Sidebar text: "I URGE YOU TO CONSIDER RECEIVING FUTURE FUND REPORTS AND OTHER FUND INFORMATION BY E-MAIL AND THE INTERNET .....SEE THE INSIDE FRONT COVER OF THIS REPORT FOR STEP-BY-STEP INSTRUCTIONS."

## Dear

SHAREHOLDER

Once again, I am pleased to tell you that during the period covered by this report your Nuveen Fund continued to meet its objective of providing attractive monthly income free from federal income taxes and, where applicable, state income taxes. Detailed information on your Fund's performance can be found in the Portfolio Manager's Comments and on the Performance Overview pages within this report. Please take the time to read them.

In addition to providing regular tax-free income, we believe that a municipal bond investment like your Nuveen Fund also may offer opportunities to reduce the risk of your overall investment portfolio. This is because the prices of municipal bonds may move differently than the prices of the common stocks, mutual funds or other investments you may own. Since one part of your portfolio may be going up when another is going down, portfolio diversification may reduce your overall risk. Your financial advisor can explain the advantages of portfolio diversification in more detail. I urge you to contact him or her soon for more information on this important investment strategy.

I also urge you to consider receiving future Fund reports and other Fund information by e-mail and the Internet. Not only will you be able to receive the information faster, but this also may help lower your Fund's expenses. Sign up is quick and easy - see the inside front cover of this report for step-by-step instructions.

For more than 100 years, Nuveen has specialized in offering quality investments such as your Nuveen Fund to those seeking to accumulate and preserve wealth. Our commitment to careful research, constant surveillance and judicious trading by a seasoned portfolio management team has never been stronger. Our mission continues to be to assist you and your financial advisor by offering the investment solutions and services that can help you meet your financial objectives. We thank you for choosing us as a partner as you work toward that goal.

Sincerely,
/s/ Timothy R. Schwertfeger
Timothy R. Schwertfeger
Chairman of the Board

Nuveen Municipal Closed-End Exchange-Traded Funds
(NUM, NMP, NZW, NUO, NXI, NBJ, NVJ)

Portfolio Manager's
COMMENTS

Portfolio manager Rick Huber reviews U.S. and state economic conditions, key investment strategies, and the recent performance of the Michigan and Ohio Funds. Rick, who has eighteen years of investment management experience, assumed portfolio management responsibility for NUO and NXI in 2001, and for NBJ and NVJ upon their inceptions. He assumed management responsibility for the three Michigan Funds in January 2003.

WHAT WERE THE MAJOR FACTORS AFFECTING THE U.S. ECONOMY AND THE MUNICIPAL MARKET DURING THIS REPORTING PERIOD?

In a number of ways, economic and market conditions have not changed significantly since our last shareholder report dated July 31, 2002. The most influential factors shaping the U.S. economy and the municipal market over this reporting period continued to be the slow pace of economic growth and the relatively low levels of interest rates. Geopolitical uncertainty and the ongoing threat of terrorism also had an economic impact during this period.

In the municipal market, the sluggish economic recovery and lack of inflationary pressures continued to help many bonds perform well during much of the period ended January 31, 2003. In calendar year 2002, new municipal supply nationwide topped $\$ 357$ billion, increasing 25\% over 2001 levels and eclipsing the previous record of $\$ 292$ billion set in 1993. This trend continued during January 2003, with a record $\$ 23.4$ billion in new supply issued during the month. Demand for municipal bonds also remained strong, as many individual investors continued to seek investments offering tax-free income and diversification for their port-folios. Institutional investors, especially traditional municipal bond purchasers such as property/casualty insurance companies, also were active buyers in the municipal market.

HOW WERE ECONOMIC AND MARKET CONDITIONS IN MICHIGAN AND OHIO?

