Enclosure: Second Quarter 2002 Results Presentation 22 July 2002.

Growth Momentum Carries On

Second Quarter Results 22 July 2002

This presentation contains certain "forward-looking statements" relating to the Company's business:

The statements can be identified by the use of forward-looking terminology or by discussions of strategy, plans or intentions.

The statements include descriptions and anticipated expenditures of the Company's investment in research and development programs, descriptions of new products expected to be introduced by the Company and anticipated customer demand for these and existing products in the Company's existing portfolios.

The statements reflect the current views of the Company with respect to future events and are subject to certain risks, uncertainties and assumptions.

Many factors could cause the actual results, performance or achievements of the Company to be materially different from any future results, performances or achievements that may be expressed or implied by the forward-looking statements. These factors can be found in the Annual Reports the Company has filed with the U.S. Securities and Exchange Commission.

Specific risk factors include unexpected regulatory delays, uncertainties relating to clinical trials and product development, the introduction of competing products, increased government pricing pressures, and the Company's ability to obtain or maintain patent and other proprietary intellectual property protection.

If any of these risks materialize, or underlying assumptions prove incorrect, actual results may vary materially from those one might expect on the basis of this presentation.
