UNIVERSAL CORPORATION

(Exact name of registrant as specified in its charter)

Virginia	54-0414210
(State or other jurisdiction of incorporation or organization)	(I.R.S. Employer Identification Number)

9201 Forest Hill Avenue, Richmond, Virginia	23235
(Address of principal executive offices)	(Zip Code)

804-359-9311
(Registrant's telephone number, including area code)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes ☒ No ☐

Indicate by check mark whether the registrant has submitted electronically every Interactive Data File required to be submitted pursuant to Rule 405 of Regulation S-T during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes ☒ No ☐

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, a smaller reporting company, or an emerging growth company. See definitions of "large accelerated filer," "accelerated filer," "smaller reporting company," and "emerging growth company" in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer ☐ Accelerated filer ☐ Non-accelerated filer ☐

Smaller reporting company ☐ Emerging growth company ☐

Edgar Filing: UNIVERSAL CORP /VA/ - Form 10-Q

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act. ☐

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes ☐ No ☒

As of November 5, 2018, the total number of shares of common stock outstanding was 24,968,799.

UNIVERSAL CORPORATION
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

NOTE 1. BASIS OF PRESENTATION

Universal Corporation, which together with its subsidiaries is referred to herein as “Universal” or the “Company,” is the leading global leaf tobacco supplier. Because of the seasonal nature of the Company’s business, the results of operations for any fiscal quarter will not necessarily be indicative of results to be expected for other quarters or a full fiscal year. All adjustments necessary to state fairly the results for the period have been included and were of a normal recurring nature. Certain amounts in prior year statements have been reclassified to conform to the current year presentation. This Form 10-Q should be read in conjunction with the financial statements and notes thereto included in the Company’s Annual Report on Form 10-K for the fiscal year ended March 31, 2018.

NOTE 2. ACCOUNTING PRONOUNCEMENTS

Recently Adopted Pronouncements

The Company adopted Financial Accounting Standards Board (“FASB”) Accounting Standards Update No. 2014-09, “Revenue from Contracts with Customers” and all related supplemental amendments (“ASU 2014-09”) effective April 1, 2018, the beginning of the current fiscal year. ASU 2014-09 superseded substantially all of the current revenue recognition guidance under U.S. generally accepted accounting principles (“U.S. GAAP”), and was developed under a joint project with the International Accounting Standards Board (“IASB”) to improve and converge the existing revenue recognition accounting guidance in U.S. GAAP and International Accounting Standards. Under ASU 2014-09, the central underlying principle is to recognize revenues when promised goods or services are transferred to customers at an amount determined by the consideration a company expects to receive for those goods or services. The guidance outlines a five-step process for determining the amount and timing of revenue to be recognized from those arrangements. ASU 2014-09 and the supplemental amendments were codified into the U.S. GAAP hierarchy in Section 606 of the FASB Accounting Standards Codification (“ASC 606”). The Company's implementation process for ASU 2014-09 included a comprehensive assessment of its contractual arrangements with customers that involved classifying those arrangements by specific revenue streams, documenting the relevant terms and conditions of the contracts, and determining the appropriate revenue recognition for those contracts under the new guidance. Through this process, the Company determined in all cases that revenue recognition under the new guidance based on the transfer of its goods and services to customers was substantially the same as under the prior guidance. Accordingly, the adoption of ASU 2014-09 had no impact on the amount and timing of revenue recognized, and no adjustment for the cumulative effect of implementing the new guidance was required under the modified retrospective transition adoption method selected by the Company. The disclosures required for revenue recognition under the new guidance are provided in Note 3.

The Company adopted FASB Accounting Standards Update No. 2017-07, “Compensation - Retirement Benefits (Topic 715)” (“ASU 2017-07”) effective April 1, 2018. ASU 2017-07 requires that an employer report the service cost component of pension or other postretirement benefits expense in the same line item or items as other compensation costs arising from services rendered by the pertinent employees during the period. The other components of net periodic benefit cost are required to be presented in the income statement separately from the service cost component and outside a subtotal of income from operations. With the adoption of ASU 2017-07, the service cost component of net periodic benefit cost continues to be reported in selling, general and administrative expenses in the consolidated statements of income, or in cost of goods sold for the portion that is recorded as a component of the cost of inventory sold or services provided to customers. The other components of net benefit cost, which include interest cost, expected return on plan assets, and the net amortization and deferral of actuarial gains and losses, are included in other non-operating income (expense) in the consolidated statements of income. The financial statement presentation for comparative prior periods has been reclassified accordingly using amounts previously disclosed for net periodic

benefit cost as a practical expedient. The components of net periodic benefit cost and other disclosures related to the Company's pension and other postretirement benefit plans are provided in Note 9.

The Company also adopted FASB Accounting Standards Update No. 2016-15, "Statement of Cash Flows (Topic 230) - Classification of Certain Cash Receipts and Cash Payments" ("ASU 2016-15") effective April 1, 2018. ASU 2016-15 provides guidance on the disclosure and classification of certain items within the statement of cash flows. The Company adopted ASU 2016-15 using the retrospective approach. The adoption resulted in the reporting of life insurance proceeds as a cash flow from investing activities and a corresponding reclassification for the prior year period, but otherwise did not have a material effect on the Company's consolidated statement of cash flows for the six-month periods ended September 30, 2018 and 2017.

The Company further adopted FASB Accounting Standards Update No. 2016-01, "Financial Instruments-Recognition and Measurement of Financial Assets and Financial Liabilities" ("ASU 2016-01") effective April 1, 2018. ASU 2016-01 requires all

equity investments to be measured at fair value with changes in the fair value recognized through net income (other than those accounted for under the equity method of accounting or those that result in consolidation of the investee). The adoption of ASU 2016-01 did not have a material effect on the Company's financial statements.

Finally, the Company adopted FASB Accounting Standards Update No. 2016-06, "Income Taxes (Topic 740): Intra-Entity Transfers of Assets Other Than Inventory" ("ASU 2016-16") effective April 1, 2018. ASU 2016-16 requires companies to recognize the income tax effects of intercompany sales or transfers of assets other than inventory in the income statement as income tax expense in the period the sale or transfer occurs, rather than deferring those tax effects until the asset has been sold to a third-party or otherwise recognized in earnings through depreciation, amortization, or impairment. In prior fiscal reporting periods, various subsidiaries of the Company have sold tobacco processing equipment to other subsidiaries, and the related income effects have been deferred as required under the previous accounting guidance. Under the modified retrospective transition method required by the guidance, upon the adoption of ASU 2016-16, the Company recorded a \$1.9 million reduction to retained earnings in the six-month period ended September 30, 2018 for the cumulative effect of recognizing the deferred income tax effects on all prior intercompany sales of equipment as of the date of adoption.

Pronouncements to be Adopted in Future Periods

In February 2016, the FASB issued Accounting Standards Update No. 2016-02, "Leases (Topic 842)" ("ASU 2016-02"). ASU 2016-02 requires a lessee to recognize lease payment obligations as a lease liability and the corresponding right-of-use asset as a leased asset in the balance sheet for the term of the lease. This guidance supersedes Topic 840 "Leases" and is effective for fiscal years beginning after December 15, 2018. The Company will be required to adopt ASU 2016-02 effective April 1, 2019, which is the beginning of its fiscal year ending March 31, 2020. The Company has collected information on its leasing arrangements for all subsidiaries and operating locations and is currently in the process of reviewing the individual lease contracts, licensing and implementing third-party software that will be used to track its leasing arrangements and account for the right-of-use assets and related lease obligations, and making determinations on the adoption of certain practical expedients for implementation that are provided for under the new guidance. The Company has not yet developed an estimate of the total right-of-use asset and lease obligation balances that will be recorded upon the implementation of ASU 2016-02.

In January 2017, the FASB issued Accounting Standards Update No. 2017-04, "Intangibles - Goodwill and Other (Topic 350)" ("ASU 2017-04"). Under current accounting guidance, the fair value of a reporting unit to which a specific goodwill balance relates is first compared to its carrying value in the financial statements (Step 1). If that comparison indicates that the goodwill is impaired, an implied fair value for the goodwill must then be calculated by deducting the individual fair values of all other assets and liabilities, including any unrecognized intangible assets, from the total fair value of the reporting unit. ASU 2017-04 simplifies the accounting guidance by eliminating Step 2 from the goodwill impairment test and using the fair value of the reporting unit determined in Step 1 to measure the goodwill impairment loss. The updated guidance is effective for fiscal years beginning after December 15, 2019. The Company will be required to adopt ASU 2017-04 effective April 1, 2020, which is the beginning of its fiscal year ending March 31, 2021, and is currently evaluating the impact that the updated guidance will have on its consolidated financial statements.

NOTE 3. REVENUE FROM CONTRACTS WITH CUSTOMERS

The majority of the Company's consolidated revenue consists of sales of processed leaf tobacco to customers. The Company also earns revenue from processing leaf tobacco owned by customers and from various other services provided to customers. Payment terms with customers vary depending on customer creditworthiness, product types, services provided, and other factors. Contract durations and payment terms for all revenue categories generally do not exceed one year. Therefore, the Company has applied a practical expedient to not adjust the transaction price for the effects of financing components, as the Company expects that the period from the time the revenue for a transaction is

recognized to the time the customer pays for the related good or service transferred will be one year or less. Below is a description of the major revenue generating categories from contracts with customers.

Tobacco Sales

The majority of the Company's business involves purchasing leaf tobacco from farmers in the origins where it is grown, processing and packing the tobacco in its factories, and then transferring ownership and control of the tobacco to customers. On a much smaller basis, the Company also sources processed tobacco from third-party suppliers for re-sale to customers. The contracts for tobacco sales with customers create a performance obligation to transfer tobacco to the customer. Transaction prices for the sale of tobaccos are primarily based on negotiated fixed prices, but the Company does have a small number of cost-plus contracts with certain customers. Cost-plus arrangements provide the Company reimbursement of the cost to purchase and process the tobacco, plus a contractually agreed-upon profit margin. The Company utilizes the most likely amount methodology under the

accounting guidance to recognize revenue for cost-plus arrangements with customers. Shipping and handling costs under tobacco sales contracts with customers are treated as fulfillment costs and included in the transaction price. Taxes assessed by government authorities on the sale of leaf tobacco products are excluded from the transaction price. At the point in time that the customer obtains control over the tobacco, which is typically aligned with physical shipment under the contractual terms with the customer, the Company completes its performance obligation and recognizes the revenue for the sale.

Processing Revenue

Processing and packing of customer-owned leaf tobacco is a short-duration process. Processing charges are primarily based on negotiated fixed prices per unit of weight processed. Under normal operating conditions, customer-owned raw tobacco that is placed into the production line exits as processed and packed tobacco within one hour and is then later transported to customer-designated storage facilities. The revenue for these services is recognized when the performance obligation is satisfied, which is generally when processing is completed. The Company's operating history and contract analyses indicate that customer requirements for processed tobacco are consistently met upon completion of processing.

