VODAFONE FIRST TO BRING NEW WINDOWS

PHONE FROM LG TO EUROPEAN CONSUMERS

Exclusive Until End December 2009

- **Companies combine to offer best-in-class Windows phone experience for customers**
- **The LG GM750 next generation Smartphone is easy and engaging to use, and helps you get more out of your life**
- **With Vodafone high-speed mobile services and LG S-Class user-interface, features and phone design, the GM750 Windows phone packs smart, easy-to-use features into a small, sleek form**
- **Available exclusively until the end of December in an initial seven countries from 6 October**

Vodafone and LG Electronics today announce the launch of the LG GM750, a new Windows® phone based on Windows Mobile 6.5 from 6 October. Fully loaded with fun, easy-to-use features and services that help people take control of their lives thanks to fast internet browsing, access to personal and work email accounts and calendar synchronisation, the GM750 packs a lot into its sleek, slim form.

With LG's S-Class user-interface and fast internet browsing via Vodafone's high-speed mobile broadband network or WiFi, information is always at the user's fingertips. Its large 3.0" full touchscreen makes it easy to navigate while browsing the internet, writing text messages and memos, or getting directions with its in-built GPS navigation function.

The intuitive user-interface on Windows Mobile 6.5 is easily customisable so Vodafone customers can personalise their phone to their own particular style. Using 3rd party applications, customers can change the look and feel with a personal background or designer themes and personalise the home screen so the information they need, such as weather reports, the latest traffic

Edgar Filing: VODAFONE GROUP PUBLIC LTD CO - Form 6-K

information or stock prices, is always easy to find. Microsoft Exchange ActiveSync email ensures you never need miss an email again, be it from your personal or work account. As one of a new generation of Windows phones, the GM750 Smartphone is poised to take advantage of future Vodafone services.

In addition to internet and email connectivity, consumers will be able to download applications directly to their phone via Windows Marketplace for Mobile, automatically back up and synch photos, music and texts to their PC using the free My Phone service, plus use Windows Live to check Hotmail or IM with friends on the PC or Xbox video game system. With a 5 megapixel camera as well, with the GM750 customers will have all the tools, features and widgets they'll need to get the most fun from life, and never miss or forget a special moment.

Patrick Chomet, Group Director of Terminals for Vodafone, said: "We're excited to be bringing a new Windows phone with Vodafone high-speed mobile services to our customers through the LG GM750 Smartphone, exclusively until the end of 2009. This stylish, touchscreen Smartphone will have great appeal to both consumer and business customers, and ensures Vodafone delivers on its promise to constantly bring customers new services and greater choice."

Harrison Lee, Head of LG Mobile Communications Europe, explained: "A significant group of consumers demand mobile phones with the most advanced features and services to help them do their job and stay in contact with friends and family on one, easy-to-use, device. They need the technology and services to access email, the internet and the ability to download widgets, applications and fun tools without complexity. The combination of Vodafone's services, Windows Mobile 6.5 platform and our S-Class UI, technology and design expertise, makes the GM750 the mobile package consumers with busy lives have been waiting for."

"Vodafone, LG and Microsoft share a focus on delivering great customer experiences, and the LG GM750 is a powerful example of how customers benefit when industry leaders rally around a common goal," said Todd Peters, corporate vice president, Microsoft Corp. "This new Windows phone benefits from our work with LG to deeply integrate the phone's software and hardware as well as our continued work with Vodafone to make Windows phones broadly available on Vodafone's high-speed network."

The LG GM750 will be available in store initially in seven countries - Germany, Greece, Italy, Netherlands, Spain and the UK, and also in France through SFR, with further countries following soon after.

**VODAFONE EXTENDS POPULAR OWN BRANDED DEVICE RANGE WITH EIGHT NEW DEVICES
IN TIME FOR CHRISTMAS**

- Vodafone partners with CRYSTALLIZED™ - Swarovski Elements to produce an exclusive, stylish addition to the Vodafone 533 Catwalk Collection
- Launch of Vodafone's own branded touchscreen devices
- Opening up internet access to more customers with affordable devices giving customers internet on the go

Vodafone today announces eight new additions to its own branded consumer devices, building on the success of over 20 million handsets shipped so far under the Vodafone brand.

Patrick Chomet, Group Director of Terminals for Vodafone said: I am delighted to be adding further diversity to the Vodafone own branded device range. From fashion-influenced mobiles to business tools, these new handsets will give our customers stylish, contemporary and great value choices. This new range of mobile phones will offer features such as a touchscreen experience and services like the mobile internet to a broad base of both European pre-pay customers and customers in emerging markets, many of whom will be using them for the first time.