Both Michigan (\$9.6 billion, down 4\%) and Ohio (\$8.5 billion, down 9\%) bucked the national trend in 2002 and experienced a decline in new issue supply from 2001 levels. During January 2003, new issuance in Michigan jumped 142\% over January 2002 , to $\$ 893$ million. Ohio's new issue supply started 2003 much the same way it ended 2002. Approximately $\$ 330$ million in new bonds were issued in Ohio in January 2003, down 19\% from January 2002.

On the economic front, the Michigan economy continued to be weak, although manufacturing job losses have stabilized following an 18 -month recession in that sector. In addition, Michigan's 300 biotechnology companies, supported by the state's major universities, have created an area of strong growth. However, the retail trade sector and the office furniture industry in western Michigan continued to shed jobs, and auto manufacturers and suppliers expect job losses over the course of 2003 due to projected declines in vehicle sales. Although the state economy remained overly reliant on the auto industry, the cost of doing business in Michigan has become more competitive, and the state's industrial base continued to slowly diversify. Financially, the state faces budget shortfalls totaling more than $\$ 800$ million, and closing this gap would largely deplete the state's $\$ 1.2$ billion rainy day fund. Given the reduced level of personal income tax collections, replenishing reserve fund balances could be a slow process.

On the plus side, Michigan's debt position continued to be well managed, the state's debt burden is low, and pension liabilities are fully funded.

Although Ohio also experienced some stabilization of employment in its manufacturing sector, the state's economy remained in recession, with continued job losses in the trade and services industries and a mixed outlook for financial services. Further constraining Ohio's economic growth was the state's weak demographic profile, including declining population trends and difficulty in retaining university graduates. Following shortfalls in tax collections and a

Edgar Filing: NUVEEN OHIO QUALITY INCOME MUNICIPAL FUND INC - Form N-30D
downward revision in revenue projections for the next two years, Ohio's 2003 budget gap stands at $\$ 1.9$ billion. Relying on one-time resources and the proceeds from tobacco settlement funds, Ohio has now severely depleted its reserves, creating concern over the state's ability to achieve a balanced budget in fiscal 2003 and 2004. Over the longer term, Ohio's well-developed transportation and distribution industries, central location, and the presence of numerous corporate head quarters should foster economic recovery in line with national trends.

Even with their budgetary problems, the credit ratings of the two states remained intact over the reporting period, although the outlook for Ohio was rated as negative by both Moody's and Standard \& Poor's. Moody's also maintained a negative outlook for Michigan. As of January 31, 2003, the Moody's/Standard \& Poor's credit ratings, respectively, for Michigan were Aaa/AAA and for Ohio were Aal/AA+. Over coming months, we will continue to closely monitor the budgetary situations in these states for any potential impact on their credit ratings.

HOW DID THESE NUVEEN FUNDS PERFORM OVER THE TWELVE MONTHS ENDED JANUARY 31, 2003?

Individual results for the Michigan and Ohio Funds, as well as certain benchmarks, are presented in the accompanying table.

|  | MARKET YIELD |  | $\begin{aligned} \text { TOTAL RETURN } \\ \text { ON NAV } \end{aligned}$ | TOTAL RETURN1 | LIPPER <br> AVERAGE2 |
| :---: | :---: | :---: | :---: | :---: | :---: |

| NBJ | $6.00 \%$ | 9.23\% | 10.98\% | $7.46 \%$ | $10.12 \%$ |
| NVJ | $5.80 \%$ | 8.92\% | NA | - | - |

Past performance is not predictive of future results.

For additional information, see the individual Performance Overview for your Fund in this report.

For the twelve months ended January 31, 2003 , all of the Funds in this report having at least one year of performance history outperformed the unleveraged, unmanaged Lehman Brothers Municipal Bond Index. Infact, much of this outperformance can be attributed to the leveraged structure of these Funds, which has provided the opportunity for additional income for common shareholders. Many of the Funds also had relatively long leverage-adjusted durations 4 when compared with the 7.91 duration of the Lehman Index (please see the individual Performance Overview pages for each Fund's duration). A longer
duration generally will help a Fund to perform well during periods of declining interest rates, as was the case over much of the twelve-month period.

