- o Radar Investments in Agricultural Land
- o Other Business Corporate Structure and Other Investments

3rd Quarter of Fiscal Year 2014

A.2 Cosan Consolidated Result

For Cosan's consolidated financial information, we considered 100% of the results of Comgás, Rumo, Cosan Lubrificantes, Radar and Other Businesses. From April 1, 2013, upon the adoption of IFRS 11, Raízen Energia and Raízen Combustíveis results are reported in the "Equity Pick-up" line, considering a proportionate interest (50%) in the result. Adjustments and Eliminations represent intercompany balances and transactions.

EBITDA reported herein complies with CVM Rule 527/12, published by the Brazilian Securities and Exchange Commission on October 4, 2012, and may differ from the amounts disclosed in previous periods due to equity accounting adjustment. Consequently, EBITDA now consists of operating profit before financial expenses, plus depreciation, amortization and equity pick-up.

Note 2: Due to the disposal of the retail sugar trading business represented by Cosan Alimentos, the company reclassified this unit's results to discontinued operations, as required by accounting rules IFRS5/CPC31 – Non-current Asset Held for Sale and Discontinued Operation.

3rd Quarter of Fiscal Year 2014

Below we report the results for 3Q14 for each business unit for all segments detailed above. All information reflects 100% of their financial performance, regardless of Cosan's interest.

For the purposes of consolidated EBITDA reconciliation, the Adjustments and Eliminations column refers to the elimination of net incomes from businesses controlled by Cosan for consolidation purposes. The same adjustment applies when we consider Raízen's results for EBITDA calculation. As a result of the spin-off executed on October 1st, 2014 find at the appendix of this report a table segregating the results of Cosan and Cosan Logistics.

B. Results by Business Unit**B.1 Raízen Combustíveis**

Below you will find the results of Raízen Combustíveis, the business unit that distributes and trades fuels through a network of franchised Shell service stations, in addition to supplying fuels to industrial clients and distributing aviation fuel.

Following the adoption of IFRS 11 – Joint Arrangements, starting in April 2013 Cosan no longer consolidates Raízen on its balance sheet, statement of income and cash flows, and the result from this business unit has been reported under “Equity Accounting Result” ever since. Given Raízen’s materiality in Cosan’s financial information, we will report this segment’s performance separately.

160.9	147.9	8.8%	Other Products	480.2	428.0	12.2%

Raízen Combustíveis’ net revenue in 3Q14 totaled R\$14.3 billion, representing an increase of 12.5% compared to the amount reported in 3Q13. This growth was driven primarily by a 6.1% increase in the total volume of fuel sold in the period, especially diesel and gasoline, which rose 7.4% and 7.9% respectively between the quarters.

Additionally, the average price of products sold increased 6.1% year-over-year, from R\$2,083/m3 in 3Q13 to R\$2,210/m3 in 3Q14, due mostly to the increase in gasoline and diesel prices charged by Petrobras in 2013, as well as the higher average price of ethanol in the period.

The network of Shell service stations ended 3Q14 with nearly 5,285 stations and 930 convenience stores.

Raízen Combustíveis' selling expenses totaled R\$299.9 million in 3Q14, up 14.0% year-on-year, mainly due to increased fuel sales volume in the period, which raises freight and logistics costs.

General and administrative expenses were R\$95.5 million in 3Q14, 4.2% lower than the R\$99.7 million reported in 3Q13.

Other operating revenues totaled R\$83.8 million in 3Q14, which included merchandising fees, convenience store royalties, rent, and revenues from the sale of assets.

Raízen Combustíveis' CAPEX totaled R\$195.7 million in 3Q14, an increase of 36.5% compared to 3Q13. Expenses in the period related to new and renewed contracts with distributors, investments in service stations network, spending on health, safety and environmental requirements (SSMA), as well as other expenses related with logistics and distribution.

3rd Quarter of Fiscal Year 2014

B.2 Raízen Energia

The following are the results for Raízen Energia, whose core business is the production and sale of a variety of products derived from sugarcane, including raw sugar (Very High Polarization - VHP), anhydrous and hydrous ethanol, as well as activities related to energy cogeneration from sugarcane bagasse and ethanol trading.

Following the adoption of IFRS 11 – Joint Arrangements, Cosan no longer consolidates Raízen on its balance sheet, statement of income and cash flows, and the result from this business unit has been reported under “Equity Accounting Result” ever since. Given Raízen’s materiality in Cosan’s financial information, we will report this segment’s performance separately.

Production Figures

Raízen Energia

At the end of 3Q14, Raízen Energia operated 24 sugar, ethanol and energy cogeneration mills, with a crushing capacity of 66.8 million tons of sugarcane per crop year.

496	428	16.0%	Hydrous Ethanol (‘000 cbm)	888	763	16.4%

In 3Q14, the volume of crushed sugarcane topped 24.5 million tons, 8.8% lower than in 3Q13 when the total reported was 26.8 million tons. This decrease was due to the dry weather experienced, which hampered the process of planting and growing of sugar cane, affecting the crushing level during the quarter. Of the total amount crushed, 53.4% was third-party sugarcane while 46.6% was own sugarcane, including agricultural partners.