As part of Vodafone's strategy to constantly improve the cost and efficiency of its own branded handsets, Vodafone has selected MediaTek chipsets for two of the new devices. The strategic partnership with MediaTek provides Vodafone with the opportunity to offer the Vodafone 340 camera phone at a very affordable price as well as its first entry level, low cost touchscreen device for prepaid customers the Vodafone 541 all without compromising our rigid quality standards.

Stylish additions to the Vodafone 533 Catwalk Collection

Three new designs are being added to the popular slider phone Vodafone 533 Catwalk Collection:

- Red - a version in vibrant metallic red to add to the five trendy colours introduced in Spring 2009
- Lady - a fashion conscious mobile phone. A stunning handset depicting an artist's impression of girls about town, created by Berlin-based artist Tomek Sadurski
- The exclusive Crystal - a unique fashion accessory and perfect Christmas gift. The result of a collaboration between Vodafone and CRYSTALLIZED™ which has employed cutting-edge technology to embed the crystals directly into the sleek black slider case during its manufacturing process. A special coating guarantees the brilliance and total integration of

Edgar Filing: VODAFONE GROUP PUBLIC LTD CO - Form 6-K

the crystals into the handset. The CRYSTALLIZED™ logo is discretely placed on the reverse side of the phone and an exciting CRYSTALLIZED™ Swarovski Elements animation appears on the screen when the phone is activated

Touchscreen devices

The Vodafone 541 Touch is Vodafone's first ever entry level touchscreen phone. With its appealing, fresh design it addresses young pre-pay customers across Vodafone's global footprint and will launch over the course of the coming months.

The higher specification Vodafone 840 Touch has a larger screen and 3G connectivity. Together these devices demonstrate Vodafone's commitment to meet customer needs for contemporary devices with great value offerings.

Extending access to the mobile internet

Access to the mobile internet is more accessible than ever through new, exclusive, affordable devices offering internet on the go. Options include Opera Mini optimised internet browsing on the Vodafone 540 and Vodafone 340, and 3G connectivity on the Vodafone 1240 and Vodafone 840.

- ends -

Notes to editors

(1) Phone specification details:

Vodafone 340 A 2.5G entry-level candy bar device, this is the most affordable camera phone in the range, with a neat and inviting design. The VGA camera handset has a direct access camera key, 1.8 inch display, FM radio, messaging services including MMS and email and Opera Mini for mobile internet access. Depending on the market the all black device comes with a set of exchangeable back covers in white and pink.

Vodafone 533 This slider phone is ideal for customers who want a stylish, great value mobile with a built-in 1.3 megapixel camera, MMS, FM radio, MP3 player, Bluetooth and external memory slot. The refresh adds three new designs - Crystal, Lady and Red - to the successful Catwalk Collection.

Vodafone 540 A great all-round multimedia device in candy bar style. Its strong, slim metallic design has a 2 inch TFT colour display, 2 megapixel camera with video, messaging services including SMS, MMS and email, Opera Mini access to internet services and multimedia features that include MP3, AAC and FM radio. The 540 will launch in Europe with a focus on pre-pay.

Vodafone 541 The 2G Touch tablet device has a 2.4 inch QVGA colour screen, supports finger touch UI and features a 1.3 megapixel camera with video recorder, SMS and MMS messaging services, FM radio and WAP mobile internet browsing with more besides. The device will be available in black and pink, followed later by white and red. The phone will be available on pre-pay in

Europe.

Vodafone 840 The 3G Touch comes with a 2.8 inch QVGA display with finger touch UI, a 2 megapixel camera and multimedia capabilities, including music player and 3G connectivity for mobile internet browsing. This device will come in sandy silver followed by pink and white.

Vodafone 1240 This qwerty candy bar with Visto push email is a great entry level business device which boasts a 262k colour QVGA landscape screen and a 2 megapixel camera, as well as 3G HSDPA. The device comes in black.

10 September 2009

VODAFONE TO LAUNCH MOBILE BROADBAND HOTSPOT

*Vodafone Mobile Broadband Hotspot Creates a Wi-Fi Cloud Capable of
Connecting Up to Five Devices Simultaneously*

Vodafone, the world's leading international mobile telecommunications company today announces the launch of the Vodafone Mobile Broadband Hotspot, extending the benefits of mobile broadband from laptop and netbook customers to users of all Wi-Fi enabled devices in selected markets. The device will initially be available in Germany, Romania and Spain.