Other Revenue

From time to time, the Company enters into various arrangements with customers to provide other value-added services that may include blending, chemical and physical testing of tobacco, and service cutting for select manufacturers. These other arrangements are a much smaller portion of the Company's business, are typically less frequent, and are separate and distinct contractual agreements from the Company's tobacco sales or processing arrangements with customers. The transaction prices and timing of revenue recognition of these items are determined by the specifics of each contract.

Disaggregation of Revenue from Contracts with Customers

The following table disaggregates the Company's revenue by significant revenue-generating category:

(in thousands of dollars)	Three Months Ended September 30,		Six Months Ended September 30,	
	2018	2017	2018	2017
Tobacco sales	\$509,632	\$459,569	\$854,769	\$716,790
Processing revenue	17,394	17,275	39,101	30,629
Other sales and revenue from contracts with customers	10,520	10,326	18,646	19,062
Total revenue from contracts with customers	537,546	487,170	912,516	766,481
Other operating sales and revenues	2,058	1,078	6,807	6,389
Consolidated sales and other operating revenues	\$539,604	\$488,248	\$919,323	\$772,870

Other operating sales and revenues consists principally of interest on advances to suppliers and dividend income from unconsolidated affiliates.

NOTE 4. GUARANTEES, OTHER CONTINGENT LIABILITIES, AND OTHER MATTERS

Guarantees and Other Contingent Liabilities

Guarantees of Bank Loans and Other Contingent Liabilities

Guarantees of bank loans to tobacco growers for crop financing have long been industry practice in Brazil and support the farmers' production of tobacco there. The Company's operating subsidiary in Brazil had guarantees outstanding at September 30, 2018, all of which expire within one year. The subsidiary withholds payments due to the farmers on delivery of tobacco and forwards those payments to the third-party banks. Failure of farmers to deliver sufficient quantities of tobacco to the subsidiary to cover its obligations to the third-party banks could result in a liability for the subsidiary under the related guarantees; however, in that case, the subsidiary would have recourse against the farmers. The maximum potential amount of future payments that the Company's subsidiary could be required to make at September 30, 2018, was the face amount, \$29 million including unpaid accrued interest (\$31 million at September 30, 2017, and \$20 million at March 31, 2018). The fair value of the guarantees was a liability of approximately \$1 million at September 30, 2018 (\$1 million at September 30, 2017, and \$1 million at March 31, 2018). In addition to these guarantees, the Company has other contingent liabilities totaling approximately \$2 million at September 30, 2018, primarily related to outstanding letters of credit.

Value-Added Tax Assessments in Brazil

As further discussed below, the Company's local operating subsidiaries pay significant amounts of value-added tax ("VAT") in connection with their operations, which generate tax credits that they normally are entitled to recover through offset, refund, or sale to third parties. In Brazil, VAT is assessed at the state level when green tobacco is transferred between states. The Company's operating subsidiary there pays VAT when tobaccos grown in the states of Santa Catarina and Parana are transferred to its factory in the state of Rio Grande do Sul for processing. The subsidiary has received assessments for additional VAT plus interest and penalties from tax authorities for the states of Santa Catarina and Parana based on audits of the subsidiary's VAT filings for specified periods. In June 2011, tax authorities for the state of Santa Catarina issued assessments for tax, interest, and penalties for periods from 2006 through 2009 totaling approximately \$12 million. In September 2014, tax authorities for the state of Parana issued an assessment for tax, interest, and penalties for periods from 2009 through 2014 totaling approximately \$14 million. Those amounts are based on the exchange rate for the Brazilian currency at September 30, 2018. Management of the operating subsidiary and outside counsel believe that errors were made by the tax authorities for both states in determining all or significant portions of these assessments and that various defenses support the subsidiary's positions.

With respect to the Santa Catarina assessments, the subsidiary took appropriate steps to contest the full amount of the claims. As of September 30, 2018, a portion of the subsidiary's arguments had been accepted, and the outstanding assessment had been reduced. The reduced assessment, together with the related accumulated interest through the end of the current reporting period, totaled approximately \$13 million (at the September 30, 2018 exchange rate). The subsidiary is continuing to contest the full remaining amount of the assessment. While the range of reasonably possible loss is zero up to the full \$13 million remaining

assessment with interest, based on the strength of the subsidiary's defenses, no loss within that range is considered probable at this time and no liability has been recorded at September 30, 2018.

With respect to the Parana assessment, management of the subsidiary and outside counsel challenged the full amount of the claim. A significant portion of the Parana assessment was based on positions taken by the tax authorities that management and outside counsel believe deviate significantly from the underlying statutes and relevant case law. In addition, under the law, the subsidiary's tax filings for certain periods covered in the assessment were no longer open to any challenge by the tax authorities. In December 2015, the Parana tax authorities withdrew the initial claim and subsequently issued a new assessment covering the same tax periods. The new assessment totaled approximately \$4 million at the September 30, 2018 exchange rate, reflecting a substantial reduction from the original \$14 million assessment. Notwithstanding the reduction, management and outside counsel continue to believe that the new assessment is not supported by the underlying statutes and relevant case law and have challenged the full amount of the claim. The range of reasonably possible loss is considered to be zero up to the full \$4 million assessment. However, based on the strength of the subsidiary's defenses, no loss within that range is considered probable at this time and no liability has been recorded at September 30, 2018.

In both states, the process for reaching a final resolution to the assessments is expected to be lengthy, and management is not currently able to predict when either case will be concluded. Should the subsidiary ultimately be required to pay any tax, interest, or penalties in either case, the portion paid for tax would generate VAT credits that the subsidiary may be able to recover.

Tanzania Fair Competition Commission Proceeding

In June 2012, the Company's Tanzanian subsidiary, Tanzania Leaf Tobacco Company Ltd. ("TLTC"), entered into a two crop-year supply agreement for unprocessed "green" tobacco with a newly-formed Tanzanian subsidiary of one of the Company's major customers. The agreement involved green tobacco purchases from four of the approximately 400 grower cooperatives in Tanzania, which allowed the customer and its Tanzanian subsidiary on a small test basis to evaluate whether it would be a viable alternative for the customer to establish its own vertically integrated supply operations in that market. Prior to that time, the customer's subsidiary did not exist, and it only purchased processed Tanzanian tobacco from tobacco dealers in specified amounts and only for certain grades and stalk positions. In contrast, the agreement with TLTC required the customer's subsidiary to purchase green tobacco on a "run of crop" basis. "Run of crop" requires the purchase of all green tobacco produced on the tobacco plant, regardless of grade or stalk position. The agreement, therefore, enabled the customer's subsidiary on a small test basis to evaluate the quality of green tobacco purchased on a "run of crop" basis and to assess how such tobacco would be suited to the customer's tobacco requirements. The customer unilaterally elected to establish its own vertically integrated supply operations in Tanzania after the expiration of the agreement, and its subsidiary began purchasing green tobacco directly from Tanzanian grower cooperatives during the second crop year thereafter.

Despite the pro-competitive object and effect of the agreement between TLTC and the customer's subsidiary, in October 2016, the Tanzania Fair Competition Commission ("FCC") notified TLTC and the customer's subsidiary that it reviewed the agreement and provisionally concluded that it infringed Tanzania antitrust law by having the object and effect of preventing competition in the purchase of unprocessed green tobacco in the area in which the four grower cooperatives were located. The FCC also provisionally concluded that the Company's U.S. subsidiary, Universal Leaf Tobacco Company, Inc. ("ULT"), and additional subsidiaries of the customer, were jointly and severally liable for the actions of TLTC and the customer's Tanzanian subsidiary, respectively. TLTC and ULT submitted a written response contesting the FCC's allegations, and on February 27, 2018, the FCC issued its decision to TLTC and ULT which confirmed its initial conclusion that the agreement infringed Tanzanian antitrust law. In its decision, the FCC concluded incorrectly that the parties to the agreement unfairly benefited in the amount of \$105 thousand. The FCC arbitrarily assessed a fine jointly against TLTC and ULT of approximately \$197 million and a fine jointly against the customer's Tanzanian subsidiary and another subsidiary of the customer exceeding \$1 billion.

TLTC and ULT have worked closely with expert legal advisors and economists on this matter. Based on these engagements and consultations, the Company firmly believes the FCC's allegations are frivolous and clearly without merit or support from the facts, law or economic analysis. The Company further believes the FCC's proceedings were rife with irregularities and did not comply with applicable legal and regulatory procedures with respect to this matter, including failing to establish jurisdiction over ULT or to offer a legal justification for including ULT in the proceeding. To the contrary, the Company believes the facts, law, and economic analysis clearly support the legality and pro-competitive nature of the agreement and support a proper conclusion that there was no infringement of Tanzania antitrust law, and the agreement had no negative impact on the Tanzania tobacco market. The Company further believes the FCC's proposed fine is ludicrous, unwarranted, and contrary to Tanzania law. TLTC and ULT immediately appealed the FCC findings to the Tanzania Fair Competition Tribunal, which immediately stayed the execution of any FCC fines. The Company is unable to predict how long the appeal process will take; however, the Company believes it could last several years. At this time, the Company believes that the likelihood of incurring any material liability in this matter is remote, and no amount has been recorded.

Other Legal and Tax Matters

Various subsidiaries of the Company are involved in litigation and tax examinations incidental to their business activities. While the outcome of these matters cannot be predicted with certainty, management is vigorously defending the matters and does not currently expect that any of them will have a material adverse effect on the Company's business or financial position. However, should one or more of these matters be resolved in a manner adverse to management's current expectation, the effect on the Company's results of operations for a particular fiscal reporting period could be material.

Advances to Suppliers

In many sourcing origins where the Company operates, it provides agronomy services and seasonal advances of seed, seedlings, fertilizer, and other supplies to tobacco farmers for crop production, or makes seasonal cash advances to farmers for the procurement of those inputs. These advances are short term, are repaid upon delivery of tobacco to the Company, and are reported in advances to suppliers in the consolidated balance sheets. In several origins, the Company has made long-term advances to tobacco farmers to finance curing barns and other farm infrastructure. In some years, due to low crop yields and other factors, individual farmers may not deliver sufficient volumes of tobacco to fully repay their seasonal advances, and the Company may extend repayment of those advances into future crop years. The long-term portion of advances is included in other noncurrent assets in the consolidated balance sheets. Both the current and the long-term portions of advances to suppliers are reported net of allowances recorded when the Company determines that amounts outstanding are not likely to be collected. Short-term and long-term advances to suppliers totaled \$73 million at September 30, 2018, \$91 million at September 30, 2017, and \$150 million at March 31, 2018. The related valuation allowances totaled \$16 million at September 30, 2018, \$22 million at September 30, 2017, and \$22 million at March 31, 2018, and were estimated based on the Company's historical loss information and crop projections. The allowances were reduced by net recoveries of approximately \$5.4 million in the six-month period ended September 30, 2018 and increased by net provisions of \$0.9 million in the six-month period ended September 30, 2017. These net provisions and recoveries are included in selling, general, and administrative expenses in the consolidated statements of income. Interest on advances is recognized in earnings upon the farmers' delivery of tobacco in payment of principal and interest.

