SECURITIES AND EXCHANGE COMMISSION  
WASHINGTON, D.C. 20549

FORM 10-Q

(Mark One)

☒ QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the quarterly period ended June 30, 2018  
OR

☐ TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from \_\_\_\_\_ to \_\_\_\_\_  
Commission file number 1-1070

Olin Corporation  
(Exact name of registrant as specified in its charter)

Virginia 13-1872319  
(State or other jurisdiction of incorporation or organization) (I.R.S. Employer Identification No.)  
190 Carondelet Plaza, Suite 1530, Clayton, MO 63105  
(Address of principal executive offices) (Zip Code)

(314) 480-1400  
(Registrant's telephone number, including area code)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes ☒ No ☐

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes ☒ No ☐

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, smaller reporting company, or an emerging growth company. See the definitions of "large accelerated filer," "accelerated filer," "smaller reporting company," and "emerging growth company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer ☒ Accelerated filer ☐ Non-accelerated filer ☐ (Do not check if a smaller reporting company)

Smaller reporting company ☐ Emerging growth company ☐

Edgar Filing: OLIN CORP - Form 10-Q

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act. "

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes  
" No x

As of June 30, 2018, 167,000,370 shares of the registrant's common stock were outstanding.

### OLIN CORPORATION AND CONSOLIDATED SUBSIDIARIES

#### Notes to Condensed Financial Statements (Unaudited)

#### DESCRIPTION OF BUSINESS

Olin Corporation (Olin) is a Virginia corporation, incorporated in 1892, having its principal executive offices in Clayton, MO. We are a manufacturer concentrated in three business segments: Chlor Alkali Products and Vinyls, Epoxy and Winchester. The Chlor Alkali Products and Vinyls segment manufactures and sells chlorine and caustic soda, ethylene dichloride (EDC) and vinyl chloride monomer, methyl chloride, methylene chloride, chloroform, carbon tetrachloride, perchloroethylene, trichloroethylene and vinylidene chloride, hydrochloric acid, hydrogen, bleach products and potassium hydroxide. The Epoxy segment produces and sells a full range of epoxy materials, including allyl chloride, epichlorohydrin, liquid epoxy resins, solid epoxy resins and downstream products such as differentiated epoxy resins and additives. The Winchester segment produces and sells sporting ammunition, reloading components, small caliber military ammunition and components, and industrial cartridges.

We have prepared the condensed financial statements included herein, without audit, pursuant to the rules and regulations of the U.S. Securities and Exchange Commission (SEC). The preparation of the financial statements requires estimates and assumptions that affect amounts reported and disclosed in the financial statements and related notes. In our opinion, these financial statements reflect all adjustments (consisting only of normal accruals), which are necessary to present fairly the results for interim periods. Certain information and footnote disclosures normally included in financial statements prepared in accordance with generally accepted accounting principles have been condensed or omitted pursuant to such rules and regulations; however, we believe that the disclosures are appropriate. We recommend that you read these condensed financial statements in conjunction with the financial statements, accounting policies and the notes thereto and Management's Discussion and Analysis of Financial Condition and Results of Operations included in our Annual Report on Form 10-K for the year ended December 31, 2017. Certain reclassifications were made to prior year amounts to conform to the 2018 presentation.

#### ACCOUNTING POLICIES

##### Revenue Recognition

In May 2014, the Financial Accounting Standards Board (FASB) issued Accounting Standards Update (ASU) 2014-09, "Revenue from Contracts with Customers" (ASU 2014-09), which amends Accounting Standards Codification (ASC) 605 "Revenue Recognition" and creates a new topic, ASC 606 "Revenue from Contracts with Customers" (ASC 606). Subsequent to the issuance of ASU 2014-09, ASC 606 was amended by various updates that amend and clarify the impact and implementation of the aforementioned update. We adopted these updates on January 1, 2018 using the modified retrospective transition method. The cumulative effect of applying the updates did not have a material impact on our consolidated financial statements. The most significant impact the updates had was on our accounting policies and disclosures on revenue recognition.

We derive our revenues primarily from the manufacturing and delivery of goods to customers. Revenues are recognized on sales of goods at the time when control of those goods is transferred to our customers at an amount that reflects the consideration to which we expect to be entitled in exchange for those goods. We primarily sell our goods directly to customers, and to a lesser extent, through distributors. Payment terms are typically 30 to 90 days from date of invoice. Our contracts do not typically have a significant financing component. Right to payment is determined at the point in time in which control has transferred to the customer.

A performance obligation is a promise in a contract to transfer a distinct good to the customer. At contract inception, we assess the goods promised in our contracts with customers and identify a performance obligation for each promise to transfer to the customer a good (or bundle of goods) that is distinct. A contract's transaction price is based on the price stated in the contract and allocated to each distinct performance obligation and revenue is recognized when the performance obligation is satisfied. The majority of our contracts have a single distinct performance obligation or multiple performance obligations which are distinct and represent individual promises within the contract. Substantially all of our performance obligations are satisfied at a single point in time, when control is transferred, which is generally upon shipment or delivery as stated in the contract terms.

## Table of Contents

All taxes assessed by governmental authorities that are both imposed on and concurrent with our revenue-producing transactions and collected from our customers are excluded from the measurement of the transaction price. Shipping and handling fees billed to customers are included in revenue and are considered activities to fulfill the promise to transfer the good. Allowances for estimated returns, discounts and rebates are considered variable consideration, which may be constrained, and are estimated and recognized when sales are recorded. The estimates are based on various market data, historical trends and information from customers. Actual returns, discounts and rebates have not been materially different from estimates. For all contracts that have a duration of one year or less at contract inception, we do not adjust the promised amount of consideration for the effects of a significant financing component.

Substantially all of our revenue is derived from contracts with an original expected length of time of one year or less and for which we recognize revenue for the amount in which we have the right to invoice at the point in time in which control has transferred to the customer. However, a portion of our revenue is derived from long-term contracts which have contract periods that vary between one to multi-year. Certain of these contracts represent contracts with minimum purchase obligations, which can be substantially different than the actual revenue recognized. Such contracts consist of varying types of products across our chemical businesses. Certain contracts include variable volumes and/or variable pricing with pricing provisions tied to commodity, consumer price or other indices. The transaction price allocated to the remaining performance obligations related to our contracts was excluded from the disclosure of our remaining performance obligations based on the following practical expedients that we elected to apply: (i) contracts with index-based pricing or variable volume attributes in which such variable consideration is allocated entirely to a wholly unsatisfied performance obligation; and (ii) contracts with an original expected duration of one year or less.

Refer to the Note “Segment Information” for information regarding the disaggregation of revenue by primary geographical markets and major product lines.

## ACQUISITION

On October 5, 2015 (the Closing Date), we completed the acquisition (the Acquisition) from DowDuPont Inc. (DowDuPont) (f/k/a The Dow Chemical Company) of its U.S. Chlor Alkali and Vinyl, Global Chlorinated Organics and Global Epoxy businesses (collectively, the Acquired Business), whose operating results are included in the accompanying financial statements since the Closing Date.

We incurred costs related to the integration of the Acquired Business which consisted of advisory, legal, accounting and other professional fees of \$0.3 million and \$4.4 million for the three months ended June 30, 2018 and 2017, respectively, and \$0.6 million and \$11.4 million for the six months ended June 30, 2018 and 2017, respectively.

## RESTRUCTURING CHARGES

On March 21, 2016, we announced that we had made the decision to close a combined total of 433,000 tons of chlor alkali capacity across three separate locations. Associated with this action, we have permanently closed our Henderson, NV chlor alkali plant with 153,000 tons of capacity and have reconfigured the site to manufacture bleach and distribute caustic soda and hydrochloric acid. Also, the capacity of our Niagara Falls, NY chlor alkali plant has been reduced from 300,000 tons to 240,000 tons and the chlor alkali capacity at our Freeport, TX facility was reduced by 220,000 tons. This 220,000 ton reduction was entirely from diaphragm cell capacity. For the three months ended June 30, 2018 and 2017, we recorded pretax restructuring charges of \$6.1 million and \$7.4 million, respectively, for employee severance and related benefit costs, employee relocation costs, facility exit costs and lease and other contract termination costs related to these actions. For the six months ended June 30, 2018 and 2017, we recorded pretax restructuring charges of \$9.1 million and \$14.9 million, respectively, for employee severance and related benefit costs, employee relocation costs, facility exit costs and lease and other contract termination costs related to these actions. We expect to incur additional restructuring charges through 2020 of approximately \$17 million related

to these capacity reductions.

On December 12, 2014, we announced that we had made the decision to permanently close the portion of the Becancour, Canada chlor alkali facility that has been shut down since late June 2014. This action reduced the facility's chlor alkali capacity by 185,000 tons. Subsequent to the shut down, the plant predominantly focuses on bleach and hydrochloric acid, which are value-added products, as well as caustic soda. For the three months ended June 30, 2018 and 2017, we recorded pretax restructuring charges of \$0.3 million and \$1.1 million, respectively, for facility exit costs related to this action. For the six months ended June 30, 2018 and 2017, we recorded pretax restructuring charges of \$1.3 million and \$1.8 million, respectively, for facility exit costs related to this action. We expect to incur additional restructuring charges through 2018 of approximately \$1 million related to the shut down of this portion of the facility.

On November 3, 2010, we announced that we made the decision to relocate the Winchester centerfire pistol and rifle ammunition manufacturing operations from East Alton, IL to Oxford, MS. Consistent with this decision in 2010, we initiated an estimated \$110 million five-year project, which included approximately \$80 million of capital spending. The capital spending was partially financed by \$31 million of grants provided by the State of Mississippi and local governments. During 2016, the final rifle ammunition production equipment relocation was completed.

Table of Contents

The following table summarizes the 2018 and 2017 activities by major component of these restructuring actions and the remaining balances of accrued restructuring costs as of June 30, 2018 and 2017:

	Employee severance and related benefit costs	Lease and other contract termination costs	Employee relocation costs	Facility exit costs	Total
	(\$ in millions)				
Balance at January 1, 2017	\$3.4	\$ 7.5	\$ —	\$ 1.8	\$12.7
Restructuring charges:					
First quarter	—	5.7	0.2	2.3	8.2
Second quarter	—	5.8	0.1	2.6	8.5
Amounts utilized	(2.6 )	(2.6 )	(0.3 )	(6.6 )	(12.1 )
Balance at June 30, 2017	\$0.8	\$ 16.4	\$ —	\$ 0.1	\$17.3
Balance at January 1, 2018	\$1.8	\$ 3.3	\$ —	\$ —	\$5.1
Restructuring charges:					
First quarter	—	0.4	—	3.6	4.0
Second quarter	0.1	3.7	—	2.6	6.4
Amounts utilized	(1.0 )	(1.3 )	—	(5.1 )	(7.4 )
Balance at June 30, 2018	\$0.9	\$ 6.1	\$ —	\$ 1.1	\$8.1

The following table summarizes the cumulative restructuring charges of these 2016, 2014 and 2010 restructuring actions by major component through June 30, 2018:

	Chlor Alkali Products and Vinyls	Capacity Reductions	Winchester	Total
	(\$ in millions)			
Write-off of equipment and facility	\$3.5	\$ 78.1	\$ —	\$81.6
Employee severance and related benefit costs	2.7	5.6	14.7	23.0
Facility exit costs	5.9	28.0	2.3	36.2
Pension and other postretirement benefits curtailment	—	—	4.1	4.1
Employee relocation costs	—	1.7	6.0	7.7
Lease and other contract termination costs	5.3	39.7	—	45.0
Total cumulative restructuring charges	\$17.4	\$ 153.1	\$ 27.1	\$197.6

As of June 30, 2018, we have incurred cash expenditures of \$103.4 million and non-cash charges of \$86.1 million related to these restructuring actions. The remaining balance of \$8.1 million is expected to be paid out through 2020.

## ACCOUNTS RECEIVABLES

On December 20, 2016, we entered into a three-year, \$250.0 million Receivables Financing Agreement with PNC Bank, National Association, as administrative agent (Receivables Financing Agreement). Under the Receivables Financing Agreement, our eligible trade receivables are used for collateralized borrowings and continue to be serviced by us. In addition, the Receivables Financing Agreement incorporates the leverage and coverage covenants that are contained in the senior revolving credit facility. As of June 30, 2018, \$434.0 million of our trade receivables were

pledged as collateral and we had \$250.0 million drawn under the agreement. As of June 30, 2018, we had no additional borrowing capacity under the Receivables Financing Agreement. As of December 31, 2017, \$340.9 million of our trade receivables were pledged as collateral and \$249.7 million was drawn under the agreement.

Table of Contents

Olin also has trade accounts receivable factoring arrangements (AR Facilities) and pursuant to the terms of the AR Facilities, certain of our subsidiaries may sell their accounts receivable up to a maximum of \$294.0 million. We will continue to service the outstanding accounts sold. These receivables qualify for sales treatment under ASC 860 “Transfers and Servicing” and, accordingly, the proceeds are included in net cash provided by operating activities in the condensed statements of cash flows. The following table summarizes the AR Facilities activity:

	June 30,	
	2018	2017
	(\$ in millions)	
Balance at beginning of year	\$182.3	\$126.1
Gross receivables sold	851.1	777.6
Payments received from customers on sold accounts	(844.8 )	(755.3 )
Balance at end of period	\$188.6	\$148.4

The factoring discount paid under the AR Facilities is recorded as interest expense on the condensed statements of operations. The factoring discount was \$1.6 million and \$0.8 million for the three months ended June 30, 2018 and 2017, respectively, and \$2.8 million and \$1.5 million for the six months ended June 30, 2018 and 2017, respectively. The agreements are without recourse and therefore no recourse liability has been recorded as of June 30, 2018.

## ALLOWANCE FOR DOUBTFUL ACCOUNTS RECEIVABLES

We evaluate the collectibility of accounts receivable based on a combination of factors. We estimate an allowance for doubtful accounts as a percentage of net sales based on historical bad debt experience. This estimate is periodically adjusted when we become aware of a specific customer’s inability to meet its financial obligations (e.g., bankruptcy filing) or as a result of changes in the overall aging of accounts receivable. While we have a large number of customers that operate in diverse businesses and are geographically dispersed, a general economic downturn in any of the industry segments in which we operate could result in higher than expected defaults, and, therefore, the need to revise estimates for the provision for doubtful accounts could occur.

Allowance for doubtful accounts receivable consisted of the following:

	June 30,	
	2018	2017
	(\$ in millions)	
Balance at beginning of year	\$12.3	\$10.1
Provisions charged	1.3	2.1
Foreign currency translation adjustment	(0.3 )	—
Balance at end of period	\$13.3	\$12.2

Provisions charged to operations were \$0.2 million and \$0.7 million for the three months ended June 30, 2018 and 2017, respectively.

Table of Contents

## INVENTORIES

Inventories consisted of the following:

	June 30, 2018	December 31, 2017	June 30, 2017
	(\$ in millions)		
Supplies	\$62.7	\$ 66.1	\$59.7
Raw materials	76.5	75.3	74.9
Work in process	137.1	127.8	133.7
Finished goods	500.4	462.6	445.8
	776.7	731.8	714.1
LIFO reserve	(60.4 )	(49.2 )	(47.9 )
Inventories, net	\$716.3	\$ 682.6	\$666.2

Inventories are valued at the lower of cost and net realizable value. For U.S. inventories, inventory costs are determined principally by the last-in, first-out (LIFO) method of inventory accounting while for international inventories, inventory costs are determined principally by the first-in, first-out (FIFO) method of inventory accounting. Cost for other inventories has been determined principally by the average-cost method (primarily operating supplies, spare parts and maintenance parts). Elements of costs in inventories included raw materials, direct labor and manufacturing overhead. Inventories under the LIFO method are based on annual estimates of quantities and costs as of year-end; therefore, the condensed financial statements at June 30, 2018 reflect certain estimates relating to inventory quantities and costs at December 31, 2018. The replacement cost of our inventories would have been approximately \$60.4 million, \$49.2 million and \$47.9 million higher than reported at June 30, 2018, December 31, 2017 and June 30, 2017, respectively.

## OTHER ASSETS

Included in other assets were the following:

	June 30, 2018	December 31, 2017	June 30, 2017
	(\$ in millions)		
Investments in non-consolidated affiliates	\$7.9	\$ 28.5	\$ 27.7
Deferred debt issuance costs	2.2	2.5	2.8
Tax-related receivables	5.0	10.2	16.0
Derivative contracts	2.8	3.6	4.7
Supply contracts	1,118.3	1,137.1	554.1
Other	33.3	26.5	20.3
Other assets	\$1,169.5	\$ 1,208.4	\$ 625.6

For the three months ended June 30, 2018, we recorded a \$21.5 million non-cash impairment charge related to an adjustment to the value of our 9.1% limited partnership interest in Bay Gas Storage Company, Ltd. (BayGas). BayGas owns, leases and operates underground gas storage and related pipeline facilities which are used to provide storage in the McIntosh, AL area and delivery of natural gas. The general partner, Sempra Energy (Sempra), announced in the second quarter its plan to sell several assets including its 90.9% interest in BayGas. In connection with this decision, Sempra recorded an impairment charge related to BayGas adjusting the related assets' carrying values to an estimated fair value. We recorded a reduction in our investment in the non-consolidated affiliate for the proportionate share of the non-cash impairment charge. Olin has no other non-consolidated affiliates.