In 3Q14, 96.2% of own sugarcane was harvested mechanically and the total recoverable sugars (TRS) of the sugarcane reached 139.9 kg/ton, a growth of 3.3% year-over-year mainly due to the dry weather conditions, causing a

higher concentration of total sugars in the harvested cane.

3rd Quarter of Fiscal Year 2014

Agricultural productivity in 3Q14 - measured in tons of sugarcane per hectare (TCH) - reached 73.8 t/ha, down 8.1% compared to 3Q13, when the reported figure was 86.8 t/ha, due to the drought suffered by the Mid-Southern region of Brazil since the end of the 2013/14 harvest.

In 3Q14, the average age of sugarcane fields was 3.4 years, reflecting the properly renewal of owned sugarcane plantation areas during the crop and off-crop season. The production mix prioritized sugar, with 56.6% of sugarcane crushed destined to sugar production, totaling 1.9 million tons of sugar and 903 million liters of ethanol produced in 3Q14.

In 3Q14, Raízen Energia's net revenue totaled R\$2.3 billion, down 28.2% compared to the value reported in 3Q13, which was R\$3.2 billion.

The lower volumes of sugar and ethanol sold, as well as the drop in the average prices of sugar and ethanol seen in the foreign market, were mainly responsible for the decrease in net revenue in the quarter. Additionally, there was a decline in revenue for the trading of ethanol in the foreign market.

Sugar Sales

In 3Q14, net revenue from sugar sales totaled R\$1.1 billion, down 28.0% compared to 3Q13. During the period, there was a 22.9% reduction in the volume of sugar sold, especially when considering the foreign market, which experienced a 30.8% reduction in sales compared to the same period last year. This was primarily due to the postponement of shipments to the end of the 2014/15 crop and consequent increase in inventories.

3rd Quarter of Fiscal Year 2014

Net income was also impacted by a 6.5% reduction in the average price of sugar, which fell to R\$924/ton in 3Q14 from R\$988/ton in 3Q13. On international markets, the fall in price was even steeper, declining 7.4% in line with the price of other commodities during the period.

Ethanol Sales

In 3Q14, net revenue from ethanol sales reached R\$952.0 million, a decrease of 37.4% compared to 3Q13.

The decrease in net revenue when comparing the quarters can be explained mainly by a 39.1% reduction of volumes sold due to the postponement of shipments of ethanol to the end of the 2014/15 crop, partially offset by a 2.7% increase of the average price in the period, which went from R\$1,352/cbm in 3Q13, to R\$1,389/cbm in 3Q14.

In 3Q14, net revenue from ethanol trading transactions in the foreign market reached R\$278.5 million, a total volume of 178.5 million liters.

Energy Cogeneration

All of Raízen Energia's 24 mills generate energy and are self-sufficient, 13 of which sell surplus energy from cogeneration.

In 3Q14, net revenue from energy sales totaled R\$230.6 million, up 50.4% compared to 3Q13, chiefly due to an average price increase of 51.0% to R\$258/MWh and a higher volume of transactions in the spot market during the period.

The total volume of energy sold in the quarter was 892,200 MWh, remaining almost in line with the volume reported during the same period last year.

Other Products and Services

In 3Q14, net revenue from other products and services totaled R\$73.6 million, down 9.6% year-over-year. These revenues are relative to the sale of sugarcane, steam, molasses and raw materials to service providers in the agricultural industry.

Cost of Goods Sold

Raízen Energia's cost of goods sold is reported together with the average unit costs, net of the effects of depreciation and amortization (cash cost).

Note 3: Average unit costs represent the cash cost, which is net of plantation and cultural treat depreciation and amortization, agricultural depreciation (machinery and equipment), industrial depreciation, and harvest off-season maintenance.

In 3Q14, Raízen Energia's cost of goods sold reached R\$2.0 billion, 22.3% lower than the figure recorded in 3Q13. This is mainly because of lower sales volumes of sugar and ethanol in the quarter due to the deferral of shipments to the end of the 2014/15 crop.

3rd Quarter of Fiscal Year 2014

Raízen Energia managed to lower its operating costs from what was reported in 3Q13, while achieving an improvement of raw material quality, with the TSR level up 3.3% quarter-on-quarter, from 135.4kg/t in 3Q13 to 139.9kg/t in 3Q14.

The unit cost of goods produced by Raízen Energia was also impacted by the following factors:

- Increase in the cost of the TSR per kilogram released by CONSECANA of 4.5%, which was R\$0.4637/kg in 3Q14 compared to R\$0.4439/kg in 3Q13, impacting the cost of third-party sugarcane;
- Decrease in the agricultural productivity of sugarcane fields, represented by a higher ton of cane per hectare (TCH) level, which went from 86.8 in 3Q13 to 73.8 in 3Q14.

