

NUVEEN INSURED CALIFORNIA TAX FREE ADVANTAGE MUNICIPAL FUND

Form 497

November 22, 2002

PROSPECTUS

5,450,000 Shares

[LOGO] Nuveen Logo

Nuveen Insured California Tax-Free
Advantage Municipal Fund

Common Shares
\$15.00 per share

Investment Objectives. The Fund is a newly organized, non-diversified, closed-end management investment company. The Fund's investment objectives are:

- . to provide current income exempt from regular federal income tax, the alternative minimum tax applicable to individuals and California income tax; and
- . to enhance portfolio value relative to the municipal bond market by investing in tax-exempt municipal bonds that the Fund's investment adviser believes are underrated or undervalued or that represent municipal market sectors that are undervalued.

No Prior History. Because the Fund is newly organized, its common shares have no history of public trading. Shares of closed-end investment companies frequently trade at a discount from their net asset value. This risk may be greater for investors expecting to sell their shares in a relatively short period after completion of the public offering.

(continued on following page)

Investing in common shares involves certain risks. See "Risks" beginning on page 22.

Neither the Securities and Exchange Commission nor any state securities commission has approved or disapproved of these securities or determined if this Prospectus is truthful or complete. Any representation to the contrary is a criminal offense.

	Per Share	Total / (3) /
	-----	-----
Public Offering Price	\$15.000	\$81,750,000
Sales Load/(1)/	\$ 0.675	\$ 3,678,750
Estimated Offering Expenses/(2)/	\$ 0.030	\$ 163,500
Proceeds to the Fund	\$14.295	\$77,907,750

- (1) Certain underwriters that may also participate in any future offering of preferred shares of the Fund may receive additional compensation in that offering based on their participation in this offering. See "Underwriting."
- (2) Total expenses of issuance and distribution (other than underwriting

discounts and commissions) are estimated to be \$410,000. Nuveen has agreed to reimburse offering expenses in excess of \$0.03 per share.

(3) The Fund has granted the underwriters an option to purchase up to 817,500 additional common shares at the Public Offering Price less the Sales Load, solely to cover over-allotments, if any. If such option is exercised in full, the total Public Offering Price, Sales Load, Estimated Offering Expenses and Proceeds to the Fund will be approximately \$94,012,500, \$4,230,563, \$188,025 and \$89,593,913, respectively. See "Underwriting."

The underwriters expect to deliver the common shares to purchasers on or about November 26, 2002.

Salomon Smith Barney	Nuveen Investments
A.G. Edwards & Sons, Inc.	Prudential Securities
Crowell, Weedon & Co.	Raymond James
RBC Capital Markets	Wachovia Securities
Wedbush Morgan Securities Inc.	

November 21, 2002

The common shares have been approved for listing on the American Stock Exchange, subject to notice of issuance. The trading or "ticker" symbol of the common shares is "NKX".

Portfolio Contents. Under normal circumstances, the Fund will invest at least 80% of its net assets in a portfolio of municipal bonds that pay interest that is exempt from regular federal income tax, the alternative minimum tax applicable to individuals, and California income tax and that are covered by insurance guaranteeing the timely payment of principal and interest thereon. Through November 30, 2003, the Fund may invest in municipal bonds that pay interest that is exempt from regular federal income tax and the alternative minimum tax applicable to individuals but not from California income tax, provided that no more than 10% of the Fund's investment income during that time may be derived from investments in those bonds. The Fund may at all times invest up to 20% of its net assets in uninsured municipal bonds backed by an escrow or trust account containing sufficient U.S. Government or U.S. Government agency securities to ensure timely payment of principal and interest, or other municipal bonds that are investment grade quality. The Fund cannot assure you that it will achieve its investment objectives.

You should read this Prospectus, which contains important information about the Fund, before deciding whether to invest and retain it for future reference. A Statement of Additional Information, dated November 21, 2002 and as it may be supplemented, containing additional information about the Fund, has been filed with the Securities and Exchange Commission and is incorporated by reference in its entirety into this Prospectus. You may request a free copy of the Statement of Additional Information, the table of contents of which is on page 43 of this Prospectus, by calling (800) 257-8787 or by writing to the Fund, or you may obtain a copy (and other information regarding the Fund) from the Securities and Exchange Commission web site (<http://www.sec.gov>).

The Fund's common shares do not represent a deposit or obligation of, and are not guaranteed or endorsed by, any bank or other insured depository institution, and are not federally insured by the Federal Deposit Insurance Corporation, the Federal Reserve Board or any other government agency.

You should rely only on the information contained or incorporated by reference in this Prospectus. The Fund has not authorized anyone to provide you with different information. The Fund is not making an offer of these securities in any state where the offer is not permitted. You should not assume that the information contained in this Prospectus is accurate as of any date other than the date on the front of this Prospectus.

 Until December 16, 2002 (25 days after the date of this Prospectus), all dealers that buy, sell or trade the common shares, whether or not participating in this offering, may be required to deliver a Prospectus. This is in addition to the dealers' obligation to deliver a Prospectus when acting as underwriters and with respect to their unsold allotments or subscriptions.

PROSPECTUS SUMMARY

This is only a summary. You should review the more detailed information contained elsewhere in this Prospectus and in the Statement of Additional Information to understand the offering fully.

The Fund..... Nuveen Insured California Tax-Free Advantage Municipal Fund (the "Fund") is a newly organized, non-diversified, closed-end management investment company. The Fund is designed to provide tax benefits to investors who are residents of California. See "The Fund."

The Offering..... The Fund is offering 5,450,000 common shares of beneficial interest at \$15.00 per share through a group of underwriters (the "Underwriters") led by Salomon Smith Barney Inc., Nuveen Investments ("Nuveen"), A.G. Edwards & Sons, Inc., Prudential Securities Incorporated, Crowell, Weedon & Co., Raymond James & Associates, Inc., RBC Dain Rauscher, Inc., Wachovia Securities, Inc. and Wedbush Morgan Securities Inc. The common shares of beneficial interest are called "Common Shares" in the rest of this Prospectus. You must purchase at least 100 Common Shares in this offering. The Fund has given the Underwriters an option to purchase up to 817,500 additional Common Shares to cover orders in excess of 5,450,000 Common Shares. See "Underwriting." Nuveen has agreed to pay (i) all organizational expenses and (ii) offering costs (other than sales load) that exceed \$0.03 per Common Share.

Investment Objectives. The Fund's investment objectives are to provide current income exempt from regular federal income tax, the alternative minimum tax applicable to individuals and California income tax and enhance portfolio value relative to the municipal bond market by investing in tax-exempt municipal bonds that the Fund's investment adviser believes are underrated or undervalued or that represent municipal market sectors that are undervalued. Under normal circumstances, the Fund will invest at least 80% of its net assets in a portfolio of municipal bonds that:

- . pay interest that is exempt from regular federal and California income taxes and from the federal alternative minimum tax applicable to individuals; and
- . are covered by insurance guaranteeing the timely payment of principal and interest thereon.

This insurance does not protect the market value of portfolio holdings or the net asset value of the Fund.

With respect to its entire portfolio, the Fund will invest only in bonds and other eligible investments, whether or not insured, that at the time of investment are investment grade quality. Under normal circumstances, the Fund (i) expects to be fully invested (at least 95% of its assets) in municipal bonds that pay interest that is exempt from regular federal and California income taxes and (ii) will not invest in bonds that pay interest

subject to the federal alternative minimum tax applicable to individuals ("AMT Bonds"). After the completion of

4

the offering through November 30, 2003 (the "Invest-up Period"), the Fund may invest in municipal bonds that pay interest that is exempt from regular federal income tax and the alternative minimum tax applicable to individuals but not from California income tax ("Out of State Bonds"), provided that no more than 10% of the Fund's investment income during that time may be derived from investments in Out of State Bonds.

The Fund may at all times invest up to 20% of its net assets in (i) uninsured municipal bonds that are backed by an escrow or trust account containing sufficient U.S. Government or U.S. Government agency securities to ensure timely payment of principal and interest, or (ii) other municipal bonds that at the time of investment, are investment grade quality. An investment grade quality bond is a bond rated within the four highest grades (Baa or BBB or better by Moody's Investors Service, Inc. ("Moody's"), Standard & Poor's Corporation, a division of The McGraw-Hill Companies ("S&P") or Fitch Ratings ("Fitch")) by all nationally recognized statistical rating organizations (each an "NRSRO") that rate the bond or a bond that is unrated but judged to be of comparable quality by the Fund's investment adviser. The Fund will primarily invest in municipal bonds with long-term maturities in order to maintain a weighted average maturity of 15-30 years, but the weighted average maturity of obligations held by the Fund may be shortened, depending on market conditions. The Fund cannot assure you that it will attain its investment objectives. See "The Fund's Investments."

Tax Considerations.... If the Fund invests in Out of State Bonds, a portion of your dividends will be subject to California income tax. In addition, distributions of ordinary taxable income (including any net short-term capital gain) will be taxable to shareholders as ordinary income, and capital gain dividends will be subject to capital gains taxes. See "Tax Matters."

Proposed Offering of MuniPreferred(R) Shares Subject to market conditions, approximately one to three months after completion of this offering, the Fund intends to offer preferred shares of beneficial interest ("MuniPreferred Shares") representing approximately 35% of the Fund's capital after their issuance. The issuance of MuniPreferred Shares will leverage your investment in Common Shares. Leverage involves special risks. There is no assurance that the Fund will issue MuniPreferred Shares or that, if issued, the Fund's leveraging strategy will be

successful. See "Risks--Leverage Risk." The money the Fund obtains by selling the MuniPreferred Shares will be invested in long-term municipal bonds, which generally will pay fixed rates of interest over the life of the bond. The MuniPreferred Shares will pay dividends based on shorter-term rates, which will be reset frequently. So long as the rate of return, net of applicable Fund expenses, on the long-term bonds purchased by the Fund exceeds MuniPreferred Share dividend rates as reset periodically, the investment of the proceeds of the MuniPreferred Shares will generate more income than will be needed

5

to pay dividends on the MuniPreferred Shares. If so, the excess will be used to pay higher dividends to holders of Common Shares ("Common Shareholders"). However, the Fund cannot assure you that the issuance of MuniPreferred Shares will result in a higher yield on your Common Shares. Once MuniPreferred Shares are issued, the net asset value and market price of the Common Shares and the yield to Common Shareholders will be more volatile. See "MuniPreferred Shares and Leverage" and "Description of Shares--MuniPreferred Shares."

Investment Adviser.... Nuveen Advisory Corp. ("Nuveen Advisory") will be the Fund's investment adviser. Nuveen Advisory will receive an annual fee, payable monthly, in a maximum amount equal to .65% of the Fund's average daily net assets (including assets attributable to any MuniPreferred Shares that may be outstanding (sometimes referred to herein as "Managed Assets")), with lower fee levels for assets that exceed \$125 million. Nuveen Advisory has contractually agreed to reimburse the Fund for fees and expenses in the amount of .32% of average daily Managed Assets of the Fund for the first five full years of the Fund's operations (through November 30, 2007), and for a declining amount for an additional three years (through November 30, 2010). Nuveen Advisory is a wholly owned subsidiary of The John Nuveen Company. For more information on fees and expenses, including fees attributable to Common Shares, see "Management of the Fund."

Distributions..... Commencing with the Fund's first dividend, the Fund intends to make regular monthly cash distributions to Common Shareholders at a level rate (stated in terms of a fixed cents per Common Share dividend rate) based on the projected performance of the Fund. The Fund's ability to maintain a level Common Share dividend rate will depend on a number of factors, including dividends payable on the MuniPreferred Shares. As portfolio and market conditions change, the rate of dividends on the Common Shares and the Fund's dividend policy could change. Over time, the Fund will distribute all of its net investment income (after it pays accrued

dividends on any outstanding MuniPreferred Shares). In addition, at least annually, the Fund intends to distribute net capital gain and taxable ordinary income, if any, to you so long as the net capital gain and taxable ordinary income are not necessary to pay accrued dividends on, or redeem or liquidate, any MuniPreferred Shares. Your initial distribution is expected to be declared approximately 45 days, and paid approximately 60 to 90 days, from the completion of this offering, depending on market conditions. You may elect to automatically reinvest some or all of your distributions in additional Common Shares under the Fund's Dividend Reinvestment Plan. See "Distributions" and "Dividend Reinvestment Plan."

Listing..... The Common Shares have been approved for listing on the American Stock Exchange, subject to notice of issuance. See "Description of Shares--Common Shares." The trading or "ticker" symbol of the

6

Common Shares is "NKX." Because of this exchange listing, the Fund may sometimes be referred to in public communications as a "closed-end exchange-traded fund" or "exchange-traded fund."

Custodian..... State Street Bank and Trust Company will serve as custodian of the Fund's assets. See "Custodian and Transfer Agent."

Market Price of Shares Shares of closed-end investment companies frequently trade at prices lower than net asset value. Shares of closed-end investment companies like the Fund that invest predominately in investment grade municipal bonds have during some periods traded at prices higher than net asset value and have during other periods traded at prices lower than net asset value. The Fund cannot assure you that Common Shares will trade at a price higher than net asset value in the future. Net asset value will be reduced immediately following the offering by the sales load and the amount of organization and offering expenses paid by the Fund. See "Use of Proceeds." In addition to net asset value, market price may be affected by such factors as dividend levels (which are in turn affected by expenses), call protection, dividend stability, portfolio credit quality and liquidity and market supply and demand. See "MuniPreferred Shares and Leverage," "Risks," "Description of Shares," "Repurchase of Fund Shares; Conversion to Open-End Fund" and the Statement of Additional Information under "Repurchase of Fund Shares; Conversion to Open-End Fund." The Common Shares are designed primarily for long-term investors, and you should not view the Fund as a vehicle for trading purposes.

Special Risk

Considerations..... No Operating History. The Fund is a newly organized, non-diversified, closed-end management investment company with no history of operations.

Interest Rate Risk. Generally, when market interest rates fall, bond prices rise, and vice versa. Interest rate risk is the risk that the municipal bonds in the Fund's portfolio will decline in value because of increases in market interest rates. The prices of longer-term bonds fluctuate more than prices of shorter-term bonds as interest rates change. Conversely, the values of lower-rated and comparable unrated debt securities are less likely than those of investment grade and comparable unrated debt securities to fluctuate inversely with changes in interest rates. Because the Fund will invest primarily in long-term bonds, the Common Share net asset value and market price per share will fluctuate more in response to changes in market interest rates than if the Fund invested primarily in shorter-term bonds. The Fund's use of leverage, as described below, will tend to increase Common Share interest rate risk. Market interest rates for investment grade municipal bonds in which the Fund will primarily invest have recently declined significantly below the recent historical average rates for such bonds. This decline may have increased the risk that these rates will rise in the future (which would cause the value of the Fund's net assets to decline) and the degree to which

7

asset values may decline in such event; however, historical interest rate levels are not necessarily predictive of future interest rate levels. See "Risks--Interest Rate Risk."

Credit Risk. Credit risk is the risk that one or more municipal bonds in the Fund's portfolio will decline in price, or fail to pay interest or principal when due, because the issuer of the bond experiences a decline in its financial status. See "Risks--Credit Risk."

Concentration in California Issuers. The Fund's policy of investing primarily in municipal obligations of issuers located in California makes the Fund more susceptible to adverse economic, political or regulatory occurrences affecting such issuers. See "Risks--Concentration Risk."

Leverage Risk. The use of leverage through the issuance of MuniPreferred Shares creates an opportunity for increased Common Share net income and returns, but also creates special risks for Common Shareholders. There is no assurance that the Fund's leveraging strategy will be successful. It is anticipated that MuniPreferred dividends will be based on shorter-term municipal bond rates of return

(which would be redetermined periodically, pursuant to an auction process), and that the Fund will invest the proceeds of the MuniPreferred Shares offering in long-term, typically fixed rate, municipal bonds. So long as the Fund's municipal bond portfolio provides a higher rate of return (net of Fund expenses) than the MuniPreferred dividend rate, as reset periodically, the leverage will cause Common Shareholders to receive a higher current rate of return than if the Fund were not leveraged. If, however, long and/or short-term rates rise, the MuniPreferred dividend rate could exceed the rate of return on long-term bonds held by the Fund that were acquired during periods of generally lower interest rates, reducing return to Common Shareholders. In addition, the Fund will pay (and Common Shareholders will bear) any costs and expenses relating to the issuance and ongoing maintenance of MuniPreferred Shares (for example, distribution related expenses such as a participation fee paid at what the Fund expects will be an annual rate of 0.25% of MuniPreferred Share liquidation preference to broker-dealers participating in MuniPreferred Share auctions).

Leverage creates two major types of risks for Common Shareholders:

- . the likelihood of greater volatility of net asset value and market price of Common Shares, because changes in the value of the Fund's bond portfolio (including bonds bought with the proceeds of the MuniPreferred Shares offering) are borne entirely by the Common Shareholders; and
- . the possibility either that Common Share income will fall if the MuniPreferred dividend rate rises, or that Common Share income will fluctuate because the MuniPreferred dividend rate varies.

See "Risks--Leverage Risk."

Municipal Bond Market Risk. The amount of public information available about the municipal bonds in the Fund's portfolio is generally less than that for corporate equities or bonds, and the investment performance of the Fund may therefore be more dependent on the analytical abilities of Nuveen Advisory than if the Fund were a stock fund or taxable bond fund. The secondary market for municipal bonds, also tends to be less well-developed or liquid than many other securities markets, which may adversely affect the Fund's ability to sell its bonds at attractive prices. See "Risks--Municipal Bond Market Risk."

Municipal Bond Insurance. In the event Moody's, S&P or Fitch (or all of them) should downgrade its assessment of the claims-paying ability of a particular insurer, it (or they) could also be expected to downgrade the ratings assigned to municipal bonds insured by such insurer, and municipal bonds insured under Portfolio Insurance (as defined below) issued by such insurer also would be of reduced quality in the portfolio of the Fund. Any such downgrade could have an adverse impact on the net asset value and market price of the Common Shares.

In addition, the Fund may be subject to certain restrictions on investments imposed by guidelines of the insurance companies issuing Portfolio Insurance. The Fund does not expect these guidelines to prevent Nuveen Advisory from managing the Fund's portfolio in accordance with the Fund's investment objectives and policies.

Non-Diversification. Because the Fund is classified as "non-diversified" under the Investment Company Act of 1940, as amended (the "1940 Act"), it can invest a greater portion of its assets in obligations of a single issuer than a "diversified" fund. As a result, the Fund will be more susceptible than a diversified fund to any single corporate, economic, political or regulatory occurrence. See "The Fund's Investments" and "Risks--Non-Diversification." Also, the Fund's policy of generally investing in bonds that are exempt from the federal alternative minimum tax applicable to individuals may prevent the Fund from investing in certain kinds of bonds and thereby limit the Fund's ability to optimally diversify its portfolio.

Anti-Takeover Provisions. The Fund's Declaration of Trust (the "Declaration") includes provisions that could limit the ability of other entities or persons to acquire control of the Fund or convert the Fund to open-end status. The provisions of the Declaration described above could have the effect of depriving the Common Shareholders of opportunities to sell their Common Shares at a premium over the then current market price of the Common Shares. See "Certain Provisions in the Declaration of Trust" and "Risks--Anti-Takeover Provisions."

SUMMARY OF FUND EXPENSES

The Annual Expenses table below assumes the issuance of MuniPreferred Shares in an amount equal to 35% of the Fund's capital (after their issuance), and shows Fund expenses as a percentage of net assets attributable to Common Shares.

Shareholder Transaction Expenses

Edgar Filing: NUVEEN INSURED CALIFORNIA TAX FREE ADVANTAGE MUNICIPAL FUND - Form 497

Sales Load Paid by You (as a percentage of offering price)..... 4.50%
 Offering Expenses Borne by the Fund (as a percentage of offering price)/(1)(2)/ .20%
 Dividend Reinvestment Plan Fees..... None(3)

	Percentage of Net Assets Attributable to Common Shares(4) -----
Annual Expenses	
Management Fees.....	1.00%
Other Expenses.....	.31%

Total Annual Expenses.....	1.31%
Fee and Expense Reimbursement (Years 1-5)	(.49%)(5)

Total Annual Expenses (Years 1-5).....	.82%(5)
	====

 (1)Nuveen has agreed to pay offering costs (other than sales load) that exceed \$0.03 per Common Share.

(2)If the Fund offers MuniPreferred Shares, costs of that offering, estimated to be approximately 2.2% of the total amount of the MuniPreferred Share offering, will effectively be borne by the Common Shareholders and result in a reduction of the net asset value of the Common Shares. Assuming the issuance of MuniPreferred Shares in the amount equal to 35% of the Fund's total capital (after issuance), those offering costs are estimated to be approximately \$0.18 per Common Share (1.20% of the offering price).

(3)You will be charged a \$2.50 service charge and pay brokerage charges if you direct State Street Bank and Trust Company, as agent for the Common Shareholders (the "Plan Agent") to sell your Common Shares held in a dividend reinvestment account.

(4)Stated as percentages of net assets attributable to Common Shares. Assuming no issuance of MuniPreferred Shares, the Fund's expenses would be estimated to be as follows:

	Percentage of Net Assets Attributable to Common Shares -----
Annual Expenses	
Management Fees.....	.65%
Other Expenses.....	.20%

Total Annual Expenses.....	.85%

Edgar Filing: NUVEEN INSURED CALIFORNIA TAX FREE ADVANTAGE MUNICIPAL FUND - Form 497

Fees and Expense Reimbursement (Years 1-5).....	(.32%)/(5)/ ----
Total Annual Expenses (Years 1-5).....	.53%/(5)/ ====

(5) Nuveen Advisory has contractually agreed to reimburse the Fund for fees and expenses in the amount of .32% of average daily Managed Assets for the first 5 full years of the Fund's operations, .24% of average daily Managed Assets in year 6, .16% in year 7 and .08% in year 8. Assuming the issuance of MuniPreferred Shares in an amount equal to 35% of the Fund's total assets (including the amount obtained from leverage) and calculated as a percentage of net assets attributable to Common Shares, those amounts would be .49% for the first 5 years, .37% in year 6, .25% in year 7 and .12% in year 8. Without the reimbursement, "Total Annual Expenses" would be estimated to be 1.31% of average daily net assets attributable to Common Shares (or, assuming no issuance of MuniPreferred Shares, .85% of average daily net assets).

The purpose of the table above is to help you understand all fees and expenses that you, as a Common Shareholder, would bear directly or indirectly. The expenses shown in the table are based on estimated amounts for the Fund's first year of operations and assume that the Fund issues approximately 12,300,000 Common Shares. See "Management of the Fund" and "Dividend Reinvestment Plan."

The following example illustrates the expenses (including the sales load of \$45, estimated offering expenses of this offering of \$2 and the estimated MuniPreferred Share offering costs assuming MuniPreferred Shares are issued representing 35% of the Fund's total capital (after issuance) of \$12) that you would pay on a \$1,000 investment in Common Shares, assuming (1) total annual expenses of .82% of net assets attributable to Common Shares in years 1 through 5, increasing to 1.31% in years 9 and 10 and (2) a 5% annual return:/(1)/

1 Year	3 Years	5 Years	10 Years/(2)/
-----	-----	-----	-----
\$67	\$84	\$102	\$176

The example should not be considered a representation of future expenses. Actual expenses may be higher or lower.

-
- (1) The example assumes that the estimated Other Expenses set forth in the Annual Expenses table are accurate, that fees and expenses increase as described in note 2 below and that all dividends and distributions are reinvested at Common Share net asset value. Actual expenses may be greater or less than those assumed. Moreover, the Fund's actual rate of return may be greater or less than the hypothetical 5% return shown in the example.
 - (2) Assumes reimbursement of fees and expenses of .24% of average daily Managed Assets in year 6, .16% in year 7 and .08% in year 8. Nuveen Advisory has not agreed to reimburse the Fund for any portion of its fees and expenses beyond November 30, 2010. See footnote 5 above and "Management of the Fund--Investment Management Agreement."

THE FUND

The Fund is a newly organized, non-diversified, closed-end management investment company registered under the 1940 Act. The Fund was organized as a Massachusetts business trust on July 29, 2002, pursuant to a Declaration

governed by the laws of the Commonwealth of Massachusetts. As a newly organized entity, the Fund has no operating history. The Fund's principal office is located at 333 West Wacker Drive, Chicago, Illinois 60606, and its telephone number is (800) 257-8787. The Fund is designed to provide tax benefits to investors who are residents of California.

USE OF PROCEEDS

The net proceeds of the offering of Common Shares will be approximately \$77,907,750 (\$89,593,913 if the Underwriters exercise the over-allotment option in full) after payment of the estimated organization and offering costs. Nuveen has agreed to pay (i) all organizational expenses and (ii) offering costs (other than sales load) that exceed \$0.03 per Common Share. The Fund will invest the net proceeds of the offering in accordance with the Fund's investment objectives and policies as stated below. It is presently anticipated that the Fund will be able to invest substantially all of the net proceeds in municipal bonds that meet those investment objectives and policies within three months after the completion of the offering. Pending such investment, it is anticipated that the proceeds will be invested in short-term, tax-exempt securities in accordance with the Fund's investment policies.

THE FUND'S INVESTMENTS

Investment Objectives and Policies

The Fund's investment objectives are:

- . to provide current income exempt from regular federal income tax, the alternative minimum tax applicable to individuals and California income tax; and
- . to enhance portfolio value relative to the municipal bond market by investing in tax-exempt municipal bonds that Nuveen Advisory believes are underrated or undervalued or that represent municipal market sectors that are undervalued.

Underrated municipal bonds are those whose ratings do not, in Nuveen Advisory's opinion, reflect their true creditworthiness. Undervalued municipal bonds are bonds that, in Nuveen Advisory's opinion, are worth more than the value assigned to them in the marketplace. Nuveen Advisory may at times believe that bonds associated with a particular municipal market sector (for example, electric utilities), or issued by a particular municipal issuer, are undervalued. Nuveen Advisory may purchase such a bond for the Fund's portfolio because it represents a market sector or issuer that Nuveen Advisory considers undervalued, even if the value of the particular bond appears to be consistent with the value of similar bonds. Municipal bonds of particular types (e.g., hospital bonds, industrial revenue bonds or bonds issued by a particular municipal issuer) may be undervalued because there is a temporary excess of supply in that market sector, or because of a general decline in the market price of municipal bonds of the market sector for reasons that do not apply to the particular municipal bonds that are considered undervalued. The Fund's investment in underrated or undervalued municipal bonds will be based on Nuveen Advisory's belief that their yield is higher than that available on bonds bearing equivalent levels of interest rate risk, credit risk and other forms of risk, and that their prices will ultimately rise (relative to the market) to reflect their true value. The Fund attempts to increase its portfolio value relative to the municipal bond market by prudent selection of municipal bonds regardless of the direction the market may move. There can be no assurance that the Fund's attempt to increase its portfolio value relative to the municipal bond market will succeed. To the extent that it does succeed, however, such success

would increase the amount of net capital gains or reduce the amount of net capital losses that the Fund would otherwise have realized. While this incremental increase in net realized capital gains due to successful value investing, if any, is expected to be modest over time, it would tend to result in the distribution, over time, of a modestly greater amount of taxable capital gains to Common Shareholders.

Under normal circumstances, the Fund will invest at least 80% of its Managed Assets in a portfolio of municipal bonds that:

- . pay interest that is exempt from regular federal and California income taxes and from the federal alternative minimum tax applicable to individuals; and
- . are covered by insurance guaranteeing the timely payment of principal and interest thereon.

This insurance does not protect the market value of portfolio holdings or the net asset value of the Fund.

With respect to its entire portfolio, the Fund will invest only in bonds and other eligible investments, whether or not insured, that at time of investment are investment grade quality. Under normal circumstances, the Fund (i) expects to be fully invested (at least 95% of its assets) in municipal bonds that pay interest that is exempt from regular federal and California income taxes and (ii) will not invest in AMT Bonds. During the Invest-up Period, the Fund may invest in Out of State Bonds, provided that no more than 10% of the Fund's investment income during that time may be derived from Out of State Bonds. The Fund will purchase Out of State Bonds if other suitable investments are not available. Investment in Out of State Bonds would result in a portion of your dividends being subject to California income tax. For more information, see the Statement of Additional Information. In addition, capital gain dividends will be subject to capital gains taxes. See "Tax Matters."

The Fund may at all times invest up to 20% of its net assets in (i) uninsured municipal bonds that are backed by an escrow or trust account containing sufficient U.S. Government or U.S. Government agency securities to ensure timely payment of principal and interest, or (ii) other municipal bonds that, at the time of investment, are investment grade quality. Investment grade quality means that such bonds are rated by all NRSROs that rate the bond within the four highest grades (Baa or BBB or better by Moody's, S&P or Fitch) or are unrated but judged to be of comparable quality by Nuveen Advisory. The foregoing credit quality policy applies only at the time a security is purchased, and the Fund is not required to dispose of a security in the event that a rating agency downgrades its assessment of the credit characteristics of a particular issue. In determining whether to retain or sell such a security, Nuveen Advisory may consider such factors as Nuveen Advisory's assessment of the credit quality of the issuer of such security, the price at which such security could be sold and the rating, if any, assigned to such security by other rating agencies. A general description of Moody's, S&P's and Fitch's ratings of municipal bonds is set forth in Appendix A to the Statement of Additional Information. See "--Municipal Bonds" below for a general description of the economic and credit characteristics of municipal issuers in California. The Fund may also invest in securities of other open- or closed-end investment companies that invest primarily in municipal bonds of the types in which the Fund may invest directly. See "--Other Investment Companies."

Each insured municipal bond that the Fund acquires will be (1) covered by an

insurance policy applicable to a specific security and obtained by the issuer of the security or a third party at the time of original issuance ("Original Issue Insurance"), (2) covered by an insurance policy applicable to a specific security and obtained by the Fund or a third party subsequent to the time of original issuance ("Secondary Market Insurance"), or (3) covered by a master municipal insurance policy purchased by the Fund ("Portfolio Insurance"). See "--Municipal Bond Insurance." The Fund, as non-fundamental policies that can be changed by the Board of Trustees, (A) will only buy Portfolio Insurance from insurers whose claims-paying ability Moody's rates "Aaa" or S&P or Fitch rates "AAA" and (B) will

13

maintain at least 80% of its total Managed Assets in municipal bonds covered by insurance from insurers with a claims-paying ability rated, at the time of the bond's purchase, "Aaa" by Moody's or "AAA" by S&P or Fitch.

The credit quality of companies that provide insurance on bonds will affect the value of those bonds. Although the insurance feature reduces certain financial risks, the premiums for insurance and the higher market price paid for insured obligations may reduce the Fund's income. The insurance feature does not guarantee the market value of the insured obligations or the net asset value of the Common Shares.

The Fund may at all times invest up to 20% of its net assets in uninsured municipal bonds that are entitled to the benefit of an escrow or trust account that contains securities issued or guaranteed by the U.S. Government or U.S. Government agencies backed by the full faith and credit of the United States, and sufficient in amount to ensure the payment of interest and principal on the original interest payment and maturity dates ("collateralized obligations"). These collateralized obligations generally will not be insured and will include, but are not limited to, municipal bonds that have been (1) advance refunded where the proceeds of the refunding have been used to buy U.S. Government or U.S. Government agency securities that are placed in escrow and whose interest or maturing principal payments, or both, are sufficient to cover the remaining scheduled debt service on that municipal bond; or (2) issued under state or local housing finance programs that use the issuance proceeds to fund mortgages that are then exchanged for U.S. Government or U.S. Government agency securities and deposited with a trustee as security for those municipal bonds. These collateralized obligations are normally regarded as having the credit characteristics of the underlying U.S. Government or U.S. Government agency securities.

Upon Nuveen Advisory's recommendation, during temporary defensive periods and in order to keep the Fund's cash fully invested, including the period during which the net proceeds of the offering of Common Shares or MuniPreferred Shares are being invested, the Fund may deviate from its investment objectives and policies and invest up to 100% of its net assets in short-term investments including high quality, short-term securities that may be either tax-exempt or taxable. The Fund intends to invest in taxable short-term investments only in the event that suitable tax-exempt short-term investments are not available at reasonable prices and yields. Investment in such short-term investments would result in a portion of your dividends being subject to regular federal income tax, the alternative minimum tax applicable to individuals and California income tax. For more information, see the Statement of Additional Information. Likewise, the Fund may deviate from its normal investment policies and invest up to 5% of its net assets in tax-exempt or taxable fixed-income or equity securities of an issuer of municipal bonds that the Fund already owns for the purpose of acquiring control of that issuer when Nuveen Advisory determines that such investment should enable the Fund to better maximize the value of its

existing investment. The Fund does not intend to change this policy without prior notification to shareholders. See the Statement of Additional Information under "Other Investment Policies and Techniques--Miscellaneous Investments."

The Fund cannot change (i) its fundamental investment restrictions set forth in the Statement of Additional Information or (ii) its policy to invest 80% of its Managed Assets in a portfolio of municipal bonds that pay interest that is exempt from regular federal and California income taxes and the federal alternative minimum tax applicable to individuals without the approval of the holders of a "majority of the outstanding" Common Shares and, if issued, MuniPreferred Shares voting together as a single class, and of the holders of a "majority of the outstanding" MuniPreferred Shares voting as a separate class. When used with respect to particular shares of the Fund, a "majority of the outstanding" shares means (i) 67% or more of the shares present at a meeting, if the holders of more than 50% of the shares are present or represented by proxy, or (ii) more than 50% of the shares, whichever is less. See "Description of Shares--MuniPreferred Shares--Voting Rights" and the Statement of Additional Information under "Description of Shares--MuniPreferred Shares--Voting Rights" for additional information with respect to the voting rights of holders of MuniPreferred Shares. Other than as noted above, the investment objectives and policies of the Fund may be changed by the Board without shareholder action.

14

Municipal Bonds

Municipal bonds are either general obligation or revenue bonds and typically are issued to finance public projects (such as roads or public buildings), to pay general operating expenses, or to refinance outstanding debt. Municipal bonds may also be issued for private activities, such as housing, medical and educational facility construction, or for privately owned industrial development and pollution control projects. General obligation bonds are backed by the full faith and credit, or taxing authority, of the issuer and may be repaid from any revenue source; revenue bonds may be repaid only from the revenues of a specific facility or source. The Fund also may purchase municipal bonds that represent lease obligations. These carry special risks because the issuer of the bonds may not be obligated to appropriate money annually to make payments under the lease. In order to reduce this risk, the Fund will only purchase municipal bonds representing lease obligations where Nuveen Advisory believes the issuer has a strong incentive to continue making appropriations until maturity.

The municipal bonds in which the Fund will invest are generally issued by the State of California, a municipality in California, or a political subdivision or agency or instrumentality of such State or municipality ("California municipal bonds"), and pay interest that, in the opinion of bond counsel to the issuer (or on the basis of other authority believed by Nuveen Advisory to be reliable), is exempt from regular federal income tax, the alternative minimum tax applicable to individuals and California income tax. The Fund may invest in municipal bonds issued by United States territories (such as Puerto Rico or Guam) that pay interest that is exempt from regular federal and California income taxes and the federal alternative minimum tax applicable to individuals. During the Invest-up Period, the Fund also may invest in Out of State Bonds subject to the limitations described under "--Investment Objectives and Policies." It is a fundamental policy of the Fund that its investments in municipal bonds on which the interest is not taxable under regular federal and California income tax or the federal alternative minimum tax applicable to individuals will, under normal circumstances, comprise at least 80% of the Fund's Managed Assets.

The yields on municipal bonds depend on a variety of factors, including prevailing interest rates and the condition of the general money market and the municipal bond market, the size of a particular offering, the maturity of the obligation and the rating of the issue. The market value of municipal bonds will vary with changes in interest rate levels and as a result of changing evaluations of the ability of their issuers to meet interest and principal payments.

The Fund will primarily invest in municipal bonds with long-term maturities in order to maintain a weighted average maturity of 15-30 years, but the weighted average maturity of obligations held by the Fund may be shortened, depending on market conditions.

Municipal Bond Insurance

Each insured municipal bond the Fund acquires will be covered by Original Issue Insurance, Secondary Market Insurance or Portfolio Insurance. The Fund expects initially to emphasize investments in municipal bonds insured under bond-specific insurance policies (i.e., Original Issue or Secondary Market Insurance). The Fund may obtain Portfolio Insurance from the insurers described in Appendix C to the Statement of Additional Information. The Fund, as a non-fundamental policy that can be changed by the Board of Trustees, will only obtain policies of Portfolio Insurance issued by insurers whose claims-paying ability is rated "Aaa" by Moody's or "AAA" by S&P or Fitch. There is no limit on the percentage of the Fund's assets that may be invested in municipal bonds insured by any one insurer.

A municipal bond covered by Original Issue Insurance or Secondary Market Insurance is itself typically assigned the same rating as that of the insurer. For example, if the insurer has a rating of "Aaa" or "AAA", a bond covered by an Original Issue Insurance or Secondary Market Insurance policy from

15

that insurer would also typically be assigned the same rating. Such a municipal bond would generally be assigned a lower rating if the ratings were based instead upon the credit characteristics of the issuer without regard to the insurance feature. By way of contrast, the ratings, if any, assigned to a municipal bond insured under Portfolio Insurance will be based primarily upon the credit characteristics of the issuer, without regard to the insurance feature, and therefore will generally carry a rating that is below "Aaa" or "AAA." While in the portfolio of the Fund, however, a municipal bond backed by Portfolio Insurance from a particular insurer will effectively be of the same credit quality as a municipal bond issued by an issuer of comparable credit characteristics that is backed by Original Issue Insurance or Secondary Market Insurance from that insurer.

