ITEM 1 – BUSINESS

General

Federated Investors, Inc., a Pennsylvania corporation, together with its consolidated subsidiaries (collectively, Federated), is a leading provider of investment management products and related financial services. Federated has been in the investment management business since 1955 and is one of the largest mutual fund managers in the United States with \$369.7 billion in assets under management at December 31, 2011.

Federated sponsors, markets and provides investment-related services to various investment products, including mutual funds and Separate Accounts (which include separately managed accounts, institutional accounts, sub-advised funds and other managed products). Federated's principal source of revenue is investment advisory fee income earned by various subsidiaries of Federated pursuant to investment advisory contracts with the investment products. These subsidiaries are registered as investment advisers under the Investment Advisers Act of 1940 (Advisers Act). Investment advisers are compensated for their services in the form of investment advisory fees based primarily upon the assets under management of the investment products.

Federated provided investment advisory services to 134 Federated-sponsored funds (the Federated Funds) as of December 31, 2011. Federated markets these funds to banks, broker/dealers and other financial intermediaries who use them to meet the needs of their customers, including retail investors, corporations and retirement plans. The funds sponsored by Federated are domiciled in the U.S., with the exception of Federated International Funds Plc and Federated Unit Trust, which are domiciled in Dublin, Ireland. Most of Federated's U.S.-domiciled funds are registered under the Investment Company Act of 1940 (Investment Company Act) and under applicable federal laws. Each of the U.S.-domiciled funds enters into an advisory agreement that is subject to annual approval by the fund's board of directors or trustees, a majority of whom are not interested persons of the funds or Federated as defined under the Investment Company Act. In general, material amendments to such advisory agreements must be approved by the funds' shareholders. A significant portion of Federated's revenue is derived from these advisory agreements, which generally are terminable upon 60 days notice to the investment adviser.

Of the 134 Federated Funds as of December 31, 2011, Federated's investment advisory subsidiaries managed 48 money market funds totaling \$255.9 billion in assets under management, 51 fixed-income funds with \$37.2 billion in assets under management and 35 equity funds with \$21.9 billion in assets under management.

As of December 31, 2011, Federated provided investment advisory services to \$45.8 billion in Separate Account assets. These Separate Accounts represent assets of high-net-worth individuals, government entities, pension and other employee benefit plans, corporations, trusts, foundations, endowments, mutual funds and other products sponsored by third parties. Fees for Separate Accounts are typically based on assets under management pursuant to investment advisory agreements that may be terminated at any time.

In addition, Federated managed liquidation portfolios which include portfolios of distressed fixed-income securities. In the distressed security category, Federated has been retained by third parties to manage these assets through an orderly liquidation process that will generally occur over a multi-year period. As of December 31, 2011, Federated managed two liquidation portfolios with \$8.9 billion in assets.

Certain Federated Funds have adopted distribution plans that, subject to applicable law, provide for payment to Federated for distribution expenses, including sales commissions paid to broker/dealers. These distribution plans are implemented through a distribution agreement between Federated and each respective fund. Although the specific terms of each such agreement vary, the basic terms of the agreements are similar. Pursuant to these agreements, Federated acts as underwriter for the funds and distributes shares of the funds primarily through unaffiliated dealers. Each distribution plan and agreement is initially approved by the directors or trustees of the respective fund and is reviewed for approval by such directors or trustees annually.

Federated also provides a broad range of services to support the operation and administration of the Federated Funds. These services, for which Federated receives fees pursuant to agreements with the Federated Funds, include administrative services, shareholder servicing and general support.

