal executive offices of the Company are located at 628 Main Street in the business district of Danville, Virginia. This building, owned by the Company, was originally constructed in 1973 and has three floors totaling approximately 27,000 square feet.

The Company owns a building located at 103 Tower Drive in Danville, Virginia. This three-story facility serves as an operations center for data processing and deposit operations.

The Company has an office at 445 Mount Cross Road in Danville, Virginia where it consolidated two banking offices in January 2009 and gained additional administrative space.

The Company has an office at 3101 South Church Street in Burlington, North Carolina. This building serves as the head office for our North Carolina operations.

The Company owns fourteen other offices for a total of eighteen owned buildings. There are no mortgages or liens against any of the properties owned by the Company. The Company operates thirty-three ATMs on owned or leased facilities. The Company leases seven office locations and two storage warehouses. The Company occupies space rent-free for its limited service office in the Village of Brookwood Retirement Center under an agreement with the owners of that facility.

ITEM 3 – LEGAL PROCEEDINGS

In the ordinary course of operations, the Company and the Bank are parties to various legal proceedings. Based upon information currently available, management believes that such legal proceedings, in the aggregate, will not have a material adverse effect on the business, financial condition, or results of operations of the Company.

ITEM 4 – MINE SAFETY DISCLOSURES

None.

PART II

ITEM 5 – MARKET FOR REGISTRANT'S COMMON EQUITY, RELATED STOCKHOLDER MATTERS AND ISSUER PURCHASES OF EQUITY SECURITIES

The Company's common stock is traded on the NASDAQ Global Select Market under the symbol "AMNB." At December 31, 2015, the Company had 3,235 shareholders of record. The following table presents the high and low sales prices for the Company's common stock and dividends declared for the past two years.

	Sales Price		Dividends Declared Per Share
	High	Low	
2015			
1st quarter	\$24.72	\$21.31	\$0.23
2nd quarter	24.31	21.68	0.23
3rd quarter	24.28	21.88	0.23
4th quarter	26.42	23.02	0.24
			\$0.93
	Sales Price		Dividends Declared Per Share
	High	Low	
2014			
1st quarter	\$26.08	\$21.54	\$0.23
2nd quarter	24.06	20.65	0.23
3rd quarter	23.53	20.90	0.23
4th quarter	25.00	21.69	0.23
			\$0.92

Stock Compensation Plans

The Company maintains the 2008 Stock Incentive Plan ("2008 Plan"), which is designed to attract and retain qualified personnel in key positions, provide employees with an equity interest in the Company as an incentive to contribute to the success of the Company, and reward employees for outstanding performance and the attainment of targeted goals. The 2008 Plan and stock compensation in general is discussed in Note 13 of the Consolidated Financial Statements contained in Item 8 of this Form 10-K.

The following table summarizes information, as of December 31, 2015, relating to the Company's equity based compensation plans, pursuant to which grants of options to acquire shares of common stock have been and may be granted from time to time.

	December 31, 2015		
	Number of Shares to be Issued Upon Exercise of Outstanding Options	Weighted-Average Per Share Exercise Price of Outstanding Options	Number of Shares Remaining Available for Future Issuance Under Stock Compensation Plans
Equity compensation plans approved by shareholders	67,871	\$24.47	131,096
Equity compensation plans not approved by shareholders	—	—	—
Total	67,871	\$24.47	131,096

Stock Repurchase Program

In years prior to 2014 the Company had, in the normal course of business, operated certain stock repurchase programs. Authority to repurchase shares under these programs had been expired for some time.

On April 17, 2014, the Company filed a Form 8-K with the SEC to announce the approval by its Board of Directors of a stock repurchase program. The plan authorized the repurchase of up to 250,000 shares of the Company's common shares over a two year period. The share purchase limit was equal to approximately 3% of the 7,900,000 shares then outstanding at the time the Board approved the program.

During 2015, the Company repurchased 150,656 shares at an average cost of \$23.27 per share, for a total cost of \$3,506,000. In 2014, the Company repurchased 70,184 shares at an average cost of \$21.45 per share, for a total cost of \$1,508,000.

On November 19, 2015, the Company filed a Form 8-K with the SEC to announce the approval by its Board of Directors of another stock repurchase program. The plan authorizes the repurchase of up to 300,000 shares of the Company's common shares over a two year period. The share purchase limit was equal to approximately 3.5% of the 8,622,000 shares then outstanding at the time the Board approved the program.

Comparative Stock Performance

The following graph compares the Company's cumulative total return to its shareholders with the returns of two indexes for the five-year period ended December 31, 2015. The cumulative total return was calculated taking into consideration changes in stock price, cash dividends, stock dividends, and stock splits since December 31, 2010. The indexes are the NASDAQ Composite Index; the SNL Bank \$1 Billion - \$5 Billion Index, which includes bank holding companies with assets of \$1 billion to \$5 billion and is published by SNL Financial, LC.

- (1) Return on average common equity is calculated by dividing net income available to common shareholders by average common equity.
- (2) Return on average tangible common equity is calculated by dividing net income available to common shareholders plus amortization of intangibles tax effected by average common equity less average intangibles.
The efficiency ratio is calculated by dividing noninterest expense excluding gains or losses on the sale of other real estate owned by net interest income including tax equivalent income on nontaxable loans and securities and excluding (a) gains or losses on securities and (b) gains or losses on sale of premises and equipment.
- (3) Tangible equity to tangible assets ratio is calculated by dividing period-end common equity less period-end intangibles by period-end assets less period-end intangibles.
- (4)

ITEM 7 - MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The purpose of this discussion is to focus on significant changes in the financial condition and results of operations of the Company during the past three years. The discussion and analysis are intended to supplement and highlight information contained in the accompanying Consolidated Financial Statements and the selected financial data presented elsewhere in this Annual Report on Form 10-K.

RECLASSIFICATION

In certain circumstances, reclassifications have been made to prior period information to conform to the 2015 presentation. There were no material reclassifications.

CRITICAL ACCOUNTING POLICIES

The accounting and reporting policies followed by the Company conform with GAAP and they conform to general practices within the banking industry. The Company's critical accounting policies, which are summarized below, relate to (1) the allowance for loan losses, (2) mergers and acquisitions, (3) acquired loans with specific credit-related deterioration and (4) goodwill impairment. A summary of the Company's significant accounting policies is set forth in Note 1 to the Consolidated Financial Statements.

The financial information contained within the Company's financial statements is, to a significant extent, financial information that is based on measures of the financial effects of transactions and events that have already occurred. A variety of factors could affect the ultimate value that is obtained when earning income, recognizing an expense, recovering an asset, or relieving a liability. In addition, GAAP itself may change from one previously acceptable method to another method.

Allowance for Loan Losses

The purpose of the allowance for loan losses ("ALLL") is to provide for probable losses inherent in the loan portfolio. The allowance is increased by the provision for loan losses and by recoveries of previously charged-off loans. Loan charge-offs decrease the allowance.

The goal of the Company is to maintain an appropriate, systematic, and consistently applied process to determine the amounts of the ALLL and the provision for loan loss expense.

The Company uses certain practices to manage its credit risk. These practices include (1) appropriate lending limits for loan officers, (2) a loan approval process, (3) careful underwriting of loan requests, including analysis of borrowers, cash flows, collateral, and market risks, (4) regular monitoring of the portfolio, including diversification by type and geography, (5) review of loans by the Loan Review department, which operates independently of loan production (the Loan Review function consists of a co-sourced arrangement using both internal personnel and external vendors to provide the Company with a more robust review function of the loan portfolio), (6) regular meetings of the Credit Committee to discuss portfolio and policy changes and make decisions on large or unusual loan requests, and (7) regular meetings of the Asset Quality Committee which reviews the status of individual loans.

Risk grades are assigned as part of the loan origination process. From time to time, risk grades may be modified as warranted by the facts and circumstances surrounding the credit.

Calculation and analysis of the ALLL is prepared quarterly by the Finance Department. The Company's Credit Committee, Capital Management Committee, Audit Committee, and the Board of Directors review the allowance for adequacy.

The Company's ALLL has two basic components: the formula allowance and the specific allowance. Each of these components is determined based upon estimates and judgments.

The formula allowance uses historical loss experience as an indicator of future losses, along with various qualitative factors, including levels and trends in delinquencies, nonaccrual loans, charge-offs and recoveries, trends in volume and terms of loans, effects of changes in underwriting standards, experience of lending staff, economic conditions, and portfolio concentrations, regulatory, legal, competition, quality of loan review system, and value of underlying collateral. In the formula allowance for commercial and commercial real estate loans, the historical loss rate is combined with the qualitative factors, resulting in an adjusted loss factor for each risk-grade category of loans. The period-end balances for each loan risk-grade category are multiplied by the adjusted loss factor. Allowance calculations for residential real estate and consumer loans are calculated based on historical losses for each product category without regard to risk grade. This loss rate is combined with qualitative factors resulting in an adjusted loss factor for each product category.

The specific allowance uses various techniques to arrive at an estimate of loss for specifically identified impaired loans. These include:

The present value of expected future cash flows discounted at the loan's effective interest rate. The effective interest rate on a loan is the rate of return implicit in the loan (that is, the contractual interest rate adjusted for any net deferred loan fees or costs and any premium or discount existing at the origination or acquisition of the loan);

• The loan's observable market price, or

• The fair value of the collateral, net of estimated costs to dispose, if the loan is collateral dependent.

The use of these computed values is inherently subjective and actual losses could be greater or less than the estimates.

No single statistic, formula, or measurement determines the adequacy of the allowance. Management makes subjective and complex judgments about matters that are inherently uncertain, and different amounts would be reported under different conditions or using different assumptions. For analytical purposes, management allocates a portion of the allowance to specific loan categories and specific loans. However, the entire allowance is used to absorb credit losses inherent in the loan portfolio, including identified and unidentified losses.

The relationships and ratios used in calculating the allowance, including the qualitative factors, may change from period to period as facts and circumstances evolve. Furthermore, management cannot provide assurance that in any particular period the Bank will not have sizeable credit losses in relation to the amount reserved. Management may find it necessary to significantly adjust the allowance, considering current factors at the time.

Mergers and Acquisitions

Business combinations are accounted for under the Financial Accounting Standards Board (the "FASB") Accounting Standards Codification ("ASC") 805, Business Combinations, using the acquisition method of accounting. The acquisition method of accounting requires an acquirer to recognize the assets acquired and the liabilities assumed at the acquisition date measured at their fair values as of that date. To determine the fair values, the Company will rely on third party valuations, such as appraisals, or internal valuations based on discounted cash flow analysis or other valuation techniques. Under the acquisition method of accounting, the Company will identify the acquirer and the closing date and apply applicable recognition principles and conditions.

Acquisition-related costs are costs the Company incurs to effect a business combination. Those costs include advisory, legal, accounting, valuation, and other professional or consulting fees. Some other examples of costs to the Company include systems conversions, integration planning, consultants, and advertising costs. The Company will account for acquisition-related costs as expenses in the periods in which the costs are incurred and the services are received, with one exception. The costs to issue debt or equity securities will be recognized in accordance with other applicable GAAP. These acquisition-related costs have been and will be included within the Consolidated Statements of Income classified within the noninterest expense caption.

Acquired Loans with Specific Credit-Related Deterioration

Acquired loans with specific credit deterioration are accounted for by the Company in accordance with FASB ASC 310-30, Receivables - Loans and Debt Securities Acquired with Deteriorated Credit Quality. Certain acquired loans, those for which specific credit-related deterioration, since origination, is identified, are recorded at fair value reflecting

the present value of the amounts expected to be collected. Income recognition on these loans is based on a reasonable expectation about the timing and amount of cash flows to be collected. Acquired loans deemed impaired and considered collateral dependent, with the timing of the sale of loan collateral indeterminate, remain on non-accrual status and have no accretable yield.

Goodwill Impairment

The Company performs its annual analysis as of June 30 each fiscal year. Accounting guidance permits preliminary assessment of qualitative factors to determine whether more substantial impairment testing is required. The Company chose to bypass the preliminary assessment and utilized a two-step process for impairment testing of goodwill. The first step tests for impairment, while the second step, if necessary, measures the impairment. No indicators of impairment were identified during the years ended December 31, 2015, 2014, and 2013.

NON-GAAP PRESENTATIONS

Non-GAAP presentations are provided because the Company believes these may be valuable to investors. These include (1) the analysis of net interest income presented on a taxable equivalent basis to facilitate performance comparisons among various taxable and tax-exempt assets and (2) the impact to net interest income and pretax income from accretible and amortizable fair value adjustments attributable to the merger with MidCarolina in July 2011 and MainStreet in January 2015.

INTERNET ACCESS TO CORPORATE DOCUMENTS

The Company provides access to its SEC filings through a link on the Investor Relations page of the Company's website at www.amnb.com. Reports available include annual reports on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K, and all amendments to those reports as soon as reasonably practicable after the reports are filed electronically with the SEC. The information on the Company's website is not incorporated into this report or any other filing the Company makes with the SEC. The SEC maintains an Internet site that contains reports, proxy and information statements, and other information regarding issuers that file electronically with the SEC at www.sec.gov.

ACQUISITION OF MAINSTREET BANKSHARES, INC.

On January 1, 2015, the Company completed its acquisition of MainStreet. The merger of MainStreet with and into the Company was effected pursuant to the terms and conditions of the Agreement and Plan of Reorganization, dated as of August 24, 2014, between the Company and MainStreet. Immediately after the merger of MainStreet into the Company, Franklin Bank, MainStreet's wholly-owned bank subsidiary, merged with and into the Bank.

Pursuant to the MainStreet merger agreement, the former holders of shares of MainStreet common stock received \$3.46 in cash and 0.482 shares of the Company's common stock for each share of MainStreet common stock held immediately prior to the effective date of the merger, plus cash in lieu of fractional shares. Each option to purchase shares of MainStreet common stock that was outstanding immediately prior to the effective date of the merger vested upon the merger and was converted into an option to purchase shares of the Company's common stock, adjusted based on a 0.643 exchange ratio. Each share of the Company's common stock outstanding immediately prior to the merger remained outstanding and was unaffected by the merger. The cash portion of the merger consideration was funded through a cash dividend of \$6,000,000 from the Bank to the Company, and no borrowing was incurred by the Company or the Bank in connection with the merger.

MainStreet was the holding company for Franklin Bank. Immediately prior to the Company's acquisition of MainStreet on January 1, 2015, MainStreet had net loans of approximately \$122,000,000, total assets of approximately \$164,000,000, and total deposits of approximately \$137,000,000. Franklin Community Bank, N.A. provided banking services to its customers from three banking offices located in Rocky Mount, Hardy, and Union Hall, Virginia, which are now branch offices of the Bank.

RESULTS OF OPERATIONS

Net Income

Net income for 2015 was \$15,039,000 compared to \$12,741,000 for 2014, an increase of \$2,298,000 or 18.0%. Basic and diluted earnings per share were \$1.73 for 2015 compared to \$1.62 for 2014. This net income produced for 2015 a return on average assets of 0.99%, a return on average equity of 7.65%, and a return on average tangible equity of 10.62%.

