Form 10-Q
April 28, 2010

UNITED STATES

SECURITIES AND EXCHANGE COMMISSION

Washington, D.C. 20549

FORM 10-Q

**QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF
THE SECURITIES EXCHANGE ACT OF 1934**

For the quarterly period ended March 31, 2010

OR

**TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE
SECURITIES EXCHANGE ACT OF 1934**

For the transition period from _____ to _____

Commission file number 1-11840

THE ALLSTATE CORPORATION

(Exact name of registrant as specified in its charter)

Delaware
(State or other jurisdiction of incorporation or organization)

36-3871531
(I.R.S. Employer Identification No.)

2775 Sanders Road, Northbrook, Illinois 60062

(Address of principal executive offices) (Zip Code)

(847) 402-5000

(Registrant's telephone number, including area code)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the

Edgar Filing: ALLSTATE CORP - Form 10-Q

past 90 days.

Yes X No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§ 232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files).

Yes X No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of large accelerated filer, accelerated filer and smaller reporting company in Rule 12b-2 of the Exchange Act.

Large accelerated filer X Accelerated filer
Non-accelerated filer (Do not check if a smaller reporting company) Smaller reporting company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act).

Yes No X

As of April 23, 2010, the registrant had 537,903,261 common shares, \$.01 par value, outstanding.

THE ALLSTATE CORPORATION AND SUBSIDIARIES

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

(Unaudited)

1. General

Basis of presentation

The accompanying condensed consolidated financial statements include the accounts of The Allstate Corporation and its wholly owned subsidiaries, primarily Allstate Insurance Company (AIC), a property-liability insurance company with various property-liability and life and investment subsidiaries, including Allstate Life Insurance Company (ALIC) (collectively referred to as the Company or Allstate).

The condensed consolidated financial statements and notes as of March 31, 2010, and for the three-month periods ended March 31, 2010 and 2009 are unaudited. The condensed consolidated financial statements reflect all adjustments (consisting only of normal recurring accruals), which are, in the opinion of management, necessary for the fair presentation of the financial position, results of operations and cash flows for the interim periods. These condensed consolidated financial statements and notes should be read in conjunction with the consolidated financial statements and notes thereto included in the Company s Annual Report on Form 10-K for the year ended December 31, 2009. The results of operations for the interim periods should not be considered indicative of results to be expected for the full year.

Adopted accounting standards

Disclosures about Fair Value Measurements

In January 2010, the FASB issued new accounting guidance which expands disclosure requirements relating to fair value measurements. The guidance adds requirements for disclosing amounts of and reasons for significant transfers into and out of Levels 1 and 2 and requires gross rather than net disclosures about purchases, sales, issuances and settlements relating to Level 3 measurements. The guidance also provides clarification that fair value measurement disclosures are required for each class of assets and liabilities. Disclosures about the valuation techniques and inputs used to measure fair value for measurements that fall in either Level 2 or Level 3 are also required. The Company adopted the provisions of the new guidance as of March 31, 2010, except for disclosures about purchases, sales, issuances and settlements in the roll forward of activity in Level 3 fair value measurements, which are required for fiscal years beginning after December 15, 2010. Disclosures are not required for earlier periods presented for comparative purposes. The new guidance affects disclosures only; and therefore, the adoption had no impact on the Company s results of operations or financial position.

Consolidation of Variable Interest Entities

In June 2009, the FASB issued new accounting guidance which requires an entity to perform a qualitative analysis to determine whether it holds a controlling financial interest (i.e., is a primary beneficiary) in a variable interest entity (VIE). The analysis identifies the primary beneficiary of a VIE as the entity that has both the power to direct the activities of the VIE that most significantly impact the economic performance of the VIE and the obligation to absorb losses, or the right to receive benefits, that could potentially be significant to the VIE. **The Company adopted the new guidance as of January 1, 2010.** The adoption resulted in the consolidation of four VIEs for which the Company concluded it is the primary beneficiary as of **January 1, 2010.**

