### A Letter to Shareholders

#### Dear Shareholder

The present time may well be remembered as one of the most tumultuous periods in financial market history. Over the past year, the bursting of the

housing bubble and the resultant credit crisis swelled into an all-out global financial market meltdown that featured the collapse of storied financial

firms, volatile swings in the world s financial markets and monumental government responses, including the nearly \$800 billion economic stimulus

plan signed into law just after period end.

The US economy appeared relatively resilient through the first few months of 2008, when rising food and energy prices fueled inflation fears. Mid-

summer ushered in dramatic changes inflationary pressure subsided amid a plunge in commodity prices, while economic pressures intensified in

the midst of a rapid deterioration in consumer spending, employment and other key indicators. By year s end, the National Bureau of Economic

Research affirmed that the United States was in a recession, which officially began in December 2007. The Federal Reserve Board (the Fed ), after

slashing interest rates aggressively early in the period, resumed that rate-cutting campaign in the fall, with the final reduction in December 2008 bring-

ing the target federal funds rate to a record low range of between zero and 0.25%. Importantly, the central bank pledged that future policy moves to

revive the global economy and financial markets would comprise primarily nontraditional and quantitative easing measures, such as capital injections,

lending programs and government guarantees.

Against this backdrop, US equity markets experienced intense volatility, with the sentiment turning decisively negative toward period end. Declines were

significant and broad-based, with little divergence among large- and small-cap stocks. Non-US stocks posted stronger results early on, but quickly lost

ground as the credit crisis revealed itself to be global in scope and as the worldwide economic slowdown gathered pace. Overall, aggressive monetary

and fiscal policy, combined with the defensiveness of the US, helped domestic equities notch better performance than their non-US counterparts.

In fixed income markets, risk aversion remained the popular theme, leading the Treasury sector to top all other asset classes. The high yield market

was particularly hard hit in this environment, as economic turmoil, combined with frozen credit markets and substantial technical pressures, took a

heavy toll. Meanwhile, the municipal bond market was challenged by a dearth of market participants, lack of liquidity, difficult funding environment and

backlog of new-issue supply, which sent prices lower and yields well above Treasuries. By period end, however, some positive momentum had returned

to the municipal space.

In all, an investor flight to safety prevailed, as evidenced in the six- and 12-month returns of the major benchmark indexes:

Total Returns as of January 31, 2009	6-month	12-month
US equities (S&P 500 Index)	(33.95)%	(38.63)%
Small cap US equities (Russell 2000 Index)	(37.38)	(36.84)
International equities (MSCI Europe, Australasia, Far East Index)	(40.75)	(43.74)
US Treasury securities (Merrill Lynch 10-Year US Treasury Index)	11.96	10.64

Taxable fixed income (Barclays Capital US Aggregate Bond Index*)	3.23	2.59
Tax-exempt fixed income (Barclays Capital Municipal Bond Index*)	0.70	(0.16)
High yield bonds (Barclays Capital US Corporate High Yield 2% Issuer Capped Index*)	(19.07)	(19.72)

<sup>\*</sup> Formerly a Lehman Brothers index.

# Fund Summary as of January 31, 2009

BlackRock MuniHoldings New Jersey Insured Fund, Inc.

#### **Investment Objective**

BlackRock MuniHoldings New Jersey Insured Fund, Inc. (MUJ) (the Funds) eks to provide shareholders with current income exempt from federal

income tax and New Jersey personal income taxes by investing in a portfolio of long-term, investment grade municipal obligations the interest on

which, in the opinion of bond counsel to the issuer, is exempt from federal income tax and New Jersey personal income taxes.