Net income for 2014 was \$12,741,000 compared to \$15,747,000 for 2013, a decrease of \$3,006,000 or 19.1%. Basic and diluted earnings per share were \$1.62 for 2014 compared to \$2.00 for 2013. This net income produced for 2014 a return on average assets of 0.97%, a return on average equity of 7.40%, and a return on average tangible equity of 10.31%.

Earnings for 2015, 2014, and 2013 were favorably impacted by the 2011 acquisition of MidCarolina and the 2015 acquisition of MainStreet. The financial impact of the mergers was mostly manifested in a significant increase in earning assets.

Net Interest Income

Net interest income is the difference between interest income on earning assets, primarily loans and securities, and interest expense on interest bearing liabilities, primarily deposits. Fluctuations in interest rates as well as volume and mix changes in earning assets and interest bearing liabilities can materially impact net interest income. The 2011 acquisition of MidCarolina impacted net interest income positively for 2015 and 2014, through increased earning assets. The 2015 acquisition of MainStreet impacted net interest income positively for 2015, through increased earning assets

The following discussion of net interest income is presented on a taxable equivalent basis to facilitate performance comparisons among various taxable and tax-exempt assets, such as certain state and municipal securities. A tax rate of 35% was used in adjusting interest on tax-exempt assets to a fully taxable equivalent basis. Net interest income divided by average earning assets is referred to as the net interest margin. The net interest spread represents the difference between the average rate earned on earning assets and the average rate paid on interest bearing liabilities. All references in this section relate to average yields and rates and average asset and liability balances during the periods discussed.

Net interest income on a taxable equivalent basis increased \$7,466,000 or 17.0% in 2015 from 2014, following a \$4,819,000 or 9.9% decrease in 2014 from 2013. The increase in net interest income in 2015 was primarily due to increased volumes of earning assets and accretion income related to the MainStreet acquired loan portfolio, and accounted for \$6,430,000 or 86% of the total increase.

Yields on loans were 4.81% in 2015 compared to 4.88% in 2014. Cost of funds was 0.58% in 2015 compared to 0.64% in 2014. Between 2015 and 2014, deposit rates for demand, money market, and savings accounts remained basically stable while time deposit rates decreased to 1.09% from 1.17%. Management regularly reviews deposit pricing and attempts to keep costs as low as possible, while remaining competitive. The net interest margin was 3.69% for 2015, 3.66% for 2014, and 4.10% for 2013.

During 2008, the Federal Open Market Committee ("FOMC") of the FRB reduced the federal funds rate seven times from 4.25% to 0.25%, where it has remained, unchanged, through mid December 2015. On December 17, 2015, the FOMC raised the target federal funds rate from 0.25% to 0.50%. The increase in rates is expected to have a nominal positive impact on net interest income. Given recent economic and geopolitical events in early 2016, it is uncertain if there will be further rate increases in the near term.

Net interest income on a taxable equivalent basis decreased \$4,819,000 or 9.9% in 2014 from 2013, following a \$3,357,000 or 6.5% decrease in 2013 from 2012. The decrease in net interest income in 2014 was primarily due to lower accretion income related to the MidCarolina acquired loan portfolio, which accounted for \$4,721,000 or 97.9% of the decrease. Excluding the change in accretion income, declines in yields on earnings assets were almost offset by decreased cost of interest bearing liabilities.

Yields on loans were 4.88% in 2014 compared to 5.65% in 2013. Cost of funds was 0.64% in 2014 compared to 0.72% in 2013. Between 2014 and 2013, deposit rates for demand accounts decreased to 0.04% from 0.07%, money market accounts decreased to 0.13% from 0.19%, and time deposits decreased to 1.17% from 1.22%. Management regularly reviews deposit pricing and attempts to keep costs as low as possible, while remaining competitive. The net interest margin was 3.66% for 2014, 4.10% for 2013, and 4.44% for 2012.

The following presentation is an analysis of net interest income and related yields and rates, on a taxable equivalent basis, for the last three years. Nonaccrual loans are included in average balances. Interest income on nonaccrual loans, if recognized, is recorded on a cash basis or when the loan returns to accrual status.

Edgar Filing: AMERICAN NATIONAL BANKSHARES INC. - Form 10-K

Net Interest Income Analysis

Noninterest Income

For the year ended December 31, 2015, noninterest income increased \$2,111,000 or 18.9% compared to the year ended December 31, 2014. Unless otherwise noted, these increases are primarily related to the January 2015 acquisition of MainStreet. Details of individual accounts are shown in the table on the following page.

	Years Ended December 31, (Dollars in thousands)			
	2015	2014	\$ Change	% Change
Noninterest income:				
Trust fees	\$3,935	\$4,196	\$(261)	(6.2)%
Service charges on deposit accounts	2,066	1,735	331	19.1
Other fees and commissions	2,377	1,903	474	24.9
Mortgage banking income	1,320	1,126	194	17.2
Securities gains, net	867	505	362	71.7
Brokerage fees	946	643	303	47.1
Income from Small Business Investment Companies	912	176	736	80.7
Other	2,722	1,711	1,011	59.1
Total noninterest income	\$15,145	\$11,995	\$3,150	26.3%

A substantial portion of trust fees are earned based on account fair values, so changes in the equity markets may have a large and potentially volatile impact on revenue. Trust income decreased for 2015 compared to 2014, largely related to the 2014 recognition of a one-time estate fee revenue of approximately \$110,000. Trust income was not immediately impacted by the MainStreet acquisition. Service charge income was positively impacted by increases in overdraft and returned check fee income and higher fee income from debit card activity. These categories were higher based on larger transaction volume. Mortgage banking income was higher in 2015 based on greater loan demand volume in existing markets and the impact of the MainStreet acquisition. Secondary market mortgage loan volume for 2015 was \$59,030,000 compared to \$49,565,000 for 2014. Securities gains also increased, which related to the Company's decision to reduce its exposure to states with unusually large unfunded pension obligations and states sensitive to the large decline in the price of oil, notably Texas. Other income was positively impacted by increased income from Small Business Investment Company ("SBIC") investments. Approximately \$735,000 or 72.7% of the increase in this category was directly related to SBIC income, which is volatile and difficult to predict.

	Years Ended December 31, (Dollars in thousands)			
	2014	2013	\$ Change	% Change
Noninterest income:				
Trust fees	\$4,196	\$3,689	\$507	13.7%
Service charges on deposit accounts	1,735	1,750	(15)	(0.9)
Other fees and commissions	1,903	1,864	39	2.1
Mortgage banking income	1,126	2,008	(882)	(43.9)
Securities gains, net	505	192	313	163.0
Brokerage fees	643	469	174	37.1
Income from Small Business Investment Companies	176	12	164	1,366.7
Other	1,711	1,324	387	29.2
Total noninterest income	\$11,995	\$11,308	\$687	6.1%

A substantial portion of trust fees are earned based on account market values, so changes in the equity markets may have a large and potentially volatile impact on revenue. Trust income increased for 2014 compared to 2013. The size of the increase was negatively impacted by a \$330,000 refund, paid in the first quarter of 2013, related to a long running error in a trust agreement. Mortgage banking income decreased in 2014 from 2013 due to increases in mortgage interest rates, which slowed demand for mortgage loan refinancing and, accordingly, reduced volume and income. Also contributing to the decline in demand in 2014, was that most credit worthy customers who desired a mortgage refinance had taken advantage of the low interest rates in prior years. Secondary market mortgage loan volume for 2014 was \$49,565,000 compared to \$79,392,000 for 2013. Securities gains increased in 2014 from 2013 as a result of the Company selling bonds consistent with the ongoing asset liability and liquidity objectives. Most of these sales were related to issuers located in states with which management had some significant credit or economic concerns. The increase in other income in 2014 compared to 2013 was primarily attributable to

brokerage income, which was up \$174,000 and income from an equity investment in a SBIC, which was up \$164,000. Income from the SBIC investment is erratic and unpredictable.

Noninterest Expense

For the year ended December 31, 2015, noninterest expense increased \$5,985,000 or 17.3% as compared to the year ended December 31, 2014. Unless otherwise noted, these increases are primarily related to the January 2015 acquisition of MainStreet. Details of individual accounts are shown in the table below.

	Years Ended December 31,				
	(Dollars in thousands)		\$ Change	% Change	
	2015	2014			
Noninterest Expense:					
Salaries	\$16,554	\$14,688	\$1,866	12.7	%
Employee benefits	4,311	2,988	1,323	44.3	
Occupancy and equipment	4,425	3,727	698	18.7	
FDIC assessment	750	647	103	15.9	
Bank franchise tax	898	901	(3)	NM
Core deposit intangible amortization	1,201	1,114	87	7.8	
Data processing	1,725	1,448	277	19.1	
Software	1,158	1,019	139	13.6	
Other real estate owned, net	99	240	(141)	(58.8)
Merger related expenses	1,998	780	1,218	156.2	
Other	7,424	7,006	418	6.0	
Total noninterest expense	\$40,543	\$34,558	\$5,985	17.3	%

NM- Not meaningful

Salaries expense increased significantly in 2015 compared to 2014 primarily related to the MainStreet acquisition. The increase in salaries expense represents 31.2% of the total increase in noninterest expense between 2015 and 2014. Total full time equivalent employees increased to 303 in 2015 from 284 in 2014. Employee benefits were impacted by the acquisition and also increased health care and pension settlement expense. Data processing expense increased due to higher transaction volumes, increased usage of the Company's core information management system, and also a delay in the operational conversion for MainStreet from March to May 2015. Other real estate owned expense includes gains and losses on sale of foreclosed properties, adjustments related to re-appraisals of foreclosed properties, and operating expenses related to maintaining foreclosed properties. It is inherently volatile from period to period. Nonrecurring MainStreet acquisition related expenses represent 20.4% of the total increase in noninterest expense between 2015 and 2014.

	Years Ended December 31, (Dollars in thousands)			
	2014	2013	\$ Change	% Change
Noninterest Expense:				
Salaries	\$ 14,688	\$ 14,059	\$ 629	4.5 %
Employee benefits	2,988	3,848	(860)	(22.3)

Total noninterest expense	\$ 34,558	\$ 35,105	\$ (547)	(1.6)%

NM - Not meaningful

Salaries expense increased modestly in 2014 from 2013, mostly related to normal annual increases. Employee benefits expense decreased substantially in 2014 from 2013. A large portion of this decrease, \$778,000, was related to pension expense. Pension expense is impacted by market interest rates and participant decisions regarding retirement distributions, both of which can be difficult for the Company to predict. Total full time equivalent employees were 284 at the end of 2014 compared to 290 at the end of 2013. Other real estate owned expense includes gains and losses on sale of foreclosed properties, adjustments related to re-appraisals of foreclosed properties, and operating expenses related to maintaining foreclosed properties. It is inherently volatile from period to period. Merger related expenses are related to the MainStreet acquisition.

Other Real Estate Owned ("OREO") expense, includes gains and losses on sale of foreclosed properties, adjustments related to re-appraisals of foreclosed properties, and operating expenses related to maintaining foreclosed properties. The activity related to this noninterest expense for the years ended December 31, 2015, 2014, and 2013 are shown below (dollars in thousands):

	2015	2014	2013
(Gain) on sale of OREO	\$ (185)) \$ (66)) \$ (85)
OREO valuation adjustments	86	68	1,070
OREO related expense	198	238	538
	\$ 99	\$ 240	\$ 1,523

Income Taxes

Income taxes on 2015 earnings amounted to \$6,020,000, resulting in an effective tax rate of 28.6%, compared to 29.0% in 2014 and 27.8% in 2013. The effective tax rate is lower than the statutory rate of 35% due to income that is not taxable for federal income tax purposes. The primary non-taxable income is that of state and municipal securities and loans. The decrease in the effective rate is related to a higher level of tax exempt municipal loans.

Fair Value Impact to Pretax Income

The July 2011 merger with MidCarolina and the January 2015 merger with MainStreet had a material and positive impact on earnings. The ongoing financial impact of the mergers was mostly the result of the increase in earnings assets. However, the specific financial impact of the fair value related accounting adjustments is reflected in the following tables. The tables present the actual effect of the accretible and amortizable fair value adjustments attributable to the mergers on net interest income and pretax income for the years ended December 31, 2015, 2014, and 2013, respectively (dollars in thousands):

			December 31, 2015		
	Income Statement Effect	Premium/(Discount) Balance on December 31, 2014	Additions for the year ended	Accretion (Amortization) For the year ended	Remaining Premium/(Discount) Balance
Interest income/(expense):					
Acquired performing loans	Income	\$ (3,358)	\$(1,279)	\$1,576	\$(3,061)
Purchase acquired impaired loans	Income	(3,424)	(5,097)	1,455	(7,066) (1)

Trust preferred securities	Expense	1,964	(102)		1,862
Net Interest Income			2,431		
Non-interest (expense)					
Amortization of core deposit intangible	Expense	\$ 2,969	(924)		\$2,045
Net non-interest expense			(924)		
Change in pretax income			\$1,507		

(1) Remaining discount balance includes \$35,000 of mark moved to OREO and \$9,000 of charge-offs against the mark.

(2) Remaining discount balance includes \$579,000 in reclassifications from the non-accretible difference.

			December 31, 2013	
	Income Statement Effect	Premium/(Discount) Balance on December 31, 2012	Accretion (Amortization) For the year ended	Remaining Premium/ (Discount) Balance
Interest income/(expense):				
Acquired performing loans	Income	\$ (9,631)	\$4,601	\$(5,010) (1)
Purchase acquired impaired loans	Income	(7,006)	2,635	(4,371) (2)
Time deposits-brokered	Income	(278)	278	—
FHLB advances	Expense	109	(22)	87
Trust preferred securities	Expense	2,066	(102)	1,964
Net Interest Income			7,390	
Non-interest (expense)				
Amortization of core deposit intangible	Expense	\$ 4,094	(1,125)	\$2,969
Net non-interest expense			(1,125)	
Change in pretax income			\$6,265	

(1) Remaining discount balance includes \$90,000 of mark moved to OREO and \$11,000 of charge-offs against the mark.

(2) Remaining discount balance includes 2,516,000 in reclassifications from the non-accretable difference.

Generally accepted accounting principles for business combinations require the acquired balance sheet to be valued at fair value at the time of the merger. In the context of acquiring a commercial bank, most of the balance sheet is interest rate sensitive and this can generate significant discounts or premiums to contractual values. These discounts or premiums will have potentially significant impact to net interest income and to net income.

The table below summarizes the impact of the fair value merger related accounting impact to net interest income and impact to pretax income of the MidCarolina ("MC") and MainStreet ("MS") acquisitions (dollars in thousands):

For the Years Ended December 31,	2015			2014			2013		
	MC	MS	Total	MC	MS	Total	MC	MS	Total
Net interest income	\$2,268	\$929	\$3,197	\$2,431	\$—	\$2,431	\$7,390	\$—	\$7,390
Core deposit amortization	(906)	(295)	(1,201)	(924)	—	(924)	(1,125)	—	(1,125)
Total pretax income	\$1,362	\$634	\$1,996	\$1,507	\$—	\$1,507	\$6,265	\$—	\$6,265

The MidCarolina acquisition was effective July 1, 2011. The MainStreet acquisition was effective January 1, 2015. Management expects that the fair value accounting financial impact of both acquisitions will continue to decline in subsequent quarters.