1 The total annual returns on common share net asset value (NAV) for these Nuveen Funds are compared with the total annual return of the Lehman Brothers Municipal Bond Index, an unleveraged national index comprising a broad range of investment-grade municipal bonds. Results for the Lehman index do not reflect any expenses.

2 The total returns of the Nuveen Michigan Funds are compared with the average annualized return of the six Funds in the Lipper Michigan Municipal Debt Funds category, while the total returns of the Nuveen Ohio Funds are compared with the average annualized return of the 31 funds in the Lipper Other States Municipal Debt Funds category. Fund and Lipper returns account for Fund leverage, Fund expenses and assume reinvestment of dividends.

3 The taxable-equivalent yield represents the yield that must be earned on a taxable investment in order to equal the yield of the Nuveen Fund on an after-tax basis. The taxable-equivalent yield is based on the Fund's market yield on the indicated date and a federal income tax rate of $30 \%$ plus the applicable state income tax rate. The combined federal and state tax rates used in this report were $33 \%$ for Michigan and $35 \%$ for Ohio.

4 Duration is a measure of a Fund's NAV volatility in reaction to interest rate movements. Fund duration, also known as leverage-adjusted duration, takes into account the leveraging process for a Fund and therefore is generally longer than the duration of the actual portfolio of individual bonds that make up the Fund. References to duration in this commentary are intended to indicate Fund duration unless otherwise noted.

The three Michigan Funds reported performance that bracketed the Lipper Michigan Municipal Debt Funds average. These Funds' durations were the primary factor in their relative over- and underperformance. As of January 31, 2003, NZW had a relatively long duration of 12.33 , while NMP had a relatively short duration of 7.14. As noted earlier, a Fund with a longer duration would have been expected to outperform a Fund with a shorter duration under the market conditions prevalent over the twelve months ended January 31, 2003. The Ohio Funds performed roughly in line with the Lipper Other States category average. However, direct comparisons between these Funds and this average may have limited usefulness because Funds from nine other states, each reflecting specific conditions and market environments, are brought together to calculate the Other States average.

## HOW DID THE MARKET ENVIRONMENT AFFECT THE FUNDS' DIVIDENDS AND SHARE PRICES?

As the Federal Reserve continued to keep short-term interest rates at historically low levels, the dividend-payment capabilities of these Funds benefited from their use of leverage, a strategy that can potentially enhance the dividends paid to common shareholders. The amount of this benefit is tied in part to the short-term rates the Funds pay their MuniPreferred(R) shareholders. Low short-term rates, such as those currently in effect, can enable the Funds to reduce the amount of dividends they pay preferred shareholders, which can leave more earnings to support common share dividends.

During the year ended January 31, 2003, the relatively low level of short-term

# Edgar Filing: NUVEEN OHIO QUALITY INCOME MUNICIPAL FUND INC - Form N-30D 

interest rates enabled us to implement four dividend increases in NMP and NUO, three in NXI, two in NUM and NBJ, and one in NZW. NVJ, which was introduced in March 2002, has been paying regular monthly dividends since June 2002 .

The share prices of NMP, NZW and NXI finished January 2003 higher than one year earlier, and NVJ finished the period trading at a price greater than its IPO price. Share prices of the other three Funds remained relatively flat or fell modestly over the twelve-months ended January 31, 2003, reflecting the general weakening of bond prices during October and November 2002. As of January 31, 2003, NUO, NXI and NVJ traded at premiums to their common share net asset values; while NUM, NMP, NZW and NBJ traded at discounts. (see charts on individual Performance Overview pages).

WHAT KEY STRATEGIES WERE USED TO MANAGE THESE NUVEEN FUNDS DURING THE PERIOD ENDED JANUARY 31, 2003?