The Fund's policy of investing primarily in municipal bonds insured by insurers whose claims-paying ability is rated "Aaa" or "AAA" applies only at the time of purchase of a security, and the Fund will not be required to dispose of the securities in the event Moody's, S&P or Fitch, as the case may be, downgrades its assessment of the claims-paying ability of a particular insurer or the credit characteristics of a particular issuer. In the event Moody's, S&P or Fitch (or all of them) should downgrade its (or their) rating of a particular insurer, it (or they) could also be expected to downgrade the ratings assigned to municipal bonds insured under Original Issue Insurance or Secondary Market Insurance policies by such insurer, and municipal bonds insured under Portfolio Insurance issued by such insurer also would be of reduced quality in the portfolio of the Fund. Moody's, S&P and Fitch continually assess the claims-paying ability of insurers and the credit

characteristics of issuers, and there can be no assurance that they will not downgrade their assessments subsequent to the time the Fund purchases securities.

The value of municipal bonds covered by Portfolio Insurance that are in default or in significant risk of default will be determined by separately establishing a value for the municipal bond and a value for the Portfolio Insurance.

Original Issue Insurance. Original Issue Insurance is purchased with respect to a particular issue of municipal bonds by the issuer thereof or a third party in conjunction with the original issuance of such municipal bonds. Under this insurance, the insurer unconditionally guarantees to the holder of the municipal bond the timely payment of principal and interest on such obligations when and as these payments become due but not paid by the issuer, except that in the event of the acceleration of the due date of the principal by reason of mandatory or optional redemption (other than acceleration by reason of a mandatory sinking fund payment), default or otherwise, the payments guaranteed may be made in the amounts and at the times as payment of principal would have been due had there not been any acceleration. The insurer is responsible for these payments less any amounts received by the holder from any trustee for the municipal bond issuer or from any other source. Original Issue Insurance does not guarantee payment on an accelerated basis, the payment of any redemption premium (except with respect to certain premium payments in the case of certain small issue industrial development and pollution control municipal bonds), the value of the Fund's shares, the market value of municipal bonds, or payments of any tender purchase price upon the tender of the municipal bonds. Original Issue Insurance also does not insure against nonpayment of principal or interest on municipal bonds resulting from the insolvency, negligence or any other act or omission of the trustee or other paying agent for these bonds.

Original Issue Insurance remains in effect as long as the municipal bonds it covers remain outstanding and the insurer remains in business, regardless of whether the Fund ultimately disposes of these municipal bonds. Consequently, Original Issue Insurance may be considered to represent an element of market value with respect to the municipal bonds so insured, but the exact effect, if any, of this insurance on the market value cannot be estimated.

16

Secondary Market Insurance. Subsequent to the time of original issuance of a municipal bond, the Fund or a third party may, upon the payment of a single premium, purchase insurance on that security. Secondary Market Insurance generally provides the same type of coverage as Original Issue Insurance and, as with Original Issue Insurance, Secondary Market Insurance remains in effect as long as the municipal bonds it covers remain outstanding and the insurer remains in business, regardless of whether the Fund ultimately disposes of these municipal bonds.

One of the purposes of acquiring Secondary Market Insurance with respect to a particular municipal bond would be to enable the Fund to enhance the value of the security. The Fund, for example, might seek to purchase a particular municipal bond and obtain Secondary Market Insurance for it if, in Nuveen Advisory's opinion, the market value of the security, as insured, less the cost of the Secondary Market Insurance, would exceed the current value of the security without insurance. Similarly, if the Fund owns but wishes to sell a municipal bond that is then covered by Portfolio Insurance, the Fund might seek to obtain Secondary Market Insurance for it if, in Nuveen Advisory's opinion, the net proceeds of the Fund's sale of the security, as insured, less the cost of the Secondary Market Insurance, would exceed the current value of the

security. In determining whether to insure municipal bonds the Fund owns, an insurer will apply its own standards, which correspond generally to the standards it has established for determining the insurability of new issues of municipal bonds. See "--Original Issue Insurance" above.

Portfolio Insurance. Portfolio Insurance guarantees the payment of principal and interest on specified eligible municipal bonds purchased by the Fund. Except as described below, Portfolio Insurance generally provides the same type of coverage as is provided by Original Issue Insurance or Secondary Market Insurance. Municipal bonds insured under a Portfolio Insurance policy would generally not be insured under any other policy. A municipal bond is eligible for coverage under a policy if it meets certain requirements of the insurer. Portfolio Insurance is intended to reduce financial risk, but the cost thereof and compliance with investment restrictions imposed under the policy will reduce the yield to shareholders of the Fund.

If a municipal bond is already covered by Original Issue Insurance or Secondary Market Insurance, then the security is not required to be additionally insured under any Portfolio Insurance that the Fund may purchase. All premiums respecting municipal bonds covered by Original Issue Insurance or Secondary Market Insurance are paid in advance by the issuer or other party obtaining the insurance.

Portfolio Insurance policies are effective only as to municipal bonds owned by and held by the Fund, and do not cover municipal bonds for which the contract for purchase fails. A "when-issued" municipal obligation will be covered under a Portfolio Insurance policy upon the settlement date of the issue of such "when-issued" municipal bond.

In determining whether to insure municipal bonds held by the Fund, an insurer will apply its own standards, which correspond generally to the standards it has established for determining the insurability of new issues of municipal bonds. See "--Original Issue Insurance" above.

Each Portfolio Insurance policy will be noncancellable and will remain in effect so long as the Fund is in existence, the municipal bonds covered by the policy continue to be held by the Fund, and the Fund pays the premiums for the policy. Each insurer will generally reserve the right at any time upon 90 days' written notice to the Fund to refuse to insure any additional bonds purchased by the Fund after

17

the effective date of such notice. The Fund generally will reserve the right to terminate each policy upon seven days' written notice to an insurer if it determines that the cost of such policy is not reasonable in relation to the value of the insurance to the Fund.

Each Portfolio Insurance policy will terminate as to any municipal bond that has been redeemed from or sold by the Fund on the date of redemption or the settlement date of sale, and an insurer will not have any liability thereafter under a policy for any municipal bond, except that if the redemption date or settlement date occurs after a record date and before the related payment date for any municipal bond, the policy will terminate for that municipal bond on the business day immediately following the payment date. Each policy will terminate as to all municipal bonds covered thereby on the date on which the last of the covered municipal bonds mature, are redeemed or are sold by the Fund.

One or more Portfolio Insurance policies may provide the Fund, pursuant to

an irrevocable commitment of the insurer, with the option to exercise the right to obtain permanent insurance ("Permanent Insurance") for a municipal bond that is sold by the Fund. The Fund would exercise the right to obtain Permanent Insurance upon payment of a single, predetermined insurance premium payable from the sale proceeds of the municipal bond. The Fund expects to exercise the right to obtain Permanent Insurance for a municipal bond only if, in Nuveen Advisory's opinion, upon the exercise the net proceeds from the sale of the municipal bond, as insured, would exceed the proceeds from the sale of the security without insurance.

The Permanent Insurance premium for each municipal bond is determined based upon the insurability of each security as of the date of purchase and will not be increased or decreased for any change in the security's creditworthiness unless the security is in default as to payment of principal or interest, or both. If such event occurs, the Permanent Insurance premium will be subject to an increase predetermined at the date of the Fund's purchase.

The Fund generally intends to retain any insured bonds covered by Portfolio Insurance that are in default or in significant risk of default and to place a value on the insurance, which ordinarily will be the difference between the market value of the defaulted bond and the market value of similar bonds of minimum investment grade (that is, rated "Baa" or "BBB") that are not in default. In certain circumstances, however, Nuveen Advisory may determine that an alternative value for the insurance, such as the difference between the market value of the defaulted bond and either its par value or the market value of similar bonds that are not in default or in significant risk of default, is more appropriate. Except as described above for bonds covered by Portfolio Insurance that are in default or subject to significant risk of default, the Fund will not place any value on the Portfolio Insurance in valuing the municipal bonds it holds.

Because each Portfolio Insurance policy will terminate for municipal bonds sold by the Fund on the date of sale, in which event the insurer will be liable only for those payments of principal and interest that are then due and owing (unless Permanent Insurance is obtained by the Fund), the provision for this insurance will not enhance the marketability of the Fund's bonds, whether or not the bonds are in default or in significant risk of default. On the other hand, because Original Issue Insurance and Secondary Market Insurance generally will remain in effect as long as the municipal bonds they cover are outstanding, these insurance policies may enhance the marketability of these bonds even when they are in default or in significant risk of default, but the exact effect, if any, on marketability cannot be estimated. Accordingly, the Fund may determine to retain or, alternatively, to sell municipal bonds

18

covered by Original Issue Insurance or Secondary Market Insurance that are in default or in significant risk of default.

Premiums for a Portfolio Insurance policy are paid monthly, and are adjusted for purchases and sales of municipal bonds covered by the policy during the month. The yield on the Fund is reduced to the extent of the insurance premiums it pays.

When-Issued and Delayed Delivery Transactions

The Fund may buy and sell municipal bonds on a when-issued or delayed delivery basis, making payment or taking delivery at a later date, normally within 15 to 45 days of the trade date. This type of transaction may involve an element of risk because no interest accrues on the bonds prior to settlement

and, because bonds are subject to market fluctuations, the value of the bonds at time of delivery may be less (or more) than cost. A separate account of the Fund will be established with its custodian consisting of cash, cash equivalents, or liquid securities having a market value at all times at least equal to the amount of the commitment.

Miscellaneous Investments

The Fund may invest up to 5% of its net assets in tax-exempt or taxable fixed-income or equity securities for the purpose of acquiring control of an issuer whose municipal bonds (a) the Fund already owns and (b) have deteriorated or are expected shortly to deteriorate significantly in credit quality, provided Nuveen Advisory determines that such investment should enable the Fund to better maximize its existing investment in such issuer. Investment in such securities would result in a portion of your dividend being subject to regular federal and California income taxes or the alternative minimum tax applicable to individuals.

Other Investment Companies

The Fund may invest up to 10% of its net assets in securities of other open- or closed-end investment companies that invest primarily in municipal bonds of the types in which the Fund may invest directly. The Fund generally expects to invest in other investment companies either during periods when it has large amounts of uninvested cash, such as the period shortly after the Fund receives the proceeds of the offering of its Common Shares or MuniPreferred Shares, or during periods when there is a shortage of attractive, high-yielding municipal bonds available in the market. As a stockholder in an investment company, the Fund will bear its ratable share of that investment company's expenses, and would remain subject to payment of the Fund's advisory and administrative fees with respect to assets so invested. Common Shareholders would therefore be subject to duplicative expenses to the extent the Fund invests in other investment companies. Nuveen Advisory will take expenses into account when evaluating the investment merits of an investment in the investment company relative to available municipal bond investments. In addition, the securities of other investment companies may also be leveraged and will therefore be subject to the same leverage risks described herein. As described in the section entitled "Risks," the net asset value and market value of leveraged shares will be more volatile and the yield to Common Shareholders will tend to fluctuate more than the yield generated by unleveraged shares.

19

MUNIPREFERRED SHARES AND LEVERAGE

Subject to market conditions, approximately one to three months after the completion of the offering of the Common Shares, the Fund intends to offer MuniPreferred Shares representing approximately 35% of the Fund's capital immediately after the issuance of the MuniPreferred Shares. The MuniPreferred Shares will have complete priority upon distribution of assets over the Common Shares. The issuance of MuniPreferred Shares will leverage the Common Shares. Leverage involves special risks. There is no assurance that the Fund's leveraging strategy will be successful. Although the timing and other terms of the offering of the MuniPreferred Shares will be determined by the Fund's Board of Trustees, the Fund expects to invest the proceeds of the MuniPreferred Shares offering in long-term municipal bonds. The MuniPreferred Shares will pay dividends based on shorter-term rates (which would be redetermined periodically by an auction process). So long as the Fund's portfolio is invested in securities that provide a higher rate of return than the dividend rate of the MuniPreferred Shares (after taking expenses into consideration), the leverage

will cause you to receive a higher current rate of return than if the Fund were not leveraged.

Changes in the value of the Fund's bond portfolio (including bonds bought with the proceeds of the MuniPreferred Shares offering) will be borne entirely by the Common Shareholders. If there is a net decrease (or increase) in the value of the Fund's investment portfolio, the leverage will decrease (or increase) the net asset value per Common Share to a greater extent than if the Fund were not leveraged. During periods in which the Fund is using leverage, the fees paid to Nuveen Advisory for advisory services will be higher than if the Fund did not use leverage because the fees paid will be calculated on the basis of the Fund's total net assets, including the proceeds from the issuance of MuniPreferred Shares.

For tax purposes, the Fund is currently required to allocate net capital gain and other taxable income, if any, between the Common Shares and MuniPreferred Shares in proportion to total dividends paid to each class for the taxable year in which the net capital gain or other taxable income is realized. If net capital gain or other taxable income is allocated to MuniPreferred Shares (instead of solely tax-exempt income), the Fund will likely have to pay higher total dividends to MuniPreferred shareholders or make special payments to MuniPreferred shareholders to compensate them for the increased tax liability. This would reduce the total amount of dividends paid to the Common Shareholders, but would increase the portion of the dividend that is tax-exempt. On an after-tax basis, Common Shareholders may still be better off than if they had been allocated all of the Fund's net capital gain or other taxable income (resulting in a higher amount of total dividends), but received a lower amount of tax-exempt income. If the increase in dividend payments or the special payments to MuniPreferred shareholders are not entirely offset by a reduction in the tax liability of, and an increase in the tax-exempt dividends received by, the Common Shareholders, the advantage of the Fund's leveraged structure to Common Shareholders will be reduced.

Under the 1940 Act, the Fund is not permitted to issue preferred shares unless immediately after such issuance, the value of the Fund's asset coverage is at least 200% of the liquidation value of the outstanding preferred shares (i.e., such liquidation value may not exceed 50% of the Fund's asset coverage). In addition, the Fund is not permitted to declare any cash dividend or other distribution on its Common Shares unless, at the time of such declaration, the value of the Fund's asset coverage is at least 200% of such liquidation value. If MuniPreferred Shares are issued, the Fund intends, to the extent possible, to purchase or redeem MuniPreferred Shares from time to time to the extent necessary in

20

order to maintain coverage of any MuniPreferred Shares of at least 200%. If the Fund has MuniPreferred Shares outstanding, two of the Fund's trustees will be elected by the holders of MuniPreferred Shares, voting separately as a class. The remaining trustees of the Fund will be elected by holders of Common Shares and MuniPreferred Shares voting together as a single class. In the event the Fund failed to pay dividends on MuniPreferred Shares for two years, MuniPreferred shareholders would be entitled to elect a majority of the trustees of the Fund.

The Fund may be subject to certain restrictions imposed by guidelines of one or more rating agencies which may issue ratings for MuniPreferred Shares issued by the Fund. These guidelines may impose asset coverage or portfolio composition requirements that are more stringent than those imposed on the Fund by the 1940 Act. It is not anticipated that these covenants or guidelines will

impede Nuveen Advisory from managing the Fund's portfolio in accordance with the Fund's investment objectives and policies.

The Fund may also borrow money for repurchase of its shares or as a temporary measure for extraordinary or emergency purposes, including the payment of dividends and the settlement of securities transactions which otherwise might require untimely dispositions of Fund securities.

Assuming that the MuniPreferred Shares will represent in the aggregate approximately 35% of the Fund's capital and pay dividends at an annual average rate of 1.50%, the incremental income generated by the Fund's portfolio (net of estimated expenses) must exceed 0.53% in order to cover such dividend payments and other expenses specifically related to the MuniPreferred Shares. Of course, these numbers are merely estimates, used for illustration. Actual MuniPreferred Share dividend rates, interest or payment rates may vary frequently and may be significantly higher or lower than the rate assumed above.

The following table is furnished in response to requirements of the Securities and Exchange Commission. It is designed to illustrate the effect of leverage on Common Share total return, assuming investment portfolio total returns (comprised of income and changes in the value of bonds held in the Fund's portfolio net of expenses) of -10%, -5%, 0%, 5% and 10%. These assumed investment portfolio returns are hypothetical figures and are not necessarily indicative of the investment portfolio returns expected to be experienced by the Fund. The table further reflects the issuance of MuniPreferred Shares representing 35% of the Fund's total capital, and the Fund's currently projected annual MuniPreferred Share dividend rate of 1.50%. See "Risks--Leverage Risk."

Assumed Portfolio Total Return (net of expenses)	(10.00)%	(5.00)%	0.00 %	5.00%	10.00%
Common Share Total Return.....	(16.19)%	(8.50)%	(0.81)%	6.89%	14.58%

Common Share total return is composed of two elements--the Common Share dividends paid by the Fund (the amount of which is largely determined by the net investment income of the Fund after paying dividends on MuniPreferred Shares) and gains or losses on the value of the securities the Fund owns. As required by Securities and Exchange Commission rules, the table assumes that the Fund is more likely to suffer capital losses than to enjoy capital appreciation. For example, to assume a total return of 0%, the Fund must assume that the tax-exempt interest it receives on its municipal bond investments is entirely offset by losses in the value of those bonds.

Unless and until MuniPreferred Shares are issued, the Common Shares will not be leveraged and this section will not apply.

RISKS

The net asset value of the Common Shares will fluctuate with and be affected by, among other things, interest rate risk, credit risk, reinvestment risk and leverage risk, and an investment in Common Shares will be subject to, among other things, market discount risk, concentration risk, inflation risk and municipal bond market risk, each of which is more fully described below.

Newly Organized. The Fund is a newly organized, non-diversified, closed-end management investment company and has no operating history.

Market Discount Risk. Shares of closed-end management investment companies frequently trade at a discount from their net asset value.

Interest Rate Risk. Interest rate risk is the risk that bonds (and the Fund's net assets) will decline in value because of changes in interest rates. Generally, municipal bonds will decrease in value when interest rates rise and increase in value when interest rates decline. This means that the net asset value of the Common Shares will fluctuate with interest rate changes and the corresponding changes in the value of the Fund's municipal bond holdings. The value of the longer-term bonds in which the Fund generally invests fluctuates more in response to changes in interest rates than does the value of shorter-term bonds. Conversely, the values of lower-rated and comparable unrated debt securities are less likely than those of investment grade and comparable unrated debt securities to fluctuate inversely with changes in interest rates. Because the Fund will invest primarily in long-term bonds, the Common Share net asset value and market price per share will fluctuate more in response to changes in market interest rates than if the Fund invested primarily in shorter-term bonds. The Fund's use of leverage, as described below, will tend to increase Common Share interest rate risk. Market interest rates for investment grade municipal bonds in which the Fund will primarily invest have recently declined significantly below the recent historical average rates for such bonds. This decline may have increased the risk that these rates will rise in the future (which would cause the value of the Fund's net assets to decline) and the degree to which asset values may decline in such event; however, historical interest rate levels are not necessarily predictive of future interest rate levels.

Credit Risk. Credit risk is the risk that one or more municipal bonds in the Fund's portfolio will decline in price, or fail to pay interest or principal when due, because the issuer of the bond experiences a decline in its financial status. In general, lower-rated municipal bonds carry a greater degree of risk that the issuer will lose its ability to make interest and principal payments, which could have a negative impact on the Fund's net asset value or dividends.

Concentration Risk. As described above, except to the extent the Fund invests in temporary investments, the Fund will invest substantially all of its net assets in California municipal bonds. The Fund is therefore susceptible to political, economic or regulatory factors affecting issuers of California municipal bonds. The information set forth below and in the Statement of Additional Information is derived from sources that are generally available to investors. The information is intended to give a recent historical description and is not intended to indicate future or continuing trends in the financial or other positions of California. It should be noted that the creditworthiness of obligations issued by local California issuers may be unrelated to the creditworthiness of obligations issued by the State of California, and that there is no obligation on the part of the State to make payment on such local obligations in the event of default.

22

California's economy is the largest among the 50 states and one of the largest in the world. The State has a diversified economy with major sectors in manufacturing, agriculture, services, tourism, international trade and construction. The State has a population of about 35 million, which has been growing at a 1-2% annual rate for several decades. Gross domestic product of goods and services in the State exceeds \$1 trillion. Personal income was estimated at over \$1,095 billion in 2000. Total employment is over 16 million.

Since 1994 the California economy had been growing steadily, outpacing the

rest of the nation, with particular strength in high technology manufacturing, software, exports, services, entertainment and construction. By late 2000, unemployment had fallen to its lowest level in three decades. After a strong fourth quarter of 2000, the economy entered a mild recession in 2001, in concert with the slowdown of the national economy and a cyclical downturn in the high technology sector. The aftermath of the September 11, 2001 terrorist attacks temporarily hurt tourism-based areas. California's economy appears to have begun a mild recovery in early 2002, but employment growth had stagnated by the summer of 2002.

The State has received significant tax revenues in recent years, derived from the strong economy and stock market through 2000. Capital gains and stock option income represented almost a quarter of General Fund revenue in the 2000-01 fiscal year. The slowing economy and depressed stock market after mid-2000 will result in significantly reduced revenues in fiscal year 2001-02, compared both to the prior year and to earlier forecasts. An updated budget report in May 2002 indicated that total revenues for the combined 2001-02 and 2002-03 fiscal years would be over \$19 billion below initial projections, and combined with increased expenditure requirements, resulted in a total "budget gap" of \$23.6 billion for the two years. The final 2002-03 Budget closed this gap with a combination of expenditure reductions and deferrals, limited revenue increases, borrowing and substantial interfund loans and securitizations. Reduced revenues have also created a cash flow shortfall for the State which required the State Controller to issue \$7.5 billion of short-term warrants in June 2002 to allow the State to meet all its obligations in June, July and August 2002. Continued cash flow difficulties have led the State to issue a record \$12.5 billion of revenue anticipation notes to maintain adequate cash resources in the 2002-03 fiscal year.

In mid-November, 2002, the State Legislative Analyst (an independent office under the Legislature) issued a report estimating that, primarily as a result of continued sluggishness in the economy and the stock market, and the failure of the Legislature and Governor to address underlying revenue and expenditure trends in the 2002-03 Budget Act, the State General Fund would face a deficit of up to \$6 billion for the 2002-03 fiscal year, and this deficit would rise to over \$21 billion, on a cumulative basis, by the end of the 2003-04 fiscal year, in the absence of corrective action. Furthermore, the report predicted multi-billion dollar gaps between revenues and expenditures for a number of years beyond 2003-04, in the absence of corrective action.

A large part of the State's annual budget is mandated by constitutional guarantees (such as for education funding and debt service) and caseload requirements for health and welfare programs. State General Obligation bonds are, as of November 1, 2002, rated "A1" by Moody's, "A+" by Standard and Poors, and "AA" by Fitch with all three agencies maintaining a negative outlook.

Many local government agencies, particularly counties, continue to face budget constraints due to limited taxing powers and mandated expenditures for health, welfare and public safety, among other factors. The State and local governments are limited in their ability to levy and raise property taxes and

23

other forms of taxes, fees or assessments, and in their ability to appropriate their tax revenues, by a series of constitutional amendments, enacted by voter initiative since 1978. Individual local governments may also have local initiatives which affect their fiscal flexibility.

The foregoing information constitutes only a brief summary of some of the general factors which may impact certain issuers of municipal bonds and does

not purport to be a complete or exhaustive description of all adverse conditions to which the issuers of municipal bonds held by the Fund are subject. Additionally, many factors including national economic, social and environmental policies and conditions, which are not within the control of the issuers of the municipal bonds, could affect or could have an adverse impact on the financial condition of the issuers. The Fund is unable to predict whether or to what extent such factors or other factors may affect the issuers of the municipal bonds, the market value or marketability of the municipal bonds or the ability of the respective issuers of the municipal bonds acquired by the Fund to pay interest on or principal of the municipal bonds. This information has not been independently verified. See the Statement of Additional Information for a further discussion of factors affecting municipal bonds in California.

Municipal Bond Market Risk. Investing in the municipal bond market involves certain risks. The amount of public information available about the municipal bonds in the Fund's portfolio is generally less than that for corporate equities or bonds, and the investment performance of the Fund may therefore be more dependent on the analytical abilities of Nuveen Advisory than if the Fund were a stock fund or taxable bond fund. The secondary market for municipal bonds also tends to be less well-developed or liquid than many other securities markets, which may adversely affect the Fund's ability to sell its bonds at attractive prices or at prices approximating those at which the Fund currently values them.

The ability of municipal issuers to make timely payments of interest and principal may be diminished during general economic downturns and as governmental cost burdens are reallocated among federal, state and local governments. In addition, laws enacted in the future by Congress or state legislatures or referenda could extend the time for payment of principal and/or interest, or impose other constraints on enforcement of such obligations, or on the ability of municipalities to levy taxes. Issuers of municipal securities might seek protection under the bankruptcy laws. In the event of bankruptcy of such an issuer, the Fund could experience delays in collecting principal and interest and the Fund may not, in all circumstances, be able to collect all principal and interest to which it is entitled. To enforce its rights in the event of a default in the payment of interest or repayment of principal, or both, the Fund may take possession of and manage the assets securing the issuer's obligations on such securities, which may increase the Fund's operating expenses. Any income derived from the Fund's ownership or operation of such assets may not be tax-exempt.

Municipal Bond Insurance. In the event Moody's, S&P or Fitch (or all of them) should downgrade its assessment of the claims-paying ability of a particular insurer, it (or they) could also be expected to downgrade the ratings assigned to municipal bonds insured by such insurer, and municipal bonds insured under Portfolio Insurance issued by such insurer also would be of reduced quality in the portfolio of the Fund. Any such downgrade could have an adverse impact on the net asset value and market price of the Common Shares.

In addition, the Fund may be subject to certain restrictions on investments imposed by guidelines of the insurance companies issuing Portfolio Insurance. The Fund does not expect these guidelines to

prevent Nuveen Advisory from managing the Fund's portfolio in accordance with the Fund's investment objectives and policies.

Reinvestment Risk. Reinvestment risk is the risk that income from the Fund's

bond portfolio will decline if and when the Fund invests the proceeds from matured, traded or called bonds at market interest rates that are below the portfolio's current earnings rate. A decline in income could affect the Common Shares' market price or their overall returns.

Leverage Risk. Leverage risk is the risk associated with the issuance of the MuniPreferred Shares to leverage the Common Shares. There can be no assurance that the Fund's leveraging strategy will be successful. Once the MuniPreferred Shares are issued, the net asset value and market value of Common Shares will be more volatile, and the yield to Common Shareholders will tend to fluctuate with changes in the shorter-term dividend rates on the MuniPreferred Shares. Long-term municipal bond rates of return are typically, although not always, higher than shorter-term municipal bond rates of return. If the dividend rate on the MuniPreferred Shares approaches the net rate of return on the Fund's investment portfolio, the benefit of leverage to Common Shareholders would be reduced. If the dividend rate on the MuniPreferred Shares exceeds the net rate of return on the Fund's portfolio, the leverage will result in a lower rate of return to Common Shareholders than if the Fund were not leveraged. Because the long-term bonds included in the Fund's portfolio will typically pay fixed rates of interest while the dividend rate on the MuniPreferred Shares will be adjusted periodically, this could occur even when both long-term and short-term municipal rates rise. In addition, the Fund will pay (and Common Shareholders will bear) any costs and expenses relating to the issuance and ongoing maintenance of the MuniPreferred Shares (for example, distribution related expenses such as the participation fee paid at what it expects will be an annual rate of 0.25% of MuniPreferred Share liquidation preference to broker-dealers participating in MuniPreferred Share auctions). Accordingly, the Fund cannot assure you that the issuance of MuniPreferred Shares will result in a higher yield or return to Common Shareholders.

Similarly, any decline in the net asset value of the Fund's investments will be borne entirely by Common Shareholders. Therefore, if the market value of the Fund's portfolio declines, the leverage will result in a greater decrease in net asset value to Common Shareholders than if the Fund were not leveraged. Such greater net asset value decrease will also tend to cause a greater decline in the market price for the Common Shares. The Fund might be in danger of failing to maintain the required 200% asset coverage or of losing its expected AAA/Aaa ratings on the MuniPreferred Shares or, in an extreme case, the Fund's current investment income might not be sufficient to meet the dividend requirements on the MuniPreferred Shares. In order to counteract such an event, the Fund might need to liquidate investments in order to fund a redemption of some or all of the MuniPreferred Shares. Liquidation at times of low municipal bond prices may result in capital loss and may reduce returns to Common Shareholders.

While the Fund may from time to time consider reducing leverage in response to actual or anticipated changes in interest rates in an effort to mitigate the increased volatility of current income and net asset value associated with leverage, there can be no assurance that the Fund will actually reduce leverage in the future or that any reduction, if undertaken, will benefit the Common Shareholders. Changes in the future direction of interest rates are very difficult to predict accurately. If the Fund were to reduce leverage based on a prediction about future changes to interest rates, and that prediction turned out to be incorrect, the reduction in leverage would likely operate to reduce the income and/or total returns to Common Shareholders relative to the circumstance where the Fund had

not reduced leverage. The Fund may decide that this risk outweighs the

likelihood of achieving the desired reduction to volatility in income and share price if the prediction were to turn out to be correct, and determine not to reduce leverage as described above.

The Fund may invest in the securities of other investment companies. Such securities may also be leveraged and will therefore be subject to the leverage risks described above. Such additional leverage may in certain market conditions serve to reduce the net asset value of the Fund's Common Shares and the returns to Common Shareholders.

Inflation Risk. Inflation risk is the risk that the value of assets or income from investment will be worth less in the future as inflation decreases the value of money. As inflation increases, the real value of the Common Shares and distributions can decline. In addition, during any periods of rising inflation, MuniPreferred Share dividend rates would likely increase, which would tend to further reduce returns to Common Shareholders.

Derivatives Risk. The Fund may utilize a variety of derivative instruments solely for risk management purposes. As explained under "How the Fund Manages Risk--Hedging Strategies," the Fund does not intend to use derivatives to increase leverage or to enhance current income. These derivatives may include such instruments as options contracts, futures contracts, options on futures contracts, swap agreements, short sales and delayed delivery and forward commitment transactions. Derivatives are subject to a number of risks described elsewhere in this Prospectus, such as liquidity risk, interest rate risk, credit risk and management risk. Derivatives also involve the risk of mispricing or improper valuation, the risk of ambiguous documentation, and the risk that changes in the value of a derivative may not correlate perfectly with an underlying asset, interest rate or index. Suitable derivative transactions may not be available in all circumstances and there can be no assurance that the Fund will engage in these transactions to reduce exposure to other risks when that would be beneficial.

Non-Diversification. Because the Fund is classified as "non-diversified" under the 1940 Act it can invest a greater portion of its assets in obligations of a single issuer. As a result, the Fund will be more susceptible than a diversified fund to any single corporate, economic, political or regulatory occurrence. See "The Fund's Investments." Also, the Fund's policy of generally investing in bonds that are exempt from the federal alternative minimum tax applicable to individuals may prevent the Fund from investing in certain kinds of bonds and thereby limit the Fund's ability to optimally diversify its portfolio.

Anti-Takeover Provisions. The Fund's Declaration includes provisions that could limit the ability of other entities or persons to acquire control of the Fund or convert the Fund to open-end status. These provisions could have the effect of depriving the Common Shareholders of opportunities to sell their Common Shares at a premium over the then current market price of the Common Shares.

Certain Affiliations. Certain broker-dealers may be considered to be affiliated persons of the Fund, Nuveen Advisory and/or Nuveen. Absent an exemption from the Securities and Exchange Commission or other regulatory relief, the Fund is generally precluded from effecting certain principal transactions with affiliated brokers, and its ability to purchase securities being underwritten by an affiliated broker or a syndicate including an affiliated broker, or to utilize affiliated brokers for agency transactions, is subject to restrictions. This could limit the Fund's ability to engage in securities transactions and take advantage of market opportunities. In addition, unless and until the underwriting syndicate is broken in connection with the initial public offering of the Common Shares, the Fund will be precluded from effecting principal transactions with brokers who are members of

the syndicate.

26

HOW THE FUND MANAGES RISK

Investment Limitations

The Fund has adopted certain investment limitations designed to limit investment risk and maintain portfolio diversification. These limitations are fundamental and may not be changed without the approval of the holders of a "majority of the outstanding" Common Shares and, if issued, MuniPreferred Shares voting together as a single class, and the approval of the holders of a "majority of the outstanding" MuniPreferred Shares voting as a separate class. When used with respect to particular shares of the Fund, a "majority of the outstanding" shares means (i) 67% or more of the shares present at a meeting, if the holders of more than 50% of the shares are present or represented by proxy, or (ii) more than 50% of the shares, whichever is less. Among other restrictions, the Fund may not invest more than 25% of total Fund assets in securities of issuers in any one industry, except that this limitation does not apply to municipal bonds backed by the assets and revenues of governments or political subdivisions of governments.

The Fund may become subject to guidelines which are more limiting than the investment restriction set forth above in order to obtain and maintain ratings from Moody's or S&P on the MuniPreferred Shares that it intends to issue. The Fund does not anticipate that such guidelines would have a material adverse effect on the Fund's Common Shareholders or the Fund's ability to achieve its investment objectives. See "Investment Objectives" in the Statement of Additional Information for information about these guidelines and a complete list of the fundamental and non-fundamental investment policies of the Fund.

The Fund seeks to reduce credit risk by buying bonds that are either covered by insurance or backed by an escrow or trust account, each with the purpose of ensuring timely payment of principal and interest. However, these municipal bonds remain subject to market risk.

Limited Issuance of MuniPreferred Shares

Under the 1940 Act, the Fund could issue MuniPreferred Shares having a total liquidation value (original purchase price of the shares being liquidated plus any accrued and unpaid dividends) of up to one-half of the value of the asset coverage of the Fund. If the total liquidation value of the MuniPreferred Shares was ever more than one-half of the value of the Fund's asset coverage, the Fund would not be able to declare dividends on the Common Shares until the liquidation value, as a percentage of the Fund's assets, was reduced. The Fund intends to issue MuniPreferred Shares representing about 35% of the Fund's total capital immediately after the time of issuance. This higher than required margin of net asset value provides a cushion against later fluctuations in the value of the Fund's portfolio and will subject Common Shareholders to less income and net asset value volatility than if the Fund were more leveraged. The Fund intends to purchase or redeem MuniPreferred Shares, if necessary, to keep the liquidation value of the MuniPreferred Shares below one-half of the value of the Fund's asset coverage.

Management of Investment Portfolio and Capital Structure to Limit Leverage Risk

The Fund may take certain actions if short-term interest rates increase or market conditions otherwise change (or the Fund anticipates such an increase or

change) and the Fund's leverage begins (or is expected) to adversely affect Common Shareholders. In order to attempt to offset such a negative impact of leverage on Common Shareholders, the Fund may shorten the average maturity of its investment portfolio (by investing in short-term, high quality securities) or may extend the maturity of outstanding MuniPreferred Shares. The Fund may also attempt to reduce the leverage by redeeming or otherwise purchasing MuniPreferred Shares. As explained above under "Risks--Leverage Risk," the

27

success of any such attempt to limit leverage risk depends on Nuveen Advisory's ability to accurately predict interest rate or other market changes. Because of the difficulty of making such predictions, the Fund may never attempt to manage its capital structure in the manner described above.

If market conditions suggest that additional leverage would be beneficial, the Fund may sell previously unissued MuniPreferred Shares or MuniPreferred Shares that the Fund previously issued but later repurchased.

Currently, the Fund may not invest in inverse floating rate securities, which are securities that pay interest at rates that vary inversely with changes in prevailing short-term tax-exempt interest rates and which represent a leveraged investment in an underlying municipal bond. This restriction is a non-fundamental policy of the Fund that may be changed by vote of the Fund's Board of Trustees.

Hedging Strategies

The Fund may use various investment strategies designed to limit the risk of bond price fluctuations and to preserve capital. These hedging strategies include using financial futures contracts, options on financial futures or options based on either an index of long-term municipal securities or on taxable debt securities whose prices, in the opinion of Nuveen Advisory, correlate with the prices of the Fund's investments. The Fund does not intend to use derivatives to increase leverage or to enhance current income. Successful implementation of most hedging strategies would generate taxable income.

MANAGEMENT OF THE FUND

Trustees and Officers

The Board of Trustees is responsible for the management of the Fund, including supervision of the duties performed by Nuveen Advisory. The names and business addresses of the trustees and officers of the Fund and their principal occupations and other affiliations during the past five years are set forth under "Management of the Fund" in the Statement of Additional Information.

Investment Adviser

Nuveen Advisory, 333 West Wacker Drive, Chicago, Illinois 60606, serves as the investment adviser to the Fund. In this capacity, Nuveen Advisory is responsible for the selection and on-going monitoring of the municipal bonds in the Fund's investment portfolio, managing the Fund's business affairs and providing certain clerical, bookkeeping and administrative services. Nuveen Advisory serves as investment adviser to investment portfolios with more than \$43.6 billion in assets under management as of October 31, 2002. See the Statement of Additional Information under "Investment Adviser."