Two of the consolidated VIEs hold investments managed by Allstate Investment Management Company (AIMCO), a subsidiary of the Company. Consolidation as of January 1, 2010 resulted in an increase in total assets of \$696 million, an increase in total liabilities of \$679 million, an increase in retained income of \$7 million and an increase in noncontrolling interest of \$10 million. During the first quarter of 2010, the Company sold substantially all its variable interests in these two VIEs. As a result, the Company deconsolidated the VIEs as of March 26, 2010. Since the deconsolidation was effective prior to March 31, 2010, the Condensed Consolidated Statement of Financial Position as of March 31, 2010 does not reflect the assets, liabilities and noncontrolling interests in the VIEs. The Condensed Consolidated Statement of Operations for the first quarter of 2010 does, however, reflect the effects of the consolidation for the portion of the quarter the Company was the primary beneficiary, which were not material.

The adoption also resulted in the consolidation of two insurance company affiliates, Allstate Texas Lloyds and Allstate County Mutual Insurance Company, that underwrite homeowners and auto insurance policies, respectively, and reinsure all of their net business to AIC. Consolidation as of January 1, 2010 resulted in an increase in total assets of \$38 million, an increase in total liabilities of \$34 million, an increase in retained income of \$3 million and an increase in unrealized net capital gains and losses of \$1 million.

In the normal course of investing activities, the Company invests in variable interests issued by VIEs. These variable interests include structured investments such as asset-backed securities, commercial mortgage-backed securities and residential mortgage-backed securities as well as limited partnerships, special purpose entities and trusts. For these variable interests, the Company concluded it is not the primary beneficiary due to the amount of the Company's interest in the VIEs and the Company's lack of power to direct the activities that are most significant to the economic performance of the VIEs. The Company's maximum exposure to loss on these interests is limited to the amount of the Company's investment.

Pending accounting standards

Embedded Credit Derivatives Scope Exception

In March 2010, the FASB issued accounting guidance that clarifies the scope exception for embedded credit derivative features related to the transfer of credit risk in the form of subordination of one financial instrument to another. The guidance addresses how to determine which embedded credit derivative features, including those in collateralized debt obligations and synthetic collateralized debt obligations, are considered to be embedded derivatives that should not be analyzed for potential bifurcation and separate accounting under the existing accounting guidance for embedded derivatives. The guidance is effective for fiscal quarters beginning after June 15, 2010. The Company is evaluating the impact of adoption on the Company's results of operations or financial position.

Consolidation Analysis Considering Investments Held through Separate Accounts

In April 2010, the FASB issued guidance clarifying that an insurer is not required to combine interests in investments held in a qualifying separate account with its interests in the same investments held in the general account when performing a consolidation evaluation. The guidance is effective for fiscal years and interim periods beginning after December 15, 2010 with early adoption permitted. The adoption of this guidance is not expected to have a material impact on the Company's results of operations or financial position.

2. Earnings per share

Basic earnings per share is computed based on the weighted average number of common shares outstanding, including unvested restricted stock units. Diluted earnings per share is computed based on the weighted average number of common and dilutive potential common shares outstanding. For Allstate, dilutive potential common shares consist of outstanding stock options.

The computation of basic and diluted earnings per share is presented in the following table.

(\$ in millions, except per share data)

	Three months ended March 31,
2010	2009

Edgar Filing: ALLSTATE CORP - Form 10-Q

Numerator:			
Net income (loss)	\$	120	\$ (274)
Denominator:			
Weighted average common shares outstanding		540.5	538.9
Effect of dilutive potential common shares:			
Stock options		1.3	--
Weighted average common and dilutive potential common shares outstanding		541.8	538.9
Earnings per share - Basic	\$	0.22	\$ (0.51)
Earnings per share - Diluted	\$	0.22	\$ (0.51)

The effect of dilutive potential common shares does not include the effect of options with an anti-dilutive effect on earnings per share because their exercise prices exceed the average market price of Allstate common shares during the period or for which the unrecognized compensation cost would have an anti-dilutive effect. Options to

purchase 24.4 million and 27.3 million Allstate common shares, with exercise prices ranging from \$27.36 to \$64.53 and \$23.72 to \$65.38, were outstanding at March 31, 2010 and 2009, respectively, but were not included in the computation of diluted earnings per share for the three-month periods.