Over the twelve-month period, our strategic focus for all of the Funds continued to be on diversifying the portfolios, enhancing call protection, and positioning the Funds more defensively in anticipation of potential changes in the interest rate environment. Given the recent slope of the municipal yield curve, we sought to purchase bonds that mature about 20 years from now. Many of these bonds offered yields similar to those of longer bonds, but we think have less interest rate risk. The purchase of these long-intermediate bonds helped to moderate the durations of most of the Funds, making their portfolios less sensitive to interest rate changes while still allowing them to provide competitive yields and returns.

In addition to an emphasis on strategic positioning and risk reduction, we also continued to look for individual issues that we believed would perform well regardless of the future direction of interest rates. For example, we added several A rated healthcare issues to NUO with the goal of supporting and potentially enhancing that Fund's dividend-paying capability. While supply in the Ohio municipal market was generally tight over the past twelve months, the large number of colleges and universities in the state meant that much of what issuance there was came from the education sector. In this area, we were able to draw on the experience of Nuveen research analysts to selectively buy attractively priced issues, particularly in NXI.

In the current geopolitical and economic climate, maintaining strong credit quality remains a key strategy. As of January 31, 2003, each of these Funds continued to offer excellent credit quality, with allocations of bonds rated AAA/U.S. Guaranteed and AA ranging from 66\% to 85\%. In general, our weightings in higher quality and insured bonds benefited the performance of these Funds during the past year.

WHAT IS YOUR OUTLOOK FOR THE MUNICIPAL MARKET IN GENERAL AND THESE NUVEEN FUNDS IN PARTICULAR?

Our outlook for the fixed-income markets remains generally positive. We continue to believe the U.S. economy is headed for an eventual recovery, but one that may be less robust and slower to arrive than some are predicting. We expect
inflation and interest rates to remain relatively low over the near term, while new municipal volume nationally should continue to be strong. Given the budget deficits faced by these states, we expect to see an increase in issuance of new municipal debt in both Michigan and Ohio. We think demand for tax-exempt municipal bonds also should remain solid, as investors continue to look for ways
to generate tax-free income and diversify to reduce their overall investment risk.

Over the coming months, we will be working to mitigate the effects of potential bond calls on the performance of NUM, NMP and NUO. Each of these Funds was introduced about ten years ago, and they are all in that part of their life cycles when bond calls can begin to increase. In each Fund, we intend to take advantage of what we anticipate will be increased bond issuance in these states to reinvest the proceeds of any called bonds in ways that help achieve our diversity and duration goals. The number of actual calls in each Fund will depend largely on market interest rates over this period. NZW, NXI, NBJ and NVJ are all relatively new Funds and do not face any significant call exposure for several years.

In the months ahead, we will be concentrating on monitoring credit quality, seeking to enhance dividend-paying capabilities, diversifying holdings, and moderating durations through the purchase of suitable long-intermediate bonds. In general, we plan to remain focused on strategies that we believe will add value for the Funds' shareholders. We believe the attractive tax-free income and opportunity for portfolio diversification offered by these Funds will continue to make them a valuable part of investors' long-range financial plans.

1 Taxable-equivalent yield represents the yield on a taxable investment
necessary to equal the yield of the Nuveen Fund on an after-tax basis. It
is calculated using the current market yield and a federal income tax rate
of 30%. The rate shown for federal and state highlights the added value of
owning shares that are also exempt from state income taxes. It is based on
a combined federal and state income tax rate of 35%.
2 The Fund also paid shareholders a capital gains distribution in December
2002 of \$0.0103 per share.