Nuveen Advisory is responsible for execution of specific investment

strategies and day-to-day investment operations. Nuveen Advisory manages the Fund using a team of analysts and portfolio managers that focus on a specific group of funds. William M. Fitzgerald is the portfolio manager of the Fund and will provide daily oversight for, and execution of, the Fund's investment activities. Mr. Fitzgerald has been a Managing Director of Nuveen Advisory since 2000. Prior to that time, he was a Vice President of Nuveen Advisory. Mr. Fitzgerald has been a portfolio manager for Nuveen Advisory since 1990 and currently manages investments for 14 Nuveen-sponsored investment companies.

Nuveen Advisory is a wholly owned subsidiary of The John Nuveen Company, 333 West Wacker Drive, Chicago, Illinois 60606. Founded in 1898, The John Nuveen Company and its affiliates had over \$84 billion of assets under management or surveillance as of October 31, 2002. The John Nuveen Company is a majority-owned subsidiary of The St. Paul Companies, Inc., a publicly-traded company which is principally engaged in providing property-liability insurance through subsidiaries.

28

Investment Management Agreement

Pursuant to an investment management agreement between Nuveen Advisory and the Fund, the Fund has agreed to pay for the services and facilities provided by Nuveen Advisory an annual management fee, payable on a monthly basis, according to the following schedule:

Average Daily Managed Assets -----	Management Fee -----
Up to \$125 million.....	.6500%
\$125 million to \$250 million.....	.6375%
\$250 million to \$500 million.....	.6250%
\$500 million to \$1 billion.....	.6125%
\$1 billion to \$2 billion.....	.6000%
\$2 billion and over.....	.5750%

If the Fund utilizes leverage through the issuance of MuniPreferred Shares in an amount equal to 35% of the Fund's total assets (including the amount obtained from leverage), the management fee calculated as a percentage of net assets attributable to Common Shares would be as follows:

Net Assets Attributable to Common Shares -----	Management Fee -----
Up to \$125 million.....	1.0000%
\$125 million to \$250 million.....	.9808%
\$250 million to \$500 million.....	.9615%
\$500 million to \$1 billion.....	.9423%
\$1 billion to \$2 billion.....	.9231%
\$2 billion and over.....	.8846%

In addition to the fee of Nuveen Advisory, the Fund pays all other costs and

expenses of its operations, including compensation of its trustees (other than those affiliated with Nuveen Advisory), custodian, transfer agency and dividend disbursing expenses, legal fees, expenses of independent auditors, expenses of repurchasing shares, expenses of issuing any MuniPreferred Shares, expenses of preparing, printing and distributing shareholder reports, notices, proxy statements and reports to governmental agencies, and taxes, if any.

For the first eight full years of the Fund's operation, Nuveen Advisory has contractually agreed to reimburse the Fund for fees and expenses in the amounts, and for the time periods, set forth below:

Year Ending November 30, -----	Percentage Reimbursed (as a percentage of Managed Assets)	Year Ending November 30, -----	Percentage Reimbursed (as a percentage of Managed Assets)
2002/(1)/...	.32%	2007.....	.32%
2003.....	.32%	2008.....	.24%
2004.....	.32%	2009.....	.16%
2005.....	.32%	2010.....	.08%
2006.....	.32%		

(1) From the commencement of operations.

Nuveen Advisory has not agreed to reimburse the Fund for any portion of its fees and expenses beyond November 30, 2010.

NET ASSET VALUE

The Fund's net asset value per share is determined as of the close of regular session trading (normally 4:00 p.m. eastern time) on each day the New York Stock Exchange is open for business. Net asset value is calculated by taking the fair value of the Fund's total assets, including interest or dividends accrued but not yet collected, less all liabilities, and dividing by the total number of shares outstanding. The result, rounded to the nearest cent, is the net asset value per share.

In determining net asset value, expenses are accrued and applied daily and securities and other assets for which market quotations are available are valued at market value. The prices of municipal bonds are provided by a pricing service and based on the mean between the bid and asked price. When price quotes are not readily available (which is usually the case for municipal bonds), the pricing service establishes a fair market value based on prices of comparable municipal bonds. All valuations are subject to review by the Fund's Board of Trustees or its delegate, Nuveen Advisory.

DISTRIBUTIONS

Commencing with the first dividend, the Fund intends to make regular monthly cash distributions to Common Shareholders at a level rate (stated in terms of a fixed cents per Common Share dividend rate) that reflects the past and projected performance of the Fund. Distributions can only be made from net investment income after paying any accrued dividends to MuniPreferred

shareholders. The Fund's ability to maintain a level dividend rate will depend on a number of factors, including dividends payable on the MuniPreferred Shares. The net income of the Fund consists of all interest income accrued on portfolio assets less all expenses of the Fund. Expenses of the Fund are accrued each day. Over time, all the net investment income of the Fund will be distributed. At least annually, the Fund also intends to distribute net capital gain and ordinary taxable income, if any, after paying any accrued dividends or making any liquidation payments to MuniPreferred shareholders. Initial distributions to Common Shareholders are expected to be declared approximately 45 days, and paid approximately 60 to 90 days, from the completion of this offering, depending on market conditions. Although it does not now intend to do so, the Board of Trustees may change the Fund's dividend policy and the amount or timing of the distributions, based on a number of factors, including the amount of the Fund's undistributed net investment income and historical and projected investment income and the amount of the expenses and dividend rates on the outstanding MuniPreferred Shares.

To permit the Fund to maintain a more stable monthly distribution, the Fund will initially distribute less than the entire amount of net investment income earned in a particular period. The undistributed net investment income would be available to supplement future distributions. As a result, the distributions paid by the Fund for any particular monthly period may be more or less than the amount of net investment income actually earned by the Fund during the period. Undistributed net investment income will be added to the Fund's net asset value and, correspondingly, distributions from undistributed net investment income will be deducted from the Fund's net asset value.

30

DIVIDEND REINVESTMENT PLAN

You may elect to have all dividends, including any capital gain dividends, on your Common Shares automatically reinvested by the Plan Agent in additional Common Shares under the Dividend Reinvestment Plan (the "Plan"). You may elect to participate in the Plan by completing the Dividend Reinvestment Plan Application Form. If you do not participate, you will receive all distributions in cash paid by check mailed directly to you by State Street Bank and Trust Company as dividend paying agent.

If you decide to participate in the Plan, the number of Common Shares you will receive will be determined as follows:

(1) If Common Shares are trading at or above net asset value at the time of valuation, the Fund will issue new shares at the then current market price; or

(2) If Common Shares are trading below net asset value at the time of valuation, the Plan Agent will receive the dividend or distribution in cash and will purchase Common Shares in the open market, on the American Stock Exchange or elsewhere, for the participants' accounts. It is possible that the market price for the Common Shares may increase before the Plan Agent has completed its purchases. Therefore, the average purchase price per share paid by the Plan Agent may exceed the market price at the time of valuation, resulting in the purchase of fewer shares than if the dividend or distribution had been paid in Common Shares issued by the Fund. The Plan Agent will use all dividends and distributions received in cash to purchase Common Shares in the open market within 30 days of the valuation date. Interest will not be paid on any uninvested cash payments.

You may withdraw from the Plan at any time by giving written notice to the

Plan Agent. If you withdraw or the Plan is terminated, you will receive a certificate for each whole share in your account under the Plan and you will receive a cash payment for any fraction of a share in your account. If you wish, the Plan Agent will sell your shares and send you the proceeds, minus brokerage commissions and a \$2.50 service fee.

The Plan Agent maintains all shareholders' accounts in the Plan and gives written confirmation of all transactions in the accounts, including information you may need for tax records. Common Shares in your account will be held by the Plan Agent in non-certificated form. Any proxy you receive will include all Common Shares you have received under the Plan.

There is no brokerage charge for reinvestment of your dividends or distributions in Common Shares. However, all participants will pay a pro rata share of brokerage commissions incurred by the Plan Agent when it makes open market purchases.

Automatically reinvesting dividends and distributions does not mean that you do not have to pay income taxes due upon receiving dividends and distributions.

The Fund reserves the right to amend or terminate the Plan if in the judgment of the Board of Trustees the change is warranted. There is no direct service charge to participants in the Plan; however, the Fund reserves the right to amend the Plan to include a service charge payable by the participants. Additional information about the Plan may be obtained from State Street Bank and Trust Company, Attn: Equiserve Nuveen Investments, P.O. Box 43071, Providence, Rhode Island 02940-3071, (800) 257-8787.

31

DESCRIPTION OF SHARES

Common Shares

The Declaration authorizes the issuance of an unlimited number of Common Shares. The Common Shares being offered have a par value of \$0.01 per share and, subject to the rights of holders of MuniPreferred Shares, if issued, have equal rights to the payment of dividends and the distribution of assets upon liquidation. The Common Shares being offered will, when issued, be fully paid and, subject to matters discussed in "Certain Provisions in the Declaration of Trust," non-assessable, and will have no pre-emptive or conversion rights or rights to cumulative voting. Whenever MuniPreferred Shares are outstanding, Common Shareholders will not be entitled to receive any cash distributions from the Fund unless all accrued dividends on MuniPreferred Shares have been paid, and unless asset coverage (as defined in the 1940 Act) with respect to MuniPreferred Shares would be at least 200% after giving effect to the distributions. See "--MuniPreferred Shares" below.

The Common Shares have been approved for listing on the American Stock Exchange, subject to notice of issuance. The Fund intends to hold annual meetings of shareholders so long as the Common Shares are listed on a national securities exchange and such meetings are required as a condition to such listing.

The Fund's net asset value per share generally increases when interest rates decline, and decreases when interest rates rise, and these changes are likely to be greater because the Fund intends to have a leveraged capital structure. Net asset value will be reduced immediately following the offering by the amount of the sales load and offering expenses paid by the Fund. Nuveen has agreed to pay (i) all organizational expenses and (ii) offering costs (other

than sales load) that exceed \$0.03 per Common Share. See "Use of Proceeds."

Unlike open-end funds, closed-end funds like the Fund do not continuously offer shares and do not provide daily redemptions. Rather, if a shareholder determines to buy additional Common Shares or sell shares already held, the shareholder may conveniently do so by trading on the exchange through a broker or otherwise. Shares of closed-end investment companies may frequently trade on an exchange at prices lower than net asset value. Shares of closed-end investment companies like the Fund that invest predominately in investment grade municipal bonds have during some periods traded at prices higher than net asset value and have during other periods traded at prices lower than net asset value. Because the market value of the Common Shares may be influenced by such factors as dividend levels (which are in turn affected by expenses), call protection, dividend stability, portfolio credit quality, net asset value, relative demand for and supply of such shares in the market, general market and economic conditions, and other factors beyond the control of the Fund, the Fund cannot assure you that Common Shares will trade at a price equal to or higher than net asset value in the future. The Common Shares are designed primarily for long-term investors, and investors in the Common Shares should not view the Fund as a vehicle for trading purposes. See "MuniPreferred Shares and Leverage" and the Statement of Additional Information under "Repurchase of Fund Shares; Conversion to Open-End Fund."

MuniPreferred Shares

The Declaration authorizes the issuance of an unlimited number of MuniPreferred Shares in one or more classes or series, with rights as determined by the Board of Trustees, by action of the Board of Trustees without the approval of the Common Shareholders.

32

The Fund's Board of Trustees has authorized an offering of MuniPreferred Shares (representing approximately 35% of the Fund's capital immediately after the time the MuniPreferred Shares are issued) approximately one to three months after completion of the offering of Common Shares. The Board has determined that the MuniPreferred Shares, at least initially, would pay cumulative dividends at rates determined weekly by providing for the periodic redetermination of the dividend rate through an auction or remarketing procedure. The Board of Trustees has indicated that the preference on distribution, liquidation preference, voting rights and redemption provisions of the MuniPreferred Shares will be as stated below.

Limited Issuance of MuniPreferred Shares. Under the 1940 Act, the Fund could issue MuniPreferred Shares with an aggregate liquidation value of up to one-half of the value of the Fund's total net assets, measured immediately after issuance of the MuniPreferred Shares. "Liquidation value" means the original purchase price of the shares being liquidated plus any accrued and unpaid dividends. In addition, the Fund is not permitted to declare any cash dividend or other distribution on its Common Shares unless the liquidation value of the MuniPreferred Shares is less than one-half of the value of the Fund's total net assets (determined after deducting the amount of such dividend or distribution) immediately after the distribution. If the Fund sells all the Common Shares and MuniPreferred Shares discussed in this Prospectus, the liquidation value of the MuniPreferred Shares is expected to be approximately 35% of the value of the Fund's total net assets. The Fund intends to purchase or redeem MuniPreferred Shares, if necessary, to keep that fraction below one-half.

Distribution Preference. The MuniPreferred Shares have complete priority

over the Common Shares as to distribution of assets.

Liquidation Preference. In the event of any voluntary or involuntary liquidation, dissolution or winding up of the affairs of the Fund, holders of MuniPreferred Shares will be entitled to receive a preferential liquidating distribution (expected to equal the original purchase price per share plus accumulated and unpaid dividends thereon, whether or not earned or declared) before any distribution of assets is made to Common Shareholders.

Voting Rights. MuniPreferred Shares are required to be voting shares and to have equal voting rights with Common Shares. Except as otherwise indicated in this Prospectus or the Statement of Additional Information and except as otherwise required by applicable law, holders of MuniPreferred Shares will vote together with Common Shareholders as a single class.

Holders of MuniPreferred Shares, voting as a separate class, will be entitled to elect two of the Fund's trustees (following the establishment of the Fund by an initial trustee, the Declaration provides for a total of no less than two and no more than twelve trustees). The remaining trustees will be elected by Common Shareholders and holders of MuniPreferred Shares, voting together as a single class. In the unlikely event that two full years of accrued dividends are unpaid on the MuniPreferred Shares, the holders of all outstanding MuniPreferred Shares, voting as a separate class, will be entitled to elect a majority of the Fund's trustees until all dividends in arrears have been paid or declared and set apart for payment. Under the 1940 Act, in order for the Fund to take certain actions or enter into certain transactions (i.e., convert to an open-end investment company or effect a reorganization adversely affecting the MuniPreferred Shares), a separate class vote of holders of MuniPreferred Shares will be required, in addition to the single class vote of the holders of MuniPreferred Shares and Common Shares. See the Statement of Additional Information under "Description of Shares--MuniPreferred Shares--Voting Rights."

33

Redemption, Purchase and Sale of MuniPreferred Shares. The terms of the MuniPreferred Shares provide that they may be redeemed by the issuer at certain times, in whole or in part, at the original purchase price per share plus accumulated dividends. Any redemption or purchase of MuniPreferred Shares by the Fund will reduce the leverage applicable to Common Shares, while any issuance of shares by the Fund will increase such leverage. See "MuniPreferred Shares and Leverage."

The discussion above describes the Board of Trustees' present intention with respect to an offering of MuniPreferred Shares. The terms of the MuniPreferred Shares may be the same as, or different from, the terms described above, subject to applicable law and the Fund's Declaration.

CERTAIN PROVISIONS IN THE DECLARATION OF TRUST

Under Massachusetts law, shareholders could, under certain circumstances, be held personally liable for the obligations of the Fund. However, the Declaration contains an express disclaimer of shareholder liability for debts or obligations of the Fund and requires that notice of such limited liability be given in each agreement, obligation or instrument entered into or executed by the Fund or the trustees. The Declaration further provides for indemnification out of the assets and property of the Fund for all loss and expense of any shareholder held personally liable for the obligations of the Fund. Thus, the risk of a shareholder incurring financial loss on account of shareholder liability is limited to circumstances in which the Fund would be

unable to meet its obligations. The Fund believes that the likelihood of such circumstances is remote.

The Declaration includes provisions that could limit the ability of other entities or persons to acquire control of the Fund or to convert the Fund to open-end status. Specifically, the Declaration requires a vote by holders of at least two-thirds of the Common Shares and MuniPreferred Shares, voting together as a single class, except as described below, to authorize (1) a conversion of the Fund from a closed-end to an open-end investment company, (2) a merger or consolidation of the Fund, or a series or class of the Fund, with any corporation, association, trust or other organization or a reorganization or recapitalization of the Fund, or a series or class of the Fund, (3) a sale, lease or transfer of all or substantially all of the Fund's assets (other than in the regular course of the Fund's investment activities), (4) in certain circumstances, a termination of the Fund, or a series or class of the Fund, or (5) a removal of trustees by shareholders, and then only for cause, unless, with respect to (1) through (4), such transaction has already been authorized by the affirmative vote of two-thirds of the total number of trustees fixed in accordance with the Declaration or the By-laws, in which case the affirmative vote of the holders of at least a majority of the Fund's Common Shares and MuniPreferred Shares outstanding at the time, voting together as a single class, is required, provided, however, that where only a particular class or series is affected (or, in the case of removing a trustee, when the trustee has been elected by only one class), only the required vote by the applicable class or series will be required. Approval of shareholders is not required, however, for any transaction, whether deemed a merger, consolidation, reorganization or otherwise whereby the Fund issues Shares in connection with the acquisition of assets (including those subject to liabilities) from any other investment company or similar entity. In the case of the conversion of the Fund to an open-end investment company, or in the case of any of the foregoing transactions constituting a plan of reorganization which adversely affects the holders of MuniPreferred Shares, the action in question will also require the affirmative vote of the holders of at least two-thirds of the Fund's MuniPreferred Shares outstanding at the time, voting as a separate class, or, if such action has been authorized by the affirmative vote of two-thirds of the total

34

number of trustees fixed in accordance with the Declaration or the By-laws, the affirmative vote of the holders of at least a majority of the Fund's MuniPreferred Shares outstanding at the time, voting as a separate class. None of the foregoing provisions may be amended except by the vote of at least two-thirds of the Common Shares and MuniPreferred Shares, voting together as a single class. The votes required to approve the conversion of the Fund from a closed-end to an open-end investment company or to approve transactions constituting a plan of reorganization which adversely affects the holders of MuniPreferred Shares are higher than those required by the 1940 Act. The Board of Trustees believes that the provisions of the Declaration relating to such higher votes are in the best interest of the Fund and its shareholders. See the Statement of Additional Information under "Certain Provisions in the Declaration of Trust."

The provisions of the Declaration described above could have the effect of depriving the Common Shareholders of opportunities to sell their Common Shares at a premium over the then current market price of the Common Shares by discouraging a third party from seeking to obtain control of the Fund in a tender offer or similar transaction. The overall effect of these provisions is to render more difficult the accomplishment of a merger or the assumption of control by a third party. They provide, however, the advantage of potentially

requiring persons seeking control of the Fund to negotiate with its management regarding the price to be paid and facilitating the continuity of the Fund's investment objectives and policies. The Board of Trustees of the Fund has considered the foregoing anti-takeover provisions and concluded that they are in the best interests of the Fund and its Common Shareholders.

Reference should be made to the Declaration on file with the Securities and Exchange Commission for the full text of these provisions.

REPURCHASE OF FUND SHARES; CONVERSION TO OPEN-END FUND

The Fund is a closed-end investment company and as such its shareholders will not have the right to cause the Fund to redeem their shares. Instead, the Common Shares will trade in the open market at a price that will be a function of several factors, including dividend levels (which are in turn affected by expenses), net asset value, call protection, dividend stability, portfolio credit quality, relative demand for and supply of such shares in the market, general market and economic conditions and other factors. Because shares of closed-end investment companies may frequently trade at prices lower than net asset value, the Fund's Board of Trustees has currently determined that, at least annually, it will consider action that might be taken to reduce or eliminate any material discount from net asset value in respect of Common Shares, which may include the repurchase of such shares in the open market or in private transactions, the making of a tender offer for such shares at net asset value, or the conversion of the Fund to an open-end investment company. The Fund cannot assure you that its Board of Trustees will decide to take any of these actions, or that share repurchases or tender offers will actually reduce market discount.

If the Fund converted to an open-end investment company, it would be required to redeem all MuniPreferred Shares then outstanding (requiring in turn that it liquidate a portion of its investment portfolio), and the Common Shares would no longer be listed on the American Stock Exchange. In contrast to a closed-end investment company, shareholders of an open-end investment company may require the company to redeem their shares at any time (except in certain circumstances as authorized by or under the 1940 Act) at their net asset value, less any redemption charge that is in effect at the time

35

of redemption. See the Statement of Additional Information under "Certain Provisions in the Declaration of Trust" for a discussion of the voting requirements applicable to the conversion of the Fund to an open-end investment company.

Before deciding whether to take any action if the Common Shares trade below net asset value, the Board would consider all relevant factors, including the extent and duration of the discount, the liquidity of the Fund's portfolio, the impact of any action that might be taken on the Fund or its shareholders, and market considerations. Based on these considerations, even if the Fund's shares should trade at a discount, the Board of Trustees may determine that, in the interest of the Fund and its shareholders, no action should be taken. See the Statement of Additional Information under "Repurchase of Fund Shares; Conversion to Open-End Fund" for a further discussion of possible action to reduce or eliminate such discount to net asset value.

TAX MATTERS

Federal Income Tax Matters

The following discussion of federal income tax matters is based on the advice of Bell, Boyd & Lloyd LLC, special counsel to the Fund.

The discussions below and in the Statement of Additional Information provide general tax information related to an investment in the Common Shares. Because tax laws are complex and often change, you should consult your tax advisor about the tax consequences of an investment in the Fund.

The Fund intends to elect to be treated and to qualify as a regulated investment company under Subchapter M of the Internal Revenue Code of 1986, as amended (the "Code"), and intends to distribute substantially all of its net income and gains to its shareholders. Therefore, it is not expected that the Fund will be subject to any federal income tax.

The Fund primarily invests in municipal bonds from issuers located in California or in municipal bonds whose income is otherwise exempt from regular federal income tax, the alternative minimum tax applicable to individuals and California income tax. Thus, substantially all of the Fund's dividends to you will qualify as "exempt-interest dividends." A shareholder treats an exempt-interest dividend as interest on state and local bonds exempt from federal income tax. Different federal alternative minimum tax rules apply to individuals and to corporations.

Although the Fund does not seek to realize taxable income or capital gains, the Fund may realize and distribute taxable income or capital gains from time to time as a result of the Fund's normal investment activities. The Fund will distribute at least annually any ordinary taxable income or net capital gain. Distributions of net short-term capital gain are taxable as ordinary income. Distributions of net capital gain (the excess of net long-term capital gain over net short-term capital loss) are taxable as long-term capital gains regardless of how long you have owned your Common Shares. The Fund will allocate dividends with respect to a taxable year to shareholders that are treated as exempt-interest dividends and as long-term capital gain and ordinary income, if any, among the Common Shares and MuniPreferred Shares in proportion to total dividends paid to each class for such taxable year. As long as the Fund qualifies as a regulated investment company, distributions paid by the Fund generally will not be eligible for the dividends received deduction allowed to corporations.

36

Each year, you will receive a year-end statement that describes the tax status of dividends paid to you during the preceding year, including the source of investment income by state and the portion of income that is subject to the federal alternative minimum tax. You will receive this statement from the firm where you purchased your Common Shares if you hold your investment in street name; the Fund will send you this statement if you hold your shares in registered form.

The tax status of your dividends is not affected by whether you reinvest your dividends or receive them in cash.

In order to avoid corporate taxation of its earnings and to pay exempt-interest dividends, the Fund must meet certain Internal Revenue Service ("I.R.S.") requirements that govern the Fund's sources of income, diversification of assets and distribution of earnings to shareholders. The Fund intends to meet these requirements. If the Fund failed to do so, the Fund would be required to pay corporate taxes on its earnings and all your dividends would be taxable as ordinary income to the extent of the Fund's earnings and profits. In particular, in order for the Fund to pay exempt-interest dividends,

at least 50% of the value of the Fund's total assets must consist of tax-exempt obligations at the close of each quarter of its taxable year. The Fund intends to meet this requirement. If the Fund failed to do so, it would not be able to pay exempt-interest dividends and your dividends attributable to interest received by the Fund from any source would be taxable as ordinary income.

The sale or other disposition of Common Shares will generally result in capital gain or loss to you if you hold such Common Shares as capital assets. Present law taxes both long-term and short-term capital gains of corporations at the rates applicable to ordinary income. For non-corporate taxpayers, however, long-term capital gains are eligible for reduced rates of taxation.

The Fund may be required to withhold a percentage of certain of your dividends if you have not provided the Fund with your correct taxpayer identification number (for individuals, normally your Social Security number) and certain certifications, or if you are otherwise subject to backup withholding. The backup withholding percentage will be 30% in 2002 and 2003, 29% in 2004 and 2005, and 28% thereafter until 2011, when the percentage will revert to 31% unless amended by Congress. If you receive Social Security benefits, you should be aware that exempt-interest dividends are taken into account in calculating the amount of these benefits that may be subject to federal income tax. If you borrow money to buy Fund shares, you may not deduct the interest on that loan. Under I.R.S. rules, Fund shares may be treated as having been bought with borrowed money even if the purchase of the Fund shares cannot be traced directly to borrowed money.

California Tax Matters

The following is based upon the advice of Orrick, Herrington & Sutcliffe LLP, special California counsel to the Fund.

The Fund's regular monthly dividends will not be subject to California personal income taxes to the extent they are paid out of income earned on obligations that, when held by individuals, pay interest that is exempt from taxation by California under California law (e.g., obligations of California and its political subdivisions) or federal law, so long as at the close of each quarter of the Fund's taxable year at least 50 percent of the value of the Fund's total assets consist of such obligations. The portion of the Fund's monthly dividends that is attributable to income other than as described in the preceding sentence will be subject to the California income tax. The Fund expects to earn no or only a minimal

37

amount of such non-exempt income. You will be subject to California personal income taxes to the extent the Fund distributes any taxable income or realized capital gains, or if you sell or exchange Common Shares and realize a capital gain on the transaction.

Shareholders are advised to consult with their own tax advisors for more detailed information concerning California tax matters. Please refer to the Statement of Additional Information for more detailed information.

OTHER MATTERS

A lawsuit was brought in June 1996 (Green et al. v. Nuveen Advisory Corp., et al.) by certain individual common shareholders of six leveraged closed-end funds sponsored by Nuveen, and ultimately heard in the federal district court for the Northern District of Illinois. The suit was originally brought against Nuveen, Nuveen Advisory, six Nuveen investment companies (the "leveraged

closed-end funds") managed by Nuveen Advisory and two of the leveraged closed-end funds' former directors seeking unspecified damages, an injunction and other relief. The suit also sought certification of a defendant class consisting of all Nuveen-managed leveraged funds.

The plaintiffs alleged that the leveraged closed-end funds engaged in certain practices that violated various provisions of the 1940 Act and common law. The plaintiffs also alleged, among other things, breaches of fiduciary duty by the funds' directors and Nuveen Advisory and various misrepresentations and omissions in prospectuses and shareholder reports relating to the use of leverage through the issuance and periodic auctioning of preferred stock and the basis of the calculation and payment of management fees to Nuveen Advisory and Nuveen. Plaintiffs also filed a motion to certify defendant and plaintiff classes.

The defendants filed motions to dismiss the entire lawsuit asserting that the claims were without merit and to oppose certification of any classes. On March 30, 1999, the court entered a memorandum opinion and order (1) granting the defendants' motion to dismiss all of plaintiffs' counts against the defendants other than Nuveen Advisory, (2) granting Nuveen Advisory's motion to dismiss all of plaintiffs' counts against it other than breach of fiduciary duty under Section 36(b) of the 1940 Act, and (3) denying the plaintiffs' motion to certify a plaintiff class and a defendant class. No appeal was made by plaintiffs of this decision, and the remaining Section 36(b) count against Nuveen Advisory is discussed below.

As to alleged damages, plaintiffs have claimed as damages the portion of all advisory compensation received by Nuveen Advisory from the funds during the period from June 21, 1995 to the present that is equal to the proportion of each of such fund's preferred stock to its total assets. The preferred stock constitutes approximately one third of the funds' assets so the amount claimed would equal approximately one third of management fees received by Nuveen Advisory for managing the funds during this period. Nuveen Advisory believes that it has no liability and the plaintiffs have suffered no damages and filed a motion for summary judgment as to both liability and damages.

Plaintiffs filed a motion for partial summary judgment as to liability only. In a memorandum opinion and order dated September 6, 2001, the federal district court granted Nuveen Advisory's motion for summary judgment and denied plaintiffs' motion for partial summary judgment, thereby terminating the litigation before the court. Plaintiffs appealed this decision on October 8, 2001. In an opinion dated July 8, 2002, the Seventh Circuit Court of Appeals affirmed the opinion of the district court dismissing the plaintiffs' lawsuit. Plaintiffs filed a petition for a writ of certiorari with the United States Supreme Court on October 1, 2002 seeking to appeal the Seventh Circuit opinion. The defendants intend to file a brief in opposition to the petition.

38

UNDERWRITING

Subject to the terms and conditions stated in the underwriting agreement dated the date hereof, each Underwriter named below has severally agreed to purchase, and the Fund has agreed to sell to such Underwriter, the number of Common Shares set forth opposite the name of such Underwriter.

	=====

The underwriting agreement provides that the obligations of the several Underwriters to purchase the Common Shares included in this offering are subject to approval of certain legal matters by counsel and to certain other conditions. The Underwriters are obligated to purchase all the Common Shares (other than those covered by the over-allotment option described below) if they purchase any of the Common Shares. The representatives described below have advised the Fund that the Underwriters do not intend to confirm any sales to any accounts over which they exercise discretionary authority.

The Underwriters, for whom Salomon Smith Barney Inc., Nuveen Investments, A.G. Edwards & Sons, Inc., Prudential Securities Incorporated, Crowell, Weedon & Co., Raymond James & Associates, Inc., RBC Dain Rauscher, Inc., Wachovia Securities, Inc. and Wedbush Morgan Securities Inc. are acting as representatives, propose to offer some of the Common Shares directly to the public at the public offering price set forth on the cover page of this Prospectus and some of the Common Shares to certain

dealers at the public offering price less a concession not in excess of \$0.45 per Common Share. The sales load the Fund will pay of \$0.675 per share is equal to 4.5% of the initial offering price. The Underwriters may allow, and such dealers may reallow, a concession not in excess of \$0.10 per Common Share on sales to certain other dealers. If all of the Common Shares are not sold at the initial offering price, the representatives may change the public offering price and other selling terms. Investors must pay for any Common Shares purchased on or before November 26, 2002. In connection with this offering,

Nuveen may perform clearing services without charge for brokers and dealers for whom it regularly provides clearing services that are participating in the offering as members of the selling group.

The Fund has granted to the Underwriters an option, exercisable for 45 days from the date of this Prospectus, to purchase up to 817,500 additional Common Shares at the public offering price less the sales load. The Underwriters may exercise such option solely for the purpose of covering over-allotments, if any, in connection with this offering. To the extent such option is exercised, each Underwriter will be obligated, subject to certain conditions, to purchase a number of additional Common Shares approximately proportionate to such Underwriter's initial purchase commitment.

The Fund and Nuveen Advisory have agreed that, for a period of 180 days from the date of this Prospectus, they will not, without the prior written consent of Salomon Smith Barney Inc., on behalf of the Underwriters, dispose of or hedge any Common Shares or any securities convertible into or exchangeable for Common Shares. Salomon Smith Barney Inc. in its sole discretion may release any of the securities subject to these agreements at any time without notice.

Prior to the offering, there has been no public market for the Common Shares. Consequently, the initial public offering price for the Common Shares was determined by negotiation among the Fund, Nuveen Advisory and the representatives. There can be no assurance, however, that the price at which the Common Shares will sell in the public market after this offering will not be lower than the price at which they are sold by the Underwriters or that an active trading market in the Common Shares will develop and continue after this offering. The Common Shares have been approved for listing on the American Stock Exchange, subject to official notice of issuance.

The Fund and Nuveen Advisory have each agreed to indemnify the several Underwriters or contribute to losses arising out of certain liabilities, including liabilities under the Securities Act of 1933, as amended.

Nuveen has agreed to pay (i) all organizational expenses and (ii) offering costs (other than sales load) that exceed \$0.03 per share.

In addition, the Fund has agreed to reimburse the Underwriters for certain expenses incurred by the Underwriters in the offering.

Certain Underwriters participating in the Common Share offering may be invited, some period of time after completion of this offering, to participate in the offering of the MuniPreferred Shares and will receive compensation for their participation in that MuniPreferred Share offering. The number of Common Shares purchased by each Underwriter in this offering may be a factor in determining (i) whether that Underwriter is selected to participate in the offering of the MuniPreferred Shares, (ii) the number of MuniPreferred Shares allocated to that Underwriter in that offering, and (iii) the

40

amount of certain additional MuniPreferred Share underwriting compensation available to that Underwriter. The offering costs associated with the issuance of MuniPreferred Shares are currently estimated to be approximately 2.2% of the total amount of the MuniPreferred Share offering. These costs will effectively be borne by the Common Shareholders.

In connection with the requirements for listing the Fund's Common Shares on the American Stock Exchange, the Underwriters have undertaken to sell lots of 100 or more Common Shares to a minimum of 400 beneficial owners in the United

States. The minimum investment requirement is 100 Common Shares.

Certain Underwriters may make a market in the Common Shares after trading in the Common Shares has commenced on the American Stock Exchange. No Underwriter is, however, obligated to conduct market-making activities and any such activities may be discontinued at any time without notice, at the sole discretion of the Underwriter. No assurance can be given as to the liquidity of, or the trading market for, the Common Shares as a result of any market-making activities undertaken by any Underwriter. This Prospectus is to be used by any Underwriter in connection with the offering and, during the period in which a prospectus must be delivered, with offers and sales of the Common Shares in market-making transactions in the over-the-counter market at negotiated prices related to prevailing market prices at the time of the sale.

The Underwriters have advised the Fund that, pursuant to Regulation M under the Securities Exchange Act of 1934, as amended, certain persons participating in the offering may engage in transactions, including stabilizing bids, covering transactions or the imposition of penalty bids, which may have the effect of stabilizing or maintaining the market price of the Common Shares on the American Stock Exchange at a level above that which might otherwise prevail in the open market. A "stabilizing bid" is a bid for or purchase of the Common Shares on behalf of an Underwriter for the purpose of fixing or maintaining the price of the Common Shares. A "covering transaction" is a bid for or purchase of the Common Shares on behalf of an Underwriter to reduce a short position incurred by the Underwriters in connection with the offering. A "penalty bid" is a contractual arrangement whereby if, during a specified period after the issuance of the Common Shares, the Underwriters purchase Common Shares in the open market for the account of the underwriting syndicate and the Common Shares purchased can be traced to a particular Underwriter or member of the selling group, the underwriting syndicate may require the Underwriter or selling group member in question to purchase the Common Shares in question at the cost price to the syndicate or may recover from (or decline to pay to) the Underwriter or selling group member in question any or all compensation (including, with respect to a representative, the applicable syndicate management fee) applicable to the Common Shares in question. As a result, an Underwriter or selling group member and, in turn, brokers may lose the fees that they otherwise would have earned from a sale of the Common Shares if their customer resells the Common Shares while the penalty bid is in effect. The Underwriters are not required to engage in any of these activities, and any such activities, if commenced, may be discontinued at any time.

The underwriting agreement provides that it may be terminated in the absolute discretion of the representatives without liability on the part of the Underwriters to the Fund or Nuveen Advisory if, prior to the delivery of and payment for the Common Shares, (i) trading in the Fund's Common Shares shall have been suspended by the Securities and Exchange Commission or the American Stock Exchange or trading in securities generally on the New York Stock Exchange or the American Stock Exchange shall have been suspended or limited or minimum prices for trading in securities generally shall have been

established on either of such Exchanges, (ii) a commercial banking moratorium shall have been declared by either federal or New York state authorities or (iii) there shall have occurred any outbreak or escalation of hostilities, declaration by the United States of a national emergency or war, or other calamity or crisis the effect of which on financial markets in the United States is such as to make it, in the sole judgment of the representatives, impracticable or inadvisable to proceed with the offering or delivery of the Common Shares as contemplated by the Prospectus (exclusive of any supplement

thereto).

The Fund anticipates that from time to time the representatives of the Underwriters and certain other Underwriters may act as brokers or dealers in connection with the execution of the Fund's portfolio transactions after they have ceased to be Underwriters and, subject to certain restrictions, may act as brokers while they are Underwriters.

Prior to the public offering of Common Shares, Nuveen Advisory purchased Common Shares from the Fund in an amount satisfying the net worth requirements of Section 14(a) of the 1940 Act. As of the date of this Prospectus, Nuveen Advisory owned 100% of the Fund's outstanding Common Shares. Nuveen Advisory may be deemed to control the Fund until such time as it owns less than 25% of the outstanding Common Shares, which is expected to occur as of the completion of the offering of Common Shares.

Nuveen, 333 West Wacker Drive, Chicago, Illinois 60606, one of the representatives of the Underwriters, is an affiliate of Nuveen Advisory.

The principal business address of Salomon Smith Barney Inc. is 388 Greenwich Street, New York, New York 10013.

CUSTODIAN AND TRANSFER AGENT

The custodian of the assets of the Fund is State Street Bank and Trust Company, One Federal Street, Boston, Massachusetts 02110. The Custodian performs custodial, fund accounting and portfolio accounting services. The Fund's transfer, shareholder services and dividend paying agent is also State Street Bank and Trust Company, 225 Franklin Street, Boston, Massachusetts 02110.