Impact of Inflation and Changing Prices

The majority of assets and liabilities of a financial institution are monetary in nature and therefore differ greatly from most commercial and industrial companies that have significant investments in fixed assets or inventories. The most significant effect of inflation is on noninterest expenses that tend to rise during periods of inflation. Changes in interest rates have a greater impact on a financial institution's profitability than do the effects of higher costs for goods and services. Through its balance sheet management practices, the Company has the ability to react to those changes and measure and monitor its interest rate and liquidity risk.

Market Risk Management

Effectively managing market risk is essential to achieving the Company's financial objectives. Market risk reflects the risk of economic loss resulting from changes in interest rates and market prices. The Company is generally not subject to currency exchange risk or commodity price risk. The Company's primary market risk exposure is interest rate risk; however, market risk also includes liquidity risk. Both are discussed in the following sections.

Interest Rate Risk Management

Interest rate risk and its impact on net interest income is a primary market risk exposure. The Company manages its exposure to fluctuations in interest rates through policies approved by its Asset Liability Committee ("ALCO") and Board of Directors, both of which receive and review periodic reports of the Company's interest rate risk position. The Company uses computer simulation analysis to measure the sensitivity of projected earnings to changes in interest rates. Simulation takes into account current balance sheet volumes and the scheduled repricing dates, instrument level optionality, and maturities of assets and liabilities. It incorporates numerous assumptions including growth, changes in the mix of assets and liabilities, prepayments, and average rates earned and paid. Based on this information, management uses the model to project net interest income under multiple interest rate scenarios.

A balance sheet is considered asset sensitive when its earning assets (loans and securities) reprise faster or to a greater extent than its liabilities (deposits and borrowings). An asset sensitive balance sheet will produce relatively more net interest income when interest rates rise and less net interest income when they decline. Based on the Company's simulation analysis, management believes the Company's interest sensitivity position at December 31, 2015 is asset sensitive. As of early 2016, management expects that the general direction of market interest rates will be stable to up, though volatility, sometimes substantial, is anticipated in the short-term.

Earnings Simulation

The table below shows the estimated impact of changes in interest rates on net interest income as of December 31, 2015 (dollars in thousands), assuming gradual and parallel changes in interest rates, and consistent levels of assets and liabilities. Net interest income for the following twelve months is projected to increase when interest rates are higher than current rates.

Estimated Changes in Net Interest Income

Change in interest rates	December 31, 2015		
	Change in net interest Income Amount	Percent	
Up 4.0%	\$8,345	17.4	%
Up 3.0%	6,327	13.2	
Up 2.0%	4,240	8.8	
Up 1.0%	2,115	4.4	
Flat	—	—	
Down 0.25%	(607) (1.3)
Down 0.50%	(1,384) (2.9)

Management cannot predict future interest rates or their exact effect on net interest income. Computations of future effects of hypothetical interest rate changes are based on numerous assumptions and should not be relied upon as indicative of actual results. Certain limitations are inherent in such computations. Assets and liabilities may react differently than projected to changes in market interest rates. The interest rates on certain types of assets and liabilities may fluctuate in advance of changes in market interest rates, while rates on other types of assets and liabilities may lag changes in market interest rates. Interest rate shifts may not be parallel.

Changes in interest rates can cause substantial changes in the amount of prepayments of loans and mortgage-backed securities, which may in turn affect the Company's interest rate sensitivity position. Additionally, credit risk may rise if an interest rate increase adversely affects the ability of borrowers to service their debt.

Economic Value Simulation

Economic value simulation is used to calculate the estimated fair value of assets and liabilities over different interest rate environments. Economic values are calculated based on discounted cash flow analysis. The net economic value of equity is the economic value of all assets minus the economic value of all liabilities. The change in net economic value over different rate environments is an indication of the longer-term earnings capability of the balance sheet. The same assumptions are used in the economic value simulation as in the earnings simulation. The economic value simulation uses instantaneous rate shocks to the balance sheet.

The following table reflects the estimated change in net economic value over different rate environments using economic value simulation for the balances at the period ended December 31, 2015 (dollars in thousands):

Estimated Changes in Economic Value of Equity

Change in interest rates	December 31, 2015			
	Amount	\$ Change	% Change	
Up 4%	\$291,350	\$60,402	26.2	%
Up 3%	287,063	56,115	24.3	
Up 2%	278,548	47,601	20.6	
Up 1%	261,818	30,871	13.4	
Flat	230,948	—	—	
Down 0.25%	221,849	(9,098) (3.9)
Down 0.50%	212,917	(18,030) (7.8)

Liquidity Risk Management

Liquidity is the ability of the Company in a timely manner to convert assets into cash or cash equivalents without significant loss and to raise additional funds by increasing liabilities. Liquidity management involves maintaining the Company's ability to meet the daily cash flow requirements of its customers, whether they are borrowers requiring funds or depositors desiring to withdraw funds. Additionally, the Company requires cash for various operating needs including dividends to shareholders, the servicing of debt, and the payment of general corporate expenses. The Company manages its exposure to fluctuations in interest rates and liquidity needs through policies approved by the ALCO and Board of Directors, both of which receive periodic reports of the Company's interest rate risk and liquidity position. The Company uses a computer simulation model to assist in the management of the future liquidity needs of the Company.

Liquidity sources include on balance sheet and off balance sheet sources.

Balance sheet liquidity sources include cash, amounts due from banks, loan repayments, bond maturities and calls, and increases in deposits. Further, the Company maintains a large, high quality, very liquid bond portfolio, which is generally 50% to 60% unpledged and would, accordingly, be available for sale if necessary.

Off balance sheet sources include lines of credit from the Federal Home Loan Bank of Atlanta ("FHLB"), federal funds lines of credit, and access to the Federal Reserve Bank of Richmond's discount window.

The Company has a line of credit with the FHLB, equal to 30% of the Company's assets, subject to the amount of collateral pledged. Under the terms of its collateral agreement with the FHLB, the Company provides a blanket lien covering all of its residential first mortgage loans, home equity lines of credit, commercial real estate loans and commercial construction loans. In addition, the Company pledges as collateral its capital stock in and deposits with the FHLB. At December 31, 2015, principal advance obligations to the FHLB consisted of \$9,958,000 in fixed-rate, long-term advances compared to \$9,935,000 in long-term advances at December 31, 2014. The Company also had outstanding \$70,700,000 in letters of credit at December 31, 2015 and at December 31, 2014. The letters of credit provide the Bank with additional collateral for securing public entity deposits above FDIC insurance levels, thereby providing less need for collateral pledging from the securities portfolio and accordingly increasing our balance sheet liquidity.

Short-term borrowing is discussed in Note 10 and long-term borrowing is discussed in Note 11 of the Consolidated Financial Statements contained in Item 8 of this Form 10-K.

The Company has federal funds lines of credit established with two correspondent banks in the amounts of \$15,000,000 each and has access to the Federal Reserve Bank of Richmond's discount window. There were no amounts outstanding under these facilities at December 31, 2015. The Company, through its subsidiary bank, has a relationship with Promontory Network, the sponsoring entity for the Certificate of Deposit Account Registry Service® ("CDARS"). Through CDARS, the Company is able to provide deposit customers with access to aggregate FDIC insurance in amounts far exceeding \$250,000. This gives the Company the ability, as and when needed, to attract and retain large deposits from insurance sensitive customers. CDARS are classified as brokered deposits, however they are generally derived from customers with whom our institution has or wishes to have a direct and ongoing core deposit relationship. As a result, management considers these deposits functionally, though not technically, in the

same category as core deposits. With CDARS, the Company has the option to keep deposits on balance sheet or sell them to other members of the network. Additionally, subject to certain limits, the Company can use CDARS to purchase cost-effective funding without collateralization and in lieu of generating funds through traditional brokered CDs or the

FHLB. Thus, CDARS serves as a deposit-gathering tool and an additional liquidity management tool. Deposits through the CDARS program as of December 31, 2015 and 2014 were \$23,633,000 and \$22,255,000, respectively. The Bank also participates with the Promontory Network using Insured Cash Sweep® ("ICS"), a product which provides the Bank the capability of providing additional deposit insurance to customers in the context of a money market account arrangement. The product is analogous to the CDARS product discussed above.

Management believes that these sources provide sufficient and timely liquidity, both on and off balance sheet.

BALANCE SHEET ANALYSIS

Securities

The securities portfolio generates income, plays a strategic role in the management of interest rate sensitivity, provides a source of liquidity, and is used to meet collateral requirements. The securities portfolio consists of high quality investments, mostly federal agency, mortgage-backed, and state and municipal securities.

The Company is cognizant of the continuing historically low and recently volatile interest rate environment and has elected to maintain a defensive asset liability strategy of purchasing high quality taxable securities of relatively short duration and somewhat longer term tax exempt securities, whose market values are not as volatile in rising rate environments as similar termed taxable investments.

The following table presents information on the amortized cost, maturities, and taxable equivalent yields of securities at the end of the last three years (dollars in thousands, except yields):

	As of December 31,			2014			2013	
	2015	Taxable Equivalent Yield		Amortized Cost	Taxable Equivalent Yield		Amortized Cost	Taxable Equivalent Yield
Federal Agencies:

Total portfolio	\$ 334,008	2.75	%	\$ 335,723	2.80	%	\$ 340,619	2.87

Loans

The loan portfolio consists primarily of commercial and residential real estate loans, commercial loans to small and medium-sized businesses, construction and land development loans, and home equity loans.

Average loans increased \$171,001,000 or 21.2% from 2014 to 2015, mostly impacted by the MainStreet merger.

Average loans increased \$10,505,000 or 1.3% from 2013 to 2014.

At December 31, 2015, total loans were \$1,005,525,000, an increase of \$164,600,000 or 19.6% from the prior year.

Of this increase, \$105,934,000 or 64.4% related to the MainStreet merger. The remaining \$58,666,000 represents annualized organic growth of 7.1%, the highest level of organic loan growth for the Company since the 2008 financial crisis.

Loans held for sale totaled \$3,266,000 at December 31, 2015 and \$616,000 at December 31, 2014. Loan production volume was \$59,030,000 and \$49,565,000 for 2015 and 2014, respectively. These loans were approximately 70%

purchase, 30% refinancing.

41

Management of the loan portfolio is organized around portfolio segments. Each segment is comprised of a various loan types that are reflective of operational and regulatory reporting requirements. The following table presents the Company's portfolio as of the dates indicated by segment (dollars in thousands):

Loans

	As of December 31,				
	2015	2014	2013	2012	2011
Real estate:					
Construction and land development	\$72,968	\$50,863	\$41,822	\$48,812	\$54,433
Commercial real estate	430,186	391,472	364,616	355,433	351,961
Residential real estate	220,434	175,293	171,917	161,033	179,812
Home equity	98,449	91,075	87,797	91,313	96,195

Commercial and industrial	177,481	126,981	122,553	126,192	134,166
Consumer	6,007	5,241	5,966	5,922	8,191
Total loans	\$1,005,525	\$840,925	\$794,671	\$788,705	\$824,758

The following table provides loan balance information by geographic regions. In some circumstances, loans may be originated in one region for borrowers located in other regions (dollars in thousands):

Loans by Geographic Region

	As of December 31, 2015		Percentage Change	
	Balance	Percentage of Portfolio	in Balance Since	December 31, 2014
Danville region	\$206,069	20.5	% (0.3)%
Central region	157,734	15.7	10.6	
Southside region	80,977	8.1	(4.8)
Eastern region	77,677	7.7	3.7	
Franklin region	121,723	12.1	N/A	
Alamance region	214,866	21.4	6.5	
Guilford region	146,479	14.6	12.8	
Total loans	\$1,005,525	100.0	% 19.6	%

The large year over year increase in the Guilford region was the result of a convergence of improving business conditions in the Greensboro, North Carolina market and an ongoing, active program of customer outreach conducted by the Bank's market area lenders.

The Danville region consists of offices in Danville, Virginia and Yanceyville, North Carolina. The Central region consists of offices in Bedford, Lynchburg, and the counties of Bedford, Campbell, and Nelson, Virginia. The Southside region consists of offices in Martinsville and Henry County, Virginia. The Eastern region consists of offices in South Boston and the counties of Halifax and Pittsylvania, Virginia. The Alamance region consists of offices in Burlington, Graham, and Mebane, North Carolina. The Guilford region consists of offices in Greensboro, North Carolina. The Franklin region consists of offices in Rocky Mount, Union Hall, and Hardy, Virginia. The Guilford region consists of offices in Greensboro, North Carolina.

The Company does not participate in or have any highly leveraged lending transactions, as defined by bank regulations. The Company has no foreign loans. While there were no concentrations of loans to any individual, group of individuals, business, or industry that exceeded 10% of total loans at December 31, 2015 or 2014, loans to lessors of nonresidential buildings represented 19.5% of total loans at December 31, 2015 and 19.5% at December 31, 2014. These lessees and lessors are engaged in a variety of industries.

The following table presents the maturity schedule of selected loan types (dollars in thousands):

Maturities of Selected Loan Types

December 31, 2015

	Commercial and Industrial (1)	Construction and Land Development	Total
1 year or less	\$82,531	\$25,484	\$108,015
1 to 5 years (2)	67,151	26,985	94,136
After 5 years (2)	27,799	20,499	48,298
Total	\$177,481	\$72,968	\$250,449

(1) Includes agricultural loans.

(2) Of the loans due after one year, \$141,794 have predetermined interest rates and \$640 have floating or adjustable interest rates.

Provision for Loan Losses

The provision for loan losses was \$950,000, \$400,000, and \$294,000 for the years ended December 31, 2015, 2014, and 2013, respectively.

The larger provision expense in 2015 related to the increase in organic loan growth and the relatively rapid maturities and renewals of the performing acquired loan portfolio of MainStreet and their resulting transfer to the regular loan portfolio.

Allowance for Loan Losses ("ALLL")

The purpose of the ALLL is to provide for probable losses inherent in the loan portfolio. The allowance is increased by the provision for loan losses and by recoveries of previously charged-off loans. Loan charge-offs decrease the allowance.

The ALLL was \$12,601,000, \$12,427,000, and \$12,600,000 at December 31, 2015, 2014, and 2013, respectively.

The ALLL as a percentage of loans at each of those dates were 1.25%, 1.48%, and 1.59%, respectively.

The decrease in the allowance as a percentage of loans during 2015 was primarily impacted by the January 2015 acquisition of MainStreet. The MainStreet acquired loan portfolio totaled \$122,336,000 at January 1, 2015, was marked to fair value and no allowance for loan losses was included in the merger transaction. At December 31, 2015, the acquired performing loans from MainStreet were \$62,887,000, with a related credit mark of \$843,000 or 1.1%. At the same date, the acquired credit impaired loans were \$27,172,000, with a related nonaccretable portion of loan mark of \$4,011,000 or 15%. Of the acquired impaired loans, \$1,926,000 were nonperforming at year end.