Total managed assets are composed of Federated Funds, Separate Accounts and Liquidation Portfolios and represent the balance of assets under management at a point in time. Total managed assets for the past three years were as follows:

dollars in millions	As of December 31,			2011 vs. 2010	2010 vs. 2009		
	2011	2010	2009				
Money Market	\$285,140	\$276,026	\$313,260	3	% (12)%	
Fixed-Income	44,814	40,705	33,787	10	% 20	%	
Equity	30,887	30,802	29,673	0	% 4	%	
Liquidation Portfolios	8,856	10,708	12,596	(17)%	(15)%
Total Managed Assets	\$369,697	\$358,241	\$389,316	3	% (8)%	

Average managed assets represent the average balance of assets under management during a period of time. Because substantially all revenue and distribution expense are generally calculated daily based on assets under management, changes in average managed assets are typically a key indicator of changes in revenue earned and asset-based expenses incurred during the same period. Average managed assets for the past three years were as follows:

dollars in millions	Year ended December 31,			2011 vs. 2010	2010 vs. 2009		
	2011	2010	2009				
Money Market	\$271,501	\$268,701	\$343,265	1	% (22)%	
Fixed-Income	42,573	37,690	28,684	13	% 31	%	
Equity	30,560	29,104	26,680	5	% 9	%	
Liquidation Portfolios	9,753	11,579	6,966	(16)%	66	%
Total Average Managed Assets	\$354,387	\$347,074	\$405,595	2	% (14)%	

Changes in Federated's average asset mix year-over-year across both asset class and product types have a direct impact on Federated's operating income. Asset mix impacts Federated's total revenue due to the difference in the fee rates earned per invested dollar on each asset class and product type. Equity products generally have a higher management-fee rate than fixed-income products, money market products and liquidation portfolios. Likewise, mutual fund products typically have a higher management-fee rate than Separate Accounts. Similarly, traditional separate accounts typically have a higher management-fee rate than liquidation portfolios. Additionally, certain components of distribution expense can vary depending upon the asset class, distribution channel and/or the size of the customer relationship. Federated generally pays out a larger portion of the revenue earned from managed assets in money market funds than managed assets in equity or fixed-income funds.

Federated's revenues from investment advisory, administrative and other service fees provided under agreements with the Federated Funds and other entities over the last three years were as follows:

dollars in thousands	Year ended December 31,			2011 vs. 2010	2010 vs. 2009		
	2011	2010	2009				
Investment advisory fees, net	\$586,340	\$639,404	\$749,823	(8)%	(15)%

Total revenue	\$895,114	\$951,943	\$1,175,950	(6)%	(19)%

As of December 31, 2011, Federated has the following revenue concentrations:

(a) Revenue Concentration by Asset Class

Approximately 46% of Federated's total revenue for 2011 was attributable to money market assets. A significant change in Federated's money market business or a significant reduction in money market assets due to regulatory changes, changes in the financial markets including significant and rapid increases in interest rates over a short period of time causing certain investors to prefer direct investments in interest-bearing securities, significant deterioration in investor confidence, further persistent declines in or additional prolonged periods of historically low short-term interest rates and resulting fee waivers or other circumstances, could have a material adverse effect on Federated's results of operations.

Current Regulatory Environment

In January 2010, the Securities and Exchange Commission (SEC) adopted extensive amendments to Rule 2a-7 of the Investment Company Act of 1940 aimed at enhancing the resiliency of money market funds. These amendments included a series of enhancements including rules that required all money market funds to meet specific portfolio liquidity standards and rules that significantly enhanced the public disclosure and regulatory reporting obligations of these funds. In Federated's view, the amendments of 2010 meaningfully and sufficiently strengthened money market funds. Recent experience demonstrated that the amendments of 2010 were effective in meeting heightened requests for redemptions occurring at various times throughout 2011 in connection with the U.S. credit rating downgrade and the ongoing European debt crisis.

The SEC staff is considering additional changes to Rule 2a-7 that could adversely impact the viability of money market funds, including requiring a floating net asset value, imposing capital requirements, and creating redemption restrictions. Federated believes the changes currently under consideration, if enacted, would significantly reduce the utility and attractiveness of money market funds to investors. Thus, rather than enhance the resiliency of money market funds, the contemplated changes would potentially severely harm the utility of money market funds for investors who, in Federated's view, value money market funds in their current form as an efficient and effective cash management investment product offering daily liquidity at par. It has been reported that the SEC may propose amendments to Rule 2a-7 as early as the first quarter of 2012.