Recoverable Value-Added Tax Credits

In many foreign countries, the Company's local operating subsidiaries pay significant amounts of value-added tax ("VAT") on purchases of unprocessed and processed tobacco, crop inputs, packing materials, and various other goods and services. In some countries, VAT is a national tax, and in other countries it is assessed at the state level. Items subject to VAT vary from jurisdiction to jurisdiction, as do the rates at which the tax is assessed. When tobacco is sold to customers in the country of origin, the operating subsidiaries generally collect VAT on those sales. The subsidiaries are normally permitted to offset their VAT payments against the collections and remit only the incremental VAT collections to the tax authorities. When tobacco is sold for export, VAT is normally not assessed. In countries where tobacco sales are predominately for export markets, VAT collections generated on downstream sales are often not sufficient to fully offset the subsidiaries' VAT payments. In those situations, unused VAT credits can accumulate. Some jurisdictions have procedures that allow companies to apply for refunds of unused VAT credits from the tax authorities, but the refund process often takes an extended period of time and it is not uncommon for refund applications to be challenged or rejected in part on technical grounds. Other jurisdictions may permit companies to sell or transfer unused VAT credits to third parties in private transactions, although approval for such transactions must normally be obtained from the tax authorities, limits on the amounts that can be transferred may be imposed, and the proceeds realized may be heavily discounted from the face value of the credits. Due to these factors, local operating subsidiaries in some countries can accumulate significant balances of VAT credits over time. The Company reviews these balances on a regular basis and records valuation allowances on the credits to reflect amounts that are

not expected to be recovered, as well as discounts anticipated on credits that are expected to be sold or transferred. At September 30, 2018, the aggregate balance of recoverable tax credits held by the Company's subsidiaries totaled approximately \$54 million (\$53 million at September 30, 2017, and \$49 million at March 31, 2018), and the related valuation allowances totaled approximately \$17 million (\$17 million at September 30, 2017, and \$15 million at March 31, 2018). The net balances are reported in other current assets and other noncurrent assets in the consolidated balance sheets.

NOTE 5. EARNINGS PER SHARE

The following table sets forth the computation of basic and diluted earnings per share:

	Three Months Ended September 30,		Six Months Ended September 30,	
(in thousands, except share and per share data)	2018	2017	2018	2017
Basic Earnings Per Share				
Numerator for basic earnings per share				
Net income attributable to Universal Corporation	\$31,446	\$ 26,167	\$44,625	\$ 29,744
Denominator for basic earnings per share				
Weighted average shares outstanding	25,152,862	25,334,661	25,108,722	25,370,783
Basic earnings per share	\$1.25	\$ 1.03	\$1.78	\$ 1.17
Diluted Earnings Per Share				
Numerator for diluted earnings per share				
Net income attributable to Universal Corporation	\$31,446	\$ 26,167	\$44,625	\$ 29,744
Denominator for diluted earnings per share:				
Weighted average shares outstanding	25,152,862	25,334,661	25,108,722	25,370,783
Effect of dilutive securities				
Employee share-based awards	184,856	211,885	202,568	218,375
Denominator for diluted earnings per share	25,337,718	25,546,546	25,311,290	25,589,158
Diluted earnings per share	\$1.24	\$ 1.02	\$1.76	\$ 1.16

NOTE 6. INCOME TAXES

The Company operates in the United States and many foreign countries and is subject to the tax laws of many jurisdictions. Changes in tax laws or the interpretation of tax laws can affect the Company's earnings, as can the resolution of pending and contested tax issues. The Company's consolidated effective income tax rate is affected by a number of factors, including the mix of domestic and foreign earnings and the effect of exchange rate changes on deferred taxes.

In December 2017, the Tax Cuts and Jobs Act of 2017 was passed by the United States Congress and signed into law by the President. This new law made significant changes to U.S. income taxation at the federal level for individuals, pass-through entities, and corporations. For corporations, the changes included a reduction in the statutory rate on taxable income from 35% to 21% and a move from a worldwide tax system to a territorial tax system for companies with foreign operations. Under the territorial system, except in limited situations or for limited types of income, earnings from foreign operations are generally no longer subject to U.S. taxation. To accommodate the move from the previous worldwide tax system, the law provides for a one-time transition tax on the undistributed post-1986 earnings of foreign subsidiaries as of either November 2, 2017 or December 31, 2017, whichever undistributed earnings amount is greater. Other provisions of the new law allow for immediate expensing of investments in property, plant, and equipment and impose limitations on the deductibility of interest, executive compensation, and meals and entertainment expense. For tax years beginning after the date of enactment, the new law requires that certain income earned by foreign subsidiaries, referred to in the law as global intangible low-taxed income ("GILTI"), be included in the U.S. taxable income of the parent company. The Company has made an accounting policy election to account for any additional tax resulting from the GILTI provisions in the year in which it is incurred and has not recorded any

deferred taxes on temporary book-tax differences related to this income. For the fiscal year ending March 31, 2019, the Company's U.S. federal statutory tax rate is the 21% rate under the new law. For the fiscal year ended March 31, 2018, the Company's U.S. federal statutory tax rate was 31.5%, reflecting a portion of the year at the 35% rate under the old law and a portion at the 21% rate under the new law. As under the prior tax law, the Company continues to assume repatriation of all undistributed earnings of its consolidated foreign subsidiaries and has therefore provided for expected foreign withholding taxes on the distribution of those earnings where applicable, net of any U.S. tax credit attributable to those withholding taxes.

The Company accounted for the effects of the changes in the U.S. tax law in the period in which they were enacted, which was the third quarter of fiscal year 2018. Due to the complexities associated with understanding and applying various aspects of the new law and quantifying or estimating amounts upon which calculations required to account for new law are based, the U.S. Securities and Exchange Commission ("SEC") recognized that it would be difficult for many companies to complete the determination of all accounting effects of the new law within the available time frame for issuing their financial statements for the period of enactment. As a result, the SEC provided guidance permitting corporations to record and report specific items impacted by the new law on the basis of reasonable estimates where final amounts had not been determined and designate them as provisional amounts, or to continue to account for specific items under the previous law if it was not possible to develop reasonable estimates within the time frame for issuance of the financial statements for the period of enactment. As the accounting for provisional amounts is refined or finalized in subsequent reporting periods, companies are expected to record appropriate adjustments to the initial accounting, removing the provisional designation on an item in the period that the accounting for that item is completed. A measurement period of no more than one year from the date of enactment of the new law is provided under the SEC guidance to complete all such adjustments.

The consolidated effective income tax rates for the quarter and six months ended September 30, 2018 were approximately 31% and 18%, respectively. During the first and second quarters, the Company reversed amounts previously recorded for dividend withholding taxes on distributed and undistributed retained earnings of a foreign subsidiary. The reversal followed the resolution of uncertainties with the local country taxing authorities with respect to the inclusion of the tax under a tax holiday applicable to the subsidiary and was attributable to retained earnings amounts previously distributed or expected to be distributed prior to the expiration of the tax holiday. Without the dividend withholding tax reversal, the consolidated effective income tax rates for the quarter and six months would have been approximately 33% and 32%, respectively. Consolidated income tax expense for the current year periods was generally based on the mix of U.S. and foreign earnings at the projected effective tax rates for fiscal year 2019 across all subsidiaries in their respective tax jurisdictions, plus certain incremental U.S. taxes applicable to a portion of the Company's foreign earnings under the new tax law. The effective tax rates without the dividend withholding tax reversal also include the net effect of several smaller items that were accounted for on a discrete basis in each quarterly reporting period.

The consolidated effective income tax rates for the quarter and six months ended September 30, 2017, which were determined under the prior U.S. corporate income tax law, were approximately 33% and 30%, respectively. Consolidated income tax expense for those periods also includes the net effect of smaller items that were accounted for on a discrete basis that did not materially impact the effective tax rate for either period. All components of the Company's consolidated tax position have been accounted for based on the new tax law, and no specific items are being accounted for under the previous tax law as permitted by the SEC guidance. However, the Company continues to review the primary effects of the new law on its financial statements. In addition, the Company continues to analyze certain aspects of the new law, and future treasury regulations, tax law technical corrections, notices, rulings, and other guidance issued by the government could result in changes or refinements to the amounts currently recorded. These include potential refinements of the amounts by which deferred tax assets and liabilities and the U.S. tax liability for undistributed foreign earnings were adjusted for the effects of the new law, which could be revised based on continuing review of the Company's calculation of the one-time transition tax, including further analysis of the undistributed earnings amounts represented by cash and other specified assets held by its foreign subsidiaries. As a result, those amounts continue to be classified as provisional, and additional adjustments, which could be material, may be recorded in upcoming quarter ending December 31, 2018, which is the end of the allowed one-year measurement period to complete the final accounting.

NOTE 7. DERIVATIVES AND HEDGING ACTIVITIES

Universal is exposed to various risks in its worldwide operations and uses derivative financial instruments to manage two specific types of risks – interest rate risk and foreign currency exchange rate risk. Interest rate risk has been managed by entering into interest rate swap agreements, and foreign currency exchange rate risk has been managed by entering into forward and option foreign currency exchange contracts. However, the Company’s policy also permits other types of derivative instruments. In addition, foreign currency exchange rate risk is also managed through strategies that do not involve derivative instruments, such as using local borrowings and other approaches to minimize net monetary positions in non-functional currencies. The disclosures below provide additional information about the Company’s hedging strategies, the derivative instruments used, and the effects of these activities on the consolidated statements of income and comprehensive income and the consolidated balance sheets. In the consolidated statements of cash flows, the cash flows associated with all of these activities are reported in net cash provided by operating activities.

Cash Flow Hedging Strategy for Interest Rate Risk

In January 2015, the Company entered into receive-floating/pay-fixed interest rate swap agreements that were designated and qualified as hedges of the exposure to changes in interest payment cash flows created by fluctuations in variable interest rates on two outstanding non-amortizing bank term loans. Although no significant ineffectiveness is expected with this hedging strategy, the effectiveness of the interest rate swaps is evaluated on a quarterly basis. At September 30, 2018, the total notional amount of the interest rate swaps was \$370 million, which corresponded with the aggregate outstanding balance of the term loans.

Cash Flow Hedging Strategy for Foreign Currency Exchange Rate Risk Related to Forecast Purchases of Tobacco and Related Processing Costs

The majority of the tobacco production in most countries outside the United States where Universal operates is sold in export markets at prices denominated in U.S. dollars. However, purchases of tobacco from farmers and most processing costs (such as labor and energy) in those countries are usually denominated in the local currency. Changes in exchange rates between the U.S. dollar and the local currencies where tobacco is grown and processed affect the ultimate U.S. dollar cost of the processed tobacco. From time to time, the Company enters into forward and option contracts to sell U.S. dollars and buy the local currency at future dates that coincide with the expected timing of a portion of the tobacco purchases and processing costs. This strategy offsets the variability of future U.S. dollar cash flows for tobacco purchases and processing costs for the foreign currency notional amount hedged. This hedging strategy has been used mainly for tobacco purchases and processing costs in Brazil. The aggregate U.S. dollar notional amount of forward and option contracts entered for these purposes during the first six months of fiscal years 2019 and 2018 was as follows:

	Six Months Ended September 30,	
(in millions of dollars)	2018	2017
Tobacco purchases	\$59.8	\$19.4
Processing costs	18.1	7.3
Total	\$77.9	\$26.7

The increased U.S. dollar notional amounts for tobacco purchases and processing costs hedged during the six months ended September 30, 2018 primarily reflect variations in the timing of fixed-price orders from customers for their

purchases from the respective crop years. All contracts related to tobacco purchases were designated and qualify as hedges of the future cash flows associated with the forecast purchases of tobacco. As a result, changes in fair values of the forward and option contracts have been recognized in comprehensive income as they occurred, but only recognized in earnings upon sale of the related tobacco to third-party customers. Forward and option contracts related to processing costs have not been designated as hedges, and gains and losses on those contracts have been recognized in earnings on a mark-to-market basis.

