FIRST NATIONAL COMMUNITY BANCORP, INC.  
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(1) The accounting and financial reporting policies of First National Community Bancorp, Inc. and its subsidiary conform to U.S. generally accepted accounting principles and to general practice within the banking industry. The consolidated statements of First National Community Bancorp, Inc. and its subsidiary, First National Community Bank (Bank) including its subsidiary, FNCB Realty, Inc. (collectively, Company) were compiled in accordance with the accounting policies set forth in note 1 of Notes to Consolidated Financial Statements in the Company's 2009 Annual Report to Shareholders. All material intercompany accounts and transactions have been eliminated in consolidation. The accompanying interim financial statements are unaudited. In management's opinion, the consolidated financial statements reflect a fair presentation of the consolidated financial position of the Company and subsidiary, and the results of its operations and its cash flows for the interim periods presented, in conformity with U.S. generally accepted accounting principles. Also in the opinion of management, all adjustments (which include only normal recurring adjustments) necessary to present fairly the Company's financial position, results of operations and cash flows at March 31, 2010 and for all periods presented have been made.

These interim financial statements should be read in conjunction with the audited financial statements and footnote disclosures in the Company's Annual Report to Shareholders for the fiscal year ended December 31, 2009.

(2) The following table identifies the related tax effects allocated to each component of other comprehensive income in the Consolidated Statements of Changes in Stockholders' Equity:

	March 31, 2010			March 31, 2009		
	Pre-tax Amount	Tax (Expense) Benefit	Net of Tax Amount	Pre-tax Amount	Tax (Expense) Benefit	Net of Tax Amount
Unrealized gains (losses) on securities:			(dollars in thousands)			
Unrealized holding gains (losses) arising during the period	\$(9,263)	\$3,150	\$(6,113)	\$(12,751)	\$4,398	\$(8,353)
Noncredit related losses on securities not expected to be sold	8,744	(2,973)	5,771	0	0	0
Less: reclassification adjustment for gain or loss realized in net income	1,195	(406)	789	711	(184)	527
Net unrealized gains (losses)	\$676	\$(229)	\$447	\$(12,040)	\$4,214	\$(7,826)
Other comprehensive income (loss)	\$676	\$(229)	\$447	\$(12,040)	\$4,214	\$(7,826)

(3) Basic earnings per share have been computed by dividing net income (the numerator) by the weighted average number of common shares (the denominator) for the period. Such shares amounted to 16,294,291 and 16,064,455 for the periods ending March 31, 2010 and 2009, respectively.

Diluted earnings per share have been computed by dividing net income (the numerator) by the weighted average number of common shares and options outstanding (the denominator) for the period. Such shares amounted to 16,658,009 and 16,460,979 for the periods ending March 31, 2010 and 2009, respectively.

(4) On August 30, 2000, the Corporation's board of directors adopted an Employee Stock Incentive Plan in which options may be granted to key officers and other employees of the Corporation. The aggregate number of shares which may be issued upon exercise of the options under the plan cannot exceed 1,100,000 shares. Options and rights granted under the plan become exercisable six months after the date the options are awarded and expire ten years after the award date.

The board of directors also adopted on August 30, 2000, the Independent Directors Stock Option Plan for members of the corporation's board of directors who are not officers or employees of the corporation or its subsidiaries. The aggregate number of shares issuable under the plan cannot exceed 550,000 shares and are exercisable six months from the date the awards are granted and expire three years after the award date.

(7)

---

In accordance with current accounting guidance, all options granted have been charged against income at their fair value. Awards granted under the plans vest immediately and the entire expense of the award is recognized in the year of grant.

A summary of the status of the Corporation's stock option plans is presented below:

	2010		Three months ended March 31, 2009	
	Shares	Weighted Average Exercise Price	Shares	Weighted Average Exercise Price
Outstanding at the beginning of the period	366,248	\$12.18	325,134	\$12.36
Granted	0		74,600	10.81
Exercised	0		0	
Forfeited	(25,300)	11.00	0	
Outstanding at the end of the period	340,948	12.26	399,734	12.07
Options exercisable at March 31, 2010	340,948	12.26	325,134	12.36
Weighted average fair value of options granted during the period	---	--	---	2.13

Information pertaining to options outstanding at March 31, 2010 is as follows:

Range of Exercise Price	Number Outstanding	Options Outstanding		Options Exercisable	
		Weighted Average Remaining Contractual Life	Weighted Average Exercise Price	Number Exercisable	Weighted Average Exercise Price
\$5.19-\$23.13	340,948	5.2 years	\$12.26	340,948	\$12.26

(5) FHLB Stock: As a member of the Federal Home Loan Bank of Pittsburgh ("FHLB"), First National Community Bank is required to purchase and hold stock in the FHLB to satisfy membership and borrowing requirements. This stock is restricted in that it can only be sold to the FHLB or to another member institution, and all sales of FHLB stock must be at par. As a result of these restrictions, FHLB stock is unlike other investment securities insofar as there is no trading market for FHLB stock and the transfer price is determined by FHLB membership rules and not by market participants. As of March 31, 2010 and December 31, 2009, our FHLB stock totaled \$10.9 million.

In December 2008, the FHLB voluntarily suspended dividend payments on its stock, as well as the repurchase of excess stock from members. The FHLB cited a significant reduction in the level of core earnings resulting from lower short-term interest rates, the increased cost of liquidity, and constrained access to the debt markets at attractive rates and maturities as the main reasons for the decision to suspend dividends and the repurchase of excess capital stock. The FHLB last paid a dividend in the third quarter of 2008.

FHLB stock is held as a long-term investment and its value is determined based on the ultimate recoverability of the par value. First National Community Bancorp, Inc. evaluates impairment quarterly. The decision of whether impairment exists is a matter of judgment that reflects our view of the FHLB's long-term performance, which includes

factors such as the following:

- its operating performance;
- the severity and duration of declines in the fair value of its net assets related to its capital stock amount;
- its commitment to make payments required by law or regulation and the level of such payments in relation to its operating performance;

(8)

---

- the impact of legislative and regulatory changes on the FHLB, and accordingly, on the members of FHLB; and
  - its liquidity and funding position.

After evaluating all of these considerations, First National Community Bancorp, Inc. concluded that the par value of its investment in FHLB stock will be recovered. Accordingly, no impairment charge was recorded on these securities for the three months ended March 31, 2010. Our evaluation of the factors described above in future periods could result in the recognition of impairment charges on FHLB stock.

(6) Subsequent Events – In accordance with current accounting guidance, subsequent events have been evaluated through the date the financial statements were available to be issued. Through that date, there were no events requiring disclosure.