If ultimately enacted, some or all of these changes would be detrimental to Federated's money market fund business and could materially and adversely affect Federated's operations. The very proposal of such amendments could have an adverse impact on Federated's money market fund business and operations and could also negatively impact the short-term credit markets. Management is carefully monitoring developments in this area and plans to actively participate both individually and with industry groups in the public comment process that would accompany any rule change proposal. Federated is unable to assess the degree of any potential impact such additional reforms may have on its business and operations until such proposals are issued. Even when issued, the final version of any SEC rule amendment could vary significantly from the form in which it is proposed.

Historically Low Short-Term Interest Rates

In certain money market funds, the gross yield is not sufficient to cover all of the fund's normal operating expenses due to historically low short-term interest rates. Since the fourth quarter 2008, Federated has voluntarily waived fees in order for certain funds to maintain positive or zero net yields. These fee waivers were partially offset by related reductions in distribution expense and net income attributable to noncontrolling interests as a result of Federated's ability to share the impact of the waivers with third-party intermediaries.

The impact of such fee waivers on various components of Federated's Consolidated Statements of Income was as follows for the years ended December 31:

dollars in millions	2011	2010	2009	2011 vs. 2010	2010 vs. 2009	
Investment advisory fees	\$(201.6)	\$(134.3)	\$(69.0)	50	% 95	%
Other service fees	(119.1)	(107.3)	(51.6)	11	% 108	%
Total Revenue	(320.7)	(241.6)	(120.6)	33	% 100	%
Distribution expense	(232.3)	(186.6)	(86.4)	24	% 116	%
Operating income	(88.4)	(55.0)	(34.2)	61	% 61	%
Noncontrolling interest	(6.5)	(1.0)	0	550	% N/A	
Pre-tax impact	\$(81.9)	\$(54.0)	\$(34.2)	52	% 58	%

During 2011, changes in asset mix as well as further declines in interest rates for certain money market investments caused an increase in these fee waivers. (See Note (22) to the Consolidated Financial Statements incorporated by reference in Item 8 of Part II of this Form 10-K for information regarding the quarterly pre-tax impact of the fee waivers.) Based on recent Federal Reserve Bank commentary on their outlook for interest rates, management expects the fee waivers and the related reduction in distribution expense and net income attributable to noncontrolling interests will continue at least until late 2014. Based on recent market conditions and assuming asset levels remain constant, fee

waivers for the first quarter 2012 may result in a net negative pre-tax impact on income of approximately \$27 million. Increases in short-term interest rates that result in higher yields on securities purchased in money market fund portfolios would reduce the net pre-tax impact of these waivers. Management estimates that an increase of 10 basis points in gross yields on securities purchased in money market fund portfolios will likely reduce the net pre-tax impact of these waivers between thirty-five and forty percent from the current levels and an increase of 25 basis points would reduce the impact between sixty-five and seventy percent. The actual amount of future

fee waivers could vary significantly from management's estimates as they are contingent on a number of variables including, but not limited to, changes in assets within the money market funds, available yields on instruments held by the money market funds, actions by the Federal Reserve, the U.S. Department of the Treasury and other governmental entities, changes in expenses of the money market funds, changes in the mix of money market customer assets, Federated's willingness to continue the fee waivers and changes in the extent to which the impact of the waivers is shared by third parties.

(b) Revenue Concentration by Investment Fund

Approximately 12% and 11% of Federated's total revenue for 2011 were derived from services provided to two sponsored funds, the Federated Kaufmann Fund and the Federated Prime Obligations Fund, respectively. A significant and prolonged decline in the assets under management in these funds could have a material adverse effect on Federated's future revenues and, to a lesser extent, net income, due to a related reduction to distribution expenses associated with these funds.

(c) Revenue Concentration by Customer

Approximately 10% of Federated's total revenue for 2011 was derived from services provided to one intermediary customer, the Bank of New York Mellon Corporation. Significant changes in Federated's relationship with this customer could have a material adverse effect on Federated's future revenues and, to a lesser extent, net income, due to related material reductions to distribution expenses associated with this intermediary.