All forward contracts to hedge purchases of the 2018 crop in Brazil matured and settled by September 30, 2018. For substantially all hedge gains and losses recorded in accumulated other comprehensive loss at September 30, 2018, the Company expects to complete the sale of the tobacco and recognize the amounts in earnings during fiscal year 2019.

During the quarter ended March 31, 2018, the Company elected to early adopt recently-issued changes to the accounting guidance for derivatives and hedging activities (ASU 2017-12) to allow the application of the updated guidance to all forward foreign currency exchange contracts entered to hedge exchange rate risk on the 2018 Brazilian crop purchases. The updated guidance

simplifies the designation of those contracts as hedges, as well as the ongoing assessment of hedge effectiveness, but did not otherwise materially impact the Company's accounting for those contracts.

Hedging Strategy for Foreign Currency Exchange Rate Risk Related to Net Local Currency Monetary Assets and Liabilities of Foreign Subsidiaries

Most of the Company's foreign subsidiaries transact the majority of their sales in U.S. dollars and finance the majority of their operating requirements with U.S. dollar borrowings, and therefore use the U.S. dollar as their functional currency. These subsidiaries normally have certain monetary assets and liabilities on their balance sheets that are denominated in the local currency. Those assets and liabilities can include cash and cash equivalents, accounts receivable and accounts payable, advances to farmers and suppliers, deferred income tax assets and liabilities, recoverable value-added taxes, and other items. Net monetary assets and liabilities denominated in the local currency are remeasured into U.S. dollars each reporting period, generating gains and losses that the Company records in earnings as a component of selling, general, and administrative expenses. The level of net monetary assets or liabilities denominated in the local currency normally fluctuates throughout the year based on the operating cycle, but it is most common for monetary assets to exceed monetary liabilities, sometimes by a significant amount. When this situation exists and the local currency weakens against the U.S. dollar, remeasurement losses are generated. Conversely, remeasurement gains are generated on a net monetary asset position when the local currency strengthens against the U.S. dollar. To manage a portion of its exposure to currency remeasurement gains and losses, the Company enters into forward contracts to buy or sell the local currency at future dates coinciding with expected changes in the overall net local currency monetary asset position of the subsidiary. Gains and losses on the forward contracts are recorded in earnings as a component of selling, general, and administrative expenses for each reporting period as they occur, and thus directly offset the related remeasurement losses or gains in the consolidated statements of income for the notional amount hedged. The Company does not designate these contracts as hedges for accounting purposes. The contracts are generally arranged to hedge the subsidiary's projected exposure to currency remeasurement risk for specified periods of time, and new contracts are entered as necessary throughout the year to replace previous contracts as they mature. The Company is currently using forward currency contracts to manage its exposure to currency remeasurement risk in Brazil. The total notional amounts of contracts outstanding at September 30, 2018 and 2017, and March 31, 2018, were approximately \$24.6 million, \$37.8 million, and \$27.3 million, respectively. To further mitigate currency remeasurement exposure, the Company's foreign subsidiaries may utilize short-term local currency financing during certain periods. This strategy, while not involving the use of derivative instruments, is intended to minimize the subsidiary's net monetary position by financing a portion of the local currency monetary assets with local currency monetary liabilities, thus hedging a portion of the overall position.

Several of the Company's foreign subsidiaries transact the majority of their sales and finance the majority of their operating requirements in their local currency, and therefore use their respective local currencies as the functional currency for reporting purposes. From time to time, these subsidiaries sell tobacco to customers in transactions that are not denominated in the functional currency. In those situations, the subsidiaries routinely enter into forward exchange contracts to offset currency risk for the period of time that a fixed-price order and the related trade account receivable are outstanding with the customer. The contracts are not designated as hedges for accounting purposes.

Effect of Derivative Financial Instruments on the Consolidated Statements of Income

The table below outlines the effects of the Company's use of derivative financial instruments on the consolidated statements of income:

(in thousands of dollars)	Three Months Ended September 30,		Six Months Ended September 30,	
	2018	2017	2018	2017
Cash Flow Hedges - Interest Rate Swap Agreements				
Derivative				
Effective Portion of Hedge				
Gain (loss) recorded in accumulated other comprehensive loss	\$1,119	\$86	\$2,675	\$(1,426)
Gain (loss) reclassified from accumulated other comprehensive loss into earnings	\$441	\$(353)	\$732	\$(917)
Location of gain (loss) reclassified from accumulated other comprehensive loss into earnings	Interest expense			
Ineffective Portion of Hedge				
Gain (loss) recognized in earnings	\$—	\$—	\$—	\$—
Location of gain (loss) recognized in earnings	Selling, general and administrative expenses			
Hedged Item				
Description of hedged item	Floating rate interest payments on term loan			
Cash Flow Hedges - Foreign Currency Exchange Contracts				
Derivative				
Effective Portion of Hedge				
Gain (loss) recorded in accumulated other comprehensive loss	\$101	\$491	\$(2,930)	\$(1,101)
Gain (loss) reclassified from accumulated other comprehensive loss into earnings	\$(529)	\$(440)	\$(554)	\$(442)
Location of gain (loss) reclassified from accumulated other comprehensive loss into earnings	Cost of goods sold			
Ineffective Portion and Early De-designation of Hedges				
Gain (loss) recognized in earnings	\$—	\$(2)	\$—	\$(5)
Location of gain (loss) recognized in earnings	Selling, general and administrative expenses			
Hedged Item				
Description of hedged item	Forecast purchases of tobacco in Brazil			
Derivatives Not Designated as Hedges - Foreign Currency Exchange Contracts				
Gain (loss) recognized in earnings	\$2,688	\$(140)	\$(2,757)	\$(703)
Location of gain (loss) recognized in earnings	Selling, general and administrative expenses			

For the interest rate swap agreements, the effective portion of the gain or loss on the derivative is recorded in accumulated other comprehensive loss and any ineffective portion is recorded in selling, general and administrative

expenses. For the forward and option foreign currency exchange contracts designated as cash flow hedges of tobacco purchases in Brazil, a net hedge loss of approximately \$2.5 million remained in accumulated other comprehensive loss at September 30, 2018. That balance reflects gains and losses on contracts related to the 2018 crop, less the amount reclassified to earnings related to tobacco sold through September 30, 2018. The majority of the balance in accumulated other comprehensive loss is expected to be recognized in earnings as a component of cost of goods sold in fiscal year 2019 as the 2018 Brazilian crop tobacco is sold to customers. Based on the hedging strategy, as the gain or loss is recognized in earnings, it is expected to be offset by a change in the direct cost for the tobacco or by a change in sales prices if the strategy has been mandated by the customer. Generally, margins on the sale of the tobacco will not be significantly affected.

Effect of Derivative Financial Instruments on the Consolidated Balance Sheets

The table below outlines the effects of the Company's derivative financial instruments on the consolidated balance sheets at September 30, 2018 and 2017, and March 31, 2018:

(in thousands of dollars)	Derivatives in a Fair Value Asset Position			Derivatives in a Fair Value Liability Position		
	Balance Sheet Location	Fair Value as of Sept. 30, 2018	Fair Value as of Sept. 30, 2017	March 31, 2018	Balance Sheet Location	Fair Value as of Sept. 30, 2018 Sept. 30, 2017 March 31, 2018
Derivatives Designated as Hedging Instruments						
Interest rate swap agreements	Other non-current assets	\$ 10,205	\$ 1,640	\$ 8,262	Other long-term liabilities	\$ — \$ — \$ —
Foreign currency exchange contracts	Other current assets	—	—	19	Accounts payable and accrued expenses	— — 123
Total		\$ 10,205	\$ 1,640	\$ 8,281		\$ — \$ — \$ 123
Derivatives Not Designated as Hedging Instruments						
Foreign currency exchange contracts	Other current assets	\$ 142	\$ 394	\$ 341	Accounts payable and accrued expenses	\$ 384 \$ 248 \$ 269
Total		\$ 142	\$ 394	\$ 341		\$ 384 \$ 248 \$ 269

Substantially all of the Company's forward and option foreign exchange contracts are subject to master netting arrangements whereby the right to offset occurs in the event of default by a participating party. The Company has elected to present these contracts on a gross basis in the consolidated balance sheets.

NOTE 8. FAIR VALUE MEASUREMENTS

Universal measures certain financial and nonfinancial assets and liabilities at fair value based on applicable accounting guidance. The financial assets and liabilities measured at fair value include money market funds, trading securities associated with deferred compensation plans, interest rate swap agreements, forward foreign currency exchange contracts, and guarantees of bank loans to tobacco growers. The application of the fair value guidance to nonfinancial assets and liabilities primarily includes the determination of fair values for goodwill and long-lived assets when indicators of potential impairment are present.

Under the accounting guidance, fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The framework for measuring fair value is based on a fair value hierarchy that distinguishes between observable inputs and unobservable inputs. Observable inputs are based on market data obtained from independent sources. Unobservable inputs require the Company to make its own assumptions about the value placed on an asset or liability by market participants.

because little or no market data exists. There are three levels within the fair value hierarchy:

Level Description

- | | |
|---|---|
| 1 | quoted prices in active markets for identical assets or liabilities that the Company has the ability to access as of the reporting date; |
| 2 | quoted prices in active markets for similar assets or liabilities, or quoted prices for identical or similar assets or liabilities in markets that are not active, or inputs other than quoted prices that are observable for the asset or liability; and |
| 3 | unobservable inputs for the asset or liability. |

As permitted under the accounting guidance, the Company uses net asset value per share ("NAV") as a practical expedient to measure the fair value of its money market funds. The fair values for those funds are presented under the heading "NAV" in the

tables that follow in this disclosure. In measuring the fair value of liabilities, the Company considers the risk of non-performance in determining fair value. Universal has not elected to report at fair value any financial instruments or any other assets or liabilities that are not required to be reported at fair value under current accounting guidance.