In an effort to better evaluate the adequacy of its ALLL, the Company computes its ASC 450, Contingencies, loan balance by reducing total loans by acquired loans and loans that were evaluated for impairment individually or smaller balance nonaccrual loans evaluated for impairment in homogeneous pools. It also adjusts its ASC 450 loan loss reserve balance total by removing allowances associated with these other pools of loans.

The general allowance, ASC 450 (FAS 5) reserves to ASC 450 loans, was 1.40% at December 31, 2015, compared to 1.55% at December 31, 2014. On a dollar basis, the reserve was \$12,159,000 at December 31, 2015, compared to \$11,716,000 at December 31, 2014. The percentage of the reserve to total loans has declined primarily due to improving local and national economic conditions. The percentage of the reserve to total loans has declined due to improving local and national economic conditions, continued improvement in asset quality metrics, and a substantial portion of net loan growth in loans to highly rated municipal issuers, with consequently relatively small loss allowances. This segment of the allowance represents by far the largest portion of the loan portfolio and the largest aggregate risk.

The specific allowance, ASC 310-40 (FAS 114) reserves to ASC 310-40 loans, was 0.74% at December 31, 2015, compared to 3.64% at December 31, 2014. On a dollar basis, the reserve was \$35,000 at December 31, 2015, compared to \$165,000 at December 31, 2014. The decrease in the dollar amount of the reserve was related to changes in characteristics of loans reviewed individually for impairment and charge-offs of specific reserves in 2015 that were recorded in the prior year. There is ongoing turnover in the composition of the impaired loan population, which increased \$170,000 over December 31, 2014.

The specific allowance does not include reserves related to acquired loans with deteriorated credit quality. This reserve was \$407,000 at December 31, 2015, compared to \$546,000 at December 31, 2014. This is the only portion of the reserve related to

acquired loans. Cash flow expectations for these loans are reviewed on a quarterly basis and unfavorable changes in those estimates relative to the initial estimates can result in the need for specific loan loss provision.

The following table presents the Company's loan loss and recovery experience for the past five years (dollars in thousands):

Summary of Loan Loss Experience

	Year Ended December 31,				
	2015	2014	2013	2012	2011
Balance at beginning of period	\$12,427	\$12,600	\$12,118	\$10,529	\$8,420

% - represents the percentage of loans in each category to total loans.

Asset Quality Indicators

The following table provides certain qualitative indicators relevant to the Company's loan portfolio for the past five years.

Asset Quality Ratios

	As of or for the Years Ended December 31,					
	2015	2014	2013	2012	2011	
Allowance to loans*	1.25	% 1.48	% 1.59	% 1.54	% 1.28	%
ASC 450/general allowance	1.40	1.55	1.75	1.98	1.95	
Net charge-offs (recoveries) to year-end allowance	6.16	4.61	(1.49)	4.49	10.08	
Net charge-offs (recoveries) to average loans	0.08	0.07	(0.02)	0.07	0.16	
Nonperforming assets to total assets*	0.48	0.46	0.65	0.90	1.46	
Nonperforming loans to loans*	0.52	0.49	0.64	0.67	1.66	
Provision to net charge-offs (recoveries)	122.42	69.81	(156.38)	392.10	298.77	
Provision to average loans	0.10	0.05	0.04	0.26	0.47	
Allowance to nonperforming loans*	242.09	302.21	248.47	227.95	76.74	

* - at year end.

Nonperforming Assets (Loans and Other Real Estate Owned)

Nonperforming loans include loans on which interest is no longer accrued and accruing loans that are contractually past due 90 days or more. Nonperforming loans include loans originated and loans acquired.

Nonperforming loans to total loans were 0.52% at December 31, 2015 compared to 0.49% at December 31, 2014.

Nonperforming assets include nonperforming loans and foreclosed real estate. Nonperforming assets represented 0.48% at December 31, 2015 compared to 0.46% of total assets at December 31, 2014. The change in nonperforming loans during 2015 was \$1,093,000, MainStreet related nonperforming loans at December 31, 2015, were \$1,926,000. In most cases, it is the policy of the Company that any loan that becomes 90 days past due will automatically be placed on nonaccrual loan status, accrued interest reversed out of income, and further interest accrual ceased. Any payments received on such loans will be credited to principal. In some cases a loan in process of renewal may become 90 days past due. In these instances the loan may still be accruing because of a delayed renewal process in which the customer has not been billed.

Loans will only be restored to full accrual status after six consecutive months of payments that were each less than 30 days delinquent. The Company strictly adheres with this policy before restoring a loan to normal accrual status.

The following table presents the Company's nonperforming asset history, including acquired impaired loans as of the dates indicated (dollars in thousands):

Nonperforming Assets

	As of December 31,				
	2015	2014	2013	2012	2011
Nonaccrual loans:					
Real estate	\$5,106	\$4,111	\$5,060	\$5,261	\$11,651
Commercial	90	—	11	52	1,820
Agricultural	—	—	—	—	—
Consumer	9	1	—	3	49
Total nonaccrual loans	5,205	4,112	5,071	5,316	13,520
Loans past due 90 days and accruing interest:					
Real estate	—	—	—	—	197
Commercial	—	—	—	—	—
Agricultural	—	—	—	—	—
Consumer	—	—	—	—	—
Total past due loans	—	—	—	—	197
Total nonperforming loans	5,205	4,112	5,071	5,316	13,717
Other real estate owned, net	2,184	2,119	3,422	6,193	5,353
Total nonperforming assets	\$7,389	\$6,231	\$8,493	\$11,509	\$19,070

Impaired Loans

A loan is considered impaired when, based on current information and events, it is probable that the Company will be unable to collect the scheduled payments of principal or interest when due according to the contractual terms of the loan agreement. The following table shows loans that were considered impaired, exclusive of acquired impaired loans, as of the dates indicated (dollars in thousands):

Impaired Loans

	As of December 31,				
	2015	2014	2013	2012	2011
Accruing	\$1,171	\$989	\$958	\$499	\$313
On nonaccrual status	3,536	3,548	5,071	2,548	2,925
Total impaired loans	\$4,707	\$4,537	\$6,029	\$3,047	\$3,238

Troubled Debt Restructurings ("TDRs")

TDRs exist whenever the Company makes a concession to a customer based on the customer's financial distress that would not have otherwise been made in the normal course of business.

There was \$1,958,000 in TDRs at December 31, 2015 compared to \$2,862,000 at December 31, 2014.

Other Real Estate Owned

Other real estate owned is carried on the consolidated balance sheets at \$2,184,000 and \$2,119,000 as of December 31, 2015 and 2014, respectively. Foreclosed assets are initially recorded at fair value, less estimated costs to sell, at the date of foreclosure. Loan losses resulting from foreclosure are charged against the ALLL at that time. Subsequent to foreclosure, valuations are periodically performed by management and the assets are carried at the lower of the new cost basis or fair value, less estimated costs to sell with any additional write-downs charged against earnings. For significant assets, these valuations are typically outside annual appraisals. The following table shows OREO as of the dates indicated (dollars in thousands):

	As of December 31,				
	2015	2014	2013	2012	2011
Construction and land development	\$886	\$1,577	\$1,683	\$3,290	\$3,001
Farmland	—	—	—	236	—
1-4 family residential	643	382	1,400	1,090	1,267
Multifamily (5 or more) residential	—	—	—	1,012	—
Commercial real estate	655	160	339	565	1,085
	\$2,184	\$2,119	\$3,422	\$6,193	\$5,353

Deposits

The Company's deposits consist primarily of checking, money market, savings, and consumer and commercial time deposits. Average deposits increased \$179,669,000 or 17.1% in 2015, after increasing \$2,338,000 or 0.22% in 2014. Period-end total deposits increased \$186,823,000 or 17.4% during 2015. The MainStreet merger accounted for 73.5% of the increase. The remaining increase was primarily related to growth in core deposits throughout the Bank's other markets, which is consistent with the Company's asset liability strategy. The Company has only a relatively small portion of its time deposits provided by wholesale sources. These include brokered time deposits, which at year end totaled \$0 for 2015 and 2014, and \$4,000,000 for 2013. They also included time deposits through the CDARs program, which at year end totaled \$23,633,000 for 2015, \$22,255,000 for 2014, and \$22,375,000 for 2013. Management considers the CDARs deposits the functional, though not regulatory, equivalent of core deposits, because they relate to balances derived from customers with long standing relationships with the Company.

Average deposits and rates for the years indicated (dollars in thousands):

Deposits

	Year Ended December 31,							
	2015		2014		2013			
	Average Balance	Rate	Average Balance	Rate	Average Balance	Rate		
Noninterest bearing deposits	\$297,483	—	% \$234,149	—	% \$220,980	—	%	
Interest bearing accounts:								
NOW accounts	\$223,825	0.04	% \$183,994	0.04	% \$161,602	0.07	%	
Money market	196,828	0.13	177,046	0.13	178,235	0.19		
Savings	109,697	0.05	88,629	0.05	84,162	0.08		
Time	404,366	1.09	368,712	1.17	405,213	1.22		
Total interest bearing deposits	\$934,716	0.51	% \$818,381	0.57	% \$829,212	0.66	%	
Average total deposits	\$1,232,199	0.39	% \$1,052,530	0.44	% \$1,050,192	0.52	%	

Certificates of Deposit of \$100,000 or More

Certificates of deposit at December 31, 2015 in amounts of \$100,000 or more were classified by maturity as follows (dollars in thousands):

	December 31, 2015
3 months or less	\$55,750
Over 3 through 6 months	12,766
Over 6 through 12 months	119,399
Over 12 months	58,515
Total	\$246,430

Certificates of Deposit of \$250,000 or More

Certificates of deposit at December 31, 2015 in amounts of \$250,000 or more were classified by maturity as follows (dollars in thousands):

	December 31, 2015
3 months or less	\$26,184
Over 3 through 6 months	3,524
Over 6 through 12 months	29,638
Over 12 months	73,340
Total	\$132,686

Borrowed Funds

In addition to internal deposit generation, the Company also relies on borrowed funds as a supplemental source of funding. Borrowed funds consist of customer repurchase agreements, overnight borrowings from the FHLB and longer-term FHLB advances, and trust preferred capital notes. Customer repurchase agreements are borrowings collateralized by securities of the U.S. Government, its agencies, or Government Sponsored Enterprises ("GSEs") and generally mature daily. The Company considers these accounts to be a stable and low cost source of funds. The securities underlying these agreements remain under the Company's control. Refer to Notes 11 and 12 of the Consolidated Financial Statements contained in Item 8 of this Form 10-K for a discussion of long-term debt. The following table presents information pertaining to the Company's short-term borrowed funds as of the dates indicated (dollars in thousands):

Short-Term Borrowings

	As of December 31,		
	2015	2014	
Customer repurchase agreements	\$40,611	\$53,480	
Weighted interest rate	0.02	% 0.02	%
Average for the year ended:			
Outstanding	\$48,105	\$43,724	
Interest rate	0.02	% 0.02	%
Maximum month-end outstanding	\$53,664	\$53,480	

In the regular course of conducting its business, the Company takes deposits from political subdivisions of the states of Virginia and North Carolina. At December 31, 2015 the Bank's public deposits totaled \$149,449,000. The Company is legally required to provide collateral to secure the deposits that exceed the insurance coverage provided by the FDIC. This collateral can be provided in the form of certain types of government agency bonds or letters of credit from the FHLB. At year-end 2015, the Company had \$70,000,000 in letters of credit with the FHLB outstanding to supplement collateral for such deposits.

Shareholders' Equity

The Company's goal with capital management is to be classified as "well capitalized" under regulatory capital ratios and to support growth, while generating acceptable returns on equity and paying a high rate of dividends.

Shareholders' equity was \$197,835,000 at December 31, 2015 and \$173,780,000 at December 31, 2014.

The Company declared and paid quarterly dividends totaling \$0.93 per share for 2015 and \$0.92 for each of 2014 and 2013. Cash dividends in 2015 totaled \$8,068,000 and represented a 53.6% payout of 2015 net income, compared to a 56.8% payout in 2014, and a 46.0% payout in 2013.

In July 2013, the FRB issued final rules that make technical changes to its capital rules to align them with the Basel III regulatory capital framework and meet certain requirements of the Dodd-Frank Act. The final rules maintain the general structure of the prompt corrective action framework in effect at such time while incorporating certain increased minimum requirements. Effective January 1, 2015, the final rules require the Company and the Bank to comply with the following minimum capital ratios: (i) a new common equity Tier 1 capital ratio of 4.5% of risk-weighted assets; (ii) a Tier 1 capital ratio of 6.0% of risk-weighted assets (increased from the prior requirement of 4.0%); (iii) a total capital ratio of 8.0% of risk-weighted assets (unchanged from the prior requirement); and (iv) a leverage ratio of 4.0% of total assets (unchanged from the prior requirement). These are the initial capital requirements, which will be phased in over a four-year period. When fully phased in on January 1, 2019, the rules will require the Company and the Bank to maintain such minimum ratios plus a 2.5% "capital conservation buffer" (other than for the leverage ratio). The capital conservation buffer requirement will be phased in beginning January 1, 2016, at 0.625% of risk-weighted assets, increasing by the same amount each year until fully implemented at 2.5% on January 1, 2019. Management believes the Company and the Bank will be compliant with the fully phased-in requirements when they become effective January 1, 2019.

The following table represents the major regulatory capital ratios for the Company as of the dates indicated:

	As of December 31,					
	2015	2014	2013	2012	2011	
Risk-Based Capital Ratios:						
Common equity tier 1 capital ratio	12.88	% NA	NA	NA	NA	
Tier 1 capital ratio	15.23	% 16.59	% 16.88	% 15.75	% 14.36	%
Total capital ratio	16.34	% 17.86	% 18.14	% 17.00	% 15.55	%

Leverage Capital Ratios:

Tier 1 leverage ratio	12.05	% 12.16	% 11.81	% 11.27	% 10.32	%
-----------------------	-------	---------	---------	---------	---------	---

Management believes the Company and the Bank meet the requirements to be considered "well capitalized" for all regulatory capital ratios as of December 31, 2015 and 2014.

Stock Repurchase Programs

In years prior to 2014 the Company had, in the normal course of business, operated certain stock repurchase programs. Authority to repurchase shares under these programs had been expired for some time.

On April 17, 2014, the Company filed a Form 8-K with the SEC to announce the approval by its Board of Directors (the "Board") of a stock repurchase program. The program authorized the repurchase of up to 250,000 shares of the Company's common stock over a two year period. The share purchase limit was established at such number of shares equal to approximately 3% of the 7,900,000 common shares then outstanding at the time the Board approved the program.

During 2015, the Company repurchased 150,656 shares at an average cost of \$23.27 per share, for a total cost of \$3,506,000. In 2014, the Company repurchased 70,184 shares at an average cost of \$21.45 per share, for a total cost of \$1,508,000.