(d) Revenue Concentration by Geographical Location

Federated's revenues from domestic and foreign operations over the last three years were as follows:

	Year ended December 31,			2011	2010
dollars in thousands	2011	2010	2009	vs. 2010	vs. 2009
Domestic	\$878,504	\$929,903	\$1,140,956	(6)%	(18)%
Foreign	16,610	22,040	34,994	(25)%	(37)%
Total revenue	\$895,114	\$951,943	\$1,175,950	(6)%	(19)%

Investment Products

Federated offers a wide range of products, including money market, equity and fixed-income investments. Federated's mix includes products that Federated expects to be in demand under a variety of economic and market conditions. Federated has structured its investment process to meet the requirements of fiduciaries and others who use Federated's products to meet the needs of their customers. Fiduciaries typically have stringent demands regarding portfolio composition, risk and investment performance.

Federated is one of the largest U.S. managers of money market assets, with \$285.1 billion in such assets under management at December 31, 2011. Federated has developed expertise in managing cash for institutions, which typically have stringent requirements for regulatory compliance, relative safety, liquidity and competitive yields. Federated has managed money market funds for over 35 years and began selling money market fund products to institutions in 1974. Federated also manages retail money market products that are typically distributed through broker/dealers. Federated manages money market assets in the following asset classes: government (\$147.9 billion); prime (\$113.0 billion); and tax free (\$24.2 billion).

Federated's fixed-income assets totaled \$44.8 billion at December 31, 2011 and are managed in a wide range of sectors including multi-sector (\$19.3 billion); municipal (\$6.3 billion); U.S. government (\$6.0 billion); U.S. corporate (\$4.8 billion); mortgage-backed (\$3.3 billion); high-yield (\$3.1 billion); and international/global (\$2.0 billion). Federated's fixed-income products offer fiduciaries and others a broad range of highly defined products designed to meet their investment needs.

Equity assets totaled \$30.9 billion at December 31, 2011 and are managed across a wide range of styles including value (\$13.7 billion); growth (\$7.8 billion); blend (\$4.0 billion); alternative (\$2.1 billion); and international/global (\$1.8 billion). Federated also manages assets in balanced and asset allocation funds (\$1.5 billion). These asset allocation funds may include fixed-income assets.

Federated's liquidation portfolios totaled \$8.9 billion at December 31, 2011.

Investment products are generally managed by a team of portfolio managers supported by fundamental and quantitative research analysts. Federated's proprietary, independent investment research process is centered on the

integration of several fundamentals: fundamental research and credit analysis, quantitative research models, style-consistent and disciplined portfolio construction and management, performance attribution and trading.

6

Distribution Channels

Federated's distribution strategy is to provide products geared toward financial intermediaries, primarily banks, broker/dealers and investment advisers and directly to institutions such as corporations and government entities. Federated provides comprehensive investment management to approximately 4,700 institutions and intermediaries including corporations, government entities, insurance companies, foundations, endowments, banks and broker/dealers. Federated uses its trained sales force of approximately 200 representatives and managers to add new customer relationships and strengthen and expand existing relationships.

Product Markets

Federated's investment products are primarily distributed in three markets. These markets and the relative percentage of managed assets at December 31, 2011 attributable to such markets are as follows: wealth management and trust (51%), broker/dealer (30%) and global institutional (17%).

Wealth Management & Trust, Global Capital Markets and Institutional Cash. Federated pioneered the concept of providing liquidity management to bank trust departments through money market mutual funds over 35 years ago, and has since expanded our services nationwide to institutional cash management and treasury professionals, as well as financial professionals. Today, wealth management professionals across all of these types of firms use a broad range of Federated's equity and fixed-income funds to invest the assets over which they have discretion.