At September 30, 2018 and 2017, and at March 31, 2018, the Company had certain financial assets and financial liabilities that were required to be measured and reported at fair value on a recurring basis. These assets and liabilities are listed in the tables below and are classified based on how their values were determined under the fair value hierarchy or the NAV practical expedient:

(in thousands of dollars)	September 30, 2018				
	Fair Value Hierarchy				
	NAV	Level 1	Level 2	Level 3	Total
Assets					
Money market funds	\$1,708	\$—	\$—	\$—	\$1,708
Trading securities associated with deferred compensation plans	—	17,344	—	—	17,344
Interest rate swap agreements	—	—	10,205	—	10,205
Foreign currency exchange contracts	—	—	142	—	142
Total financial assets measured and reported at fair value	\$1,708	\$17,344	\$10,347	\$—	\$29,399

Liabilities					
Guarantees of bank loans to tobacco growers	\$—	\$—	\$—	\$919	\$919
Foreign currency exchange contracts	—	—	384	—	384
Total financial liabilities measured and reported at fair value	\$—	\$—	\$384	\$919	\$1,303

Money market funds

The fair value of money market funds, which are reported in cash and cash equivalents in the consolidated balance sheets, is based on NAV, which is the amount at which the funds are redeemable and is used as a practical expedient for fair value. These funds are not classified in the fair value hierarchy, but are disclosed as part of the fair value table above.

Trading securities associated with deferred compensation plans

Trading securities represent mutual fund investments that are matched to employee deferred compensation obligations. These investments are bought and sold as employees defer compensation, receive distributions, or make changes in the funds underlying their accounts. Quoted market prices (Level 1) are used to determine the fair values of the mutual funds.

Interest rate swap agreements

The fair values of interest rate swap agreements are determined based on dealer quotes using a discounted cash flow model matched to the contractual terms of each instrument. Since inputs to the model are observable and significant judgment is not required in determining the fair values, interest rate swaps are classified within Level 2 of the fair value hierarchy.

Foreign currency exchange contracts

The fair values of forward and option foreign currency exchange contracts are also determined based on dealer quotes using a discounted cash flow model matched to the contractual terms of each instrument. Since inputs to the model are observable and significant judgment is not required in determining the fair values, forward and option foreign currency exchange contracts are classified within Level 2 of the fair value hierarchy.

Guarantees of bank loans to tobacco growers

The Company guarantees bank loans to tobacco growers in Brazil for crop financing. In the event that the farmers default on their payments to the banks, the Company would be required to perform under the guarantees. The Company regularly evaluates the likelihood of farmer defaults based on an expected loss analysis and records the fair

value of its guarantees as an obligation in its consolidated financial statements. The fair value of the guarantees is determined using the expected loss data for all loans outstanding at each measurement date. The present value of the cash flows associated with the estimated losses is then calculated at a risk-adjusted interest rate that is aligned with the expected duration of the liability and includes an adjustment for nonperformance risk. This approach is sometimes referred to as the “contingent claims valuation method.” Although historical loss data is an observable input, significant judgment is required in applying this information to the portfolio of guaranteed loans outstanding at each measurement date and in selecting a risk-adjusted interest rate. Significant increases or decreases in the risk-adjusted interest rate may result in a significantly higher or lower fair value measurement. The guarantees of bank loans to tobacco growers are therefore classified within Level 3 of the fair value hierarchy.

A reconciliation of the change in the balance of the financial liability for guarantees of bank loans to tobacco growers (Level 3) for the six months ended September 30, 2018 and 2017 is provided below.

	Six Months Ended September 30,	
(in thousands of dollars)	2018	2017
Balance at beginning of year	\$974	\$1,177
Payments under the guarantees and transfers to allowance for loss on direct loans to farmers (removal of prior crop year loans from portfolio)	(688)	(1,169)
Provision for loss or transfers from allowance for loss on direct loans to farmers (addition of current crop year loans)	808	960
Change in discount rate and estimated collection period	53	11
Currency remeasurement	(228)	(9)
Balance at end of period	\$919	\$970

Long-term Debt

The fair value of the Company's long-term debt, including the current portion, was approximately \$370 million at each of the balance sheet dates September 30, 2018, September 30, 2017, and March 31, 2018. The Company estimates the fair value of its long-term debt using Level 2 inputs which are based upon quoted market prices for the same or similar obligations or on calculations that are based on the current interest rates available to the Company for debt of similar terms and maturities.

NOTE 9. PENSION AND OTHER POSTRETIREMENT BENEFIT PLANS

The Company sponsors several defined benefit pension plans covering U.S. salaried employees and certain foreign and other employee groups. These plans provide retirement benefits based primarily on employee compensation and years of service. The Company also sponsors defined benefit plans that provide postretirement health and life insurance benefits for eligible U.S. employees attaining specific age and service levels, although postretirement life insurance is no longer provided for active employees.

The components of the Company's net periodic benefit cost were as follows:

	Pension Benefits		Other Postretirement Benefits	
(in thousands of dollars)	Three Months Ended September 30, 2018	Three Months Ended September 30, 2017	Three Months Ended September 30, 2018	Three Months Ended September 30, 2017
Service cost	\$1,452	\$1,318	\$58	\$65
Interest cost	2,485	2,439	330	386
Expected return on plan assets	(3,694)	(3,717)	(25)	(22)
Net amortization and deferral	902	815	(194)	(71)
Net periodic benefit cost	\$1,145	\$855	\$169	\$358

	Pension Benefits	Other Postretirement Benefits
--	------------------	-------------------------------------

	Six Months		Six Months	
	Ended September 30,		Ended September 30,	
(in thousands of dollars)	2018	2017	2018	2017
Service cost	\$2,907	\$2,629	\$117	\$129
Interest cost	4,966	4,873	670	769
Expected return on plan assets	(7,388)	(7,434)	(50)	(44)
Net amortization and deferral	1,804	1,630	(388)	(142)
Net periodic benefit cost	\$2,289	\$1,698	\$349	\$712

As discussed in Note 2, the Company adopted FASB Accounting Standards Update No. 2017-07, "Compensation-Retirement Benefits (Topic 715)" effective April 1, 2018. Under the provisions of ASU 2017-07, the service cost component of net periodic benefit cost is reported in the same line of the consolidated income statement as other compensation costs attributable to the covered employees (primarily selling, general and administrative expense). The other components of net periodic benefit cost (interest cost, expected return on plan assets, and net amortization and deferral) are now reported separately below the total for operating income in other non-operating income (expense). Amounts have been reclassified accordingly for the comparative prior reporting periods.

During the six months ended September 30, 2018, the Company made contributions of approximately \$7.0 million to its pension plans. Additional contributions of approximately \$17.7 million are expected during the remaining six months of fiscal year 2019.

NOTE 10. STOCK-BASED COMPENSATION

Universal's shareholders have approved Executive Stock Plans ("Plans") under which officers, directors, and employees of the Company may receive grants and awards of common stock, restricted stock, restricted stock units ("RSUs"), performance share awards ("PSAs"), stock appreciation rights ("SARs"), incentive stock options, and non-qualified stock options. The Company's practice is to award grants of stock-based compensation to officers on an annual basis at the first regularly-scheduled meeting of the Executive Compensation, Nominating and Corporate Governance Committee of the Board of Directors (the "Compensation Committee") in the fiscal year following the public release of the Company's financial results for the prior year. The Compensation Committee administers the Company's Plans consistently, following previously defined guidelines. In recent years, the Compensation Committee has awarded only grants of RSUs and PSAs. Awards of restricted stock, RSUs, and PSAs are currently outstanding under the Plans. The RSUs vest five years from the grant date and are then paid out in shares of common stock. Under the terms of the RSU awards, grantees receive dividend equivalents in the form of additional RSUs that vest and are paid out on the same date as the original RSU grant. The PSAs vest at the end of a three-year performance period that begins with the year of the grant, are paid out in shares of common stock shortly after the vesting date, and do not carry rights to dividends or dividend equivalents prior to vesting. Shares ultimately paid out under PSA grants are dependent on the achievement of predetermined performance measures established by the Compensation Committee and can range from zero to 150% of the stated award. The Company's outside directors automatically receive restricted stock units following each annual meeting of shareholders and previously received restricted stock. RSUs awarded to outside directors vest three years after the grant date, and restricted shares vest upon the individual's retirement from service as a director.

During the six-month periods ended September 30, 2018 and 2017, Universal issued the following stock-based awards, representing the regular annual grants to officers and outside directors of the Company:

Six Months
Ended
September 30,
2018 2017

RSUs:

Number granted	71,200	59,550
Grant date fair value	\$66.30	\$66.05

PSAs:

Number granted	54,800	39,100
Grant date fair value	\$57.12	\$60.37

Fair value expense for stock-based compensation is recognized ratably over the period from grant date to the earlier of: (1) the vesting date of the award, or (2) the date the grantee is eligible to retire without forfeiting the award. For employees who are already eligible to retire at the date an award is granted, the total fair value of all non-forfeitable awards is recognized as expense at the date of grant. As a result, Universal typically incurs higher stock compensation expense in the first quarter of each fiscal year when grants are awarded to officers than in the other three quarters. For PSAs, the Company generally recognizes fair value expense ratably over the performance and vesting period based on management's judgment of the ultimate award that is likely to be paid out based on the achievement of the predetermined performance measures. The Company accounts for forfeitures of stock-based awards as they occur. For the six-month periods ended September 30, 2018 and 2017, the Company recorded total stock-based compensation expense of approximately \$5.7 million and \$4.2 million, respectively. The Company expects to recognize stock-based compensation expense of approximately \$2.6 million during the remaining six months of fiscal year 2019.

NOTE 11. OPERATING SEGMENTS

The principal approach used by management to evaluate the Company's performance is by geographic region, although the dark air-cured and oriental tobacco businesses are each evaluated on the basis of their worldwide operations. The Company evaluates the performance of its segments based on operating income after allocated overhead expenses (excluding significant non-recurring charges or credits), plus equity in the pretax earnings (loss) of unconsolidated affiliates.

Operating results for the Company's reportable segments for each period presented in the consolidated statements of income and comprehensive income were as follows:

(in thousands of dollars)	Three Months Ended		Six Months Ended	
	September 30, 2018	2017	September 30, 2018	2017
SALES AND OTHER OPERATING REVENUES				
Flue-Cured and Burley Leaf Tobacco Operations:				
North America	\$67,782	\$58,668	\$183,338	\$111,992
Other Regions ⁽¹⁾	398,087	381,164	606,019	565,576
Subtotal	465,869	439,832	789,357	677,568
Other Tobacco Operations ⁽²⁾	73,735	48,416	129,966	95,302
Consolidated sales and other operating revenue	\$539,604	\$488,248	\$919,323	\$772,870
OPERATING INCOME (LOSS)				
Flue-Cured and Burley Leaf Tobacco Operations:				
North America	\$8,296	\$7,866	\$17,248	\$10,196
Other Regions ⁽¹⁾	45,562	37,386	43,545	41,330
Subtotal	53,858	45,252	60,793	51,526
Other Tobacco Operations ⁽²⁾	(102)	220	1,871	(112)
Segment operating income	53,756	45,472	62,664	51,414
Deduct: Equity in pretax (earnings) loss of unconsolidated affiliates ⁽³⁾	614	(667)	75	(232)
Consolidated operating income	\$54,370	\$44,805	\$62,739	\$51,182

⁽¹⁾ Includes South America, Africa, Europe, and Asia regions, as well as inter-region eliminations.