#### **Performance**

For the six months ended January 31, 2009, the Fund returned (7.46)% based on market price and (0.56)% based on net asset value ( NAV ). For

the same period, the closed-end Lipper Single-State Insured Municipal Debt Funds category posted an average return of (10.16)% on a market price

basis and (6.34)% on a NAV basis. All returns reflect reinvestment of dividends. The performance of the Lipper category does not necessarily correlate

to that of the Fund, as the Lipper group comprises funds representing various states and not New Jersey alone. The Fund s discount to NAV, which

widened during the period, accounts for the difference between performance based on price and performance based on NAV. Fund performance was

driven primarily by a rising yield (and correspondingly falling price) environment for intermediate and long-term municipals during the second half of

2008. Pre-refunded and escrowed issues were the best-performing municipal sectors for the period, and the Fund s high allocation to these areas

had a positive influence on results.

The views expressed reflect the opinions of BlackRock as of the date of this report and are subject to change based on changes in market, economic or other conditions.

These views are not intended to be a forecast of future events and are no guarantee of future results.

**4 SEMI-ANNUAL REPORT** 

JANUARY 31, 2009

# Fund Summary as of January 31, 2009 BlackRock MuniYield Insured Investment Fund Investment Objective

BlackRock MuniYield Insured Investment Fund (MFT) (the Funds) eks to provide shareholders with as high a level of current income exempt from

federal income taxes as is consistent with its investment policies and prudent investment management by investing primarily in a portfolio of long-

term, investment grade municipal obligations the interest on which, in the opinion of bond counsel to the issuers, is exempt from federal income taxes

and which enables shares of the Fund to be exempt from Florida intangible personal property taxes.

Effective September 16, 2008, BlackRock MuniYield Florida Insured Fund was renamed BlackRock MuniYield Insured Investment Fund.

#### **Performance**

For the six months ended January 31, 2009, the Fund returned (7.54)% based on market price and (6.49)% based on NAV. For the same period, the

closed-end Lipper Insured Municipal Debt Funds (Leveraged) category posted an average return of (4.58)% on a market price basis and (6.20)% on

a NAV basis. All returns reflect reinvestment of dividends. The Fund s discount to NAV, which widened during the period, accounts for the difference

between performance based on price and performance based on NAV. Sector allocation played an important role in determining how the Fund per-

formed during the reporting period. A significant overweight in pre-refunded bonds in the one- to five-year maturity range benefited Fund performance,

as the yield curve steepened and these issues outperformed. Conversely, an overweight position in hospital bonds adversely affected results, as spread

products underperformed as the economic downturn continued to add more stress on the fundamental credit quality of the sector.

<sup>&</sup>lt;sup>6</sup> The investment advisor has deemed certain of these non-rated securities to be of investment grade quality. As of July 31, 2008 the market value of these securities was \$1,972,106, representing 1% of the Fund s long-term investments.

The views expressed reflect the opinions of BlackRock as of the date of this report and are subject to change based on changes in market, economic or other conditions.

These views are not intended to be a forecast of future events and are no guarantee of future results.

SEMI-ANNUAL REPORT JANUARY 31, 2009 5

### Fund Summary as of January 31, 2009 BlackRock MuniYield Michigan Insured Fund, Inc.

#### **Investment Objective**

BlackRock MuniYield Michigan Insured Fund, Inc. (MIY) (the Funds) eks to provide shareholders with as high a level of current income exempt from

federal income tax and Michigan income taxes as is consistent with its investment policies and prudent investment management by investing primarily

in a portfolio of long-term municipal obligations the interest on which, in the opinion of bond counsel to the issuers, is exempt from federal income tax

and Michigan income taxes.

#### Performance

For the six months ended January 31, 2009, the Fund returned (11.04)% based on market price and (1.89)% based on NAV. For the same period, the

closed-end Lipper Single-State Insured Municipal Debt Funds category posted an average return of (10.16)% on a market price basis and (6.34)% on a

NAV basis. All returns reflect reinvestment of dividends. The performance of the Lipper category does not necessarily correlate to that of the Fund, as the

Lipper group comprises funds representing various states and not Michigan alone. The Fund s discount to NAV, which widened during the period, accounts

for the difference between performance based on price and performance based on NAV. Fund performance was driven primarily by a rising yield (and cor-

respondingly falling price) environment for intermediate and long-term municipals during the second half of 2008. Pre-refunded and escrowed issues were

the best-performing municipal sectors for the period, and the Fund s high allocation to these areas had a positive influence on results.

