Magic Software Announces Successful Implementation of iBOLT for a SAP Business One Customer

iBOLT integration solution deployed in under 3 days

Or Yehuda, Israel, January 10th, 2005 - Magic Software Enterprises (NASDAQ: MGIC), a leading provider of state-of-the-art development and integration technology, announced today the completion of a successful implementation of the iBOLT Special Edition for SAP Business One at the Houston Offices of IFCO Systems. SAP Business One is an affordable integrated business management solution designed specifically to meet the needs of small and midsize businesses.

IFCO Systems, a global leader in logistics services, provides in the United States a national network of shipping pallet management services. Due to changing business needs, IFCO needed to upgrade its existing business processes. SAP and Express Information Systems, an SAP Business One Partner, introduced IFCO to Magic s iBOLT Special Edition for SAP Business One. The iBOLT-based solution, which meets all of IFCO s many diverse requirements, was implemented at IFCO in under three days. iBOLT automates all the workflows and enables the seamless communication between disparate technologies, databases, and applications across the enterprise. iBOLT has also streamlined IFCO s email notification system, which sends email messages to customers regarding their orders, to carriers about deliveries, and to the company s geographically scattered warehouses.

The customized version of iBOLT complements SAP s existing arsenal of cutting-edge development tools for SAP Business One. It enables SAP Business One users to rapidly enhance their systems with a range of features - including extended workflows, composite applications, multi-channel access, unlimited interoperability and integration with other systems and platforms, as well as business activity and performance monitoring. The iBOLT Special Edition also opens SAP Business One to the large channel of existing Magic Solution Providers, allowing them to seamlessly integrate their existing solutions with SAP Business One, streamlining the process and reducing integration time.

The iBOLT Special Edition implementation has enabled us to jump past months of development time and fulfill eight projects in 2004 that directly affect the way we communicate with our customers.   said Nina Clark, Financial Systems Analyst, IFCO Systems, who headed the project at IFCO.   Magic did this at an incredible speed and cost reduction.

Menachem Hasfari, Magic Software s CEO, said   This initial project with iBOLT Special Edition for SAP Business One demonstrates the time-to-value we achieve for our customers, and the vitality and agility of our cooperation with SAP. SAP introduced us to Express Info within two weeks of our agreement, this project was installed within 3 weeks of our initial customer discussions and the actual implementation was done in less then 3 days. IFCO s implementation illustrates the potential our cooperation with SAP represents, and it demonstrates that Business Integration is gaining ground at all levels and sizes of organizations with iBOLT being ideally suited for them.

####

About IFCO Systems

IFCO Systems is an international logistics service provider with approximately 140 locations worldwide. IFCO Systems operates a pool of more than 65 million RPCs (Reusable Plastic Containers) globally, which are used as a logistic system predominantly for fresh produce by leading grocery retailers.

In the United States, IFCO Systems provides a national network of pallet management services. With more than 45 million wooden pallets recycled annually, IFCO Systems is the market leader in this industry. In 2003, IFCO Systems generated revenues of 417.4 million USD. IFCO Systems is listed on the Frankfurt Stock Exchange in the Prime Standard segment (IFE1.