On November 19, 2015, the Company filed a Form 8-K with the SEC to announce the approval by its Board of another stock repurchase program. The program authorizes the repurchase of up to 300,000 shares of the Company's common stock over a two year period. The share purchase limit was established at such number of shares equal to approximately 3.5% of the 8,622,000 common shares then outstanding at the time the Board approved the program.

CONTRACTUAL OBLIGATIONS

The following items are contractual obligations of the Company as of December 31, 2015 (dollars in thousands):

	Payments Due By Period				
	Total	Under 1 Year	1-3 Years	3-5 Years	More than 5 years
Time deposits	\$397,310	\$216,642	\$124,142	\$56,526	\$—
Repurchase agreements	40,611	40,611	—	—	—
FHLB borrowings	9,958	—	9,958	—	—
Operating leases	2,454	882	1,542	30	—
Junior subordinated debt	27,622	—	—	—	27,622

OFF-BALANCE SHEET ACTIVITIES

The Company enters into certain financial transactions in the ordinary course of performing traditional banking services that result in off-balance sheet transactions. Other than AMNB Statutory Trust I, formed in 2006 to issue trust preferred securities, and the MidCarolina Trust I and MidCarolina Trust II, the Company does not have any off-balance sheet subsidiaries. Refer to Note 12 of the Consolidated Financial Statements contained in Item 8 of this Form 10-K for a discussion of junior subordinated debt. Off-balance sheet transactions were as follows as of the dates indicated (dollars in thousands):

Off-Balance Sheet Commitments	December 31,	
	2015	2014
Commitments to extend credit	\$301,360	\$190,413
Standby letters of credit	4,286	3,333
Mortgage loan rate-lock commitments	5,365	3,372

Total off-balance sheet transaction volume was significantly impacted by the January 2015 acquisition of MainStreet. Commitments to extend credit to customers represent legally binding agreements with fixed expiration dates or other termination clauses. Since many of the commitments are expected to expire without being funded, the total commitment amounts do not necessarily represent future funding requirements. Standby letters of credit are conditional commitments issued by the Company guaranteeing the performance of a customer to a third party. Those guarantees are primarily issued to support public and private borrowing arrangements.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Shareholders
American National Bankshares Inc.
Danville, Virginia

We have audited the accompanying consolidated balance sheets of American National Bankshares Inc. and Subsidiary (the Company) as of December 31, 2015 and 2014, and the related consolidated statements of income, comprehensive income, changes in shareholders' equity, and cash flows for each of the three years in the period ended December 31, 2015. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of American National Bankshares Inc. and Subsidiary as of December 31, 2015 and 2014, and the results of their operations and their cash flows for each of the three years in the period ended December 31, 2015, in conformity with U.S. generally accepted accounting principles.

We have also audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), American National Bankshares Inc. and Subsidiary's internal control over financial reporting as of December 31, 2015, based on criteria established in Internal Control - Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission in 2013, and our report dated March 14, 2016 expressed an unqualified opinion on the effectiveness of American National Bankshares Inc. and Subsidiary's internal control over financial reporting.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Shareholders
American National Bankshares Inc.
Danville, Virginia

We have audited American National Bankshares Inc. and Subsidiary's (the Company) internal control over financial reporting as of December 31, 2015, based on criteria established in Internal Control - Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission in 2013. The Company's management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting included in Management's Report on Internal Control over Financial Reporting. Our responsibility is to express an opinion on the Company's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audit also included performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (a) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (b) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (c) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of December 31, 2015, based on criteria established in Internal Control - Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission in 2013.

We have also audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheets as of December 31, 2015 and 2014, and the related consolidated statements of income, comprehensive income, changes in shareholders' equity, and cash flows for each of the three years in the

period ended December 31, 2015 of American National Bankshares Inc. and Subsidiary, and our report dated March 14, 2016 expressed an unqualified opinion.

American National Bankshares Inc.
Notes to Consolidated Financial Statements
December 31, 2015, 2014, and 2013

Note 1 – Summary of Significant Accounting Policies

Nature of Operations and Consolidation

The consolidated financial statements include the accounts of American National Bankshares Inc. (the "Company") and its wholly owned subsidiary, American National Bank and Trust Company (the "Bank"). The Bank offers a wide variety of retail, commercial, secondary market mortgage lending, and trust and investment services which also include non-deposit products such as mutual funds and insurance policies.

The preparation of consolidated financial statements in conformity with accounting principles generally accepted in the United States of America ("GAAP") requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates. Material estimates that are particularly susceptible to significant change in the near term relate to the determination of the allowance for loan losses, goodwill and intangible assets, other than temporary impairment, the valuation of deferred tax assets and liabilities, and the valuation of foreclosed real estate.

In April 2006, AMNB Statutory Trust I, a Delaware statutory trust (the "AMNB Trust") and a wholly owned subsidiary of the Company, was formed for the purpose of issuing preferred securities (the "Trust Preferred Securities") in a private placement pursuant to an applicable exemption from registration. Proceeds from the securities were used to fund the acquisition of Community First Financial Corporation ("Community First") which occurred in April 2006.

On July 1, 2011, the Company completed its acquisition of MidCarolina Financial Corporation ("MidCarolina") pursuant to the terms and conditions of the Agreement and Plan of Reorganization, dated December 15, 2010, between the Company and MidCarolina. MidCarolina was headquartered in Burlington, North Carolina, and engaged in banking operations through its subsidiary bank, MidCarolina Bank. The transaction has expanded the Company's footprint in North Carolina, adding eight branches in Alamance and Guilford Counties.

In July 2011, and in connection with its acquisition of MidCarolina Financial Corporation, the Company assumed liabilities of the MidCarolina Trust I and MidCarolina Trust II, two separate Delaware statutory trusts (the "MidCarolina Trusts"), which were also formed for the purpose of issuing preferred securities. Refer to Note 12 for further details concerning these entities.

On January 1, 2015, the Company completed its acquisition of MainStreet BankShares, Inc. ("MainStreet") pursuant to the terms and conditions of the Agreement and Plan of Reorganization, dated as of August 24, 2014, between the Company and MainStreet (the "MainStreet Merger Agreement"). Immediately after the merger of MainStreet into the Company, Franklin Community Bank, N.A., MainStreet's wholly-owned bank subsidiary ("Franklin Bank"), merged with and into the Bank. Franklin Bank provided banking services to its customers from three banking offices located in Rocky Mount, Hardy, and Union Hall, Virginia. Refer to Note 2 for further details on the merger.

All significant inter-company transactions and accounts are eliminated in consolidation, with the exception of the AMNB Trust and the MidCarolina Trusts, as detailed in Note 12.

Cash and Cash Equivalents

Cash includes cash on hand, cash with correspondent banks, and cash on deposit at the Federal Reserve Bank of Richmond. Cash equivalents are short-term, highly liquid investments that are readily convertible to cash with original maturities of three months or less and are subject to an insignificant risk of change in value. Cash and cash equivalents are carried at cost.

Interest-bearing Deposits in Other Banks

Interest-bearing deposits in other banks mature within one year and are carried at cost.

Securities

Certain debt securities that management has the positive intent and ability to hold to maturity are classified as "held to maturity" and recorded at amortized cost. Trading securities are recorded at fair value with changes in fair value included in earnings. Securities not classified as held to maturity or trading, including equity securities with readily determinable fair values, are classified as "available for sale" and recorded at fair value, with unrealized gains and losses excluded from earnings and reported in other comprehensive income. Purchase premiums and discounts are recognized in interest income using the interest method over the terms of the securities. Gains and losses on the sale of securities are recorded on the trade date and are determined using the specific identification method.

The Company does not currently have any securities in held to maturity or trading and has no plans to add any to either category. The Company follows accounting guidance related to recognition and presentation of other-than-temporary impairment. The guidance specifies that (1) if a company does not have the intent to sell a debt security prior to recovery and (2) it is more likely than not that it will not have to sell the debt security prior to recovery, the security would not be considered other-than-temporarily impaired, unless there is a credit loss. When an entity does not intend to sell the security and it is more likely than not the entity will not have to sell the security before recovery of its cost basis, it will recognize the credit component of an other-than-temporary impairment of a debt security in earnings and the remaining portion in other comprehensive income. For held-to-maturity debt securities, the amount of an other-than-temporary impairment recorded in other comprehensive income for the noncredit portion of a previous other-than-temporary impairment should be amortized prospectively over the remaining life of the security on the basis of the timing of future estimated cash flows of the security.

For equity securities, when the Company has decided to sell an impaired available for sale security and the entity does not expect the fair value of the security to fully recover before the expected time of sale, the security is deemed other-than-temporarily impaired in the period in which the decision to sell is made. The Company recognizes an impairment loss when the impairment is deemed other-than-temporary even if a decision to sell has not been made. Due to the nature and restrictions placed on the Company's investment in common stock of the Federal Home Loan Bank of Atlanta ("FHLB") and the Federal Reserve Bank of Richmond, these securities have been classified as restricted equity securities and carried at cost.

Loans Held for Sale

Secondary market mortgage loans are designated as held for sale at the time of their origination. These loans are pre-sold with servicing released and the Company does not retain any interest after the loans are sold. These loans consist primarily of fixed-rate, single-family residential mortgage loans which meet the underwriting characteristics of certain government-sponsored enterprises (conforming loans). In addition, the Company requires a firm purchase commitment from a permanent investor before a loan can be committed, thus limiting interest rate risk. Loans held for sale are carried at fair value. Gains on sales of loans are recognized at the loan closing date and are included in noninterest income.

Derivative Loan Commitments

The Company enters into mortgage loan commitments whereby the interest rate on the loan is determined prior to funding (rate lock commitments). Mortgage loan commitments are referred to as derivative loan commitments if the loan that will result from exercise of the commitment will be held for sale upon funding. Loan commitments that are derivatives are recognized at fair value on the consolidated balance sheets with net changes in their fair values recorded in other expenses. Derivative loan commitments resulted in no income or loss for 2015, 2014 or 2013.

The period of time between issuance of a loan commitment and sale of the loan generally ranges from 30 to 60 days. The Company protects itself from changes in interest rates through the use of best efforts forward delivery contracts, by committing to sell a loan at the time the borrower commits to an interest rate with the intent that the buyer has assumed the interest rate risk on the loan. As a result, the Company is not generally exposed to significant losses nor will it realize significant gains related to its rate lock commitments due to changes in interest rates. The correlation between the rate lock commitments and the best efforts contracts is very high due to their similarity.

The fair value of rate lock commitments and best efforts contracts is not readily ascertainable with precision because rate lock commitments and best efforts contracts are not actively traded in stand-alone markets. The Company determines the fair value of rate lock commitments and best efforts contracts by measuring the change in the estimated value of the underlying assets while taking into consideration the probability that the loan will be funded.

Loans

The Company makes mortgage, commercial, and consumer loans. A substantial portion of the loan portfolio is secured by real estate. The ability of the Company's debtors to honor their contracts is dependent upon the real estate market and general economic conditions in the Company's market area.

Loans that management has the intent and ability to hold for the foreseeable future or until maturity or pay-off, generally are reported at their outstanding unpaid principal balance adjusted for the allowance for loan losses, and any deferred fees or costs. Interest income is accrued on the unpaid principal balance. Loan origination fees, net of certain direct origination costs, are deferred and recognized as an adjustment of the related loan yield using the interest method. The accrual of interest on loans is generally discontinued at the time the loan is 90 days delinquent unless the credit is well-secured and in process of collection. Loans are typically charged off when the loan is 120 days past due, unless secured and in process of collection. Loans are placed on nonaccrual status or charged-off at an earlier date if collection of principal or interest is considered doubtful.

Interest accrued but not collected for loans that are placed on nonaccrual status or charged-off is reversed against interest income. The interest on these loans is accounted for on the cash basis or cost recovery method, until qualifying for return to accrual status. Loans are returned to accrual status when all the principal and interest amounts contractually due are brought current and future payments are reasonably assured.

A loan is considered past due when a payment of principal or interest or both is due but not paid. Management closely monitors past due loans in timeframes of 30-59 days, 60-89 days, and 90 or more days past due.

These policies apply to all loan portfolio classes and segments.

Substandard and doubtful risk graded commercial, commercial real estate, and construction loans equal to or greater than \$100,000 on an unsecured basis, and equal to or greater than \$250,000 on a secured basis are reviewed for impairment. All troubled debt restructurings, regardless of dollar amount, are also evaluated for impairment. A loan is considered impaired when, based on current information and events, it is probable that the Company will be unable to collect the scheduled payments of principal or interest when due according to the contractual terms of the loan agreement. Factors considered by management in determining impairment and establishing a specific allowance include payment status, collateral value, and the probability of collecting scheduled principal and interest payments when due. Loans that experience insignificant payment delays and payment shortfalls generally are not classified as impaired. Management determines the significance of payment delays and payment shortfalls on a case-by-case basis, taking into consideration all of the circumstances surrounding the loan and the borrower, including the length of the delay, the reasons for the delay, the borrower's prior payment record, and the amount of the shortfall in relation to the principal and interest owed. Impairment is measured on a loan-by-loan basis for commercial, commercial real estate, and construction loans by either the present value of expected future cash flows discounted at the loan's effective interest rate, the loan's obtainable market price, or the fair value of the collateral if the loan is collateral dependent. Generally, large groups of smaller balance homogeneous loans (residential real estate and consumer loans) are collectively evaluated for impairment. The Company's policy for recognizing interest income on impaired loans is consistent with its nonaccrual policy.

The Company's loan portfolio is organized by major segment. These include: commercial, commercial real estate, residential real estate and consumer loans. Each segment has particular risk characteristics that are specific to the borrower and the generic category of credit. Commercial loan repayments are highly dependent on cash flows associated with the underlying business and its profitability. They can also be impacted by changes in collateral values. Commercial real estate loans share the same general risk characteristics as commercial loans, but are often more dependent on the value of the underlying real estate collateral and, when construction is involved, the ultimate completion of and sale of the project. Residential real estate loans are generally dependent on the value of collateral and the credit worthiness of the underlying borrower. Consumer loans are very similar in risk characteristics to residential real estate.

In connection with the MidCarolina and MainStreet mergers, certain loans were acquired which exhibited deteriorated credit quality since origination and for which the Bank does not expect to collect all contractual payments. These purchased credit impaired loans are recorded at the amount paid, such that there is no carryover of the seller's allowance for loan losses. After acquisition, losses are recognized by an increase in the allowance for loan losses.

Such purchased credit impaired loans are accounted for individually or aggregated into pools of loans based on common risk characteristics such as, credit score, loan type, and date of origination. The Company estimates the amount and timing of expected cash flows for each loan or pool, and the expected cash flows in excess of amount paid is recorded as interest income

over the remaining life of the loan or pool (accretable yield). The excess of the loan's or pool's contractual principal and interest over expected cash flows is not recorded (nonaccretable difference).

Over the life of the loan or pool, expected cash flows continue to be estimated. If the present value of expected cash flows is less than the carrying amount, a loss is recorded as a provision for loan losses. If the present value of expected cash flows is greater than the carrying amount, it is recognized as part of future interest income.