LEGAL OPINIONS

Certain legal matters in connection with the Common Shares will be passed upon for the Fund by Bell, Boyd & Lloyd LLC, Chicago, Illinois, and for the Underwriters by Simpson Thacher & Bartlett, New York, New York. Bell, Boyd & Lloyd LLC and Simpson Thacher & Bartlett may rely as to certain matters of Massachusetts law on the opinion of Bingham McCutchen LLP, Boston, Massachusetts.

STATEMENT OF ADDITIONAL INFORMATION

Nuveen Insured California Tax-Free Advantage Municipal Fund (the "Fund") is a newly organized, non-diversified closed-end management investment company.

This Statement of Additional Information relating to common shares of the

Edgar Filing: NUVEEN INSURED CALIFORNIA TAX FREE ADVANTAGE MUNICIPAL FUND - Form 497

Fund ("Common Shares") does not constitute a prospectus, but should be read in conjunction with the Fund's Prospectus relating thereto dated November 21, 2002 (the "Prospectus"). This Statement of Additional Information does not include all information that a prospective investor should consider before purchasing Common Shares. Investors should obtain and read the Fund's Prospectus prior to purchasing such shares. A copy of the Fund's Prospectus may be obtained without charge by calling (800) 257-8787. You may also obtain a copy of the Fund's Prospectus on the Securities and Exchange Commission's web site (<http://www.sec.gov>). Capitalized terms used but not defined in this Statement of Additional Information have the meanings ascribed to them in the Prospectus.

2

USE OF PROCEEDS

The net proceeds of the offering of Common Shares of the Fund will be approximately: \$77,907,750 (\$89,593,913 if the Underwriters exercise the over-allotment option in full) after payment of organization and offering costs.

3

For the Fund, Nuveen has agreed to pay (i) all organizational expenses and (ii) offering costs (other than sales load) that exceed \$0.03 per Common Share.

Pending investment in municipal bonds that meet the Fund's investment objectives and policies, the net proceeds of the offering will be invested in high quality, short-term tax-exempt money market securities or in high quality municipal bonds with relatively low volatility (such as pre-refunded and intermediate-term bonds), to the extent such securities are available. If necessary to invest fully the net proceeds of the offering immediately, the Fund may also purchase, as temporary investments, short-term taxable investments of the type described under "Investment Policies and Techniques--Investment in Municipal Bonds--Portfolio Investments," the income on which is subject to regular federal and California income taxes, and securities of other open or closed-end investment companies that invest primarily in municipal bonds of the type in which the Fund may invest directly.

4

INVESTMENT OBJECTIVES

The Fund's investment objectives are to provide current income exempt from regular federal income tax, the alternative minimum tax applicable to individuals and California income tax, and to enhance portfolio value relative to the municipal bond market by investing in tax-exempt municipal bonds that the Fund's investment adviser believes are underrated or undervalued or that represent municipal market sectors that are undervalued.

5

The Fund's investment in underrated or undervalued municipal bonds will be based on Nuveen Advisory's belief that their yield is higher than that available on bonds bearing equivalent levels of interest rate risk, credit risk and other forms of risk, and that their prices will ultimately rise (relative to the market) to reflect their true value. The Fund attempts to increase its portfolio value relative to the municipal bond market by prudent selection of municipal bonds regardless of the direction the market may move. There can be no assurance that the Fund's attempt to increase its portfolio value relative to the municipal bond market will succeed. To the extent that it does succeed, however, such success would increase the amount of net capital gains or reduce the amount of net capital losses that the Fund would otherwise have realized. While this incremental increase in net realized capital gains due to successful value investing, if any, is expected to be modest over time, it would tend to result in the distribution, over time, of a modestly greater amount of taxable capital gains to Common Shareholders.

The Fund's investment objectives are fundamental policies of the Fund.

Under normal circumstances, the Fund will invest at least 80% of its Managed Assets in a portfolio of municipal bonds that:

- . pay interest that is exempt from regular federal and California income taxes and from the federal alternative minimum tax applicable to individuals; and
- . are covered by insurance guaranteeing the timely payment of principal and interest thereon.

This insurance does not protect the market value of portfolio holdings or the net asset value of the Fund.

With respect to its entire portfolio, the Fund will invest only in bonds and other eligible investments, whether or not insured, that at the time of investment are investment grade quality. Under normal circumstances, the Fund (i) expects to be fully invested (at least 95% of its assets) in municipal bonds that are exempt from regular federal and California income taxes and (ii) will not invest in AMT Bonds.

After the completion of the offering through November 30, 2003 (the "Invest-up Period"), the Fund may invest in municipal bonds that pay interest that is exempt from regular federal income tax and the alternative minimum tax applicable to individuals but not from California income tax ("Out of State Bonds"), provided that no more than 10% of the Fund's investment income during that time may be derived from investments in Out of State Bonds. It is a fundamental policy of the Fund that its investments in municipal bonds the interest on which is not taxable under regular federal income tax, the alternative minimum income tax applicable to individuals and California income tax will, under normal circumstances, comprise at least 80% of the Fund's Managed Assets. The Fund will notify shareholders at least 60 days prior to any change in its policy to invest 80% of its Managed Assets in bonds that are covered by insurance guaranteeing the timely payment of principal and interest thereon.

The Fund may at all times invest up to 20% of its net assets in (i) uninsured municipal bonds that are backed by an escrow or trust account containing sufficient U.S. Government or U.S. Government agency securities to ensure timely payment of principal and interest, or (ii) other municipal bonds that at the time of investment are investment grade quality. Investment grade quality bonds are bonds rated by all NRSROs that rate the bond within the four highest grades (Baa or BBB or better by Moody's, S&P or Fitch), or bonds that are unrated but judged to be of comparable quality by Nuveen Advisory.

Investment Restrictions

Except as described below, the Fund, as a fundamental policy, may not, without the approval of the holders of a majority of the outstanding Common Shares and, if issued, MuniPreferred Shares (as hereinafter defined) voting together as a single class, and of the holders of a majority of the outstanding MuniPreferred Shares voting as a separate class:

(1) Under normal circumstances, invest less than 80% of the Fund's net assets (plus any borrowings for investment purposes) in investments the income from which is exempt from regular federal income tax, the alternative minimum tax applicable to individuals and California income tax;

(2) Issue senior securities, as defined in the Investment Company Act of 1940, other than MuniPreferred Shares, except to the extent permitted under the Investment Company Act of 1940 and except as otherwise described in the Prospectus;

(3) Borrow money, except from banks for temporary or emergency purposes or for repurchase of its shares, and then only in an amount not exceeding one-third of the value of the Fund's total assets (including the amount borrowed) less the Fund's liabilities (other than borrowings);

(4) Act as underwriter of another issuer's securities, except to the extent that the Fund may be deemed to be an underwriter within the meaning of the Securities Act of 1933 in connection with the purchase and sale of portfolio securities;

(5) Invest more than 25% of its total assets in securities of issuers in any one industry; provided, however, that such limitation shall not apply to municipal bonds other than those municipal bonds backed only by the assets and revenues of non-governmental users;

7

(6) Purchase or sell real estate, but this shall not prevent the Fund from investing in municipal bonds secured by real estate or interests therein or foreclosing upon and selling such security;

(7) Purchase or sell physical commodities unless acquired as a result of ownership of securities or other instruments (but this shall not prevent the Fund from purchasing or selling options, futures contracts, derivative instruments or from investing in securities or other instruments backed by physical commodities);

(8) Make loans, other than by entering into repurchase agreements and through the purchase of municipal bonds or short-term investments in accordance with its investment objectives, policies and limitations; and

(9) Purchase any securities (other than obligations issued or guaranteed by the United States Government or by its agencies or instrumentalities), if as a result more than 5% of the Fund's total assets would then be invested in securities of a single issuer or if as a result the Fund would hold more than 10% of the outstanding voting securities of any single issuer; provided that, with respect to 50% of the Fund's assets, the Fund may invest up to 25% of its assets in the securities of any one issuer.

For purposes of the foregoing and "Description of Shares--MuniPreferred Shares--Voting Rights" below, "majority of the outstanding," when used with respect to particular shares of the Fund, means (i) 67% or more of the shares present at a meeting, if the holders of more than 50% of the shares are present or represented by proxy, or (ii) more than 50% of the shares, whichever is less.

For the purpose of applying the limitation set forth in subparagraph (9)

above, an issuer shall be deemed the sole issuer of a security when its assets and revenues are separate from other governmental entities and its securities are backed only by its assets and revenues. Similarly, in the case of a non-governmental issuer, such as an industrial corporation or a privately owned or operated hospital, if the security is backed only by the assets and revenues of the non-governmental issuer, then such non-governmental issuer would be deemed to be the sole issuer. Where a security is also backed by the enforceable obligation of a superior or unrelated governmental or other entity (other than a bond insurer), it shall also be included in the computation of securities owned that are issued by such governmental or other entity. Where a security is guaranteed by a governmental entity or some other facility, such as a bank guarantee or letter of credit, such a guarantee or letter of credit would be considered a separate security and would be treated as an issue of such government, other entity or bank. When a municipal bond is insured by bond insurance, it shall not be considered a security that is issued or guaranteed by the insurer; instead, the issuer of such municipal bond will be determined in accordance with the principles set forth above. The foregoing restrictions do not limit the percentage of the Fund's assets that may be invested in municipal bonds insured by any given insurer.

Under the Investment Company Act of 1940, the Fund may invest only up to 10% of its Managed Assets in the aggregate in shares of other investment companies and only up to 5% of its Managed Assets in any one investment company, provided the investment does not represent more than 3% of the voting stock of the acquired investment company at the time such shares are purchased. As a stockholder in any investment company, the Fund will bear its ratable share of

8

that investment company's expenses, and will remain subject to payment of the Fund's management, advisory and administrative fees with respect to assets so invested. Holders of Common Shares would therefore be subject to duplicative expenses to the extent the Fund invests in other investment companies. In addition, the securities of other investment companies may also be leveraged and will therefore be subject to the same leverage risks described herein. As described in the Prospectus in the section entitled "Risks", the net asset value and market value of leveraged shares will be more volatile and the yield to shareholders will tend to fluctuate more than the yield generated by unleveraged shares.

In addition to the foregoing fundamental investment policies, the Fund is also subject to the following non-fundamental restrictions and policies, which may be changed by the Board of Trustees. The Fund may not:

(1) Sell securities short, unless the Fund owns or has the right to obtain securities equivalent in kind and amount to the securities sold at no added cost, and provided that transactions in options, futures contracts, options on futures contracts, or other derivative instruments are not deemed to constitute selling securities short.

(2) Purchase securities of open-end or closed-end investment companies except in compliance with the Investment Company Act of 1940 or any exemptive relief obtained thereunder.

(3) Enter into futures contracts or related options or forward contracts, if more than 30% of the Fund's net assets would be represented by futures contracts or more than 5% of the Fund's net assets would be committed to initial margin deposits and premiums on futures contracts and related options.

(4) Purchase securities when borrowings exceed 5% of its total assets if and so long as MuniPreferred Shares are outstanding.

(5) Purchase securities of companies for the purpose of exercising control, except that the Fund may invest up to 5% of its net assets in taxable tax-exempt or fixed-income or equity securities for the purpose of acquiring control of an issuer whose municipal bonds (a) the Fund already owns and (b) have deteriorated or are expected shortly to deteriorate significantly in credit quality, provided Nuveen Advisory determines that such investment should enable the Fund to better maximize the value of its existing investment in such issuer.

(6) Invest in inverse floating rate securities (which are securities that pay interest at rates that vary inversely with changes in prevailing short-term tax-exempt interest rates and which represent a leveraged investment in an underlying municipal bond).

The restrictions and other limitations set forth above will apply only at the time of purchase of securities and will not be considered violated unless an excess or deficiency occurs or exists immediately after and as a result of an acquisition of securities.

The Fund intends to apply for ratings for its preferred shares (called "MuniPreferred Shares" herein) from Moody's and/or S&P. In order to obtain and maintain the required ratings, the Fund may be required to comply with investment quality, diversification and other guidelines established by Moody's or S&P. Such guidelines will likely be more restrictive than the restrictions set forth above. The Fund does not anticipate that such guidelines would have a material

9

adverse effect on its Common Shareholders or its ability to achieve its investment objectives. The Fund presently anticipates that any MuniPreferred Shares that it intends to issue would be initially given the highest ratings by Moody's ("Aaa") or by S&P ("AAA"), but no assurance can be given that such ratings will be obtained. No minimum rating is required for the issuance of MuniPreferred Shares by the Fund. Moody's and S&P receive fees in connection with their ratings issuances.

INVESTMENT POLICIES AND TECHNIQUES

The following information supplements the discussion of the Fund's investment objectives, policies, and techniques that are described in the Fund's Prospectus.

Investment in Municipal Bonds

Portfolio Investments

Under normal circumstances, the Fund will invest at least 80% of its Managed Assets in a portfolio of municipal bonds that (i) pay interest that is exempt from regular federal and California income taxes and from the federal alternative minimum tax applicable to individuals and (ii) are covered by insurance guaranteeing the timely payment of principal and interest thereon. This insurance does not protect the market value of portfolio holdings or the net asset value of the Fund.

During the Invest-up Period, the Fund may invest in Out of State Bonds, provided that no more than 10% of the Fund's investment income during that time may be derived from Out of State Bonds.

The Fund may at all times invest up to 20% of its net assets in (i) uninsured municipal bonds that are backed by an escrow or trust account containing sufficient U.S. Government or U.S. Government agency securities to ensure timely payment of principal and interest, or (ii) other municipal bonds that at the time of investment are investment grade quality. Investment grade quality bonds are bonds rated by all NRSROs that rate the bond within the four highest grades (Baa or BBB or better by Moody's, S&P or Fitch), or bonds that are unrated but judged to be of comparable quality by Nuveen Advisory.

With respect to its entire portfolio, the Fund will invest only in bonds and other eligible investments, whether or not insured, that at the time of investment are investment grade quality. Under normal circumstances, and except for the temporary investments described below, the Fund (i) expects to be fully invested (at least 95% of its assets) in municipal bonds that pay interest that is exempt from regular federal and California income taxes and (ii) will not invest in AMT Bonds.

10

Municipal bonds rated Baa or BBB are considered "investment grade" securities; municipal bonds rated Baa are considered medium grade obligations which lack outstanding investment characteristics and have speculative characteristics, while municipal bonds rated BBB are regarded as having adequate capacity to pay principal and interest. Municipal bonds rated AAA in which the Fund may invest may have been so rated on the basis of the existence of insurance guaranteeing the timely payment, when due, of all principal and interest.

A general description of Moody's, S&P's and Fitch's ratings of municipal bonds is set forth in Appendix A hereto. The ratings of Moody's, S&P and Fitch represent their opinions as to the quality of the municipal bonds they rate. It should be emphasized, however, that ratings are general and are not absolute standards of quality. Consequently, municipal bonds with the same maturity, coupon and rating may have different yields while obligations of the same maturity and coupon with different ratings may have the same yield.

Each insured municipal bond that the Fund holds will either be (1) covered by an insurance policy applicable to a specific security and obtained by the issuer of the security or a third party at the time of original issuance ("Original Issue Insurance"), (2) covered by an insurance policy applicable to a specific security and obtained by the Fund and/or a third party subsequent to the time of original issuance ("Secondary Market Insurance"), or (3) covered by a master municipal insurance policy purchased by the Fund ("Portfolio Insurance"). The Fund, as non-fundamental policies that can be changed by the Board of Trustees, (A) will only buy Portfolio Insurance from insurers whose claims-paying ability Moody's rates "Aaa" or S&P or Fitch rates "AAA", and (B) will maintain at least 80% of its total Managed Assets in municipal bonds covered by insurance from insurers with a claims-paying ability rated, at the time of the bond's purchase, "Aaa" by Moody's or "AAA" by S&P or Fitch.

Information about the primary municipal bond insurers with whom the Fund intends to maintain specific insurance policies for particular municipal bonds or policies of Portfolio Insurance is set forth in Appendix C hereto.

The Fund may at all times invest up to 20% of its net assets in uninsured municipal bonds that are entitled to the benefit of an escrow or trust account that contains securities issued or guaranteed by the U.S. Government or U.S. Government agencies, backed by the full faith and credit of the United States, and sufficient in amount to ensure the payment of interest and principal on the original interest payment and maturity dates ("collateralized obligations"). These collateralized obligations generally will not be insured and will include, but are not limited to municipal bonds that have been (1) advance refunded where the proceeds of the refunding have been used to buy U.S. Government or U.S. Government agency securities that are placed in escrow and whose interest or maturing principal payments, or both, are sufficient to cover the remaining scheduled debt service on that municipal bond; or (2) issued under state or local housing finance programs that use the issuance proceeds to fund mortgages that are then exchanged for U.S. Government or U.S. Government agency securities and deposited with a trustee as security for those municipal bonds. These collateralized obligations are normally regarded as having the credit characteristics of the underlying U.S. Government or U.S. Government agency securities.

11

The Fund will primarily invest in municipal bonds with long-term maturities in order to maintain a weighted average maturity of 15-30 years, but the average weighted maturity of obligations held by the Fund may be shortened, depending on market conditions. As a result, the Fund's portfolio at any given time may include both long-term and intermediate-term municipal bonds. Moreover, during temporary defensive periods (e.g., times when, in Nuveen Advisory's opinion, temporary imbalances of supply and demand or other temporary dislocations in the tax-exempt bond market adversely affect the price at which long-term or intermediate-term municipal bonds are available), and in order to keep the Fund's cash fully invested, including the period during which the net proceeds of the offering are being invested, the Fund may invest up to 100% of its net assets in short-term investments including high quality, short-term securities that may be either tax-exempt or taxable and up to 10% of its net assets in securities of other open or closed-end investment companies that invest primarily in municipal bonds of the type in which the Fund may invest directly. The Fund intends to invest in taxable short-term investments only in the event that suitable tax-exempt short-term investments are not available at reasonable prices and yields. Tax-exempt short-term investments include various obligations issued by state and local governmental issuers, such as tax-exempt notes (bond anticipation notes, tax anticipation notes and revenue anticipation notes or other such municipal bonds maturing in three years or less from the date of issuance) and municipal commercial paper. The Fund will invest only in taxable short-term investments which are U.S. Government securities or securities rated within the highest grade by Moody's, S&P or Fitch, and which mature within one year from the date of purchase or carry a variable or floating rate of interest. See Appendix A for a general description of Moody's, S&P's and Fitch's ratings of securities in such categories. Taxable short-term investments of the Fund may include certificates of deposit issued by U.S. banks with assets of at least \$1 billion, or commercial paper or corporate notes, bonds or debentures with a remaining maturity of one year or less, or repurchase agreements. See "Other Investment Policies and Techniques--Repurchase Agreements." To the extent the Fund invests

12

in taxable investments, the Fund will not at such times be in a position to achieve its investment objective of tax-exempt income.

The foregoing policies as to ratings of portfolio investments will apply only at the time of the purchase of a security, and the Fund will not be required to dispose of securities in the event Moody's, S&P or Fitch downgrades its assessment of the credit characteristics of a particular issuer.

Nuveen Advisory seeks to enhance portfolio value relative to the municipal bond market by investing in tax-exempt municipal bonds that it believes are underrated or undervalued or that represent municipal market sectors that are undervalued. Underrated municipal bonds are those whose ratings do not, in Nuveen Advisory's opinion, reflect their true creditworthiness. Undervalued municipal bonds are bonds that, in Nuveen Advisory's opinion, are worth more than the value assigned to them in the marketplace. Nuveen Advisory may at times believe that bonds associated with a particular municipal market sector (for example, electric utilities), or issued by a particular municipal issuer, are undervalued. Nuveen Advisory may purchase such a bond for the Fund's portfolio because it represents a market sector or issuer that Nuveen Advisory considers undervalued, even if the value of the particular bond is consistent with the value of similar bonds. Municipal bonds of particular types or purposes (e.g., hospital bonds, industrial revenue bonds or bonds issued by a particular municipal issuer) may be undervalued because there is a temporary excess of supply in that market sector, or because of a general decline in the market price of municipal bonds of the market sector for reasons that do not apply to the particular municipal bonds that are considered undervalued. The Fund's investment in underrated or undervalued municipal bonds will be based on Nuveen Advisory's belief that their yield is higher than that available on bonds bearing equivalent levels of interest rate risk, credit risk and other forms of risk, and that their prices will ultimately rise (relative to the market) to reflect their true value.

Likewise, the Fund may deviate from its normal investment policies and invest up to 5% of its net assets in tax-exempt or taxable fixed-income or equity securities of an issuer of municipal bonds that the Fund already owns for the purpose of acquiring control of that issuer when Nuveen Advisory determines that such investment should enable the Fund to better maximize the value of its existing investment.

Also included within the general category of municipal bonds described in the Fund's Prospectus are participations in lease obligations or installment purchase contract obligations (hereinafter collectively called "Municipal Lease Obligations") of municipal authorities or entities. Although a Municipal Lease Obligation does not constitute a general obligation of the municipality for which the municipality's taxing power is pledged, a Municipal Lease Obligation is ordinarily backed by the municipality's covenant to budget for, appropriate and make the payments due under the Municipal Lease Obligation. However, certain Municipal Lease Obligations contain "non-appropriation" clauses which provide that the municipality has no obligation to make lease or installment purchase payments in future years unless money is appropriated for such purpose on a yearly basis. In the case of a "non-appropriation" lease, the Fund's ability to recover under the lease in the event of non-appropriation or default will be limited solely to the repossession of the leased property, without recourse to the general credit of the lessee, and disposition or releasing of the property might prove difficult. In order to reduce this risk, the Fund will only

purchase Municipal Lease Obligations where Nuveen Advisory believes the issuer has a strong incentive to continue making appropriations until maturity.

Obligations of issuers of municipal bonds are subject to the provisions of bankruptcy, insolvency and other laws affecting the rights and remedies of creditors, such as the Bankruptcy Reform Act of 1978. In addition, the obligations of such issuers may become subject to the laws enacted in the future by Congress, state legislatures or referenda extending the time for payment of principal or interest, or both, or imposing other constraints upon enforcement of such obligations or upon municipalities to levy taxes. There is also the possibility that, as a result of legislation or other conditions, the power or ability of any issuer to pay, when due, the principal of and interest on its municipal bonds may be materially affected.

The Fund will generally select obligations which may not be redeemed at the option of the issuer for approximately seven to nine years.

Additional Information on Municipal Bond Insurance

Original Issue Insurance. If interest or principal on a municipal bond is due, but the issuer fails to pay it, the insurer will make payments in the amount due to the fiscal agent no later than one business day after the insurer has been notified of the issuer's nonpayment. The fiscal agent will pay the amount due to the Fund after the fiscal agent receives evidence of the Fund's right to receive payment of the principal and/or interest, and evidence that all of the rights of payment due shall thereupon vest in the insurer. When the insurer pays the Fund the payment due from the issuer, the insurer will succeed to the Fund's rights to that payment.

Portfolio Insurance. Each portfolio insurance policy will be noncancellable and will remain in effect so long as the Fund is in existence, the Fund continues to own the municipal bonds covered by the policy, and the Fund pays the premiums for the policy. Each insurer generally will reserve the right at any time upon 90 days' written notice to the Fund to refuse to insure any additional bonds the Fund buys after the effective date of the notice. The Fund's Board of Trustees will generally reserve the right to terminate each policy upon seven day's written notice to an insurer if it determines that the cost of the policy is not reasonable in relation to the value of the insurance to the Fund.

14

Short-Term Investments

Short-Term Taxable Fixed Income Securities

For temporary defensive purposes or to keep cash on hand fully invested, the Fund may invest up to 100% of its net assets in cash equivalents and short-term taxable fixed-income securities, although the Fund intends to invest in taxable short-term investments only in the event that suitable tax-exempt short-term investments are not available at reasonable prices and yields. Short-term taxable fixed income investments are defined to include, without limitation, the following:

- (1) U.S. government securities, including bills, notes and bonds differing as to maturity and rates of interest that are either issued or guaranteed by the U.S. Treasury or by U.S. government agencies or instrumentalities. U.S. government agency securities include securities issued by (a) the Federal Housing Administration, Farmers Home Administration, Export-Import Bank of the United States, Small Business Administration, and the Government National Mortgage Association, whose securities are supported by the full faith and credit of the United States;

(b) the Federal Home Loan Banks, Federal Intermediate Credit Banks, and the Tennessee Valley Authority, whose securities are supported by the right of the agency to borrow from the U.S. Treasury; (c) the Federal National Mortgage Association, whose securities are supported by the discretionary authority of the U.S. government to purchase certain obligations of the agency or instrumentality; and (d) the Student Loan Marketing Association, whose securities are supported only by its credit. While the U.S. government provides financial support to such U.S. government-sponsored agencies or instrumentalities, no assurance can be given that it always will do so since it is not so obligated by law. The U.S. government, its agencies, and instrumentalities do not guarantee the market value of their securities. Consequently, the value of such securities may fluctuate.

(2) Certificates of Deposit issued against funds deposited in a bank or a savings and loan association. Such certificates are for a definite period of time, earn a specified rate of return, and are normally negotiable. The issuer of a certificate of deposit agrees to pay the amount deposited plus interest to the bearer of the certificate on the date specified thereon. Under current FDIC regulations, the maximum insurance payable as to any one certificate of deposit is \$100,000; therefore, certificates of deposit purchased by the Fund may not be fully insured.

(3) Repurchase agreements, which involve purchases of debt securities. At the time the Fund purchases securities pursuant to a repurchase agreement, it simultaneously agrees to resell and redeliver such securities to the seller, who also simultaneously agrees to buy back the securities at a fixed price and time. This assures a predetermined yield for the Fund during its holding period, since the resale price is always greater than the purchase price and reflects an agreed-upon market rate. Such actions afford an opportunity for the Fund to invest

15

temporarily available cash. The Fund may enter into repurchase agreements only with respect to obligations of the U.S. government, its agencies or instrumentalities; certificates of deposit; or bankers' acceptances in which the Fund may invest. Repurchase agreements may be considered loans to the seller, collateralized by the underlying securities. The risk to the Fund is limited to the ability of the seller to pay the agreed-upon sum on the repurchase date; in the event of default, the repurchase agreement provides that the Fund is entitled to sell the underlying collateral. If the seller defaults under a repurchase agreement when the value of the underlying collateral is less than the repurchase price, the Fund could incur a loss of both principal and interest. The investment adviser monitors the value of the collateral at the time the action is entered into and at all times during the term of the repurchase agreement. The Fund's investment adviser does so in an effort to determine that the value of the collateral always equals or exceeds the agreed-upon repurchase price to be paid to the Fund. If the seller were to be subject to a federal bankruptcy proceeding, the ability of the Fund to liquidate the collateral could be delayed or impaired because of certain provisions of the bankruptcy laws.

(4) Commercial paper, which consists of short-term unsecured promissory notes, including variable rate master demand notes issued by corporations to finance their current operations. Master demand notes are direct lending arrangements between the Fund and a corporation. There is no secondary market for such notes. However, they are redeemable by the Fund at any time. Nuveen Advisory will consider the financial condition of the corporation (e.g., earning power, cash flow, and other liquidity measures)

and will continuously monitor the corporation's ability to meet all of its financial obligations, because the Fund's liquidity might be impaired if the corporation were unable to pay principal and interest on demand. Investments in commercial paper will be limited to commercial paper rated in the highest categories by a major rating agency and which mature within one year of the date of purchase or carry a variable or floating rate of interest.

Short-Term Tax-Exempt Fixed Income Securities

Short-term tax-exempt fixed-income securities are securities that are exempt from regular federal income tax and mature within three years or less from the date of issuance. Short-term tax-exempt fixed income securities are defined to include, without limitation, the following:

Bond Anticipation Notes ("BANs") are usually general obligations of state and local governmental issuers which are sold to obtain interim financing for projects that will eventually be funded through the sale of long-term debt obligations or bonds. The ability of an issuer to meet its obligations on its BANs is primarily dependent on the issuer's access to the long-term municipal bond market and the likelihood that the proceeds of such bond sales will be used to pay the principal and interest on the BANs.

16

Tax Anticipation Notes ("TANs") are issued by state and local governments to finance the current operations of such governments. Repayment is generally to be derived from specific future tax revenues. TANs are usually general obligations of the issuer. A weakness in an issuer's capacity to raise taxes due to, among other things, a decline in its tax base or a rise in delinquencies, could adversely affect the issuer's ability to meet its obligations on outstanding TANs.

Revenue Anticipation Notes ("RANs") are issued by governments or governmental bodies with the expectation that future revenues from a designated source will be used to repay the notes. In general, they also constitute general obligations of the issuer. A decline in the receipt of projected revenues, such as anticipated revenues from another level of government, could adversely affect an issuer's ability to meet its obligations on outstanding RANs. In addition, the possibility that the revenues would, when received, be used to meet other obligations could affect the ability of the issuer to pay the principal and interest on RANs.

Construction Loan Notes are issued to provide construction financing for specific projects. Frequently, these notes are redeemed with funds obtained from the Federal Housing Administration.

Bank Notes are notes issued by local government bodies and agencies, such as those described above to commercial banks as evidence of borrowings. The purposes for which the notes are issued are varied but they are frequently issued to meet short-term working capital or capital-project needs. These notes may have risks similar to the risks associated with TANs and RANs.

Tax-Exempt Commercial Paper ("Municipal Paper") represents very short-term unsecured, negotiable promissory notes issued by states, municipalities and their agencies. Payment of principal and interest on issues of municipal paper may be made from various sources, to the extent the funds are available therefrom. Maturities of municipal paper generally will be shorter than the maturities of TANs, BANs or RANs. There is a limited secondary market for issues of Municipal Paper.

Certain municipal bonds may carry variable or floating rates of interest whereby the rate of interest is not fixed but varies with changes in specified market rates or indices, such as a bank prime rate or a tax-exempt money market index.

While the various types of notes described above as a group represent the major portion of the short-term tax-exempt note market, other types of notes are available in the marketplace and the Fund may invest in such other types of notes to the extent permitted under its investment objectives, policies and limitations. Such notes may be issued for different purposes and may be secured differently from those mentioned above.

Hedging Strategies

The Fund may periodically engage in hedging transactions. Hedging is a term used for various methods of seeking to preserve portfolio capital value by offsetting price changes in one investment through making another investment whose price should tend to move in the opposite direction. It may be desirable and possible in various market environments to partially hedge the portfolio against fluctuations in market value due to interest rate fluctuations by investment in

17

financial futures and index futures as well as related put and call options on such instruments. Both parties entering into an index or financial futures contract are required to post an initial deposit of 1% to 5% of the total contract price. Typically, option holders enter into offsetting closing transactions to enable settlement in cash rather than take delivery of the position in the future of the underlying security. The Fund will only sell covered futures contracts, which means that the Fund segregates assets equal to the amount of the obligations.

These transactions present certain risks. In particular, the imperfect correlation between price movements in the futures contract and price movements in the securities being hedged creates the possibility that losses on the hedge by a Fund may be greater than gains in the value of the securities in the Fund's portfolio. In addition, futures and options markets may not be liquid in all circumstances. As a result, in volatile markets, the Fund may not be able to close out the transaction without incurring losses substantially greater than the initial deposit. Finally, the potential deposit requirements in futures contracts create an ongoing greater potential financial risk than do options transactions, where the exposure is limited to the cost of the initial premium. Losses due to hedging transactions will reduce yield. Net gains, if any, from hedging and other portfolio transactions will be distributed as taxable distributions to shareholders. The Fund will not make any investment (whether an initial premium or deposit or a subsequent deposit) other than as necessary to close a prior investment if, immediately after such investment, the sum of the amount of its premiums and deposits would exceed 5% of the Fund's net assets. The Fund will invest in these instruments only in markets believed by Nuveen Advisory to be active and sufficiently liquid. The Fund does not intend to use derivatives to increase leverage or to enhance current income. Successful implementation of most hedging strategies would generate taxable income. For further information regarding these investment strategies and risks presented thereby, see Appendix D to this Statement of Additional Information.

Factors Pertaining to California

Factors pertaining to California are set forth in Appendix E.

OTHER INVESTMENT POLICIES AND TECHNIQUES

Illiquid Securities

The Fund may invest in illiquid securities (i.e., securities that are not readily marketable), including, but not limited to, restricted securities (securities the disposition of which is restricted under the federal securities laws), securities that may be resold only pursuant to Rule 144A under the Securities Act of 1933, as amended (the "Securities Act"); and repurchase agreements with maturities in excess of seven days.

18

Restricted securities may be sold only in privately negotiated transactions or in a public offering with respect to which a registration statement is in effect under the Securities Act. Where registration is required, the Fund may be obligated to pay all or part of the registration expenses and a considerable period may elapse between the time of the decision to sell and the time the Fund may be permitted to sell a security under an effective registration statement. If, during such a period, adverse market conditions were to develop, the Fund might obtain a less favorable price than that which prevailed when it decided to sell. Illiquid securities will be priced at a fair value as determined in good faith by the Board of Trustees or its delegate.

Portfolio Trading and Turnover Rate

Portfolio trading may be undertaken to accomplish the investment objectives of the Fund in relation to actual and anticipated movements in interest rates. In addition, a security may be sold and another of comparable quality purchased at approximately the same time to take advantage of what Nuveen Advisory believes to be a temporary price disparity between the two securities. Temporary price disparities between two comparable securities may result from supply and demand imbalances where, for example, a temporary oversupply of certain bonds may cause a temporarily low price for such bonds, as compared with other bonds of like quality and characteristics. The Fund may also engage to a limited extent in short-term trading consistent with its investment objectives. Securities may be sold in anticipation of a market decline (a rise in interest rates) or purchased in anticipation of a market rise (a decline in interest rates) and later sold, but the Fund will not engage in trading solely to recognize a gain.

Subject to the foregoing, the Fund will attempt to achieve its investment objectives by prudent selection of municipal bonds with a view to holding them for investment. While there can be no assurance thereof, the Fund anticipates that its annual portfolio turnover rate will generally not exceed 100%. However, the rate of turnover will not be a limiting factor when the Fund deems it desirable to sell or purchase securities. Therefore, depending upon market conditions, the annual portfolio turnover rate of the Fund may exceed 100% in particular years.

Other Investment Companies

The Fund may invest in securities of other open or closed-end investment companies that invest primarily in municipal bonds of the types in which the Fund may invest directly. The Fund generally expects to invest in other investment companies either during periods when it has large amounts of

uninvested cash, such as the period shortly after the Fund receives the proceeds of the offering of its Common Shares or MuniPreferred Shares, or during periods when there is a shortage of attractive, high-yielding municipal bonds available in the market. As a stockholder in an investment company, the Fund will bear its ratable share of that investment company's expenses and would remain subject to payment of the Fund's management, advisory and administrative fees with respect to assets so invested. Common Shareholders would therefore be subject to duplicative expenses to the extent the Fund invests in other investment companies. Nuveen Advisory will take expenses into account when evaluating the investment merits of an investment in the investment company relative to available municipal bond investments. In addition, the securities of other investment companies may also be leveraged and will therefore be subject to the same leverage risks described herein. As described in the Fund's Prospectus in the section entitled "Risks," the net asset value and market value of leveraged shares will be more

19

volatile and the yield to shareholders will tend to fluctuate more than the yield generated by unleveraged shares.

When-Issued and Delayed Delivery Transactions

The Fund may buy and sell municipal bonds on a when-issued or delayed delivery basis, making payment or taking delivery at a later date, normally within 15-45 days of the trade date. On such transactions the payment obligation and the interest rate are fixed at the time the buyer enters into the commitment. Beginning on the date the Fund enters into a commitment to purchase securities on a when-issued or delayed delivery basis, the Fund is required under rules of the Commission to maintain in a separate account liquid assets, consisting of cash, cash equivalents or liquid securities having a market value at all times of at least equal to the amount of the commitment. Income generated by any such assets which provide taxable income for federal income tax purposes is includable in the taxable income of the Fund. The Fund may enter into contracts to purchase municipal bonds on a forward basis (i.e., where settlement will occur more than 60 days from the date of the transaction) only to the extent that the Fund specifically collateralizes such obligations with a security that is expected to be called or mature within sixty days before or after the settlement date of the forward transaction. The commitment to purchase securities on a when-issued, delayed delivery or forward basis may involve an element of risk because no interest accrues on the bonds prior to settlement and at the time of delivery the market value may be less than cost.

Miscellaneous Investments

The Fund may invest up to 5% of its net assets in tax-exempt or taxable fixed-income or equity securities for the purpose of acquiring control of an issuer whose municipal bonds (a) the Fund already owns and (b) have deteriorated or are expected shortly to deteriorate significantly in credit quality, provided Nuveen Advisory determines that such investment should enable the Fund to better maximize its existing investment in such issuer. Investment in such securities would result in a portion of your dividend being subject to regular federal and California income taxes or the alternative minimum tax applicable to individuals.