## ITEM 2 - MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

### Forward Looking Statements

This quarterly report contains forward-looking statements as defined in the Private Securities Litigation Reform Act of 1995. Actual results and trends could differ materially from those set forth in such statements due to various risks, uncertainties and other factors. Such risks, uncertainties and other factors that could cause actual results and experience to differ include, but are not limited to, the following: the strategic initiatives and business plans may not be satisfactorily completed or executed, if at all; increased demand or prices for the company's financial services and products may not occur; changing economic and competitive conditions; technological developments; the effectiveness of the company's business strategy due to changes in current or future market conditions; actions of the U.S. government, Federal Reserve and other governmental and regulatory bodies for the purpose of stabilizing the financial markets; effects of deterioration of economic conditions on customers specifically the effect on loan customers to repay loans; inability of the company to raise or achieve desired or required levels of capital; paying significantly higher Federal Deposit Insurance Corporation (FDIC) premiums in the future; the effects of competition, and of changes in laws and regulations, including industry consolidation and development of competing financial products and services; interest rate movements; relationships with customers and employees; challenges in establishing and maintaining operations; volatilities in the securities markets and related potential impairments of investment securities; and deteriorating economic conditions and declines in housing prices and real estate values and other risks and uncertainties, including those detailed in the company's filings with the Securities and Exchange Commission. When we use words such as "believes", "expects", "anticipates", or similar expressions, we are making forward-looking statements. The company undertakes no obligation to publicly revise or update these forward-looking statements to reflect events or circumstances that arise after the date of this report.

Readers should carefully review the risk factors described in the Annual Report and other documents that we periodically file with the Securities and Exchange Commission, including our Form 10-K for the year ended December 31, 2009.

The consolidated financial information of First National Community Bancorp, Inc. (the "company") provides a comparison of the performance of the company for the periods ended March 31, 2010 and 2009. The financial information presented should be read in conjunction with the consolidated financial statements and accompanying notes appearing elsewhere in this report.

### Background

The company is a Pennsylvania corporation, incorporated in 1997 and is registered as a financial holding company under the Bank Holding Company Act of 1956, as amended. The company became an active bank holding company on July 1, 1998 when it assumed ownership of First National Community Bank (the “bank”). On November 2, 2000, the Federal Reserve Bank of Philadelphia approved the company’s application to change its status to a financial holding company as a complement to the company’s strategic objective which includes expansion into financial services activities. The bank is a wholly-owned subsidiary of the company.

(9)

---

The company's primary activity consists of owning and operating the bank, which provides the customary retail and commercial banking services to individuals and businesses. The bank provides practically all of the company's earnings as a result of its banking services. As of March 31, 2010, the company had 21 full-service branch banking offices in its principal market area in Lackawanna, Luzerne, Wayne and Monroe Counties, Pennsylvania. At March 31, 2010, the company had 295 full-time equivalent employees.

The bank was established as a national banking association in 1910 as "The First National Bank of Dunmore." Based upon shareholder approval received at a Special Shareholders' Meeting held October 27, 1987, the bank changed its name to "First National Community Bank" effective March 1, 1988. The bank's operations are conducted from offices located in Lackawanna, Luzerne, Wayne and Monroe Counties, Pennsylvania:

The bank provides the usual commercial banking services to individuals and businesses, including a wide variety of loan, deposit instruments and investment options. As a result of the bank's partnership with FNCB Wealth Management Services, our customers are able to access alternative products such as mutual funds, bonds, equities and annuities directly from our FNCB Wealth Management Services representatives.

During 1996, FNCB Realty Inc. was formed as a wholly owned subsidiary of the bank to manage, operate and liquidate properties acquired through foreclosure.

#### Summary:

Net income for the first three months of 2010 amounted to \$1.959 million a decrease of \$1.279 million, or 39%, when compared to \$3.238 million for the same period of the previous year. The decrease is primarily due to a decrease in interest income of \$1.553 million which was partially offset by a \$771,000 reduction of recoverable income taxes. Other income decreased \$561,000 primarily due to a \$915,000 impairment charge on securities offset by a

\$396,000 increase in the gain on asset sales. Other expenses decreased \$295,000 over the same period of last year due to \$1.031 million decrease in the reserve for off-balance sheet commitments, offset by an increase in FDIC insurance premiums of \$229,000 and an increase in expenses of ORE of \$120,000.

---

## RESULTS OF OPERATIONS

## Net Interest Income:

The company's primary source of revenue is net interest income which totaled \$9.225 million and \$10.667 million (before the provision for credit losses) during the first three months of 2010 and 2009, respectively. The year to date net interest margin (tax equivalent) decreased forty-nine basis points to 3.25% in 2010 compared to 2009 comprised of a fifty-six basis point decrease in the yield earned on earning assets which was offset by a sixteen basis point decrease in the cost of interest-bearing liabilities. Excluding investment leveraging transactions, the 2009 margin would be 3.27% which is sixty-two basis points lower than the 3.87% recorded during the first three months of last year.

Earning assets decreased \$20 million to \$1.257 billion during the first three months of 2010 and total 91.4% of total assets, comparable to the 91.5% at year-end.

## Yield/Cost Analysis

The following tables set forth certain information relating to the company's Statement of Financial Condition and reflect the weighted average yield on assets and weighted average costs of liabilities for the periods indicated. Such yields and costs are derived by dividing the annualized income or expense by the weighted average balance of assets or liabilities, respectively, for the periods shown:

	Three months ended March 31, 2010			Three months ended March 31, 2009		
	Average Balance	Interest	Yield/ Cost (Dollars in thousands)	Average Balance	Interest	Yield/ Cost
<b>Assets:</b>						
<b>Interest-earning assets:</b>						
Loans (taxable)	\$859,048	\$11,560	5.40%	\$906,082	\$12,750	5.65%

---

## Rate Volume Analysis

The table below sets forth certain information regarding the changes in the components of net interest income for the periods indicated. For each category of interest earning asset and interest bearing liability, information is provided on changes attributed to: (1) changes in rate (change in rate multiplied by current volume); (2) changes in volume (change in volume multiplied by old rate); (3) the total. The net change attributable to the combined impact of volume and rate has been allocated proportionately to the change due to volume and the change due to rate (in thousands).

	Period Ended March 31, 2010 vs 2009			Period Ended March 31, 2009 vs 2008		
	Increase		Increase (Decrease) Total	Increase		Increase (Decrease) Total
	Due to			Due to		
	Rate	Volume	Rate	Volume		
Loans (taxable)	\$(517)	\$(673)	\$(1,190)	\$(2,796)	\$611	\$(2,185)
Loans (tax-free)	(13)	33	20	(11)	63	52
Investment securities (taxable)	(594)	(5)	(599)	(448)	(357)	(805)
Investment securities (tax-free)	36	144	180	320	68	388
Time deposits with banks and federal funds sold	(9)	45	36	0	0	0
Total interest income	\$(1,097)	\$(456)	\$(1,553)	\$(2,935)	\$385	\$(2,550)
Deposits	\$(552)	\$439	\$(113)	\$(3,142)	\$426	\$(2,716)
Borrowed funds	577	(575)	2	(1,639)	977	(662)
Total interest expense	\$25	\$(136)	\$(111)	\$(4,781)	\$1,403	\$(3,378)
Net change in net interest income	\$(1,122)	\$(320)	\$(1,442)	\$1,846	\$(1,018)	\$828

## Other Income and Expenses:

Other income in the first three months of 2010 decreased \$561,000 in comparison to the same period of 2009 primarily due to a \$915,000 other-than-temporary impairment loss on securities. Service charges and fees decreased \$42,000 compared to the prior period. Income from service charges on deposits decreased \$37,000, or 5%, in comparison to the same period of last year. Other fee income decreased \$5,000, or 1%. Net gains from asset sales increased \$396,000 comprised of a \$669,000 increase in security gains as securities were sold to restructure the portfolio and to generate liquidity to meet loan demand offset partially by a \$273,000 decrease in gains on residential mortgage loans.