The majority of Federated's managed assets from the wealth management channel are invested in money market funds. In allocating investments across various asset classes, investors typically maintain a portion of their portfolios in cash or cash equivalents, including money market funds, irrespective of trends in bond or stock prices. In addition, Federated offers an extensive menu of equity and fixed-income mutual funds and Separate Accounts structured for the wealth management and trust market. In addition to bank trust departments and registered investment advisory firms, Federated provides products and services to capital markets clients (institutional brokerages generally within banks) and directly to cash management and treasury departments at major corporations and government entities.

Federated employs a dedicated sales force backed by an experienced support staff to offer products and services to the wealth management and trust market. As of December 31, 2011, managed assets in this market included \$167.2 billion in money market assets, \$14.1 billion in fixed-income assets and \$6.7 billion in equity assets.

Broker/Dealer. Federated distributes its products in this market through a large, diversified group of approximately 1,500 national, regional and independent broker/dealers and bank broker/dealers. Federated maintains sales staff dedicated to calling on broker/dealers, bank broker/dealers and insurance interests. Broker/dealers use Federated's products to meet the needs of their customers, who are typically retail investors. Federated offers products with a variety of commission structures that enable brokers to offer their customers a choice of pricing options. Federated also offers money market mutual funds as cash management products designed for use by its broker/dealer clients. As of December 31, 2011, managed assets in the broker/dealer market included \$74.1 billion in money market assets, \$18.1 billion in fixed-income assets and \$17.5 billion in equity assets.

Global Institutional. Federated maintains a dedicated sales staff to focus on the distribution of its products to a wide variety of global institutional customers: corporations, corporate and public pension funds, government entities, foundations, endowments, hospitals, and non-Federated investment companies. Federated includes institutional assets gathered in the U.S. in this market, as well as assets gathered from customers outside the U.S. through Federated Investors (U.K.) Ltd. and Federated Asset Management GmbH. As of December 31, 2011, managed assets in the global institutional market included \$39.4 billion in money market assets, \$11.1 billion in fixed-income assets, \$8.9 billion in liquidation portfolios and \$3.1 billion in equity assets.

Competition

The investment management business is highly competitive. Competition is particularly intense among mutual fund providers. According to the Investment Company Institute, at the end of 2011, there were approximately 7,600 open-end mutual funds of varying sizes and investment objectives whose shares are currently being offered to the public both on a sales-load and no-sales-load basis. In addition to competition from other mutual fund managers and investment advisers, Federated and the mutual fund industry compete with investment alternatives offered by

insurance companies, commercial banks, broker/dealers, other financial institutions, hedge funds and exchange traded funds.

Competition for sales of investment products is influenced by various factors, including investment performance, in terms of attaining the stated objectives of the particular products and in terms of fund yields and total returns, advertising and sales

7

promotional efforts, investor confidence and type and quality of services.

Regulatory Matters

Federated and its investment management business are subject to extensive regulation in the United States and abroad. Federated and the Federated Funds are subject to Federal securities laws, principally the Securities Act of 1933, the Investment Company Act and the Investment Advisers Act of 1940, state laws regarding securities fraud, and regulations promulgated by various regulatory authorities, including the SEC, the Financial Industry Regulatory Authority (FINRA), and the New York Stock Exchange (the NYSE). Federated is also affected by the regulations governing banks and other financial institutions and, to the extent operations take place outside the United States, by foreign laws and regulatory authorities. Changes in laws, regulations or governmental policies, and the costs associated with compliance, could materially and adversely affect the business and operations of Federated. From time to time, the Federal securities laws have been augmented substantially. For example, among other measures, Federated has been impacted by the Sarbanes-Oxley Act of 2002, the Patriot Act of 2001 and the Gramm-Leach-Bliley Act of 1999. The Dodd-Frank Wall Street Reform and Consumer Protection Act (Dodd-Frank Act) was enacted into law on July 21, 2010. Under the Dodd-Frank Act, Federated, as well as mutual funds, continue to be primarily regulated by the SEC. The Dodd-Frank Act provides, however, for a new systemic risk regulation regime under which it is possible that Federated and/or any one or more of its mutual funds could be designated by a newly created Financial Stability Oversight Council (FSOC) for enhanced prudential regulation by the Federal Reserve Board, in addition to primary regulation by the SEC. Other provisions of the Dodd-Frank Act may affect intermediaries in their sale or use of Federated's products. Prior to complete implementation, it will be difficult to assess the full impact of the Dodd-Frank Act on Federated.