Includes Dark Air-Cured, Special Services, and Oriental, as well as inter-company eliminations. Sales and other operating revenues for this reportable segment include limited amounts for Oriental because the business is accounted for on the equity method and its financial results consist principally of equity in the pretax earnings (loss) of an unconsolidated affiliate.

Equity in pretax earnings (loss) of unconsolidated affiliates is included in segment operating income (Other Tobacco Operations segment), but is reported below consolidated operating income and excluded from that total in the consolidated statements of income and comprehensive income.

NOTE 12. ACCUMULATED OTHER COMPREHENSIVE INCOME (LOSS)

The following table summarizes the changes in the accumulated balances for each component of accumulated other comprehensive income (loss) attributable to the Company for the six months ended September 30, 2018 and 2017:

	Six Months Ended September 30,	
(in thousands of dollars)	2018	2017
Foreign currency translation:		
Balance at beginning of year	\$(23,942)	\$(33,138)
Other comprehensive income (loss) attributable to Universal Corporation:		
Net gain (loss) on foreign currency translation (net of tax expense of \$(4,874) in 2017)	(11,687)	9,053
Less: Net loss on foreign currency translation attributable to noncontrolling interests	264	111
Other comprehensive income (loss) attributable to Universal Corporation, net of income taxes	(11,423)	9,164
Balance at end of period	\$(35,365)	\$(23,974)
Foreign currency hedge:		
Balance at beginning of year	\$(35)	\$(258)
Other comprehensive income (loss) attributable to Universal Corporation:		
Net gain (loss) on derivative instruments (net of tax (expense) benefit of \$616 and \$(573))	(5,076)	1,064
Reclassification of (gain) loss to earnings (net of tax expense (benefit) of \$(116) and \$71) ⁽¹⁾	884	(132)
Other comprehensive income (loss) attributable to Universal Corporation, net of income taxes	(4,192)	932
Balance at end of period	\$(4,227)	\$674
Interest rate hedge:		
Balance at beginning of year	\$6,528	\$1,398
Other comprehensive income (loss) attributable to Universal Corporation:		
Net gain (loss) on derivative instruments (net of tax (expense) benefit of \$(562) and \$499)	2,113	(926)
Reclassification of (gain) loss to earnings (net of tax expense (benefit) of \$154 and \$(321)) ⁽²⁾	(578)	596
Other comprehensive income (loss) attributable to Universal Corporation, net of income taxes	1,535	(330)
Balance at end of period	\$8,063	\$1,068
Pension and other postretirement benefit plans:		
Balance at beginning of year	\$(42,615)	\$(37,561)
Other comprehensive income (loss) attributable to Universal Corporation:		
Amortization included in earnings (net of tax benefit of \$(294) and \$(488)) ⁽³⁾	1,096	906
Other comprehensive income (loss) attributable to Universal Corporation, net of income taxes	1,096	906
Balance at end of period	\$(41,519)	\$(36,655)
Total accumulated other comprehensive loss at end of period	\$(73,048)	\$(58,887)

⁽¹⁾ Gain (loss) on foreign currency cash flow hedges related to forecast purchases of tobacco is reclassified from accumulated other comprehensive income (loss) to cost of goods sold when the tobacco is sold to customers. See Note 7 for additional information.

⁽²⁾ Gain (loss) on interest rate cash flow hedges is reclassified from accumulated other comprehensive income (loss) to interest expense when the related interest payments are made on the underlying debt or upon termination of the interest rate swap agreements prior to their scheduled maturity dates. See Note 7 for additional information.

⁽³⁾ This accumulated other comprehensive income (loss) component is included in the computation of net periodic benefit cost. See Note 9 for additional information.

NOTE 13. CHANGES IN SHAREHOLDERS' EQUITY AND NONCONTROLLING INTERESTS IN SUBSIDIARIES

A reconciliation of the changes in Universal Corporation shareholders' equity and noncontrolling interests in subsidiaries for the six months ended September 30, 2018 and 2017 is as follows:

	Six Months Ended September 30, 2018			Six Months Ended September 30, 2017			
(in thousands of dollars)	Universal Corporation	Non-controlling Interests	Total	Universal Corporation	Non-controlling Interests	Total

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

This Quarterly Report on Form 10-Q and the following “Management’s Discussion and Analysis of Financial Condition and Results of Operations” contain “forward-looking statements” within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934. Among other things, these statements relate to the Company’s financial condition, results of operation, and future business plans, operations, opportunities, and prospects. In addition, the Company and its representatives may from time to time make written or oral forward-looking statements, including statements contained in other filings with the Securities and Exchange Commission and in reports to shareholders. These forward-looking statements are generally identified by the use of words such as we “expect,” “believe,” “anticipate,” “could,” “should,” “may,” “plan,” “will,” “predict,” “estimate,” and similar or words of similar import. These forward-looking statements are based upon management’s current knowledge and assumptions about future events and involve risks and uncertainties that could cause actual results, performance, or achievements to be materially different from any anticipated results, prospects, performance, or achievements expressed or implied by such forward-looking statements. Such risks and uncertainties include, but are not limited to, anticipated levels of demand for and supply of our products and services; costs incurred in providing these products and services; timing of shipments to customers; changes in market structure; government regulation; product taxation; industry consolidation and evolution; changes in exchange rates and interest rates; changes in U.S. federal income tax rates and legislation; regulation and litigation impacts on our customers; and general economic, political, market, and weather conditions. For a further description of factors that may cause actual results to differ materially from such forward-looking statements, see Item 1A, “Risk Factors” of our Annual Report on Form 10-K for the fiscal year ended March 31, 2018. We caution investors not to place undue reliance on any forward-looking statements as these statements speak only as of the date when made, and we undertake no obligation to update any forward-looking statements made in this report. This Form 10-Q should be read in conjunction with our Annual Report on Form 10-K for the fiscal year ended March 31, 2018.

Liquidity and Capital Resources

Overview

The first six months of our fiscal year is usually a period of significant working capital investment in both Africa and South America as crops are delivered by farmers. We funded our working capital needs in the six months ended September 30, 2018, using a combination of cash on hand, short-term borrowings, customer advances, and operating cash flows. We expect shipments to continue to be weighted to the second half of the fiscal year.

Our liquidity and capital resource requirements are predominantly short term in nature and relate to working capital for tobacco crop purchases. Working capital needs are seasonal within each geographic region. The geographic dispersion and the timing of working capital needs permit us to predict our general level of cash requirements, although crop size, prices paid to farmers, shipment and delivery timing, and currency fluctuations affect requirements each year. Peak working capital requirements are generally reached during the first and second fiscal quarters. Each geographic area follows a cycle of buying, processing, and shipping tobacco, and in many regions, we also provide agricultural materials to farmers during the growing season. The timing of the elements of each cycle is influenced by such factors as local weather conditions and individual customer shipping requirements, which may change the level or the duration of crop financing. Despite a predominance of short-term needs, we maintain a portion of our total debt as long-term to reduce liquidity risk. We also periodically have large cash balances that we utilize to meet our working capital requirements.

Operating Activities

We used \$213.0 million in net cash flows to fund our operations during the six months ended September 30, 2018. That amount was slightly lower compared to the six months ended September 30, 2017, when we used \$225.8 million

in net cash flows. Tobacco inventory levels increased by \$256.0 million from March 31, 2018 levels to \$935.4 million at September 30, 2018, on seasonal leaf purchases. Tobacco inventory levels were \$66.1 million above September 30, 2017 levels, mainly due to larger burley crops in Africa and higher dark tobacco wrapper inventories. We generally do not purchase material quantities of tobacco on a speculative basis. However, when we contract directly with farmers, we are often obligated to buy all stalk positions, which may contain less marketable leaf styles. At September 30, 2018, our uncommitted inventories were \$104.4 million, or about 11% of total tobacco inventory, compared to \$107.2 million, or about 16% of our March 31, 2018 inventory, and \$120.3 million, or about 14% of our September 30, 2017 inventory. The level of these uncommitted inventory percentages is influenced by timing of farmer deliveries of new crops, as well as the receipt of customer orders.

Our balance sheet accounts reflected seasonal patterns in the six months ended September 30, 2018, on deliveries of crops by farmers in South America, Africa, and North America. Cash and cash equivalent balances and accounts receivable decreased by

\$166.3 million and \$21.4 million, respectively, from March 31, 2018 levels, as we used cash, including collections on receivables, to fund seasonal working capital needs. Advances to suppliers were \$53.8 million at September 30, 2018, a reduction of \$69.0 million from March 31, 2018, as crops were delivered in payment of those balances, net of new advances on current crops. Accounts receivable from unconsolidated affiliates, notes payable and overdrafts, and customer advances and deposits were up \$105.2 million, \$102.6 million, and \$38.1 million, respectively, from March 31, 2018 levels, on seasonal increases.

Accounts receivable - unconsolidated affiliates were up \$56.7 million at September 30, 2018, compared to September 30, 2017, on larger crops and timing of crop purchases. Notes payable and overdrafts were also up \$49.8 million at September 30, 2018, compared to September 30, 2017, on larger crop purchases and later timing of customer shipments.

Investing Activities

Our capital allocation strategy focuses on four strategic priorities: strengthening and investing for growth in our core tobacco business; increasing our strong dividend; exploring growth opportunities in adjacent industries and markets that utilize our assets and capabilities; and returning excess capital to our shareholders. In deciding where to invest capital resources, we look for opportunities where we believe we can earn an adequate return, leverage our assets and expertise, and enhance our farmer base. Our capital expenditures are generally limited to those that add value, replace or maintain equipment, increase efficiency, or position us for future growth. During the six months ended September 30, 2018 and 2017, we invested about \$20.0 million and \$14.8 million, respectively, in our property, plant and equipment. Depreciation expense was approximately \$18.4 million and \$17.5 million for the six months ended September 30, 2018 and 2017, respectively. Generally, our capital spending on maintenance projects is at a level below depreciation expense in order to maintain strong cash flow. In addition, from time to time, we undertake projects that require capital expenditures when we identify opportunities to improve efficiencies, add value for our customers, and position ourselves for future growth. We currently plan to spend approximately \$35 to \$45 million over the next twelve months on capital projects for maintenance of our facilities and other investments to grow and improve our businesses. We expect that about 25% of those capital expenditures will be for non-maintenance investments in our business.

Our Board of Directors approved our current share repurchase program in November 2017. The program expires in November 2019 and authorizes the purchase of up to \$100 million of our common stock. Under the current authorization, we may purchase shares from time to time on the open market or in privately negotiated transactions at prices not exceeding prevailing market rates. Repurchases of shares under the repurchase program may vary based on management discretion, as well as changes in cash flow generation and availability. During the three months ended September 30, 2018, we did not purchase any shares of common stock. As of September 30, 2018, approximately 25.0 million shares of our common stock were outstanding and our available authorization under our current share repurchase program was \$89.6 million.

Financing Activities

We consider the sum of notes payable and overdrafts, long-term debt (including any current portion), and customer advances and deposits, less cash, cash equivalents, and short-term investments on our balance sheet to be our net debt. We also consider our net debt plus shareholders' equity to be our net capitalization. Net debt as a percentage of net capitalization of approximately 27% at September 30, 2018, was up slightly from the September 30, 2017 level of approximately 26% and the March 31, 2018 level of approximately 12%. As of September 30, 2018, we had \$67.9 million in cash and cash equivalents, our short-term debt totaled \$148.0 million, and we were in compliance with all covenants of our debt agreements, which require us to maintain certain levels of tangible net worth and observe restrictions on debt levels.