Other expenses decreased \$295,000 or 4% for the period ended March 31, 2010 compared to the same three month period of the previous year primarily due to a decrease in the provision for off-balance sheet commitments of \$1.031 million. Salaries and Benefits costs decreased \$212,000 in comparison to the first three months of 2009, and data processing expenses decreased \$51,000, or 12%. FDIC insurance expense increased \$229,000, or 95%, due to increased premiums, bank shares tax expense increased \$38,000, or 18%, expenses of other real estate increased \$120,000 and other operating expenses increased \$528,000.

## Other Comprehensive Income:

The company's other comprehensive income includes unrealized holding gains (losses) on securities which it has classified as available-for-sale in accordance with current accounting guidance.

(12)

---

## Provision for Income Taxes:

The provision for income taxes is calculated based on annualized taxable income. The provision for income taxes differs from the amount of income tax determined applying the applicable U.S. statutory federal income tax rate to pre-tax income from continuing operations as a result of the following differences:

	2010	2009
Provision at statutory rate	\$647	\$1,344
Add (Deduct):		
Tax effect of non-taxable interest income	(689)	(622)
Tax effect of other tax free income	(67)	(80)
Non-deductible interest expense	51	61
Deferred tax benefits	(8)	(7)
Other items, net	10	19
Income tax expense	\$(56)	\$715

## Federal Deposit Insurance Corporation (“FDIC”) Activity:

On February 27, 2009, The Board of Directors of the FDIC voted to amend the restoration plan for the Deposit Insurance Fund (“DIF”). Under the current restoration plan, the FDIC Board set a rate schedule to raise the DIF reserve ratio to 1.15 percent within seven years. The amended restoration plan was accompanied by a final rule that sets assessment rates and makes adjustments that improve how the assessment system differentiates for risk.

Prior to the final rule, most banks were in the best risk category and paid anywhere from 12 cents per \$100 of deposits to 14 cents per \$100 for insurance. Beginning April 1, 2009, banks in this category began paying initial base rates ranging from 12 cents per \$100 to 16 cents per \$100 on an annual basis. Changes to the assessment system include higher rates for institutions that rely significantly on secured liabilities, which may increase the FDIC's loss in the event of failure without providing additional assessment revenue. Under the final rule, assessments are higher for institutions that rely significantly on brokered deposits but, for well-managed and well-capitalized institutions, only when accompanied by rapid asset growth. Brokered deposits combined with rapid asset growth have played a role in a number of costly failures, including recent failures. The final rule also provided incentives in the form of a reduction in assessment rates for institutions to hold long-term unsecured debt and, for smaller institutions, high levels of Tier 1 capital.

The FDIC Board also adopted a rule imposing a 5 basis point emergency special assessment on the industry on June 30, 2009. The assessment was collected on September 30, 2009. For the bank, based upon our deposit levels at June 30, 2009, the additional amount of 2009 FDIC insurance expense related to this special assessment was \$603,000. This adjustment was recognized during the second quarter of 2009. On November 12, 2009, the FDIC Board adopted rulemaking requiring banks to prepay, on December 30, 2009, their estimated quarterly risk-based assessments for the fourth quarter of 2009 and for all of 2010, 2011 and 2012. Prepaid assessments for the fourth quarter of 2009 amounted to \$385,000, for 2010 - \$1.6 million, for 2011 - \$2 million and for 2012 - \$2.1 million. Under the new rule, banks will be assessed through 2010 according to the risk-based premium schedule adopted earlier this year. Beginning January 1, 2011, the base rate will increase by 3 basis points.

Total	\$273,805	\$3,569	\$30,415	\$246,959

(14)

---

The following summarizes the amortized cost, approximate fair value, gross unrealized holding gains, and gross unrealized holding losses at March 31, 2010 of the company's Investment Securities classified as held-to-maturity (dollars in thousands):

	March 31, 2010			
	Amortized Cost	Gross Unrealized Holding Gains	Gross Unrealized Holding Losses	Fair Value
Obligations of state and political subdivisions:	\$1,922	\$0	\$98	\$1,824
Total	\$1,922	\$0	\$98	\$1,824

The following table shows the amortized cost and approximate fair value of the company's debt securities at March 31, 2010 using contractual maturities. Expected maturities will differ from contractual maturity because issuers may have the right to call or prepay obligations with or without call or prepayment penalties (in thousands).

	Available- for sale		Held-to-maturity	
	Amortized Cost	Fair Value	Amortized Cost	Fair Value
Amounts maturing in:				
One year or less	\$0	\$0	\$0	\$0
After one year through five years	2,951	2,960	0	0
After five years through ten years	7,490	7,509	464	442
After ten years	171,354	146,766	1,458	1,382
Collateralized mortgage obligations	73,631	70,870	0	0
Mortgage-backed securities	17,369	17,838	0	0
Total	\$272,795	\$245,943	\$1,922	\$1,824

Gross proceeds from the sale of investment securities for the periods ended March 31, 2010 and 2009 were \$24,687,604 and \$9,141,563 respectively with the gross realized gains being \$1,198,616 and \$527,247 respectively, and gross realized losses being \$3,038 and \$0, respectively.

At March 31, 2010 and 2009, investment securities with a carrying amount of \$215,348,928 and \$163,471,053 respectively, were pledged as collateral to secure public deposits and for other purposes.

#### Impairment of Investment Securities

Our investment portfolio is reviewed on a quarterly basis for indications of impairment. This review includes analyzing the length of time and the extent to which the fair value has been lower than the cost, the financial condition and near-term prospects of the issuer, including any specific events which may influence the operations of the issuer and the intent and ability to hold the investment for a period of time sufficient to allow for any anticipated recovery in the market. We evaluate our intent and ability to hold debt securities based upon our investment strategy for the particular type of security and our cash flow needs, liquidity position, capital adequacy and interest rate risk position. In addition, the risk of future other-than-temporary impairment may be influenced by additional bank failures, prolonged recession in the U.S. economy, changes in real estate values, interest deferrals, and whether the federal government provides assistance to financial institutions. Our pooled trust preferred collateralized debt obligations are beneficial interests in

securitized financial assets within the scope of current accounting guidance, and are therefore evaluated for other-than-temporary impairment using management's best estimate of future cash flows. If these estimated cash flows determine that it is probable an adverse change in cash flows has occurred, then other-than-temporary impairment would be recognized. There is a risk that this quarterly review could result in First National Community Bank recording additional other-than-temporary impairment charges in the future.

(15)

---

As of March 31, 2010, 26.5% of the total unrealized losses were comprised of fixed income securities issued by U.S. Government agencies, U.S. Government-sponsored enterprises and municipalities. Pooled trust preferred collateralized debt obligations accounted for 62.6% of the total unrealized losses and 10.5% came from private label mortgage-backed securities.