# Fund Summary as of January 31, 2009 BlackRock MuniYield Pennsylvania Insured Fund

#### **Investment Objective**

BlackRock MuniYield Pennsylvania Insured Fund (MPA) (the Funds) eks to provide shareholders with as high a level of current income exempt from fed-

eral and Pennsylvania income taxes as is consistent with its investment policies and prudent investment management by investing primarily in a portfolio of

long-term municipal obligations the interest on which, in the opinion of bond counsel to the issuers, is exempt from federal and Pennsylvania income taxes.

#### **Performance**

For the six months ended January 31, 2009, the Fund returned (7.30)% based on market price and (2.63)% based on NAV. For the same period, the

closed-end Lipper Single-State Insured Municipal Debt Funds category posted an average return of (10.16)% on a market price basis and (6.34)%

on a NAV basis. All returns reflect reinvestment of dividends. The Fund s discount to NAV, which widened during the period, accounts for the difference

between performance based on price and performance based on NAV. Recent Fund performance, based on net expenses, has been positively affected

by its defensive posture during the period. Exposure to the intermediate portion of the municipal yield curve benefited performance as the curve steep-

ened to wider ranges. An emphasis on higher credit quality bonds also aided results as credit spread widening peaked during the period. All hedges were

eliminated during the period as correlation to the municipal cash market broke down. Positions in lower-rated issues and issues subject to the alternative

minimum tax hindered performance. The Fund maintained a mean distribution rate and was underweight duration relative to its Lipper peers.

The views expressed reflect the opinions of BlackRock as of the date of this report and are subject to change based on changes in market, economic or other conditions.

These views are not intended to be a forecast of future events and are no guarantee of future results.

8 SEMI-ANNUAL REPORT

JANUARY 31, 2009

# The Benefits and Risks of Leveraging

The Funds may utilize leverage to seek to enhance the yield and NAV of its Common Shares. However, these objectives cannot be achieved in all interest rate environments.

To leverage, certain Funds issue Preferred Shares, which pay dividends at

<sup>&</sup>lt;sup>1</sup> Yield on closing market price is calculated by dividing the current annualized distribution per share by the closing market price. Past performance does not guarantee future results.

<sup>&</sup>lt;sup>2</sup> Tax equivalent yield assumes the maximum federal tax rate of 35%.

<sup>&</sup>lt;sup>3</sup> The distribution is not constant and is subject to change.

<sup>&</sup>lt;sup>4</sup> Represents Preferred Shares and TOBs as a percentage of total managed assets, which is the total assets of the Fund, including any assets attributable to Preferred Shares and TOBs, minus the sum of accrued liabilities. For a discussion of leveraging techniques utilized by the Fund, please see The Benefits and Risks of Leveraging on page 9.

prevailing short-term interest rates, and invests the proceeds in long-term municipal bonds. In general, the concept of leveraging is based on the premise that the cost of assets to be obtained from leverage will be based on short-term interest rates, which normally will be lower than the income earned by each Fund on its longer-term portfolio investments. To the extent that the total assets of the Fund (including the assets obtained from leverage) are invested in higher-yielding portfolio investments, the Fund s Common Shareholders will benefit from the incremental yield.

To illustrate these concepts, assume a Fund s Common Shares capitalization is \$100 million and it issues Preferred Shares for an additional \$50 million, creating a total value of \$150 million available for investment in long-term municipal bonds. If prevailing short-term interest rates are 3% and long-term interest rates are 6%, the yield curve has a strongly positive slope. In this case, the Fund pays dividends on the \$50 million of Preferred Shares based on the lower short-term interest rates. At the same time, the Fund s total portfolio of \$150 million earns the income based on long-term interest rates. In this case, the dividends paid to Preferred Shareholders are significantly lower than the income earned on the Fund s long-term investments, and therefore the Common Shareholders are the beneficiaries of the incremental yield.