In 3Q14, Raízen Energia's gross profit totaled R\$373.9 million, a decrease of 48.5% compared to 3Q13, when the gross profit reported was R\$726.1 million.

Gross profit from the sale of sugar was R\$204.3 million in 3Q14, down 54.0% year-over-year. Ethanol sales fell 55.7% year-over-year to R\$76.4 million. Unlike the results presented by sugar and ethanol, the sale of electric energy was higher than in 3Q13, resulting in gross profit of R\$162.0 million, up 72.3%.

The result from the sale of other products and services was a negative R\$58.7 million, impacted by the loss (non-cash impact) of R\$64.6 million from the negative effect of the biological asset's fair value and agricultural product recognized as a cost during 3Q14.

(137.3)	(134.8)	1.9%	General and Administrative Expenses	(398.7)	(401.6)	-0.7%

Raízen Energia's selling expenses were R\$146.0 million in 3Q14, 34.8% lower than the amount reported in 3Q13, due mostly to the lower sales volumes of sugar and ethanol for the export market, reducing freight and logistics costs.

General and administrative expenses increased by 1.9% during the period, from R\$134.8% in 3Q13 to R\$137.3 million in 3Q14.

Impacts of Hedge Accounting

Raízen Energia has been using cash flow hedge accounting for certain derivative financial instruments to hedge against the price risk for sugar over revenues from sugar exports.

The following table shows the expected transfer of gain/loss balances from the shareholders' equity on September 30, 2014 to the net operating income of Raízen Energia⁴ in future years, broken down by coverage period for the following hedging instruments.

Raizen Energia recorded Capex of R\$387.4 million in 3Q14, a decrease of 10.7% compared to 3Q13, when the amount was R\$433.6 million.

The expenditures in biological assets decreased by 10.9%, mainly due to the decline in the volume of planting of 15,000 ha due to unfavorable weather conditions (drought).

Investments in agricultural mechanization was down 76.4% compared to 3Q13, due to the acquisitions of cutting machinery/equipments, loading and transportation held last quarter, related to more attractive commercial terms.

Investments in expansion had an increase mainly due to the progress of the second-generation ethanol project. However there was a reduction of expenditures for the completion of the vinasse concentration project at Jataí and Zanin units and the straw separation project at the Barra unit.

219,120	85,511	n/a	Thermal Power	677,897	549,096	23.5%

The following explains the quarterly variations in volumes shown in the table above:

Residential: High temperatures in the third quarter of 2014 compared to the same period of 2013, which reduced the consumption for heating water for bathing/showering throughout the customer base with natural gas heaters. In addition, the program aimed at promoting water consumption reduction implemented by Sabesp has also heavily impacted the natural gas consumption at homes equipped with heaters.

Commercial: Addition of 1,556 new clients in the last 12 months - 370 in the third quarter of 2014.

Industrial: The performance of the economy and lower industrial activity in the period. In addition, the month of September was impacted due to the halting of work at the petrochemical complex, in which the major petrochemical plants suspended consumption for maintenance - an event that happens on average once every five years.

Cogeneration: This variation is mainly related to the loss of two clients whose plants discontinued operations at the end of 2013 due to market-related issues (Textile segment), which canceled out the effect of clients who remained in the base and consumed more than expected, due to the high price of electricity in the spot market.

3rd Quarter of Fiscal Year 2014

Automotive: Fleet renewal. Despite the lower volume sold, this was the third quarter that the number of installations of the VNG kit in vehicles increased compared to 2013 - with 873 conversions in 3Q14, 37.9% higher than in 3Q13, when 633 vehicles were converted.

Comgás' net revenue from sales and services reached R\$1.64 billion in 3Q14, a decrease of 2.3% compared to 3Q13, when the total was R\$1.68 billion.

Increased tariffs - as approved by ARSESP resolutions no. 455 and 496 - were the main drivers of the changes in Revenue from the Sale of Natural Gas. To establish the new tariffs, ARSESP considered the period's inflation, as well as the increased gas cost, especially imported gas. This cost is driven by the appreciation of the dollar and the average contracted oil price per barrel, which are the main components of the Bolivian gas cost.

3rd Quarter of Fiscal Year 2014

The decrease in the Construction Revenue is directly related to lower levels of investment during 3Q14. This variation can be explained by high investments in the RETAP project during 2013.

Cost of Goods and Services

3Q14 (Jul-Sep)	3Q13 (Jul-Sep)	Chg.%	COGS Amounts in R\$ MM	9M 14 (Jan-Sep)	9M 13 (Jan-Sep)	Chg.%

(126.2)	(204.4)	-38.2%	Construction - ICPC 01	(361.3)	(513.7)	-29.7%

In 3Q14, the cost of goods and services sold by Comgás totaled R\$ 1.1 billion, a decrease of 4.1% compared to 3Q13, when the value was reported at R\$ 1.2 billion.

The lower gas cost of natural gas can be explained mainly by the lower volume distributed in the quarter, excluding thermal generation. The variation in the construction cost line is directly linked to lower levels of investment during 3Q14.