As of March 31, 2010, the amortized cost of our pooled trust preferred collateralized debt obligations totaled \$30.2 million with an estimated fair value of \$10.6 million. One of our pooled securities is a senior tranche and the remainder are mezzanine tranches. During 2009, all of the pooled issues were downgraded by Moody's Investor Services. At the time of initial issue, no more than 5% of any pooled security consisted of a security issued by any one institution.

Lack of liquidity in the market for trust preferred collateralized debt obligations, credit rating downgrades and market uncertainties related to the financial industry are factors contributing to the temporary impairment on these securities.

On a quarterly basis we evaluate our trust preferred collateralized debt obligations for other-than-temporary impairment. In the first quarter of 2010, \$584,289 in other-than-temporary impairment charges were recognized on our pooled trust preferred collateralized debt obligations. When evaluating these investments we determine a credit related portion and a noncredit related portion of other-than-temporary impairment. The credit related portion is recognized in earnings and represents the expected shortfall in future cash flows. The noncredit related portion is recognized in other comprehensive income and represents the difference between the fair value of the security and the amount of credit related impairment. A discounted cash flow analysis provides the best estimate of credit related other-than-temporary impairment for these securities.

Our pooled trust preferred collateralized debt obligations are measured for other-than-temporary impairment within the scope of current accounting guidance by determining whether it is probable that an adverse change in estimated cash flows has occurred. Determining whether there has been an adverse change in estimated cash flows from the cash flows previously projected involves comparing the present value of remaining cash flows previously projected against the present value of the cash flows estimated at March 31, 2010. We consider the discounted cash flow analysis to be our primary evidence when determining whether credit related other-than-temporary impairment exists.

The following table presents the gross unrealized losses and fair values at March 31, 2010 for both available for sale and held to maturity securities by investment category and time frame for which the loss has been outstanding (dollars in thousands):

Description of Securities	Less Than 12 Months		12 Months or Greater		Total	
	Fair Value	Unrealized Losses	Fair Value	Unrealized Losses	Fair Value	Unrealized Losses

(16)

Corporate securities had a total unrealized loss of \$19.1 million as of March 31, 2010. \$19 million of the unrealized losses were from pooled trust preferred collateralized debt obligations.

The following table presents the gross unrealized losses and fair values at March 31, 2009 for both available for sale and held to maturity securities by investment category and time frame for which the loss has been outstanding (dollars in thousands):

Description of Securities	Less Than 12 Months		12 Months or Greater		Total	
	Fair Value	Unrealized Losses	Fair Value	Unrealized Losses	Fair Value	Unrealized Losses
U.S. Treasury securities and obligations of U.S. government agencies	\$11,471	\$2,344	\$0	\$0	\$11,471	\$2,344
Obligation of state and political subdivisions	47,541	2,686	28,905	4,675	76,446	7,361

Mutual Fund	0	0	975	24	975	24
	\$69,268	\$7,675	\$61,106	\$39,610	\$130,374	\$47,285

The OTTI analysis for the private label mortgage-backed securities relies on a review of the individual loans that provide the collateral for each security. This information is then used to develop default and severity assumptions over a future horizon for each security. The factors involved in constructing these assumptions are:

- MSA (metropolitan statistical area), Geographics
  - HPI (Home Price Index) of specific MSA
    - Loan Balance
    - Rate Premium
- LTV (both individual and combined if other loans)
  - FICO
    - Loan Purpose (cash-out versus purchase)
      - Documentation
      - Loan Structure
      - Occupancy Status
      - Property Type
    - Borrower Payment History
  - Historical delinquency and roll/cure rates

Adjustments are made to the default/severity vectors that may be warranted given the current environment. We then apply a fairness check to each vector to review whether future default/severity assumptions are “in line” with current observable performance. The data used to perform this analysis is provided by Performance Trust and the individual loan performance.

Once we have default/severity assumptions on the underlying collateral (on a deal specific basis), we then have to understand how the timing of losses impacts each specific bond/tranche and how each cash flow changes over time. The default and severity vectors are modeled using either Intex or Bloomberg and both total collateral and tranche specific cash flows are established. We can then compute various metrics based on the resulting tranche cash flow:

(17)

---

- Total Collateral Principal Loss
  - Total Tranche Loss
  - Lifetime Tranche Yield
  - Tranche Loss Timing

A security is considered to be other-than-temporarily impaired if the analysis results in a change of cash flows from the original expectation which indicates that there is the potential that all principal and/or interest may not be received.

Credit ratings are one factor of the analysis utilized to determine OTTI. As of December 31, 2009, the following private label CMO's were determined to be credit impaired resulting in a charge to earnings:

Description	S&P Credit Rating	Collateral Type	Cumulative Credit Impairment Recognized
RAST 2006 – A10 As	CC	ALT-A30	\$226,000
RAST 2006 – A8 2A2	CC	ALT-A30	382,000
CWALT 2007 – 7T2 A12	CC	ALT-A30	377,000
RALI 2006 – QS 16 A10	CC	ALT-A30	236,000
RALI 2006 – QS4 A2	CC	ALT-A30	210,000
HALO 2007 – 1 3A6	CCC	WH30	148,000
WMALT 2006 – 2 2CB	CCC	ALT-A30	186,000
PRIME 2006 – 1 1A1	CC	WH30	41,522
			\$1,806,522

Information affecting cash flows and the impact on the collectability of principal and interest are evaluated on a monthly basis as received from service providers. The results are recognized through earnings as they become available.

The credit impairment recognized as of the dates indicated represents an estimate of uncollectable principal utilizing the factors referenced previously.

The following table provides additional information related to our corporate securities as of March 31, 2010:

Name of Issuer	Name of Issuer's Parent Company	Book Value	Fair Value	Unrealized Gain/Loss	Current Moody's /Fitch Issuer Ratings
(dollars in thousands)					
Chase Capital	JP Morgan Chase & Co.	\$500	\$380	\$120	A2/A

As of March 31, 2010, the book value of our pooled trust preferred collateralized debt obligations totaled \$29.7 million with an estimated fair value of \$10.6 million, which includes securities comprised of 412 banks and other financial institutions.

(18)

PreTSL XXVI	Senior	3,851	2,553	(1,298)	B1/B	53	28.3
PreTSL XXVIII	Mezzanine	8,426	1,803	(6,623)	Ca/CC	44	18.2

In accordance with EITF 99-20 and FSP 115-2, each Trust Preferred Security owned is evaluated for impairment after consideration of the specific collateral (banks) underlying each individual security, actual defaults/deferrals previously recorded on the underlying collateral, and future loss estimates.

While variances in the level of future defaults/deferrals assumptions could result in levels of stress that would be higher or lower than the base scenario, it should be noted that only future assumptions have any impact on the results and that actual credit events are recognized as losses on a timely basis.

Prepayments can occur on scheduled call dates. The following list details information for each of our securities:

	First Par Call Date	Original Collateral Balance	Collateral Redemptions to date
PreTSL VII	01/03/08	\$508,550,000	\$83,750,000
PreTSL IX	04/03/08	504,030,000	54,000,000
PreTSL X	07/03/08	550,645,000	43,500,000
PreTSL XI	09/24/08	635,775,000	34,000,000
PreTSL XIX	09/22/10	700,535,000	0
PreTSL XXVI	06/22/12	964,200,000	0
PreTSL XXVIII	09/22/12	360,850,000	0

During the early years of PreTSL instruments, prepayments were common as issuers were able to refinance into lower costing borrowings. Since the middle of 2007, however, this option has all but disappeared and we are operating in an environment which makes early redemption of these instruments unlikely.