In connection with the Acquisition, Olin and DowDuPont entered into arrangements for the long-term supply of ethylene by DowDuPont to Olin, pursuant to which, among other things, Olin made upfront payments in order to receive ethylene at producer economics and for certain reservation fees and for the option to obtain additional ethylene at producer economics. During 2016, we exercised one of the options to reserve additional ethylene at producer economics. In September 2017, DowDuPont's new Texas 9 ethylene cracker in Freeport, TX became operational. As a result, during 2017, a payment of \$209.4 million was made in connection with this option which increased the value of the long-term asset.

Table of Contents

On February 27, 2017, we exercised the remaining option to reserve additional ethylene at producer economics from DowDuPont. In connection with the exercise of this option, we also secured a long-term customer arrangement. As a result, an additional payment will be made to DowDuPont of between \$440 million and \$465 million on or about the fourth quarter of 2020. During 2017, as a result of DowDuPont's new Texas 9 ethylene cracker becoming operational, Olin recognized a long-term asset and other liabilities of \$389.2 million, which represents the present value of the additional estimated payment. The discounted amount of \$51.8 million will be recorded as interest expense through the fourth quarter of 2020. For the three and six months ended June 30, 2018, interest expense of \$4.0 million and \$7.9 million, respectively, was recorded for accretion on the 2020 payment discount.

Amortization expense of \$9.4 million and \$6.3 million for the three months ended June 30, 2018 and 2017, respectively, and \$18.8 million and \$12.6 million for the six months ended June 30, 2018 and 2017, respectively, was recognized within cost of goods sold related to these supply contracts and is reflected in depreciation and amortization on the condensed statements of cash flows. The long-term supply contracts are monitored for impairment each reporting period.

**GOODWILL AND INTANGIBLE ASSETS**

Changes in the carrying value of goodwill were as follows:

	Chlor Alkali Products and Vinyls (\$ in millions)	Epoxy	Total
Balance at January 1, 2017	\$1,831.3	\$286.7	\$2,118.0
Foreign currency translation adjustment	1.2	0.3	1.5
Balance at June 30, 2017	\$1,832.5	\$287.0	\$2,119.5
Balance at January 1, 2018	\$1,832.9	\$287.1	2,120.0
Foreign currency translation adjustment	(0.2 )	(0.1 )	(0.3 )
Balance at June 30, 2018	\$1,832.7	\$287.0	\$2,119.7

Intangible assets consisted of the following:

	June 30, 2018			December 31, 2017			June 30, 2017		
	Gross Amount	Accumulated Amortization	Net	Gross Amount	Accumulated Amortization	Net	Gross Amount	Accumulated Amortization	Net
	(\$ in millions)								
Customers, customer contracts and relationships	\$676.5	\$ (187.8 )	\$ 488.7	\$679.5	\$ (163.6 )	\$ 515.9	\$675.0	\$ (138.2 )	\$ 536.8
Trade name	7.1	(3.9 )	3.2	7.1	(3.2 )	3.9	7.0	(2.5 )	4.5
Acquired technology	85.7	(33.6 )	52.1	86.1	(27.7 )	58.4	85.3	(21.3 )	64.0
Other	2.3	(2.0 )	0.3	2.3	(2.0 )	0.3	2.3	(2.0 )	0.3
Total intangible assets	\$771.6	\$ (227.3 )	\$ 544.3	\$775.0	\$ (196.5 )	\$ 578.5	\$769.6	\$ (164.0 )	\$ 605.6

Table of Contents

## EARNINGS PER SHARE

Basic and diluted net income (loss) per share are computed by dividing net income (loss) by the weighted-average number of common shares outstanding. Diluted net income (loss) per share reflects the dilutive effect of stock-based compensation.

	Three Months		Six Months	
	Ended June		Ended June	
	30,		30,	
	2018	2017	2018	2017
Computation of Income per Share	(In millions, except per share data)			
Net income (loss)	\$58.6	\$(5.9)	\$79.5	\$7.5
Basic shares	167.1	166.1	167.1	165.8
Basic net income (loss) per share	\$0.35	\$(0.04)	\$0.48	\$0.05
Diluted shares:				
Basic shares	167.1	166.1	167.1	165.8
Stock-based compensation	1.7	—	2.0	2.2
Diluted shares	168.8	166.1	169.1	168.0
Diluted net income (loss) per share	\$0.35	\$(0.04)	\$0.47	\$0.04

The computation of dilutive shares from stock-based compensation does not include 2.5 million and 6.9 million shares for the three months ended June 30, 2018 and 2017, respectively, and 2.5 million and 1.6 million shares for the six months ended June 30, 2018 and 2017, respectively, as their effect would have been anti-dilutive.

## ENVIRONMENTAL

We are party to various government and private environmental actions associated with past manufacturing facilities and former waste disposal sites. The condensed balance sheets included reserves for future environmental expenditures to investigate and remediate known sites amounting to \$132.5 million, \$131.6 million and \$135.7 million at June 30, 2018, December 31, 2017 and June 30, 2017, respectively, of which \$112.5 million, \$111.6 million and \$118.7 million, respectively, were classified as other noncurrent liabilities.

Environmental provisions charged to income, which are included in cost of goods sold, were \$4.4 million and \$1.8 million for the three months ended June 30, 2018 and 2017, respectively, and \$6.7 million and \$4.4 million for the six months ended June 30, 2018 and 2017, respectively.

Environmental exposures are difficult to assess for numerous reasons, including the identification of new sites, developments at sites resulting from investigatory studies, advances in technology, changes in environmental laws and regulations and their application, changes in regulatory authorities, the scarcity of reliable data pertaining to identified sites, the difficulty in assessing the involvement and financial capability of other Potentially Responsible Parties (PRPs), our ability to obtain contributions from other parties and the lengthy time periods over which site remediation occurs. It is possible that some of these matters (the outcomes of which are subject to various uncertainties) may be resolved unfavorably to us, which could materially adversely affect our financial position or results of operations.

## COMMITMENTS AND CONTINGENCIES

We, and our subsidiaries, are defendants in various legal actions (including proceedings based on alleged exposures to asbestos) incidental to our past and current business activities. As of June 30, 2018, December 31, 2017 and June 30, 2017, our condensed balance sheets included accrued liabilities for these legal actions of \$14.0 million, \$24.8 million

and \$15.9 million, respectively. These liabilities do not include costs associated with legal representation. Based on our analysis, and considering the inherent uncertainties associated with litigation, we do not believe that it is reasonably possible that these legal actions will materially adversely affect our financial position, cash flows or results of operations.

## Table of Contents

During the ordinary course of our business, contingencies arise resulting from an existing condition, situation or set of circumstances involving an uncertainty as to the realization of a possible gain contingency. In certain instances such as environmental projects, we are responsible for managing the cleanup and remediation of an environmental site. There exists the possibility of recovering a portion of these costs from other parties. We account for gain contingencies in accordance with the provisions of ASC 450 “Contingencies” (ASC 450) and, therefore, do not record gain contingencies and recognize income until it is earned and realizable.

## SHAREHOLDERS’ EQUITY

On April 26, 2018, our board of directors authorized a share repurchase program for the purchase of shares of common stock at an aggregate price of up to \$500.0 million. This program will terminate upon the purchase of \$500.0 million of our common stock. For the six months ended June 30, 2018, 0.3 million shares were repurchased and retired at a cost of \$9.1 million. As of June 30, 2018, we had repurchased a total of \$9.1 million of our common stock, representing 0.3 million shares, and \$490.9 million of common stock remained authorized to be repurchased.

We issued 0.2 million and 0.9 million shares representing stock options exercised for the six months ended June 30, 2018 and 2017, respectively, with a total value of \$2.2 million and \$15.8 million, respectively.

In February 2018, the FASB issued ASU 2018-02, “Reclassification of Certain Tax Effects from Accumulated Other Comprehensive Income” (ASU 2018-02) which amends ASC 220 “Income Statement—Reporting Comprehensive Income.” This update allows a reclassification from accumulated other comprehensive loss to retained earnings for the stranded tax effects resulting from the U.S. Tax Cuts and Jobs Act (the 2017 Tax Act) during each fiscal year or quarter in which the effect of the lower tax rate is recorded. We adopted this update in March 2018 and reclassified \$85.9 million related to the provisional deferred gain resulting from the 2017 Tax Act from accumulated other comprehensive loss to retained earnings.

Table of Contents

The following table represents the activity included in accumulated other comprehensive loss:

	Unrealized			
	Foreign Currency Translation Adjustments (net of taxes)	Gains (Losses) Derivative Contracts (net of taxes)	Pension and Other Postretirement Benefits (net of taxes)	Accumulated Other Comprehensive Loss
	(\$ in millions)			
Balance at January 1, 2017	\$(24.1)	\$ 12.8	\$ (498.7 )	\$ (510.0 )
Unrealized gains (losses):				
First quarter	8.3	(3.1 )	—	5.2
Second quarter	28.1	(3.7 )	—	24.4
Reclassification adjustments into income (gains) losses:				
First quarter	—	(0.1 )	6.6	6.5
Second quarter	—	(2.3 )	6.8	4.5
Tax (provision) benefit:				
First quarter	(2.3 )	1.2	(2.7 )	(3.8 )
Second quarter	(12.2 )	2.3	(2.3 )	(12.2 )
Net change	21.9	(5.7 )	8.4	24.6
Balance at June 30, 2017	\$(2.2 )	\$ 7.1	\$ (490.3 )	\$ (485.4 )
Balance at January 1, 2018	\$7.6	\$ 11.1	\$ (503.3 )	\$ (484.6 )
Unrealized gains (losses):				
First quarter	12.4	2.1	—	14.5
Second quarter	(26.1 )	(0.4 )	—	(26.5 )
Reclassification adjustments into income (gains) losses:				
First quarter	—	(2.3 )	9.4	7.1
Second quarter	—	(2.7 )	9.1	6.4
Tax benefit (provision):				
First quarter	—	0.1	(4.0 )	(3.9 )
Second quarter	—	0.7	(1.0 )	(0.3 )
Net change	(13.7 )	(2.5 )	13.5	(2.7 )
Income tax reclassification adjustment	15.3	2.4	(103.6 )	(85.9 )
Balance at June 30, 2018	\$9.2	\$ 11.0	\$ (593.4 )	\$ (573.2 )

Net income and cost of goods sold included reclassification adjustments for realized gains and losses on derivative contracts from accumulated other comprehensive loss.

Net income and non-operating pension income included the amortization of prior service costs and actuarial losses from accumulated other comprehensive loss.

Table of Contents

## SEGMENT INFORMATION

We define segment results as income (loss) before interest expense, interest income, other operating income (expense), non-operating pension income and income taxes, and includes the operating results of non-consolidated affiliates. Consistent with the guidance in ASC 280 "Segment Reporting," we have determined it is appropriate to include the operating results of non-consolidated affiliates in the relevant segment financial results. We have three operating segments: Chlor Alkali Products and Vinyls, Epoxy and Winchester. The three operating segments reflect the organization used by our management for purposes of allocating resources and assessing performance. Chlorine used in our Epoxy segment is transferred at cost from the Chlor Alkali Products and Vinyls segment. Sales and profits are recognized in the Chlor Alkali Products and Vinyls segment for all caustic soda generated and sold by Olin. Sales are attributed to geographic areas based on customer location.

	Three Months Ended June 30,		Six Months Ended June 30,	
	2018	2017	2018	2017
Sales:	(\$ in millions)			
Chlor Alkali Products and Vinyls	\$1,018.7	\$865.1	\$1,954.8	\$1,702.0
Epoxy	543.8	492.0	1,147.1	1,059.6
Winchester	165.9	169.4	336.8	332.0
Total sales	\$1,728.4	\$1,526.5	\$3,438.7	\$3,093.6
Income (loss) before taxes:				
Chlor Alkali Products and Vinyls	\$149.4	\$52.8	\$279.9	\$140.3
Epoxy	24.8	(8.1)	2.7	(9.3)
Winchester	11.8	19.0	23.8	44.1
Corporate/other:				
Environmental expense	(4.4)	(1.8)	(6.7)	(4.4)
Other corporate and unallocated costs	(45.3)	(27.6)	(81.8)	(59.2)
Restructuring charges	(6.4)	(8.5)	(10.4)	(16.7)
Acquisition-related costs	(0.3)	(4.4)	(0.6)	(11.4)
Other operating income (expense)	—	0.3	8.1	(0.1)
Interest expense	(61.1)	(52.5)	(124.8)	(104.9)
Interest income	0.4	0.4	0.8	0.6
Non-operating pension income	5.4	8.6	10.8	17.1
Income (loss) before taxes	\$74.3	\$(21.8)	\$101.8	\$(3.9)

For the six months ended June 30, 2018, we recognized an insurance recovery of \$8.0 million in other operating income (expense) for a second quarter 2017 business interruption at our Freeport, TX vinyl chloride monomer facility.

Earnings (losses) of non-consolidated affiliates are included in the Chlor Alkali Products and Vinyls segment results consistent with management's monitoring of the operating segments. The losses of non-consolidated affiliates were \$21.1 million and \$20.6 million for the three and six months ended June 30, 2018, respectively, which reflect a \$21.5 million non-cash impairment charge recorded during the second quarter. The earnings of non-consolidated affiliates were \$0.5 million and \$1.0 million for the three and six months ended June 30, 2017, respectively.

## STOCK-BASED COMPENSATION

Stock-based compensation granted includes stock options, performance stock awards, restricted stock awards and deferred directors' compensation. Stock-based compensation expense was as follows:

	Three Months Ended June 30, 2018		Six Months Ended June 30, 2017	
	2018	2017	2018	2017
	(\$ in millions)			
Stock-based compensation	\$4.4	\$4.2	\$10.9	\$11.5
Mark-to-market adjustments	(1.3 )	(1.3 )	(4.3 )	1.3
Total expense	\$3.1	\$2.9	\$6.6	\$12.8

The fair value of each stock option granted, which typically vests ratably over three years, but not less than one year, was estimated on the date of grant, using the Black-Scholes option-pricing model with the following weighted-average assumptions:

	2018		2017	
Grant date	2.43	%	2.69	%
Dividend yield	2.72	%	2.06	%
Risk-free interest rate	32	%	34	%
Expected volatility	6.0		6.0	
Expected life (years)	\$8.89		\$7.78	
Weighted-average grant fair value (per option)	\$32.94		\$29.82	
Weighted-average exercise price	927,000		1,621,000	
Shares granted				

Dividend yield was based on our current dividend yield as of the option grant date. Risk-free interest rate was based on zero coupon U.S. Treasury securities rates for the expected life of the options. Expected volatility was based on our historical stock price movements, as we believe that historical experience is the best available indicator of the expected volatility. Expected life of the option grant was based on historical exercise and cancellation patterns, as we believe that historical experience is the best estimate of future exercise patterns.

## DEBT

On January 19, 2018, Olin issued \$550.0 million aggregate principal amount of 5.00% senior notes due February 1, 2030 (2030 Notes), which were registered under the Securities Act of 1933, as amended. Interest on the 2030 Notes began accruing from January 19, 2018 and is paid semi-annually beginning on August 1, 2018. Proceeds from the 2030 Notes were used to redeem \$550.0 million of debt under the \$1,375.0 million term loan facility (Term Loan Facility).

For the six months ended June 30, 2018, we recognized interest expense of \$2.6 million for the write-off of unamortized deferred debt issuance costs related to the redemption of \$550.0 million of debt under the Term Loan Facility. For the six months ended June 30, 2018, we paid debt issuance costs of \$8.5 million for the issuance of the 2030 Notes.

On March 9, 2017, we entered into a five-year \$1,975.0 million senior credit facility, which amended and restated the existing \$1,850.0 million senior credit facility. Pursuant to the agreement, the aggregate principal amount under the term loan facility was increased to \$1,375.0 million, and the aggregate commitments under the senior revolving credit

facility were increased from \$500.0 million to \$600.0 million (Senior Revolving Credit Facility and, together with the Term Loan Facility, the Senior Credit Facility). At June 30, 2018, we had \$594.9 million available under our \$600.0 million Senior Revolving Credit Facility because we had issued \$5.1 million of letters of credit. In March 2017, we drew the entire \$1,375.0 million term loan and used the proceeds to redeem the remaining balance of the existing \$1,350.0 million term loan facility of \$1,282.5 million and a portion of the \$800.0 million Sumitomo Credit Facility (Sumitomo Credit Facility). The maturity date for the Senior Credit Facility was extended from October 5, 2020 to March 9, 2022. The \$600.0 million Senior Revolving Credit Facility includes a \$100.0 million letter of credit subfacility. The Term Loan Facility includes amortization payable in equal quarterly installments at a rate of 5.0% per annum for the first two years, increasing to 7.5% per annum for the following year and to 10.0% per annum for the last two years. In connection with the \$550.0 million prepayment of the Term Loan Facility in January 2018, the required quarterly installments of the Term Loan Facility were eliminated.