Repurchase Agreements

As temporary investments, the Fund may invest in repurchase agreements. A repurchase agreement is a contractual agreement whereby the seller of securities (U.S. Government securities or municipal bonds) agrees to repurchase the same security at a specified price on a future date agreed upon by the parties. The agreed-upon repurchase price determines the yield during the Fund's holding period. Repurchase agreements are considered to be loans collateralized by the underlying security that is the subject of the repurchase contract. Income generated from transactions in repurchase agreements will be taxable. See "Tax Matters" for information relating to the allocation of taxable income between Common Shares and MuniPreferred Shares, if any. The Fund will only enter into repurchase agreements with registered securities dealers or domestic banks that, in the opinion of Nuveen Advisory, present minimal credit risk. The risk to the Fund is limited to the ability of the issuer to pay the agreed-upon repurchase price on the delivery date; however, although the value of the underlying collateral at the time the transaction is entered into always equals or exceeds the agreed-upon repurchase price, if the value of the collateral declines there is a risk of loss of both principal and interest. In the event of default, the collateral may be sold but the Fund might incur a loss if the value of the collateral declines, and might incur disposition costs or experience delays in connection with liquidating the collateral. In addition, if bankruptcy proceedings are commenced with respect to the seller of the security, realization upon the collateral by the Fund may be delayed or limited. Nuveen Advisory will monitor the value of the collateral at the time the transaction is entered into and at all times subsequent during the term of the repurchase agreement in an effort to determine that such value always equals or exceeds the agreed-upon repurchase price. In the event the value of the collateral declines below the repurchase price, Nuveen Advisory will

20

demand additional collateral from the issuer to increase the value of the collateral to at least that of the repurchase price, including interest.

Zero Coupon Bonds

The Fund may invest in zero coupon bonds. A zero coupon bond is a bond that does not pay interest for its entire life. When held to its maturity, its return comes from the difference between the purchase price and its maturity value. The market prices of zero coupon bonds are affected to a greater extent by changes in prevailing levels of interest rates and thereby tend to be more volatile in price than securities that pay interest periodically and may be more speculative than such securities. In addition, because the Fund accrues income with respect to these securities prior to the receipt of such interest, it may have to dispose of portfolio securities under disadvantageous circumstances in order to obtain cash needed to pay income dividends in amounts necessary to avoid unfavorable tax consequences.

MANAGEMENT OF THE FUND

Trustees and Officers

The management of the Fund, including general supervision of the duties performed for the Fund under the management agreement between Nuveen Advisory and the Fund, is the responsibility of the Board of Trustees of the Fund. The number of trustees of the Fund is currently set at seven. None of the trustees who are not "interested" persons of the Fund has ever been a director or

Edgar Filing: NUVEEN INSURED CALIFORNIA TAX FREE ADVANTAGE MUNICIPAL FUND - Form 497

employee of, or consultant to, Nuveen or its affiliates. The names and business addresses of the trustees and officers of the Fund, their principal occupations and other affiliations during the past five years, the number of portfolios each oversees and other directorships they hold are set forth below.

Name, Birthdate ----- and Address -----	Positions and ----- Offices with the ----- Fund and Year ----- First Elected ----- or Appointed -----	Principal Occupations ----- Including Other Directorships ----- During Past Five Years -----
--	--	---

Trustee who is an interested person of the Fund:

Timothy R. Schwertfeger* 3/28/49 333 West Wacker Drive Chicago, IL 60606	Chairman of the Board and Trustee 2002	Chairman and Director (since 1996) of The John Nuveen Company, Nuveen Investments, Nuveen Advisory Corp. and Nuveen Institutional Advisory Corp.; prior thereto, Executive Vice President and Director of The John Nuveen Company and Nuveen Investments; Director (since 1992) and Chairman (since 1996) of Nuveen Advisory Corp. and Nuveen Institutional Advisory Corp.; Chairman and Director (since 1997) of Nuveen Asset Management Inc.; Director (since 1996) of Institutional Capital Corporation; Chairman and Director (since 1999) of
---	--	---

* Mr. Schwertfeger is an "interested person" of the Fund, as defined in the Investment Company Act of 1940, because he is an officer and director of Nuveen Advisory.

The Board of Trustees has five standing committees: the executive committee, the audit committee, the nominating and governance committee, the dividend committee and the valuation committee. Because the Fund is newly organized, none of the committees have met during the Fund's last fiscal year. The executive committee met once prior to the commencement of the Fund's operations.

Peter R. Sawers and Timothy R. Schwertfeger, Chair, serve as members of the executive committee of the Board of Trustees of the Fund. The executive committee, which meets between regular meetings of the Board of Trustees, is authorized to exercise all of the powers of the Board of Trustees.

The audit committee monitors the accounting and reporting policies and practices of the Funds, the quality and integrity of the financial statements of the Funds, compliance by the Funds with legal and regulatory requirements and the independence and performance of the external and internal auditors. The members of the audit committee are William J. Schneider, Chair, Robert P. Bremner, Lawrence H. Brown, Anne E. Impellizzeri, Peter R. Sawers and Judith M. Stockdale.

The nominating and governance committee is responsible for Board selection and tenure; selection and review of committees; and Board education and operations. In addition, the committee monitors performance of legal counsel and other service providers; periodically reviews and makes recommendations about any appropriate changes to trustee compensation; and has the resources and authority to discharge its responsibilities--including retaining special counsel and other experts or consultants at the expense of the Fund. In the event of a vacancy on the Board, the nominating and governance committee receives suggestions from various sources as to suitable candidates. Suggestions should be sent in writing to Lorna Ferguson, Vice President for Board Relations, Nuveen Investments, 333 West Wacker Drive, Chicago, IL 60606. The nominating and governance committee sets appropriate standards and requirements for nominations for new trustees and reserves the right to interview all candidates and to make the final selection of any new trustees. The members of the nominating and governance committee are Anne E. Impellizzeri, Chair, Robert P. Bremner, Lawrence H. Brown, Peter R. Sawers, William J. Schneider and Judith M. Stockdale.

The dividend committee is authorized to declare distributions on the Fund's shares including, but not limited to regular and special dividends, capital gains and ordinary income distributions. The members of the dividend committee are Timothy R. Schwertfeger, Chair, and Lawrence H. Brown.

The valuation committee oversees the Fund's Pricing Procedures including, but not limited to, the review and approval of fair value pricing determinations made by Nuveen's Valuation Group. The members of the valuation committee are Judith M. Stockdale and Lawrence H. Brown.

The trustees of the Fund are also directors or trustees, as the case may be, of 30 Nuveen open-end funds and 87 Nuveen closed-end funds advised by Nuveen Advisory Corp. Mr. Schwertfeger is a director or trustee, as the case may be, of 18 Nuveen open-end and closed-end funds advised by Nuveen Institutional Advisory Corp. None of the independent trustees, nor any of their immediate family members, has ever been a director, officer, or employee of, or a consultant to, Nuveen Advisory, Nuveen, Salomon Smith Barney Inc. or their affiliates.

The Common Shareholders of the Fund will elect trustees at the next annual meeting of Common Shareholders, unless any MuniPreferred Shares are outstanding at that time, in which event holders of MuniPreferred Shares, voting as a separate class, will elect two trustees and the remaining trustees shall be elected by Common Shareholders and holders of MuniPreferred Shares, voting together as a single class. Holders of MuniPreferred Shares will be entitled to elect a majority of the Fund's trustees under certain circumstances. See "Description of Shares - MuniPreferred Shares - Voting Rights."

The following table sets forth the dollar range of equity securities beneficially owned by each trustee as of December 31, 2001:

Name of Trustee -----	Dollar Range of Equity Securities in the Fund -----	Aggregate Dollar Range of Equity Securities in All Registered Investment Companies Overseen by Trustee in Family of Investment Companies -----
Robert P. Bremner	\$ 0	over \$100,000
Lawrence H. Brown	\$ 0	over \$100,000
Anne E. Impellizzeri	\$ 0	over \$100,000
Peter R. Sawers	\$ 0	over \$100,000
William J. Schneider	\$ 0	over \$100,000
Timothy R. Schwertfeger	\$ 0	over \$100,000
Judith M. Stockdale	\$ 0	over \$100,000

No trustee who is not an interested person of the Fund owns beneficially or of record, any security of Nuveen Advisory, Nuveen, Salomon Smith Barney Inc. or any person (other than a registered investment company) directly or indirectly controlling, controlled by or under common control with Nuveen Advisory, Nuveen or Salomon Smith Barney Inc.

The following table sets forth estimated compensation to be paid by the Fund projected during the Fund's first full fiscal year after commencement of operation. The Fund does not have a retirement or pension plan. The officers and trustees affiliated with Nuveen serve without any compensation from the Fund. The Fund has a deferred compensation plan (the "Plan") that permits any trustee who is not an "interested person" of the Fund to elect to defer receipt of all or a portion of his or her compensation as a trustee. The deferred compensation of a participating trustee is credited to a book reserve account of the Fund when the compensation would otherwise have been paid to the trustee. The value of the trustee's deferral account at any time is equal to the value that the account would have had if contributions to the account had been invested and reinvested in shares of one or more of the eligible Nuveen funds. At the time

for commencing distributions from a trustee's deferral account, the trustee may elect to receive distributions in a lump sum or over a period of five years. The Fund will not be liable for any other fund's obligations to make distributions under the Plan.

Name of Trustee -----	Estimated Aggregate Compensation From the Fund* -----	Total Compensation from Fund and Fund Complex** -----	Amount of Total Compensation that Has Been Deferred -----
Robert P. Bremner	\$51	\$ 72,500	\$ 8,280
Lawrence H. Brown	\$55	\$ 78,500	\$ 0
Anne E. Impellizzeri	\$51	\$ 72,500	\$55,200
Peter R. Sawers	\$51	\$ 73,000	\$54,788
William J. Schneider	\$51	\$ 72,500	\$55,200
Judith M. Stockdale	\$51	\$ 72,500	\$13,800

26

* Based on the estimated compensation to be earned by the independent trustees for the 12 month period ending 8/31/04, representing the Fund's first full fiscal year end, for services to the Fund.

**Based on the compensation paid to the trustees for the one year period ending 12/31/01 for services to the open-end and closed-end funds advised by Nuveen Advisory.

The Fund has no employees. Its officers are compensated by Nuveen Advisory or an affiliate, or The John Nuveen Company.

INVESTMENT ADVISER

Nuveen Advisory acts as investment adviser to the Fund, with responsibility for the overall management of the Fund. Its address is 333 West Wacker Drive, Chicago, Illinois 60606. Nuveen Advisory is also responsible for managing the Fund's business affairs and providing day-to-day administrative services to the Fund. For additional information regarding the management services performed by Nuveen Advisory, see "Management of the Fund" in the Fund's Prospectus.

Nuveen Advisory is a wholly owned subsidiary of The John Nuveen Company. Founded in 1898, The John Nuveen Company brings over a century of expertise to the municipal bond market. According to data from Thomson Wealth Management,

Nuveen is the leading sponsor of exchange-traded municipal bond funds as measured by number of funds (92) and fund assets under management (\$33 billion) as of October 31, 2002. Overall, The John Nuveen Company and its affiliates had over \$84 billion in assets under management or surveillance as of October 31, 2002. The John Nuveen Company is approximately 77% owned by The St. Paul Companies, Inc. ("St. Paul"). St. Paul is a publicly-traded company

27

located in St. Paul, Minnesota, and is principally engaged in providing property-liability insurance through subsidiaries.

Nuveen Investments, a unit of The John Nuveen Company, provides investment management services for advisors serving high-net-worth and institutional clients. The Company today markets its capabilities--which include tax-free investing, separately managed accounts and market neutral alternative investment portfolios--under four distinct brands: Nuveen, NWQ, Rittenhouse, and Symphony. The John Nuveen Company and its affiliates had over \$77 billion of assets under management as of October 31, 2002. The John Nuveen Company, an affiliate of The St. Paul Companies (NYSE:SPC), is listed on The New York Stock Exchange and trades under the symbol "JNC."

Pursuant to an investment management agreement between Nuveen Advisory and the Fund, the Fund has agreed to pay for the services and facilities provided by Nuveen Advisory an annual management fee, payable on a monthly basis, according to the following schedule:

Average Daily Managed Assets -----	Management Fee -----
Up to \$125 million	.6500%
\$125 million to \$250 million	.6375%
\$250 million to \$500 million	.6250%
\$500 million to \$1 billion	.6125%
\$1 billion to \$2 billion	.6000%
\$2 billion and over	.5750%

If the Fund utilizes leverage through the issuance of MuniPreferred Shares in an amount equal to 35% of the Fund's total assets (including the amount obtained from leverage), the management fee calculated as a percentage of net assets attributable to Common Shares would be as follows:

Net Assets Attributable to Common Shares -----	Management Fee -----
Up to \$125 million.....	1.0000%
\$125 million to \$250 million.....	.9808%
\$250 million to \$500 million.....	.9615%
\$500 million to \$1 billion.....	.9423%
\$1 billion to \$2 billion.....	.9231%

Edgar Filing: NUVEEN INSURED CALIFORNIA TAX FREE ADVANTAGE MUNICIPAL FUND - Form 497

\$2 billion and over..... .8846%

In addition to the fee of Nuveen Advisory, the Fund pays all other costs and expenses of its operations, including compensation of its trustees (other than those affiliated with Nuveen Advisory), custodian, transfer agency and dividend disbursing expenses, legal fees, expenses of independent auditors, expenses of repurchasing shares, expenses of issuing MuniPreferred Shares, expenses of preparing, printing and distributing shareholder reports, notices, proxy statements and reports to governmental agencies and taxes, if any. All fees and expenses are accrued daily and deducted before payment of dividends to investors.

For the first eight full years of the Fund's operation, Nuveen Advisory has contractually agreed to reimburse the Fund for fees and expenses in the amounts, and for the time periods, set forth below:

Year Ending November 30, -----	Percentage Reimbursed (as a percentage of Managed Assets)	Year Ending November 30, -----	Percentage Reimbursed (as a percentage of Managed Assets)
2002 (1)	.32%	2008	.24%
2003	.32%	2009	.16%
2004	.32%	2010	.08%
2005	.32%		
2006	.32%		
2007	.32%		

(1) From the commencement of operations.

Reducing Fund expenses in this manner will tend to increase the amount of income available for the Common Shareholders. Nuveen Advisory has not agreed to reimburse the Fund for any portion of its fees and expenses beyond November 30, 2010.

Unless earlier terminated as described below, the Fund's investment management agreement with Nuveen Advisory (the "management agreement") will remain in effect until July 1, 2004. The management agreement continues in effect from year to year so long as such continuation is approved at least annually by (1) the Board of Trustees or the vote of a majority of the outstanding voting securities of the Fund, and (2) a majority of the trustees who are not interested persons of any party to the investment management agreement, cast in person at a meeting called for the purpose of voting on such approval. The investment management agreement may be terminated at any time, without penalty, by either the Fund or Nuveen Advisory upon 60 days written notice, and is automatically terminated in the event of its assignment as defined in the 1940 Act.

The management agreement has been approved by a majority of the independent trustees of the Fund and the sole shareholder of the Fund. The independent trustees have determined that the terms of the Fund's management agreement are fair and reasonable and that the agreement is in the Fund's best interests. The

independent trustees believe that the management agreement will enable the Fund to obtain high quality investment management services at a cost that they deem appropriate, reasonable, and in the best interests of the Fund and its shareholders. In making such determination, the independent trustees met independently from the interested trustee of the Fund and any officers of Nuveen Advisory and its affiliates. The independent trustees also relied upon the assistance of counsel to the independent trustees.

In evaluating the investment management agreement, the independent trustees reviewed materials furnished by Nuveen Advisory at the annual advisory contract renewal meeting held in April, 2002, including information regarding Nuveen Advisory, its affiliates and its personnel, operations and financial condition. The independent trustees also reviewed, among other things, the nature and quality of services to be provided by Nuveen Advisory, the proposed fees to be charged by Nuveen Advisory for investment management services, the profitability to Nuveen Advisory of its relationship with the Fund, fall-out benefits to Nuveen Advisory from that relationship, economies of scale achieved by Nuveen Advisory, the experience of the investment advisory and other personnel providing services to the Fund, the historical quality of the services provided by Nuveen Advisory and comparative fees and expense ratios of investment companies with similar objectives and strategies managed by other investment advisers, and other factors that the independent trustees deemed relevant. The independent trustees discussed with representatives of Nuveen Advisory the Fund's operations and Nuveen Advisory's ability to provide advisory and other services to the Fund.

The Fund, Nuveen Advisory, Nuveen, Salomon Smith Barney Inc. and other related entities have adopted codes of ethics which essentially prohibit certain of their personnel, including the Nuveen fund portfolio manager, from engaging in personal investments which compete or interfere with, or attempt to take advantage of a client's, including the Fund's, anticipated or actual portfolio transactions, and are designed to assure that the interests of clients, including Fund shareholders, are placed before the interests of personnel in connection with personal investment transactions. Text-only versions of the codes of ethics of the Fund, Nuveen Advisory and Nuveen can be viewed online or downloaded from the EDGAR Database on the SEC's internet web site at www.sec.gov. You may also review and copy those documents by visiting the SEC's Public Reference Room in Washington, DC. Information on the operation of the Public Reference Room may be obtained by calling the SEC at 202-942-8090. In addition, copies of the codes of ethics may be obtained, after mailing the appropriate duplicating fee, by writing to the SEC's Public Reference Section, 450 5th Street, N.W., Washington, DC 20549-0102 or by e-mail request at publicinfo@sec.gov.

PORTFOLIO TRANSACTIONS

Nuveen Advisory is responsible for decisions to buy and sell securities for the Fund and for the placement of the Fund's securities business, the negotiation of the prices to be paid for principal trades and the allocation of its transactions among various dealer firms. Portfolio securities will normally be purchased directly from an underwriter or in the over-the-counter market from the principal dealers in such securities, unless it appears that a better price or

execution may be obtained through other means. Portfolio securities will not be purchased from Nuveen or its affiliates except in compliance with the 1940 Act.

The Fund expects that substantially all portfolio transactions will be effected on a principal (as opposed to an agency) basis and, accordingly, does not expect to pay any brokerage commissions. Purchases from underwriters will include a commission or concession paid by the issuer to the underwriter, and purchases from dealers will include the spread between the bid and asked price. On occasion, the Fund may clear portfolio transactions through Nuveen. It is the policy of Nuveen Advisory to seek the best execution under the circumstances of each trade. Nuveen Advisory evaluates price as the primary consideration, with the financial condition, reputation and responsiveness of the dealer considered secondary in determining best execution. Given the best execution obtainable, it will be Nuveen Advisory's practice to select dealers which, in addition, furnish research information (primarily credit analyses of issuers and general economic reports) and statistical and other services to Nuveen Advisory. It is not possible to place a dollar value on information and statistical and other services received from dealers. Since it is only supplementary to Nuveen Advisory's own research efforts, the receipt of research information is not expected to reduce significantly Nuveen Advisory's expenses. While Nuveen Advisory will be primarily responsible for the placement of the business of the Fund, the policies and practices of Nuveen Advisory in this regard must be consistent with the foregoing and will, at all times, be subject to review by the Board of Trustees of the Fund.

Nuveen Advisory may manage other investment accounts and investment companies for other clients which have investment objectives similar to those of the Fund. Subject to applicable laws and regulations, Nuveen Advisory seeks to allocate portfolio transactions equitably whenever concurrent decisions are made to purchase or sell securities by the Fund and another advisory account. In making such allocations the main factors to be considered will be the respective investment objectives, the relative size of portfolio holdings of the same or comparable securities, the availability of cash for investment and the size of investment commitments generally held. While this procedure could have a detrimental effect on the price or amount of the securities available to the Fund from time to time, it is the opinion of the Board of Trustees that the benefits available from Nuveen Advisory's organization will outweigh any disadvantage that may arise from exposure to simultaneous transactions.

DISTRIBUTIONS

As described in the Fund's Prospectus, initial distributions to Common Shareholders are expected to be declared approximately 45 days, and paid approximately 60 to 90 days, from the completion of the offering of the Common Shares, depending on market conditions. To permit the Fund to maintain a

29

more stable monthly distribution, the Fund will initially (prior to its first distribution), and may from time to time thereafter, distribute less than the entire amount of net investment income earned in a particular period. Such undistributed net investment income would be available to supplement future distributions, including distributions that might otherwise have been reduced by a decrease in the Fund's monthly net income due to fluctuations in investment income or expenses, or due to an increase in the dividend rate on the Fund's outstanding MuniPreferred Shares. As a result, the distributions paid by the Fund for any particular period may be more or less than the amount of net investment income actually earned by the Fund during such period. Undistributed net investment income will be added to the Fund's net asset value and, correspondingly, distributions from undistributed net investment income will be deducted from the Fund's net asset value.

For tax purposes, the Fund is currently required to allocate net capital gain and other taxable income, if any, between Common Shares and MuniPreferred Shares in proportion to total dividends paid to each class for the year in which such net capital gain or other taxable income is realized. For information relating to the impact of the issuance of MuniPreferred Shares on the distributions made by a Fund to Common Shareholders, see the Fund's Prospectus under "MuniPreferred Shares and Leverage."

While any MuniPreferred Shares are outstanding, the Fund may not declare any cash dividend or other distribution on its Common Shares unless at the time of such declaration (1) all accumulated dividends on the MuniPreferred Shares have been paid and (2) the net asset value of the Fund's portfolio (determined after deducting the amount of such dividend or other distribution) is at least 200% of the liquidation value of any outstanding MuniPreferred Shares. This latter limitation on the Fund's ability to make distributions on its Common Shares could under certain circumstances impair the ability of the Fund to maintain its qualification for taxation as a regulated investment company. See "Tax Matters."

DESCRIPTION OF SHARES

Common Shares

The Fund's Declaration of Trust (the "Declaration") authorizes the issuance of an unlimited number of Common Shares. The Common Shares being offered have a par value of \$0.01 per share and, subject to the rights of holders of MuniPreferred Shares, if issued, have equal rights as to the payment of dividends and the distribution of assets upon liquidation of the Fund. The Common Shares being offered will, when issued, be fully paid and, subject to matters discussed in "Certain Provisions in the Declaration of Trust," non-assessable, and will have no pre-emptive or conversion rights or rights to cumulative voting. At any time when the Fund's MuniPreferred Shares are outstanding, Common Shareholders will not be entitled to receive any cash distributions from the Fund unless all accrued dividends on MuniPreferred Shares have been paid, and unless asset coverage (as defined in the 1940 Act) with respect to MuniPreferred Shares would be at least 200% after giving effect to such distributions. See "MuniPreferred Shares" below.

The Common Shares have been approved for listing on the American Stock Exchange, subject to notice of issuance. The Fund intends to hold annual meetings of shareholders so long as the Common Shares are listed on a national securities exchange and such meetings are required as a condition to such listing.

Shares of closed-end investment companies may frequently trade at prices lower than net asset value. Shares of closed-end investment companies like the Fund that invest predominately in investment grade municipal bonds have during some periods traded at prices higher than net asset value and during other periods have traded at prices lower than net asset value. There can be no assurance that Common Shares or shares of other municipal funds will trade at a price higher than net asset value in the future. Net asset value will be reduced immediately following the offering after payment of the sales load and organization and offering expenses. Net asset value generally increases when interest rates decline, and decreases when interest rates rise, and these changes are likely to be greater in the case of a fund having a leveraged

capital structure. Whether investors will realize gains or losses upon the sale of Common Shares will not depend upon a Fund's net asset value but will depend entirely upon whether the market price of the Common Shares at the time of sale is above or below the original purchase price for the shares. Since the market price of the Fund's Common Shares will be determined by factors beyond the control of the Fund, the Fund cannot predict whether the Common Shares will trade at, below, or above net asset value or at, below or above the initial public offering price. Accordingly, the Common Shares are designed primarily for long-term investors, and investors in the Common Shares should not view the Fund as a vehicle for trading purposes. See "Repurchase of Fund Shares; Conversion to Open-End Fund" and the Fund's Prospectus under "MuniPreferred Shares and Leverage" and "The Fund's Investments--Municipal Bonds."

MuniPreferred Shares

The Declaration authorizes the issuance of an unlimited number of MuniPreferred Shares in one or more classes or series, with rights as determined by the Board of Trustees of the Fund, by action of the Board of Trustees without the approval of the Common Shareholders.

The Fund's Board of Trustees has authorized an offering of MuniPreferred Shares (representing approximately 35% of the Fund's capital immediately after the time the MuniPreferred Shares are issued) approximately one to three months after completion of the offering of Common Shares. The Board has stated that the initial series of MuniPreferred Shares would pay cumulative dividends at rates determined weekly by providing for the periodic redetermination of the dividend rate through an auction or remarketing procedure. The Board of Trustees of the Fund has indicated that the liquidation preference, preference on distribution, voting rights and redemption provisions of the MuniPreferred Shares will be as stated below.

Limited Issuance of MuniPreferred Shares. Under the 1940 Act, the Fund could issue MuniPreferred Shares with an aggregate liquidation value of up to one-half of the value of the Fund's total net assets, measured immediately after issuance of the MuniPreferred Shares. "Liquidation value" means the original purchase price of the shares being liquidated plus any accrued and unpaid dividends. In addition, the Fund is not permitted to declare any cash dividend or other distribution on its Common Shares unless the liquidation value of the MuniPreferred Shares is less than one-half of the value of the Fund's total net assets (determined after deducting the amount of such dividend or distribution) immediately after the distribution. If the Fund sells all the Common Shares and MuniPreferred Shares discussed in this Prospectus, the liquidation value of the MuniPreferred Shares is expected to be approximately 35% of the value of the Fund's total net assets. The Fund intends to purchase or redeem MuniPreferred Shares, if necessary, to keep that fraction below one-half.

Distribution Preference. The MuniPreferred Shares have complete priority over the Common Shares as to distribution of assets.

Liquidation Preference. In the event of any voluntary or involuntary liquidation, dissolution or winding up of the affairs of the Fund, holders of MuniPreferred Shares will be entitled to receive a preferential liquidating distribution (expected to equal the original purchase price per share plus

accumulated and unpaid dividends thereon, whether or not earned or declared) before any distribution of assets is made to holders of Common Shares. After payment of the full amount of the liquidating distribution to which they are entitled, holders of MuniPreferred Shares will not be entitled to any further participation in any distribution of assets by the Fund. A consolidation or merger of the Fund with or into any Massachusetts business trust or corporation or a sale of all or substantially all of the assets of the Fund shall not be deemed to be a liquidation, dissolution or winding up of the Fund.

Voting Rights. In connection with any issuance of MuniPreferred Shares, the Fund must comply with Section 18(i) of the 1940 Act which requires, among other things, that MuniPreferred Shares be voting shares and have equal voting rights with Common Shares. Except as otherwise indicated in this Statement of Additional Information and except as otherwise required by applicable law, holders of MuniPreferred Shares will vote together with Common Shareholders as a single class.

In connection with the election of the Fund's trustees, holders of MuniPreferred Shares, voting as a separate class, will be entitled to elect two of the Fund's trustees, and the remaining trustees shall be elected by Common Shareholders and holders of MuniPreferred Shares, voting together as a single class. In addition, if at any time dividends on the Fund's outstanding MuniPreferred Shares shall be unpaid in an amount equal to two full years' dividends thereon, the holders of all outstanding MuniPreferred Shares, voting as a separate class, will be entitled to elect a majority of the Fund's trustees until all dividends in arrears have been paid or declared and set apart for payment.

The affirmative vote of the holders of a majority of the Fund's outstanding MuniPreferred Shares of any class or series, as the case may be, voting as a separate class, will be required to, among other things, (1) take certain actions which would affect the preferences, rights, or powers of such class or series or (2) authorize or issue any class or series ranking prior to the MuniPreferred Shares. Except as may otherwise be required by law, (1) the affirmative vote of the holders of at least two-thirds of the Fund's MuniPreferred Shares outstanding at the time, voting as a separate class, will be required to approve any conversion of the Fund from a closed-end to an open-end investment company and (2) the affirmative vote of the holders of at least two-thirds of the outstanding MuniPreferred Shares, voting as a separate class, shall be required to approve any plan of reorganization (as such term is used in the 1940 Act) adversely affecting such shares, provided however, that such separate class vote shall be a majority vote if the action in question has previously been approved, adopted or authorized by the affirmative vote of two-thirds of the total number of Trustees fixed in accordance with the Declaration or the By-laws. The affirmative vote of the holders of a majority of the outstanding MuniPreferred Shares, voting as a separate class, shall be required to approve any action not described in the preceding sentence requiring a vote of security holders under Section 13(a) of the 1940 Act including, among other things, changes in a Fund's investment objectives or changes in the investment restrictions described as fundamental policies under "Investment Objectives and Policies--Investment Restrictions." The class or series vote of holders of MuniPreferred Shares described

above shall in each case be in addition to any separate vote of the requisite percentage of Common Shares and MuniPreferred Shares necessary to authorize the action in question.

The foregoing voting provisions will not apply with respect to the Fund's

MuniPreferred Shares if, at or prior to the time when a vote is required, such shares shall have been (1) redeemed or (2) called for redemption and sufficient funds shall have been deposited in trust to effect such redemption.

Redemption, Purchase and Sale of MuniPreferred Shares by the Fund. The terms of the MuniPreferred Shares provide that they are redeemable at certain times, in whole or in part, at the original purchase price per share plus accumulated dividends, that the Fund may tender for or purchase MuniPreferred Shares and that the Fund may subsequently resell any shares so tendered for or purchased. Any redemption or purchase of MuniPreferred Shares by the Fund will reduce the leverage applicable to Common Shares, while any resale of shares by the Fund will increase such leverage.

The discussion above describes the Fund's Board of Trustees' present intention with respect to an offering of MuniPreferred Shares. The terms of the MuniPreferred Shares may be the same as, or different from, the terms described above, subject to applicable law and the Fund's Declaration.

CERTAIN PROVISIONS IN THE DECLARATION OF TRUST

Under Massachusetts law, shareholders could, under certain circumstances, be held personally liable for the obligations of the Fund. However, the Declaration contains an express disclaimer of shareholder liability for debts or obligations of the Fund and requires that notice of such limited liability be given in each agreement, obligation or instrument entered into or executed by the Fund or the trustees. The Declaration further provides for indemnification out of the assets and property of the Fund for all loss and expense of any shareholder held personally liable for the obligations of the Fund. Thus, the risk of a shareholder incurring financial loss on account of shareholder liability is limited to circumstances in which the Fund would be unable to meet its obligations. The Fund believes that the likelihood of such circumstances is remote.

The Declaration includes provisions that could limit the ability of other entities or persons to acquire control of the Fund or to convert the Fund to open-end status. Specifically, the Declaration requires a vote by holders of at least two-thirds of the Common Shares and MuniPreferred Shares, voting together as a single class, except as described below, to authorize (1) a conversion of the Fund from a closed-end to an open-end investment company, (2) a merger or consolidation of the Fund, or a series or class of the Fund, with any corporation, association, trust or other organization or a reorganization or recapitalization of the Fund, or a series or class of the Fund, (3) a sale, lease or transfer of all or substantially all of the Fund's assets (other than in the regular course of the Fund's investment activities), (4) in certain circumstances, a termination of the Fund, or a series or class of the Fund or (5) removal of trustees by shareholders, and then only for cause, unless, with respect to (1) through (4), such transaction has already been authorized by the affirmative vote of two-thirds of the total number of trustees fixed in accordance with the Declaration or the By-laws, in which case the affirmative vote of the holders of at least a majority of the Fund's Common Shares and MuniPreferred Shares

outstanding at the time, voting together as a single class, is required, provided, however, that where only a particular class or series is affected (or, in the case of removing a trustee, when the trustee has been elected by only one class), the required vote only by the applicable class or series will be

required. Approval of shareholders is not required, however, for any transaction, whether deemed a merger, consolidation, reorganization or otherwise whereby the Fund issues shares in connection with the acquisition of assets (including those subject to liabilities) from any other investment company or similar entity. None of the foregoing provisions may be amended except by the vote of at least two-thirds of the Common Shares and MuniPreferred Shares, voting together as a single class. In the case of the conversion of the Fund to an open-end investment company, or in the case of any of the foregoing transactions constituting a plan of reorganization which adversely affects the holders of MuniPreferred Shares, the action in question will also require the affirmative vote of the holders of at least two-thirds of the Fund's MuniPreferred Shares outstanding at the time, voting as a separate class, or, if such action has been authorized by the affirmative vote of two-thirds of the total number of trustees fixed in accordance with the Declaration or the By-laws, the affirmative vote of the holders of at least a majority of the Fund's MuniPreferred Shares outstanding at the time, voting as a separate class. The votes required to approve the conversion of the Fund from a closed-end to an open-end investment company or to approve transactions constituting a plan of reorganization which adversely affects the holders of MuniPreferred Shares are higher than those required by the 1940 Act. The Board of Trustees believes that the provisions of the Declaration relating to such higher votes are in the best interest of the Fund and its shareholders.

The provisions of the Declaration described above could have the effect of depriving the Common Shareholders of opportunities to sell their Common Shares at a premium over market value by discouraging a third party from seeking to obtain control of the Fund in a tender offer or similar transaction. The overall effect of these provisions is to render more difficult the accomplishment of a merger or the assumption of control by a third party. They provide, however, the advantage of potentially requiring persons seeking control of a Fund to negotiate with its management regarding the price to be paid and facilitating the continuity of the Fund's investment objectives and policies. The Board of Trustees of the Fund has considered the foregoing anti-takeover provisions and concluded that they are in the best interests of the Fund and its Common Shareholders.

Reference should be made to the Declaration on file with the Securities and Exchange Commission for the full text of these provisions.

The Declaration provides that the obligations of the Fund are not binding upon the trustees of the Fund individually, but only upon the assets and property of the Fund, and that the trustees shall not be liable for errors of judgment or mistakes of fact or law. Nothing in the Declaration, however, protects a trustee against any liability to which he would otherwise be subject by reason of willful misfeasance, bad faith, gross negligence or reckless disregard of the duties involved in the conduct of his office.

REPURCHASE OF FUND SHARES; CONVERSION TO OPEN-END FUND

The Fund is a closed-end investment company and as such its shareholders will not have the right to cause the Fund to redeem their shares. Instead, the Fund's Common Shares will trade in the open market at a price that will be a function of several factors, including dividend levels (which are in turn affected by expenses), net asset value, call protection, price, dividend stability, relative demand for and supply of such shares in the market, general market and economic

conditions and other factors. Because shares of a closed-end investment company may frequently trade at prices lower than net asset value, the Fund's Board of Trustees has currently determined that, at least annually, it will consider action that might be taken to reduce or eliminate any material discount from net asset value in respect of Common Shares, which may include the repurchase of such shares in the open market or in private transactions, the making of a tender offer for such shares at net asset value, or the conversion of the Fund to an open-end investment company. There can be no assurance, however, that the Board of Trustees will decide to take any of these actions, or that share repurchases or tender offers, if undertaken, will reduce market discount.

Notwithstanding the foregoing, at any time when the Fund's MuniPreferred Shares are outstanding, the Fund may not purchase, redeem or otherwise acquire any of its Common Shares unless (1) all accrued MuniPreferred Shares dividends have been paid and (2) at the time of such purchase, redemption or acquisition, the net asset value of the Fund's portfolio (determined after deducting the acquisition price of the Common Shares) is at least 200% of the liquidation value of the outstanding MuniPreferred Shares (expected to equal the original purchase price per share plus any accrued and unpaid dividends thereon). The staff of the Securities and Exchange Commission currently requires that any tender offer made by a closed-end investment company for its shares must be at a price equal to the net asset value of such shares on the close of business on the last day of the tender offer. Any service fees incurred in connection with any tender offer made by the Fund will be borne by the Fund and will not reduce the stated consideration to be paid to tendering shareholders.

Subject to its investment limitations, the Fund may borrow to finance the repurchase of shares or to make a tender offer. Interest on any borrowings to finance share repurchase transactions or the accumulation of cash by the Fund in anticipation of share repurchases or tenders will reduce the Fund's net income. Any share repurchase, tender offer or borrowing that might be approved by the Board of Trustees would have to comply with the Securities Exchange Act of 1934, as amended, and the 1940 Act and the rules and regulations thereunder.

Although the decision to take action in response to a discount from net asset value will be made by the Board of the Fund at the time it considers such issue, it is the Board's present policy, which may be changed by the Board, not to authorize repurchases of Common Shares or a tender offer for such shares if (1) such transactions, if consummated, would (a) result in the delisting of the Common Shares from the American Stock Exchange, or (b) impair the Fund's status as a regulated investment company under the Internal Revenue Code of 1986, as amended (the "Code") (which would make the Fund a taxable entity, causing the Fund's income to be taxed at the corporate level in addition to the taxation of shareholders who receive dividends from the Fund) or as a registered closed-end investment company under the 1940 Act; (2) the Fund would not be able to liquidate portfolio securities in an orderly manner and consistent with the Fund's investment objectives and policies in order to repurchase shares; or (3) there is, in the Board's judgment, any (a) material legal action or proceeding instituted or threatened challenging such transactions or otherwise materially adversely affecting the Fund, (b) general suspension of or limitation on prices for trading securities on the American Stock Exchange, (c) declaration of a banking moratorium by Federal or state authorities or any suspension of payment by United States or state banks in which the Fund invests, (d) material limitation affecting the Fund or the issuers of its portfolio securities by Federal or state authorities on the extension of credit by lending institutions or on the exchange of

foreign currency, (e) commencement of war, armed hostilities or other international or national calamity directly or indirectly involving the United States, or (f) other event or condition which would have a material adverse effect (including any adverse tax effect) on the Fund or its shareholders if shares were repurchased. The Board of Trustees of the Fund may in the future modify these conditions in light of experience.