Lack of liquidity in the market for trust preferred collateralized debt obligations, credit rating downgrades, and market uncertainties related to the financial industry are factors contributing to the temporary impairment on these securities.

On a quarterly basis, we evaluate our trust preferred securities for other-than-temporary impairment. In 2010, \$584,000 in credit related OTTI charges were recognized on our pooled trust preferred securities.

(19)

---

Our pooled trust preferred collateralized debt obligations are measured for OTTI within the scope of current accounting guidance by determining whether it is probable that an adverse change in estimated cash flows has occurred. Determining whether there has been an adverse change in estimated cash flows from the cash flows previously projected involves comparing the present value of remaining cash flows previously projected against the present value of the cash flows estimated at March 31, 2010. We consider the discounted cash flow analysis to be our primary evidence when determining whether credit related other-than-temporary impairment exists.

Estimate of Future Cash Flows – Cash flows are constructed using an INTEX cash flow model. INTEX is a proprietary cash flow model recognized as the industry standard for analyzing all types of collateralized debt obligations. It includes each deal’s structural features updated with trustee information, including asset-by-asset detail, as it becomes available. The modeled cash flows are then used to determine if all the scheduled principal and interest payments of our investments will be returned.

The table below provides a cumulative roll forward of credit losses recognized:

	For the Three Months Ended March 31, 2010
Beginning Balance	\$6,199
Credit losses on debt securities for which other-than-temporary impairment was not previously recognized.	0
Additional credit losses on debt securities for which other-than temporary impairment was previously recognized	915
Ending Balance	\$7,114

OTTI analysis is derived from present value calculations which use Moody’s Analytics as a source of data. The first step is to evaluate the credit quality of the collateral and the deal structure. This process produces a set of expected cash flows that have been adjusted for expected credit events. These expected cash flows are compared to the carrying value of the security to determine OTTI.

The discount rate used is determined by adding the discount margin at the time of purchase (based on the original purchase price) to the appropriate 3-month LIBOR forward rate obtained from the forward LIBOR curve. In this manner, we are using the current yield of the individual security in our OTTI analysis in accordance with current accounting guidance.

The market rate for fair value measurement is provided by Moody’s Analytics using a Level 3 approach. This methodology is in accordance with SFAS 157 due to the presence of an inactive or distressed market for these types of securities. The inactivity was evidenced first by a significant widening of the bid-ask spread and then by a significant decrease in the volume of trades relative to historic levels. The new issue market is also inactive as no new trust preferred securities have been issued since 2007. Additionally, most (if not all) sellers of those securities over the past year have been forced sellers due to forced liquidation or bankruptcy.

The discount rate for securities that were previously impaired is calculated similar to the methodology stated above. The prior carrying value of the security is adjusted for previous impairment charges, and the present value of cash flows is used to determine additional impairment.

Edgar Filing: FIRST NATIONAL COMMUNITY BANCORP INC - Form 10-Q

The following list details information for each of our pooled trust preferred securities as of March 31, 2010:

Deal	Class	Book Value (dollars in thousands)	Fair Value	Unrealized Gain/Loss	Fitch Ratings	Performing Issuers	Actual Current Deferrals / Number of Defaults as a % of Current Performing Collateral	(1)
								Expected Annual Deferrals/ Defaults as a % of Performing Collateral
PreTSL VIII	Mezzanine	\$1,107	\$417	\$(690)	C/C	23	43.7	0.375%
PreTSL IX	Mezzanine	2,680	1,054	(1,626)	Ca/C	35	29.2	0.375%
PreTSL X	Mezzanine	1,433	386	(1,047)	Ca/C	37	43.5	0.375%
PreTSL XI	Mezzanine	5,000	1,960	(3,040)	Ca/C	49	24.6	0.375%
PreTSL XIX	Mezzanine	7,176	2,470	(4,706)	B3/B	55	22.1	0.375%
PreTSL XXVI	Senior	3,851	2,553	(1,298)	B1/B	53	28.3	0.375%
PreTSL XXVIII	Mezzanine	8,426	1,803	(6,623)	Ca/CC	44	18.2	0.375%

(1) Future deferrals/defaults are projected to approximate the long-term performance of FDIC regulated banks. Actual deferrals/defaults are recognized as a loss immediately. For current deferrals, our projections incorporate a 50% anticipated recovery with a two year lag. There are no recoveries projected on defaults.

Subordination represents the amount of performing collateral that is in excess of what is needed to payoff a specified class of bonds and all classes senior to the specified class. It can also be referred to as credit enhancement. The coverage ratio, or overcollateralization, of a specific security measures the rate of performing collateral to a given class of notes. It is calculated by dividing the performing collateral in a deal by the current balance of the class of notes plus all classes senior to that class. In the table below, the information pertinent to the excess subordination is disclosed along with historical credit related impairment for each of our pooled trust preferred securities:

Deal	Performing Collateral (dollars in thousands)	Bonds Outstanding	Excess Collateral	Coverage Ratio	Excess Subord-ination	Credit	Credit
						Impairment, this period	Impairment, Cumulative
PreTSL VIII	\$241,072	\$395,483	\$(154,411)	61.0	N/A	\$0	\$0

## Loans:

The following table sets forth detailed information concerning the composition of the company's loan portfolio as of the dates specified (in thousands):

	March 31, 2010		December 31, 2009	
	Amount	%	Amount	%
Residential real estate loans	\$133,200	14.1	\$137,409	14.5
Commercial real estate loans	409,400	43.4	415,940	43.8
Commercial & industrial loans	231,210	24.5	231,766	24.4
Loans to individuals for household, family and other personal expenditures	123,148	13.0	128,392	13.5
Loans to state and political subdivisions	46,806	5.0	36,442	3.8
All other loans, including overdrafts	139	0.0	175	0.0
Total Gross Loans	\$943,903	100.0	\$950,124	100.0
Less: Allow. for Credit Losses	(23,322)		(22,502)	
Less: Unearned Discount	(279)		(298)	
Net Loans	\$920,302		\$927,324	

The company's net loan portfolio declined \$7 million during the first quarter from \$927 million as of December 31, 2009 to \$920 million as of March 31, 2010. Within the portfolio, decreases in residential real estate loans, commercial real estate loans and installment loans were offset by an increase in other loans. Commercial lending activities continue to represent the largest portion of the company's loan portfolio. Additionally, a majority of the company's loan portfolio continues to be secured by real estate. However, this percentage declined slightly from 58.3% as of December 31, 2009 to 57.5% as of March 31, 2010.

Commercial and industrial loans remained constant, totaling \$231 million as of December 31, 2009 and March 31, 2010. Commercial and industrial loans consist primarily of equipment loans, permanent working capital financing, revolving lines of credit and loans secured by cash and marketable securities. Loans secured by commercial real estate decreased \$7 million from \$416 million as of December 31, 2009 to \$409 million as of March 31, 2010. Commercial real estate loans include long-term commercial mortgage financing, construction loans and land development loans, and are primarily secured by first or second lien mortgages. The decrease in commercial real estate loans is primarily attributable to significant charge-offs and transfers to other real estate.