As of September 30, 2018, we had \$330 million available under a committed revolving credit facility that will mature in December 2019, and we had about \$232 million in unused, uncommitted credit lines. We also maintain an effective, undenominated universal shelf registration that provides for future issuance of additional debt or equity securities. We have no long-term debt maturing in fiscal year 2019. Our seasonal working capital requirements typically increase significantly between March and September and decline after mid-year. Available capital resources from our cash balances, committed credit facility, and uncommitted credit lines exceed our normal working capital needs and currently anticipated capital expenditure requirements over the next twelve months.

Derivatives

From time to time, we use interest rate swap agreements to manage our exposure to changes in interest rates. At September 30, 2018, the fair value of our outstanding interest rate swap agreements was an asset of about \$10.2 million, and the notional amount swapped was \$370 million. We entered into these agreements to eliminate the variability of cash flows in the interest payments on our variable-rate term loans. Under the swap agreements we receive variable rate interest and pay fixed rate interest. The swaps are accounted for as cash flow hedges.

We also enter forward and option contracts from time to time to hedge certain foreign currency exposures, primarily related to forecast purchases of tobacco and related processing costs in Brazil, as well as our net monetary balance sheet exposures in local currency there. We generally account for our hedges of forecast tobacco purchases as cash flow hedges. At September 30, 2018, we had no open hedge contracts for those purposes. We had forward and option contracts outstanding that were not designated as hedges, and the fair value of those contracts was an immaterial net liability at September 30, 2018.

Results of Operations

Amounts described as net income (loss) and earnings (loss) per diluted share in the following discussion are attributable to Universal Corporation and exclude earnings related to non-controlling interests in subsidiaries. The total for segment operating income (loss) referred to in the discussion below is a non-GAAP financial measure. This measure is not a financial measure calculated in accordance with GAAP and should not be considered as a substitute for net income (loss), operating income (loss), cash from operating activities or any other operating performance measure calculated in accordance with GAAP, and it may not be comparable to similarly titled measures reported by other companies. We have provided a reconciliation of the total for segment operating income (loss) to consolidated operating income (loss) in Note 11. "Operating Segments" to the consolidated financial statements in Item 1. We evaluate our segment performance excluding certain significant charges or credits. We believe this measure, which excludes these items that we believe are not indicative of our core operating results, provides investors with important information that is useful in understanding our business results and trends.

Net income for the first half of fiscal year 2019, which ended on September 30, 2018, was \$44.6 million, or \$1.76 per diluted share, compared with \$29.7 million, or \$1.16 per diluted share, for the same period of the prior fiscal year. The first half of fiscal year 2019 included non-recurring tax benefits discussed in Other Items below that reduced income taxes and increased net income by \$7.8 million, or \$0.30 per diluted share. Operating income of \$62.7 million for the six months ended September 30, 2018, improved \$11.6 million, or 23%, compared to operating income of \$51.2 million for the six months ended September 30, 2017. For the second fiscal quarter ended September 30, 2018, net income was \$31.4 million, or \$1.24 per diluted share, compared with net income of \$26.2 million, or \$1.02 per diluted share, for the prior year's second fiscal quarter. Operating income for the second quarter of fiscal year 2019 increased to \$54.4 million from \$44.8 million for the three months ended September 30, 2017. Segment operating income was \$62.7 million for the first half of fiscal year 2019, an increase of \$11.3 million, and for the quarter ended September 30, 2018, was \$53.8 million, an increase of \$8.3 million, both compared to the same periods last fiscal year. Results reflected earnings improvements in all segments for the six months and in the North America and Other Regions segments for the quarter ended September 30, 2018. Consolidated revenues increased by \$146.5 million to \$919.3 million for the first half of fiscal year 2019, and by \$51.4 million to \$539.6 million for the three months ended September 30, 2018, compared to the same periods in the prior fiscal year. Those increases were primarily due to higher sales volumes for both the quarter and six month periods as well as higher processing volumes and sales prices in the six months ended September 30, 2018, compared to the same periods in fiscal year 2018.

Flue-cured and Burley Leaf Tobacco Operations

Other Regions

Operating income for the Other Regions segment increased by \$2.2 million to \$43.5 million for the six months and by \$8.2 million to \$45.6 million for the quarter ended September 30, 2018, compared with the same periods for fiscal year 2018. In both periods, volumes increased in Africa, mainly from higher carryover crop sales and increased burley production volumes there this fiscal year. In South America, sales volumes were down due in part to later timing of shipments in fiscal year 2019, while third-party processing volumes increased. Results for Asia improved for the quarter ended September 30, 2018, on higher trading volumes, largely from China, and a better sales mix, while in

Europe, results were lower in the second fiscal quarter on comparisons to the previous fiscal year's gain on the sale of a processing facility in Hungary. Selling, general, and administrative costs were higher for the six months ended September 30, 2018 on negative foreign currency remeasurement and exchange variances, higher compensation and incentive benefit accruals, and higher customer claim costs partially offset by higher net recoveries on advances to suppliers, compared with the same period in the prior fiscal year. Revenues for the Other Regions segment of \$606.0 million for the six months and \$398.1 million for the quarter ended September 30, 2018, were up \$40.4 million and \$16.9 million, respectively, compared to the same period last year, on higher volumes and processing revenues.

North America

Operating income for the North America segment of \$17.2 million for the six months and \$8.3 million for the quarter ended September 30, 2018, was up by \$7.1 million and \$0.4 million, respectively, compared to the same periods for the prior fiscal year.

The improvement in the first half of fiscal year 2019 was mainly driven by higher carryover crop sales volumes on shipments delayed from the fourth quarter of fiscal 2018 due to reduced transportation availability in the United States. However, results for the second fiscal quarter were reduced by lower shipment volumes from Guatemala and Mexico, due in part to earlier shipment timing compared to the prior fiscal year. Selling, general, and administrative costs for the North America segment for the first half of fiscal year 2019 were up slightly, though declined as a percentage of sales, compared to the prior year. Revenues for this segment also increased, by \$71.3 million to \$183.3 million for the first six months, and by \$9.1 million to \$67.8 million for the quarter ended September 30, 2018, compared to the same periods in the prior fiscal year, on the higher sales volumes and green leaf prices, partly offset by lower processing revenues.

Other Tobacco Operations

The Other Tobacco Operations segment operating income of \$1.9 million for the first half of fiscal year 2019 reflected an increase of \$2.0 million, compared with an operating loss of \$0.1 million for this segment in the same period last year. For the quarter ended September 30, 2018, the segment's operating loss of \$0.1 million compared to operating income of \$0.2 million for the same period for the prior fiscal year. In both periods, results for the dark tobacco operations reflected higher sales of wrapper tobacco, and the absence of a value added tax charge that lowered earnings in the second quarter of fiscal year 2018. Those improvements were partly offset by declines in the oriental joint venture as lower sales volumes in both periods combined with favorable currency remeasurement variances for the first six months and unfavorable currency remeasurement variances for the second quarter of fiscal year 2019 compared to those periods in fiscal year 2018. Selling, general, and administrative costs for the segment were relatively flat for both the first half and second fiscal quarter compared with the prior fiscal year's comparable periods. Revenues for the segment increased by \$34.7 million to \$130.0 million for the first half, and by \$25.3 million to \$73.7 million for the second quarter of fiscal year 2019, largely as a result of the higher wrapper tobacco sales volumes, and increased processing and other revenues.

Other Items

Cost of goods sold in the six months and quarter ended September 30, 2018, increased by 19% and 11% to \$747.6 million and \$440.1 million, respectively, both compared with the same periods in the prior fiscal year, consistent with the similar percentage increases in revenues. Selling, general, and administrative costs for the first half of fiscal year 2019 increased by \$13.2 million to \$108.9 million, mainly driven by negative foreign currency remeasurement and exchange variances of about \$10 million, primarily in Mozambique, Indonesia, Europe, and the Philippines, higher compensation and incentive benefit accruals, and higher customer claim costs partially offset by higher net recoveries on advances to suppliers, compared with the same period in the prior year. Selling, general, and administrative costs were down \$3.2 million for the three months ended September 30, 2018, compared to the same period in the prior year, on higher net recoveries on advances to suppliers partially offset by higher compensation and incentive benefit accruals.

For the six months ended September 30, 2018, the Company reported net income tax expense on pretax earnings of \$10.0 million, or a consolidated effective tax rate of 18%, which included a \$7.8 million benefit from reversing a portion of a liability previously recorded for dividend withholding taxes on the cumulative retained earnings of a foreign subsidiary. The reversal followed the resolution of uncertainties with local taxing authorities with respect to the inclusion of the tax under a tax holiday applicable to a subsidiary and was attributable to the portion of cumulative retained earnings already distributed or that the Company expects to distribute prior to the expiration of the tax holiday. Without the dividend withholding tax reversal, income taxes for the six months of this fiscal year would have been expense of approximately \$17.8 million, or a consolidated effective tax rate of approximately 32%. Income taxes for the six months and quarter ended September 30, 2018, were also favorably impacted by the lower statutory federal tax rate on domestic income due to the change in U.S. corporate tax law enacted in December 2017, as well as the net effect of various items accounted for on a discrete basis in each reporting period.

General Overview

We are very pleased with our performance in the first half of the fiscal year. Our results improved due to strong sales volumes, in part because of higher carryover sales and higher African burley production volumes. Processing revenues were also up, year over year.

We have completed a significant portion of our crop purchases for the fiscal year. Burley production volumes are up in Africa, and crops outside of the United States are coming in as expected. Hurricane Florence caused significant damage to the United States' flue-cured tobacco crop during the second fiscal quarter. The most severely hit area was eastern North Carolina where we estimate up to half of the crop was still in the fields and most of that remaining crop was destroyed. However, our farmer base is largely located outside of what was the storm's direct path, which should mitigate the impact on our results in the second half of the fiscal year.

Despite the recent supply disruptions in the United States, we believe that we are on track for a strong year with volumes above those of last year. Customer demand has exceeded our expectations in certain origins, and we believe some customers are capitalizing on attractive buying opportunities that we have been able to offer due to our strong market position and efficient operations. Our uncommitted inventories remain within our target range at levels lower than those of the previous fiscal year at this time.

In the first half of the year, we have continued to explore opportunities to expand services in our core tobacco business. Our increased processing revenues, particularly on expanded business in Brazil, are an example of that growth in our core tobacco business. We are also actively working on other opportunities to increase value-added services provided to our customers.

While we are pleased with the growth in our market share in the face of declining cigarette consumption, we continue to thoughtfully explore growth opportunities that leverage our strengths and expertise, which include, among others, our ability to manage a large, diverse farmer base, process non-commodity agricultural products requiring value-added handling, operate within the bounds of a highly localized rural infrastructure, and support market compliance. We are determined to be diligent and disciplined in our approach as we move forward.