Conversion to an open-end company would require the approval of the holders of at least two-thirds of the Fund's Common Shares and MuniPreferred Shares outstanding at the time, voting together as a single class, and of the holders of at least two-thirds of the Fund's MuniPreferred Shares outstanding at the time, voting as a separate class, provided however, that such separate class vote shall be a majority vote if the action in question has previously been approved, adopted or authorized by the affirmative vote of two-thirds of the total number of trustees fixed in accordance with the Declaration or By-laws. See the Prospectus under "Certain Provisions in the Declaration of Trust" for a discussion of voting requirements applicable to conversion of the Fund to an open-end company. If the Fund converted to an open-end company, it would be required to redeem all MuniPreferred Shares then outstanding, and the Fund's Common Shares would no longer be listed on the American Stock Exchange. Shareholders of an open-end investment company may require the company to redeem their shares on any business day (except in certain circumstances as authorized by or under the 1940 Act) at their net asset value, less such redemption charge, if any, as might be in effect at the time of redemption. In order to avoid maintaining large cash positions or liquidating favorable investments to meet redemptions, open-end companies typically engage in a continuous offering of their shares. Open-end companies are thus subject to periodic asset in-flows and out-flows that can complicate portfolio management. The Board of Trustees of the Fund may at any time propose conversion of the Fund to an open-end company depending upon their judgment as to the advisability of such action in light of circumstances then prevailing.

The repurchase by the Fund of its shares at prices below net asset value will result in an increase in the net asset value of those shares that remain outstanding. However, there can be no assurance that share repurchases or tenders at or below net asset value will result in the Fund's shares trading at a price equal to their net asset value. Nevertheless, the fact that the Fund's shares may be the subject of repurchase or tender offers at net asset value from time to time, or that the Fund may be converted to an open-end company, may reduce any spread between market price and net asset value that might otherwise exist.

In addition, a purchase by the Fund of its Common Shares will decrease the Fund's total assets which would likely have the effect of increasing the Fund's expense ratio. Any purchase by the Fund of its Common Shares at a time when MuniPreferred Shares are outstanding will increase the leverage applicable to the outstanding Common Shares then remaining. See the Fund's Prospectus under "Risks--Concentration Risk" and "Risks--Leverage Risk."

Before deciding whether to take any action if the Fund's Common Shares trade below net asset value, the Board of the Fund would consider all relevant factors, including the extent and duration of the discount, the liquidity of the Fund's portfolio, the impact of any action that might be taken on the Fund or its shareholders and market considerations. Based on these considerations, even if the Fund's shares should trade at a discount, the Board of Trustees may determine that, in the interest of the Fund and its shareholders, no action should be taken.

TAX MATTERS

Federal Income Tax Matters

The following discussion of federal income tax matters is based upon the advice of Bell, Boyd & Lloyd LLC, special counsel to the Fund.

The Fund has elected and intends to qualify under Subchapter M of the Code for tax treatment as a regulated investment company and to satisfy certain conditions which will enable interest from municipal obligations, which is exempt from regular federal income taxes in the hands of the Fund, to qualify as "exempt- interest dividends" when distributed to the Fund's shareholders. In order to qualify for tax treatment as a regulated investment company, the Fund must satisfy certain requirements relating to the source of its income, diversification of its assets, and distributions of its income to shareholders. First, the Fund must derive at least 90% of its annual gross income (including tax-exempt interest) from dividends, interest, payments with respect to securities loans, gains from the sale or other disposition of stock or securities or foreign currencies, or other income (including but not limited to gains from options, futures and forward contracts) derived with respect to its business of investing in such stock, securities or currencies (the "90% gross income test"). Second, the Fund must diversify its holdings so that, at the close of each quarter of its taxable year, (i) at least 50% of the value of its total assets is comprised of cash, cash items, United States Government securities, securities of other regulated investment companies and other securities limited in respect of any one issuer to an amount not greater in value than 5% of the value of the Fund's total assets and to not more than 10% of the outstanding voting securities of such issuer, and (ii) not more than 25% of the value of its total assets is invested in the securities of any one issuer (other than United States Government securities and securities of other regulated investment companies) or two or more issuers controlled by the Fund and engaged in the same, similar or related trades or businesses.

As a regulated investment company, the Fund will not be subject to federal income tax in any taxable year with respect to "net investment income" (i.e., its "investment company taxable income," as that term is defined in the Code, determined without reference to the deduction for dividends paid) and "net capital gain" (i.e., the excess of the Fund's net long-term capital gain over its net short-term capital loss), provided that it distributes at least 90% of the sum of (i) its investment company taxable income (which includes dividends, taxable interest, taxable original issue discount and market discount income, income from securities lending, net short-term capital gain in excess of net long-term capital loss, and any other taxable income other than net capital gain and is reduced by deductible expenses) and (ii) its net tax-exempt interest (the excess of its gross tax-exempt interest income over certain disallowed deductions). The Fund may retain for investment its net capital gain. However, if the Fund retains any net capital gain or any investment company taxable income, it will be subject to tax at regular corporate rates on the amount retained. If the Fund retains any net capital gain, it may designate the retained amount as undistributed capital gains in a notice to its shareholders who, if subject to federal income tax on long-term capital gains, (i) will be required to include in income for federal income tax purposes, as long-term capital gain, their share of such undistributed amount, and (ii) will be entitled to credit their proportionate shares of the tax paid by the Fund on such undistributed amount against their federal income tax liabilities, if any, and to claim refunds to the extent the credit exceeds such liabilities. For

federal income tax purposes, the tax basis of shares owned by a shareholder of the Fund will be increased by an amount equal under current law to the difference between the amount of undistributed capital gains included in the shareholder's gross income and the tax deemed paid by the shareholder under clause (ii) of the preceding sentence. The

37

Fund intends to distribute at least annually to its shareholders all or substantially all of its net tax-exempt interest and any investment company taxable income and net capital gain.

Treasury regulations permit a regulated investment company, in determining its investment company taxable income and net capital gain, to elect (unless it has made a taxable year election for excise tax purposes) to treat all or part of any net capital loss, any net long-term capital loss or any net foreign currency loss incurred after October 31 as if it had been incurred in the succeeding year.

The Fund intends to qualify to pay "exempt-interest dividends" by satisfying the requirement that at the close of each quarter of the Fund's taxable year at least 50% of the value of its total assets consists of tax-exempt municipal obligations. Distributions from the Fund will constitute exempt-interest dividends to the extent of its tax-exempt interest income (net of expenses and amortized bond premium). Exempt-interest dividends distributed to Common Shareholders are excluded from gross income for federal income tax purposes, although they are required to be reported on the Common Shareholders' federal income tax returns. Gain from the sale or redemption of Common Shares, however, will be taxable to the Common Shareholders as capital gain (provided such Common Shares were held as capital assets) even though the increase in value of such Common Shares is attributable to tax-exempt interest income. In addition, gain realized by the Fund from the disposition of a tax-exempt municipal obligation that was purchased at a price less than the principal amount of the bond will be taxable to the Fund's shareholders as ordinary income to the extent of accrued market discount. Under the Code, interest on indebtedness incurred or continued to purchase or carry Common Shares, which interest is deemed to relate to exempt-interest dividends, will not be deductible by Common Shareholders for federal income tax purposes. Moreover, while exempt-interest dividends are excluded from gross income for federal income tax purposes, they may be subject to alternative minimum tax and may have other collateral tax consequences. See "Investment Policies and Techniques." Different alternative minimum tax rules apply to individuals and to corporations. Among other things, interest on all municipal bonds is taken into account to determine whether a corporation is subject to the alternative minimum tax. Taxpayers that may be subject to the alternative minimum tax should consult their advisers before investing in Common Shares.

Distributions by the Fund of net interest received from certain taxable temporary investments (such as certificates of deposit, commercial paper and obligations of the U.S. Government, its agencies and instrumentalities) and net short-term capital gain realized by the Fund, if any, will be taxable to Common Shareholders as ordinary income whether received in cash or additional shares. Any net long-term capital gain realized by the Fund and distributed to Common Shareholders in cash or additional shares will be taxable to Common Shareholders as long-term capital gain regardless of the length of time investors have owned shares of the Fund. Taxable distributions will not be eligible for the dividends received deduction allowed to corporations. Distributions by the Fund to Common Shareholders that do not constitute ordinary income dividends, capital gain

dividends or exempt-interest dividends will be treated as a return of capital to the extent of (and in reduction of) the Common Shareholder's tax basis in his or her shares. Any excess will be treated as gain from the sale of his or her shares, as discussed below.

The Internal Revenue Service's position in a published revenue ruling indicates that the Fund is required to designate dividends paid with respect to its Common Shares and its MuniPreferred Shares as consisting of a portion of each type of income distributed by the Fund. The portion of each type of income deemed received by the holders of each class of shares for a taxable year will be equal to the portion of total Fund dividends received by such class with respect to such taxable year. Thus, the Fund will designate dividends paid as exempt-interest dividends in a manner that allocates such dividends between the holders of the Common Shares and the holders of MuniPreferred Shares, in proportion to the total dividends paid to each such class during or with respect to the taxable year, or otherwise as required by applicable law. Capital gain dividends and ordinary income dividends will similarly be allocated between the two classes.

If the Fund engages in hedging transactions involving financial futures and options, these transactions will be subject to special tax rules, the effect of which may be to accelerate income to the Fund, defer the Fund's losses, cause adjustments in the holding periods of the Fund's securities, convert long-term capital gains into short-term capital gains and convert short-term capital losses into long-term capital losses. These rules could therefore affect the amount, timing and character of distributions to Common Shareholders.

Prior to purchasing shares in the Fund, an investor should carefully consider the impact of dividends or distributions which are expected to be or have been declared, but not paid. Any dividend or distribution declared shortly after a purchase of such shares prior to the record date will have the effect of reducing the per share net asset value by the per share amount of the dividend or distribution.

Although dividends generally will be treated as distributed when paid, dividends declared in October, November or December, payable to shareholders of record on a specified date in one of those months and paid during the following January, will be treated as having been distributed by the Fund (and received by the shareholders) on December 31.

The sale or exchange of Common Shares normally will result in capital gain or loss to the Common Shareholders who hold their Common Shares as capital assets. However, any loss on the sale or exchange of a Common Share that has been held for six months or less will be disallowed to the extent of any distribution of exempt-interest dividends received with respect to such Common Share. Generally, a Common Shareholder's gain or loss will be long-term gain or loss if the shares have been held for more than one year. If a shareholder sells or otherwise disposes of Common Shares before holding them for more than six months, however, any loss on the sale or other disposition of such Common Shares shall be treated as a long-term capital loss to the extent of any capital gain dividends received by the Common Shareholder (or amounts credited to the Common Shareholder as an undistributed capital gain) with respect to such Common Shares. Present law taxes both long- and short-term capital gains of corporations at the rates applicable to ordinary income. For non-corporate taxpayers, however, net capital gain (i.e., the excess of net long-term capital gain over net short-term capital loss) with respect to securities is taxed at a maximum rate of 20%, while short-term capital gain and other ordinary income is taxed at a maximum

rate of 38.6% in 2002 and 2003, 37.6% in 2004 and 2005, and 35% thereafter until 2011, when the maximum rate on ordinary income will revert to 39.6% unless amended by Congress. The maximum long-term capital gain rate is 18% for capital assets that are held for more than five years and the holding periods of which begin after December 31, 2000. Because of the limitations on itemized deductions and the deduction for personal exemptions applicable to higher income taxpayers, the effective tax rate may be higher in certain circumstances.

All or a portion of a sales charge paid in purchasing Common Shares cannot be taken into account for purposes of determining gain or loss on the redemption or exchange of such shares within 90 days after their purchase to the extent shares of the Fund or another fund are subsequently acquired without payment of a sales charge pursuant to a reinvestment right. Any disregarded portion of such charge will result in an increase in the Common Shareholder's tax basis in the shares subsequently acquired. In addition, no loss will be allowed on the redemption or exchange of Common Shares to the extent that the Common Shareholder purchases other shares of the Fund (whether through reinvestment of distributions or otherwise) or the Common Shareholder acquires or enters into a contract or option to acquire securities that are substantially identical to shares of the Fund within a period of 61 days beginning 30 days before and ending 30 days after such redemption or exchange. If disallowed, the loss will be reflected in an adjustment to the basis of the shares acquired.

In order to avoid a 4% federal excise tax, the Fund must distribute or be deemed to have distributed by December 31 of each calendar year at least 98% of its taxable ordinary income for such year, at least 98% of its capital gain net income (the excess of its realized capital gains over its realized capital losses, generally computed on the basis of the one-year period ending on October 31 of such year) and 100% of any taxable ordinary income and any excess of realized capital gains over realized capital losses for the prior year that was not distributed during such year and on which the Fund paid no federal income tax. For purposes of the excise tax, a regulated investment company may reduce its capital gain net income (but not below its net capital gain) by the amount of any net ordinary loss for the calendar year. The Fund intends to make timely distributions in compliance with these requirements, and consequently it is anticipated that it generally will not be required to pay the excise tax.

If in any year the Fund should fail to qualify under Subchapter M for tax treatment as a regulated investment company, the Fund would incur a regular corporate federal income tax upon its income for that year, and distributions to its Common Shareholders would be taxable to Common Shareholders as ordinary dividend income for federal income tax purposes to the extent of the Fund's earnings and profits.

The Fund is required in certain circumstances to withhold a percentage of taxable dividends and certain other payments paid to non-corporate holders of shares who have not furnished to the Fund their correct taxpayer identification numbers (in the case of individuals, their Social Security number) and certain certifications, or who are otherwise subject to backup withholding. The backup withholding percentage will be 30% in 2002 and 2003, 29% in 2004 and 2005, and 28% thereafter until 2011, when the percentage will revert to 31% unless amended

by Congress. Backup withholding is not an additional tax, and any amounts withheld may be credited against the shareholder's federal income tax liability.

The foregoing is a general and abbreviated summary of the provisions of the Code and Treasury Regulations presently in effect as they directly govern the taxation of the Fund and its Common Shareholders. For complete provisions, reference should be made to the pertinent Code sections and Treasury Regulations. The Code and Treasury Regulations are subject to change by legislative or administrative action, and any such change may be retroactive with respect to Fund transactions. Common Shareholders are advised to consult their own tax

39

advisors for more detailed information concerning the federal taxation of the Fund and the income tax consequences to its Common Shareholders.

State Tax Matters

Tax matters pertaining to California are set forth in Appendix E.

40

EXPERTS

The Financial Statements of the Fund as of November 4, 2002, appearing in this Statement of Additional Information have been audited by Ernst & Young LLP, independent auditors, as set forth in their report thereon appearing elsewhere herein, and is included in reliance upon such report given upon the authority of such firm as experts in accounting and auditing. Ernst & Young LLP provides accounting and auditing services to the Fund. The principal business address of Ernst & Young LLP is 233 South Wacker Drive, Chicago, Illinois 60606.

CUSTODIAN

The custodian of the assets of the Fund is State Street Bank and Trust Company, One Federal Street, Boston, Massachusetts 02110. The custodian performs custodial, fund accounting and portfolio accounting services.

ADDITIONAL INFORMATION

A Registration Statement on Form N-2, including amendments thereto, relating to the shares of the Fund offered hereby, has been filed by the Fund with the Securities and Exchange Commission (the "Commission"), Washington, D.C. The Fund's Prospectus and this Statement of Additional Information do not contain all of the information set forth in the Registration Statement, including any exhibits and schedules thereto. For further information with respect to the Fund and the shares offered hereby, reference is made to the Fund's Registration Statement. Statements contained in the Fund's Prospectus and this Statement of Additional Information as to the contents of any contract or

other document referred to are not

41

necessarily complete and in each instance reference is made to the copy of such contract or other document filed as an exhibit to the Registration Statement, each such statement being qualified in all respects by such reference. Copies of the Registration Statement may be inspected without charge at the Commission's principal office in Washington, D.C., and copies of all or any part thereof may be obtained from the Commission upon the payment of certain fees prescribed by the Commission.

42

REPORT OF INDEPENDENT AUDITORS

The Board of Trustees and Shareholder
Nuveen Insured California Tax-Free Advantage Municipal Fund

We have audited the accompanying statement of assets and liabilities of Nuveen Insured California Tax-Free Advantage Municipal Fund (the "Fund") as of November 4, 2002 and the related statement of operations for the period from July 29, 2002 (date of organization) through November 4, 2002. These financial statements are the responsibility of the Fund's management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with auditing standards generally accepted in the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of the Fund at November 4, 2002, and results of its operations for the period from July 29, 2002 (date of organization) through November 4, 2002, in conformity with accounting principles generally accepted in the United States.

Note 1: Organization

The Fund was organized as a Massachusetts business trust on July 29, 2002, and has been inactive since that date except for matters relating to its organization and registration as a non-diversified, closed-end management investment company under the Investment Company Act of 1940, as amended, and the Securities Act of 1933, as amended, and the sale of 7,000 Common Shares to Nuveen Advisory Corp., the Fund's investment adviser (the "Adviser"), a wholly owned subsidiary of The John Nuveen Company.

Nuveen Investments, also a wholly owned subsidiary of The John Nuveen Company, has agreed to reimburse all organization expenses (approximately \$11,500) and pay all Common Share offering costs (other than the sales load) that exceed \$.03 per Common Share.

The Fund seeks to provide current income exempt from regular federal income tax, the alternative minimum tax applicable to individuals and California income tax.

The Fund is authorized by its Declaration of Trust to issue Preferred Shares ("MuniPreferred Shares") having a liquidation value of \$25,000 per share in one or more classes or series, with dividend, liquidation preference and other rights as determined by the Fund's Board of Trustees without approval of the Common Shareholders.

Note 2: Significant Accounting Policies

The Fund's financial statements are prepared in accordance with accounting principles generally accepted in the United States which require the use of management estimates. Actual results may differ from those estimates.

The Fund's share of Common Share offering costs will be recorded as a reduction of the proceeds from the sale of Common Shares upon the commencement of Fund operations. The Common Share offering costs reflected in the Statement of Assets and Liabilities assume the sale of 12,300,000 Common Shares.

If the Fund offers MuniPreferred Shares, the offering costs will be borne by Common Shareholders as a direct reduction to paid-in capital.

Note 3: Investment Management Agreement

Pursuant to an investment management agreement between the Adviser and the Fund, the Fund, upon commencement of Fund operations, has agreed to pay a management fee, payable on a monthly basis, at an annual rate ranging from .6500% of the first \$125 million of the average daily net assets (including net assets attributable to MuniPreferred Shares ("Managed Assets")) to .5750% of the average daily Managed Assets in excess of \$2 billion.

In addition to the reimbursement and waiver of organization and Common Share offering costs discussed in Note 1, the Adviser has contractually agreed to reimburse the Fund for fees and expenses in the amount of .32% of average daily Managed Assets for the first five full years of the Fund's operations, .24% in year 6, .16% in year 7 and .08% in year 8. The Adviser has not agreed to reimburse the Fund for any portion of its fees and expenses beyond November 30, 2010.

Note 4: Income Taxes

The Fund intends to comply with the requirements of the Internal Revenue Code applicable to regulated investment companies and to distribute all of its net investment income, in addition to any significant amounts of net realized capital gains and/or market discount realized from investment transactions.

APPENDIX A

Ratings of Investments

Standard & Poor's Corporation--A brief description of the applicable Standard & Poor's Corporation, a division of The McGraw-Hill Companies ("Standard & Poor's" or "S&P") rating symbols and their meanings (as published by S&P) follows:

A Standard & Poor's issue credit rating is a current opinion of the creditworthiness of an obligor with respect to a specific financial obligation, a specific class of financial obligations, or a specific financial program (including ratings on medium term note programs and commercial paper programs). It takes into consideration the creditworthiness of guarantors, insurers, or other forms of credit enhancement on the obligation. The issue credit rating is not a recommendation to purchase, sell, or hold a financial obligation, inasmuch as it does not comment as to market price or suitability for a particular investor.

Issue credit ratings are based on current information furnished by the obligors or obtained by Standard & Poor's from other sources it considers reliable. Standard & Poor's does not perform an audit in connection with any credit rating and may, on occasion, rely on unaudited financial information. Credit ratings may be changed, suspended, or withdrawn as a result of changes in, or unavailability of, such information, or based on other circumstances.

Issue credit ratings can be either long-term or short-term. Short-term ratings are generally assigned to those obligations considered short-term in the relevant market. In the U.S., for example, that means obligations with an original maturity of no more than 365 days - including commercial paper. Short-term ratings are also used to indicate the creditworthiness of an obligor with respect to put features on long-term obligations. The result is a dual rating, in which the short-term ratings address the put feature, in addition to the usual long-term rating. Medium-term notes are assigned long-term ratings.

Long-term Issue Credit Ratings

Issue credit ratings are based in varying degrees, on the following considerations:

1. Likelihood of payment - capacity and willingness of the obligor to meet its financial commitment on an obligation in accordance with the terms of the obligation;
2. Nature of and provisions of the obligation; and
3. Protection afforded by, and relative position of, the obligation in the event of bankruptcy, reorganization, or other arrangement under the laws of bankruptcy and other laws affecting creditors' rights.

The issue ratings definitions are expressed in terms of default risk. As such, they pertain to senior obligations of an entity. Junior obligations are typically rated lower than senior obligations, to reflect the lower priority in

bankruptcy, as noted above.

AAA

An obligation rated 'AAA' has the highest rating assigned by Standard & Poor's. The obligor's capacity to meet its financial

A-1

commitment on the obligation is extremely strong.

AA

An obligation rated 'AA' differs from the highest-rated obligations only in small degree. The obligor's capacity to meet its financial commitment on the obligation is very strong.

A

An obligation rated 'A' is somewhat more susceptible to the adverse effects of changes in circumstances and economic conditions than obligations in higher-rated categories. However, the obligor's capacity to meet its financial commitment on the obligation is still strong.

BBB

An obligation rated 'BBB' exhibits adequate protection parameters. However, adverse economic conditions or changing circumstances are more likely to lead to a weakened capacity of the obligor to meet its financial commitment on the obligation.

BB, B, CCC, CC, And C

Obligations rated 'BB', 'B', 'CCC', 'CC', and 'C' are regarded as having significant speculative characteristics. 'BB' indicates the least degree of speculation and 'C' the highest. While such obligations will likely have some quality and protective characteristics, these may be outweighed by large uncertainties or major exposures to adverse conditions.

BB

An obligation rated 'BB' is less vulnerable to nonpayment than other speculative issues. However, it faces major ongoing uncertainties or exposure to adverse business, financial, or economic conditions, which could lead to the obligor's inadequate capacity to meet its financial commitment on the obligation.

B

An obligation rated 'B' is more vulnerable to nonpayment than obligations rated 'BB', but the obligor currently has the capacity to meet its financial commitment on the obligation. Adverse business, financial, or economic conditions will likely impair the obligor's capacity or willingness to meet its financial commitment on the obligation.

CCC

An obligation rated `CCC' is currently vulnerable to nonpayment and is dependent upon favorable business, financial, and economic conditions for the obligor to meet its financial commitment on the obligation. In the event of adverse business, financial, or economic conditions, the obligor is not likely to have the capacity to meet its financial commitment on the obligation.

CC

An obligation rated `CC' is currently highly vulnerable to nonpayment.

A-2

C

The `C' rating may be used to cover a situation where a bankruptcy petition has been filed or similar action has been taken, but payments on this obligation are being continued.

D

An obligation rated `D' is in payment default. The `D' rating category is used when payments on an obligation are not made on the date due even if the applicable grace period has not expired, unless Standard & Poor's believes that such payments will be made during such grace period. The `D' rating also will be used upon the filing of a bankruptcy petition or the taking of a similar action if payments on an obligation are jeopardized.

Plus (+) or minus (-). The ratings from `AA' to `CCC' may be modified by the addition of a plus or minus sign to show relative standing within the major rating categories.

c The `c' subscript is used to provide additional information to investors that the bank may terminate its obligation to purchase tendered bonds if the long-term credit rating of the issuer is below an investment-grade level and/or the issuer's bonds are deemed taxable.

p The letter `p' indicates that the rating is provisional. A provisional rating assumes the successful completion of the project financed by the debt being rated and indicates that payment of debt service requirements is largely or entirely dependent upon the successful, timely completion of the project. This rating, however, while addressing credit quality subsequent to completion of the project, makes no comment on the likelihood of or the risk of default upon failure of such completion. The investor should exercise his own judgment with respect to such likelihood and risk.

* Continuance of the ratings is contingent upon Standard & Poor's receipt of an executed copy of the escrow agreement or closing documentation confirming investments and cash flows.

r The `r' highlights derivative, hybrid, and certain other obligations that Standard & Poor's believes may experience high volatility or high variability in expected returns as a result of noncredit risks. Examples of such obligations are securities with principal or interest return indexed to equities, commodities, or currencies; certain swaps and options; and

interest-only and principal-only mortgage securities. The absence of an 'r' symbol should not be taken as an indication that an obligation will exhibit no volatility or variability in total return.

N.R. Not rated.

Debt obligations of issuers outside the United States and its territories are rated on the same basis as domestic corporate and municipal issues. The ratings measure the creditworthiness of the obligor but do not take into account currency exchange and related uncertainties.

Bond Investment Quality Standards

Under present commercial bank regulations issued by the Comptroller of the Currency, bonds rated in the top four categories ('AAA', 'AA', 'A', 'BBB', commonly known as investment-grade ratings) generally are regarded as eligible for bank investment. Also, the laws of various states governing legal investments impose certain rating or other standards for obligations eligible for investment by savings banks, trust companies, insurance companies, and fiduciaries in general.

Short-Term Issue Credit Ratings

Notes

A Standard & Poor's note ratings reflects the liquidity factors and market access risks unique to notes. Notes due in three years or less will likely receive a note rating. Notes maturing beyond three years will most likely receive a long-term debt rating. The following criteria will be used in making that assessment:

- . Amortization schedule -- the larger the final maturity relative to other maturities, the more likely it will be treated as a note; and
- . Source of payment -- the more dependent the issue is on the market for its refinancing, the more likely it will be treated as a note.

Note rating symbols are as follows:

SP-1 Strong capacity to pay principal and interest. An issue determined to possess a very strong capacity to pay debt service is given a plus (+) designation.

SP-2 Satisfactory capacity to pay principal and interest, with some vulnerability to adverse financial and economic changes over the term of the notes.

SP-3 Speculative capacity to pay principal and interest.

A-3

A note rating is not a recommendation to purchase, sell, or hold a security inasmuch as it does not comment as to market price or suitability for a particular investor. The ratings are based on current information furnished to S&P by the issuer or obtained by S&P from other sources it considers reliable. S&P does not perform an audit in connection with any rating and may, on occasion, rely on unaudited financial information. The ratings may be changed, suspended, or withdrawn as a result of changes in or unavailability of such information or based on other circumstances.

Commercial Paper

An S&P commercial paper rating is a current assessment of the likelihood of timely payment of debt having an original maturity of no more than 365 days.

Ratings are graded into several categories, ranging from `A-1' for the highest quality obligations to `D' for the lowest. These categories are as follows:

- A-1 A short-term obligation rated `A-1' is rated in the highest category by Standard & Poor's. The obligor's capacity to meet its financial commitment on the obligation is strong. Within this category, certain obligations are designated with a plus sign (+). This indicates that the obligor's capacity to meet its financial commitment on these obligations is extremely strong.
- A-2 A short-term obligation rated `A-2' is somewhat more susceptible to the adverse effects of changes in circumstances and economic conditions than obligations in higher rating categories. However, the obligor's capacity to meet its financial commitment on the obligation is satisfactory.
- A-3 A short-term obligation rated `A-3' exhibits adequate protection parameters. However, adverse economic conditions or changing circumstances are more likely to lead to a weakened capacity of the obligor to meet its financial commitment on the obligation.
- B A short-term obligation rated `B' is regarded as having significant speculative characteristics. The obligor currently has the capacity to meet its financial commitment on the obligation; however, it faces major ongoing uncertainties which could lead to the obligor's inadequate capacity to meet its financial commitment on the obligation.
- C A short-term obligation rated `C' is currently vulnerable to nonpayment and is dependent upon favorable business, financial, and economic conditions for the obligor to meet its financial commitment on the obligation.
- D A short-term obligation rated `D' is in payment default. The `D' rating category is used when payments on an obligation are not made on the date due even if the applicable grace period has not expired, unless Standard & Poor's believes that such payments will be made during such grace period. The `D' rating also will be used upon the filing of a bankruptcy petition or the taking of a similar action if payments on an obligation are jeopardized.

A commercial rating is not a recommendation to purchase, sell, or hold a security inasmuch as it does not comment as to market price or suitability for a particular investor. The ratings are based on current information furnished to S&P by the issuer or obtained by S&P from other sources it considers reliable. S&P does not perform an audit in connection with any rating and may, on occasion, rely on unaudited financial information. The ratings may be changed, suspended, or withdrawn as a result of changes in or unavailability of such information or based on other circumstances.

A-4

Moody's Investors Service, Inc.--A brief description of the applicable Moody's Investors Service, Inc. ("Moody's") rating symbols and their meanings (as published by Moody's) follows:

Municipal Bonds

- Aaa Bonds which are rated `Aaa' are judged to be of the best quality. They carry the smallest degree of investment risk and are generally referred to as "gilt edged." Interest payments are protected by a large or by an exceptionally stable margin and principal is secure. While the various protective elements are likely to change, such changes as can be visualized are most unlikely to impair the fundamentally strong position of such issues.
- Aa Bonds which are rated `Aa' are judged to be of high quality by all standards. Together with the `Aaa' group they comprise what are generally known as high grade bonds. They are rated lower than the best bonds because margins of protection may not be as large as in `Aaa' securities or fluctuation of protective elements may be of greater amplitude or there may be other elements present which make the long-term risks appear somewhat larger than in `Aaa' securities.
- A Bonds which are rated `A' possess many favorable investment attributes and are to be considered as upper medium grade obligations. Factors giving security to principal and interest are considered adequate, but elements may be present which suggest a susceptibility to impairment sometime in the future.
- Baa Bonds which are rated `Baa' are considered as medium grade obligations, i.e., they are neither highly protected nor poorly secured. Interest payments and principal security appear adequate for the present but certain protective elements may be lacking or may be characteristically unreliable over any great length of time. Such bonds lack outstanding investment characteristics and in fact have speculative characteristics as well.
- Ba Bonds which are rated `Ba' are judged to have speculative elements; their future cannot be considered as well assured. Often the protection of interest and principal payments may be very moderate and thereby not well safeguarded during both good and bad times over the future. Uncertainty of position characterizes bonds in this class.
- B Bonds which are rated `B' generally lack characteristics of the desirable investment. Assurance of interest and principal payments or of maintenance of other terms of the contract over any long period of time may be small.
- Caa Bonds which are rated `Caa' are of poor standing. Such issues may be in default or there may be present elements of danger with respect to principal or interest.
- Ca Bonds which are rated `Ca' represent obligations which are speculative in a high degree. Such issues are often in default or have other marked shortcomings.
- C Bonds which are rated `C' are the lowest rated class of bonds, and issues so rated can be regarded as having extremely poor prospects of ever attaining any real investment standing.

A-5

- # (hatchmark): Represents issues that are secured by escrowed funds held in cash, held in trust, invested and reinvested in direct, non-callable, non-prepayable United States government obligations or non-callable, non-prepayable obligations unconditionally guaranteed by the U.S. Government, Resolution Funding Corporation debt obligations.

Con. (...): Bonds for which the security depends upon the completion of some act or the fulfillment of some condition are rated conditionally. These are bonds secured by (a) earnings of projects under construction, (b) earnings of projects unseasoned in operation experience, (c) rentals which begin when facilities are completed, or (d) payments to which some other limiting condition attaches. The parenthetical rating denotes probable credit stature upon completion of construction or elimination of the basis of the condition.

(P): When applied to forward delivery bonds, indicates that the rating is provisional pending delivery of the bonds. The rating may be revised prior to delivery if changes occur in the legal documents or the underlying credit quality of the bonds.

Note: Moody's applies numerical modifiers 1, 2 and 3 in each generic rating classification from Aa through Caa. The modifier 1 indicates that the issue ranks in the higher end of its generic rating category; the modifier 2 indicates a mid-range ranking; and the modifier 3 indicates that the issue ranks in the lower end of its generic rating category.

Short-Term Loans

MIG 1/VMIG 1 This designation denotes superior credit quality. Excellent protection is afforded by established cash flows, highly reliable liquidity support, or demonstrated broad-based access to the market for refinancing.

MIG 2/VMIG 2 This designation denotes strong credit quality. Margins of protection are ample, although not as large as in the preceding group.

MIG 3/VMIG 3 This designation denotes acceptable credit quality. Liquidity and cash-flow protection may be narrow, and market access for refinancing is likely to be less well-established.

SG This designation denotes speculative-grade credit quality. Debt instruments in this category may lack sufficient margins of protection.

Commercial Paper

Issuers (or supporting institutions) rated Prime-1 have a superior ability for repayment of senior short-term debt obligations. Prime-1 repayment ability will normally be evidenced by the following characteristics:

- Leading market positions in well-established industries.
- High rates of return on funds employed.
- Conservative capitalization structures with moderate reliance on debt and ample asset protection.
- Broad margins in earnings coverage of fixed financial charges and high internal cash generation.

-- Well-established access to a range of financial markets and assured sources of alternate liquidity.

Issuers (or supporting institutions) rated Prime-2 have a strong ability for repayment of senior short-term debt obligations. This will normally be evidenced by many of the characteristics cited above but to a lesser degree. Earnings trends and coverage ratios, while sound, may be more subject to variation than is the case for Prime-2 securities. Capitalization characteristics, while still appropriate, may be more affected by external conditions. Ample alternate liquidity is maintained.

Issuers (or supporting institutions) rated Prime-3 have an acceptable ability for repayment of senior short-term debt obligations. The effect of industry characteristics and market composition may be more pronounced. Variability in earnings and profitability may result in changes in the level of debt protection measurements and the requirement for relatively high financial leverage. Adequate alternate liquidity is maintained.

Issuers rated Not Prime do not fall within any of the Prime rating categories.

Fitch Ratings--A brief description of the applicable Fitch Ratings ("Fitch") ratings symbols and meanings (as published by Fitch) follows:

Long-Term Credit Ratings

Investment Grade

AAA Highest credit quality. `AAA' ratings denote the lowest expectation of credit risk. They are assigned only in case of exceptionally strong capacity for timely payment of financial commitments. This capacity is highly unlikely to be adversely affected by foreseeable events.

AA Very high credit quality. `AA' ratings denote a very low expectation of credit risk. They indicate very strong capacity for timely payment of financial commitments. This capacity is not significantly vulnerable to foreseeable events.

A High credit quality. `A' ratings denote a low expectation of credit risk. The capacity for timely payment of financial commitments is considered strong. This capacity may, nevertheless, be more vulnerable to changes in circumstances or in economic conditions than is the case for higher ratings.

BBB Good credit quality. `BBB' ratings indicate that there is currently a low expectation of credit risk. The capacity for timely payment of financial commitments is considered adequate, but adverse changes in circumstances and in economic conditions are more likely to impair this capacity. This is the lowest investment-grade category.

Speculative Grade

BB Speculative. `BB' ratings indicate that there is a possibility of credit risk developing, particularly as the result of adverse economic change over time; however, business or

financial alternatives may be available to allow financial commitments to be met. Securities rated in this category are not investment grade.

B Highly speculative. `B' ratings indicate that significant credit risk is present, but a limited margin of safety remains. Financial commitments are currently being met; however, capacity for continued payment is contingent upon a sustained, favorable business and economic environment.

CCC, CC, C High default risk. Default is a real possibility. Capacity for meeting financial commitments is solely reliant upon sustained, favorable business or economic developments. A `CC' rating indicates that default of some kind appears probable. `C' ratings signal imminent default.

DDD, DD, and D Default. The ratings of obligations in this category are based on their prospects for achieving partial or full recovery in a reorganization or liquidation of the obligor. While expected recovery values are highly speculative and cannot be estimated with any precision, the following serve as general guidelines. `DDD' obligations have the highest potential for recovery, around 90%-100% of outstanding amounts and accrued interest. `DD' indicates potential recoveries in the range of 50%-90%, and `D' the lowest recovery potential, i.e., below 50%. Entities rated in this category have defaulted on some or all of their obligations. Entities rated `DDD' have the highest prospect for resumption of performance or continued operation with or without a formal reorganization process. Entities rated `DD' and `D' are generally undergoing a formal reorganization or liquidation process; those rated `DD' are likely to satisfy a higher portion of their outstanding obligations, while entities rated `D' have a poor prospect for repaying all obligations.

Short-Term Credit Ratings

A short-term rating has a time horizon of less than 12 months for most obligations, or up to three years for U.S. public finance securities, and thus places greater emphasis on the liquidity necessary to meet financial commitments in a timely manner.

F1 Highest credit quality. Indicates the strongest capacity for timely payment of financial commitments; may have an added "+" to denote any exceptionally strong credit feature.

F2 Good credit quality. A satisfactory capacity for timely payment of financial commitments, but the margin of safety is not as great as in the case of the higher ratings.

F3 Fair credit quality. The capacity for timely payment of financial commitments is adequate; however, near-term adverse changes could result in a reduction to non-investment grade.

B Speculative. Minimal capacity for timely payment of financial commitments, plus vulnerability to near-term adverse changes in financial and economic conditions.

A-8

C High default risk. Default is a real possibility. Capacity for meeting financial commitments is solely reliant upon a sustained, favorable business and economic environment.