Conversely, if prevailing short-term interest rates rise above long-term interest rates of 6%, the yield curve has a negative slope. In this case, the Fund pays dividends on the higher short-term interest rates whereas the Fund s total portfolio earns income based on lower long-term interest rates. If short-term interest rates rise, narrowing the differential between short-term and long-term interest rates, the incremental yield pickup on the Common Shares will be reduced or eliminated completely.

Furthermore, the value of the Fund s portfolio investments generally varies inversely with the direction of long-term interest rates, although other factors can influence the value of portfolio investments. In contrast, the redemption value of the Fund s Preferred Shares does not fluctuate in relation to interest rates. As a result, changes in interest rates can influence the Fund s NAV positively or negatively in addition to the impact on Fund performance from leverage from Preferred Shares discussed above.

Certain Funds may also, from time to time, leverage its assets through the use of tender option bond ( TOB ) programs, as described in Note 1 of the Notes to Financial Statements. TOB investments generally will provide the

Funds with economic benefits in periods of declining short-term interest rates, but expose the Funds to risks during periods of rising short-term interest rates similar to those associated with Preferred Shares issued by the Funds, as described above. Additionally, fluctuations in the market value of municipal bonds deposited into the TOB trust may adversely affect the Funds NAV per share.

The use of leverage may enhance opportunities for increased returns to the Funds and Common Shareholders, but as described above, it also creates

risks as short- or long-term interest rates fluctuate. Leverage also will generally cause greater changes in a Funds NAV, market price and dividend rate than a comparable portfolio without leverage. If the income derived from securities purchased with assets received from leverage exceeds the cost of leverage, the Funds net income will be greater than if leverage had not been used. Conversely, if the income from the securities purchased is not sufficient to cover the cost of leverage, the Funds net income will be less than if leverage had not been used, and therefore the amount available for distribution to shareholders will be reduced. The Funds may be required to sell portfolio securities at inopportune times or below fair market values in order to comply with regulatory requirements applicable to the use of leverage or as required by the terms of leverage instruments. which may cause the Funds to incur losses. The use of leverage may limit the Funds ability to invest in certain types of securities or use certain types of hedging strategies, such as in the case of certain restrictions imposed by ratings agencies that rate preferred shares issued by a Fund. The Funds will incur expenses in connection with the use of leverage, all of which are borne by the holders of the Common Shares and may reduce returns on the Common Shares.

Under the Investment Company Act of 1940, the Funds are permitted to issue Preferred Shares in an amount of up to 50% of its total managed assets at the time of issuance. Under normal circumstances, each Fund anticipates that the total economic leverage from Preferred Shares and TOBs will not exceed 50% of its total managed assets at the time such leverage is incurred. As of January 31, 2009, the Funds had economic leverage from Preferred Shares and TOBs as a percentage of their total managed assets as follows:

	Leverage
BlackRock MuniHoldings New Jersey Insured Fund, Inc	39%
BlackRock MuniYield Insured Investment Fund	41%
BlackRock MuniYield Michigan Insured Fund, Inc	40%
BlackRock MuniYield New Jersey Insured Fund, Inc	38%
BlackRock MuniYield Pennsylvania Insured Fund	36%

#### **Derivative Instruments**

The Funds may invest in various derivative instruments, including swaps and other instruments specified in the Notes to Financial Statements, which constitute forms of economic leverage. Such instruments are used to obtain exposure to a market without owning or taking physical custody of securities or to hedge market and/or interest rate risks. Such derivative instruments involve risks, including the imperfect correlation between the value of a derivative instrument and the underlying asset, possible default of the other party to the transaction and illiquidity of the derivative instrument. The Funds ability to successfully use a derivative instru-

Percent of

ment depends on the Advisor s ability to accurately predict pertinent market movements, which cannot be assured. The use of derivative instruments may result in losses greater than if they had not been used, may require the Funds to sell or purchase portfolio securities at inopportune times or for prices other than current market values, may limit the amount of appreciation the Funds can realize on an investment or may cause the Funds to hold a security that they might otherwise sell. The Funds investments in these instruments are discussed in detail in the Notes to Financial Statements.