It is worth emphasizing that the differences between the actual cost incurred and the cost of gas, included in the tariff and billed to clients, according to the tariff structure defined by ARSESP, are accumulated in the regulatory current account and passed through/billed as determined by the regulatory authority for periodic price adjustments or tariff revisions. This balance is adjusted on a monthly basis according to the SELIC rate. On September 30, 2014, the regulatory current account recorded a balance of R\$209.1 million for Comgás, after a recovery of R\$14.3 million in 3Q14.

According to accounting principles adopted in Brazil and internationally (IFRS), this balance is not accounted for and, therefore, when we refer to its normalization, it means we consider this asset and/or liability as if it had been accounted for.

(6.0)	(0.0)	n/a	Other Operating Revenues (Expenses)	(13.9)	(6.5)	n/a

Comgás' selling expenses totaled R\$165.1 million in 3Q14, 5.1% higher than R\$157.2 million reported in 3Q13, mainly caused by the depreciation of investments made in network expansion.

In 3Q14, general and administrative expenses were R\$75.2 million, 3.2% higher than in 3Q13, when it was R\$ 72.8 million.

EBITDA

3Q14 (Jul-Sep)	3Q13 (Jul-Sep)	Chg. %	EBITDA Amounts in R\$ MM	9M 14 (Jan-Sep)	9M 13 (Jan-Sep)	Chg. %

Comgás' EBITDA reached R\$377.4 million in 3Q14, an increase of 2.3% year-over-year, with EBITDA margin of 23.0%. Normalized by the regulatory current account, EBITDA topped R\$357.6 million for the quarter, up 2.5% year-over-year.

CAPEX

3Q14 (Jul-Sep)	3Q13 (Jul-Sep)	Chg %	CAPEX Amounts in R\$ MM	9M 14 (Jan-Sep)	9M 13 (Jan-Sep)	Chg %
171.7	248.4	-30.9%	CAPEX	491.7	642.8	-23.5%

In 3Q14, CAPEX reached R\$171.7 million, a decrease of 30.9% compared to the R\$248.4 million spent in the same period of 2013. This variation can be explained by high investments in the RETAP project during 2013.

Out of the total investments made in the quarter, approximately 73% was destined for expanding the gas distribution network. A total of 432 km of network was added during the quarter.

B.5 Cosan Lubrificantes

Results of the lubricants segment include the manufacturing and distribution of Mobil and Comma lubricants, resale of base oil and automotive specialties in Brazil and in 40 other countries through two plants located in Rio de Janeiro, Brazil, and in Kent, U.K.

Net Revenue

3Q14 (Jul-Sep)	3Q13 (Jul-Sep)	Chg.%	Sales Breakdown Amounts in R\$ MM	9M 14 (Jan-Sep)	9M 13 (Jan-Sep)	Chg.%
429.9	407.3	5.5%	Net Operating Revenue	1,202.1	1,151.1	4.4%

Net revenues from the sales of lubricants, resale of base oil and other products and services of Cosan Lubrificantes topped R\$429.9 million in 3Q14, 5.5% higher than the R\$407.3 million reported in 3Q13, due to an increase of 4.2% in volumes sold, especially driven by increased base oil volumes of 29.7%, which offset the drop in sales of finished lubricants.

The total unit average revenue increased 1.3% in the quarter, from R\$4,798/cbm reported in 3Q13 to R\$ 4,859/cbm.

(299.8)	(132.9)	n/a	(=) Financial, Net	(633.3)	(625.7)	1.2%

The financial result in 3Q14 reported a net financial expense of R\$299.8 million, compared to a net expense of R\$132.9 million recorded in 3Q13.

In 3Q14, debt charges were down by 21.6% compared to 3Q13, mainly due to the reduced level of debt between periods as a consequence of the corporate restructuring in 2Q14.

Revenue from financial investments ended the quarter with a positive amount of R\$33.9 million, compared to R\$29.0 million in 3Q13, due to the increase in the average volume of cash during the period, as well as the interest rate variation between periods.

Other charges and monetary variations, composed of interest contingencies, interest on tax, monetary variation and other interest, totaled a net expense of R\$53.5 million in 3Q14, compared to a net expense of R\$14.9 million in 3Q13.

The negative result of R\$92.8 million from foreign exchange rate variation in the quarter reflects the devaluation of the US Dollar against the Brazilian Real by 11.3% (R\$2.4510/US\$ on September 30, 2014 compared to R\$2.2025/US\$ on June 30, 2014), and its impact on debt denominated in dollars, causing a non-cash effect on the consolidated financial result. However, it is worth noting that all debts denominated in foreign currency are mainly hedged by foreign exchange swaps, except for the principal of the Perpetual Bond in the amount of US\$500 million.

(i) Reduction in the equity accounting result line of R\$115.2 million due to Raizen's results, outlined in previous sections, as well as the impact of foreign exchange rate variations on Raizen's debt;

(ii) Reduction of R\$166.9 million in financial results mainly due to the foreign exchange rate variation and the results from derivatives as described in the Financial Result section;

(iii) EBIT variation and profit of non-controlling shareholders of R\$27.7million.