## Table of Contents

Under the Senior Credit Facility, we may select various floating rate borrowing options. The actual interest rate paid on borrowings under the Senior Credit Facility is based on a pricing grid which is dependent upon the leverage ratio as calculated under the terms of the applicable facility for the prior fiscal quarter. The facility includes various customary restrictive covenants, including restrictions related to the ratio of debt to earnings before interest expense, taxes, depreciation and amortization (leverage ratio) and the ratio of earnings before interest expense, taxes, depreciation and amortization to interest expense (coverage ratio). Compliance with these covenants is determined quarterly based on the operating cash flows. We were in compliance with all covenants and restrictions under all our outstanding credit agreements as of June 30, 2018, and no event of default had occurred that would permit the lenders under our outstanding credit agreements to accelerate the debt if not cured. In the future, our ability to generate sufficient operating cash flows, among other factors, will determine the amounts available to be borrowed under these facilities. As of June 30, 2018, there were no covenants or other restrictions that would have limited our ability to borrow under these facilities.

On March 9, 2017, Olin issued \$500.0 million aggregate principal amount of 5.125% senior notes due September 15, 2027 (2027 Notes), which were registered under the Securities Act of 1933, as amended. Interest on the 2027 Notes began accruing from March 9, 2017 and is paid semi-annually beginning on September 15, 2017. Proceeds from the 2027 Notes were used to redeem the remaining balance of the Sumitomo Credit Facility.

For the six months ended June 30, 2017, we recognized interest expense of \$2.7 million for the write-off of unamortized deferred debt issuance costs related to the issuance of the Senior Credit Facility and the repayment of the Sumitomo Credit Facility. For the six months ended June 30, 2017, we paid debt issuance costs of \$11.2 million relating to the Senior Credit Facility and the 2027 Notes.

## CONTRIBUTING EMPLOYEE OWNERSHIP PLAN

The Contributing Employee Ownership Plan (CEOP) is a defined contribution plan available to essentially all domestic employees. We provide a contribution to an individual retirement contribution account maintained with the CEOP equal to an amount of between 5.0% and 7.5% of the employee's eligible compensation. The defined contribution plan expense for both the three months ended June 30, 2018 and 2017 was \$6.7 million and for the six months ended June 30, 2018 and 2017 was \$15.3 million and \$15.4 million, respectively.

Company matching contributions are invested in the same investment allocation as the employee's contribution. Our matching contributions for eligible employees for the three months ended June 30, 2018 and 2017 was \$3.7 million and \$2.8 million, respectively, and for the six months ended June 30, 2018 and 2017 was \$7.4 million and \$5.7 million, respectively.

## PENSION PLANS AND RETIREMENT BENEFITS

We sponsor domestic and foreign defined benefit pension plans for eligible employees and retirees. Most of our domestic employees participate in defined contribution plans. However, a portion of our bargaining hourly employees continue to participate in our domestic qualified defined benefit pension plans under a flat-benefit formula. Our funding policy for the qualified defined benefit pension plans is consistent with the requirements of federal laws and regulations. Our foreign subsidiaries maintain pension and other benefit plans, which are consistent with local statutory practices.

Our domestic qualified defined benefit pension plan provides that if, within three years following a change of control of Olin, any corporate action is taken or filing made in contemplation of, among other things, a plan termination or merger or other transfer of assets or liabilities of the plan, and such termination, merger, or transfer thereafter takes

place, plan benefits would automatically be increased for affected participants (and retired participants) to absorb any plan surplus (subject to applicable collective bargaining requirements).

Table of Contents

We also provide certain postretirement healthcare (medical) and life insurance benefits for eligible active and retired domestic employees. The healthcare plans are contributory with participants' contributions adjusted annually based on medical rates of inflation and plan experience.

	Pension Benefits		Other Postretirement Benefits	
	Three Months Ended June 30,		Three Months Ended June 30,	
	2018	2017	2018	2017
Components of Net Periodic Benefit (Income) Cost	(\$ in millions)			
Service cost	\$2.5	\$2.1	\$ 0.4	\$ 0.3
Interest cost	21.7	21.5	0.4	0.4
Expected return on plans' assets	(36.6)	(37.3)	—	—
Amortization of prior service cost	—	—	—	(0.7 )
Recognized actuarial loss	8.5	6.8	0.6	0.7
Net periodic benefit (income) cost	\$(3.9)	\$(6.9)	\$ 1.4	\$ 0.7

	Pension Benefits		Other Postretirement Benefits	
	Six Months Ended June 30,		Six Months Ended June 30,	
	2018	2017	2018	2017
Components of Net Periodic Benefit (Income) Cost	(\$ in millions)			
Service cost	\$5.2	\$4.5	\$ 0.7	\$ 0.6
Interest cost	43.3	43.2	0.8	0.8
Expected return on plans' assets	(73.4)	(74.5 )	—	—
Amortization of prior service cost	—	—	—	(1.3 )
Recognized actuarial loss	17.3	13.4	1.2	1.3
Net periodic benefit (income) cost	\$(7.6)	\$(13.4)	\$ 2.7	\$ 1.4

We made cash contributions to our international qualified defined benefit pension plans of \$1.1 million and \$0.9 million for the six months ended June 30, 2018 and 2017, respectively.

In March 2017, the FASB issued ASU 2017-07, "Improving the Presentation of Net Periodic Pension Cost and Net Periodic Postretirement Benefit Cost" (ASU 2017-07) which amends ASC 715 "Compensation—Retirement Benefits." The adoption of ASU 2017-07 resulted in a change in our net periodic benefit (income) costs within operating income, which was offset by a corresponding change in non-operating pension income to reflect the impact of presenting the interest cost, expected return on plan assets, amortization of prior service cost and net actuarial loss components of net periodic benefit (income) costs outside of operating income. We adopted this update on January 1, 2018 using the retrospective method. For the three and six months ended June 30, 2017, the adoption of ASU 2017-07 resulted in a reclassification of \$3.8 million and \$7.6 million, respectively, from cost of goods sold and \$4.8 million and \$9.5 million, respectively, from selling and administration to non-operating pension income reflecting the aforementioned reclassification on our condensed statements of operations. The service cost component of net periodic benefit (income) costs continue to be included in the same income statement line item as other employee compensation costs arising from services rendered during the period.

Table of Contents

## INCOME TAXES

The effective tax rate for the three months ended June 30, 2018 included a benefit associated with stock-based compensation, a benefit from a change in tax contingencies, an expense associated with the estimated reduction of the one-time 2017 Tax Act provisional tax benefit, an expense from a net increase in the valuation allowance related to foreign net operating losses and an expense from the remeasurement of deferred taxes due to an increase in our state effective tax rates. These factors resulted in a net \$1.5 million tax benefit. After giving consideration to these items, the effective tax rate for the three months ended June 30, 2018 of 23.1% was higher than the 21% U.S. federal statutory rate, primarily due to state and foreign income taxes, partially offset by favorable permanent salt depletion deductions. The effective tax rate for the three months ended June 30, 2017 included benefits associated with an agreement reached with the Internal Revenue Service (IRS) for the years 2008, 2010 to 2012 tax examinations and stock-based compensation. These factors resulted in a net \$10.4 million tax benefit. After giving consideration to these items, the effective tax rate for the three months ended June 30, 2017 of 25.2% was lower than the 35% U.S. federal statutory rate, primarily due to favorable permanent tax deduction items, such as the salt depletion deduction and tax deductible dividends paid to the CEOP.

The effective tax rate for the six months ended June 30, 2018 included a benefit associated with stock-based compensation, a benefit from a change in tax contingencies, a benefit related to a foreign dividend payment, an expense associated with the estimated reduction of the one-time 2017 Tax Act provisional tax benefit, an expense from a net increase in the valuation allowance related to foreign net operating losses and an expense from the remeasurement of deferred taxes due to an increase in our state effective tax rates. These factors resulted in a net \$2.3 million tax benefit. After giving consideration to these items, the effective tax rate for the six months ended June 30, 2018 of 24.2% was higher than the 21% U.S. federal statutory rate primarily due to state and foreign income taxes, partially offset by favorable permanent salt depletion deductions. The effective tax rate for the six months ended June 30, 2017 included benefits associated with an agreement reached with the IRS for the years 2008, 2010 to 2012 tax examinations and stock-based compensation and an expense related to prior year tax positions. These factors resulted in a net \$10.9 million tax benefit. After giving consideration to these items, the effective tax rate for the six months ended June 30, 2017 of 12.8% was lower than the 35% U.S. federal statutory rate, primarily due to favorable permanent tax deduction items, such as the salt depletion deduction and tax deductible dividends paid to the CEOP.

The 2017 Tax Act was enacted on December 22, 2017 and included a broad range of provisions impacting the taxation of businesses. Included within the provisions, the 2017 Tax Act reduces the U.S. federal corporate tax rate from 35% to 21%, requires companies to pay a one-time transition tax on unremitted earnings of foreign subsidiaries that were previously tax deferred and transitions the U.S. from a worldwide tax system to a modified territorial tax system.

The SEC Staff issued Accounting Bulletin No. 118, "Income Tax Accounting Implications of the Tax Cuts and Jobs Act" (SAB 118), which provides guidance on accounting for the tax effects of the 2017 Tax Act. SAB 118 provides a measurement period of up to one year from the 2017 Tax Act's enactment date for companies to complete the accounting under ASC 740 "Income Taxes" (ASC 740). In accordance with SAB 118, to the extent that a company's accounting for certain income tax effects of the 2017 Tax Act is incomplete but it is able to determine a reasonable estimate, it must record a provisional estimate in the financial statements. If a company cannot determine a provisional estimate to be included in the financial statements, it should continue to apply ASC 740 on the basis of the provisions of the tax laws that were in effect immediately before the enactment of the 2017 Tax Act.

At June 30, 2018, we have not completed our accounting for the tax effects of the 2017 Tax Act. The impact of the 2017 Tax Act is expected to require further adjustments in 2018 due to anticipated additional guidance from the U.S. Department of the Treasury, changes in our assumptions, completion of 2017 U.S. and foreign tax returns and further information and interpretations that become available. However, we have made and recorded reasonable estimates of

significant items including: (1) the effects on our existing deferred tax balances, (2) the remeasurement of deferred taxes on foreign unremitted earnings and (3) the one-time transition tax. We will make adjustments to these provisional estimates as new information becomes available during the one year measurement period. Our analyses of the 2017 Tax Act will continue throughout 2018 and will be completed when we file all U.S. and foreign tax returns.

In connection with our initial analysis of the 2017 Tax Act, we recognized a provisional deferred tax benefit of \$437.9 million at December 31, 2017. This benefit included: (1) a provisional \$315.8 million deferred tax benefit to reflect the reduction of the U.S. corporate tax rate from 35% to 21% and (2) a provisional \$122.1 million deferred tax benefit to reflect an estimated reduction of \$162.6 million in our deferred tax liability on unremitted foreign earnings partially offset by an estimate of the one-time transition tax of \$40.5 million. We expect to utilize existing U.S. federal net operating loss carryforwards and foreign tax credits to fully offset the cash tax impact of the one-time transition tax liability.

Table of Contents

On April 2, 2018, the Internal Revenue Service issued Notice 2018-26 “Questions and Answers about Reporting Related to Section 965 on 2017 Tax Returns.” Based on this additional guidance, we increased our provisional deferred tax benefit from the 2017 Tax Act by \$0.3 million for the six months ended June 30, 2018 to reflect an estimated reduction of the one-time transition tax. For the three and six months ended June 30, 2018, we reduced the provisional deferred tax benefit by \$1.7 million as a result of the estimated impact of filing 2017 U.S. and foreign tax returns.

A provision of the 2017 Tax Act establishes a minimum tax on certain foreign earnings (i.e. global intangible low-taxed income or GILTI). We have not yet completed our analysis of the GILTI tax rules and are still evaluating whether to make a policy election to treat the GILTI tax as a period expense or to provide U.S. deferred taxes on certain foreign differences between the financial statement and tax basis of foreign assets and liabilities. At June 30, 2018 and December 31, 2017, we did not record a deferred tax liability for these differences. We will continue to analyze the impact of GILTI as more guidance is issued and a decision will be made during 2018 on whether to treat the GILTI as a period cost or a deferred tax item.

As of June 30, 2018, we had \$33.2 million of gross unrecognized tax benefits, which would have a net \$32.4 million impact on the effective tax rate, if recognized. As of June 30, 2017, we had \$34.3 million of gross unrecognized tax benefits, of which \$32.8 million would have impacted the effective tax rate, if recognized. The amount of unrecognized tax benefits was as follows:

	June 30,	
	2018	2017
	(\$ in millions)	
Balance at beginning of year	\$36.3	\$38.4
Increases for prior year tax positions	—	4.9
Decreases for prior year tax positions	(4.1 )	(9.2 )
Increases for current year tax positions	1.0	1.4
Settlement with taxing authorities	—	(1.0 )
Reductions due to statute of limitations	—	(0.2 )
Balance at end of period	\$33.2	\$34.3

As of June 30, 2018, we believe it is reasonably possible that our total amount of unrecognized tax benefits will decrease by approximately \$5.7 million over the next twelve months. The anticipated reduction primarily relates to settlements with taxing authorities and the expiration of federal, state and foreign statutes of limitation.

We operate globally and file income tax returns in numerous jurisdictions. Our tax returns are subject to examination by various federal, state and local tax authorities. None of our U.S. federal income tax returns are currently under examination by the IRS. We believe we have adequately provided for all tax positions; however, amounts asserted by taxing authorities could be greater than our accrued position. For our primary tax jurisdictions, the tax years that remain subject to examination are as follows:

	Tax Years
U.S. federal income tax	2013 - 2017
U.S. state income tax	2006 - 2017
Canadian federal income tax	2012 - 2017
Brazil	2014 - 2017
Germany	2015 - 2017
China	2014 - 2017
The Netherlands	2014 - 2017

Table of Contents

## DERIVATIVE FINANCIAL INSTRUMENTS

We are exposed to market risk in the normal course of our business operations due to our purchases of certain commodities, our ongoing investing and financing activities and our operations that use foreign currencies. The risk of loss can be assessed from the perspective of adverse changes in fair values, cash flows and future earnings. We have established policies and procedures governing our management of market risks and the use of financial instruments to manage exposure to such risks. ASC 815 “Derivatives and Hedging” (ASC 815) requires an entity to recognize all derivatives as either assets or liabilities in the condensed balance sheets and measure those instruments at fair value. In accordance with ASC 815, we designate derivative contracts as cash flow hedges of forecasted purchases of commodities and forecasted interest payments related to variable-rate borrowings and designate certain interest rate swaps as fair value hedges of fixed-rate borrowings. We do not enter into any derivative instruments for trading or speculative purposes.

Energy costs, including electricity and natural gas, and certain raw materials used in our production processes are subject to price volatility. Depending on market conditions, we may enter into futures contracts, forward contracts, commodity swaps and put and call option contracts in order to reduce the impact of commodity price fluctuations. The majority of our commodity derivatives expire within one year.

We actively manage currency exposures that are associated with net monetary asset positions, currency purchases and sales commitments denominated in foreign currencies and foreign currency denominated assets and liabilities created in the normal course of business. We enter into forward sales and purchase contracts to manage currency risk to offset our net exposures, by currency, related to the foreign currency denominated monetary assets and liabilities of our operations. At June 30, 2018, we had outstanding forward contracts to buy foreign currency with a notional value of \$166.7 million and to sell foreign currency with a notional value of \$114.3 million. All of the currency derivatives expire within one year and are for U.S. dollar (USD) equivalents. The counterparties to the forward contracts are large financial institutions; however, the risk of loss to us in the event of nonperformance by a counterparty could be significant to our financial position or results of operations. At December 31, 2017, we had outstanding forward contracts to buy foreign currency with a notional value of \$135.5 million and to sell foreign currency with a notional value of \$97.7 million. At June 30, 2017, we had outstanding forward contracts to buy foreign currency with a notional value of \$71.8 million and to sell foreign currency with a notional value of \$90.4 million.

## Cash flow hedges

For derivative instruments that are designated and qualify as a cash flow hedge, the change in fair value of the derivative is recognized as a component of other comprehensive income (loss) until the hedged item is recognized in earnings. Gains and losses on the derivatives representing hedge ineffectiveness are recognized currently in earnings.

We had the following notional amounts of outstanding commodity contracts that were entered into to hedge forecasted purchases:

	June 30, 2018	December 31, 2017	June 30, 2017
	(\$ in millions)		
Natural gas	\$79.6	\$ 39.2	\$45.0
Copper	50.9	45.2	42.8
Zinc	8.6	8.4	7.9

As of June 30, 2018, the counterparties to these commodity contracts were Wells Fargo Bank, N.A. (Wells Fargo), Citibank, Merrill Lynch Commodities, Inc. and JPMorgan Chase Bank, National Association, all of which are major

financial institutions.