    FINANCIAL STATEMENTS (Unaudited)
    FINANCIAL STATEMENTS (Unaudited)
1. GENERAL INFORMATION AND SIGNIFICANT ACCOUNTING POLICIES
The state funds (the "Funds") covered in this report and their corresponding
```

Common share stock exchange symbols are Nuveen Michigan Quality Income Municipal Fund, Inc. (NUM), Nuveen Michigan Premium Income Municipal Fund, Inc. (NMP), Nuveen Michigan Dividend Advantage Municipal Fund (NZW), Nuveen Ohio Quality Income Municipal Fund, Inc. (NUO), Nuveen Ohio Dividend Advantage Municipal Fund (NXI), Nuveen Ohio Dividend Advantage Municipal Fund 2 (NBJ) and Nuveen Ohio Dividend Advantage Municipal Fund 3 (NVJ). Common shares of Michigan Quality Income (NUM), Michigan Premium Income (NMP) and Ohio Quality Income (NUO) are traded on the New York Stock Exchange while Common shares of Michigan Dividend Advantage (NZW), Ohio Dividend Advantage (NXI), Ohio Dividend Advantage 2 (NBJ) and Ohio Dividend Advantage 3 (NVJ) are traded on the American Stock Exchange. The Funds are registered under the Investment Company Act of 1940 as closed-end management investment companies.

Prior to the commencement of operations of Michigan Dividend Advantage (NZW), Ohio Dividend Advantage 2 (NBJ) and Ohio Dividend Advantage 3 (NVJ), each Fund had no operations other than those related to organizational matters, the initial capital contribution of $\$ 100,275$ per Fund by Nuveen Advisory Corp. (the "Adviser"), a wholly owned subsidiary of Nuveen Investments, Inc. (formerly, The John Nuveen Company) and the recording of the organization expenses (\$11,500 per Fund) and their reimbursement by Nuveen Investments, LLC(formerly, Nuveen Investments), also a wholly owned subsidiary of Nuveen Investments, Inc.

Each Fund seeks to provide current income exempt from both regular federal and designated state income taxes, by investing primarily in a diversified portfolio of municipal obligations issued by state and local government authorities within a single state.

The following is a summary of significant accounting policies followed by the Funds in the preparation of their financial statements in accordance with accounting principles generally accepted in the United States.

Securities Valuation
The prices of municipal bonds in each Fund's investment portfolio are provided by a pricing service approved by the Fund's Board of Directors/Trustees. When price quotes are not readily available (which is usually the case for municipal securities), the pricing service establishes fair market value based on yields or prices of municipal bonds of comparable quality, type of issue, coupon, maturity and rating, indications of value from securities dealers and general market conditions. If it is determined that market prices for a security are unavailable or inappropriate, the Board of Directors/Trustees of the Funds or its designee may establish a fair value for the security. Temporary investments in securities that have variable rate and demand features qualifying them as short-term securities are valued at amortized cost, which approximates market value.

Securities Transactions
Securities transactions are recorded on a trade date basis. Realized gains and losses from such transactions are determined on the specific identification method. Securities purchased or sold on a when-issued or delayed delivery basis may have extended settlement periods. The securities so purchased are subject to market fluctuation during this period. The Funds have instructed the custodian to segregate assets in a separate account with a current value at least equal to the amount of the when-issued and delayed delivery purchase commitments. At January 31, 2003, Michigan Quality Income (NUM) and Michigan Premium Income (NMP) each had an outstanding when-issued purchase commitment of $\$ 1,549,350$. There were no such outstanding purchase commitments in any of the other Funds.

Investment Income
Interest income, which includes the amortization of premiums and accretion of discounts for financial reporting purposes, is recorded on an accrual basis.

Notes to<br>FINANCIAL STATEMENTS (Unaudited) (continued)