The Vodafone Mobile Broadband Hotspot enables both consumer and business customers to connect several devices wirelessly either at home or in the office anywhere within the Vodafone Mobile Broadband footprint. It represents a new category of intelligent devices with mobile broadband connectivity that does not require any type of software installation to use.

The credit-card sized, operating system independent, Mobile Broadband Hotspot enables customers to connect quickly and easily to any device that supports the Wi-Fi standard, then connect to the internet using Vodafone's mobile broadband connectivity. The move is expected to bring the benefits of mobile broadband to a new range of devices such as MP3 players, digital cameras and gaming consoles

With one touch to power on, users will be able to detect the mobile Wi-Fi cloud using any device configured for Wi-Fi and connect up to five devices within a 10-metre radius. An internal battery provides up to four hours of active use on a single charge. The device delivers remarkable performance with speeds of up to 7.2 Mbps on the downlink and 5.7 Mbps on the uplink between the Mobile Broadband Hotspot and the Mobile Broadband network.

The Vodafone Mobile Broadband Hotspot offers mobile professionals, students and families a one-touch connectivity solution that turns Wi-Fi enabled devices such as MP3 players and laptops into connected mobile internet devices, said Huw Medcraft, Mobile Broadband Director, Vodafone. This product brings even more flexibility to our customers, and ensures that Vodafone's market leading mobile broadband can be rolled out to even more devices to give customers greater convenience.

Expandable memory support for up to 16GB via microSD makes the device a flexible and robust platform capable of storing and sharing personal content such as documents, music, video and pictures over Wi-Fi. Access to the expandable memory is separately available to all devices connected to the Vodafone Mobile Broadband Hotspot. The device is supplied by Novatel Wireless (Nasdaq: NVTL), a leader in the design and development of innovative wireless broadband access solutions.

With its leading mobile broadband services and a wide global presence, combined with Novatel's MiFi portfolio of intelligent mobile hotspots, Vodafone customers will have unprecedented opportunities to access the internet with all their Wi-Fi devices virtually anywhere and anytime they want, said Rob Hadley, chief marketing officer for Novatel Wireless. We are very excited to work with Vodafone to provide the most advanced wireless data ecosystem available for customers.

The Vodafone Mobile Broadband Hotspot will be available through Vodafone direct and business sales channels in selected markets. For more information visit

www.support.vodafone.com/MobileBroadbandHotspot and www.support.vodafone.com/MiFi2352

VODAFONE TO OFFER MOBILE MUSIC CATALOGUE DRM-FREE FROM ALL FOUR MAJOR LABELS

Addition of Warner Music makes Vodafone customers first to have 100% major label coverage for DRM-free over-the-air downloads

21 September 2009, London Vodafone today announced a deal with Warner Music which will make Vodafone the first global mobile network operator to offer its customers over-the-air access to the combined music catalogue of the world's four largest music companies in DRM-free format.

Vodafone customers will continue to enjoy their current download service with rights to use tracks they have paid for just once across all of their personal music devices without restriction - but now with the additional benefit of having a far greater number of tracks to choose from.

Furthermore, Vodafone and Warner Music will work together to offer a range of mobile music products such as value-added album bundles that contain additional multimedia content.

Warner Music's addition to our mobile DRM-free catalogue is really great news for our customers," said Pieter Knook, Vodafone Internet Services Director. The response to the DRM-free offering in all the markets where it has launched has been incredibly enthusiastic. Our customers love music and they love the flexibility that DRM-free on mobile gives them.

We're pleased to be expanding our partnership with Vodafone, who share our vision of how to help foster the growth of mobile music and create further opportunities for connecting fans with artists by offering premium album content anytime, anywhere. Eric Daugan, SVP, Digital Business, Warner Music Europe.

Warner Music's wide-ranging inventory of established superstars and up-and-coming talent will start to go live for mobile in DRM-free format straight away, and will contribute to a total library of over 1 million tracks. DRM-free downloads via mobile are already available to Vodafone customers across many European markets with more to come.