We use cash flow hedges for certain raw material and energy costs such as copper, zinc, lead, electricity and natural gas to provide a measure of stability in managing our exposure to price fluctuations associated with forecasted purchases of raw materials and energy used in our manufacturing process. At June 30, 2018, we had open positions in futures contracts through 2022. If all open futures contracts had been settled on June 30, 2018, we would have recognized a pretax gain of \$3.4 million.

If commodity prices were to remain at June 30, 2018 levels, approximately \$1.1 million of deferred gains would be reclassified into earnings during the next twelve months. The actual effect on earnings will be dependent on actual commodity prices when the forecasted transactions occur.

Table of Contents

We use interest rate swaps as a means of minimizing cash flow fluctuations that may arise from volatility in interest rates of our variable-rate borrowings. In April 2016, we entered into three tranches of forward starting interest rate swaps whereby we agreed to pay fixed rates to the counterparties who, in turn, pay us floating rates on \$1,100.0 million, \$900.0 million, and \$400.0 million of our underlying floating-rate debt obligations. Each tranche's term length is for twelve months beginning on December 31, 2016, December 31, 2017 and December 31, 2018, respectively. The counterparties to the agreements are SMBC Capital Markets, Inc., Wells Fargo, PNC Bank, National Association and Toronto-Dominion Bank. These counterparties are large financial institutions; however, the risk of loss to us in the event of nonperformance by a counterparty could be significant to our financial position or results of operations. We have designated the swaps as cash flow hedges of the risk of changes in interest payments associated with our variable-rate borrowings. Accordingly, the outstanding swap agreements have been recorded at their fair market value of \$11.2 million and are included in other current assets and other assets on the accompanying condensed balance sheet as of June 30, 2018, with the corresponding gain deferred as a component of other comprehensive loss. For the three months ended June 30, 2018 and 2017, \$2.1 million and \$0.5 million, respectively, and for the six months ended June 30, 2018 and 2017, \$3.4 million and \$0.5 million, respectively, of income was recorded to interest expense on the accompanying condensed statements of operations related to these swap agreements.

At June 30, 2018, we had open interest rate swaps designated as cash flow hedges with maximum terms through 2019. If all open interest rate swap contracts had been settled on June 30, 2018, we would have recognized a pretax gain of \$11.2 million.

If interest rates were to remain at June 30, 2018 levels, \$6.3 million of deferred gains would be reclassified into earnings during the next twelve months. The actual effect on earnings will be dependent on actual interest rates when the forecasted transactions occur.

#### Fair value hedges

We use interest rate swaps as a means of managing interest expense and floating interest rate exposure to optimal levels. For derivative instruments that are designated and qualify as a fair value hedge, the gain or loss on the derivative as well as the offsetting loss or gain on the hedged item attributable to the hedged risk are recognized in current earnings. We include the gain or loss on the hedged items (fixed-rate borrowings) in the same line item, interest expense, as the offsetting loss or gain on the related interest rate swaps. As of June 30, 2018, December 31, 2017 and June 30, 2017, the total notional amounts of our interest rate swaps designated as fair value hedges were \$500.0 million.

In April 2016, we entered into interest rate swaps on \$250.0 million of our underlying fixed-rate debt obligations, whereby we agreed to pay variable rates to the counterparties who, in turn, pay us fixed rates. The counterparties to these agreements are Toronto-Dominion Bank and SMBC Capital Markets, Inc., both of which are major financial institutions.

In October 2016, we entered into interest rate swaps on an additional \$250.0 million of our underlying fixed-rate debt obligations, whereby we agreed to pay variable rates to the counterparties who, in turn, pay us fixed rates. The counterparties to these agreements are PNC Bank, National Association and Wells Fargo, both of which are major financial institutions.

We have designated the April 2016 and October 2016 interest rate swap agreements as fair value hedges of the risk of changes in the value of fixed-rate debt due to changes in interest rates for a portion of our fixed-rate borrowings. Accordingly, the swap agreements have been recorded at their fair market value of \$44.1 million and are included in other long-term liabilities on the accompanying condensed balance sheet as of June 30, 2018, with a corresponding

decrease in the carrying amount of the related debt. For the three and six months ended June 30, 2018, \$0.5 million and \$0.3 million, respectively, of expense and for the three and six months ended June 30, 2017, \$0.7 million and \$1.9 million, respectively, of income was recorded to interest expense on the accompanying condensed statements of operations related to these swap agreements.

#### Financial statement impacts

We present our derivative assets and liabilities in our condensed balance sheets on a net basis whenever we have a legally enforceable master netting agreement with the counterparty to our derivative contracts. We use these agreements to manage and substantially reduce our potential counterparty credit risk.

Table of Contents

The following table summarizes the location and fair value of the derivative instruments on our condensed balance sheets. The table disaggregates our net derivative assets and liabilities into gross components on a contract-by-contract basis before giving effect to master netting arrangements:

	June 30, 2018	December 31, 2017	June 30, 2017
	(\$ in millions)		
Asset Derivatives:			
Other current assets			
Derivatives designated as hedging instruments:

(1) Does not include the impact of cash collateral received from or provided to counterparties.

Table of Contents

The following table summarizes the effects of derivative instruments on our condensed statements of operations:

		Amount of (Loss) Gain			
		Three Months		Six Months	
		Ended June		Ended	
		30,		June 30,	
Location of (Loss) Gain		2018	2017	2018	2017
		(\$ in millions)			
Derivatives – Cash Flow Hedges					
Recognized in other comprehensive income (effective portion):					
Commodity contracts	_____	\$(1.5)	\$(2.4)	\$(2.5)	\$(7.4)
Interest rate contracts	_____	1.1	(1.3)	4.2	0.6
		\$(0.4)	\$(3.7)	\$1.7	\$(6.8)
Reclassified from accumulated other comprehensive loss into income (effective portion):					
Interest rate contracts	Interest expense	\$2.1	\$0.5	\$3.4	\$0.5
Commodity contracts	Cost of goods sold	0.6	1.8	1.6	1.9
		\$2.7	\$2.3	\$5.0	\$2.4
Derivatives – Fair Value Hedges					
Interest rate contracts	Interest expense	\$(0.5)	\$0.8	\$(0.3)	\$2.0
Derivatives Not Designated as Hedging Instruments					
Foreign exchange contracts	Selling and administration	\$(1.1)	\$5.0	\$(0.6)	\$0.5

The ineffective portion of changes in fair value resulted in zero charged or credited to earnings for the three and six months ended June 30, 2018 and 2017.

#### Credit risk and collateral

By using derivative instruments, we are exposed to credit and market risk. If a counterparty fails to fulfill its performance obligations under a derivative contract, our credit risk will equal the fair value gain in a derivative. Generally, when the fair value of a derivative contract is positive, this indicates that the counterparty owes us, thus creating a repayment risk for us. When the fair value of a derivative contract is negative, we owe the counterparty and, therefore, assume no repayment risk. We minimize the credit (or repayment) risk in derivative instruments by entering into transactions with high-quality counterparties. We monitor our positions and the credit ratings of our counterparties, and we do not anticipate nonperformance by the counterparties.

Based on the agreements with our various counterparties, cash collateral is required to be provided when the net fair value of the derivatives, with the counterparty, exceeds a specific threshold. If the threshold is exceeded, cash is either provided by the counterparty to us if the value of the derivatives is our asset, or cash is provided by us to the counterparty if the value of the derivatives is our liability. As of June 30, 2018, December 31, 2017 and June 30, 2017, this threshold was not exceeded. In all instances where we are party to a master netting agreement, we offset the receivable or payable recognized upon payment of cash collateral against the fair value amounts recognized for derivative instruments that have also been offset under such master netting agreements.

Table of Contents

FAIR VALUE MEASUREMENTS

Fair value is defined as the price at which an asset could be exchanged in a current transaction between knowledgeable, willing parties or the amount that would be paid to transfer a liability to a new obligor, not the amount that would be paid to settle the liability with the creditor. Where available, fair value is based on observable market prices or parameters or derived from such prices or parameters. Where observable prices or inputs are not available, valuation models are applied. These valuation techniques involve some level of management estimation and judgment, the degree of which is dependent on the price transparency for the instruments or market and the instruments' complexity.

Assets and liabilities recorded at fair value in the condensed balance sheets are categorized based upon the level of judgment associated with the inputs used to measure their fair value. Hierarchical levels, defined by ASC 820 "Fair Value Measurements and Disclosures" (ASC 820) are directly related to the amount of subjectivity associated with the inputs to fair valuation of these assets and liabilities, and are as follows:

Level 1 — Inputs were unadjusted, quoted prices in active markets for identical assets or liabilities at the measurement date.

Level 2 — Inputs (other than quoted prices included in Level 1) were either directly or indirectly observable for the asset or liability through correlation with market data at the measurement date and for the duration of the instrument's anticipated life.

Level 3 — Inputs reflected management's best estimate of what market participants would use in pricing the asset or liability at the measurement date. Consideration was given to the risk inherent in the valuation technique and the risk inherent in the inputs to the model.

We are required to separately disclose assets and liabilities measured at fair value on a recurring basis, from those measured at fair value on a nonrecurring basis. Nonfinancial assets measured at fair value on a nonrecurring basis are intangible assets and goodwill, which are reviewed for impairment annually in the fourth quarter and/or when circumstances or other events indicate that impairment may have occurred.

Table of Contents

Determining which hierarchical level an asset or liability falls within requires significant judgment. We evaluate our hierarchy disclosures each quarter. The following table summarizes the assets and liabilities measured at fair value in the condensed balance sheets:

	Fair Value Measurements		
	Level 1	Level 2	Level 3
Balance at June 30, 2018	1	2	3
	Total		
Assets	(\$ in millions)		
Interest rate swaps	\$-11.2	\$	-\$11.2
Commodity contracts	-4.3	—	4.3
Foreign exchange contracts	-1.2	—	1.2
Liabilities			
Interest rate swaps	\$-44.1	\$	-\$44.1
Commodity contracts	-0.9	—	0.9
Foreign exchange contracts	-0.5	—	0.5
Balance at December 31, 2017			
Assets			
Interest rate swaps	\$-10.5	\$	-\$10.5
Commodity contracts	-11.3	—	11.3
Foreign exchange contracts	-1.0	—	1.0
Liabilities			
Interest rate swaps	\$-28.1	\$	-\$28.1
Commodity contracts	-3.8	—	3.8
Balance at June 30, 2017			
Assets			
Interest rate swaps	\$-9.6	\$	-\$9.6
Commodity contracts	-4.0	—	4.0
Foreign exchange contracts	-1.2	—	1.2
Liabilities			
Interest rate swaps	\$-25.0	\$	-\$25.0
Commodity contracts	-2.2	—	2.2

For the six months ended June 30, 2018, there were no transfers into or out of Level 1, Level 2 or Level 3.

**Interest Rate Swaps**

Interest rate swap financial instruments were valued using the “income approach” valuation technique. This method used valuation techniques to convert future amounts to a single present amount. The measurement was based on the value indicated by current market expectations about those future amounts. We use interest rate swaps as a means of managing interest expense and floating interest rate exposure to optimal levels.

**Commodity Forward Contracts**

Commodity contract financial instruments were valued primarily based on prices and other relevant information observable in market transactions involving identical or comparable assets or liabilities including both forward and spot prices for commodities. We use commodity derivative contracts for certain raw materials and energy costs such as copper, zinc, lead, electricity and natural gas to provide a measure of stability in managing our exposure to price fluctuations.

## Foreign Currency Contracts

Foreign currency contract financial instruments were valued primarily based on relevant information observable in market transactions involving identical or comparable assets or liabilities including both forward and spot prices for currencies. We enter into forward sales and purchase contracts to manage currency risk resulting from purchase and sale commitments denominated in foreign currencies.

Table of Contents

## Financial Instruments

The carrying values of cash and cash equivalents, accounts receivable and accounts payable approximated fair values due to the short-term maturities of these instruments. The fair value of our long-term debt was determined based on current market rates for debt of similar risk and maturities. The following table summarizes the fair value measurements of debt and the actual debt recorded on our condensed balance sheets:

	Fair Value Measurements			Amount recorded on balance sheets	
	Level 1	Level 2	Level 3	Total	
	(\$ in millions)				
Balance at June 30, 2018	\$—	\$3,521.6	\$153.0	\$3,674.6	\$3,513.5
Balance at December 31, 2017	—	3,758.0	153.0	3,911.0	3,612.0
Balance at June 30, 2017	—	3,777.8	153.0	3,930.8	3,600.6

## Nonrecurring Fair Value Measurements

In addition to assets and liabilities that are recorded at fair value on a recurring basis, we record assets and liabilities at fair value on a nonrecurring basis as required by ASC 820. There were no assets measured at fair value on a nonrecurring basis as of June 30, 2018, December 31, 2017 and June 30, 2017.

## SUPPLEMENTAL GUARANTOR FINANCIAL INFORMATION

In October 2015, Blue Cube Spinco LLC (the Issuer) issued \$720.0 million aggregate principal amount of 9.75% senior notes due October 15, 2023 (2023 Notes) and \$500.0 million aggregate principal amount of 10.00% senior notes due October 15, 2025 (2025 Notes and, together with the 2023 Notes, the Notes). During 2016, the Notes were registered under the Securities Act of 1933, as amended. The Issuer was formed on March 13, 2015 as a wholly owned subsidiary of DowDuPont and upon closing of the Acquisition became a 100% owned subsidiary of Olin (the Parent Guarantor). The Exchange Notes are fully and unconditionally guaranteed by the Parent Guarantor.

The following condensed consolidating financial information presents the condensed consolidating balance sheets as of June 30, 2018, December 31, 2017 and June 30, 2017, the related condensed consolidating statements of operations, comprehensive income (loss) for each of the three and six months ended June 30, 2018 and 2017, and the related statements of cash flows for the six months ended June 30, 2018 and 2017, of (a) the Parent Guarantor, (b) the Issuer, (c) the non-guarantor subsidiaries, (d) elimination entries necessary to consolidate the Parent Guarantor with the Issuer and the non-guarantor subsidiaries and (e) Olin on a consolidated basis. Investments in consolidated subsidiaries are presented under the equity method of accounting.

## Table of Contents

### Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations.

#### Business Background

We are a leading vertically-integrated global manufacturer and distributor of chemical products and a leading U.S. manufacturer of ammunition. Our operations are concentrated in three business segments: Chlor Alkali Products and Vinyls, Epoxy and Winchester. All of our business segments are capital intensive manufacturing businesses. Chlor Alkali Products and Vinyls operating rates are closely tied to the general economy. Each segment has a commodity element to it, and therefore, our ability to influence pricing is quite limited on the portion of the segment's business that is strictly commodity.

Our Chlor Alkali Products and Vinyls segment is a commodity business where all supplier products are similar and price is the major supplier selection criterion. We have little or no ability to influence prices in the large, global commodity markets. Our Chlor Alkali Products and Vinyls segment produces some of the most widely used chemicals in the world that can be upgraded into a wide variety of downstream chemical products used in many end-markets. Cyclical price swings, driven by changes in supply/demand, can be abrupt and significant and, given capacity in our Chlor Alkali Products and Vinyls segment, can lead to very significant changes in our overall profitability.

The Epoxy segment consumes products manufactured by the Chlor Alkali Products and Vinyls segment. The Epoxy segment's upstream and midstream products are predominately commodity markets. We have little or no ability to influence prices in these large, global commodity markets. While competitive differentiation exists through downstream customization and product development opportunities, pricing is extremely competitive with a broad range of competitors across the globe.

Winchester also has a commodity element to its business, but a majority of Winchester ammunition is sold as a branded consumer product where there are opportunities to differentiate certain offerings through innovative new product development and enhanced product performance. While competitive pricing versus other branded ammunition products is important, it is not the only factor in product selection.

#### Executive Summary

##### 2018 Overview

Net income was \$58.6 million and \$79.5 million for the three and six months ended June 30, 2018, respectively, compared to a net loss of \$5.9 million and net income of \$7.5 million for the comparable prior year periods. The increase in results from the prior year was due to improved Chlor Alkali Products and Vinyls and Epoxy segment results, primarily due to higher product prices. These increases were partially offset by lower Winchester segment results and increased costs associated with the Information Technology Project. In 2017, we began a multi-year implementation of new enterprise resource planning, manufacturing, and engineering systems. The project includes the required information technology infrastructure (collectively, the Information Technology Project). Net income for the three and six months ended June 30, 2018 included a \$21.5 million non-cash impairment charge associated with our investment in a non-consolidated affiliate. Net income for the six months ended June 30, 2018 also included an \$8.0 million pretax gain from an insurance recovery resulting from a second quarter 2017 Freeport, TX vinyl chloride monomer facility business interruption claim.