Troubled Debt Restructurings

In situations where, for economic or legal reasons related to a borrower's financial condition, management may grant a concession to the borrower that it would not otherwise consider, the related loan is classified as a troubled debt restructuring ("TDRs"). Management strives to identify borrowers in financial difficulty early and work with them to modify their loan to more affordable terms before their loan reaches nonaccrual status. These modified terms may include rate reductions, principal forgiveness, payment forbearance and other actions intended to minimize the economic loss and to avoid foreclosure or repossession of the collateral. In cases where borrowers are granted new terms that provide for a reduction of either interest or principal, management measures any impairment on the restructuring as noted above for impaired loans. The Company has \$1,958,000 in loans classified as TDRs as of December 31, 2015 and \$2,862,000 as of December 31, 2014.

Allowance for Loan Losses

The purpose of the allowance for loan losses ("ALLL") is to provide for probable losses inherent in the loan portfolio. The allowance is increased by the provision for loan losses and by recoveries of previously charged-off loans. Loan charge-offs decrease the allowance.

The goal of the Company is to maintain an appropriate, systematic, and consistently applied process to determine the amounts of the ALLL and the provision for loan loss expense.

The Company uses certain practices to manage its credit risk. These practices include (1) appropriate lending limits for loan officers, (2) a loan approval process, (3) careful underwriting of loan requests, including analysis of borrowers, cash flows, collateral, and market risks, (4) regular monitoring of the portfolio, including diversification by type and geography, (5) review of loans by the Loan Review department, which operates independently of loan production (the Loan Review function consists of a co-sourced arrangement using both internal personnel and external vendors to provide the Company with a more robust review function of the loan portfolio), (6) regular meetings of the Credit Committees to discuss portfolio and policy changes and make decisions on large or unusual loan requests, and (7) regular meetings of the Asset Quality Committee which reviews the status of individual loans.

Risk grades are assigned as part of the loan origination process. From time to time risk grades may be modified as warranted by the facts and circumstances surrounding the credit.

Calculation and analysis of the allowance for loan losses is prepared quarterly by the Finance Department. The Company's Credit Committee, Capital Management Committee, Audit Committee, and the Board of Directors review the allowance for adequacy.

The Company's allowance for loan losses has two basic components: the formula allowance and the specific allowance. Each of these components is determined based upon estimates and judgments.

The formula allowance uses historical loss experience as an indicator of future losses, along with various qualitative factors, including levels and trends in delinquencies, nonaccrual loans, charge-offs and recoveries, trends in volume and terms of loans, effects of changes in underwriting standards, experience of lending staff, economic conditions, and portfolio concentrations. In the formula allowance for commercial and commercial real estate loans, the historical loss rate is combined with the qualitative factors, resulting in an adjusted loss factor for each risk-grade category of loans. The period-end balances for each loan risk-grade category are multiplied by the adjusted loss factor. Allowance calculations for consumer loans are calculated based on historical losses for each product category without regard to risk grade. This loss rate is combined with qualitative factors resulting in an adjusted loss factor for each product category.

The specific allowance uses various techniques to arrive at an estimate of loss for specifically identified impaired loans. These include:

The present value of expected future cash flows discounted at the loan's effective interest rate. The effective interest rate on a loan is the rate of return implicit in the loan (that is, the contractual interest rate adjusted for any net deferred loan fees or costs and any premium or discount existing at the origination or acquisition of the loan);

• The loan's observable market price, or

• The fair value of the collateral, net of estimated costs to dispose, if the loan is collateral dependent.

The use of these computed values is inherently subjective and actual losses could be greater or less than the estimates. No single statistic, formula, or measurement determines the adequacy of the allowance. Management makes subjective and complex judgments about matters that are inherently uncertain, and different amounts would be reported under different conditions or using different assumptions. For analytical purposes, management allocates a portion of the allowance to specific loan categories and specific loans. However, the entire allowance is used to absorb credit losses inherent in the loan portfolio, including identified and unidentified losses.

The relationships and ratios used in calculating the allowance, including the qualitative factors, may change from period to period as facts and circumstances evolve. Furthermore, management cannot provide assurance that in any particular period the Company will not have sizeable credit losses in relation to the amount reserved. Management may find it necessary to significantly adjust the allowance, considering current factors at the time.

Premises and Equipment

Land is carried at cost. Premises and equipment are stated at cost, less accumulated depreciation and amortization. Premises and equipment are depreciated over their estimated useful lives ranging from three years to thirty-nine years; leasehold improvements are amortized over the lives of the respective leases or the estimated useful lives of the improvements, whichever is less. Software is generally amortized over three years. Depreciation and amortization are recorded on the straight-line method.

Costs of maintenance and repairs are charged to expense as incurred. Costs of replacing structural parts of major units are considered individually and are expensed or capitalized as the facts dictate. Gains and losses on routine dispositions are reflected in current operations.

Goodwill and Intangible Assets

Goodwill is subject to at least an annual assessment for impairment by applying a fair value based test. Additionally, acquired intangible assets (such as core deposit intangibles) are separately recognized if the benefit of the assets can be sold, transferred, licensed, rented, or exchanged, and amortized over their useful lives. Intangible assets related to branch transactions continued to amortize. The cost of purchased deposit relationships and other intangible assets, based on independent valuation, are being amortized over their estimated lives ranging from eight to ten years.

The Company records as goodwill the excess of purchase price over the fair value of the identifiable net assets acquired. Impairment testing is performed annually, as well as when an event triggering impairment may have occurred. The Company performs its annual analysis as of June 30 each fiscal year. Accounting guidance permits preliminary assessment of qualitative factors to determine whether more substantial impairment testing is required. The Company chose to bypass the preliminary assessment and utilized a two-step process for impairment testing of goodwill. The first step tests for impairment, while the second step, if necessary, measures the impairment. No indicators of impairment were identified during the years ended December 31, 2015, 2014, and 2013.

Trust Assets

Securities and other property held by the trust and investment services segment in a fiduciary or agency capacity are not assets of the Company and are not included in the accompanying consolidated financial statements.

Other Real Estate Owned

Other real estate owned represents real estate that has been acquired through loan foreclosures or deeds received in lieu of loan payments. Generally, such properties are appraised at the time acquired, and are recorded at the fair value less estimated selling costs. Subsequent to foreclosure, valuations are periodically performed by management and the assets are carried at the lower of carrying amount or fair value less cost to sell. Revenue and expenses from operations and changes in the valuation allowance are included in noninterest expense.

Bank Owned Life Insurance (BOLI)

The Company has acquired BOLI in connection with three acquisitions over the past decade. The asset is reflected as the cash surrender value of the policies as provided by the insurer on a monthly basis.

Transfers of Financial Assets

Transfers of financial assets are accounted for as sales, when control over the assets has been surrendered. Control over transferred assets is deemed to be surrendered when (1) the assets have been isolated from the Company – put presumptively beyond reach of the transferor and its creditors, even in bankruptcy or other receivership, (2) the transferee obtains the right (free of conditions that constrain it from taking advantage of that right) to pledge or exchange the transferred assets, and (3) the Company does not maintain effective control over the transferred assets through an agreement to repurchase them before their maturity or the ability to unilaterally cause the holder to return specific assets.

Income Taxes

The Company uses the balance sheet method to account for deferred income tax assets and liabilities. Under this method, the net deferred tax asset or liability is determined based on the tax effects of the temporary differences between the book and tax bases of the various balance sheet assets and liabilities and gives current recognition to changes in tax rates and laws.

When tax returns are filed, it is highly certain that some positions taken would be sustained upon examination by the taxing authorities, while others are subject to uncertainty about the merits of the position taken or the amount of the position that would be ultimately sustained. The benefit of a tax position is recognized in the financial statements in the period during which, based on all available evidence, management believes it is more likely than not that the position will be sustained upon examination, including the resolution of appeals or litigation processes, if any. Tax positions taken are not offset or aggregated with other positions. Tax positions that meet the more-likely-than-not recognition threshold are measured as the largest amount of tax benefit that is more than 50 percent likely of being realized upon settlement with the applicable taxing authority. The portion of the benefits associated with tax positions taken that exceeds the amount measured as described above is reflected as a liability for unrecognized tax benefits in the accompanying consolidated balance sheet along with any associated interest and penalties that would be payable to the taxing authorities upon examination. The Company had no liability for unrecognized tax benefits as of December 31, 2015 and 2014.

Stock-Based Compensation

Stock compensation accounting guidance Accounting Standards Codification ("ASC 718"), "Compensation – Stock Compensation" requires that the compensation cost relating to share-based payment transactions be recognized in financial statements. That cost will be measured based on the grant date fair value of the equity or liability instruments issued. The stock compensation accounting guidance covers a wide range of share-based compensation arrangements including stock options, restricted share plans, performance-based awards, share appreciation rights, and employee share purchase plans.

The stock compensation accounting guidance requires that compensation cost for all stock awards be calculated and recognized over the employees' service period, generally defined as the vesting period. For awards with graded-vesting, compensation cost is recognized on a straight-line basis over the requisite service period for the entire award. A Black-Scholes model is used to estimate the fair value of stock options, while the market price of the Company's common stock at the date of grant is used for restricted stock awards.

Earnings Per Common Share

Basic earnings per common share represent income available to common shareholders divided by the weighted-average number of common shares outstanding during the period. Diluted earnings per common share reflect the impact of additional common shares that would have been outstanding if dilutive potential common shares had been issued, as well as any adjustment to income that would result from the assumed issuance. Potential common shares that may be issued by the Company consist solely of outstanding stock options, and are determined using the treasury method. Nonvested shares of restricted stock are included in the computation of basic earning per share because the holder has voting rights and shares in non-forfeitable dividends during the vesting period.

Comprehensive Income

Comprehensive income is shown in a two statement approach, the first statement presents total net income and its components followed by a second statement that presents all the components of other comprehensive income such as unrealized gains and losses on available for sale securities and changes in the funded status of a defined benefit postretirement plan.

Advertising and Marketing Costs

Advertising and marketing costs are expensed as incurred, and were \$356,000, \$453,000, and \$607,000 in 2015, 2014, and 2013, respectively.

Mergers and Acquisitions

Business combinations are accounted for under ASC 805, "Business Combinations", using the acquisition method of accounting. The acquisition method of accounting requires an acquirer to recognize the assets acquired and the liabilities assumed at the acquisition date measured at their fair values as of that date. To determine the fair values, the Company relies on third party valuations, such as appraisals, or internal valuations based on discounted cash flow analyses or other valuation techniques. Under the acquisition method of accounting, the Company identifies the acquirer and the closing date and applies applicable recognition principles and conditions. Acquisition-related costs are costs the Company incurs to effect a business combination. Those costs include advisory, legal, accounting, valuation, and other professional or consulting fees. Some other examples of costs to the Company include systems conversions, integration planning consultants and advertising costs. The Company accounts for acquisition-related costs as expenses in the periods in which the costs are incurred and the services are received, with one exception. The costs to issue debt or equity securities is recognized in accordance with other applicable GAAP. These acquisition-related costs have been and will be included within the Consolidated Statements of Income classified within the noninterest expense caption.

Reclassifications

Certain reclassifications have been made in prior years financial statements to conform to classifications used in the current year. There were no material reclassifications.

Use of Estimates

In preparing consolidated financial statements in conformity with GAAP, management is required to make estimates and assumptions that affect the reported amounts of assets and liabilities as of the date of the balance sheet and reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates. Material estimates that are particularly susceptible to significant change in the near term relate to the determination of the allowance for loan losses, the valuation of other real estate owned, goodwill and intangible assets, the valuation of deferred tax assets, other-than-temporary impairments of securities, and acquired loans with specific credit-related deterioration.

Recent Accounting Pronouncements

In June 2014, the Financial Accounting Standards Board ("FASB") issued Accounting Standards Updated ("ASU") No. 2014-12, "Compensation - Stock Compensation (Topic 718): Accounting for Share-Based Payments When the Terms of an Award Provide That a Performance Target Could Be Achieved after the Requisite Service Period." The new guidance applies to reporting entities that grant employees share-based payments in which the terms of the award allow a performance target to be achieved after the requisite service period. The amendments in the ASU require that a performance target that affects vesting and that could be achieved after the requisite service period be treated as a performance condition. Existing guidance in "Compensation - Stock Compensation (Topic 718)," should be applied to account for these types of awards. The amendments in this ASU are effective for annual periods and interim periods within those annual periods beginning after December 15, 2015. Early adoption is permitted and reporting entities may choose to apply the amendments in the ASU either on a prospective or retrospective basis. The Company does not expect the adoption of ASU 2014-12 to have a material impact on its consolidated financial statements.

In August 2014, the FASB issued ASU No. 2014-15, "Presentation of Financial Statements - Going Concern (Subtopic 205-40): Disclosure of Uncertainties about an Entity's Ability to Continue as a Going Concern." This update is intended to provide guidance about management's responsibility to evaluate whether there is substantial doubt about an entity's ability to continue as a going concern and to provide related footnote disclosures. Management is required under the new guidance to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about the entity's ability to continue as a going concern within one year after the date the financial statements are issued when preparing financial statements for each interim and annual reporting period. If conditions or events are identified, the ASU specifies the process that must be followed by management and also clarifies the timing and content of going concern footnote disclosures in order to reduce diversity in practice. The amendments in this ASU

are effective for annual periods and interim periods within those annual periods beginning after December 15, 2016. Early adoption is permitted. The Company does not expect the adoption of ASU 2014-15 to have a material impact on its consolidated financial statements.

In November 2014, the FASB issued ASU No. 2014-16, "Derivatives and Hedging (Topic 815): Determining Whether the Host Contract in a Hybrid Financial Instrument Issued in the Form of a Share Is More Akin to Debt or to Equity." The amendments in ASU do not change the current criteria in GAAP for determining when separation of certain embedded derivative features in a hybrid financial instrument is required. The amendments clarify how current GAAP should be interpreted in evaluating the economic characteristics and risks of a host contract in a hybrid financial instrument that is issued in the form of a share. Specifically, the amendments clarify that an entity should consider all relevant terms and features, including the embedded derivative feature being evaluated for bifurcation, in evaluating the nature of the host contract. Furthermore, the amendments clarify that no single term or feature would necessarily determine the economic characteristics and risks of the host contract. Rather, the nature of the host contract depends upon the economic characteristics and risks of the entire hybrid financial instrument. The amendments in this ASU also clarify that, in evaluating the nature of a host contract, an entity should assess the substance of the relevant terms and features (i.e., the relative strength of the debt-like or equity-like terms and features given the facts and circumstances) when considering how to weight those terms and features. The amendments in this ASU are effective for public business entities for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2015. Early adoption, including adoption in an interim period, is permitted. The Company does not expect the adoption of ASU 2014-16 to have a material impact on its consolidated financial statements.