## Income Taxes

Each Fund is a separate taxpayer for federal income tax purposes. Each Fund intends to comply with the requirements of the Internal Revenue Code applicable to regulated investment companies and to distribute all of its net investment income to its share holders. Therefore, no federal income tax provision is required. Furthermore, each Fund intends to satisfy conditions which will enable interest from municipal securities, which is exempt from regular federal and designated state income taxes, to retain such tax-exempt status when distributed to shareholders of the Funds.

Dividends and Distributions to Common Shareholders Dividends from tax-exempt net investment income are declared and paid monthly. Net realized capital gains and/or market discount from investment transactions, if any, are distributed to shareholders not less frequently than annually. Furthermore, capital gains are distributed only to the extent they exceed available capital loss carryforwards.

Distributions to Common Shareholders of tax-exempt net investment income, net realized capital gains and/or market discount, if any, are recorded on the ex-dividend date. The amount and timing of distributions are determined in accordance with federal income tax regulations, which may differ from accounting principles generally accepted in the United States. Accordingly, temporary over-distributions as a result of these differences may occur and will be classified as either distributions in excess of net investment income, distributions in excess of net realized gains and/or distributions in excess of net ordinary taxable income from investment transactions, where applicable.

## Preferred Shares

The Funds have issued and outstanding $\$ 25,000$ stated value Preferred shares. Each Fund's Preferred shares are issued in one or more Series. The dividend rate on each Series may change every seven days, as set pursuant to a dutch auction process by the auction agent, and is payable at or near the end of each rate period. The number of Preferred shares outstanding, by Series and in total, for each Fund is as follows:

|  | MICHIGAN QUALITY INCOME (NUM) | MICHIGAN PREMIUM INCOME (NMP) | MICHIGAN <br> DIVIDEND ADVANTAGE <br> (NZW) |
| :---: | :---: | :---: | :---: |

| Series F | -- | -- | 960 | -- |
| Total | 3,080 | 1,240 | 960 | 660 |

Derivative Financial Instruments
The Funds may invest in certain derivative financial instruments including futures, forward, swap, and option contracts, and other financial instruments with similar characteristics. Although the Funds are authorized to invest in such financial instruments, and may do so in the future, they did not make any such investments during the six months ended January 31, 2003.

Custodian Fee Credit
Each Fund has an arrangement with the custodian bank whereby certain custodian fees and expenses are reduced by credits earned on each Fund's cash on deposit with the bank. Such deposit arrangements are an alternative to overnight investments.

Offering Costs
Nuveen Investments, LLC has agreed to pay all offering costs (other than the sales load) that exceed $\$ .03$ per Common share for Michigan Dividend Advantage (NZW), Ohio Dividend Advantage 2 (NBJ) and Ohio Dividend Advantage 3 (NVJ). Michigan Dividend Advantage's (NZW), Ohio Dividend Advantage 2's (NBJ) and Ohio Dividend Advantage $3^{\prime}$ 's (NVJ) share of offering costs $(\$ 61,530, \$ 93,150$ and $\$ 64,500$, respectively) were recorded as a reduction of the proceeds from the sale of the common shares.

Costs incurred by Michigan Dividend Advantage (NZW), Ohio Dividend Advantage 2 (NBJ) and Ohio Dividend Advantage 3 (NVJ) in connection with their offering of Preferred shares $(\$ 273,442, \$ 360,642$ and $\$ 293,107$, respectively) were recorded as a reduction to paid-in surplus.

Use of Estimates
The preparation of financial statements in conformity with accounting principles generally accepted in the United States requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amounts of increases and decreases in net assets applicable to Common shares from operations during the reporting period. Actual results may differ from those estimates.