Gross unrealized depreciation	(22,031,873)
Net unrealized depreciation	\$ (3,777,393)

(a) AMBAC Insured.

(b) US government securities, held in escrow, are used to pay interest on this security as well as to retire the bond in full at the date indicated, typically at a premium to par.

(c)		FSA Insured.		
(d)		MBIA Insured.		
(e)		FGIC Insured.		
(f)		Represents a step-up bond that pays an initial coupon rate t	for the first period	
		and then a higher coupon rate for the following periods. Rat	e shown reflects the	
		current yield as of report date.		
(g)		Represents a zero-coupon bond. Rate shown reflects the cu	urrent yield as of	
		report date.		
(h)		Security is collateralized by Municipal or US Treasury Obliga	ations.	
(i)		Variable rate security. Rate shown is as of report date.		
(j)		Radian Insured.		
(k)		Assured Guaranty Insured.		
(I)		Commonwealth Guaranteed.		
(m)	CIFG Insured.			
(n)		Securities represent underlying bonds transferred to a tender of	ption bond trust	
		in exchange for which the Fund acquired residual interest certif	icates. These	
		securities serve as collateral in a financing transaction. See No	te 1 of the Notes	
		to Financial Statements for details of municipal bonds transferre	ed to tender	
		option bond trusts.		
(o)		Investments in companies considered to be an affiliate of the Fe	und, for purposes	
		of Section 2(a)(3) of the Investment Company Act of 1940, were	e as follows:	
		Affiliate	Net Activity	Income
		CMA New Jersey Municipal Money Fund	(9,440,026)	\$59,996

For Fund compliance purposes, the Fund s industry classifications refer to any one or more of the industry sub-classifications used by one or more widely recognized market indexes or ratings group indexes, and/or as defined by Fund management. This definition may not apply for purposes of this report which

Represents the current yield as of report date.

may combine industry sub-classifications for reporting ease.

(p)

Effective August 1, 2008, the Fund adopted Financial Accounting Standards Board Statement of Financial Accounting Standards No. 157, Fair Value Measurements (FAS 157). FAS 157 clarifies the definition of fair value, establishes a framework for measuring fair values and requires additional disclosures about the use of fair value measurements. Various inputs are used in determining the fair value of investments, which are as follows:

Level 1 price quotations in active markets/exchanges for identical securities

Level 2 other observable inputs (including, but not limited to: quoted prices for similar assets or liabilities in markets that are not active, inputs other than quoted prices that are observable for the assets or liabilities (such as interest rates, yield curves, volatilities, prepayment speeds, loss severities, credit risks and default rates) or other market-corroborated inputs)

Level 3 unobservable inputs based on the best information available in the

circumstance, to the extent observable inputs are not available (including the Fund s own assumption used in determining the fair value of investments)

The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities. For information about the Fund s policy regarding valuation of investments and other significant accounting policies, please refer to Note 1 of the Notes to Financial Statements. The following table summarizes the inputs used as of January 31, 2009 in determining the fair valuation of the Fund s investments:

Valuation	Investments in
Inputs	Securities
	Assets
Level 1	\$ 310,880
Level 2	482,080,752
Level 3	
Total	\$ 482,391,632

See Notes to Financial Statements.

(i) CIFG Insured.

(j) Security is collateralized by Municipal or US Treasury Obligations.

(k) BHAC Insured.

(n) (o)

(p)

(I) Commonwealth Guaranteed.

(m) Securities represent underlying bonds transferred to a tender option bond trust

in exchange for which the Fund acquired residual interest certificates. These securities serve as collateral in a financing transaction. See Note 1 of the Notes to Financial Statements for details of municipal bonds transferred to tender

option bond trusts.

FHLMC Collateralized.

FNMA Collateralized.

GNMA Collateralized.

(q) Security may have a maturity of more than one year at the time of issuance, but has variable rate and demand features that qualify it as a short-term security. The rate disclosed is as of report date. This rate changes periodically based upon

prevailing market rates.