In January 2015, the FASB issued ASU No. 2015-01, "Income Statement-Extraordinary and Unusual Items (Subtopic 225-20): Simplifying Income Statement Presentation by Eliminating the Concept of Extraordinary Items." The amendments in this ASU eliminate from U.S. GAAP the concept of extraordinary items. Subtopic 225-20, Income Statement - Extraordinary and Unusual Items, required that an entity separately classify, present, and disclose extraordinary events and transactions. Presently, an event or transaction is presumed to be an ordinary and usual activity of the reporting entity unless evidence clearly supports its classification as an extraordinary item. If an event or transaction meets the criteria for extraordinary classification, an entity is required to segregate the extraordinary item from the results of ordinary operations and show the item separately in the income statement, net of tax, after income from continuing operations. The entity also is required to disclose applicable income taxes and either present or disclose earnings-per-share data applicable to the extraordinary item. The amendments in this ASU are effective for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2015. A reporting entity may apply the amendments prospectively. A reporting entity also may apply the amendments retrospectively to all prior periods presented in the financial statements. Early adoption is permitted provided that the guidance is applied from the beginning of the fiscal year of adoption. The Company does not expect the adoption of ASU 2015-01 to have a material impact on its consolidated financial statements.

In February 2015, the FASB issued ASU No. 2015-02, "Consolidation (Topic 810): Amendments to the Consolidation Analysis." The amendments in this ASU are intended to improve targeted areas of consolidation guidance for legal entities such as limited partnerships, limited liability corporations, and securitization structures (collateralized debt obligations, collateralized loan obligations, and mortgage-backed security transactions). In addition to reducing the number of consolidation models from four to two, the new standard simplifies the FASB ASC and improves current GAAP by placing more emphasis on risk of loss when determining a controlling financial interest, reducing the frequency of the application of related-party guidance when determining a controlling financial interest in a variable interest entity ("VIE"), and changing consolidation conclusions for public and private companies in several industries that typically make use of limited partnerships or VIEs. The amendments in this ASU are effective for public business entities for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2015. Early adoption is permitted, including adoption in an interim period. ASU 2015-02 may be applied retrospectively in previously issued financial statements for one or more years with a cumulative-effect adjustment to retained earnings as of the beginning of the first year restated. The Company does not expect the adoption of ASU 2015-02 to have a material impact on its consolidated financial statements.

In April 2015, the FASB issued ASU No. 2015-03, "Interest - Imputation of Interest (Subtopic 835-30): Simplifying the Presentation of Debt Issuance Costs." The amendments in this ASU are intended to simplify the presentation of

debt issuance costs. These amendments require that debt issuance costs related to a recognized debt liability be presented in the balance sheet as a direct deduction from the carrying amount of that debt liability, consistent with debt discounts. The recognition and measurement guidance for debt issuance costs are not affected by the amendments in this ASU. The amendments in this ASU are effective for public business entities for financial statements issued for fiscal years beginning after December 15, 2015, and interim periods within those fiscal years. Early adoption is permitted for financial statements that have not been previously issued. The Company does not expect the adoption of ASU 2015-03 to have a material impact on its consolidated financial statements.

In April 2015, the FASB issued ASU No. 2015-05, "Intangibles - Goodwill and Other - Internal-Use Software (Subtopic 350-40): Customer's Accounting for Fees Paid in a Cloud Computing Arrangement." The amendments in this ASU provide guidance to customers about whether a cloud computing arrangement includes a software license. If a cloud computing arrangement includes a software license, then the customer should account for the software license element of the arrangement

consistent with the acquisition of other software licenses. If a cloud computing arrangement does not include a software license, the customer should account for the arrangement as a service contract. The amendments do not change the accounting for a customer's accounting for service contracts. As a result of the amendments, all software licenses within the scope of Subtopic 350-40 will be accounted for consistent with other licenses of intangible assets. The amendments in this ASU are effective for public business entities for annual periods, including interim periods within those annual periods, beginning after December 15, 2015. Early adoption is permitted. An entity can elect to adopt the amendments either: (1) prospectively to all arrangements entered into or materially modified after the effective date; or (2) retrospectively. The Company does not expect the adoption of ASU 2015-05 to have a material impact on its consolidated financial statements.

In May 2015, the FASB issued ASU No. 2015-08, "Business Combinations (Topic 805): Pushdown Accounting - Amendments to SEC Paragraphs Pursuant to Staff Accounting Bulletin No. 115." The amendments in ASU 2015-08 amend various Securities and Exchange Commission (the "SEC") paragraphs pursuant to the issuance of Staff Accounting Bulletin No. 115, Topic 5: Miscellaneous Accounting, regarding various pushdown accounting issues, and did not have a material impact on our (consolidated) financial statements. The Company does not expect the adoption of ASU 2015-08 to have a material impact on its consolidated financial statements.

In July 2015, the FASB issued ASU No. 2015-12, "Plan Accounting: Defined Benefit Pension Plans (Topic 960), Defined Contribution Pension Plans (Topic 962), and Health and Welfare Benefit Plans (Topic 965) - 1. Fully Benefit-Responsive Investment Contracts, 2. Plan Investment Disclosures, and 3. Measurement Date Practical Expedient." The amendments within this ASU are in 3 parts. Among other things, Part 1 amendments designate contract value as the only required measure for fully benefit-responsive investment contracts; Part 2 amendments eliminate the requirement that plans disclose: (a) individual investments that represent 5 percent or more of net assets available for benefits; and (b) the net appreciation or depreciation for investments by general type requirements for both participant-directed investments and nonparticipant-directed investments. Part 3 amendments provide a practical expedient to permit plans to measure investments and investment-related accounts (e.g., a liability for a pending trade with a broker) as of a month-end date that is closest to the plan's fiscal year-end, when the fiscal period does not coincide with month-end. The amendments in Parts 1 and 2 of this ASU are effective on a retrospective basis and Part 3 is effective on a prospective basis, for fiscal years beginning after December 15, 2015. Early adoption is permitted. The Company does not expect the adoption of ASU 2015-12 to have a material impact on its consolidated financial statements.

In August 2015, the FASB issued ASU No. 2015-14, "Revenue from Contracts with Customers (Topic 606): Deferral of Effective Date." The amendments in ASU 2015-14 defer the effective date of ASU 2014-09 for all entities by one year. Public business entities, certain not-for-profit entities, and certain employee benefit plans should apply the guidance in ASU 2014-09 to annual reporting periods beginning after December 15, 2017, including interim reporting periods within that reporting period. Earlier application is permitted only as of annual reporting periods beginning after December 15, 2016, including interim reporting periods within that reporting period. All other entities should apply the guidance in ASU 2014-09 to annual reporting periods beginning after December 15, 2018, and interim reporting periods within annual reporting periods beginning after December 15, 2019. All other entities may apply the guidance in ASU 2014-09 earlier as of an annual reporting period beginning after December 15, 2016, including interim reporting periods within that reporting period. All other entities also may apply the guidance in ASU 2014-09 earlier as of an annual reporting period beginning after December 15, 2016, and interim reporting periods within annual reporting periods beginning one year after the annual reporting period in which the entity first applies the guidance in ASU 2014-09. The Company is currently assessing the impact that ASU 2015-14 will have on its consolidated financial statements.

In August 2015, the FASB issued ASU 2015-15, "Interest - Imputation of Interest (Subtopic 835-30) - Presentation and Subsequent Measurement of Debt Issuance Costs Associated with Line-of-Credit Arrangements (Amendments to SEC Paragraphs Pursuant to Staff Announcement at June 18, 2015 EITF Meeting)." On April 7, 2015, the FASB issued

ASU 2015-03, Interest-Imputation of Interest (Subtopic 835-30): Simplifying the Presentation of Debt Issuance Costs, which requires entities to present debt issuance costs related to a recognized debt liability as a direct deduction from the carrying amount of that debt liability. The guidance in ASU 2015-03 (see paragraph 835-30-45-1A) does not address presentation or subsequent measurement of debt issuance costs related to line-of-credit arrangements. Given the absence of authoritative guidance within ASU 2015-03 for debt issuance costs related to line-of-credit arrangements, the SEC staff stated that they would not object to an entity deferring and presenting debt issuance costs as an asset and subsequently amortizing the deferred debt issuance costs ratably over the term of the line-of-credit arrangement, regardless of whether there are any outstanding borrowings on the line-of-credit arrangement. ASU 2015-15 adds these SEC comments to the "S" section of the Codification. The adoption of ASU 2015-15 did not have a material impact on our consolidated financial statements.

In September 2015, the FASB issued ASU 2015-16, "Business Combinations (Topic 805): Simplifying the Accounting for Measurement-Period Adjustments." The amendments in ASU 2015-16 require that an acquirer recognize adjustments to estimated amounts that are identified during the measurement period in the reporting period in which the adjustment amounts

are determined. The amendments require that the acquirer record, in the same period's financial statements, the effect on earnings of changes in depreciation, amortization, or other income effects, if any, as a result of the change to the estimated amounts, calculated as if the accounting had been completed at the acquisition date. The amendments also require an entity to present separately on the face of the income statement or disclose in the notes the portion of the amount recorded in current-period earnings by line item that would have been recorded in previous reporting periods if the adjustment to the estimated amounts had been recognized as of the acquisition date. The amendments in this ASU are effective for public business entities for fiscal years beginning after December 15, 2015, including interim periods within those fiscal years. For all other entities, the amendments are effective for fiscal years beginning after December 15, 2016, and interim periods within fiscal years beginning after December 15, 2017. The amendments should be applied prospectively to adjustments to provisional amounts that occur after the effective date with earlier application permitted for financial statements that have not been issued. The Company does not expect the adoption of ASU 2015-16 to have a material impact on its consolidated financial statements.

In January 2016, the FASB issued ASU 2016-01, "Financial Instruments - Overall (Subtopic 825-10): Recognition and Measurement of Financial Assets and Financial Liabilities." The amendments in ASU 2016-01, among other things: (1) Requires equity investments (except those accounted for under the equity method of accounting, or those that result in consolidation of the investee) to be measured at fair value with changes in fair value recognized in net income; (2) Requires public business entities to use the exit price notion when measuring the fair value of financial instruments for disclosure purposes; (3) Requires separate presentation of financial assets and financial liabilities by measurement category and form of financial asset (i.e., securities or loans and receivables); and (4) Eliminates the requirement for public business entities to disclose the method(s) and significant assumptions used to estimate the fair value that is required to be disclosed for financial instruments measured at amortized cost. The amendments in this ASU are effective for public companies for fiscal years beginning after December 15, 2017, including interim periods within those fiscal years. The Company is currently assessing the impact that ASU 2016-01 will have on its consolidated financial statements.

In February 2016, the FASB issued ASU No. 2016-02, "Leases (Topic 842)." Among other things, in the amendments in ASU 2016-02, lessees will be required to recognize the following for all leases (with the exception of short-term leases) at the commencement date: (1) A lease liability, which is a lessee's obligation to make lease payments arising from a lease, measured on a discounted basis; and (2) A right-of-use asset, which is an asset that represents the lessee's right to use, or control the use of, a specified asset for the lease term. Under the new guidance, lessor accounting is largely unchanged. Certain targeted improvements were made to align, where necessary, lessor accounting with the lessee accounting model and Topic 606, Revenue from Contracts with Customers. The amendments in this ASU are effective for fiscal years beginning after December 15, 2018, including interim periods within those fiscal years. Early application is permitted upon issuance. Lessees (for capital and operating leases) and lessors (for sales-type, direct financing, and operating leases) must apply a modified retrospective transition approach for leases existing at, or entered into after, the beginning of the earliest comparative period presented in the financial statements. The modified retrospective approach would not require any transition accounting for leases that expired before the earliest comparative period presented. Lessees and lessors may not apply a full retrospective transition approach. The Company is currently assessing the impact that ASU 2016-02 will have on its consolidated financial statements.

Note 2 - Acquisition of MainStreet BankShares, Inc.

On January 1, 2015, the Company completed its acquisition of MainStreet. The merger of MainStreet with and into the Company was effected pursuant to the terms and conditions of the MainStreet Merger Agreement. Immediately after the merger, Franklin Bank, MainStreet's wholly owned bank subsidiary, merged with and into the Bank.

Pursuant to the MainStreet Merger Agreement, holders of shares of MainStreet common stock received \$3.46 in cash and 0.482 shares of the Company's common stock for each share of MainStreet common stock held immediately prior to the effective date of the merger, plus cash in lieu of fractional shares. Each option to purchase shares of MainStreet common stock that was outstanding immediately prior to the effective date of the merger vested upon the merger and was converted into an option to purchase shares of the Company's common stock, adjusted based on a 0.643 exchange ratio. Each share of the Company's common stock outstanding immediately prior to the merger remained outstanding and was unaffected by the merger. The cash portion of the merger consideration was funded through a cash dividend of \$6,000,000 from the Bank to the Company, and no borrowing was incurred by the Company or the Bank in connection with the merger. Replacement stock option awards representing 43,086 shares of the Company's common stock were granted in conjunction with the MainStreet acquisition.

The transaction was accounted for using the acquisition method of accounting and, accordingly, assets acquired, liabilities assumed, and consideration exchanged were recorded at estimated fair values on the acquisition date. Fair values are preliminary and subject to refinement for up to one year after the closing date of the acquisition.

In connection with the acquisition, the consideration paid, and the fair value of identifiable assets acquired and liabilities assumed as of the merger date are summarized in the following table (dollar in thousands):

Consideration Paid:

Common shares issued (825,586)	\$20,483
Cash paid to Shareholders	5,935
Value of consideration	26,418

Assets acquired:

Cash and cash equivalents	18,173
Investment securities	18,507
Restricted stock	587
Loans	115,960
Premises and equipment	956
Deferred income taxes	2,794
Core deposit intangible	1,839
Other real estate owned	168
Bank owned life insurance	1,955
Accrued interest receivable and other assets	1,049
Total assets	161,988

Liabilities assumed:

Deposits	137,323
Accrued interest payable and other liabilities	3,076
Total liabilities	140,399
Net assets acquired	21,589
Goodwill resulting from merger with MainStreet	\$4,829

The following table details the changes in fair value of net assets acquired and liabilities assumed from the amounts originally reported in the Form 10-Q for the quarterly period ended September 30, 2015 (dollars in thousands):

Goodwill at September 30, 2015	\$ 5,290
Effect of adjustments to:	
Loans	(723)
Deferred income taxes	262
Goodwill at December 31, 2015	\$ 4,829

The decrease in goodwill made during the fourth quarter of 2015 was due to a revaluation of the loan portfolio. As part of management's revaluation process, information and payments received subsequent to the initial valuation provided evidence that the credit mark on certain purchase credit impaired loans was too large. Management determined that these conditions existed as of the date of acquisition, but the information was not readily available. The revaluation process resulted in a reduction of \$723,000 in the credit mark for acquired impaired loans and an increase in deferred taxes of \$262,000 for a net decrease in goodwill of \$461,000.

In many cases, the fair values of assets acquired and liabilities assumed were determined by estimating the cash flows expected to result from those assets and liabilities and discounting them at appropriate market rates. The most significant category of assets for which this procedure was used was that of acquired loans. The Company acquired the \$122,336,000 loan portfolio at a fair value discount of \$6,376,000. The estimated fair value of the performing portion of the portfolio was \$87,990,000. The excess of expected cash flows above the fair value of the performing portion of loans will be accreted to interest income over the remaining lives of the loans in accordance with FASB Accounting Standards Codification ("ASC") 310-20.