Chlor Alkali Products and Vinyls generated segment income of \$149.4 million and \$279.9 million for the three and six months ended June 30, 2018, respectively. Chlor Alkali Products and Vinyls segment income was higher than in the comparable prior year periods due to higher product prices, lower ethylene costs associated with the acquisition of additional cost based ethylene from DowDuPont in late September 2017 and lower maintenance turnaround costs. The

higher product prices were primarily due to increased caustic soda, chlorine and other chlorine-derivatives pricing, partially offset by lower ethylene dichloride (EDC) pricing. Chlor Alkali Products and Vinyls segment income was negatively impacted by higher costs, including raw material costs, freight and depreciation and amortization expense. Chlor Alkali Products and Vinyl segment income for the three months ended June 30, 2018 was favorably impacted by higher volumes while segment income for the six months ended June 30, 2018 was negatively impacted by lower volumes. Chlor Alkali Products and Vinyls segment income was also negatively impacted by a \$21.5 million non-cash impairment charge associated with our investment in a non-consolidated affiliate. Chlor Alkali Products and Vinyls segment income included depreciation and amortization expense of \$119.4 million and \$106.6 million for the three months ended June 30, 2018 and 2017, respectively, and \$233.1 million and \$211.2 million for the six months ended June 30, 2018 and 2017, respectively.

For the three months ended June 30, 2018, we recorded a \$21.5 million non-cash impairment charge related to an adjustment to the value of our 9.1% limited partnership interest in Bay Gas Storage Company, Ltd. (BayGas). BayGas owns,

## Table of Contents

leases and operates underground gas storage and related pipeline facilities which are used to provide storage in the McIntosh, AL area and delivery of natural gas. The general partner, Sempra Energy (Sempra), announced in the second quarter its plan to sell several assets including its 90.9% interest in BayGas. In connection with this decision, Sempra recorded an impairment charge related to BayGas adjusting the related assets' carrying values to an estimated fair value. We recorded a reduction in our investment in the non-consolidated affiliate for the proportionate share of the non-cash impairment charge. Olin has no other non-consolidated affiliates.

During 2017, North America caustic soda price contract indices increased \$140 per ton and the caustic soda export price indices increased approximately \$260 per metric ton creating positive pricing momentum entering 2018. In the first and second quarters of 2018, North America caustic soda price contract indices increased an additional \$90 per ton while the caustic soda export price indices decreased \$50 per metric ton. During May 2018, a caustic soda price increase of \$40 per ton was announced. This price increase is in the process of being implemented and while the extent to which this price increase is achieved is uncertain, the majority of the benefits, if realized, would impact third and fourth quarters 2018 results.

Epoxy reported segment income of \$24.8 million and \$2.7 million for the three and six months ended June 30, 2018, respectively. Epoxy segment results were higher than in the comparable prior year periods primarily due to higher product prices, partially offset by increased raw material costs, primarily associated with benzene and propylene, and lower volumes. Epoxy segment results for the six months ended June 30, 2018 were negatively impacted by \$45.6 million of additional maintenance costs and unabsorbed fixed manufacturing costs associated with maintenance turnarounds, which were primarily related to an approximately two-month planned maintenance turnaround at our production facilities in Freeport, TX. Epoxy segment income included depreciation and amortization expense of \$25.1 million and \$22.8 million for the three months ended June 30, 2018 and 2017, respectively, and \$51.8 million and \$45.2 million for the six months ended June 30, 2018 and 2017, respectively.

Winchester reported segment income of \$11.8 million and \$23.8 million for the three and six months ended June 30, 2018, respectively. Winchester segment income declined from the comparable prior year periods primarily due to increased commodity and other material costs and a less favorable product mix. Winchester segment income included depreciation and amortization expense of \$4.9 million and \$4.5 million for the three months ended June 30, 2018 and 2017, respectively, and \$10.0 million and \$9.4 million for the six months ended June 30, 2018 and 2017, respectively.

For the six months ended June 30, 2018, we made long-term debt repayments, net of long-term debt borrowings, of \$80.1 million. On January 19, 2018, Olin issued \$550.0 million aggregate principal amount of 5.00% senior notes due February 1, 2030 (2030 Notes), which were registered under the Securities Act of 1933, as amended. Proceeds from the 2030 Notes were used to redeem \$550.0 million of debt under the \$1,375.0 million Term Loan Facility. This prepayment of the Term Loan Facility eliminates the required quarterly installments under the Term Loan Facility.

On April 26, 2018, our board of directors authorized a share repurchase program for the purchase of shares of common stock at an aggregate price of up to \$500.0 million. This program will terminate upon the purchase of \$500.0 million of our common stock. For the six months ended June 30, 2018, 0.3 million shares were repurchased and retired at a cost of \$9.1 million.

## Three Months Ended June 30, 2018 Compared to Three Months Ended June 30, 2017

Sales for the three months ended June 30, 2018 were \$1,728.4 million compared to \$1,526.5 million in the same period last year, an increase of \$201.9 million, or 13%. Chlor Alkali Products and Vinyls sales increased by \$153.6 million, primarily due to increased caustic soda, chlorine and other chlorine-derivatives pricing, and higher volumes partially offset by lower EDC pricing. Epoxy sales increased by \$51.8 million primarily due to higher product prices, partially offset by lower volumes. Winchester sales decreased by \$3.5 million primarily due to lower sales to commercial customers partially offset by higher sales to military customers and law enforcement agencies.

Gross margin increased \$149.1 million compared to the three months ended June 30, 2017. Chlor Alkali Products and Vinyls gross margin increased by \$122.5 million, primarily due to higher product pricing and increased volumes, partially offset by increased raw material and freight costs. Epoxy gross margin increased \$39.5 million primarily due to higher product prices offset by increased raw material costs, primarily associated with benzene and propylene, and lower volumes. Winchester gross margin decreased \$7.1 million primarily due to increased commodity and other material costs and a less favorable product mix. Gross margin as a percentage of sales increased to 15% in 2018 from 8% in 2017.

Selling and administration expenses for the three months ended June 30, 2018 were \$110.3 million, an increase of \$25.5 million from the prior year. The increase was due to higher incentive compensation expense of \$6.4 million and increased legal and legal-related settlement expenses of \$4.3 million. Selling and administration expenses for the three months ended June 30, 2018 also included costs of \$11.5 million associated with the Information Technology Project. Selling and administration expenses as a percentage of sales were 6% in both 2018 and 2017.

## Table of Contents

Restructuring charges for the three months ended June 30, 2018 and 2017 of \$6.4 million and \$8.5 million, respectively, were primarily associated with the March 2016 closure of 433,000 tons of chlor alkali capacity across three separate locations.

Acquisition-related costs of \$0.3 million and \$4.4 million for the three months ended June 30, 2018 and 2017, respectively, were related to the integration of the Acquired Business, and consisted of advisory, legal, accounting and other professional fees.

Earnings (losses) of non-consolidated affiliates decreased by \$21.6 million for the three months ended June 30, 2018 which reflect a \$21.5 million non-cash impairment charge.

Interest expense increased by \$8.6 million for the three months ended June 30, 2018, primarily due to higher interest rates and \$4.0 million of accretion expense related to the 2020 ethylene payment discount, partially offset by a lower level of debt outstanding.

Non-operating pension income includes all components of pension and other postretirement income (costs) other than service costs. Non-operating pension income was lower for the three months ended June 30, 2018 primarily due to an increase in the amortization of actuarial losses.

The effective tax rate for the three months ended June 30, 2018 included a benefit associated with stock-based compensation, a benefit from a change in tax contingencies, an expense associated with the estimated reduction of the one-time 2017 Tax Act provisional tax benefit, an expense from a net increase in the valuation allowance related to foreign net operating losses and an expense from the remeasurement of deferred taxes due to an increase in our state effective tax rates. These factors resulted in a net \$1.5 million tax benefit. After giving consideration to these items, the effective tax rate for the three months ended June 30, 2018 of 23.1% was higher than the 21% U.S. federal statutory rate, primarily due to state and foreign income taxes, partially offset by favorable permanent salt depletion deductions. The effective tax rate for the three months ended June 30, 2017 included benefits associated with an agreement reached with the Internal Revenue Service (IRS) for the years 2008, 2010 to 2012 tax examinations and stock-based compensation. These factors resulted in a net \$10.4 million tax benefit. After giving consideration to these items, the effective tax rate for the three months ended June 30, 2017 of 25.2% was lower than the 35% U.S. federal statutory rate, primarily due to favorable permanent tax deduction items, such as the salt depletion deduction and tax deductible dividends paid to the Contributing Employee Ownership Program (CEOP).

## Six Months Ended June 30, 2018 Compared to Six Months Ended June 30, 2017

Sales for the six months ended June 30, 2018 were \$3,438.7 million compared to \$3,093.6 million in the same period last year, an increase of \$345.1 million, or 11%. Chlor Alkali Products and Vinyls sales increased by \$252.8 million, primarily due to increased caustic soda, chlorine and other chlorine-derivatives pricing, partially offset by lower EDC pricing and lower volumes and a less favorable product mix. Epoxy sales increased by \$87.5 million primarily due to higher product prices, partially offset by lower volumes. Winchester sales increased by \$4.8 million primarily due to higher sales to military customers and law enforcement agencies, partially offset by lower sales to commercial customers.

Gross margin increased \$161.1 million compared to the six months ended June 30, 2017. Chlor Alkali Products and Vinyls gross margin increased by \$166.5 million, primarily due to higher product pricing partially offset by increased raw material and freight costs and lower volumes. Epoxy gross margin increased \$21.6 million primarily due to higher product prices, partially offset by the cost of an approximately two-month planned maintenance turnaround at our production facilities in Freeport, TX, which also reduced volumes. Epoxy gross margin was also negatively impacted by increased raw material costs, primarily associated with benzene and propylene. Winchester gross margin decreased

\$20.4 million primarily due to increased commodity and other material costs, a less favorable product mix and lower selling prices. Gross margin as a percentage of sales increased to 13% in 2018 from 9% in 2017.

Selling and administration expenses for the six months ended June 30, 2018 were \$210.8 million, an increase of \$33.1 million from the prior year. The increase was due to higher legal and legal-related settlement expenses of \$9.3 million and increased incentive compensation expense of \$7.5 million, partially offset by lower stock-based compensation expense of \$6.1 million, which includes mark-to-market adjustments. Selling and administration expenses for the six months ended June 30, 2018 also included costs of \$18.0 million associated with the Information Technology Project. Selling and administration expenses as a percentage of sales were 6% in both 2018 and 2017.

Table of Contents

Restructuring charges for the six months ended June 30, 2018 and 2017 of \$10.4 million and \$16.7 million, respectively, were primarily associated with the March 2016 closure of 433,000 tons of chlor alkali capacity across three separate locations.

Acquisition-related costs of \$0.6 million and \$11.4 million for the six months ended June 30, 2018 and 2017, respectively, were related to the integration of the Acquired Business, and consisted of advisory, legal, accounting and other professional fees.

Other operating income (expense) for the six months ended June 30, 2018 included an \$8.0 million insurance recovery for a second quarter 2017 business interruption at our Freeport, TX vinyl chloride monomer facility.

Earnings (losses) of non-consolidated affiliates decreased by \$21.6 million for the six months ended June 30, 2018 which reflect a \$21.5 million non-cash impairment charge.

Interest expense increased by \$19.9 million for the six months ended June 30, 2018, primarily due to higher interest rates and \$7.9 million of accretion expense related to the 2020 ethylene payment discount, partially offset by a lower level of debt outstanding.

Non-operating pension income includes all components of pension and other postretirement income (costs) other than service costs. Non-operating pension income was lower for the six months ended June 30, 2018 primarily due to an increase in the amortization of actuarial losses.

The effective tax rate for the six months ended June 30, 2018 included a benefit associated with stock-based compensation, a benefit from a change in tax contingencies, a benefit related to a foreign dividend payment, an expense associated with the estimated reduction of the one-time 2017 Tax Act provisional tax benefit, an expense from a net increase in the valuation allowance related to foreign net operating losses and an expense from the remeasurement of deferred taxes due to an increase in our state effective tax rates. These factors resulted in a net \$2.3 million tax benefit. After giving consideration to these items, the effective tax rate for the six months ended June 30, 2018 of 24.2% was higher than the 21% U.S. federal statutory rate primarily due to state and foreign income taxes, partially offset by favorable permanent salt depletion deductions. The effective tax rate for the six months ended June 30, 2017 included benefits associated with an agreement reached with the IRS for the years 2008, 2010 to 2012 tax examinations and stock-based compensation and an expense related to prior year tax positions. These factors resulted in a net \$10.9 million tax benefit. After giving consideration to these items, the effective tax rate for the six months ended June 30, 2017 of 12.8% was lower than the 35% U.S. federal statutory rate, primarily due to favorable permanent tax deduction items, such as the salt depletion deduction and tax deductible dividends paid to the CEOP.

Table of Contents

## Segment Results

We define segment results as income (loss) before interest expense, interest income, other operating income (expense), non-operating pension income and income taxes, and includes the operating results of non-consolidated affiliates. Consistent with the guidance in Accounting Standards Codification (ASC) 280, "Segment Reporting," we have determined it is appropriate to include the operating results of non-consolidated affiliates in the relevant segment financial results. We have three operating segments: Chlor Alkali Products and Vinyls, Epoxy and Winchester. The three operating segments reflect the organization used by our management for purposes of allocating resources and assessing performance. Chlorine used in our Epoxy segment is transferred at cost from the Chlor Alkali Products and Vinyls segment. Sales and profits are recognized in the Chlor Alkali Products and Vinyls segment for all caustic soda generated and sold by Olin.

	Three Months Ended		Six Months Ended	
	June 30,		June 30,	
	2018	2017	2018	2017
Sales:	(\$ in millions)

Epoxy	24.8	(8.1)	2.7	(9.3)
Winchester	11.8	19.0	23.8	44.1
Corporate/other:				
Environmental expense	(4.4)	(1.8)	(6.7)	(4.4)
Other corporate and unallocated costs <sup>(2)</sup>	(45.3)	(27.6)	(81.8)	(59.2)
Restructuring charges <sup>(3)</sup>	(6.4)	(8.5)	(10.4)	(16.7)
Acquisition-related costs <sup>(4)</sup>	(0.3)	(4.4)	(0.6)	(11.4)
Other operating income (expense) <sup>(5)</sup>	—	0.3	8.1	(0.1)
Interest expense <sup>(6)</sup>	(61.1)	(52.5)	(124.8)	(104.9)
Interest income	0.4	0.4	0.8	0.6
Non-operating pension income <sup>(7)</sup>	5.4	8.6	10.8	17.1
Income (loss) before taxes	\$74.3	\$(21.8)	\$101.8	\$(3.9)

Earnings (losses) of non-consolidated affiliates are included in the Chlor Alkali Products and Vinyls segment results consistent with management's monitoring of the operating segments. The losses of non-consolidated affiliates were \$21.1 million and \$20.6 million for the three and six months ended June 30, 2018, respectively, which reflect a \$21.5 million non-cash impairment charge recorded during the second quarter. The earnings of non-consolidated affiliates were \$0.5 million and \$1.0 million for the three and six months ended June 30, 2017, respectively.

(2) Other corporate and unallocated costs for the three and six months ended June 30, 2018 included costs associated with the Information Technology Project of \$11.5 million and \$18.0 million, respectively.

(3) Restructuring charges for the three months ended June 30, 2018 and 2017 of \$6.4 million and \$8.5 million, respectively, and for the six months ended June 30, 2018 and 2017 of \$10.4 million and \$16.7 million, respectively, were primarily associated with the March 2016 closure of 433,000 tons of chlor alkali capacity across three separate locations.

- (4) Acquisition-related costs for both the three and six months ended June 30, 2018 and 2017 were related to the integration of the Acquired Business, and consisted of advisory, legal, accounting and other professional fees.
- (5) Other operating income (expense) for the six months ended June 30, 2018 included an \$8.0 million insurance recovery for a second quarter 2017 business interruption at our Freeport, TX vinyl chloride monomer facility.

## Table of Contents

- (6) Interest expense for the three and six months ended June 30, 2018 included \$4.0 million and \$7.9 million, respectively, of accretion expense related to the 2020 ethylene payment discount.

- (7) Non-operating pension income reflects the adoption of ASU 2017-07 and includes all components of pension and other postretirement income (costs) other than service costs, which are allocated to the operating segments based on their respective estimated census data. Operating segment results for 2017 have been restated to reflect this accounting change.

### Chlor Alkali Products and Vinyls

#### Three Months Ended June 30, 2018 Compared to Three Months Ended June 30, 2017

Chlor Alkali Products and Vinyls sales for the three months ended June 30, 2018 were \$1,018.7 million compared to \$865.1 million for the same period in 2017, an increase of \$153.6 million, or 18%. The sales increase was primarily due to increased caustic soda, chlorine and other chlorine-derivatives pricing and higher volumes, partially offset by lower EDC pricing. Chlor Alkali Products and Vinyls sales volumes in the second quarter of 2017 were negatively impacted by lost sales associated with maintenance turnarounds and outages.