(r) Investments in companies considered to be an affiliate of the Fund, for purposes of Section 2(a)(3) of the Investment Company Act of 1940, were as follows:

	Net	
Affiliate	Activity	Income
CMA Florida Municipal Money Fund	(6,863,534)	\$36,359

(s) Represents the current yield as of report date.

For Fund compliance purposes, the Fund s industry classifications refer to any one or more of the industry sub-classifications used by one or more widely recognized market indexes or ratings group indexes, and/or as defined by Fund management. This definition may not apply for purposes of this report which may combine industry sub-classifications for reporting ease.

Effective August 1, 2008, the Fund adopted Financial Accounting Standards Board Statement of Financial Accounting Standards No. 157, Fair Value Measurements (FAS 157). FAS 157 clarifies the definition of fair value, establishes a framework for measuring fair values and requires additional disclosures about the use of fair value measurements. Various inputs are used in determining the fair value of investments, which are as follows:

Level 1 price quotations in active markets/exchanges for identical securities

Level 2 other observable inputs (including, but not limited to: quoted prices for similar assets or liabilities in markets that are not active, inputs other than quoted prices that are observable for the assets or liabilities (such as interest rates, yield curves, volatilities, prepayment speeds, loss severities, credit risks and default rates) or other market-corroborated inputs)

Level 3 unobservable inputs based on the best information available in the

circumstance, to the extent observable inputs are not available (including the Fund s own assumption used in determining the fair value of investments)

The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities. For information about the Fund s policy regarding valuation of investments and other significant accounting policies, please refer to Note 1 of the Notes to Financial Statements. The following table summarizes the inputs used as of January 31, 2009 in determining the fair valuation of the Fund s investments:

Valuation	Investments in
Inputs	Securities
	Assets
Level 1	\$ 5,548,510
Level 2	165,927,249
Level 3	
Total	\$ 171,475,759

20 SEMI-ANNUAL REPORT

**JANUARY 31, 2009** 

### Schedule of Investments (concluded) BlackRock MuniYield Michigan Insured Fund, Inc. (MIY)

(a) US government securities, held in escrow, are used to pay interest on this

security as well as to retire the bond in full at the date indicated, typically at a

premium to par. FGIC Insured.

(b) FGIC Insured.
(c) AMBAC Insured.
(d) MBIA Insured.
(e) FSA Insured.

(f) Security is collateralized by Municipal or US Treasury Obligations.

(g) Represents a zero-coupon bond. Rate shown reflects the current yield as of

report date.

(h) ACA Insured.

(i) GNMA Collateralized.(j) Assured Guaranty Insured.(k) Commonwealth Guaranteed.

(I) Securities represent underlying bonds transferred to a tender option bond trust in exchange for which the Fund acquired residual interest certificates. These securities serve as collateral in a financing transaction. See Note 1 of the Notes

to Financial Statements for details of municipal bonds transferred to tender

option bond trusts.

(m) Represents the current yield as of report date.

(n) Investments in companies considered to be an affiliate of the Fund, for purposes

of Section 2(a)(3) of the Investment Company Act of 1940, were as follows:

	Net		
Affiliate	Activity	Income	
CMA Michigan Municipal Money Fund	12,258,040	\$60,484	

For Fund compliance purposes, the Fund s industry classifications refer to any one or more of the industry sub-classifications used by one or more widely recognized market indexes or ratings group indexes, and/or as defined by Fund management. This definition may not apply for purposes of this report which may combine industry sub-classifications for reporting ease.