Another focus area for us has been our ongoing efforts to reduce costs in the supply chain. We continuously look for ways in which we can best adapt to changes in market conditions or customer demand and streamline our global footprint to maximize efficiencies.

Consistent with our capital allocation strategy, we have returned more than \$33 million to our shareholders through dividends and share repurchases during the first half of fiscal year 2019. This includes the significant increase to our annual dividend that we announced May 23, 2018, which was our 48th consecutive annual dividend increase, continuing our long-standing tradition of dividend increases. As we enter the second half of this fiscal year, we remain focused on building on our positive momentum and delivering long-term value to our shareholders.

We have commenced a review of our operations in Tanzania in response to increasing challenges that have impacted the Tanzania leaf tobacco market and our business there. Those challenges include declining customer demand over recent crop years for the leaf styles sourced from Tanzania at the prevailing costs for those tobaccos, as well as regulatory, tax, and other business and operating considerations. As part of our review, we expect to assess a number of possible scenarios. Certain of these scenarios could result in material charges to our earnings in one or more future reporting periods, which could include asset impairment charges and/or restructuring costs. The net book value of our property, plant and equipment in Tanzania at September 30, 2018, was approximately \$32 million.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Currency

The international leaf tobacco trade generally is conducted in U.S. dollars, thereby limiting foreign exchange risk to that which is related to leaf purchase and production costs, overhead, and income taxes in the source country. We also provide farmer advances that are directly related to leaf purchases and are denominated in the local currency. Any currency gains or losses on those advances are usually offset by decreases or increases in the cost of tobacco, which is priced in the local currency. However, the effect of the offset may not occur until a subsequent quarter or fiscal year. Most of our tobacco operations are accounted for using the U.S. dollar as the functional currency. Because there are no forward foreign exchange markets in many of our major countries of tobacco origin, we often manage our foreign exchange risk by matching funding for inventory purchases with the currency of sale, which is usually the U.S. dollar, and by minimizing our net local currency monetary position in individual countries. We are vulnerable to currency remeasurement gains and losses to the extent that monetary assets and liabilities denominated in local currency do not offset each other. In addition to foreign exchange gains and losses, we are exposed to changes in the cost of tobacco due to changes in the value of the local currency in relation to the U.S. dollar. We routinely enter forward currency exchange contracts to hedge against the effects of currency movements on purchases of tobacco to reduce the volatility of costs. In addition, from time-to-time we enter forward contracts to hedge balance sheet exposures.

In certain tobacco markets that are primarily domestic, we use the local currency as the functional currency. Examples of these markets are Poland and the Philippines. In other markets, such as Western Europe, where export sales have been primarily in local currencies, we also use the local currency as the functional currency. In each case, reported earnings are affected by the translation of the local currency into the U.S. dollar.

Interest Rates

We generally use both fixed and floating interest rate debt to finance our operations. Changes in market interest rates expose us to changes in cash flows for floating rate instruments and to changes in fair value for fixed-rate instruments. We normally maintain a proportion of our debt in both variable and fixed interest rates to manage this exposure, and from time to time we may enter hedge agreements to swap the interest rates. In addition, our customers may pay market rates of interest for inventory purchased on order, which could mitigate a portion of the floating interest rate exposure. We also periodically have large cash balances and may receive deposits from customers, both of which we use to fund seasonal purchases of tobacco, reducing our financing needs. Excluding our bank term loans which were converted to fixed-rate borrowings with interest rate swaps in January 2015, debt carried at variable interest rates was approximately \$148 million at September 30, 2018. Although a hypothetical 1% change in short-term interest rates would result in a change in annual interest expense of approximately \$1.5 million, that amount would be at least partially mitigated by changes in charges to customers.

Derivatives Policies

Hedging interest rate exposure using swaps and hedging foreign exchange exposure using forward contracts are specifically contemplated to manage risk in keeping with management's policies. We may use derivative instruments, such as swaps, forwards, or futures, which are based directly or indirectly upon interest rates and currencies to manage and reduce the risks inherent in interest rate and currency fluctuations. When we use foreign currency derivatives to mitigate our exposure to exchange rate fluctuations, we may choose not to designate them as hedges for accounting purposes, which may result in the effects of the derivatives being recognized in our earnings in periods different from the items that created the exposure.

We do not utilize derivatives for speculative purposes, and we do not enter into market risk-sensitive instruments for trading purposes. Derivatives are transaction specific so that a specific debt instrument, forecast purchase, contract, or

invoice determines the amount, maturity, and other specifics of the hedge. We routinely review counterparty risk as part of our derivative program.

ITEM 4. CONTROLS AND PROCEDURES

We maintain disclosure controls and procedures that are designed to ensure that information required to be disclosed in reports we file under the Securities Exchange Act of 1934 (the “Exchange Act”), as amended, is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission’s rules and forms and that such information is accumulated and communicated to management, including our Chief Executive Officer (our Principal Executive Officer) and Chief Financial Officer (our Principal Financial Officer), as appropriate, to allow for timely decisions regarding required disclosure. Our Chief Executive Officer and Chief Financial Officer evaluated, with the participation of other members of management, the effectiveness of our disclosure controls and procedures (as defined in Exchange Act Rule 13a-15(e)), as of the end of the period covered by this Quarterly Report on Form 10-Q. Based on this evaluation, management concluded that our disclosure controls and procedures were effective.

There have been no changes in our internal control over financial reporting during our last fiscal quarter that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

PART II. OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

Tanzania Fair Competition Commission Proceeding

In June 2012, our Tanzanian subsidiary, Tanzania Leaf Tobacco Company Ltd. (“TLTC”), entered into a two crop-year supply agreement for unprocessed “green” tobacco with a newly-formed Tanzanian subsidiary of one of our major customers. The agreement involved green tobacco purchases from four of the approximately 400 grower cooperatives in Tanzania, which allowed the customer and its Tanzanian subsidiary on a small test basis to evaluate whether it would be a viable alternative for the customer to establish its own vertically integrated supply operations in that market. Prior to that time, the customer’s subsidiary did not exist, and it only purchased processed Tanzanian tobacco from tobacco dealers in specified amounts and only for certain grades and stalk positions. In contrast, the agreement with TLTC required the customer’s subsidiary to purchase green tobacco on a “run of crop” basis. “Run of crop” requires the purchase of all green tobacco produced on the tobacco plant, regardless of grade or stalk position. The agreement, therefore, enabled the customer’s subsidiary on a small test basis to evaluate the quality of green tobacco purchased on a “run of crop” basis and to assess how such tobacco would be suited to the customer’s tobacco requirements. The customer unilaterally elected to establish its own vertically integrated supply operations in Tanzania after the expiration of the agreement, and its subsidiary began purchasing green tobacco directly from Tanzanian grower cooperatives during the second crop year thereafter.

Despite the pro-competitive object and effect of the agreement between TLTC and the customer’s subsidiary, in October 2016, the Tanzania Fair Competition Commission (“FCC”) notified TLTC and the customer’s subsidiary that it reviewed the agreement and provisionally concluded that it infringed Tanzania antitrust law by having the object and effect of preventing competition in the purchase of unprocessed green tobacco in the area in which the four grower cooperatives were located. The FCC also provisionally concluded that our U.S. subsidiary, Universal Leaf Tobacco Company, Inc. (“ULT”), and additional subsidiaries of the customer, were jointly and severally liable for the actions of TLTC and the customer’s Tanzanian subsidiary, respectively. TLTC and ULT submitted a written response contesting the FCC’s allegations, and on February 27, 2018, the FCC issued its decision to TLTC and ULT which confirmed its initial conclusion that the agreement infringed Tanzanian antitrust law. In its decision, the FCC concluded incorrectly that the parties to the agreement unfairly benefited in the amount of \$105 thousand. The FCC arbitrarily assessed a fine jointly against TLTC and ULT of approximately \$197 million and a fine jointly against the customer’s Tanzanian subsidiary and another subsidiary of the customer exceeding \$1 billion.

TLTC and ULT have worked closely with expert legal advisors and economists on this matter. Based on these engagements and consultations, we firmly believe the FCC’s allegations are frivolous and clearly without merit or support from the facts, law or economic analysis. We further believe the FCC’s proceedings were rife with irregularities and did not comply with applicable legal and regulatory procedures with respect to this matter, including failing to establish jurisdiction over ULT or to offer a legal justification for including ULT in the proceeding. To the contrary, we believe the facts, law and economic analysis clearly support the legality and pro-competitive nature of the agreement and support a proper conclusion that there was no infringement of Tanzania antitrust law, and the agreement had no negative impact on the Tanzania tobacco market. We further believe the FCC’s proposed fine is ludicrous, unwarranted and contrary to Tanzania law. TLTC and ULT immediately appealed the FCC findings to the Tanzania Fair Competition Tribunal, which immediately stayed the execution of any FCC fines. We are unable to predict how long the appeal process will take; however, we believe it could last several years. At this time, we believe that the likelihood of incurring any material liability in this matter is remote, and no amount has been recorded.

Other Legal Matters

Some of our subsidiaries are involved in litigation or legal matters incidental to their business activities. While the outcome of these matters cannot be predicted with certainty, we are vigorously defending them and do not currently expect that any of them will have a material adverse effect on our business or financial position. However, should one or more of these matters be resolved in a manner adverse to our current expectation, the effect on our results of operations for a particular fiscal reporting period could be material.

ITEM 1A. RISK FACTORS

As of the date of this report, there are no material changes to the risk factors previously disclosed in our Annual Report on Form 10-K for the year ended March 31, 2018 (the "2018 Annual Report on Form 10-K"). In evaluating our risks, readers should carefully consider the risk factors discussed in our 2018 Annual Report on Form 10-K, which could materially affect our business, financial condition or operating results, in addition to the other information set forth in this report and in our other filings with the Securities and Exchange Commission.

ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

The following table sets forth our repurchases of shares of our common stock during the three-month period ended September 30, 2018:

Period ⁽¹⁾	Total Number of Shares Repurchased	Average Price Paid Per Share ⁽²⁾	Total Number of Shares Repurchased as Part of Publicly Announced Plans or Programs ⁽³⁾	Dollar Value of Shares that May Yet Be Purchased Under the Plans or Programs ⁽³⁾
July 1-31, 2018	—	\$ —	—	\$89,586,294
August 1-31, 2018	—	—	—	89,586,294
September 1-30, 2018	—	—	—	89,586,294
Total	—	\$ —	—	\$89,586,294

⁽¹⁾ Repurchases are based on the date the shares were traded. This presentation differs from the consolidated statement of cash flows, where the cost of share repurchases is based on the date the transactions were settled.

⁽²⁾ Amounts listed for average price paid per share include broker commissions paid in the transactions.

A stock repurchase plan, which was authorized by our Board of Directors, became effective and was publicly announced on November 7, 2017. This stock repurchase plan authorized the purchase of up to \$100 million in

⁽³⁾ common and/or preferred stock in open market or privately negotiated transactions, subject to market conditions and other factors. This stock repurchase program will expire on the earlier of November 15, 2019, or when we have exhausted the funds authorized for the program.