D Default. Denotes actual or imminent payment default.

Notes to Long-term and Short-term ratings:

"+" or "-" may be appended to a rating to denote relative status within major rating categories. Such suffixes are not added to the 'AAA' Long-term rating category, to categories below 'CCC', or to Short-term ratings other than 'F1'.

'NR' indicates that Fitch Ratings does not rate the issuer or issue in question.

'Withdrawn': A rating is withdrawn when Fitch Ratings deems the amount of information available to be inadequate for rating purposes, or when an obligation matures, is called, or refinanced.

Rating Watch: Ratings are placed on Rating Watch to notify investors that there is a reasonable probability of a rating change and the likely direction of such change. These are designated as "Positive", indicating a potential upgrade, "Negative", for a potential downgrade, or "Evolving", if ratings may be raised, lowered or maintained. Rating Watch is typically resolved over a relatively short period.

A Rating Outlook indicates the direction a rating is likely to move over a one to two year period. Outlooks may be positive, stable, or negative. A positive or negative Rating Outlook does not imply a rating change is inevitable. Similarly, ratings for which outlooks are 'stable' could be downgraded before an outlook moves to positive or negative if circumstances warrant such an action. Occasionally, Fitch Ratings may be unable to identify the fundamental trend. In these cases, the Rating Outlook may be described as evolving.

APPENDIX B

TAXABLE EQUIVALENT YIELD TABLES

The taxable equivalent yield is the current yield you would need to earn on a taxable investment in order to equal a stated tax-free yield on a municipal investment. To assist you to more easily compare municipal investments like the Fund with taxable alternative investments, the table below presents the taxable equivalent yields for a range of hypothetical tax-free yields assuming the stated marginal federal tax rates for 2002 listed below:

Taxable Equivalent of Tax-Free Yields

Tax Free Yields

Tax Rate	4.00%	4.50%	5.00%	5.50%	6.00%	6.50%
10.00%	4.44%	5.00%	5.56%	6.11%	6.67%	7.22%
15.00%	4.71%	5.29%	5.88%	6.47%	7.06%	7.65%
27.00%	5.48%	6.16%	6.85%	7.53%	8.22%	8.90%
30.00%	5.71%	6.43%	7.14%	7.86%	8.57%	9.29%
35.00%	6.15%	6.92%	7.69%	8.46%	9.23%	10.00%
38.60%	6.51%	7.33%	8.14%	8.96%	9.77%	10.59%

B-1

CALIFORNIA

The following tables show the approximate taxable yields for individuals that are equivalent to tax-free yields under combined federal and California state tax rates, using published 2002 marginal federal tax rates and marginal California tax rates currently available and scheduled to be in effect.

Single Return Bracket	Joint Return Bracket	Federal Tax Rate	State Tax Rate*	Combined Tax Rate*
\$0-6,000	\$0-12,000	10.00%	2.00%	11.80%
6,000-27,950	12,000-46,700	15.00%	6.00%	20.10%
27,950-67,700	46,700-112,850	27.00%	9.30%	33.80%
67,700-141,250	112,850-171,950	30.00%	9.30%	36.50%
141,250-307,050	171,950-307,050	35.00%	9.30%	41.00%
Over 307,050	Over 307,050	38.60%	9.30%	44.30%

4.00%	4.50%	5.00%	5.50%	6.00%	6.50%
4.54%	5.10%	5.67%	6.24%	6.80%	7.37%
5.01%	5.63%	6.26%	6.88%	7.51%	8.14%
6.04%	6.80%	7.55%	8.31%	9.06%	9.82%
6.30%	7.09%	7.87%	8.66%	9.45%	10.24%
6.78%	7.63%	8.47%	9.32%	10.17%	11.02%
7.18%	8.08%	8.98%	9.87%	10.77%	11.67%

* The combined state and federal tax rates shown reflect the fact that state tax payments are currently deductible for federal tax purposes. Please note that the table does not reflect (i) any federal or state limitations on the amounts of allowable itemized deductions, phase-outs of personal or dependent exemption credits or other allowable credits, (ii) any local taxes imposed, or (iii) any alternative minimum taxes or any taxes other than personal income taxes. The table assumes that federal taxable income is equal to state income subject to tax, and in cases where more than one state rate falls within a federal bracket, the highest state rate corresponding to the highest income within that federal bracket is used. The numbers in the Combined Tax Rate column are rounded to the nearest one-tenth of one percent.

APPENDIX C

DESCRIPTION OF INSURERS

Set forth below is information about the various municipal bond insurers with whom the Fund intends to maintain specific insurance policies for particular municipal bonds or policies of portfolio insurance. The information in this Appendix is based on information supplied by the insurers, and the Fund cannot verify its accuracy and completeness.

AMBAC ASSURANCE CORPORATION ("AMBAC ASSURANCE")

Payment Pursuant to Financial Guaranty Insurance Policy

Ambac Assurance has made a commitment to issue a financial guaranty insurance policy (the "Financial Guaranty Insurance Policy") relating to the bonds effective as of the date of issuance of the bonds. Under the terms of the Financial Guaranty Insurance Policy, Ambac Assurance will pay to The Bank of New York, in New York, New York or any successor thereto (the "Insurance Trustee") that portion of the principal of and interest on the bonds which shall become Due for Payment but shall be unpaid by reason of Nonpayment by the Obligor (as such terms are defined in the Financial Guaranty Insurance Policy). Ambac Assurance will make such payments to the Insurance Trustee on the later of the date on which such principal and interest becomes Due for Payment or within one business day following the date on which Ambac Assurance shall have received notice of Nonpayment from the Trustee/Paying Agent. The insurance will extend for the term of the bonds and, once issued, cannot be canceled by Ambac Assurance.

The Financial Guaranty Insurance Policy will insure payment only on stated maturity dates and on mandatory sinking fund installment dates, in the case of principal, and on stated dates for payment, in the case of interest. If the bonds become subject to mandatory redemption and insufficient funds are available for redemption of all outstanding bonds, Ambac Assurance will remain obligated to pay principal of and interest on outstanding bonds on the originally scheduled interest and principal payment dates including mandatory sinking fund redemption dates. In the event of any acceleration of the principal of the bonds, the insured payments will be made at such times and in such amounts as would have been made had there not been an acceleration.

In the event the Bond Registrar has notice that any payment of principal of or interest on a bond which has become Due for Payment and which is made to a Holder by or on behalf of the Obligor has been deemed a preferential transfer and theretofore recovered from its registered owner pursuant to the United States Bankruptcy Code in accordance with a final, nonappealable order of a court of competent jurisdiction, such registered owner will be entitled to payment from Ambac Assurance to the extent of such recovery if sufficient funds are not otherwise available.

The Financial Guaranty Insurance Policy does not insure any risk other than Nonpayment, as defined in the Policy. Specifically, the Financial Guaranty Insurance Policy does not cover:

1. payment on acceleration, as a result of a call for redemption (other than mandatory sinking fund redemption) or as a result of any other advancement of maturity.
2. payment of any redemption, prepayment or acceleration premium.
3. nonpayment of principal or interest caused by the insolvency or negligence of any Trustee or Paying Agent, if any.

If it becomes necessary to call upon the Financial Guaranty Insurance Policy, payment of principal requires surrender of bonds to the Insurance Trustee together with an appropriate instrument of assignment so as to permit ownership of such bonds to be registered in the name of Ambac Assurance to the extent of the payment under the Financial Guaranty Insurance Policy. Payment of interest pursuant to the Financial Guaranty Insurance Policy requires proof of Holder entitlement to interest payments and an appropriate assignment of the Holder's right to payment to Ambac Assurance.

Upon payment of the insurance benefits, Ambac Assurance will become the owner of the bond, appurtenant coupon, if any, or right to payment of principal or interest on such bond and will be fully subrogated to the surrendering Holder's rights to payment.

Ambac Assurance

Ambac Assurance Corporation ("Ambac Assurance") is a Wisconsin-domiciled stock insurance corporation regulated by the Office of the Commissioner of Insurance of the State of Wisconsin and licensed to do business in 50 states, the District of Columbia, the Territory of Guam and the Commonwealth of Puerto Rico, with admitted assets of approximately \$5,587,000,000 (unaudited) and statutory capital of approximately \$3,453,000,000 (unaudited) as of June 30, 2002. Statutory capital consists of Ambac Assurance's policyholders' surplus and statutory contingency reserve. Standard & Poor's Credit Markets Services, a division of The McGraw-Hill Companies, Moody's Investors Service and Fitch, Inc. have each assigned a triple-A financial strength rating to Ambac Assurance. Ambac Assurance has obtained a ruling from the Internal Revenue Service to the effect that the insuring of an obligation to Ambac Assurance will not affect the treatment for federal income tax purposes of interest on such obligation and that insurance proceeds representing maturing interest paid by Ambac Assurance under policy provisions substantially identical to those contained in its municipal bond insurance policy shall be treated for federal income tax purposes in the same manner as if such payments were made by the issuer of the bonds.

Ambac Assurance makes no representation regarding the bonds or the advisability of investing in the bonds and makes no representation regarding, nor has it participated in the preparation of, the Prospectus and Statement of Additional Information, other than the information supplied by Ambac Assurance and presented under this heading "Ambac Assurance Corporation."

Available Information

The parent company of Ambac Assurance, Ambac Financial Group, Inc. (the "Company"), is subject to the informational requirements of the Securities Exchange Act of 1934, as amended (the "Exchange Act"), and in accordance therewith files reports, proxy statements and other information with the Securities and Exchange Commission (the "SEC"). These reports, proxy statements and other information may be inspected and copied at the SEC's public reference facilities at 450 Fifth Street, N.W., Washington, D.C. 20549. Please call the SEC at 1-800-SEC-0330 for further information on the public reference room. The SEC maintains an internet site at <http://www.sec.gov> that contains reports, proxy and information statements and other information regarding companies that file electronically with the SEC, including the Company. In addition, the aforementioned material may also be inspected at the offices of the New York Stock Exchange, Inc. (the "NYSE") at 20 Broad Street, New York, New York 10005.

Copies of Ambac Assurance's financial statements prepared in accordance with statutory accounting standards are available from Ambac Assurance. The address of Ambac Assurance's administrative offices and its telephone number are

One State Street Plaza, 19th Floor, New York, New York 10004 and (212) 668-0340.

FINANCIAL SECURITY ASSURANCE INC. ("FINANCIAL SECURITY")

Bond Insurance Policy

Concurrently with the issuance of the bonds, Financial Security Assurance Inc. ("Financial Security") will issue its Municipal Bond Insurance Policy for the bonds (the "Policy"). The Policy guarantees the scheduled payment of principal of and interest on the bonds when due.

The Policy is not covered by any insurance security or guaranty fund established under New York, California, Connecticut or Florida insurance law.

Financial Security Assurance Inc.

Financial Security is a New York domiciled insurance company and a wholly owned subsidiary of Financial Security Assurance Holdings Ltd. ("Holdings"). Holdings is an indirect subsidiary of Dexia, S.A., a publicly held Belgian corporation. Dexia, S.A., through its bank subsidiaries, is primarily engaged in the business of public finance in France, Belgium and other European countries. No shareholder of Holdings or Financial Security is liable for the obligations of Financial Security.

At June 30, 2002, Financial Security's total policyholders' surplus and contingency reserves were approximately \$1,710,044,000 and its total unearned premium reserve was approximately \$898,579,000 in accordance with statutory accounting principles. At June 30, 2002, Financial Security's total shareholders' equity was approximately \$1,817,013,000 and its total net unearned premium reserve was approximately \$744,499,000 in accordance with generally accepted accounting principles.

The financial statements included as exhibits to the annual and quarterly reports filed by Holdings with the Securities and Exchange Commission are hereby incorporated herein by reference. Also incorporated herein by reference are any such financial statements so filed from the date of this Statement of Additional Information until the termination of the offering of the bonds. Copies of materials incorporated by reference will be provided upon request to Financial Security Assurance Inc.: 350 Park Avenue, New York, New York 10022, Attention: Communications Department (telephone (212) 826-0100).

The policy does not protect investors against changes in market value of the bonds, which market value may be impaired as a result of changes in prevailing interest rates, changes in applicable ratings or other causes. Financial Security makes no representation regarding the bonds or the advisability of investing in the bonds. Financial Security makes no representation regarding the Prospectus or Statement of Additional Information, nor has it participated in the preparation thereof, except that Financial Security has provided to the Fund the information presented under this caption for inclusion in the Statement of Additional Information.

MBIA INSURANCE CORPORATION ("MBIA")

The MBIA Insurance Corporation Insurance Policy

The following information has been furnished by MBIA Insurance Corporation ("MBIA") for use in this Statement of Additional Information.

MBIA's policy unconditionally and irrevocably guarantees the full and complete payment required to be made by or on behalf of the Issuer to the Paying Agent or its successor of an amount equal to (i) the principal of (either at the stated maturity or by an advancement of maturity pursuant to a mandatory sinking fund payment) and interest on, the bonds as such payments shall become due but shall not be so paid (except that in the event of any acceleration of the due date of such principal by reason of mandatory or optional redemption or acceleration resulting from default or otherwise, other than any advancement of maturity pursuant to a mandatory sinking fund payment, the payments guaranteed by MBIA's policy shall be made in such amounts and at such times as such payments of principal would have been due had there not been any such acceleration); and (ii) the reimbursement of any such payment which is subsequently recovered from any owner of the bonds pursuant to a final judgment by a court of competent jurisdiction that such payment constitutes an avoidable preference to such owner within the meaning of any applicable bankruptcy law (a "Preference").

MBIA's policy does not insure against loss of any prepayment premium which may at any time be payable with respect to any bonds. MBIA's policy does not, under any circumstance, insure against loss relating to: (i) optional or mandatory redemptions (other than mandatory sinking fund redemptions); (ii) any payments to be made on an accelerated basis; (iii) payments on the purchase price of bonds upon tender by an owner thereof; or (iv) any Preference relating to (i) through (iii) above. MBIA's policy also does not insure against nonpayment of principal of or interest on the bonds resulting from the insolvency, negligence or any other act or omission of the Paying Agent or any other paying agent for the bonds.

Upon receipt of telephonic or telegraphic notice, such notice subsequently confirmed in writing by registered or certified mail, or upon receipt of written notice by registered or certified mail, by MBIA from the Paying Agent or any owner of a bond the payment of an insured amount for which is then due, that such required payment has not been made, MBIA on the due date of such payment or within one business day after receipt of notice of such nonpayment, whichever is later, will make a deposit of funds, in an account with State Street Bank and Trust Company, N.A., in New York, New York, or its successor, sufficient for the payment of any such insured amounts which are then due. Upon presentment and surrender of such bonds or presentment of such other proof of ownership of the bonds, together with any appropriate instruments of assignment to evidence the assignment of the insured amounts due to the bonds as are paid by MBIA, and appropriate instruments to effect the appointment of MBIA as agent for such owners of the bonds in any legal proceeding related to payment of insured amounts on the bonds, such instruments being in a form satisfactory to State Street Bank and Trust Company, N.A., State Street Bank and Trust Company, N.A. shall disburse to such owners or the Paying Agent payment of the insured amounts due on such bonds, less any amount held by the Paying Agent for the payment of such insured amounts and legally available therefor.

MBIA

MBIA Insurance Corporation ("MBIA") is the principal operating subsidiary of MBIA Inc., a New York Stock Exchange listed company (the "Company"). The Company is not obligated to pay the debts of or claims against MBIA. MBIA is domiciled in the State of New York and licensed to do business in and subject to

regulation under the laws of all 50 states, the District of Columbia, the Commonwealth of Puerto Rico, the Commonwealth of the Northern Mariana Islands, the Virgin Islands of the United States and the Territory of Guam. MBIA has three branches, one in the Republic of France, one in the Republic of Singapore and one in the Kingdom of Spain. New York has laws prescribing minimum capital requirements, limiting classes and concentrations of investments and requiring the approval of policy rates and forms. State laws also regulate the amount of both the aggregate and individual risks that may be insured, the payment of dividends by MBIA, changes in control and transactions among affiliates. Additionally, MBIA is required to maintain contingency reserves on its liabilities in certain amounts and for certain periods of time.

MBIA does not accept any responsibility for the accuracy or completeness of this Prospectus or Statement of Additional Information or any information or disclosure contained herein, or omitted herefrom, other than with respect to the accuracy of the information regarding the policy and MBIA set forth under the heading "MBIA Insurance Corporation". Additionally, MBIA makes no representation regarding the bonds or the advisability of investing in the bonds.

The Financial Guarantee Insurance Policies are not covered by the Property/Casualty Insurance Security Fund specified in Article 76 of the New York Insurance Law.

MBIA Information

The Company files annual, quarterly and special reports, information statements and other information with the SEC under File No. 1-9583. Copies of the SEC filings (including (1) the Company's Annual Report on Form 10-K for the year ended December 31, 2001, and (2) the Company's Quarterly Report on Form 10-Q for the quarter ended June 30, 2002), are available (i) over the Internet at the SEC's web site at <http://www.sec.gov>; (ii) at the SEC's public reference room in Washington D.C.; (iii) over the Internet at the Company's web site at <http://www.mbia.com>; and (iv) at no cost, upon request to MBIA Insurance Corporation, 113 King Street, Armonk, New York 10504. The telephone number of MBIA is (914) 273-4545.

As of December 31, 2001, MBIA had admitted assets of \$8.5 billion (audited), total liabilities of \$5.6 billion (audited), and total capital and surplus of \$2.9 billion (audited) determined in accordance with statutory accounting practices prescribed or permitted by insurance regulatory authorities. As of June 30, 2002, MBIA had admitted assets of \$8.7 billion (unaudited), total liabilities of \$5.7 billion (unaudited), and total capital and surplus of \$3.0 billion (unaudited) determined in accordance with statutory accounting practices prescribed or permitted by insurance regulatory authorities.

Financial Strength Ratings of MBIA

Moody's Investors Service, Inc. rates the financial strength of MBIA "Aaa."

Standard & Poor's, a division of The McGraw-Hill Companies, Inc. rates the financial strength of MBIA "AAA."

Fitch Ratings. rates the financial strength of MBIA "AAA."

Each rating of MBIA should be evaluated independently. The ratings reflect the respective rating agency's current assessment of the creditworthiness of MBIA and its ability to pay claims on its policies of insurance. Any further explanation as to the significance of the above ratings may be obtained only from the applicable rating agency.

The above ratings are not recommendations to buy, sell or hold the bonds,

and such ratings may be subject to revision or withdrawal at any time by the rating agencies. Any downward revision or withdrawal of any of the above ratings may have an adverse effect on the market price of the bonds. MBIA does not guaranty the market price of the bonds nor does it guaranty that the ratings on the bonds will not be revised or withdrawn.

In the event the Insurer were to become insolvent, any claims arising under a policy of financial guaranty insurance are excluded from coverage by the California Insurance Guaranty Association, established pursuant to Article 14.2 (commencing with Section 1063) of Chapter 1 of Part 2 of Division 1 of the California Insurance Code.

C-2

FINANCIAL GUARANTY INSURANCE COMPANY ("FINANCIAL GUARANTY")

Concurrently with the issuance of the Bonds, Financial Guaranty Insurance Company, doing business in California as FGIC Insurance Company ("Financial Guaranty") will issue its Municipal Bond New Issue Insurance Policy (the "Policy") for the Bonds described in the Policy (as used under this heading, the "Bonds"). The Policy unconditionally guarantees the payment of that portion of the principal or accreted value (if applicable) of and interest on the Bonds which has become due for payment, but shall be unpaid by reason of nonpayment by the issuer of the Bonds (the "Issuer"). Financial Guaranty will make such payments to State Street Bank and Trust Company, N.A., or its successor as its agent (the "Fiscal Agent"), on the later of the date on which such principal, accreted value or interest (as applicable) is due or on the business day next following the day on which Financial Guaranty shall have received telephonic or telegraphic notice, subsequently confirmed in writing, or written notice by registered or certified mail, from an owner of Bonds or the Paying Agent of the nonpayment of such amount by the Issuer. The Fiscal Agent will disburse such amount due on any Bond to its owner upon receipt by the Fiscal Agent of evidence satisfactory to the Fiscal Agent of the owner's right to receive payment of the principal, accreted value or interest (as applicable) due for payment and evidence, including any appropriate instruments of assignment, that all of such owner's rights to payment of such principal, accreted value or interest (as applicable) shall be vested in Financial Guaranty. The term "nonpayment" in respect of a Bond includes any payment of principal, accreted value or interest (as applicable) made to an owner of a Bond which has been recovered from such owner pursuant to the United States Bankruptcy Code by a trustee in bankruptcy in accordance with a final, nonappealable order of a court having competent jurisdiction.

C-3

The Policy is non-cancellable and the premium will be fully paid at the time of delivery of the Bonds. The Policy covers failure to pay principal or accreted value (if applicable) of the Bonds on their respective stated maturity dates or dates on which the same shall have been duly called for mandatory sinking fund redemption, and not on any other date on which the Bonds may have been otherwise called for redemption, accelerated or advanced in maturity, and covers the failure to pay an installment of interest on the stated date for its payment.

Generally, in connection with its insurance of an issue of municipal securities, Financial Guaranty requires, among other things, (i) that it be granted the power to exercise any rights granted to the holders of such securities upon the occurrence of an event of default, without the consent of such holders, and that such holders may not exercise such rights without Financial Guaranty's consent, in each case so long as Financial Guaranty has not failed to comply with its payment obligations under its insurance policy; and (ii) that any amendment or supplement to or other modification of the principal legal documents be subject to Financial Guaranty's consent. The specific rights, if any, granted to Financial Guaranty in connection with its insurance of the Bonds are set forth in the prospectus. Reference should be made as well to such description for a discussion of the circumstances, if any, under which the Fund will provide additional or substitute credit enhancement, and related matters.

The Policy is not covered by the Property/Casualty Insurance Security Fund specified in Article 76 of the New York Insurance Law.

C-4

Financial Guaranty is a wholly-owned subsidiary of FGIC Corporation (the "Corporation"), a Delaware holding company. The Corporation is a subsidiary of General Electric Capital Corporation ("GE Capital"). Neither the Corporation nor GE Capital is obligated to pay the debts of or the claims against Financial Guaranty. Financial Guaranty is a monoline financial guaranty insurer domiciled in the State of New York and subject to regulation by the State of New York Insurance Department. As of June 30, 2002, the total capital and surplus of Financial Guaranty was approximately \$1.01 billion. Financial Guaranty prepares financial statements on the basis of both statutory accounting principles and generally accepted accounting principles. Copies of such financial statements may be obtained by writing to Financial Guaranty at 125 Park Avenue, New York, New York 10017, Attention: Communications Department (telephone number: 212-312-3000) or to the New York State Insurance Department at 25 Beaver Street, New York, New York 10004-2319, Attention: Financial Condition Property/Casualty Bureau (telephone number: 212-480-5187).

RATINGS

The above municipal bond insurers have insurance claims-paying ability ratings of AAA from S&P and Aaa from Moody's. Financial Guaranty also has an insurance claims-paying ability rating of AAA from Fitch. An S&P insurance claims-paying ability rating is an assessment of an operating insurance company's financial capacity to meet obligations under an insurance policy in accordance with its terms. An insurer with an insurance claims-paying ability rating of AAA has the highest rating assigned by S&P. Capacity to honor insurance contracts is adjudged by S&P to be extremely strong and highly likely to remain so over a long period of time. A Moody's insurance claims-paying ability rating is an opinion of the ability of an insurance company to repay punctually senior policyholder obligations and claims. An insurer with an insurance claims-paying ability rating of Aaa is adjudged by Moody's to be of the best quality. In the opinion of Moody's, the policy obligations of an insurance company with an insurance claims-paying ability rating of Aaa carry the smallest degree of credit risk and, while the financial strength of these companies is likely to change, such changes as can be visualized are most unlikely to impair the company's fundamentally strong position.

An insurance claims-paying ability rating by S&P or Moody's does not

constitute an opinion on any specific contract in that such an opinion can only be rendered upon the review of the specific insurance contract. Furthermore, an insurance claims-paying ability rating does not take into account deductibles, surrender or cancellation penalties or the timeliness of payment, nor does it address the ability of a company to meet nonpolicy obligations (i.e., debt contracts).

The assignment of ratings by S&P or Moody's to debt issues that are fully or partially supported by insurance policies, contracts or guarantees is a separate process from the determination of claims-paying ability ratings. The likelihood of a timely flow of funds from the insurer to the trustee for the bondholders is a key element in the rating determination for such debt issues.

S&P's and Moody's ratings are not recommendations to buy, sell or hold the municipal bonds insured by policies issued by AMBAC Assurance, Financial Security, MBIA or Financial Guaranty and such ratings may be subject to revision or withdrawal at any time by the rating

C-5

agencies. Any downward revision or withdrawal of either or both ratings may have an adverse effect on the market price of the municipal bonds insured by policies issued by AMBAC Assurance, Financial Security, MBIA or Financial Guaranty.

S&P's ratings of AMBAC Assurance, Financial Security, MBIA and Financial Guaranty should be evaluated independent of Moody's ratings. Any further explanation as to the significance of the ratings may be obtained only from the applicable rating agency. See Appendix A for more information about ratings by Moody's and S&P.

C-6

APPENDIX D

HEDGING STRATEGIES AND RISKS

Set forth below is additional information regarding the various defensive hedging techniques.

Futures and Index Transactions

Financial Futures

A financial future is an agreement between two parties to buy and sell a security for a set price on a future date. They have been designed by boards of trade which have been designated "contracts markets" by the Commodity Futures Trading Commission ("CFTC").

The purchase of financial futures is for the purpose of hedging the Fund's existing or anticipated holdings of long-term debt securities. When the Fund purchases a financial future, it deposits in cash or securities an "initial margin" of between 1% and 5% of the contract amount. Thereafter, the Fund's account is either credited or debited on a daily basis in correlation with the fluctuation in price of the underlying future or other requirements imposed by the exchange in order to maintain an orderly market. The Fund must make additional payments to cover debits to its account and has the right to withdraw credits in excess of the liquidity, the Fund may close out its position at any time prior to expiration of the financial future by taking an opposite position.

At closing a final determination of debits and credits is made, additional cash is paid by or to the Fund to settle the final determination and the Fund realizes a loss or gain depending on whether on a net basis it made or received such payments.

The sale of financial futures is for the purpose of hedging the Fund's existing or anticipated holdings of long-term debt securities. For example, if the Fund owns long-term bonds and interest rates were expected to increase, it might sell financial futures. If interest rates did increase, the value of long-term bonds in the Fund's portfolio would decline, but the value of the Fund's financial futures would be expected to increase at approximately the same rate thereby keeping the net asset value of the Fund from declining as much as it otherwise would have.

Among the risks associated with the use of financial futures by the Fund as a hedging device, perhaps the most significant is the imperfect correlation between movements in the price of the financial futures and movements in the price of the debt securities which are the subject of the hedge.

Thus, if the price of the financial future moves less or more than the price of the securities which are the subject of the hedge, the hedge will not be fully effective. To compensate for this imperfect correlation, the Fund may enter into financial futures in a greater dollar amount than the dollar amount of the securities being hedged if the historical volatility of the prices of such securities has been greater than the historical volatility of the financial futures. Conversely, the Fund may enter into fewer financial futures if the historical volatility of the price of the securities being hedged is less than the historical volatility of the financial futures.

D-1

The market prices of financial futures may also be affected by factors other than interest rates. One of these factors is the possibility that rapid changes in the volume of closing transactions, whether due to volatile markets or movements by speculators, would temporarily distort the normal relationship between the markets in the financial future and the chosen debt securities. In these circumstances as well as in periods of rapid and large price movements. The Fund might find it difficult or impossible to close out a particular transaction.

Options on Financial Futures

The Fund may also purchase put or call options on financial futures which are traded on a U.S. Exchange or board of trade and enter into closing transactions with respect to such options to terminate an existing position. Currently, options can be purchased with respect to financial futures on U.S. Treasury Bonds on The Chicago Board of Trade. The purchase of put options on financial futures is analogous to the purchase of put options by the Fund on its portfolio securities to hedge against the risk of rising interest rates. As with options on debt securities, the holder of an option may terminate his position by selling an option of the Fund. There is no guarantee that such closing transactions can be effected.

Index Contracts

Index Futures

A tax-exempt bond index which assigns relative values to the tax-exempt bonds included in the index is traded on the Chicago Board of Trade. The index fluctuates with changes in the market values of all tax-exempt bonds included

rather than a single bond. An index future is a bilateral agreement pursuant to which two parties agree to take or make delivery of an amount of cash—rather than any security—equal to a specified dollar amount times the difference between the index value at the close of the last trading day of the contract and the price at which the index future was originally written. Thus, an index future is similar to traditional financial futures except that settlement is made in cash.

Index Options

The Fund may also purchase put or call options on U.S. Government or tax-exempt bond index futures and enter into closing transactions with respect to such options to terminate an existing position. Options on index futures are similar to options on debt instruments except that an option on an index future gives the purchaser the right, in return for the premium paid, to assume a position in an index contract rather than an underlying security at a specified exercise price at any time during the period of the option. Upon exercise of the option, the delivery of the futures position by the writer of the option to the holder of the option will be accompanied by delivery of the accumulated balance of the writer's futures margin account which represents the amount by which the market price of the index futures contract, at exercise, is less than the exercise price of the option on the index future.

Bond index futures and options transactions would be subject to risks similar to transactions in financial futures and options thereon as described above. No series will enter into transactions in index or financial futures or related options unless and until, in the Adviser's opinion, the market for such instruments has developed sufficiently.

D-2

APPENDIX E

Factors Pertaining to California

The information set forth below is derived from sources that are generally available to investors. The information is intended to give recent historical description and is not intended to indicate future or continuing trends in the financial or other positions of California. It should be noted that the creditworthiness of obligations issued by local California issuers may be unrelated to the creditworthiness of obligations issued by the State of California, and there is no obligation on the part of the State to make payment on such local obligations in the event of default.

General

During the early 1990's, California experienced significant financial difficulties, which reduced its credit standing, but the State's finances improved significantly starting in 1995. After several years of very strong growth, the State's financial condition started to worsen since the start of 2001, with the combination of a mild economic recession and a dramatic decline in revenue from capital gains and stock option activity resulting from the decline in stock market levels since mid-2000. The State faced a budget gap for its 2002-03 fiscal year of more than \$23 billion, over 25% of its General Fund revenue. The 2002-03 Budget Act was not adopted until September 5, 2002, more than two months into the fiscal year. Additional multi-billion dollar budget gaps are predicted in the coming years. See "Recent Financial Results--Fiscal year 2002-03 Budget" below. The ratings of certain related debt of other issuers for which California has an outstanding lease purchase, guarantee or other

contractual obligation (such as for state-insured hospital bonds) are generally linked directly to California's rating. Should the financial condition of California deteriorate further, its credit ratings could be reduced, and the market value and marketability of all outstanding notes and bonds issued by California, its public authorities or local governments could be adversely affected.

Economic Factors

General

California's economy is the largest among the 50 states and one of the largest in the world. The State's population of over 35 million represents about 12-1/2% of the total United States population and grew by 26% in the 1980s, more than double the national rate. Population growth slowed to less than 1% annually in 1994 and 1995, but rose to almost 2% in the final years of the 1990's. The bulk of population growth in the State is due to births and foreign immigration.

Total personal income in the State, at an estimated \$1,116 billion in 2001, accounts for almost 13% of all personal income in the nation. Total employment is over 16 million, the majority of which is in the service, trade and manufacturing sectors.

Following a severe recession in the early 1990's, California began a period of strong growth in 1994 in virtually all sectors, particularly in high technology manufacturing and services, including computer software and other services, entertainment, tourism, and construction, and also with very strong growth in exports. The California economy outpaced the nation during this period. By the end of 2000, unemployment in the State had dropped to under 5%, its lowest level in three decades. In 2001 the State finally showed the impact of the nationwide economic slowdown, coupled with a cyclical downturn in the high technology sector (including Internet-related businesses) and entered a mild recession, with unemployment rising above 6%. International trade also slowed since the start of 2001 reflecting weakness in overseas economies (particularly in Asia). The terrorist attacks on September 11, 2001 resulted in a further, temporary economic decline in tourism-based areas, but this effect appears to have ended by the spring of 2002. Modest job growth appears to have begun by early 2002, but employment results since the summer of 2002 have fluctuated month to month from small gains to small losses, and the State Department of Finance described the State economy as "on a flat trajectory" as of

E-1

October, 2002. The largest gains have been in government and retail and wholesale trade; manufacturing and construction continue to lose jobs. California's economy is expected to continue a mild recovery in 2002 and 2003, although the overall effects of the weak national economic picture on the State are not yet clear. The recession, combined particularly with the decline in the stock markets since mid-2000, will result in much weaker State revenues than previously projected, as discussed further below under "Recent Financial Results."

Widely publicized difficulties in California's energy supplies had been seen in early 2001 to pose some risks to the economy, but during the summers of 2001 and 2002 there were no electricity blackouts or shortages of natural gas. Although energy prices have risen from the levels of three years ago, they have now appeared to have stabilized. Energy difficulties are mitigated by the fact

that California's economy is very energy-efficient. U.S. Department of Energy statistics for 1999 revealed that California ranked 50th of the 50 states in energy expenditures as a percentage of state domestic product. A number of investigations and lawsuits are ongoing against energy suppliers seeking refunds for California customers for alleged overcharges during the crisis period in 2000 and 2001.

Recent Developments Regarding Energy

From mid-2000 through early 2001, the State faced occasional shortages of electricity and dramatic increases in the spot market price for electricity, as a result of many complex factors deriving generally from a deregulation plan implemented in 1997. Natural gas prices also rose significantly. The three major investor-owned utilities in the State ("IOUs") purchased electricity to meet their needs above their own generating capacity and contracted supplies at fluctuating short-term and spot market rates, which rose sharply, while the retail prices they could charge their residential and small business customers were capped at specified levels under the deregulation plan. By early January, 2001, the two largest IOUs had exhausted their cash reserves and could no longer purchase electricity in the spot market.

The Governor declared a state of emergency under State law on January 17, 2001, and ordered the State's Department of Water Resources ("DWR") to begin purchasing electricity for resale to retail end use customers, to fill the gap in supplies resulting from the inability of the IOUs to continue to purchase power. DWR's purchases were initially funded primarily by unsecured, interest-bearing loans from the State's General Fund ("State Loans"), which ultimately totaled \$6.1 billion. In order to repay this loan, as well as loans from private financial institutions, the DWR issued \$11 billion of power revenue bonds in November, 2002. As of mid-November, 2002, the DWR had repaid the General Fund in full, with interest, in the total amount of \$6.5 billion. The DWR revenue bonds will be repaid from a dedicated revenue stream derived from customer payments; they will not be backed in any way by the faith and credit or taxing power of the State.

E-2

E-3

Constitutional Limitations on Taxes, Other Charges and Appropriations

Limitation on Property Taxes. Certain California Municipal Obligations may be obligations of issuers which rely in whole or in part, directly or indirectly, on ad valorem property taxes as a source of revenue. The taxing powers of California local governments and districts are limited by Article XIII A of the California Constitution, enacted by the voters in 1978 and commonly known as "Proposition 13." Briefly, Article XIII A limits the rate of ad valorem property taxes to 1% of full cash value of real property and generally restricts the reassessment of property to 2% per year, except upon new construction or change of ownership (subject to a number of exemptions). Taxing entities may, however, raise ad valorem taxes above the 1% limit to pay debt service on voter-approved bonded indebtedness.

Under Article XIII A, the basic 1% ad valorem tax levy is applied against the assessed value of property as of the owner's date of acquisition (or as of March 1, 1975, if acquired earlier), subject to certain adjustments. This system has resulted in widely varying amounts of tax on similarly situated properties. Several lawsuits were filed challenging the acquisition-based assessment system of Proposition 13, but it was upheld by the U.S. Supreme Court in 1992.

Article XIII A prohibits local governments from raising revenues through ad valorem taxes above the 1% limit; it also requires voters of any governmental unit to give two-thirds approval to levy any "special tax."

Limitations on Other Taxes, Fees and Charges. On November 5, 1996, the voters of the State approved Proposition 218, called the "Right to Vote on Taxes Act." Proposition 218 added Articles XIII C and XIII D to the State Constitution, which contain a number of provisions affecting the ability of local agencies to levy and collect both existing and future taxes, assessments, fees and charges.

Article XIII C requires that all new or increased local taxes be submitted to the electorate before they become effective. Taxes for general governmental purposes require a majority vote and taxes for specific purposes require a two-thirds vote.

Article XIII D contains several new provisions making it generally more difficult for local agencies to levy and maintain "assessments" for municipal services and programs. Article XIII D also contains several new provisions affecting "fees" and "charges", defined for purposes of Article XIII D to mean "any levy other than an ad valorem tax, a special tax, or an assessment, imposed by a [local government] upon a parcel or upon a person as an incident of property ownership, including a user fee or charge for a property related service." All new and existing property related fees and charges must conform to requirements prohibiting, among other things, fees and charges which generate revenues exceeding the funds required to provide the property related service or are used for unrelated purposes. There are new notice, hearing and protest procedures for levying or increasing property related fees and charges, and, except for fees or charges for sewer, water and refuse collection services (or fees for electrical and gas service,

E-4

which are not treated as "property related" for purposes of Article XIII D), no property related fee or charge may be imposed or increased without majority approval by the property owners subject to the fee or charge or, at the option of the local agency, two-thirds voter approval by the electorate residing in the affected area.