Residential real estate loans totaled \$133 million as of March 31, 2010. This represents a decrease of \$4 million, or 3%, from \$137 million as of December 31, 2009. The components of residential real estate loans include fixed rate mortgage loans sold in the secondary market, and home equity loans and lines of credit. The company continues to adhere to a philosophy of underwriting fixed rate purchase and refinance residential mortgage loans that are generally sold in the secondary market to reduce interest rate risk and provide funding for additional loans. Installment loans decreased \$5 million during the first quarter, or 4%, from \$128 million as of December 31, 2009 to \$123 million as of March 31, 2010. The decrease in installment loans is due primarily to run-off in the company's indirect auto loan portfolio. All other loans, which include obligations of state and municipal governments, totaled \$47 million as of March 31, 2010. This represents a significant increase from \$36 million as of December 31, 2009. The increase is a result of tax anticipation notes issued to municipal governments that are issued for one year terms or less.

## Asset Quality

The company manages credit risk through the efforts of loan officers, loan review personnel, loan quality and risk management committees and oversight from the board of directors, along with the application of policies and procedures designed to foster sound underwriting and credit monitoring practices. The company continually evaluates

this process to ensure it is reacting to problems in the loan portfolio in a timely manner. Although, as is the case with any financial institution, a certain degree of credit risk is dependent in part on local and general economic conditions that are beyond the company's control.

(22)

---

Under the company's grading system, loans graded as special mention, substandard, doubtful or loss are reviewed regularly as part of the company's risk management practices. The company's risk management committee meets quarterly or more often as required and makes recommendations to the board of directors regarding provisions for credit losses. The committee reviews individual problem credits and ensures that ample reserves are established. The methodology utilized for the provision for credit losses was improved during 2009 to include an enhanced impairment measuring process.

Non-performing assets are comprised of impaired and non-accrual loans, loans past due 90 days or more and still accruing, and other real estate owned. Loans are placed in nonaccrual status when a default of interest or principal has existed for 90 days or more. When interest accrual is discontinued, interest previously accrued but not received is charged to current period earnings. Any payments received are applied, first to the outstanding loan amounts, then to the recovery of any charged-off loan amounts. Any excess is treated as a recovery of lost interest.

Under current accounting guidelines, a loan is impaired when it is probable that the bank will be unable to collect all amounts due (including principal and interest) according to the contractual terms of the loan agreement. A loan is generally considered to be impaired if it exhibits the same level of weaknesses and probability of loss as loans classified doubtful or loss in the bank's grading system. For purposes of the company's analysis, loans which are doubtful are considered impaired. In addition, the company considers loans which are rated substandard and on nonaccrual to be impaired. As of March 31, 2010, the recorded investment in loans for which impairment has been recognized totaled \$42.6 million. The allowance for credit losses related to these loans was \$13.1 million.

All impaired loans are analyzed individually for the amount of impairment. Current accounting guidelines allow several methods for the determination of impairment. The Company generally utilizes the fair value of collateral method, as this is the preferred method for collateral dependent loans which make up the majority of the company's impaired loans. A loan is considered to be collateral dependent when repayment of the loan is anticipated to come from the liquidation of the collateral held. To determine the fair value of the collateral, external appraisals are utilized. For loans that are recognized as impaired, external appraisals are to be obtained at a minimum annually, or more frequently as warranted, to ascertain a current market value so that the impairment analysis can be updated.

Under the fair value of collateral method, an allocation is made to the allowance for the difference between the loan balance and the net realizable value of the collateral. For the Company's calculations, a factor of 10% is typically utilized to estimate costs to sell, which is based on typical cost factors, such as a 6% broker commission, 2% transfer taxes, and various other miscellaneous costs associated with the sales process. For loans which are considered to be impaired, but for which the appraised value (minus costs to sell) exceeds the loan value, the impairment is considered to be zero.

The following table presents information about the company's non-performing assets for the periods indicated (in thousands):

	March 31, 2010	December 31, 2009
Nonaccrual loans:		
Impaired/Nonaccrual loans	\$39,705	\$36,048
Loans past due 90 days or more and still accruing	0	646
Total non-performing loans	39,705	36,694
Other Real Estate Owned	15,100	11,184
Total non-performing assets	\$54,805	\$47,878
Non-performing loans as a percentage of gross loans	4.2%	3.9%

Non-performing assets as a percentage of total assets	4.0%	3.4%
---	------	------

(23)

---

Total non-performing assets increased \$6.9 million during the first quarter of 2010, from \$47.8 million as of December 31, 2009 to \$54.8 million as of March 31, 2010, as the effects of the severe and prolonged economic downturn continued to impact individual and business customers of the company. Included in non-performing assets are non-accrual loans and impaired loans, which totaled \$39.7 million as of March 31, 2010, an increase from \$36.0 million as of December 31, 2009.

Reclassifications of non-performing loans during the first quarter of 2010 primarily consisted of two (2) large credits totaling \$4.3 million. These credits are:

- \$2,233,000 – This credit represents the non-sold portion of a government guaranteed loan secured by commercial real estate; due to sufficient collateral value, no allocation is provided for this credit in the allowance for loan losses.
- \$2,056,000 – This credit represents a time loan secured by residential and commercial real estate; \$888 thousand of the allowance for loan losses is allocated to this credit.

Other Real Estate Owned totaled \$15.1 million as of March 31, 2010, which is an increase of \$3.9 million from \$11.1 million as of December 31, 2009. As of March 31, 2010, other real estate owned consists of fourteen (14) properties. Seven (7) of the properties held in other real estate owned as of March 31, 2010 represent approximately 96% of the total. Included in other real estate owned are two properties totaling \$3.1 million, or 21%, of other real estate owned, located outside of the company's general market area. Additionally, \$7.6 million, or 50%, of other real estate owned is located in a specific region located within the company's primary market area that has been particularly hard hit during the current economic recession.

The company is actively marketing these properties for sale through a variety of channels including internal marketing and the use of outside brokers/realtors. The carrying value of other real estate owned is generally calculated at an amount not greater than 90% of the most recent fair market appraised value. This market value is updated on an annual basis. Further deterioration in the real estate market could result in additional losses on these properties. Recognition of the gain or loss from the sale of other real estate owned is identified in a separate line item on the company's income statement. Additionally, expenses associated with other real estate owned are listed as a separate category in other expenses on the company's income statement.

The following schedule reflects a breakdown of other real estate owned for the periods reviewed.

	March 31, 2010	December 31, 2009
Land / Lots	\$ 9,746	\$ 5,887
Commercial Real Estate	4,909	4,852
Residential Real Estate	445	445
Total Other Real Estate Owned	\$15,100	\$11,184

A recap of delinquency within the company's loan portfolio is provided below.

	March 31, 2010	December 31, 2009
30-59 days	.84%	.40%
60-89 days	.04%	.05%
90 + days	.00%	.07%
Non-Accrual	3.79%	3.79%
Total Delinquencies	4.31%	4.31%

As previously indicated, the increase in delinquencies in the periods reviewed is primarily related to the downturn in the economy and its impact on the company's borrowers.