3rd Quarter of Fiscal Year 2014

D. Loans and Financing

At the close of 3Q14, Cosan's pro forma consolidated gross debt (excluding PESA) reached R\$11.8 billion, compared to R\$11.3 billion in 2Q14. Below we report the debts of Cosan and its subsidiaries and of Raízen, presented pro forma at 50%.

F. Guidance

This section presents the guidance broken down by variation range for some key parameters in Cosan's consolidated results for the 2014. In addition, other parts of this Earnings Release may contain forecasts. Such projections and guidance are but estimates and indications, and as such, these do not represent any guarantee of prospective results.

This guidance considers the operations of the Cosan group today, which include Comgás, Rumo, Cosan Lubrificantes e Especialidades, Radar, and Other Businesses, as well as the operations of Raízen Combustíveis and Raízen Energia.

Cosan's consolidated EBITDA is pro forma, including 50% of the results of Raízen Combustíveis and Raízen Energia. As mentioned before, following the adoption of IFRS 11 – Joint Arrangements, Raízen is no longer proportionately consolidated in Cosan, and is only reported under “Equity Accounting Result,” considering our 50% interest in Net Income. Moreover, Comgás's EBITDA continues to be reported under Brazilian accounting principles (IFRS), which does not consider the effects of the Regulatory Current Account .

Report of Independent Registered Public Accounting Firm

To the Board of Directors and Shareholders
Cosan Limited

Introduction

We have reviewed the consolidated interim accounting information of Cosan Limited, included in the Quarterly Information Form (ITR) for the quarter ended September 30, 2014, comprising the balance sheet at that date and the statements of income and comprehensive income for the quarter and nine-month periods then ended, and the statements of changes in equity and cash flows for the nine-month period then ended, and a summary of significant accounting policies and other explanatory information.

Management is responsible for the preparation of the consolidated interim accounting information in accordance with the International Accounting Standard (IAS) 34 - Interim Financial Reporting issued by the International Accounting Standards Board (IASB), as well as the presentation of this information in accordance with the standards issued by the Brazilian Securities Commission (CVM), applicable to the preparation of the Quarterly Information (ITR). Our responsibility is to express a conclusion on this interim accounting information based on our review.

Scope of review

We conducted our review in accordance with Brazilian and International Standards on Reviews of Interim Financial Information (NBC TR 2410 – Review of Interim Financial Information Performed by the Independent Auditor of the Entity and ISRE 2410 – Review of Interim Financial Information Performed by the Independent Auditor of the Entity, respectively). A review of interim information consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with Brazilian and International Standards on Auditing and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

Conclusion on the consolidated interim information

Based on our review, nothing has come to our attention that causes us to believe that the accompanying consolidated interim accounting information included in the quarterly information referred to above has not been prepared, in all material respects, in accordance with IAS 34 applicable to the preparation of the Quarterly Information, and presented in accordance with the standards issued by the CVM.

Notes to the consolidated interim financial statements

For the nine month period ended September 30, 2014 and 2013
(Amounts in thousands of Brazilian Reais – R\$, unless otherwise stated)

1 Operations

Cosan Limited (“Cosan”) was incorporated in Bermuda on April 30, 2007. Cosan’s class A common shares are traded on the New York Stock Exchange (NYSE – CZZ). The BDRs (Brazilian Depositary Receipts) representing Cosan’s class A common shares are listed on the Brazilian Stock Exchange (BM&FBovespa – CZLT33). Mr. Rubens Ometto Silveira Mello is the ultimate controlling shareholder of Cosan. Cosan controls Cosan S.A. Indústria e Comércio (“Cosan S.A.”) and its subsidiaries with a 62.30 % interest. Cosan, Cosan S.A. and its subsidiaries are collectively referred to as the “Company”.

The Company’s primary activities are in the following business segments: (i) Piped natural gas distribution to part of the State of São Paulo through its subsidiary Companhia de Gás de São Paulo – COMGÁS (“COMGÁS”); (ii) Logistics services including transportation, port loading and storage of sugar, through its subsidiary Rumo Logística Operadora Multimodal S.A. (“Rumo”); (iii) Purchase, sale and leasing of agricultural land through its subsidiary, Radar Propriedades Agrícolas S.A. (“Radar”); (iv) Production and distribution of lubricants under the Mobil licensed trademark in Brazil, Bolivia, Uruguay and Paraguay, in addition to the European and Asian market using the Comma brand and corporate activities; and (v) other investments, in addition to the corporate structures of the Company (“Cosan’s other business”). At October 1, 2014 the segment “RUMO” was spun-off to “Cosan Logística S/A” according to Note 28.

The Company also holds interests in two jointly controlled entities (“Joint Ventures” or “JVs”): (i) Raízen Combustíveis S.A. (“Raízen Combustíveis”), fuel distribution business, and (ii) Raízen Energia S.A. (“Raízen Energia”), production and marketing of sugar, ethanol and energy cogeneration, produced from sugar cane bagasse. Cosan and Royal Dutch Shell (“Shell”) share control of the two entities, where each owns 50% of the economic control. These investments are accounted for under the equity method as from the adoption of IFRS 11.