In addition to the provisions described above, Article XIII C removes limitations on the initiative power in matters of local taxes, assessments, fees and charges. Consequently, local voters could, by future initiative, repeal, reduce or prohibit the future imposition or increase of any local tax, assessment, fee or charge. It is unclear how this right of local initiative may be used in cases where taxes or charges have been or will be specifically pledged to secure debt issues.

The interpretation and application of Proposition 218 will ultimately be determined by the courts with respect to a number of matters, and it is not possible at this time to predict with certainty the outcome of such determinations.

Appropriations Limits. The State and its local governments are subject to an annual "appropriations limit" imposed by Article XIII B of the California Constitution, enacted by the voters in 1979 and significantly amended by Propositions 98 and 111 in 1988 and 1990, respectively. Article XIII B prohibits the State or any covered local government from spending "appropriations subject to limitation" in excess of the appropriations limit imposed. "Appropriations subject to limitation" are authorizations to spend "proceeds of taxes," which consist of tax revenues and certain other funds, including proceeds from regulatory licenses, user charges or other fees, to the extent that such proceeds exceed the cost of providing the product or service, but "proceeds of taxes" exclude most State subventions to local governments. No limit is imposed on appropriations of funds which are not "proceeds of taxes," such as reasonable user charges or fees, and certain other non-tax funds, including bond proceeds.

Among the expenditures not included in the Article XIII B appropriations limit are (1) the debt service cost of bonds issued or authorized prior to January 1, 1979, or subsequently authorized by the voters, (2) appropriations to comply with mandates of courts or the federal government, (3) appropriations for certain capital outlay projects, (4) appropriations by the State of post-1989 increases in gasoline taxes and vehicle weight fees, and (5) appropriations made in certain cases of emergency.

The appropriations limit for each year is adjusted annually to reflect changes in cost of living and population, and any transfers of service responsibilities between government units. The definitions for such adjustments were liberalized in 1990 to follow more closely growth in the State's economy.

"Excess" revenues are measured over a two year cycle. Local governments must return any excess to taxpayers by rate reductions. The State must refund 50% of any excess, with the other 50% paid to schools and community colleges. With more liberal annual adjustment factors since 1988, and depressed revenues in the early 1990's because of the recession, few governments have been operating near their spending limits, but this condition may change over time. Local governments may by voter approval exceed their spending limits for up to four years. Because of extraordinary revenue receipts in fiscal year 1999-2000, State appropriations were estimated to be about \$975 million above the limit. However, since the State was \$2.1 billion below its

E-5

limit in fiscal year 2000-01, resulting in no excess over the two-year period, no refunds were made. 1999-2000 was the only fiscal year since the late 1980's when State appropriations were above the limit. The State Department of Finance estimates the State will be about \$16.5 billion below its appropriation limit in fiscal year 2001-02 and \$10.6 billion under the limit in 2002-03.

Because of the complex nature of Articles XIII A, XIII B, XIII C and XIII D of the California Constitution, the ambiguities and possible inconsistencies in their terms, and the impossibility of predicting future appropriations or changes in population and cost of living, and the probability of continuing legal challenges, it is not currently possible to determine fully the impact of these Articles on California municipal obligations or on the ability of the State or local governments to pay debt service on such California municipal obligations. It is not possible, at the present time, to predict the outcome of any pending litigation with respect to the ultimate scope, impact or constitutionality of these Articles or the impact of any such determinations upon State agencies or local governments, or upon their ability to pay debt service on their obligations. Further initiatives or legislative changes in laws

or the California Constitution may also affect the ability of the State or local issuers to repay their obligations.

Obligations of the State of California

Under the California Constitution, debt service on outstanding general obligation bonds is the second charge to the General Fund after support of the public school system and public institutions of higher education. As of October 1, 2002, the State had outstanding approximately \$25.2 billion of long-term general obligation bonds, plus \$846 million of general obligation commercial paper notes and \$6.3 billion of lease-purchase debt supported by the State General Fund. In October, the State issued an additional \$800 million of long-term general obligation bonds which primarily retired commercial paper notes. As of October 1, the State also had about \$15.5 billion of authorized and unissued long-term general obligation bonds and lease-purchase debt. In FY 2001-02, debt service on general obligation bonds and lease purchase debt was approximately 4.5% of General Fund revenues. State voters approved \$2.8 billion of new general bond authorizations on the ballot in March, 2002. About \$18.6 billion in new bond authorizations were approved by the voters in November, 2002, and at least another \$22 billion, for education and high-speed rail construction, will be on the ballot in 2004.

Recent Financial Results

The principal sources of General Fund tax revenues in 2000-01 were the California personal income tax (59 percent of total tax revenues), the sales tax (28 percent), corporation taxes (9 percent), and the gross premium tax on insurance (2 percent). Preliminary estimates for 2000-01 indicate that almost 25% of total General Fund tax revenue was derived from capital gains realizations and stock option income. While these sources have been extraordinarily strong in the past few years, they are particularly volatile. In preparing the 2001-02 budget, the State took account of the recent drop in stock market levels and reduced its estimated receipts from these revenues as compared to the prior year. However, with continued weak stock market levels into 2002 it is now clear that revenue from capital gains and stock options will fall below projections. Indeed, the Administration has projected that this source of revenue will drop from 25% of all General Fund revenues in 2000-01 to 11% in 2001-02 and 9% in 2002-03; this represents the bulk of the total General Fund revenue shortfall in these two fiscal years.

E-6

The State maintains a Special Fund for Economic Uncertainties (the "SFEU"), derived from General Fund revenues, as a reserve to meet cash needs of the General Fund, but which is required to be replenished as soon as sufficient revenues are available. Year-end balances in the SFEU are included for financial reporting purposes in the General Fund balance.

Throughout the 1980's, State spending increased rapidly as the State population and economy also grew rapidly, including increased spending for many assistance programs to local governments, which were constrained by Proposition 13 and other laws. The largest State program is assistance to local public school districts. In 1988, an initiative (Proposition 98) was enacted which (subject to suspension by a two-thirds vote of the Legislature and the Governor) guarantees local school districts and community college districts a minimum share of State General Fund revenues (currently about 35 percent).

Recent Budgets.

The economy, and especially the stock markets, grew strongly during the second half of the 1990's, and as a result, the General Fund took in substantially greater tax revenues (an aggregate of about \$7.9 billion over the four years 1995-96 through 1998-99, \$8.2 billion in 1999-2000 and \$4.1 billion in 2000-01) than were initially planned when the budgets were enacted. These additional funds were largely directed to school spending as mandated by Proposition 98, and to make up shortfalls from reduced federal health and welfare aid in 1995-96 and 1996-97. In 1998-99 through 2000-01, new spending programs were also enacted, particularly for education, new capital outlay projects were funded from current receipts, and significant tax reductions were enacted. The Department of Finance estimates that the State's budget reserve (the SFEU) totaled \$8.7 billion at June 30, 2000 and \$6.3 billion at June 30, 2001. However, the SFEU balance at June 30, 2001 included as an asset the \$6.1 billion loan to the DWR for power purchases (see "Recent Developments Regarding Energy" above), and the General Fund's available cash at that date was considerably less.

The growth in General Fund revenues since 1994-95 resulted in significant increases in State funding for local school districts under Proposition 98. From the 1994-95 level of about \$4,200 per pupil, annual State funding has increased to over \$7,000 per pupil in FY 2001-02. A significant amount of the new moneys have been directed to specific educational reforms, including reduction of class sizes in many grade levels. The improved budget condition also allowed annual increases in support for higher education in the State, permitting increased enrollment and reduction of student fees.

Part of the 1997-98 Budget Act was completion of State welfare reform legislation to implement the new federal law passed in 1996. The new State program, called "CalWORKs," became effective January 1, 1998, and emphasizes programs to bring aid recipients into the workforce. As required by federal law, new time limits are placed on receipt of welfare aid. Generally, health and welfare costs have been contained even during the recent period of economic recovery, with the first real increases (after inflation) in welfare support levels occurring in 1999-2000 and additional increases in 2000-01.

An important element of recent Budget Acts was agreement on substantial tax cuts. The largest of these was a phased-in cut in the Vehicle License Fee (an annual tax on the value of cars

E-7

registered in the State, the "VLF"). Starting on January 1, 1999, the VLF was reduced by 25 percent, which was increased to a 35% reduction effective January 1, 2000 and a 67.5% reduction effective January 1, 2001. Under pre-existing law, VLF funds are automatically transferred to cities and counties, so the new legislation provided for the General Fund to make up the reductions. The full 67.5 percent VLF cut was offset by about \$2.6 billion from the General Fund in FY 2000-01, and \$3.6 billion in FY 2001-02. Other miscellaneous business and personal tax cuts and tax credits were of a much smaller overall amount. Finally, because the SFEU balance was more than 4% of General Fund revenues for two consecutive years, the State reduced its sales tax by 0.25% for one year, starting January 1, 2001 (pursuant to an existing statutory formula). This resulted in about \$1.15 billion in lower revenues during calendar year 2001. The 0.25% rate was restored as of January 1, 2002, as the SFEU balance fell below 4%.

Fiscal Year 2001-02 Budget.

The 2001-02 Budget Act (the "2001 Budget Act") was signed on July 26, 2001. The 2001 Budget Act included \$78.8 billion in General Fund expenditures, a reduction of \$1.3 billion from the previous year. General Fund revenues in fiscal year 2001-02 were projected to drop to \$75.1 billion, a decline of almost 4 percent from the prior year, reflecting the economic slowdown and the sharp drop in capital gains and stock option revenue. The excess of expenditures over revenues was to be funded by using a part of the budget reserve from the prior year, and assumed that the General Fund would be repaid in full for advances made to purchase energy (see "Recent Developments Regarding Energy" above). The State sold a record \$5.7 billion in revenue anticipation notes ("RANs") for the 2001-02 fiscal year, to offset cash flow shortfalls during the fiscal year, as part of the State's normal, annual cash management program. The State's cash position has been adversely affected by the \$6.1 billion advances made by the General Fund to pay for electricity purchases in the first half of 2001.

The 2001 Budget Act provided full funding for K-14 education, and certain additional funding for low-performing schools, child care and other programs. Funding for higher education were increased, but less than in previous years. No fee increases for higher education were imposed. Health care, social services and prisons were funded for all expected caseload and inflation increases. Assistance to local governments was reduced from the previous year.

The 2001 Budget Act was projected to be able to sustain the reduced revenues without major program reductions because a large part of the 2000-01 Budget Act was for one-time spending, which did not have to be continued. The 2001 Budget Act contained much less one-time spending for capital outlay. The 2001 Budget Act also extended for two years the six-year transportation funding program implemented in 2000-01, and used a total of \$2.3 billion of those funds for General Fund purposes in 2001-02 and 2002-03, to be repaid in 2006-08. The shortfall in funding will be made up by temporary loans from other transportation accounts, so that it is not expected any projects will be delayed. Part of a compromise to permit this deferral was agreement to place a constitutional amendment on the next statewide ballot to permanently dedicate all sales taxes on gasoline and related fuels to transportation programs. This amendment was approved in March, 2002.

General Fund revenues in 2001-02 ultimately proved to be far below projections, totaling only about \$66 billion (compared to the 2001-02 Budget Act estimate of around \$75 billion), largely

E-8

due to reduced capital gains realizations and weaker economic activity. To partially offset this reduction, the Governor proposed, and the Legislature approved, mid-year spending cuts for 2001-02 totaling \$2.3 billion. With the failure of the DWR to sell its energy revenue bonds by June 30, 2002 to reimburse the General Fund, the State's cash position became more critical as the fiscal year ended, and the State Controller issued \$7.5 billion of "revenue anticipation warrants" or "RAWs" in June, 2002, to mature in three tranches between October 27, 2002 and January 30, 2003. The RAWs assured the State could pay its obligations coming due in June 2002 (including the \$5.7 billion RAN) and into the start of the next fiscal year. The State ultimately ended the 2001-02 fiscal year with about \$10 billion of available cash resources, including the RAW proceeds.

Fiscal Year 2002-03 Budget

The 2002-03 Budget Act was finally enacted by the Legislature and signed by the Governor on September 5, 2002, more than two months into the fiscal year. Despite delay in approval of the Budget Act, most State operations continued based on continuing appropriation legislation, constitutional requirements or court orders. Debt service on State debt was paid, most health and welfare programs and education payments were funded, and State employees, other than elected officials and senior management employees, were paid.

The 2002 Budget Act closed a \$23.6 billion gap between expenditures and resources through a combination of program reductions, loans, fund shifts, accelerations and transfers, and modest tax changes:

1. Program cost savings in the 2001-02 and 2002-03 fiscal years totaling about \$7.458 billion. This includes the proposals made by the Governor in November 2001, which were substantially enacted by the Legislature. The largest savings occurred in education, health, social services and State operations, and include deferral or elimination of previously enacted program expansions and elimination of workload and cost of living adjustments in numerous programs. The cost savings include \$750 million in unallocated reductions to State operations, which the Administration must still implement; additional legislative action may be required for some of these savings. The reductions also include a projected saving of \$285 million from early retirement incentives and \$75 million from the elimination of vacant positions. As of mid-November, it appears some of these savings will not be achieved, including those expected from the early retirement program.

2. The receipt of \$4.5 billion in 2002-03 from the securitization (sale) of a large portion of the State's future receipt of payment from tobacco companies from the settlement of litigation against those companies. This sale is scheduled to close in two segments, with \$2.25 billion in February 2003 and \$2.25 billion in April 2003.

3. A total of \$2.028 billion in loans from various funds, including \$1.218 billion from transportation funds.

4. The shift of \$1.328 billion of expenditures from the General Fund to other funding sources, such as special funds and proposed future bond funds.

E-9

5. The receipt of \$1.2 billion additional revenues in 2002-03 from a two-year suspension of the deductibility of net operating losses provided in current law.

6. General Fund savings of \$1.728 billion from the deferral of \$1.047 billion of education expenditures from 2001-02 to early 2002-03 and \$681 million of education expenditures from 2002-03 to early 2003-04. These deferrals are not expected to significantly impact underlying programs.

7. General Fund savings of \$1.083 billion (\$223 million in 2001-02 and \$860 million in 2002-03) from the Treasurer's Debt Restructuring Plan to amortize the State's long-term debt to more closely approximate level annual debt service costs rather than the level annual principal. The plan also includes the issuance of refunding debt to pay selected maturities of general obligation bonds due between February 2002 and June 2004.

8. Anticipated increases in federal funding for health and human services

programs, security/bioterrorism and other areas totaling about \$1.081 billion. There can be no assurance whether these funds will be approved.

9. Additional revenue of \$1.651 billion in 2002-03 due to Federal Tax Conformity and Tax Compliance (\$1.081 billion); increasing the withholding on stock option and bonus income from 6 percent to 9.3 percent (\$400 million); and suspending the teacher retention credit for one year (\$170 million). Federal Tax Conformity and Tax Compliance includes revenue generated from the following: (a) the conformity of California tax law with federal tax law regarding accounting for bad debt reserves for large banks, (b) the pension and individual retirement account conformity package included in the Governor's Budget, which was passed by the Legislature and signed by the Governor on May 8, 2002, (c) waiving penalties and interest on delinquent accounts, (d) increasing collections activities, (e) ensuring proper auditing of tax credits and (f) improving the effectiveness of the tax protest and settlement programs.

10. Accelerations and transfers from other funds to the General Fund totaling \$1.585 billion.

Despite the challenge represented by the severe revenue decline and the budget gap, the 2002 Budget contains the following major components:

1. Total K-12 spending increases 2.8 percent from the revised 2001-02 estimates. Total K-12 spending per pupil increases from \$6,610 in 2001-02 to \$7,067 in 2002-03.

2. Funding for higher education decreases by a modest 0.2 percent in 2002-03 compared to the revised 2001-02 estimates. Despite this decrease, the 2002 Budget fully funds enrollment increases at the University of California, California State University and the Community Colleges. The 2002 Budget continues funding for a new University of California campus in Merced.

3. The Budget includes \$308 million for local public safety programs, including the Citizens' Option for Public Safety, juvenile justice crime prevention, high technology law enforcement, rural and small county law enforcement, and booking fees.

E-10

4. The Budget continues to limit the growth in State government with the elimination of positions and the reduction of State operations expenditures. In addition to the 6,600 positions eliminated by the Administration since 1999, 7,000 State government positions will be eliminated (6,000 in 2002-03 and 1,000 by June 30, 2004). The first priority for elimination in each department will be vacant positions not required to maintain critical public health and safety functions. A process will be established for the elimination of filled positions in accordance with State laws, regulations and Memoranda of Understanding with represented employees. The Budget also reduces State operations expenditures by as much as an additional \$750 million in 2002-03.

5. Although funding for youth and adult corrections decreases by 4.7 percent from the previous year, the Budget sustains funding for public safety. While total funding for health and human services decreases by 2.1 percent, the Budget funds health insurance coverage for children and critical care programs for seniors.

6. There were no significant tax increases, and no significant reductions

in support for local governments. A one-time shift of \$75 million in property taxes from redevelopment agencies to schools will reduce State aid to schools by a like amount.

The May Revision assumed that the State would meet its cash flow requirements in 2002-03 by a combination of the issuance of about \$7 billion of revenue anticipation notes in the fall of 2002, and reimbursement of the General Fund for energy loans by October 2002. In addition, proceeds of the securitization of future tobacco litigation settlement payments are assumed in early 2003. Because of weaker receipts, delay in enactment of the budget, and uncertainty about the schedule for issuance of the DWR power revenue bonds, in September, 2002 the State Controller determined that it was prudent to issue \$12.5 billion of revenue anticipation notes ("RANs") for cash management purposes in the 2002-03 fiscal year. This borrowing was completed, in two parts, by early November, 2002. The successful sale of the DWR power revenue bonds has provided an infusion of \$6.5 billion to the General Fund, which was a significant assumption in the State's cash flow projections for repayment of the 2002-03 RANs. However, if for any reason the \$4.5 billion tobacco securitization bonds are delayed substantially, or other factors reduce revenues or increase expenditures, and the State faces a further cash flow shortfall, the State Controller can issue additional revenue anticipation warrants as was done in June 2002.

Since the start of the 2002-03 fiscal year, tax revenues have been below projections. The Controller reports that tax receipts for July through September 2002 were about \$715 million, or 4.6 percent, below the June 2002 cash flow projections that were based on the revenue projections in May 2002. For the period from June through September, receipts from the three largest tax sources (personal income tax, sales tax and corporation tax) were about \$948 million below projections.

Legislative Analyst's Report of November, 2002

In mid-November, 2002, the Legislative Analyst (an independent office under the State Legislature) issued a report indicating the State faced dire fiscal conditions. The principal causes of the continuing fiscal difficulty were identified as (i) the use of so many one-time budget solutions, such as bond sales, interfund borrowings and deferrals, to solve the \$23.6 billion gap in the 2002-03 Budget, without enough emphasis on closing the structural imbalance between ongoing revenue sources (taxes) and ongoing expenditure commitments, (ii) the likelihood that some of the assumptions in the 2002-03 Budget would not be met, and (iii) a significant downward revision in revenue estimates deriving from the continued sluggishness of the State economy and stock market. The Legislative Analyst's report estimated that items (i) and (ii) above would result in a cumulative \$10 billion gap between revenues and expenditures (absent further actions) by the end of the 2003-04 fiscal year. The report further estimated that item (iii) would result in reduced revenues of over \$11 billion for the 2002-03 and 2003-04 fiscal years combined, as compared to earlier estimates.

The Legislative Analyst's report predicted the State General Fund would have a deficit of about \$6.1 billion by the end of the 2002-03 fiscal year (compared to the 2002-03 Budget which predicted a reserve balance of \$1 billion). Absent corrective action, the cumulative deficit could reach \$21 billion by the end of the 2003-04 fiscal year. Furthermore, even given accelerating economic growth in 2003 and beyond (which is not assured), there would, unless corrective actions were taken, continue to be a substantial deficit between revenues and expenditures, in a potential range from \$12-16 billion annually, for years after 2003-04.

Bond Rating

The ratings on California's long-term general obligation bonds were reduced in the early 1990's from "AAA" levels which had existed prior to the recession. After 1996, through the end of 2000, the three major rating agencies raised their ratings of California's general obligation bonds as high as "AA" from Standard & Poor's, "Aa2" from Moody's and "AA" from Fitch. As of October 1, 2002, Standard & Poor's had reduced California's senior ratings to "A+" and Moody's had reduced its ratings to "A1" and both agencies maintained the State's credit ratings on watch with negative implications. As of that date, Fitch had placed California's ratings on watch with negative implications. These ratings were, however, reconfirmed in October, 2002.

There can be no assurance that current ratings will be maintained in the future. It should be noted that the creditworthiness of obligations issued by local California issuers may be unrelated to creditworthiness of obligations issued by the State of California, and that there is no obligation on the part of the State to make payment on such local obligations in the event of default.

Legal Proceedings

The State is involved in certain legal proceedings (described in the State's recent financial statements) that, if decided against the State, may require the State to make significant future expenditures or may substantially impair revenues. If the State eventually loses any of these cases, the final remedies may not have to be implemented in one year.

Obligations of Other Issuers

Other Issuers of California Municipal Obligations. There are a number of State agencies, instrumentalities and political subdivisions of the State that issue Municipal Obligations, some of which may be conduit revenue obligations payable from payments from private borrowers. These entities are subject to various economic risks and uncertainties, and the credit quality of the securities issued by them may vary considerably from the credit quality of obligations backed by the full faith and credit of the State.

State Assistance. Property tax revenues received by local governments declined more than 50% following passage of Proposition 13. Subsequently, the California Legislature enacted measures to provide for the redistribution of the State's General Fund surplus to local agencies, the reallocation of certain State revenues to local agencies and the assumption of certain governmental functions by the State to assist municipal issuers to raise revenues. Total local assistance from the State's General Fund was budgeted at approximately 75% of General Fund expenditures in recent years, including the effect of implementing reductions in certain aid programs. To reduce State General Fund support for school districts, the 1992-93 and 1993-94 Budget Acts caused local governments to transfer \$3.9 billion of property tax revenues to school districts, representing loss of the post-Proposition 13 "bailout" aid. Local governments have in return received greater revenues and greater flexibility to operate health and welfare programs.

In 1997, a new program provided for the State to substantially take over funding for local trial courts (saving cities and counties some \$400 million annually). For 2001-02, the State has provided over \$350 million to support local law enforcement costs. The current fiscal crisis may result in some reductions in these payments in 2002-03.

To the extent the State should be constrained by its Article XIII B appropriations limit, or its obligation to conform to Proposition 98, or other fiscal considerations, the absolute level, or the rate of growth, of State assistance to local governments may continue to be reduced. Any such reductions in State aid could compound the serious fiscal constraints already experienced by many local governments, particularly counties. Los Angeles County, the largest in the State, was forced to make significant cuts in services and personnel, particularly in the health care system, in order to balance its budget in FY1995-96 and FY1996-97. Orange County, which emerged from Federal Bankruptcy Court protection in June 1996, has significantly reduced county services and personnel, and faces strict financial conditions following large investment fund losses in 1994 which resulted in bankruptcy. The recent economic slowdown in the State, with its corresponding reduction in State and local revenues, will put additional pressure on local government finances in the coming years. See "Recent Financial Results -- Legislative Analyst's Report of November, 2002"

Counties and cities may face further budgetary pressures as a result of changes in welfare and public assistance programs, which were enacted in August, 1997 in order to comply with the federal welfare reform law. Generally, counties play a large role in the new system, and are given substantial flexibility to develop and administer programs to bring aid recipients into the workforce. Counties are also given financial incentives if either at the county or statewide level, the "Welfare-to-Work" programs exceed minimum targets; counties are also subject to financial penalties for failure to meet such targets. Counties remain responsible to provide "general assistance" for able-bodied indigents who are ineligible for other welfare programs. The long-term financial impact of the new CalWORKs system on local governments is still unknown.

Assessment Bonds. California Municipal Obligations which are assessment bonds may be adversely affected by a general decline in real estate values or a slowdown in real estate sales activity. In many cases, such bonds are secured by land which is undeveloped at the time of issuance but anticipated to be developed within a few years after issuance. In the event of such reduction or slowdown, such development may not occur or may be delayed, thereby increasing the risk of a default on the bonds. Because the special assessments or taxes securing these bonds are not the personal liability of the owners of the property assessed, the lien on the property is the only security for the bonds. Moreover, in most cases the issuer of these bonds is not required to make payments on the bonds in the event of delinquency in the payment of assessments or taxes, except from amounts, if any, in a reserve fund established for the bonds.

California Long Term Lease Obligations. Based on a series of court decisions, certain long-term lease obligations, though typically payable from the general fund of the State or a municipality, are not considered "indebtedness" requiring voter approval. Such leases, however, are subject to "abatement" in the event the facility being leased is unavailable for beneficial use and occupancy by the municipality during the term of the lease. Abatement is not a default, and there may be no remedies available to the holders of the certificates evidencing the lease obligation in the event abatement occurs. The most common cases of abatement are failure to complete construction of the facility before the end of the period during which lease payments have been

capitalized and

E-13

uninsured casualty losses to the facility (e.g., due to earthquake). In the event abatement occurs with respect to a lease obligation, lease payments may be interrupted (if all available insurance proceeds and reserves are exhausted) and the certificates may not be paid when due. Although litigation is brought from time to time which challenges the constitutionality of such lease arrangements, the California Supreme Court issued a ruling in August, 1998 which reconfirmed the legality of these financing methods.

Other Considerations

The repayment of industrial development securities secured by real property may be affected by California laws limiting foreclosure rights of creditors. Securities backed by health care and hospital revenues may be affected by changes in State regulations governing cost reimbursements to health care providers under Medi-Cal (the State's Medicaid program), including risks related to the policy of awarding exclusive contracts to certain hospitals.

Limitations on ad valorem property taxes may particularly affect "tax allocation" bonds issued by California redevelopment agencies. Such bonds are secured solely by the increase in assessed valuation of a redevelopment project area after the start of redevelopment activity. In the event that assessed values in the redevelopment project decline (e.g., because of a major natural disaster such as an earthquake), the tax increment revenue may be insufficient to make principal and interest payments on these bonds. Both Moody's and S&P suspended ratings on California tax allocation bonds after the enactment of Articles XIIIIA and XIIIIB, and only resumed such ratings on a selective basis.

Proposition 87, approved by California voters in 1988, requires that all revenues produced by a tax rate increase go directly to the taxing entity which increased such tax rate to repay that entity's general obligation indebtedness. As a result, redevelopment agencies (which, typically, are the issuers of tax allocation securities) no longer receive an increase in tax increment when taxes on property in the project area are increased to repay voter-approved bonded indebtedness.

The effect of these various constitutional and statutory changes upon the ability of California municipal securities issuers to pay interest and principal on their obligations remains unclear. Furthermore, other measures affecting the taxing or spending authority of California or its political subdivisions may be approved or enacted in the future. Legislation has been or may be introduced which would modify existing taxes or other revenue-raising measures or which either would further limit or, alternatively, would increase the abilities of state and local governments to impose new taxes or increase existing taxes. It is not possible, at present, to predict the extent to which any such legislation will be enacted. Nor is it possible, at present, to determine the impact of any such legislation on California Municipal Obligations in which the Fund may invest, future allocations of state revenues to local governments or the abilities of state or local governments to pay the interest on, or repay the principal of, such California Municipal Obligations.

Substantially all of California is within an active geologic region subject to major seismic activity. Northern California in 1989 and Southern California in 1994 experienced major earthquakes causing billions of dollars in damages. The federal government provided more than \$13 billion in aid for both earthquakes, and neither event has had any long-term negative economic impact.

Any California Municipal Obligation in the Fund could be affected by an interruption of revenues because of damaged facilities, or, consequently, income tax deductions for casualty losses or property tax assessment reductions. Compensatory financial assistance could be constrained by the inability of (i) an issuer to have obtained earthquake insurance coverage rates; (ii) an insurer to perform on its contracts of insurance in the event of widespread losses; or (iii) the federal or State government to appropriate sufficient funds within their respective budget limitations.

CALIFORNIA TAX MATTERS

The following is based upon the advice of Orrick, Herrington & Sutcliffe LLP, special California counsel to the Fund. The following is a general, abbreviated summary of certain provisions of the applicable California tax law as presently in effect as it directly governs the taxation of resident individual and corporate Common Shareholders of the Fund. This summary does not address the taxation of other shareholders nor does it discuss any local taxes that may be applicable. These provisions are subject to change by legislative or administrative action, and any such change may be retroactive with respect to transactions of the Fund.

The following is based on the assumptions that the Fund will qualify under Subchapter M of the Code as a regulated investment company, that it will satisfy the conditions which will cause distributions of the Fund to qualify as exempt-interest dividends to shareholders for federal and California purposes, and that it will distribute all interest and dividends it receives to the shareholders.

The Fund will be subject to the California corporate franchise and corporation income tax only if it has a sufficient nexus with California. If it is subject to the California franchise or corporation income tax, the Fund does not expect to pay a material amount of such tax.

If at the close of each quarter of the Fund's taxable year at least 50% of the value of its total assets consists of obligations that, when held by individuals, pay interest that is

E-14

exempt from tax by California under California or federal law, then distributions by the Fund that are attributable to interest on any such obligation will not be subject to the California personal income tax. All other distributions, including distributions attributable to capital gains, will be includable in gross income for purposes of the California personal income tax.

Interest on indebtedness incurred or continued for the purpose of acquiring or maintaining an investment in the Common Shares will not be deductible for purposes of the California personal income tax.

All distributions of the Fund, regardless of source, to corporate Common Shareholders that are subject to the California corporate franchise tax will be included in gross income for purposes of such tax.

Gain on the sale, exchange, or other disposition of Common Shares will be subject to the California personal income and corporate franchise tax. In addition, any loss realized by a holder of Common Shares upon the sale of shares held for six months or less may be disallowed to the extent of any exempt interest dividends received with respect to such shares. Moreover, any loss realized upon the sale of Common Shares within thirty days before or after the acquisition of other Common Shares may be disallowed under the "wash sale"

rules.

Common Shares may be subject to the California estate tax if held by a California decedent at the time of death.

Common Shareholders are advised to consult with their own tax advisors for more detailed information concerning California tax matters.

E-15

APPENDIX F

PERFORMANCE RELATED AND COMPARATIVE INFORMATION

The Fund may be a suitable investment for a shareholder that is thinking of adding bond investments to his portfolio to balance the appreciated stocks that the shareholder is holding. Municipal bonds can provide double, tax-free income (exempt from regular federal and state income taxes) for residents of that state.

The Fund may quote certain performance-related information and may compare certain aspects of its portfolio and structure to other substantially similar closed-end funds as categorized by Lipper, Inc. ("Lipper"), Morningstar or other independent services. Comparison of the Fund to an alternative investment should be made with consideration of differences in features and expected performance. The Fund may obtain data from sources or reporting services, such as Bloomberg Financial ("Bloomberg") and Lipper, that the Fund believes to be generally accurate. According to Thomson Wealth Management, Nuveen is the leading sponsor of municipal closed-end exchange-traded bond funds measured by the number of funds (92) and fund assets under management (\$33 billion) as of October 31, 2002.

F-1

Past performance is not indicative of future results. At the time Common Shareholders sell their shares, they may be worth more or less than their original investment.

Features of Nuveen Municipal Closed-End ETFs

Many investors have found municipal closed-end exchange-traded funds to be a versatile addition to their overall portfolios. Their features include:

- Monthly dividends
- Enhanced income potential through leverage
- Automatic dividend reinvestment*
- Exchange listing
- Widespread price visibility
- Convenient intra-day trading*
- Professional management
- Low minimum investment

*As outlined elsewhere in this SAI, share prices will fluctuate. Systematic reinvestment does not ensure a profit, nor does it protect you against a loss in

a declining market.

Over time, the existing Nuveen municipal closed-end exchange-traded funds have generally traded at greater premiums or smaller discounts than funds of other sponsors. This has translated into share prices that were higher for Nuveen Fund shareholders, as compared to the prices of other sponsors' funds.

On Average, Nuveen Municipal Funds Have Traded at Greater Premiums or Smaller Discounts than Competing Funds

Source: Lipper

This chart shows the week-by-week difference between the average premium or discount for all Nuveen municipal closed-end funds and all non-Nuveen municipal closed-end funds as reported by Lipper for the five-year period from September 26, 1997 through September 27, 2002. The weekly averages include all Nuveen and non-Nuveen funds in existence during that week over the course of this measurement period. As of September 27, 2002, there were 87 Nuveen funds and 170 non-Nuveen funds included in the Lipper database. Past trading history is no guarantee of future results, and is no guarantee of how these new Funds may trade.

The Fund will invest at least 80% of its net assets in a portfolio of municipal bonds that are covered by insurance guaranteeing the timely payment of principal and interest thereon. For the remaining portion, the Fund will invest approximately 10% in A rated municipal bonds and the balance in Baa/BBB rated municipal bonds.

Tax-Free Income Is Very Attractive But AMT Liability May Reduce The Benefits Of Tax-Free Income

The true yield of a municipal bond investment may be reduced after adjusting for the impact of the federal alternative minimum tax (AMT). Even a relatively small amount of income subject to AMT can have a measurable impact on the real, after-tax yield of a municipal bond investment. For example, investors subject to the AMT who own shares in a municipal bond fund with a 5% nominal yield and 20% of its portfolio invested in AMT bonds would see their after-tax yield reduced by about 0.25%.

AMT Exposure Is Expected To Grow Dramatically

According to a recent report from the Urban-Brookings Tax Policy Center, liability for the federal AMT may grow to affect 1 in 3 American taxpayers by the end of the decade. The Center concludes that if there are no changes in

Edgar Filing: NUVEEN INSURED CALIFORNIA TAX FREE ADVANTAGE MUNICIPAL FUND - Form 497

current tax laws, approximately 95% of all taxpayers with incomes between \$100,000 and \$500,000 will be subject to the AMT by 2010.

The information in the paragraph above and the chart below are taken from "The AMT: Out of Control" by Leonard E. Burman, William G. Gale, Jeffrey Rohaly and Benjamin H. Harris. The report was published in September 2002 by the Urban Brookings Tax Policy Center, a joint venture of the Urban Institute and the Brookings Institution.

AMT Exposure May Grow If Current Tax Laws Don't Change

[Chart]

Adjusted Gross Income (in 2001 dollars)	% of Total Taxpayers in Bracket Expected to be Subject to AMT	
	2002	2010
\$75,0000 - \$100,000	3%	79%
\$100,000 - \$200,000	11%	94%
\$200,000 - \$500,000	36%	97%

A Nuveen Municipal Closed-End Exchange-Traded Fund May Help Diversify A Portfolio

Historically, investment-grade quality municipal bonds have shown low return correlations with a number of other asset classes commonly found in individual investors' portfolios. We believe that adding a low correlation investment such as quality municipal bonds to an equity-oriented portfolio has the potential to enhance the capital preservation by reducing the standard deviation of returns of your overall portfolio over time.

Low Correlations between Municipal Bonds and Other Asset Classes May Enable a Municipal Investment to Help Investors Reduce the Risk of Their Overall Portfolio

	September 1997 - September 2002 Correlation of Monthly Returns
Municipal Bonds	1.00
Government Bonds	0.76
Preferred Stocks	0.50
REITs	-0.05
S&P 500	-0.21

Source: Ibbotson Associates, Lehman Brothers, Merrill Lynch, NAREIT.

Correlation coefficients are based on monthly return data from September 1997 through September 2002. Past correlations are not necessarily predictive of future correlations between any of these asset classes and the Fund. Municipal Bonds are represented by the Lehman Brothers Municipal Bond Index, an unmanaged index comprised of bonds issued after December 31, 1990, with a minimum credit rating of at least Baa, an outstanding par value of at least \$5 million and a remaining maturity of at least one year. Government Bonds are represented by the Lehman Brothers Government Bond Index, an unmanaged index that includes all public obligations of the U.S. Treasury and all publicly issued debt of U.S. Government agencies and quasi-federal corporations, and corporate debt guaranteed by the U.S. Government, excluding foreign-targeted issues. Preferred stocks are represented by the Merrill Lynch Hybrid Preferred Stock Index, an unmanaged index of all investment-grade, non-dividend received deduction eligible preferred stock with outstanding par values of \$100 million or more. REITs are represented by the NAREIT Equity REIT Index, an unmanaged index of publicly-traded U.S. tax-qualified REITs that have 75% or more of their invested

book assets invested in the equity ownership of real estate. The S&P 500 is an unmanaged index of 500 large-capitalization, publicly-traded stocks representing various industries. It is not possible to invest directly in any of these indexes.

What Is The Alternative Minimum Tax And Why Does It Impact Certain Municipal Bonds?

The federal alternative minimum tax (AMT) was introduced in 1969 in an effort to prevent wealthy taxpayers from completely avoiding all federal income tax liability. The AMT provides an alternate methodology to calculate tax liability, and requires certain deductions, adjustments and preferences that are permitted under regular income tax laws to be added back to gross income for the purpose of determining AMT liability.

One of the items that must be added back to gross income for the purpose of AMT calculation is income received from "private activity" municipal bonds. Generally, private activity bonds are issued for the benefit of a private company or organization such as an airline or power producer.

The Funds will not invest in AMT bonds.