Chlor Alkali Products and Vinyls segment income was \$149.4 million for the three months ended June 30, 2018 compared to \$52.8 million for the same period in 2017, an increase of \$96.6 million, or 183%. Chlor Alkali Products and Vinyls segment income was higher due to higher product prices (\$129.6 million), higher volumes (\$20.6 million), lower ethylene costs associated with the acquisition of additional cost based ethylene from DowDuPont in late September 2017 (\$8.4 million) and lower maintenance turnaround costs (\$7.0 million). The higher product prices were primarily due to higher caustic soda, chlorine and other chlorine-derivatives pricing, partially offset by lower EDC pricing. Chlor Alkali Products and Vinyls segment income was negatively impacted by higher raw material and freight costs (\$34.7 million) and increased depreciation and amortization expense (\$12.8 million). Chlor Alkali Products and Vinyls segment income was also negatively impacted by a non-cash impairment charge associated with our investment in a non-consolidated affiliate (\$21.5 million). Chlor Alkali Products and Vinyls segment income included depreciation and amortization expense of \$119.4 million and \$106.6 million for the three months ended June 30, 2018 and 2017, respectively.

#### Six Months Ended June 30, 2018 Compared to Six Months Ended June 30, 2017

Chlor Alkali Products and Vinyls sales for the six months ended June 30, 2018 were \$1,954.8 million compared to \$1,702.0 million for the same period in 2017, an increase of \$252.8 million, or 15%. The sales increase was primarily due to increased caustic soda, chlorine and other chlorine-derivatives pricing, partially offset by lower EDC pricing. The higher product prices were partially offset by lower volumes and a less favorable product mix.

Chlor Alkali Products and Vinyls segment income was \$279.9 million for the six months ended June 30, 2018 compared to \$140.3 million for the same period in 2017, an increase of \$139.6 million, or 100%. The increase in Chlor Alkali Products and Vinyls segment income was primarily due to higher product prices (\$274.4 million), lower ethylene costs associated with the acquisition of additional cost based ethylene from DowDuPont in late September 2017 (\$20.7 million) and lower maintenance turnaround costs (\$1.3 million). The higher product prices were primarily due to higher caustic soda, chlorine and other chlorine-derivatives pricing, partially offset by lower EDC pricing. Chlor Alkali Products and Vinyls segment income was negatively impacted by higher raw material and freight costs (\$74.6 million), increased depreciation and amortization expense (\$21.9 million), lower volumes (\$19.6 million) and increased operating costs (\$19.2 million). Chlor Alkali Products and Vinyls segment income was also negatively impacted by a non-cash impairment charge associated with our investment in a non-consolidated affiliate (\$21.5 million). Chlor Alkali Products and Vinyls segment income included depreciation and amortization expense of \$233.1

million and \$211.2 million for the six months ended June 30, 2018 and 2017, respectively.

## Table of Contents

### Epoxy

#### Three Months Ended June 30, 2018 Compared to Three Months Ended June 30, 2017

Epoxy sales for the three months ended June 30, 2018 were \$543.8 million compared to \$492.0 million for the same period in 2017, an increase of \$51.8 million, or 11%. The sales increase was primarily due to higher product prices (\$71.3 million) and a favorable effect of foreign currency translation (\$21.8 million), partially offset by lower volumes (\$41.3 million).

Epoxy segment income was \$24.8 million for the three months ended June 30, 2018 compared to segment loss of \$8.1 million for the same period in 2017, an increase in segment results of \$32.9 million. The increase in Epoxy segment results was primarily due to higher product prices (\$71.3 million) and a favorable effect of foreign currency translation (\$0.9 million), primarily Euros. A significant percentage of our Euro denominated sales are also manufactured within Europe. As a result, the impact of foreign currency translation on revenue is primarily offset by the impact of foreign currency translation on raw materials and manufacturing costs also denominated in Euros. These increases were partially offset by increased raw material costs (\$14.7 million), primarily associated with benzene and propylene, lower volumes (\$10.8 million) and increased operating costs (\$10.7 million), including depreciation and amortization expense. Epoxy segment results were also negatively impacted by higher maintenance costs and unabsorbed fixed manufacturing costs associated with turnarounds and outages (\$3.1 million). Epoxy segment income included depreciation and amortization expense of \$25.1 million and \$22.8 million for the three months ended June 30, 2018 and 2017, respectively.

#### Six Months Ended June 30, 2018 Compared to Six Months Ended June 30, 2017

Epoxy sales for the six months ended June 30, 2018 were \$1,147.1 million compared to \$1,059.6 million for the same period in 2017, an increase of \$87.5 million, or 8%. The sales increase was primarily due to higher product prices (\$125.9 million) and a favorable effect of foreign currency translation (\$62.8 million), partially offset by lower volumes (\$101.2 million). Epoxy sales volumes were negatively impacted by lost sales associated with maintenance turnarounds.

Epoxy segment income was \$2.7 million for the six months ended June 30, 2018 compared to segment loss of \$9.3 million for the same period in 2017, an increase in segment results of \$12.0 million. The increase in Epoxy segment results was primarily due to higher product prices (\$125.9 million) and a favorable effect of foreign currency translation (\$2.9 million), primarily Euros. Epoxy segment results were negatively impacted by higher maintenance costs and unabsorbed fixed manufacturing costs associated with turnarounds and outages (\$45.6 million), increased raw material costs (\$35.8 million), primarily associated with benzene and propylene, lower volumes (\$21.5 million) and increased operating costs (\$13.9 million), including depreciation and amortization expense. Epoxy segment income included depreciation and amortization expense of \$51.8 million and \$45.2 million for the six months ended June 30, 2018 and 2017, respectively.

### Winchester

#### Three Months Ended June 30, 2018 Compared to Three Months Ended June 30, 2017

Winchester sales were \$165.9 million for the three months ended June 30, 2018 compared to \$169.4 million for the same period in 2017, a decrease of \$3.5 million, or 2%. The sales decrease was primarily due to lower ammunition sales to commercial customers (\$11.6 million) partially offset by higher sales to military customers and law enforcement agencies (\$8.1 million).

Winchester segment income was \$11.8 million for the three months ended June 30, 2018 compared to \$19.0 million for the same period in 2017, a decrease of \$7.2 million, or 38%. The decrease was due to higher commodity and other material costs (\$6.5 million) and a less favorable product mix (\$1.3 million). These decreases were partially offset by lower operating costs (\$0.6 million), including depreciation and amortization expense. Winchester segment income included depreciation and amortization expense of \$4.9 million and \$4.5 million for the three months ended June 30, 2018 and 2017, respectively.

## Table of Contents

### Six Months Ended June 30, 2018 Compared to Six Months Ended June 30, 2017

Winchester sales were \$336.8 million for the six months ended June 30, 2018 compared to \$332.0 million for the same period in 2017, an increase of \$4.8 million, or 1%. The sales increase was primarily due to higher sales to military customers and law enforcement agencies (\$23.1 million) partially offset by lower ammunition sales to commercial customers (\$18.3 million).

Winchester segment income was \$23.8 million for the six months ended June 30, 2018 compared to \$44.1 million for the same period in 2017, a decrease of \$20.3 million, or 46%. The decrease was due to higher commodity and other material costs (\$13.4 million), a less favorable product mix (\$5.8 million) and lower product prices (\$2.6 million). These decreases were partially offset by lower operating costs (\$1.5 million), including depreciation and amortization expense. Winchester segment income included depreciation and amortization expense of \$10.0 million and \$9.4 million for the six months ended June 30, 2018 and 2017, respectively.

### Corporate/Other

#### Three Months Ended June 30, 2018 Compared to Three Months Ended June 30, 2017

For the three months ended June 30, 2018, charges to income for environmental investigatory and remedial activities were \$4.4 million compared to \$1.8 million for the three months ended June 30, 2017. These charges related primarily to expected future investigatory and remedial activities associated with past manufacturing operations and former waste disposal sites.

For the three months ended June 30, 2018, other corporate and unallocated costs were \$45.3 million compared to \$27.6 million for the three months ended June 30, 2017, an increase of \$17.7 million. The increase was primarily due to higher costs associated with the Information Technology Project of \$11.5 million and higher legal and legal-related settlement expenses of \$4.3 million.

#### Six Months Ended June 30, 2018 Compared to Six Months Ended June 30, 2017

For the six months ended June 30, 2018, charges to income for environmental investigatory and remedial activities were \$6.7 million compared to \$4.4 million for the six months ended June 30, 2017. These charges related primarily to expected future investigatory and remedial activities associated with past manufacturing operations and former waste disposal sites.

For the six months ended June 30, 2018, other corporate and unallocated costs were \$81.8 million compared to \$59.2 million for the six months ended June 30, 2017, an increase of \$22.6 million. The increase was primarily due to higher costs associated with the Information Technology Project of \$18.0 million and higher legal and legal-related settlement expenses of \$9.3 million, partially offset by lower stock-based compensation expense of \$6.1 million, which includes mark-to-market adjustments.

### Outlook

Net income in 2018 is projected to be in the \$1.50 to \$2.00 per diluted share range, which includes estimated pretax restructuring charges totaling approximately \$20 million and a \$21.5 million non-cash impairment charge associated with our investment in a non-consolidated affiliate. Net income in 2017 was \$3.26 per diluted share, which included a tax benefit of \$437.9 million from the 2017 Tax Act, pretax restructuring charges of \$37.6 million and pretax acquisition-related integration costs of \$12.8 million.

Third quarter 2018 earnings are forecast to improve compared to second quarter 2018. The second quarter, which included approximately \$74 million of planned maintenance turnaround costs, represented the highest pretax earnings since the acquisition of the Acquired Business. We expect the maintenance turnaround costs during the second half of 2018 to decline by approximately \$135 million from first half levels. We expect third quarter 2018 Chlor Alkali Products and Vinyls segment earnings to improve sequentially as we expect improvement in EDC pricing and increased volumes, primarily caustic soda. We expect third quarter 2018 Epoxy segment earnings to improve compared to second quarter 2018 due to lower maintenance turnaround costs and increased volumes, partially offset by higher raw material costs, primarily benzene and propylene.

Chlor Alkali Products and Vinyls 2018 segment income is expected to increase compared to 2017 segment income of \$405.8 million reflecting higher caustic soda, chlorine, and chlorine-derivatives pricing and expected benefits due to lower

Table of Contents

ethylene costs associated with the acquisition of additional cost based ethylene from DowDuPont in late September 2017. Partially offsetting these increases are higher anticipated ethane costs.

Epoxy 2018 segment results are expected to improve from the 2017 segment loss of \$11.8 million as increased volumes and higher product pricing are expected to more than offset higher raw material costs, primarily benzene and propylene, and higher maintenance turnaround expense.

Winchester 2018 segment income is not expected to exceed the \$72.4 million of segment income achieved during 2017 primarily driven by higher commodity and other material costs, lower commercial sales and a less favorable product mix. These decreases are expected to be partially offset by higher levels of military demand.

Other Corporate and Unallocated costs in 2018 are expected to be higher than 2017 Other Corporate and Unallocated costs of \$120.7 million due to higher costs associated with the Information Technology Project and increased legal and litigation costs. Costs associated with the Information Technology Project are estimated to be approximately \$50 million in 2018 compared to \$5.3 million in 2017.

During 2018, we anticipate environmental expenses in the \$15 million to \$20 million range compared to \$8.5 million in 2017. We do not believe that there will be recoveries of environmental costs incurred and expensed in prior periods during 2018.

We expect non-operating pension income in 2018 to be lower than the 2017 level by approximately \$10 million to \$15 million primarily due to higher Pension Benefit Guaranty Corporation fees associated with our domestic qualified defined benefit plan and increased amortization of deferred pension actuarial losses. Based on our plan assumptions and estimates, we will not be required to make any cash contributions to our domestic qualified defined benefit pension plan in 2018. We have several international qualified defined benefit pension plans for which we anticipate cash contributions of less than \$5 million in 2018.

In 2018, we currently expect our capital spending to be in the \$375 million to \$425 million range, including the investment associated with the Information Technology Project of approximately \$100 million. We expect 2018 depreciation and amortization expense to be in the \$590 million to \$610 million range.

We currently believe the 2018 effective tax rate will be approximately 25%, including the impact of the 2017 Tax Act.

Table of Contents

## Environmental Matters

Environmental provisions charged to income, which are included in costs of goods sold, were \$4.4 million and \$1.8 million for the three months ended June 30, 2018 and 2017, respectively, and \$6.7 million and \$4.4 million for the six months ended June 30, 2018 and 2017, respectively.

Our liabilities for future environmental expenditures were as follows:

	June 30,	
	2018	2017
	(\$ in millions)	
Balance at beginning of year	\$131.6	\$137.3
Charges to income	6.7	4.4
Remedial and investigatory spending	(5.5 )	(6.1 )
Foreign currency translation adjustments	(0.3 )	0.1
Balance at end of period	\$132.5	\$135.7

Environmental investigatory and remediation activities spending was associated with former waste disposal sites and past manufacturing operations. Spending in 2018 for investigatory and remedial efforts, the timing of which is subject to regulatory approvals and other uncertainties, is estimated to be approximately \$20 million. Cash outlays for remedial and investigatory activities associated with former waste disposal sites and past manufacturing operations were not charged to income, but instead, were charged to reserves established for such costs identified and expensed to income in prior periods. Associated costs of investigatory and remedial activities are provided for in accordance with generally accepted accounting principles governing probability and the ability to reasonably estimate future costs. Our ability to estimate future costs depends on whether our investigatory and remedial activities are in preliminary or advanced stages. With respect to unasserted claims, we accrue liabilities for costs that, in our experience, we expect to incur to protect our interests against those unasserted claims. Our accrued liabilities for unasserted claims amounted to \$8.7 million at June 30, 2018. With respect to asserted claims, we accrue liabilities based on remedial investigation, feasibility study, remedial action and operation, maintenance and monitoring (OM&M) expenses that, in our experience, we expect to incur in connection with the asserted claims. Required site OM&M expenses are estimated and accrued in their entirety for required periods not exceeding 30 years, which reasonably approximates the typical duration of long-term site OM&M. Charges to income for investigatory and remedial efforts could be material to our operating results in 2018.

Our condensed balance sheets included liabilities for future environmental expenditures to investigate and remediate known sites amounting to \$132.5 million at June 30, 2018, \$131.6 million at December 31, 2017 and \$135.7 million at June 30, 2017, of which \$112.5 million, \$111.6 million and \$118.7 million, respectively, were classified as other noncurrent liabilities. These amounts do not take into account any discounting of future expenditures or any consideration of insurance recoveries or advances in technology. These liabilities are reassessed periodically to determine if environmental circumstances have changed and/or remediation efforts and our estimate of related costs have changed. As a result of these reassessments, future charges to income may be made for additional liabilities.

Environmental exposures are difficult to assess for numerous reasons, including the identification of new sites, developments at sites resulting from investigatory studies, advances in technology, changes in environmental laws and regulations and their application, changes in regulatory authorities, the scarcity of reliable data pertaining to identified sites, the difficulty in assessing the involvement and financial capability of other Potentially Responsible Parties (PRPs), our ability to obtain contributions from other parties and the lengthy time periods over which site remediation occurs. It is possible that some of these matters (the outcomes of which are subject to various uncertainties) may be resolved unfavorably to us, which could materially adversely affect our financial position or results of operations.

## Legal Matters and Contingencies

We, and our subsidiaries, are defendants in various legal actions (including proceedings based on alleged exposures to asbestos) incidental to our past and current business activities. As of June 30, 2018, December 31, 2017 and June 30, 2017, our condensed balance sheets included accrued liabilities for these legal actions of \$14.0 million, \$24.8 million and \$15.9 million, respectively. These liabilities do not include costs associated with legal representation. Based on our analysis, and considering the inherent uncertainties associated with litigation, we do not believe that it is reasonably possible that these legal actions will materially adversely affect our financial position, cash flows or results of operations.

During the ordinary course of our business, contingencies arise resulting from an existing condition, situation or set of circumstances involving an uncertainty as to the realization of a possible gain contingency. In certain instances such as environmental projects, we are responsible for managing the cleanup and remediation of an environmental site. There exists the possibility of recovering a portion of these costs from other parties. We account for gain contingencies in accordance with the provisions of ASC 450 "Contingencies," and therefore, do not record gain contingencies and recognize income until it is earned and realizable.

Table of Contents

## Liquidity, Investment Activity and Other Financial Data

## Cash Flow Data

	Six Months Ended June 30,	
	2018	2017
Provided By (Used For)	(\$ in millions)	
Net operating activities	\$264.3	\$227.4
Capital expenditures	(176.0 )	(150.9 )
Net investing activities	(175.9 )	(150.8 )
Long-term debt (repayments) borrowings, net	(80.1 )	(15.1 )
Common stock repurchased and retired	(9.1 )	—
Stock options exercised	2.2	15.8
Debt issuance costs	(8.5 )	(11.2 )
Net financing activities	(162.4 )	(76.8 )

## Operating Activities

For the six months ended June 30, 2018, cash provided by operating activities increased by \$36.9 million from the six months ended June 30, 2017, primarily due to an increase in operating results partially offset by an increase in working capital. For the six months ended June 30, 2018, working capital increased \$118.7 million compared to an increase of \$31.6 million for the six months ended June 30, 2017. The higher increase in working capital from the prior year was primarily due to improved selling prices and higher raw material costs. Receivables increased from December 31, 2017 by \$109.9 million as a result of higher sales in the second quarter of 2018 compared to the fourth quarter of 2017. Inventories increased \$35.2 million from December 31, 2017 due to normal seasonal activity and higher raw material costs. Accounts payable and accrued liabilities increased from December 31, 2017 by \$26.1 million, primarily due to higher raw material costs.