The Annual General Shareholders' Meeting held on July 31, 2013, approved a fiscal year end change from March 31st to December 31st. This change was driven by changes in the Company’s investment portfolio, in which other businesses that do not use the harvest year (March 31st) have become more significant. With this change, the Company’s fiscal year begins on January 1st and ends on December 31st. These consolidated financial statements are for the nine months ended September 30, 2013.

2 Basis of preparation

2.1 Statement of compliance

The interim consolidated financial statements have been prepared in accordance with IAS 34 - Interim Financial Reporting, as issued by the International Accounting Standards Board (IASB). They do not include all the information required for a complete set of IFRS financial statements. However, selected explanatory notes are included to explain events and transactions that are significant to an understanding of the changes in the Company’s financial position and performance since the last annual consolidated financial statements as at and for the year ended December 31, 2013.

These interim consolidated financial statements were authorized for issue by the Board of Directors on October 29, 2014.

2.3 New standards and interpretations not yet adopted

New standards and amendments to standards and interpretations are effective for annual periods beginning after January 1, 2014, and have not been applied in preparing these interim consolidated financial statements. None of these is expected to have a significant effect on the interim consolidated financial statements of the Company, except the following set out below:

I. IFRS 9, 'Financial instruments', addresses the classification, measurement and recognition of financial assets and financial liabilities. IFRS 9 was issued in November 2009 and October 2010. It replaces the parts of IAS 39 that relate to the classification and measurement of financial instruments. IFRS 9 requires financial assets to be classified into two measurement categories: those measured as at fair value and those measured at amortized cost. The determination is made at initial recognition. The classification depends on the entity's business model for managing its financial instruments and the contractual cash flow characteristics of the instrument. For financial liabilities, the standard retains most of the IAS 39 requirements. The main change is that, in cases where the fair value option is taken for financial liabilities, the part of a fair value change due to an entity's own credit risk is recorded in other comprehensive income rather than the income statement, unless this creates an accounting mismatch. The Company is yet to assess IFRS 9's full impact. The Company will also consider the impact of the remaining phases of IFRS 9 when completed by the Board.

II. On May 28, 2014, the IASB issued IFRS 15 – Revenue from Contracts with Customers, which outlines a single comprehensive model of accounting for revenue arising from contracts with customers and supersedes current revenue recognition guidance, which is found currently across several standards and Interpretations within IFRSs. The core principle is that an entity recognizes revenue to reflect the transfer of goods or services, measured as the amount to which the entity expects to be entitled in exchange for those goods or services. However, the new Standard does not apply to transactions that are instead within the scope of the leasing standard.

The new standard is effective for reporting periods beginning on or after 1 January 2017, with earlier application permitted. Entities can choose to apply the Standard retrospectively or use a modified approach in the year of application. The Company is evaluating the impact of this new standard on the financial statements.

Operating segments

Segment information

The following segment information is based on the information used by Cosan's senior management to assess the performance of the operating segments and to make decisions with regards to the allocation of resources. This information is prepared on a consistent basis with the accounting policies used in the preparation of the consolidated financial statements. Cosan evaluates operating performance based on the measure of EBITDA. A reconciliation of EBITDA to profit (loss) of the period is presented below.

In addition, this segment holds interests in companies engaged in research and development on new technology;
- II. Raízen Combustíveis: distribution and marketing of fuels, mainly through a network of service stations under the "Shell" brand throughout Brazil;
- III. COMGÁS: distribution of piped natural gas to part of the State of São Paulo (approximately 180 municipalities, including the region called Greater São Paulo) to customers in the industrial, residential, commercial, automotive, thermogeneration and cogeneration sectors;
- IV. Rumo: logistics services for transport, storage and port loading of commodities, mainly for sugar products;
- V. Radar: management, buying, selling and leasing of agricultural properties;
- VI. Lubricants: production and distribution of lubricants under the Mobil brand in Brazil, Bolivia, Uruguay and Paraguay, as well as European and Asian market with a Comma trademark; Following the adoption of IFRS 11, whereby the Company no longer proportionally consolidates the results of Raízen Energia and Raízen Combustíveis, the Lubricants segment met the quantitative thresholds to be separately reportable, and the comparative segment information has been restated;
- VII. Cosan's other business: other investments, in addition to the corporate activities of the Company.

The segments Raízen Energia and Raízen Combustíveis are accounted for under the equity method and not consolidated in these interim consolidated financial statements in accordance with IFRS 11. However, the Company's senior management continues to review segment information of 100% of the results of these segments and a reconciliation of these segments to the entity's financial information is presented in the column "Joint Venture deconsolidation".