(24)

---

## Provision for Credit Losses:

The provision for credit losses is analyzed in accordance with GAAP and varies from year to year based on management's evaluation of the adequacy of the allowance for credit losses in relation to the risks inherent in the loan portfolio. During 2009, the Allowance for Loan and Lease Losses (ALLL) methodology was revised to include an enhanced impairment measurement process. Enhancements were also made to the historical loss / migration analysis, including a more defined loan pool analysis and detailed migration adjustment factors.

In its evaluation, management considers changes in lending policies and procedures, changes in concentrations of credit, changes in the nature and volume of the portfolio, changes in the volume and severity of delinquencies, classified and nonaccrual loans, changes in competition and legal and regulatory environments, management capabilities, current local and national economic trends, peer group information, changes in loan review methodology and Board of Directors oversight, as well as various other factors. Consideration is also given to examinations performed by regulatory authorities and the company's independent accountants.

The following table sets forth certain information with respect to the company's allowance for credit losses and charge-offs (in thousands)

	Three months Ended March 31, 2010	Year to date Ended December 31, 2009
Balance, January 1	\$22,502	\$8,254
Recoveries Credited	57	133
Losses Charged	(2,039)	(17,835)
Provision for Credit Losses	2,802	31,950
Balance at End of Period	\$23,322	\$22,502

The company's provision for the first quarter of 2010 was \$2.802 million. The company recorded total provisions for loan losses of \$31.95 million for 2009 in order to adequately provide for potential losses, compared to a provision of \$1.8 million in 2008. The increases in the provision for loan losses were primarily a result of the prolonged deterioration in the economy along with a variety of other factors. These issues directly caused an increase in non-performing assets and net charge-offs primarily in the commercial real estate portfolio.

The increase in non-performing assets is primarily concentrated in land development loans. Declines in real estate values, along with a decrease in demand for new home construction have led to this increase. In each case, real estate collateral provides for an alternate source of repayment in the event of default by the borrower. Management continues to monitor real estate values, which may continue to deteriorate in this real estate market and result in a further increase in impaired loans and / or charge-offs. The ratio of the loan loss reserve to total loans at March 31, 2010 and December 31, 2009 was 2.47% and 2.37%, respectively.

The downturn in the real estate market has resulted in increased loan delinquencies, defaults and foreclosures, primarily in the commercial real estate portfolio. During 2009, non accrual loans doubled from \$17.3 million at December 31, 2008 to \$36.0 million at December 31, 2009. Non accrual loans totaled \$37.1 million at March 31, 2010. During the first quarter of 2010, thirty-seven (37) credits in the amount of \$3,268,490 were reclassified to non accrual status. Of these thirty-seven (37) credits, three (3) borrowers accounted for \$2,750,674, or 84.16%. Updated real estate appraisals are obtained on all non-performing loans secured by real estate.

(25)

---

The decline in real estate markets was primarily responsible for over \$17 million of net charge-offs taken in 2009. Net charge-offs totaled \$1.98 million for the period ended March 31, 2010, of which \$1.2 million or 60.6% resulted from the charge down of a land development loan. The majority of the 2009 charge-offs resulted from participations in a small number of out of area real estate bridge loans made to Non-Bank related customers. At the time these loans were issued, the Bank was looking to expand into other market areas and spread risk. The decision to participate in these credit facilities was based upon very favorable market conditions, substantial equity positions, excellent loan to value ratios, fee income, and above average interest rates at the time these loans were approved. Management has since made a decision to no longer participate in out of area loans.

Management is prepared for continued negative trends in this difficult economic environment and real estate market. Management continues to aggressively manage impaired loans in an effort to reduce loan balances through concerted efforts with affected customers to develop strategies to resolve borrower issues, through sale or liquidation of collateral, foreclosure, or other means to reduce the bank's exposure to impaired loans. If real estate values continue to decline, it is more likely that we would be required to further increase our allowance for loan losses, which in turn, could result in reduced earnings.

#### Asset/Liability Management, Interest Rate Sensitivity and Inflation

The major objectives of the company's asset and liability management are to (1) manage exposure to changes in the interest rate environment to achieve a net interest income within reasonable ranges, (2) ensure adequate liquidity and funding, and (3) maintain a strong capital base. The bank manages these objectives through its Senior Management and Asset and Liability Management Committees. Members of the committees meet regularly to develop balance sheet strategies affecting the future level of net interest income, liquidity and capital. Items that are considered in asset and liability management include balance sheet forecasts, the economic environment, the anticipated direction of interest rates and the bank's earnings sensitivity to changes in these rates.

The company analyzes its interest sensitivity position to manage the risk associated with interest rate movements through the use of gap analysis and simulation modeling. Because of the limitations of the gap reports, the bank uses simulation modeling to project future net interest income streams incorporating the current "gap" position, the forecasted balance sheet mix, and the anticipated spread relationships between market rates and bank products under a variety of interest rate scenarios.

Economic conditions affect financial institutions, as they do other businesses, in a number of ways. Rising inflation affects all businesses through increased operating costs but affects banks primarily through the manner in which they manage their interest sensitive assets and liabilities in a rising rate environment. Economic recession can also have a material effect on financial institutions as the assets and liabilities affected by a decrease in interest rates must be managed in a way that will maximize the largest component of a bank's income, that being net interest income. Recessionary periods may also tend to decrease borrowing needs and increase the uncertainty inherent in the borrowers' ability to pay previously advanced loans. Additionally, reinvestment of investment portfolio maturities can pose a problem as attractive rates are not as available. Management closely monitors the interest rate risk of the balance sheet and the credit risk inherent in the loan portfolio in order to minimize the effects of fluctuations caused by changes in general economic conditions.

#### Liquidity

The term liquidity refers to the ability of the company to generate sufficient amounts of cash to meet its cash-flow needs. Liquidity is required to fulfill the borrowing needs of the bank's credit customers and the withdrawal and maturity requirements of its deposit customers, as well as to meet other financial commitments.

The short-term liquidity position of the company is strong as evidenced by \$80.2 million in cash and cash equivalents. A secondary source of liquidity is provided by the investment portfolio with \$23 million or 8% of the portfolio maturing or expected to provide cash flow within one year through maturities, projected calls or principal reductions.

(26)

---

The company's focus is on retail deposits as a source of funds, although short-term needs can be funded with municipal deposits. The bank has the ability to sell Federal funds to invest excess cash; however, the bank can also borrow in the Federal Funds market to meet temporary liquidity needs. Other sources of potential liquidity include Federal Home Loan Bank advances, the Federal Reserve Discount Window, CDARS deposits and the Brokered CD market.

### Capital Management

A strong capital base is essential to the continued growth and profitability of the company and in that regard the maintenance of appropriate levels of capital is a management priority. The company's principal capital planning goal is to provide a sufficient base to support current and future operations, while complying with all regulatory standards. As more fully described in Note 15 to the year end audited financial statements, regulatory authorities have prescribed specified minimum capital ratios as guidelines for determining capital adequacy to help insure the safety and soundness of financial institutions.