## Investing Activities

Capital spending of \$176.0 million for the six months ended June 30, 2018 was \$25.1 million higher than the corresponding period in 2017. For the total year 2018, we expect our capital spending to be in the \$375 million to \$425 million range, which is expected to include \$100 million for the Information Technology Project. For the total year 2018, depreciation and amortization expense is forecast to be in the \$590 million to \$610 million range.

During 2017, we began a multi-year implementation of the Information Technology Project. The project is planned to standardize business processes across the chemicals businesses with the objective of maximizing cost effectiveness, efficiency and control across our global operations. The project is anticipated to be completed during 2020. Total capital spending is forecast to be \$250 million and associated expenses are forecast to be \$100 million. Our results for the six months ended June 30, 2018 included \$21.5 million of capital spending and \$18.0 million of expenses associated with this project.

## Financing Activities

For the six months ended June 30, 2018, we made long-term debt repayments, net of long-term debt borrowings, of \$80.1 million.

On January 19, 2018, Olin issued \$550.0 million aggregate principal amount of 5.00% senior notes due February 1, 2030 (2030 Notes), which were registered under the Securities Act of 1933, as amended. Interest on the 2030 Notes

began accruing from January 19, 2018 and is paid semi-annually beginning on August 1, 2018. Proceeds from the 2030 Notes were used to redeem \$550.0 million of debt under the \$1,375.0 million Term Loan Facility.

For the six months ended June 30, 2018, long-term debt repayments included \$610.0 million related to the \$1,375.0 million Term Loan Facility and \$20.0 million related to the \$600.0 million Senior Revolving Credit Facility.

For the six months ended June 30, 2018, we paid debt issuance costs of \$8.5 million for the issuance of the 2030 Notes.

## Table of Contents

On March 9, 2017, we entered into the \$1,975.0 million Senior Credit Facility. Pursuant to the agreement, the aggregate principal amount under the Term Loan Facility was increased to \$1,375.0 million, and the aggregate commitments under the Senior Revolving Credit Facility were increased from \$500.0 million to \$600.0 million. In March 2017, we drew the entire \$1,375.0 million term loan and used the proceeds to redeem the remaining balance of the existing \$1,350.0 million term loan facility of \$1,282.5 million and a portion of the \$800.0 million Sumitomo Credit Facility (Sumitomo Credit Facility). The maturity date for the Senior Credit Facility was extended from October 5, 2020 to March 9, 2022.

On March 9, 2017, Olin issued \$500.0 million aggregate principal amount of 5.125% senior notes due September 15, 2027 (2027 Notes), which were registered under the Securities Act of 1933, as amended. Interest on the 2027 Notes began accruing from March 9, 2017 and is paid semi-annually beginning on September 15, 2017. Proceeds from the 2027 Notes were used to redeem the remaining balance of the Sumitomo Credit Facility.

For the six months ended June 30, 2017, we made long-term debt repayments of \$1,890.1 million, including \$1,282.5 million relating to the \$1,350.0 million term loan facility, \$590.0 million relating to the Sumitomo Credit Facility and \$17.2 million under the required quarterly installments of the \$1,375.0 million term loan facility.

For the six months ended June 30, 2017, we paid debt issuance costs of \$11.2 million relating to the Senior Credit Facility and the 2027 Notes.

For the six months ended June 30, 2018, we repurchased and retired 0.3 million shares with a total cost of \$9.1 million.

We issued 0.2 million and 0.9 million shares representing stock options exercised for the six months ended June 30, 2018 and 2017, respectively, with a total value of \$2.2 million and \$15.8 million, respectively.

The percent of total debt to total capitalization decreased to 56.0% as of June 30, 2018 from 56.7% as of December 31, 2017 as a result of a lower level of debt outstanding.

In the first two quarters of 2018 and 2017, we paid a quarterly dividend of \$0.20 per share. Dividends paid for the six months ended June 30, 2018 and 2017, were \$66.9 million and \$66.3 million, respectively. On July 26, 2018, our board of directors declared a dividend of \$0.20 per share on our common stock, payable on September 10, 2018 to shareholders of record on August 10, 2018.

The payment of cash dividends is subject to the discretion of our board of directors and will be determined in light of then-current conditions, including our earnings, our operations, our financial condition, our capital requirements and other factors deemed relevant by our board of directors. In the future, our board of directors may change our dividend policy, including the frequency or amount of any dividend, in light of then-existing conditions.

## Liquidity and Other Financing Arrangements

Our principal sources of liquidity are from cash and cash equivalents, cash flow from operations and short-term borrowings under our Senior Revolving Credit Facility, accounts receivable factoring arrangement and Receivables Financing Agreement. Additionally, we believe that we have access to the debt and equity markets.

The overall decrease in cash for the six months ended June 30, 2018 primarily reflects our long-term debt repayments, net and capital spending, partially offset by our operating results. We believe, based on current and projected levels of cash flow from our operations, together with our cash and cash equivalents on hand and the availability to borrow under our Senior Revolving Credit Facility, we have sufficient liquidity to meet our short-term and long-term needs to

make required payments of interest on our debt, fund our operating needs, fund working capital and capital expenditure requirements and comply with the financial ratios in our debt agreements.

On April 26, 2018, our board of directors authorized a share repurchase program for the purchase of shares of common stock at an aggregate price of up to \$500.0 million. This program will terminate upon the purchase of \$500.0 million of our common stock. For the six months ended June 30, 2018, 0.3 million shares were repurchased and retired at a cost of \$9.1 million. As of June 30, 2018, we had repurchased a total of \$9.1 million of our common stock, representing 0.3 million shares, and \$490.9 million of common stock remained authorized to be repurchased.

On January 19, 2018, Olin issued \$550.0 million aggregate principal amount of 5.00% senior notes due February 1, 2030, which were registered under the Securities Act of 1933, as amended. Interest on the 2030 Notes began accruing from

## Table of Contents

January 19, 2018 and is paid semi-annually beginning on August 1, 2018. Proceeds from the 2030 Notes were used to redeem \$550.0 million of debt under the Term Loan Facility.

On March 9, 2017, we entered into the \$1,975.0 million Senior Credit Facility. Pursuant to the agreement, the aggregate principal amount under the Term Loan Facility was increased to \$1,375.0 million, and the aggregate commitments under the Senior Revolving Credit Facility were increased from \$500.0 million to \$600.0 million. At June 30, 2018, we had \$594.9 million available under our \$600.0 million Senior Revolving Credit Facility because we had issued \$5.1 million of letters of credit. In March 2017, we drew the entire \$1,375.0 million term loan and used the proceeds to redeem the remaining balance of the existing \$1,350.0 million term loan facility of \$1,282.5 million and a portion of the \$800.0 million Sumitomo Credit Facility. The maturity date for the Senior Credit Facility was extended from October 5, 2020 to March 9, 2022. The \$600.0 million Senior Revolving Credit Facility includes a \$100.0 million letter of credit subfacility. The Term Loan Facility includes amortization payable in equal quarterly installments at a rate of 5.0% per annum for the first two years, increasing to 7.5% per annum for the following year and to 10.0% per annum for the last two years. In connection with the \$550.0 million prepayment of the Term Loan Facility in January 2018, the required quarterly installments of the Term Loan Facility were eliminated.

Under the Senior Credit Facility, we may select various floating-rate borrowing options. The actual interest rate paid on borrowings under the Senior Credit Facility is based on a pricing grid which is dependent upon the leverage ratio as calculated under the terms of the applicable facility for the prior fiscal quarter. The facility includes various customary restrictive covenants, including restrictions related to the ratio of debt to earnings before interest expense, taxes, depreciation and amortization (leverage ratio) and the ratio of earnings before interest expense, taxes, depreciation and amortization to interest expense (coverage ratio). Compliance with these covenants is determined quarterly based on the operating cash flows. We were in compliance with all covenants and restrictions under all our outstanding credit agreements as of June 30, 2018, and no event of default had occurred that would permit the lenders under our outstanding credit agreements to accelerate the debt if not cured. In the future, our ability to generate sufficient operating cash flows, among other factors, will determine the amounts available to be borrowed under these facilities. As of June 30, 2018, there were no covenants or other restrictions that would have limited our ability to borrow under these facilities.

On March 9, 2017, Olin issued \$500.0 million aggregate principal amount of 5.125% senior notes due September 15, 2027, which were registered under the Securities Act of 1933, as amended. Interest on the 2027 Notes began accruing from March 9, 2017 and is paid semi-annually beginning on September 15, 2017. Proceeds from the 2027 Notes were used to redeem the remaining balance of the Sumitomo Credit Facility.

In connection with the Acquisition, Olin and DowDuPont entered into arrangements for the long-term supply of ethylene by DowDuPont to Olin, pursuant to which, among other things, Olin made upfront payments in order to receive ethylene at producer economics and for certain reservation fees and for the option to obtain additional future ethylene supply at producer economics. During 2016, we exercised one of the options to reserve additional ethylene at producer economics. In September 2017, DowDuPont's new Texas 9 ethylene cracker in Freeport, TX became operational. As a result, during 2017, a payment of \$209.4 million was made in connection with this option. On February 27, 2017, we exercised the remaining option to reserve additional ethylene at producer economics from DowDuPont. In connection with the exercise of this option, we also secured a long-term customer arrangement. As a result, an additional payment will be made to DowDuPont of between \$440 million and \$465 million on or about the fourth quarter of 2020.

On December 20, 2016, we entered into a three-year, \$250.0 million Receivables Financing Agreement with PNC Bank, National Association, as administrative agent. Under the Receivables Financing Agreement, our eligible trade receivables are used for collateralized borrowings and continue to be serviced by us. In addition, the Receivables Financing Agreement incorporates the leverage and coverage covenants that are contained in the Senior Revolving

Credit Facility. As of June 30, 2018, \$434.0 million of our trade receivables were pledged as collateral and we had \$250.0 million drawn under the agreement. As of June 30, 2018, we had no additional borrowing capacity under the Receivables Financing Agreement. As of December 31, 2017, \$340.9 million of our trade receivables were pledged as collateral and \$249.7 million was drawn under the agreement.

Olin also has trade accounts receivable factoring arrangements (AR Facilities) and pursuant to the terms of the AR Facilities, certain of our subsidiaries may sell their accounts receivable up to a maximum of \$294.0 million. We will continue to service the outstanding accounts sold. These receivables qualify for sales treatment under ASC 860 and, accordingly, the proceeds are included in net cash provided by operating activities in the condensed statements of cash flows. The gross amount of receivables sold for the six months ended June 30, 2018 and 2017 totaled \$851.1 million and \$777.6 million, respectively. The agreements are without recourse and therefore no recourse liability has been recorded as of June 30, 2018. As of June 30, 2018, December 31, 2017 and June 30, 2017, \$188.6 million, \$182.3 million and \$148.4 million, respectively, of receivables

## Table of Contents

qualifying for sales treatment were outstanding and will continue to be serviced by us.

Cash flow from operations is variable as a result of both the seasonal and the cyclical nature of our operating results, which have been affected by seasonal and economic cycles in many of the industries we serve, such as the vinyls, urethanes, bleach, ammunition and pulp and paper. Cash flow from operations is affected by changes in chlorine, caustic soda and EDC selling prices caused by the changes in the supply/demand balance of these products, resulting in the Chlor Alkali Products and Vinyls segment having significant leverage on our earnings and cash flow. For example, assuming all other costs remain constant, internal consumption remains approximately the same and we are operating at full capacity, a \$10 selling price change per ton of chlorine equates to an approximate \$10 million annual change in our revenues and pretax profit, a \$10 selling price change per ton of caustic soda equates to an approximate \$30 million annual change in our revenues and pretax profit, and a \$0.01 selling price change per pound of EDC equates to an approximate \$20 million annual change in our revenues and pretax profit.

For the six months ended June 30, 2018, cash provided by operating activities increased by \$36.9 million from the six months ended June 30, 2017, primarily due to an increase in operating results partially offset by an increase in working capital. For the six months ended June 30, 2018, working capital increased \$118.7 million compared to an increase of \$31.6 million for the six months ended June 30, 2017. The higher increase in working capital from the prior year was primarily due to improved selling prices and higher raw material costs. Receivables increased from December 31, 2017 by \$109.9 million as a result of higher sales in the second quarter of 2018 compared to the fourth quarter of 2017. Inventories increased \$35.2 million from December 31, 2017 due to normal seasonal activity and higher raw material costs. Accounts payable and accrued liabilities increased from December 31, 2017 by \$26.1 million, primarily due to higher raw material costs.

Capital spending of \$176.0 million for the six months ended June 30, 2018 was \$25.1 million higher than the corresponding period in 2017. For the total year 2018, we expect our capital spending to be in the \$375 million to \$425 million range, which is expected to include \$100 million for the Information Technology Project. For the total year 2018, depreciation and amortization expense is forecast to be in the \$590 million to \$610 million range.

During 2017, we began a multi-year implementation of the Information Technology Project. The project is planned to standardize business processes across the chemicals businesses with the objective of maximizing cost effectiveness, efficiency and control across our global operations. The project is anticipated to be completed during 2020. Total capital spending is forecast to be \$250 million and associated expenses are forecast to be \$100 million. Our results for the six months ended June 30, 2018 included \$21.5 million of capital spending and \$18.0 million of expenses associated with this project.

At June 30, 2018, we had total letters of credit of \$75.0 million outstanding, of which \$5.1 million were issued under our \$600.0 million Senior Revolving Credit Facility. The letters of credit were used to support certain long-term debt, certain workers compensation insurance policies, certain plant closure and post-closure obligations and certain international pension funding requirements.

Our current debt structure is used to fund our business operations. As of June 30, 2018, we had long-term borrowings, including the current installment and capital lease obligations, of \$3,513.5 million, of which \$1,119.3 million was at variable rates. Commitments from banks under our Senior Revolving Credit Facility, Receivables Financing Agreement and AR Facilities are additional sources of liquidity.

In April 2016, we entered into three tranches of forward starting interest rate swaps whereby we agreed to pay fixed rates to the counterparties who, in turn, pay us floating rates on \$1,100.0 million, \$900.0 million, and \$400.0 million of our underlying floating-rate debt obligations. Each tranche's term length is for twelve months beginning on December 31, 2016, December 31, 2017, and December 31, 2018, respectively. The counterparties to the agreements

are SMBC Capital Markets, Inc., Wells Fargo, PNC Bank, National Association and Toronto-Dominion Bank. These counterparties are large financial institutions; however, the risk of loss to us in the event of nonperformance by a counterparty could be significant to our financial position or results of operations. We have designated the swaps as cash flow hedges of the risk of changes in interest payments associated with our variable-rate borrowings.

Accordingly, the outstanding swap agreements have been recorded at their fair market value of \$11.2 million and are included in other current assets and other assets on the accompanying condensed balance sheet as of June 30, 2018, with the corresponding gain deferred as a component of other comprehensive loss. For the three months ended June 30, 2018 and 2017, \$2.1 million and \$0.5 million, respectively, and for the six months ended June 30, 2018 and 2017, \$3.4 million and \$0.5 million, respectively, of income was recorded to interest expense on the accompanying condensed statements of operations related to these swap agreements.

## Table of Contents

In April 2016, we entered into interest rate swaps on \$250.0 million of our underlying fixed-rate debt obligations, whereby we agreed to pay variable rates to the counterparties who, in turn, pay us fixed rates. The counterparties to these agreements are Toronto-Dominion Bank and SMBC Capital Markets, Inc., both of which are major financial institutions.

In October 2016, we entered into interest rate swaps on an additional \$250.0 million of our underlying fixed-rate debt obligations, whereby we agreed to pay variable rates to the counterparties who, in turn, pay us fixed rates. The counterparties to these agreements are PNC Bank, National Association and Wells Fargo, both of which are major financial institutions.

We have designated the April 2016 and October 2016 interest rate swap agreements as fair value hedges of the risk of changes in the value of fixed-rate debt due to changes in interest rates for a portion of our fixed-rate borrowings. Accordingly, the swap agreements have been recorded at their fair market value of \$44.1 million and are included in other long-term liabilities on the accompanying condensed balance sheet as of June 30, 2018, with a corresponding decrease in the carrying amount of the related debt. For the three and six months ended June 30, 2018, \$0.5 million and \$0.3 million, respectively, of expense and for the three and six months ended June 30, 2017, \$0.7 million and \$1.9 million, respectively, of income was recorded to interest expense on the accompanying condensed statements of operations related to these swap agreements.