The following summarized assets and selected profit or loss information by segment were prepared on the same basis as the accounting practices used in the preparation of consolidated information:

(Amounts in thousands of Brazilian Reais – R\$, unless otherwise stated)

On October 10, 2013, ALL – América Latina Logística S.A. (“ALL”), issued a press release announcing that it had initiated legal actions in relation to the contracts entered with Rumo. Rumo then filed a request for arbitration against ALL, among other administrative and judicial measures to enforce its contractual rights and to require ALL comply with the terms of the agreement signed in 2009, as amended, including the 4th and 5th amendment signed on May 31, 2013. There are no judicial decisions suspending the validity of the contracts signed between ALL and Rumo.

On May 12, 2014, Rumo and ALL together requested the suspension of all court proceedings related to the performance of the agreements in accordance with art. 265, item II of CPC - Civil Procedure Code, as well as any resources or incident thereto, for a period of six months, without prejudice to the parties when the eventual resumption of its course.

As of September 30, 2014, Rumo has recorded accounts receivable from ALL amounting to R\$373,720 (R\$225,401 on December 31, 2013), net of allowance for losses amounting to R\$20,950, for services provided under the agreements in accordance with IAS 18 - Revenue. Additionally, revenue totaling R\$145,377, including penalties and interest, was not recorded because not all the criteria for revenue recognition have been met.

-----------------------	--------------

On May 2014, the Federal Government published Law No. 12.973, which converted into law the Provisional Measure No. 627 of November 11, 2013. This law brings profound changes in tax legislation, in particular regarding the appropriateness of tax rules to the new rules accounting introduced by Law No. 11.638 of December 28, 2007 and 11.941/2008, whose main objective was to converge the former Brazilian accounting rules with IFRS.

The Company is assessing Law No. 12.973 and so far no impact was identified in the financial statements.

(i) In 1993, Cosan Lubrificantes e Especialidades ("Cosan CLE") filed a lawsuit to challenge the balance sheet inflation accounting index ("IPC") established by the Federal Government in 1989, considering that this index did not reflect the actual rate of inflation. The use of this index led the Company to overpay income and social contribution taxes. Cosan CLE obtained a favorable preliminary court ruling that allowed it to recalculate its financial position, using indices that better reflected the actual inflation over the period. In doing so the Company adjusted the amounts of income and social contribution taxes payable and offset the overpayments in subsequent years until 1997. Despite the favorable court rulings, the tax authorities issued a notice of infringement to the Company challenging all of the taxes that were offset. The judicial demand has been reclassified to remote loss and therefore the provision of the R\$ 75,144 was reversed and R\$ 13,839 recorded under income tax expense for previous years and interest of the R\$ 61,305 for judicial demands.

b) Civil and environmental

The Company and its subsidiaries are parties to a number of civil legal claims related to (i) indemnification for material and moral damages, (ii) public civil claims related to burning of sugarcane stubble, and (iii) environmental matters.

The Company and its subsidiaries are also parties to a number of labor claims filed by former employees and service providers challenging, among other things, unpaid overtime, night shift premiums and risk premiums, employment guarantees, and the reimbursement of withholdings from payroll such as social contributions and trade union charges, among other.

Judicial claims deemed as possible losses, and therefore not accrued

a) Tax claims

Tax claims for which an unfavorable outcome is deemed possible and, therefore, not provisioned are as follow:

Financial risk management

Overview

The Company is exposed to the following risks related to the use of financial instruments:

- Foreign exchange risk;
- Interest rate risk;
- Credit risk;
- Liquidity risk.

This note presents information about the exposure of the Company and its subsidiaries to the above risks, as well as the objectives of the Company's risk management policies, these policy and processes for the assessment and management of risks.

Risk management structure

The risks inherent to each type of business market are managed and monitored by the Company and, where applicable, risk committees are convened to discuss and determine the hedging strategy of the Company in accordance with its policies and guidelines.

As at September 30, 2014 and December 31, 2013, the fair values relating to transactions involving derivative financial instruments to mitigate the Company's risk exposure were measured at fair market value using observable inputs such as quoted prices in active markets, or discounted cash flows based on market curves, and are presented below:

Hedge accounting – Fair Value

To mitigate the Company's risks from volatility of foreign exchange rates and interest rates, the Company entered into certain derivative contracts that were designated for hedge accounting (fair value hedge) as of July 1, 2013, with the purpose of protecting the "2023 Senior Notes". The hedge relationship consists of swapping the cash flows (cross currency interest rate swaps) with a foreign currency risk (USD) for local currency (BRL) and a fixed interest rate for a fixed percentage of the CDI (local market). The table below shows the fair value and gain recognized in the statement of profit or loss:

	September 30, 2014
Fair value of the Senior Notes 2023	1,234,277
Loss recognized in the financial result	(129,691)

Hedge accounting - Cash Flow

On September 1, 2014, the subsidiary Cosan Lubricants made the formal designation of derivative financial instruments to hedge exposure to exchange rate payments of imports of raw materials (base oil) subjected to hedge accounting, documenting: (i) the relationship of the hedge, (ii) the purpose and strategy of risk management in the subsidiary taking the hedge, (iii) identification of the financial instrument, (iv) the object or covered transaction, (v) the nature of the risk being covered, (vi) a description of the coverage, (vii) the demonstration of the correlation between the hedge and the hedged, and (viii) the retrospective and prospective effectiveness of the hedge.