Effective August 1, 2008, the Fund adopted Financial Accounting Standards Board Statement of Financial Accounting Standards No. 157, Fair Value Measurements (FAS 157). FAS 157 clarifies the definition of fair value, establishes a framework for measuring fair values and requires additional disclosures about the use of fair value measurements. Various inputs are used in determining the fair value of investments, which are as follows:

Level 1 price quotations in active markets/exchanges for identical securities

Level 2 other observable inputs (including, but not limited to: quoted prices for similar assets or liabilities in markets that are not active, inputs other than quoted prices that are observable for the assets or liabilities (such as interest rates, yield curves, volatilities, prepayment speeds, loss severities, credit risks and default rates) or other market-corroborated inputs)

Level 3 unobservable inputs based on the best information available in the circumstance, to the extent observable inputs are not available (including the Fund's own assumption used in determining the fair value of investments). The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities. For information about the Fund's policy regarding valuation of investments and other significant accounting policies, please refer to Note 1 of the Notes to Financial Statements. The following table summarizes the inputs used as of January 31, 2009 in determining the fair valuation of the Fund's investments:

Valuation	Investments in
Inputs	Securities
	Assets
Level 1	\$ 16,825,573
Level 2	385,314,730
Level 3	
Total	\$ 402,140,303

See Notes to Financial Statements.

AMBAC Insured. (a) MBIA Insured. (b)

US government securities, held in escrow, are used to pay interest on this (c)

security as well as to retire the bond in full at the date indicated, typically at

a premium to par.

FSA Insured. (d)

(g)

Assured Guaranty Insured. (e)

XL Capital Insured. (f) FGIC Insured.

Represents a zero-coupon bond. Rate shown reflects the current yield as of (h)

report date.

(i) Represents a step-up bond that pays an initial coupon rate for the first period

and then a higher coupon rate for the following periods. Rate shown is as of

report date.

Radian Insured. (j)

Commonwealth Guaranteed. (k)

(I) CIFG Insured.

(m) Securities represent underlying bonds transferred to a tender option bond trust

> in exchange for which the Fund acquired residual interest certificates. These securities serve as collateral in a financing transaction. See Note 1 of the Notes to Financial Statements for details of municipal bonds transferred to tender

option bond trusts.

See Notes to Financial Statements.

24 SEMI-ANNUAL REPORT JANUARY 31, 2009

### Schedule of Investments (concluded) BlackRock MuniYield New Jersey Insured Fund, Inc. (MJI)

(n) Security may have a maturity of more than one year at the time of issuance, but has variable rate and demand features that qualify it as a short-term security. The rate disclosed is as of report date. This rate changes periodically based upon prevailing market rates.

(o) Represents the current yield as of report date.

(p) Investments in companies considered to be an affiliate of the Fund, for purposes

of Section 2(a)(3) of the Investment Company Act of 1940, were as follows:

	INCL	
Affiliate	Activity	Income
CMA New Jersey Municipal Money Fund	1,725,389	\$26,135

For Fund compliance purposes, the Fund s industry classifications refer to any one or more of the industry sub-classifications used by one or more widely recognized market indexes or ratings group indexes, and/or as defined by Fund management. This definition may not apply for purposes of this report which may combine industry sub-classifications for reporting ease.

Effective August 1, 2008, the Fund adopted Financial Accounting Standards Board Statement of Financial Accounting Standards No. 157, Fair Value Measurements (FAS 157). FAS 157 clarifies the definition of fair value, establishes a framework for measuring fair values and requires additional disclosures about the use of fair value measurements. Various inputs are used in determining the fair value of investments, which are as follows:

Level 1 price quotations in active markets/exchanges for identical securities

Level 2 other observable inputs (including, but not limited to: quoted prices for similar assets or liabilities in markets that are not active, inputs other than quoted prices that are observable for the assets or liabilities (such as interest rates, yield curves, volatilities, prepayment speeds, loss severities, credit risks and default rates) or other market-corroborated inputs)

Level 3 unobservable inputs based on the best information available in the circumstance, to the extent observable inputs are not available (including the Fund's own assumption used in determining the fair value of investments). The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities. For information about the Fund's policy regarding valuation of investments and other significant accounting policies, please refer to Note 1 of the Notes to Financial Statements. The following table summarizes the inputs used as of January 31, 2009 in determining the fair valuation of the Fund's investments:

Valuation	Investments in
Inputs	Securities
	Assets
Level 1	\$ 2,524,090
Level 2	185,285,251
Level 3	
Total	\$ 187,809,341

See Notes to Financial Statements.