Certain loans, those for which specific credit-related deterioration since origination was identified, are recorded at fair value, reflecting the present value of the amounts expected to be collected. Income recognition on these loans is based on reasonable expectations about the timing and amount of cash flows to be collected. Acquired loans deemed impaired and considered collateral dependent, with the timing of the sale of loan collateral indeterminate, remain on non-accrual status and have no accretable yield.

The following table details the acquired loans that are accounted for in accordance with FASB ASC 310-30 as of January 1, 2015, after adjusting for the aforementioned revaluation in the third quarter (dollars in thousands):

Contractually required principal and interest at acquisition	\$33,066
Contractual cash flows not expected to be collected (nonaccretable difference)	2,044
Expected cash flows at acquisition	35,110
Interest component of expected cash flows (accretable discount)	7,140
Fair value of acquired impaired loans accounted for under FASB ASC 310-30	\$27,970

In accordance with GAAP, there was no carryover of the allowance for loan losses that had been previously recorded by MainStreet.

In connection with the acquisition of MainStreet, the Company acquired an investment portfolio with a fair value of \$18,507,000. The fair value of the investment portfolio was determined by taking into account market prices obtained from independent valuation sources.

In connection with the acquisition of MainStreet, the Company recorded a deferred income tax asset of \$2,794,000 related to tax attributes of MainStreet, along with the effects of fair value adjustments resulting from applying the acquisition method of accounting.

In connection with the acquisition of MainStreet, the Company acquired other real estate owned with a fair value of \$168,000. Other real estate owned was measured at fair value less estimated cost to sell.

In connection with the acquisition of MainStreet, the Company acquired premises and equipment with a fair value of \$956,000. Leases assumed were determined to be at fair value and required no acquisition related adjustment.

The fair value of savings and transaction deposit accounts acquired from MainStreet was assumed to approximate their carrying value as these accounts have no stated maturity and are payable on demand. Certificates of deposit accounts were valued by comparing the contractual cost of the portfolio to an identical portfolio bearing current market rates. The portfolio was segregated into pools based on segments: retail, individual retirement accounts, and brokered. For each segment, the projected cash flows from maturing certificates were then calculated based on contractual rates and prevailing market rates. The valuation adjustment for each segment is equal to the present value of the difference of these two cash flows, discounted at the assumed market rate for a certificate with a corresponding maturity. This valuation adjustment of \$290,000 was accreted to reduce interest expense over the average remaining maturities of the respective pools, which was estimated to be 12 months.

A core deposit intangible of \$1,839,000 was recognized in connection with the acquisition of MainStreet. This intangible will be amortized over a 10 year period on an accelerated cost recovery basis.

Direct costs related to the acquisition were expensed as incurred. During 2015, the Company incurred \$1,998,000 acquisition related expenses.

The following table presents certain pro forma information as if MainStreet had been acquired on January 1, 2013. These results combine the historical results of MainStreet into the Company's Consolidated Statement of Income, and while certain adjustments were made for the estimated impact of certain fair value adjustments and other acquisition-related activity, they are not indicative of what would have occurred had the acquisition taken place on January 1, 2013. In particular, no adjustments have been made to adjust provision for loan losses on the acquired loan portfolio and related income taxes had they been recorded at fair value on January 1, 2013. In addition, expenses related to systems conversions and other costs of integration were expensed as incurred during 2015. The Company expects to achieve further operating cost savings and other business synergies, including branch closures, as a result of the acquisition which are not reflected in the pro forma amounts below (dollars in thousands):

	Pro forma	
	At December 31,	
	2014	2013
	(unaudited)	(unaudited)
Net interest income	\$48,522	\$53,294
Provision for loan losses	458	437
Non-interest income	12,081	10,195
Non-interest expense	40,148	39,011
Income Taxes	5,999	7,212
Net income	\$ 13,998	\$ 16,829

Note 3 – Restrictions on Cash

The Company is a member of the Federal Reserve System and is required to maintain certain levels of its cash and cash equivalents as reserves based on regulatory requirements. This reserve requirement was \$0 at December 31, 2015 and 2014.

The Company maintains cash accounts in other commercial banks. The amount on deposit with correspondent institutions at December 31, 2015 exceeded the insurance limits of the Federal Deposit Insurance Corporation by \$213,000.

Note 4 - Securities

The amortized cost and estimated fair value of investments in debt securities at December 31, 2015 and 2014 were as follows (dollars in thousands):

	December 31, 2015			Fair Value
	Amortized Cost	Unrealized Gains	Unrealized Losses	
Securities available for sale:				
Federal agencies and GSEs	\$81,601	\$170	\$319	\$81,452
Mortgage-backed and CMOs	70,520	799	389	70,930
State and municipal	170,268	5,659	36	175,891
Corporate	10,619	28	57	10,590
Equity securities	1,000	486	—	1,486
Total securities available for sale	\$334,008	\$7,142	\$801	\$340,349
	December 31, 2014			
	Amortized Cost	Unrealized Gains	Unrealized Losses	Fair Value
Securities available for sale:				
Federal agencies and GSEs	\$81,958	\$252	\$104	\$82,106
Mortgage-backed and CMOs	56,289	1,248	112	57,425
State and municipal	188,060	7,523	90	195,493
Corporate	8,416	16	53	8,379
Equity securities	1,000	313	—	1,313
Total securities available for sale	\$335,723	\$9,352	\$359	\$344,716

The amortized cost and estimated fair value of investments in securities at December 31, 2015, by contractual maturity, are shown in the following table. Expected maturities will differ from contractual maturities because borrowers may have the right to call or prepay obligations with or without call or prepayment penalties. Because mortgage-backed securities have both known principal repayment terms as well as unknown principal repayments due to potential borrower pre-payments, it is difficult to accurately predict the final maturity of these investments. Mortgage-backed securities are shown separately (dollars in thousands):

	Available for Sale	
	Amortized Cost	Fair Value
Due in one year or less	\$28,046	\$28,134
Due after one year through five years	119,404	121,825
Due after five years through ten years	91,445	93,918
Due after ten years	23,593	24,056
Mortgage-backed and CMOs	70,520	70,930
Equity securities	1,000	1,486
	\$334,008	\$340,349

Gross realized gains and losses from the sale of securities available for sale were as follows (dollars in thousands):

	For the Years Ended December 31,		
	2015	2014	2013
Realized gains	\$871	\$507	\$229
Realized losses	(4) (2) (37
Other-than-temporary impairment	—	—	—

Securities with a carrying value of approximately \$173,146,000 and \$168,965,000 at December 31, 2015 and 2014, respectively, were pledged to secure public deposits, repurchase agreements, and for other purposes as required by law. FHLB

letters of credit were used as additional collateral in the amounts of \$70,700,000 at December 31, 2015 and \$70,000,000 at December 31, 2014.

Temporarily Impaired Securities

The following table shows estimated fair value and gross unrealized losses, aggregated by investment category and length of time that individual securities have been in a continuous unrealized loss position, at December 31, 2015. The reference point for determining when securities are in an unrealized loss position is month-end. Therefore, it is possible that a security's market value exceeded its amortized cost on other days during the past twelve-month period. Available for sale securities that have been in a continuous unrealized loss position are as follows (dollars in thousands):

	Total		Less than 12 Months		12 Months or More	
	Fair Value	Unrealized Loss	Fair Value	Unrealized Loss	Fair Value	Unrealized Loss
Federal agencies and GSEs	\$57,711	\$319	\$57,711	\$319	\$—	\$—
Mortgage-backed and CMOs	37,368	389	35,424	346	1,944	43
State and municipal	13,540	36	12,716	34	824	2
Corporate	5,107	57	3,530	29	1,577	28
Total	\$113,726	\$801	\$109,381	\$728	\$4,345	\$73

GSE debt securities: The unrealized losses on the Company's investment in 18 government sponsored entities ("GSE") were caused by interest rate increases. The contractual terms of those investments do not permit the issuer to settle the securities at a price less than the amortized cost bases of the investments. Because the Company does not intend to sell the investments and it is not more likely than not that the Company will be required to sell the investments before recovery of their amortized cost bases, which may be maturity, the Company does not consider those investments to be other-than-temporarily impaired at December 31, 2015.

GSE residential mortgage-backed securities: The unrealized losses on the Company's investment in 34 GSE mortgage-backed securities were caused by interest rate increases. The contractual cash flows of those investments are guaranteed by an agency of the U.S. Government. Accordingly, it is expected that the securities would not be settled at a price less than the amortized cost bases of the Company's investments. Because the decline in market value is attributable to changes in interest rates and not credit quality, and because the Company does not intend to sell the investments and it is not more likely than not that the Company will be required to sell the investments before recovery of their amortized cost bases, which may be maturity, the Company does not consider those investments to be other-than-temporarily impaired at December 31, 2015.

Collateralized Mortgage Obligations: The unrealized loss associated with one private GSE collateralized mortgage obligation ("CMO") is due to normal market fluctuations. The contractual cash flows of those investments are guaranteed by an agency of the U.S. Government. Accordingly, it is expected that the securities would not be settled at a price less than the amortized cost bases of the Company's investments. Because the decline in market value is attributable to changes in interest rates and not credit quality, and because the Company does not intend to sell the investments and it is not more likely than not that the Company will be required to sell the investments before recovery of their amortized cost bases, which may be maturity, the Company does not consider those investments to be other-than-temporarily impaired at December 31, 2015.

State and municipal securities: The unrealized losses on 17 state and municipal securities were caused by interest rate increases and not credit deterioration. The contractual terms of those investments do not permit the issuer to settle the securities at a price less than the amortized cost bases of the investments. Because the Company does not intend to sell the investments and it is not more likely than not that the Company will be required to sell the investments before recovery of their amortized cost bases, which may be maturity, the Company does not consider those investments to be other-than-temporarily impaired at December 31, 2015.

Corporate securities: The unrealized losses on six corporate securities were caused by interest rate increases and not credit deterioration. The contractual terms of those investments do not permit the issuer to settle the securities at a price less than the amortized cost bases of the investments. Because the Company does not intend to sell the investments and it is not more likely than not that the Company will be required to sell the investments before recovery of their amortized cost bases, which may be maturity, the Company does not consider those investments to

be other-than-temporarily impaired at December 31, 2015.

Due to restrictions placed upon the Bank's common stock investment in the Federal Reserve Bank and FHLB, these securities have been classified as restricted equity securities and carried at cost. These restricted securities are not subject to the

74

investment security classifications and are included as a separate line item on the Company's Consolidated Balance Sheet. The FHLB requires the Bank to maintain stock in an amount equal to 4.5% of outstanding borrowings and a specific percentage of the Bank's total assets. The Federal Reserve Bank of Richmond requires the Bank to maintain stock with a par value equal to 3.0% of its outstanding capital and an additional 3.0% is on call. Restricted equity securities consist of Federal Reserve Bank stock in the amount of \$3,535,000 and \$2,742,000 as of December 31, 2015 and 2014 and FHLB stock in the amount of \$1,777,000 and \$1,625,000 as of December 31, 2015 and 2014, respectively.

The table below shows gross unrealized losses and fair value, aggregated by investment category and length of time that individual securities had been in a continuous unrealized loss position, at December 31, 2014 (dollars in thousands):

	Total		Less than 12 Months		12 Months or More	
	Fair Value	Unrealized Loss	Fair Value	Unrealized Loss	Fair Value	Unrealized Loss
Federal agencies and GSEs	\$28,979	\$104	\$21,449	\$35	\$7,530	\$69
Mortgage-backed and CMOs	7,182	112	1,171	13	6,011	99
State and municipal	20,542	90	15,836	60	4,706	30
Corporate	5,032	53	2,273	4	2,759	49
Total	\$61,735	\$359	\$40,729	\$112	\$21,006	\$247

Other-Than-Temporary-Impaired Securities

As of December 31, 2015 and 2014, there were no securities classified as other-than-temporary impaired.

Note 5 – Loans

Loans, excluding loans held for sale, at December 31, 2015 and 2014 were comprised of the following (dollars in thousands):

	December 31,	
	2015	2014
Commercial	\$177,481	\$126,981
Commercial real estate:		
Construction and land development	72,968	50,863
Commercial real estate	430,186	391,472
Residential real estate:		
Residential	220,434	175,293
Home equity	98,449	91,075
Consumer	6,007	5,241
Total loans	\$1,005,525	\$840,925

Net deferred loan (fees) costs included in the above loan categories are \$(575,000) for 2015 and \$(435,000) for 2014. Overdraft deposits were reclassified to consumer loans in the amount of \$82,000 and \$129,000 for 2015 and 2014, respectively.

Acquired Loans

The outstanding principal balance and the carrying amount of these loans included in the consolidated balance sheets at December 31, 2015 and 2014, are as follows (dollars in thousands):

	2015	2014
Outstanding principal balance	\$145,380	\$84,892
Carrying amount	135,254	78,111

The outstanding principal balance and related carrying amount of acquired impaired loans, for which the Company applies ASC 310-30 to account for interest earned, as of the indicated dates is as follows (dollars in thousands):

	December 31, 2015	December 31, 2014
Outstanding principal balance	\$40,951	\$18,357
Carrying amount	33,878	14,933

The following table presents changes in the accretable yield on acquired impaired loans, for which the Company applies ASC 310-30, for the year ended December 31, 2015 (dollars in thousands):

	2015	2014	2013
Balance at January 1	\$1,440	\$2,046	\$2,165
Additions from merger with MainStreet	7,140	—	—
Accretion	(4,313)	(1,185)	(2,635)
Reclassification from nonaccretable difference	—	579	2,516
Other changes, net	3,032	—	—
Balance at December 31	\$7,299	\$1,440	\$2,046

Past Due Loans

The following table shows an analysis by portfolio segment of the Company's past due loans at December 31, 2015 (dollars in thousands):

	30- 59 Days Past Due	60-89 Days Past Due	90 Days + Past Due and Still Accruing	Non- Accrual Loans	Total Past Due	Current	Total Loans
Commercial	\$137	\$—	\$—	\$90	\$227	\$177,254	\$177,481
Commercial real estate:							
Construction and land development	—	—	—	258	258	72,710	72,968
Commercial real estate	135	182	—	2,497	2,814	427,372	430,186
Residential:							
Residential	913	398	—	1,731	3,042	217,392	220,434
Home equity	140	12	—	620	772	97,677	98,449
Consumer	53	1	—	9	63	5,944	6,007
Total	\$1,378	\$593	\$—	\$5,205	\$7,176	\$998,349	\$1,005,525

The following table shows an analysis by portfolio segment of the Company's past due loans at December 31, 2014 (dollars in thousands):

	30- 59 Days Past Due	60-89 Days Past Due	90 Days + Past Due and Still Accruing	Non- Accrual Loans	Total Past Due	Current	Total Loans
Commercial	\$114	\$165	\$—	\$—	\$279	\$126,702	\$126,981
Commercial real estate:							
Construction and land development	44	269	—	279	592	50,271	50,863
Commercial real estate	257	—	—	3,010	3,267	388,205	391,472