The Company recorded gains and losses considered to be effective for the purposes of hedge accounting in a specific account in equity until the hedged (hedged item) is paid, at which time this gain or loss of each instrument should affect the same line that gave rise to the hedged item. On September 30, 2014 impacts recorded in equity are as follows:

	Market	Risk	September 30, 2014
Rate lock and exchange variation of other financial	Future Dollar	Exchange	583

Notes to the consolidated interim financial statements

For the nine month period ended September 30, 2014 and 2013

(Amounts in thousands of Brazilian Reais – R\$, unless otherwise stated)

Based on the financial instruments denominated in US Dollars at September 30, 2014 the Company performed a sensitivity analysis by increasing and decreasing the exchange rate for R\$/US\$ by 25% and 50%. The probable scenario considers the estimated exchange rates at the due date of the transactions, as follows:

	September 30, 2014	Exchange rate sensitivity analysis (R\$/US\$)				
		Probable	25%	Scenario 50%	-25%	-50%
At September 30, 2014	2.4510	2.4510	3.0638	3.6765	1.8383	1.2255

Considering the above scenarios, profit or loss would be impacted as follows:

Exchange rate exposure	September 30, 2014				
	Balance	25%	50%	-25%	-50%
Bonds and Debentures - USD	(1,241,138)	(310,285)	(620,569)	310,285	620,569

Pension plans

Defined benefit

The Company's subsidiary Cosan Lubrificantes e Especialidades S.A. has a non-contributory defined benefit pension plan (Futura, formerly Previd Exxon) for certain employees upon retirement. This plan was amended to close it to new entrants and it was approved by the relevant authorities on May 5, 2011. During the nine months ended on September 30, 2014, the amount of contributions totaled R\$ 7,005.

The obligations for post-employment benefits plans, include medical and early retirement incentives, disability and sickness allowance.

COMGÁS maintains with Bradesco Vida e Previdência S.A., a variable-contribution complementary open pension plan denominated Free Benefit Generating Plan (PGBL), approved by the Superintendency of Private Insurance (SUSEP). This is a fixed-income plan, the objective of which is to provide pension benefits in the form of lifetime monthly pensions.

Share-based payment

At the annual and extraordinary general shareholders’ meeting held on July 29, 2011, the guidelines for the outlining and structuring of the stock option compensation plan for Cosan S.A.’s executives and employees were approved, authorizing the issue of up to 5% of shares comprising Cosan S.A.’s total capital. This stock option plan was created to attract and retain executives and key employees, offering them the opportunity to become Cosan S.A.’s shareholders.

The changes in the plan during the period were:

	Number of options	Weighted- average exercise price
At December 31, 2013	9,345,000	23.74
Share options exercised	(1,818,000)	(25.11)

28 Subsequent events

On October 1, 2014 at the Extraordinary General Meeting (EGM), the Company's shareholders approved the partial spin-off of Cosan and merger of the spun-off portion into Cosan Logística S.A., which corresponds to Cosan's logistics operations. The spin-off seeks a segregation of the Company's activities in order that each business segment will focus on its sector, establishing suitable capital structures for each Company. It also seeks to provide the market with greater transparency on each Company's performance, which will allow better evaluation from shareholders and investors about each business individually, allowing resources to be allocated accordance with to each shareholder's interests and investment strategy. Cosan controls both Cosan S.A. and Cosan Logística with a 62.30% interest.

At September 30, 2014 the spun-off portion to Cosan Logística had a book value of R\$975,854. Due to the partial spin-off, all of the shares issued by Cosan Logística previously held by Cosan, were canceled and subsequently 405,856,814 new Cosan Log's shares were issued to the shareholders of Cosan in the proportion of 1:1. Cosan's shares will be traded ex-rights to receive Cosan Log's shares as from October 6, 2014. Cosan Log's shares will be traded on the BM&FBOVESPA S.A. - Bolsa de Valores, Mercadorias e Futuros ("BM&FBovespa"), initiating trading on October 6, 2014. These actions provided shareholders the same political and economic privileges conferred by shares of the Company they currently hold, without any distinction among investors. Furthermore, the Partial Spin-Off will not result in any change in the characteristics of Cosan's shares or the advantages conferred by them.

Due to the Partial Spin-Off of Cosan S.A. and consequent transfer of the Spun-off Portion to Cosan Logística, the share capital of Cosan S.A. will be reduced by R\$1,059,591, corresponding to the book value of the Spun-off Portion, without cancellation of Cosan S.A.'s shares, causing Cosan S.A.'s share capital to move from the current R\$4,691,822 to R\$3,632,231, remaining divided into 407,214,353 registered ordinary, nominative and without par value shares.

With approval of the spin-off, Cosan Logística will continue to invest in logistics assets replicating the successful model of the Company.