Total stockholders' equity increased \$1.558 million during the first three months of 2010 comprised of increases in retained earnings in the amount of \$1.959 million and \$46,000 from stock issued through Dividend Reinvestment and Stock Options offset by a \$447,000 decrease in accumulated other comprehensive income. During the first three months of 2010, the company recognized a \$915,000 impairment charge on investment securities due to an Other-Than-Temporary-Impairment (OTTI). The entire \$915,000 was considered a credit impairment and was charged to earnings. During the same period of 2009, total stockholders' equity decreased \$5.305 million, or 5%, comprised of an increase in retained earnings of \$1.473 million after paying cash dividends, \$889,000 from stock issued through Dividend Reinvestment, Stock Option awards of \$159,000 and a \$7.826 million decrease in accumulated other comprehensive income.

The Board of Directors has voted to suspend payment of the company's quarterly dividend indefinitely in an effort to conserve capital. The Board recognizes the importance of preserving cash and, given the challenging economic conditions that continue to impact the health and stability of many businesses within the region we serve. Suspending the \$0.02 per share dividend will save the company approximately \$1.3 million. The Board will reevaluate the policy in the future on a quarter-by-quarter basis. The total dividend payout during the first three months of 2009 represented \$.11 per share. Excluding the impact due to securities valuation, core equity increased \$2.004 million and \$3.907 million during the first three months of 2010 and 2009, respectively.

The dividend suspension is among several initiatives in place to conserve cash reserves and the company's capital base during the nation's protracted economic slump. The company recently announced it had raised \$25 million through the sale of subordinated notes which will mature on September 1, 2019. The net proceeds of the completed sale will be used to strengthen the institution's capital position, improve liquidity, increase lending capacity and support the company's continuing growth objectives.

The Board of Governors of the Federal Reserve System and other various regulatory agencies have specified guidelines for purposes of evaluating a bank's capital adequacy. Currently, banks must maintain a leverage ratio of core capital to total assets at a prescribed level, namely 3%. In addition, bank regulators have issued risk-based capital guidelines. Under such guidelines, minimum ratios of core capital and total qualifying capital as a percentage of risk-weighted assets and certain off-balance sheet items of 4% and 8% are required. As of March 31, 2010, the company and the bank met all capital requirements.

Effective September 1, 2009, the company offered only to accredited investors (as defined by SEC Rule 501(a)) up to \$25,000,000 principal amount of Subordinated Notes Due 2019 at a fixed interest rate of 9% per annum (the "Notes") in denominations of \$100,000 and integral multiples of \$100,000 in excess thereof. The Notes will mature on September 1, 2019. For the first five years from issuance, the company will pay interest only on the Notes. Commencing

September 1, 2015, the company will pay interest and a portion of the principal calculated to return the entire principal amount of the Notes at maturity. Payments of interest will be payable to registered holders of the Notes (the "Noteholders") quarterly on the first of every third month beginning on December 1, 2009. Payments of principal will be payable to the Noteholders annually beginning on September 1, 2015. The Notes will be issued in registered form and without coupons.

(27)

---

The Notes are unsecured obligations of the company and are subordinate in right of payment to the company's senior indebtedness. Neither the company nor the bank has guaranteed payment of interest and principal on the Notes. The Notes will not be subject to a trust indenture with an independent trustee and, upon default, the Noteholders will have no special remedy against the company. The Notes will not be rated by a nationally recognized statistical rating organization.

The following table presents information regarding the Company's risk-based capital at March 31, 2010:

	First National Community Bank		First National Community Bancorp, Inc.	
	Amount	Ratio	Amount	Ratio

Tier I Capital (to Average Assets)	>\$69,705	>5.00%	>\$69,698	>5.00%

**Disclosures about Fair Value of Financial Instruments:**

Current accounting pronouncements require quarterly disclosure of estimated fair value of on-and off-balance sheet financial instruments beginning with the period ending after June 15, 2009.

The following methods and assumptions were used to estimate the fair value of each class of financial instruments for which it is practicable to estimate that value:

**Cash and short-term investments:**

Cash and short-term investments include cash on hand, amounts due from banks, and federal funds sold. For these short-term instruments, the carrying amount is a reasonable estimate of fair value.

**Securities:**

For securities held for investment purposes, the fair values have been individually determined based on currently quoted market prices. If a quoted market price is not available, fair value is estimated using quoted market prices for similar securities.

**Loans:**

The fair value of loans has been estimated by discounting the future cash flows using the current rates which similar loans would be made to borrowers with similar credit ratings and for the same remaining maturities.

**Deposits:**

The fair value of demand deposits, savings deposits, and certain money market deposits is the amount payable on demand at the reporting date. The fair value of fixed-maturity certificates of deposit is estimated using the rates currently offered for deposits of similar remaining maturities.

**Borrowed funds:**

Rates currently available to the bank for debt with similar terms and remaining maturities are used to estimate fair value of existing debt.

(28)

## Commitments to extend credit and standby letters of credit:

The fair value of commitments is estimated using the fees currently charged to enter into similar agreements, taking into account the remaining terms of the agreements and the present creditworthiness of the counterparties. For fixed-rate loan commitments, fair value also considers the difference between current levels of interest rates and the committed rates. The fair value of letters of credit is based on fees currently charged for similar agreements or on the estimated cost to terminate them or otherwise settle the obligations with the counterparties at the reporting date.

The estimated fair values of the company's financial instruments (in thousands) are as follows:

	March 31, 2010		December 31, 2009	
	Carrying Value	Fair Value	Carrying Value	Fair Value
<b>FINANCIAL ASSETS</b>				
Cash and short term investments	\$80,227	\$80,227	\$ 86,364	\$ 86,364
Securities	260,950	260,853	273,633	273,522
Gross Loans	943,625	952,701	949,826	955,369
<b>FINANCIAL LIABILITIES</b>				
Deposits	\$1,053,483	\$1,058,702	\$1,071,608	\$1,076,700
Borrowed funds	215,696	218,093	217,467	220,434
<b>OFF-BALANCE SHEET FINANCIAL INSTRUMENTS</b>				
Commitments to extend credit and standby letters of credit	\$0	\$163	\$0	\$783

## ITEM 3 – QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

There has been no material change in the company's exposure to market risk during the first three months of 2010. For discussion of the company's exposure to market risk, refer to Item 7A, Quantitative and Qualitative Disclosure about Market Risk, contained in the company's Annual Report incorporated by reference in Form 10-K for the year ended December 31, 2009.

## ITEM 4 – CONTROLS AND PROCEDURES

The company carried out an evaluation, under the supervision and with the participation of the company's management, including the company's Chief Executive Officer along with the company's Chief Financial Officer, of the effectiveness of the design and operation of the Company's disclosure controls and procedures, as such term is defined under Rule 13a – 15(e) promulgated under the Securities Exchange Act of 1934, as amended (the Exchange Act). Based upon that evaluation, the company's Chief Executive Officer along with the company's Chief Financial Officer concluded that the company's disclosure controls and procedures are effective to ensure that information required to be disclosed in the reports that the company files or submits under the Securities Exchange Act of 1934 is recorded, processed, summarized and reported within the time periods specified in the rules and forms of the Securities and Exchange Commission.

There were no changes in our internal control over financial reporting that occurred during the period covered by this quarterly report that have materially affected, or are, reasonably likely to materially affect, the company's internal

control over financial reporting.