```
2. FUND SHARES

4. INCOME TAX INFORMATION

The following information is presented on an income tax basis. Differences between amounts for financial statement and federal income tax purposes are primarily due to timing differences in recognizing income on taxable market discount securities and timing differences in recognizing certain gains and losses on security transactions.

At January 31, 2003, the cost of investments were as follows:

```
Notes to
    FINANCIAL STATEMENTS (Unaudited) (continued)
```

Gross unrealized appreciation and gross unrealized depreciation of investments at January 31, 2003, were as follows:

|  |  | MICHIGAN QUALITY INCOME (NUM) | MICHIGAN PREMIUM INCOME (NMP) |
| :---: | :---: | :---: | :---: |
| Gross unrealized: <br> Appreciation <br> Depreciation |  | $\begin{array}{r} \$ 16,969,534 \\ (825,503) \end{array}$ | $\begin{array}{r} \$ 12,594,622 \\ (776,327) \end{array}$ |

FINANCIAL STATEMENTS (Unaudited) (continued)
5. MANAGEMENT FEE AND OTHER TRANSACTIONS WITH AFFILIATES

Under Michigan Quality Income's (NUM), Michigan Premium Income's (NMP) and Ohio Quality Income's (NUO) investment management agreements with the Adviser, each Fund pays an annual management fee, payable monthly, at the rates set forth below, which are based upon the average daily net assets (including net assets

```
attributable to Preferred shares) of each Fund as follows:
AVERAGE DAILY NET ASSETS (INCLUDING NET ASSETS
    ATTRIBUTABLE TO PREFERRED SHARES)
    MANAGEMENT FEE
For the first $125 million . 6500%
For the next $125 million . 6375
For the next $250 million .6250
For the next $500 million . 6125
For the next $1 billion . 6000
For the next $3 billion . 5875
For net assets over $5 billion . 5750
```

Under Michigan Dividend Advantage's (NZW), Ohio Dividend Advantage's (NXI), Ohio Dividend Advantage 2's (NBJ) and Ohio Dividend Advantage 3's (NVJ) investment management agreements with the Adviser, each Fund pays an annual management fee, payable monthly, at the rates set forth below, which are based upon the average daily net assets (including net assets attributable to Preferred shares) of each Fund as follows:

AVERAGE DAILY NET ASSETS (INCLUDING NET ASSETS
ATTRIBUTABLE TO PREFERRED SHARES)
MANAGEMENT FEE

```
For the first $125 million .6500%
```

For the next $\$ 125$ million . 6375
For the next $\$ 250$ million . 6250
For the next $\$ 500$ million . 6125
For the next \$1 billion .6000
For net assets over \$2 billion . 5750

For the first ten years of Ohio Dividend Advantage's (NXI) operations, the Adviser has agreed to reimburse the Fund, as a percentage of average daily net assets (including net assets attributable to Preferred shares), for fees and expenses in the amounts, and for the time periods set forth below:

| YEAR ENDING MARCH 31, |  | YEAR ENDING MARCH 31, |  |
| :---: | :---: | :---: | :---: |

Build Your Wealth AUTOMATICALLY

SIDEBAR TEXT: NUVEEN MAKES REINVESTING EASY. A PHONE CALL IS ALL IT TAKES TO SET UP YOUR REINVESTMENT ACCOUNT.

## NUVEEN CLOSED-END EXCHANGE-TRADED FUNDS DIVIDEND REINVESTMENT PLAN

Your Nuveen Closed-End Exchange-Traded Fund allows you to conveniently reinvest dividends and/or capital gains distributions in additional fund shares.

By choosing to reinvest, you'll be able to invest money regularly and automatically, and watch your investment grow through the power of tax-free compounding. Just like dividends or distributions in cash, there may be times when income or capital gains taxes may be payable on dividends or distrib utions that are reinvested.

It is important to note that an automatic reinvestment plan does not ensure a profit, nor does it protect you against loss in a declining market.

EASY AND CONVENIENT

To make recordkeeping easy and convenient, each month you'll receive a statement showing your total dividends and distributions, the date of investment, the shares acquired and the price per share, and the total number of shares you own.

HOW SHARES ARE PURCHASED

The shares you acquire by reinvesting will either be purchased on the open market or newly issued by the Fund. If the shares are trading at or above net asset value at the time of valuation, the Fund will issue new shares at the then-current market price. If the shares are trading at less than net asset value, shares for your account will be purchased on the open market. Dividends and distributions received to purchase shares in the open market will normally be invested shortly after the dividend payment date. No interest will be paid on dividends and distributions awaiting reinvestment. Because the market price of shares may increase before purchases are completed, the average purchase price per share may exceed the market price at the time of valuation, resulting in the acquisition of fewer shares than if the dividend or distribution had been paid in shares issued by the Fund. A pro rata portion of any applicable brokerage commissions on open market purchases will be paid by Plan participants. These commissions usually will be lower than those charged on individual transactions.

