Eaton Vance Insured Municipal Bond Funds as of March 31, 2006

## INVESTMENT UPDATE

Eaton Vance Insured Municipal Bond Funds (the Funds) are designed to provide current income exempt from regular federal income tax, federal alternative minimum tax and, in state specific funds, state personal income taxes. The Funds invest primarily in high-grade municipal securities that are insured as to the timely payment of principal and interest.

### **Economic and Market Conditions**

The economy expanded at a 4.8% pace in the first quarter of 2006, an increase from the 1.7% rate in the fourth quarter. Even with a cooling housing market, the economy generated respectable growth in 2005 and early 2006. Despite high energy prices, rising mortgage rates and a persistent tightening by the Federal Reserve (the Fed), the economy continued to create jobs 211,000 in March 2006. The economy appeared to be sustaining growth in both the manufacturing and service sectors, with moderate signs of inflationary pressures.

Investor sentiment regarding the Fed's monetary policy appears to have stabilized in recent months as investors have begun to anticipate the end of the Fed's series of interest rate hikes (which began in June 2004). The Fed has raised rates at all of the last 15 Open Market Committee meetings, with the current Federal Funds rate standing at 4.75%.

Boosted by lower-than-anticipated long-term interest rates, the municipal market saw record supply in 2005, more than \$400 billion in new issuance. However, supply has lagged thus far in 2006, contributing to municipal bond outperformance. At March 31, 2006, long-term AAA-rated insured municipal bonds yielded 93% of U.S. Treasury bonds with similar maturities.\*

For the six months ended March 31, 2006, the Lehman Brothers Municipal Bond Index (the Index), a broad-based, unmanaged municipal market index, posted a modest gain of 0.98%. For information about each Fund's performance and the performance of funds in the same Lipper Classification, see the Performance Information and Portfolio Composition pages that follow.

### **Management Discussion**

The Funds invest primarily in bonds with maturities of 10 years or longer, as longer-maturity bonds historically have provided greater tax-exempt income for investors than shorter-maturity bonds. Given the flattening of the yield curve for fixed-income securities over the past 18 months with shorter-maturity yields rising more than longer-maturity yields the long end of the curve was a relatively attractive place to be positioned. However, given the leveraged nature of the Funds, rising short-term rates have increased the borrowing costs associated with the leverage. As borrowing costs have risen, the income generated by the Funds has declined. Please see the Performance Information and Portfolio Composition pages that follow for a description of each Fund's leverage as of March 31, 2006.

## Edgar Filing: EATON VANCE INSURED PENNSYLVANIA MUNICIPAL BOND FUND - Form N-CSRS

During the six months ended March 31, 2006, the Fed raised short-term interest rates at regular intervals, and commodities prices rose significantly. However, the economy grew at a solid pace, with moderate inflation. In this climate, Fund management continued to maintain a somewhat cautious outlook on interest rates and positioned the Funds' durations accordingly. Duration measures a bond fund's sensitivity to changes in interest rates.

During the past year, management invested in bonds with attractive coupons and long call protection. These strategies contributed positively to the Funds' performances over the 6-month period.

Management continued to focus on finding relative value within the marketplace in issuer names, coupons, maturities and sectors. Relative value trading, which seeks to capitalize on undervalued securities, has enhanced the Funds' returns during the year. Finally, management continued to monitor closely call protection in the Funds. Call protection remains an important strategic consideration for municipal bond investors, especially because refinancing activity has increased over the past six months.

The Fund invests primarily in debt securities issued by Pennsylvania municipalities. The ability of the issuers of the debt securities to meet their obligations may be affected by economic developments in a specific industry or municipality. In order to reduce the risk associated with such economic developments, at March 31, 2006, 91.2% of total investments are backed by bond insurance of various financial institutions and financial guaranty assurance agencies. The aggregate percentage insured by an individual financial institution ranged from 1.0% to 25.2% of total investments.

(1) Security exempt from registration under Rule 144A of the Securities Act of 1933. These securities may be sold in transactions exempt from registration, normally to qualified institutional buyers. At March 31, 2006, the aggregate value of the securities is \$5,923,668 or 13.3% of the Fund's net assets applicable to common shares.