- ends -

Notes to Editors:

- 1) DRM-free downloads are already available in the following Vodafone markets: UK, Germany, Italy, Spain, Greece and Ireland, with other countries across the Vodafone footprint coming on stream soon.
- 2) The Warner catalogue will be available to Vodafone operating companies (Germany, Greece, Ireland, Italy, Netherlands, Portugal, Romania, Spain and UK) and partner markets (Austria, Belgium, Bulgaria, Croatia, Cyprus, Slovenia and Switzerland) across Europe.
- 3) Vodafone announced DRM-free mobile distribution deals with Universal Music Group, Sony Music Entertainment and EMI Music on 11th March 2009.

About Warner Music Group

Warner Music Group became the only stand-alone music company to be publicly traded in the United States in May 2005. With its broad roster of new stars and legendary artists, Warner Music Group is home to a collection of the best-known record labels in the music industry including Asylum, Atlantic, Bad Boy, Cordless, East West, Elektra, Nonesuch, Reprise, Rhino, Roadrunner, Rykodisc, Sire, Warner Bros. and Word. Warner Music International, a leading company in national and international repertoire, operates through numerous international affiliates and licensees in more than 50 countries. Warner Music Group also includes Warner/Chappell Music, one of the world's leading music publishers, with a catalog of more than one million copyrights worldwide.

24 September 2009

VODAFONE LAUNCHES A COMBINED 1,000,000 PRIZE FUND TO FIND THE BEST MOBILE WIDGETS

The winning developer, in each of the two phases of the Vodafone Appstar competition, will pocket 100,000

At its international Developer Event today, Vodafone is announcing the launch of a two-phased competition to find the most innovative and useful mobile widgets, giving two victorious developers the chance to bank up to 100,000 in prize money.

Vodafone will outline the widget capabilities of the new Vodafone 360 mobiles at today's Developer Event in front of content publishers, web and mobile developers from around the world.

Split into two phases (the first phase now and second phase during 2010), the Vodafone Appstar competition has a combined prize fund of 1,000,000 which will be shared across eight of Vodafone's largest European operating companies to encourage innovation in the mobile application and widget space. The participating eight countries are: UK, Ireland, Germany, Netherlands, Italy, Spain, Portugal and Greece.

In the initial round of each phase of the competition, developers from anywhere in the world can submit widgets compatible with the new Vodafone 360 mobiles to any one of these eight markets via a competition website. A panel of experts from the local Vodafone operating company will then select three winning entries based on three criteria:

- User experience
- Innovation
- Value to the customer

Edgar Filing: VODAFONE GROUP PUBLIC LTD CO - Form 6-K

The developers responsible for the top three mobile widgets will be awarded prize money of 25,000, 15,000 and 10,000 for coming first, second and third respectively. The 25k winner will also have their entry submitted into a Pan-European competition to decide the best of the best.

The eight competition winners' widgets will then be put to the public vote within the participating eight countries and the winning developer will pocket a further prize of 75,000, bringing their total prize money to 100,000. The runner up will win a total of 50,000.

The competition format will then be repeated next year to encourage more participation.

Vodafone is committed to encouraging talent and innovation in this area and we hope that this prize fund will provide a fitting incentive to help bring this talent to the fore, said Pieter Knook, Director of Vodafone Internet Services. Our job is to bring relevant and local choices in widgets that will make the mobile internet more personal for our customers.

Widgets or apps can range from those capable of giving you the latest news on your phone's home screen to location-aware travel tools.

Software developers will be asked to write applications based on the latest Joint Innovation Lab (JIL) Software Developer Kit found at www.jil.org.

For full details of the competition, please visit the website at www.jil.org/vodafone/appstar.

24 September 2009

VODAFONE ANNOUNCES VODAFONE 360

A SUITE OF INNOVATIVE, NEW INTERNET SERVICES FOR MOBILE AND PC

- Vodafone 360 is a brand new set of internet services for the mobile and PC which gathers all of a customer's friends, communities, entertainment and personal favourites (like music, games, photos and video) in one place
- At its heart Vodafone 360 has the most personal address book available, bringing together all of the contacts from the mobile phone, social networks and other internet accounts. It works across a range of mobile phones, including the new, exclusive Vodafone 360 phones, and synchs automatically with the PC
- Connected address book Vodafone People, open to everyone on any network across over 100 popular mobile phones, automatically synchs all contacts from a customer's phone, Facebook®, Windows Live Messenger and Google Talk, and will soon also include Twitter, Hyves and studiVZ
- New suite of internet services accessible on multiple handsets as well as PC or Mac, including a wide range of apps, games, music and mapping services
- Two tailor-made Vodafone 360 mobile handsets, manufactured by Samsung, give the best customer experience of the services including the unique 3D contacts display, driven by Vodafone's proximity algorithm, bringing the most frequently contacted people closer to the front
- Proprietary User Interface on Vodafone 360 mobiles, designed and developed by Vodafone using the LiMo operating system
- Launching first in eight European countries by Christmas

24 September, 2009. London. Vodafone today announces the launch of Vodafone 360 - a new suite of innovative internet services for the mobile and PC.