FLEXIBILITY

You may change your distribution option or withdraw from the Plan at any time, should your needs or situation change. Should you withdraw, you can receive a certificate for all whole shares credited to your reinvestment account and cash payment for fractional shares, or cash payment for all reinvestment account shares, less brokerage commissions and a $\$ 2.50$ service fee.

You can reinvest whether your shares are registered in your name, or in the name of a brokerage firm, bank, or other nominee. Ask your investment advisor if his or her firm will participate on your behalf. Participants whose shares are registered in the name of one firm may not be able to transfer the shares to another firm and continue to participate in the Plan.

The Fund reserves the right to amend or terminate the Plan at any time. Although the Fund reserves the right to amend the Plan to include a service charge payable by the participants, there is no direct service charge to participants in the Plan at this time.

For more information on the Nuveen Automatic Reinvestment Plan or to enroll in or withdraw from the Plan, speak with your financial advisor or call us at (800) 257-8787.

POLICY CHANGE
On November 14, 2002, the Board adopted a policy that allows these Funds, in addition to investments in municipal bonds, to invest up to 5\% of its net assets (including assets attributable to preferred shares, if any) in tax-exempt or taxable fixed-income securities or equity securities for the purpose of acquiring control of an issuer whose municipal bonds (a) the Fund already owns and (b) have deteriorated or are expected shortly to deteriorate significantly in credit quality, provided Nuveen Advisory determines that such investment should enable the Fund to better maximize the value of its existing investment in such issuer. This policy is a non-fundamental policy of each Fund which means that it can be changed at any time by the Board of Trustees without vote of the shareholders.

GLOSSARY OF TERMS USED IN THIS REPORT
Average Annual Total Return: This is a commonly used method to express an investment's performance over a particular, usually multi-year time period. It expresses the return (including change in NAV and reinvested dividends) that would have been necessary on an annual basis to equal the investment's actual performance over the time period being considered.

AVERAGE EFFECTIVE MATURITY: The average of all the maturities of the bonds in a fund's portfolio, computed by weighting each maturity date (the date the security comes due) by the market value of the security. This figure does not account for the likelihood of prepayments or the exercise of call provisions.

LEVERAGE-ADJUSTED DURATION: Duration is a measure of a bond or bond fund's sensitivity to changes in interest rates. Generally, the longer a bond or fund's duration, the more the price of the bond or fund will change as interest rates change. Leverage-adjusted duration takes into account the leveraging process for a Fund and therefore is generally longer than the duration of the actual portfolio of individual bonds that make up the Fund

```
MARKET YIELD (ALSO KNOWN AS DIVIDEND YIELD OR CURRENT YIELD): An investment's current annualized dividend divided by its current market price.
NET ASSET VALUE (NAV): A fund's NAV is calculated by subtracting the liabilities of the fund from its total assets and then dividing the remainder by the number of shares outstanding. Fund NAVs are calculated at the end of each business day.
TAXABLE-EQUIVALENT YIELD: The yield necessary from a fully taxable investment to equal, on an after-tax basis, the yield of a municipal bond investment.
```

Each Fund intends to repurchase shares of its own common or preferred stock in the future at such times and in such amounts as is deemed advisable. No shares were repurchased during the six-month period ended January 31, 2003. Any future repurchases will be reported to shareholders in the next annual or semiannual report.

[^0]:    1 Taxable-equivalent yield represents the yield on a taxable investment necessary to equal the yield of the Nuveen Fund on an after-tax basis. It is calculated using the current market yield and a federal income tax rate of $30 \%$. The rate shown for federal and state highlights the added value of owning shares that are also exempt from state income taxes. It is based on a combined federal and state income tax rate of $33 \%$.