## Off-Balance Sheet Arrangements

Non-cancelable operating leases and purchasing commitments are utilized in our normal course of business for our projected needs. We have supply contracts with various third parties for certain raw materials including ethylene, electricity, propylene and benzene. These agreements are maintained through long-term cost based contracts that provide us with a reliable supply of key raw materials.

## New Accounting Standards

In March 2018, the Financial Accounting Standards Board (FASB) issued Accounting Standards Update (ASU) 2018-05, "Amendments to SEC Paragraphs Pursuant to SEC Staff Accounting Bulletin No. 118" (SAB 118) which amends ASC 740 "Income Taxes." This update codifies the guidance in SAB 118. SAB 118, "Income Tax Accounting Implications of the Tax Cuts and Jobs Act," has provided guidance for companies that have not completed their accounting for the income tax effects of the U.S. Tax Cuts and Jobs Act (the 2017 Tax Act) in the period of enactment, allowing for a measurement period of up to one year after the enactment date to finalize the recording of the related tax impacts. During 2017, we recognized a provisional deferred tax benefit of \$437.9 million, which was included as a component of income tax (benefit) provision. At June 30, 2018, we have not completed our accounting for the tax effects of enactment of the 2017 Tax Act as the income tax benefit may require further adjustments in 2018 due to anticipated additional guidance from the U.S. Department of the Treasury, changes in Olin's assumptions, completion of 2017 tax returns, and further information and interpretations that become available; however, we have made a reasonable estimate of the effects on our existing deferred tax balances and of the one-time transition tax. Additional revisions to our estimates through the measurement period may have a material impact on our consolidated financial statements.

In February 2018, the FASB issued ASU 2018-02, "Reclassification of Certain Tax Effects from Accumulated Other Comprehensive Income" which amends ASC 220 "Income Statement—Reporting Comprehensive Income." This update allows a reclassification from accumulated other comprehensive loss to retained earnings for the stranded tax effects resulting from the 2017 Tax Act during each fiscal year or quarter in which the effect of the lower tax rate is recorded. The update is effective for fiscal years beginning after December 15, 2018, and interim periods within those fiscal years, with earlier application permitted. We adopted this update in March 2018 and reclassified \$85.9 million

related to the provisional deferred gain resulting from the 2017 Tax Act from accumulated other comprehensive loss to retained earnings.

In August 2017, the FASB issued ASU 2017-12, “Targeted Improvements to Accounting for Hedge Activities” which amends Accounting Standards Codification (ASC) 815 “Derivatives and Hedging.” This update is intended to more closely align hedge accounting with companies’ risk management strategies, simplify the application of hedge accounting guidance, and increase transparency as to the scope and results of hedge programs. The update is effective for fiscal years beginning after December 15, 2018, and interim periods within those fiscal years, with earlier application permitted. We elected to early adopt this update on January 1, 2018. This update did not have a material impact on our consolidated financial statements.

Table of Contents

In March 2017, the FASB issued ASU 2017-07, “Improving the Presentation of Net Periodic Pension Cost and Net Periodic Postretirement Benefit Cost” (ASU 2017-07) which amends ASC 715 “Compensation—Retirement Benefits.” This update requires the presentation of the service cost component of net periodic benefit (income) costs in the same income statement line item as other employee compensation costs arising from services rendered during the period. The update requires the presentation of the other components of the net periodic benefit income (costs) separately from the line item that includes the service cost and outside of any subtotal of operating income. The update is effective for fiscal years beginning after December 15, 2017, and interim periods within those fiscal years. The guidance in this update is applied on a retrospective basis with earlier application permitted. We adopted this update on January 1, 2018 using the retrospective method. The adoption of ASU 2017-07 resulted in a change in our net periodic benefit (income) costs within operating income, which was offset by a corresponding change in non-operating pension income to reflect the impact of presenting the interest cost, expected return on plan assets and amortization of prior service cost and net actuarial loss components of net periodic benefit (income) costs outside of operating income. For the three and six months ended June 30, 2017, the adoption of ASU 2017-07 resulted in a reclassification of \$3.8 million and \$7.6 million, respectively, from cost of goods sold and \$4.8 million and \$9.5 million, respectively, from selling and administration to non-operating pension income reflecting the aforementioned reclassification on our consolidated statements of operations. The service cost component of net periodic benefit (income) costs continue to be included in the same income statement line item as other employee compensation costs arising from services rendered during the period.

In January 2017, the FASB issued ASU 2017-04, “Simplifying the Test for Goodwill Impairment” which amends ASC 350 “Intangibles—Goodwill and Other.” This update will simplify the measurement of goodwill impairment by eliminating Step 2 from the goodwill impairment test. This update will require an entity to perform its annual, or interim, goodwill impairment test by comparing the fair value of a reporting unit with its carrying amount and recognize an impairment charge for the amount by which the carrying amount exceeds the reporting unit’s fair value. The update does not modify the option to perform the qualitative assessment for a reporting unit to determine if the quantitative impairment test is necessary. This update is effective for fiscal years beginning after December 15, 2019, and interim periods within those fiscal years. The guidance in this update is applied on a prospective basis with earlier application permitted. We plan to adopt this update on January 1, 2020 and do not expect the update to have a material impact on our consolidated financial statements.

In August 2016, the FASB issued ASU 2016-15, “Classification of Certain Cash Receipts and Cash Payments” which amends ASC 230 “Statement of Cash Flows.” This update will make eight targeted changes to how cash receipts and cash payments are presented and classified in the statement of cash flows. The update is effective for fiscal years beginning after December 15, 2017. The update will require adoption on a retrospective basis unless it is impracticable to apply, in which case it would be required to apply the amendments prospectively as of the earliest date practicable. We adopted this update on January 1, 2018. In connection with this update, we made an accounting policy election to apply the nature of the distribution approach when determining the proper classification of distributions received from equity method investments. The adoption of this update did not have a material impact on our consolidated financial statements.

In February 2016, the FASB issued ASU 2016-02 “Leases,” (ASU 2016-02) which supersedes ASC 840 “Leases” and creates a new topic, ASC 842 “Leases.” Subsequent to the issuance of ASU 2016-02, ASC 842 was amended by various updates that amend and clarify the impact and implementation of the aforementioned update. These updates require lessees to recognize a lease liability and a lease asset for all leases, including operating leases, with a term greater than 12 months on its balance sheet. Upon initial application, the provisions of these updates are required to be applied using the modified retrospective method which requires retrospective adoption to each prior reporting period presented with the cumulative effect of adoption recorded to the earliest reporting period presented. An optional transition method can be utilized which requires retrospective adoption beginning on the date of adoption with the cumulative effect of initially applying these updates recognized at the date of initial adoption. These updates also

expand the required quantitative and qualitative disclosures surrounding leases. These updates are effective for fiscal years beginning after December 15, 2018 and interim periods within those fiscal years, with earlier application permitted. We expect to adopt these updates on January 1, 2019 using the optional transition method. We continue to evaluate the impact these updates will have on our consolidated financial statements. Based on the analysis conducted to date, we expect there will be an increase in assets and liabilities on the consolidated balance sheets at adoption due to the recording of right-of-use assets and corresponding lease liabilities, which may be material. We believe the updates will also have an impact on our accounting policies, internal controls and disclosures related to leases.

## Table of Contents

In May 2014, the FASB issued ASU 2014-09 “Revenue from Contracts with Customers” (ASU 2014-09), which amends ASC 605 “Revenue Recognition” and creates a new topic, ASC 606 “Revenue from Contracts with Customers” (ASC 606). Subsequent to the issuance of ASU 2014-09, ASC 606 was amended by various updates that amend and clarify the impact and implementation of the aforementioned update. These updates provide guidance on how an entity should recognize revenue to depict the transfer of control of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. Upon initial application, the provisions of these updates are required to be applied retrospectively to each prior reporting period presented or retrospectively with the cumulative effect of initially applying this update recognized at the date of initial application. These updates also expand the disclosure requirements surrounding revenue recorded from contracts with customers. These updates are effective for fiscal years, and interim periods within those years, beginning after December 15, 2017. We adopted these updates on January 1, 2018 using the modified retrospective transition method. The cumulative effect of applying the updates did not have a material impact on our consolidated financial statements. The most significant impact the updates had was on our accounting policies and disclosures on revenue recognition. Expanded disclosures regarding revenue recognition are included within our notes to consolidated financial statements.

### Item 3. Quantitative and Qualitative Disclosures about Market Risk.

We are exposed to market risk in the normal course of our business operations due to our purchases of certain commodities, our ongoing investing and financing activities and our operations that use foreign currencies. The risk of loss can be assessed from the perspective of adverse changes in fair values, cash flows and future earnings. We have established policies and procedures governing our management of market risks and the use of financial instruments to manage exposure to such risks.

Energy costs, including electricity and natural gas, and certain raw materials used in our production processes are subject to price volatility. Depending on market conditions, we may enter into futures contracts, forward contracts, commodity swaps and put and call option contracts in order to reduce the impact of commodity price fluctuations. As of June 30, 2018, we maintained open positions on commodity contracts with a notional value totaling \$139.1 million (\$92.8 million at December 31, 2017 and \$95.7 million at June 30, 2017). Assuming a hypothetical 10% increase in commodity prices which are currently hedged, as of June 30, 2018, we would experience a \$13.9 million (\$9.3 million at December 31, 2017 and \$9.6 million at June 30, 2017) increase in our cost of inventory purchased, which would be substantially offset by a corresponding increase in the value of related hedging instruments.

We transact business in various foreign currencies other than the USD which exposes us to movements in exchange rates which may impact revenue and expenses, assets and liabilities and cash flows. Our significant foreign currency exposure is denominated with European currencies, primarily the Euro, although exposures also exist in other currencies of Asia Pacific, Latin America, Middle East and Africa. For all derivative positions, we evaluated the effects of a 10% shift in exchange rates between those currencies and the USD, holding all other assumptions constant. Unfavorable currency movements of 10% would negatively affect the fair values of the derivatives held to hedge currency exposures by \$19.6 million. These unfavorable changes would generally have been offset by favorable changes in the values of the underlying exposures.

We are exposed to changes in interest rates primarily as a result of our investing and financing activities. Our current debt structure is used to fund business operations, and commitments from banks under our Senior Revolving Credit Facility are a source of liquidity. As of June 30, 2018, December 31, 2017 and June 30, 2017, we had long-term borrowings, including current installments and capital lease obligations, of \$3,513.5 million, \$3,612.0 million and \$3,600.6 million, respectively, of which \$1,119.3 million, \$1,749.0 million and \$1,723.7 million at June 30, 2018, December 31, 2017 and June 30, 2017, respectively, were issued at variable rates.

In April 2016, we entered into three tranches of forward starting interest rate swaps whereby we agreed to pay fixed rates to the counterparties who, in turn, pay us floating rates on \$1,100.0 million, \$900.0 million, and \$400.0 million of our underlying floating-rate debt obligations. Each tranche's term length is for twelve months beginning on December 31, 2016, December 31, 2017 and December 31, 2018, respectively. The counterparties to the agreements are SMBC Capital Markets, Inc., Wells Fargo, PNC Bank, National Association and Toronto-Dominion Bank. These counterparties are large financial institutions; however, the risk of loss to us in the event of nonperformance by a counterparty could be significant to our financial position or results of operations.

In April 2016, we entered into interest rate swaps on \$250.0 million of our underlying fixed-rate debt obligations, whereby we agreed to pay variable rates to the counterparties who, in turn, pay us fixed rates. The counterparties to these agreements are Toronto-Dominion Bank and SMBC Capital Markets, Inc., both of which are major financial institutions.

## Table of Contents

In October 2016, we entered into interest rate swaps on an additional \$250.0 million of our underlying fixed-rate debt obligations, whereby we agreed to pay variable rates to the counterparties who, in turn, pay us fixed rates. The counterparties to these agreements are PNC Bank, National Association and Wells Fargo, both of which are major financial institutions.

Assuming no changes in the \$1,119.3 million of variable-rate debt levels from June 30, 2018, we estimate that a hypothetical change of 100-basis points in the LIBOR interest rates would impact annual interest expense by \$11.2 million. A portion of this hypothetical change would be offset by our interest rate swaps.

Our interest rate swaps reduced interest expense by \$1.6 million and \$1.3 million for the three months ended June 30, 2018 and 2017, respectively, and \$3.1 million and \$2.5 million for the six months ended June 30, 2018 and 2017, respectively.

If the actual changes in commodities, foreign currency, or interest pricing is substantially different than expected, the net impact of commodity risk, foreign currency risk, or interest rate risk on our cash flow may be materially different than that disclosed above.

We do not enter into any derivative financial instruments for speculative purposes.

### Item 4. Controls and Procedures.

Our chief executive officer and our chief financial officer evaluated the effectiveness of our disclosure controls and procedures as of June 30, 2018. Based on that evaluation, our chief executive officer and chief financial officer have concluded that, as of such date, our disclosure controls and procedures were effective to ensure that information Olin is required to disclose in the reports that it files or submits with the SEC under the Securities Exchange Act of 1934 is recorded, processed, summarized and reported within the time periods specified in the Commission's rules and forms, and to ensure that information we are required to disclose in such reports is accumulated and communicated to our management, including our chief executive officer and chief financial officer, as appropriate to allow timely decisions regarding required disclosure.

There have been no changes in our internal control over financial reporting that occurred during the quarter ended June 30, 2018, that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

Table of Contents

Cautionary Statement Regarding Forward-Looking Statements

This quarterly report on Form 10-Q includes forward-looking statements. These statements relate to analyses and other information that are based on management's beliefs, certain assumptions made by management, forecasts of future results, and current expectations, estimates and projections about the markets and economy in which we and our various segments operate. These statements may include statements regarding the acquisition of the Acquired Business from DowDuPont, the expected benefits and synergies of the transaction, and future opportunities for the combined company following the transaction. The statements contained in this quarterly report on Form 10-Q that are not statements of historical fact may include forward-looking statements that involve a number of risks and uncertainties.

We have used the words "anticipate," "intend," "may," "expect," "believe," "should," "plan," "project," "estimate," "forecast," and variations of such words and similar expressions in this quarterly report to identify such forward-looking statements. These statements are not guarantees of future performance and involve certain risks, uncertainties and assumptions, which are difficult to predict and many of which are beyond our control.

Therefore, actual outcomes and results may differ materially from those matters expressed or implied in such forward-looking statements. We undertake no obligation to update publicly any forward-looking statements, whether as a result of future events, new information or otherwise. Relative to the dividend, the payment of cash dividends is subject to the discretion of our board of directors and will be determined in light of then-current conditions, including our earnings, our operations, our financial conditions, our capital requirements and other factors deemed relevant by our board of directors. In the future, our board of directors may change our dividend policy, including the frequency or amount of any dividend, in light of then-existing conditions.

The risks, uncertainties and assumptions involved in our forward-looking statements, many of which are discussed in more detail in our filings with the SEC, including without limitation the "Risk Factors" section of our Annual Report on Form 10-K for the year ended December 31, 2017, include, but are not limited to the following:

sensitivity to economic, business and market conditions in the United States and overseas, including economic instability or a downturn in the sectors served by us, such as ammunition, vinyls, urethanes, and pulp and paper, and the migration by United States customers to low-cost foreign locations;

the cyclical nature of our operating results, particularly declines in average selling prices in the chlor alkali industry and the supply/demand balance for our products, including the impact of excess industry capacity or an imbalance in demand for our chlor alkali products;

our reliance on a limited number of suppliers for specified feedstock and services and our reliance on third-party transportation;

higher-than-expected raw material and energy, transportation and/or logistics costs;

failure to control costs or to achieve targeted cost reductions;

new regulations or public policy changes regarding the transportation of hazardous chemicals and the security of chemical manufacturing facilities;

the occurrence of unexpected manufacturing interruptions and outages, including those occurring as a result of labor disruptions and production hazards;

• complications resulting from our multiple enterprise resource planning systems and the conversion to one single system;

• changes in, or failure to comply with, legislation or government regulations or policies;

• the failure or an interruption of our information technology systems;

• economic and industry downturns that result in diminished product demand and excess manufacturing capacity in any of our segments and that, in many cases, result in lower selling prices and profits;

Table of Contents

• weak industry conditions could affect our ability to comply with the financial maintenance covenants in our Senior Credit Facility;

• the effects of any declines in global equity markets on asset values and any declines in interest rates used to value the liabilities in our pension plan;

• fluctuations in foreign currency exchange rates;

• unexpected litigation outcomes;

• costs and other expenditures in excess of those projected for environmental investigation and remediation or other legal proceedings;

• our substantial amount of indebtedness and significant debt service obligations;

• the integration of the Acquired Business may not be successful in fully realizing the benefits of the anticipated synergies;

• failure to attract, retain and motivate key employees;

• our assumptions included in long range plans not realized causing a non-cash impairment charge of long-lived assets;

• adverse conditions in the credit and capital markets, limiting or preventing our ability to borrow or raise capital; and

• differences between the historical financial information of Olin and the Acquired Business and our future operating performance.

All of our forward-looking statements should be considered in light of these factors. In addition, other risks and uncertainties not presently known to us or that we consider immaterial could affect the accuracy of our forward-looking statements.