Edgar Filing: VODAFONE GROUP PUBLIC LTD CO - Form 6-K

All of a customer's contacts, status updates and messaging services are brought together in one place enhancing the customer's experience and use of social media. Customers will have integrated contacts, music, photos and mapping services and can share their favourite music choices and even their physical location, how and when they choose, with their chosen groups of friends.

The service is automatically backed up and synchronised, regularly and wirelessly, between the mobile and PC or Mac. All contacts updates, emails, photos and conversation history or settings changes made either at home or when on the move are saved, keeping all the content up-to-date.

Vodafone 360 is the first service of its kind to offer customers the benefits of a truly integrated mobile internet experience that gathers all their contacts and content, all around them, in one place, said Pieter Knook, Director of Internet Services at Vodafone Group.

The beauty of Vodafone 360 is that all the services work together and they are easy to use. Vodafone 360 enables customers digital lives. Customers can stay in touch and share experiences through social networks, instant messaging, email, apps, maps, music and buying digital content on their mobile bill, with the personalised address book at its heart.

Vodafone 360 is a substantiator of Vodafone's new brand expression "power to you" - which is focused on putting the customer in control and enabling simple and easy to manage communications, both mobile and fixed.

Benefits:

- bringing together all contacts and content in one place and allowing customers immediate access to their various contacts across different networking sites - all the latest information updates including Facebook status updates and the ability to chat through Windows Live Messenger and Google Talk
- the ability to create different contact groups across social media networks, allowing customers to organise their contacts the way they want and manage how they share different information with different groups
- the ability for customers and friends to share locations, tag and share pictures and favourite places
- confidence that your connected address book is synchronised between your phone and the web and you can easily recover your phone contacts if you change or lose your mobile
- access to the service through a variety of handsets and operating systems from multiple manufacturers - the ultimate experience being through a custom-built device
- a catalogue of over one thousand Apps at launch available to different handsets, downloadable through the Vodafone Shop
- the ability for non-Vodafone customers to access some of the range of services, linking them to their social networks via mobile.

The Vodafone 360 suite of services has been designed and developed by Vodafone. At launch the full Vodafone 360 experience will be available on two exclusive handsets built to Vodafone's specification by Samsung. The Vodafone 360 H1 by Samsung boasts a 3.5" multitouch, high definition OLED screen, 16GB memory, WiFi, a maximum talk time of over 400 minutes (3G) and a 5 megapixel camera. It will be followed shortly by a second Samsung handset, offering customers a range of colours and price points.

At launch four Nokia Symbian smartphones will come pre-loaded with Vodafone 360 and part or all of the service will be downloadable to over one hundred popular phones. In the coming months Vodafone will be making the service available through as wide a selection of handsets and operating systems from multiple manufacturers as possible.

The 2009 launch in Germany, Greece, Ireland, Italy, Netherlands, Portugal, Spain and the UK will be followed by launches in a number of other countries in 2010, including India, Turkey, South Africa, New Zealand and Romania and in France through SFR. through MTS in Russia, and through Vodafone Hutchison Australia.

- ends -

Notes to Editors

- 1) The two Vodafone 360 handsets manufactured for Vodafone by Samsung give the best Vodafone 360 experience. Four Nokia handsets are preloaded for customers to buy in store and for existing customers 10 handsets can download the Vodafone 360 service. The People Service will be available on over 100 popular devices at launch for any customer on any network.
- 2) For images, go to www.vodafone.com/media
- 3) For more details on the service, go to www.vodafone.com/media

29 September 2009

VODAFONE TO SELL IPHONE IN UK AND IRELAND

Vodafone and Apple today confirmed that they have reached agreement to bring iPhone 3G and iPhone 3GS to the UK and Ireland in early 2010.

Beginning today, Vodafone UK and Vodafone Ireland customers can register their interest in iPhone 3G and iPhone 3GS at www.vodafone.co.uk/iphone and www.vodafone.ie/iphone respectively. Pricing, tariffs and availability information will be announced locally in the future.

Vodafone now offers iPhone through thirteen of its operating companies.