On October 21, 2010, the President's Working Group issued its report on Money Market Fund Reform Options (the Report). The President's Working Group was tasked with studying possible reforms relating to money market funds that could mitigate systemic risk in the financial markets (including the potential for disruption in the financial markets caused by rapid shareholder redemptions in money market funds). The Report discusses the conditions that could cause money market funds to experience rapid shareholder redemptions and describes the advantages and disadvantages of a variety of policy options that could reduce the risk of such rapid redemptions. The Report suggests that the FSOC examine these options as part of its implementation of the Dodd-Frank Act.

In January 2010, the SEC adopted extensive amendments to Rule 2a-7 of the Investment Company Act aimed at enhancing the resiliency of money market funds. These amendments included a series of enhancements including rules that required all money market funds to meet specific portfolio liquidity standards and rules that significantly enhanced the public disclosure and regulatory reporting obligations of these funds. In Federated's view, the amendments of 2010 meaningfully and sufficiently strengthened money market funds. Recent experience demonstrated that the amendments of 2010 were effective in meeting heightened requests for redemptions occurring at various times throughout 2011 in connection with the U.S. credit rating downgrade and the ongoing European debt crisis.

The SEC staff is considering additional changes to Rule 2a-7 that could adversely impact the viability of money market funds, including requiring a floating net asset value, imposing capital requirements, and creating redemption restrictions. Federated believes the changes currently under consideration, if enacted, would significantly reduce the utility and attractiveness of money market funds to investors. Thus, rather than enhance the resiliency of money market funds, the contemplated changes would potentially severely harm the utility of money market funds for investors who, in Federated's view, value money market funds in their current form as an efficient and effective cash management investment product offering daily liquidity at par. It has been reported that the SEC may propose amendments to Rule 2a-7 as early as the first quarter of 2012.

If ultimately enacted, some or all of these changes would be detrimental to Federated's money market fund business and could materially and adversely affect Federated's operations. The very proposal of such amendments could have an adverse impact on Federated's money market fund business and operations and could also negatively impact the short-term credit markets. Management is carefully monitoring developments in this area and plans to actively participate both individually and with industry groups in the public comment process that would accompany any rule change proposal. Federated is unable to assess the degree of any potential impact such additional reforms may have on

its business and operations until such proposals are issued. Even when issued, the final version of any SEC rule amendment could vary significantly from the form in which it is proposed.

In addition, during the past few years the SEC, FINRA and the NYSE have adopted regulations that have increased Federated's operating expenses and affected the conduct of its business, and may continue to do so. Other significant regulations or amendments to regulations have been proposed that, if adopted, will affect Federated and the Federated Funds. Federated anticipates that other reforms and regulatory actions affecting Federated and/or the mutual fund industry are likely to occur,

including proposals for further amendments to Rule 2a-7.

Over the past few years, various service industries, including mutual fund service providers, have been the subject of changes in tax policy that impact their state and local tax liability. Changes that have been adopted or proposed include (1) an expansion of the nature of a service company's activities that subject it to tax in a jurisdiction, (2) a change in the methodology by which multi-state companies apportion their income between jurisdictions, and (3) a requirement that affiliated companies calculate their state tax as one combined entity. As adopted changes become effective and additional jurisdictions effect similar changes, there could be a material adverse effect on Federated's tax liability and effective tax rate and, as a result, net income.

Employees

At December 31, 2011, Federated employed 1,351 persons.

Forward-Looking Statements

Certain statements in this Annual Report on Form 10-K and the 2011 Annual Report to Shareholders, including those related to asset flows and business mix; obligations to make additional contingent payments pursuant to acquisition agreements; obligations to make additional payments pursuant to employment arrangements; legal proceedings; future cash needs and management's expectations regarding borrowing; future principal uses of cash; performance indicators; impact of accounting policies and new accounting pronouncements; concentration risk; indemnification obligations; the impact of increased regulation including potential rule proposals by the Securities and Exchange Commission affecting money market funds; the prospect of increased distribution-related expenses; management's expectations regarding fee waivers and the impact of such waivers on revenues and net income; the ability to raise additional capital; the rising costs of risk management; possible impairment charges; tax liability and the realization of deferred tax assets; capital losses; the impact of the interest rate swap and the various items set forth under the section entitled Risk Factors constitute forward-looking statements, which involve known and unknown risks, uncertainties, and other factors that may cause the actual results, levels of activity, performance or achievements of Federated or industry results, to be materially different from any future results, levels of activity, performance or achievements expressed or implied by such forward-looking statements. Among other risks and uncertainties, market conditions may change significantly resulting in changes to Federated's asset flows and business mix, which may cause a decline in revenues and net income, result in impairments and increase the amount of fee waivers incurred by Federated. The obligation to make contingent payments is based on certain growth and fund performance targets and will be affected by the achievement of such targets, and the obligation to make additional payments pursuant to employment agreements is based on satisfaction of certain conditions set forth in those agreements. Future cash needs and future uses of cash will be impacted by a variety of factors, including the number and size of any acquisitions, Federated's success in distributing its products, the resolution of pending litigation, potential increases in costs relating to risk management, as well as potential changes in assets under management and/or changes in the terms of distribution and shareholder services contracts with intermediaries who offer Federated's products to customers. Federated's risks and uncertainties also include liquidity and credit risks in Federated's money market funds and revenue risk, which will be affected by yield levels in money market fund products, changes in market values of assets under management and the ability of Federated to collect fees in connection with the management of such products. Many of these factors may be more likely to occur as a result of the increased scrutiny of the mutual fund industry by federal and state regulators, and the recent and ongoing disruption in global financial markets. As a result, no assurance can be given as to future results, levels of activity, performance or achievements, and neither Federated nor any other person assumes responsibility for the accuracy and completeness of such statements in the future. For more information on these items, see the section entitled Risk Factors under Item 7 of Part II, Management's Discussion and Analysis of Financial Condition and Results of Operations.

PART II

ITEM 5 – MARKET FOR REGISTRANT'S COMMON EQUITY, RELATED STOCKHOLDER MATTERS AND ISSUER PURCHASES OF EQUITY SECURITIES

The following table summarizes stock repurchases under Federated's share repurchase program during the fourth quarter of 2011.

	Total Number of Shares Purchased	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs ¹	Maximum Number of Shares that May Yet Be Purchased Under the Plans or Programs ¹
October	10,000	\$19.77	10,000	2,699,834
November	490,000	16.30	490,000	2,209,834
December ²	61,850	12.41	50,000	2,159,834
Total	561,850	\$15.93	550,000	2,159,834

Federated's share repurchase program was authorized in August 2008 by the board of directors and permits the purchase of up to 5.0 million shares of Federated Class B common stock with no stated expiration date. No other plans existed as of December 31, 2011.

²In December 2011, 11,850 shares of restricted stock with a price of \$3.00 per share were repurchased in connection with employee separations.

The following performance graph compares the total shareholder return of an investment in Federated's Class B Common Stock to that of the Standard and Poor's 500[®] Index (S&P 500 Index) and to the S&P 1500 Asset Management & Custody Banks Index for the five-year period ended on December 31, 2011.

The graph assumes that the value of the investment in Federated's Class B Common Stock and each index was \$100 on December 31, 2006. Total return includes reinvestment of all dividends. As a member of the S&P 500 Index, Federated is required to include this comparison. Peer Group returns are weighted by the market capitalization of each firm at the beginning of each measurement period. The historical information set forth below is not necessarily indicative of future performance. Federated does not make or endorse any predictions as to future stock performance.

	12/31/2007	12/31/2008	12/31/2009	12/31/2010	12/31/2011