As a result of the net loss for the three-month period ended March 31, 2009, weighted average dilutive potential common shares outstanding resulting from stock options of 0.6 million were not included in the computation of diluted earnings per share since inclusion of these securities would have an anti-dilutive effect. In the absence of the net loss, weighted average common and dilutive potential common shares outstanding would have totaled 539.5 million for the three-month period ended March 31, 2009.

3. Supplemental Cash Flow Information

Non-cash investment exchanges, including modifications of certain mortgage loans, fixed income securities, and other investments, as well as mergers completed with equity securities and limited partnerships, totaled \$51 million and \$75 million for the three-month periods ended March 31, 2010 and 2009, respectively.

Liabilities for collateral received in conjunction with the Company's securities lending and over-the-counter (OTC) derivatives are reported in other liabilities and accrued expenses or other investments in the Condensed Consolidated Statements of Financial Position. The accompanying cash flows are included in cash flows from operating activities in the Condensed Consolidated Statements of Cash Flows along with the activities resulting from management of the proceeds, which are as follows:

(\$ in millions)	Three months ended March 31,	
	2010	2009
Net change in proceeds managed		
Net change in fixed income securities	\$ --	\$ --
Net change in short-term investments	171	67
Operating cash flow provided	171	67
Net change in cash	6	--
Net change in proceeds managed	\$ 177	\$ 67
Net change in liabilities		
Liabilities for collateral and security repurchase, beginning of year	\$ (658)	\$ (340)
Liabilities for collateral and security repurchase, end of period	(481)	(273)
Operating cash flow used	\$ (177)	\$ (67)

4. Investments**Fair values**

The amortized cost, gross unrealized gains and losses and fair value for fixed income securities are as follows:

(\$ in millions)	Amortized cost	Gross unrealized Gains	Losses	Fair value
At March 31, 2010				
U.S. government and agencies	\$ 8,204	\$ 238	\$ (20)	\$ 8,422
Municipal	20,404	517	(773)	20,148
Corporate	33,585	1,413	(499)	34,499
Foreign government	3,008	315	(9)	3,314
Residential mortgage-backed securities (RMBS)	10,343	173	(1,404)	9,112
Commercial mortgage-backed securities (CMBS)	3,220	44	(812)	2,452
Asset-backed securities (ABS)	3,684	80	(467)	3,297
Redeemable preferred stock	38	2	--	40
Total fixed income securities	\$ 82,486	\$ 2,782	\$ (3,984)	\$ 81,284
At December 31, 2009				
U.S. government and agencies	\$ 7,333	\$ 219	\$ (16)	\$ 7,536
Municipal	21,683	537	(940)	21,280
Corporate	32,770	1,192	(847)	33,115
Foreign government	2,906	306	(15)	3,197
RMBS	9,487	130	(1,630)	7,987
CMBS	3,511	30	(955)	2,586
ABS	3,514	62	(550)	3,026
Redeemable preferred stock	39	1	(1)	39
Total fixed income securities	\$ 81,243	\$ 2,477	\$ (4,954)	\$ 78,766

Scheduled maturities

The scheduled maturities for fixed income securities are as follows at March 31, 2010:

(\$ in millions)	Amortized cost	Fair value
Due in one year or less	\$ 2,731	\$ 2,767
Due after one year through five years	24,024	24,731
Due after five years through ten years	15,082	15,757
Due after ten years	26,622	25,620
	68,459	68,875
RMBS and ABS	14,027	12,409
Total	\$ 82,486	\$ 81,284

Edgar Filing: ALLSTATE CORP - Form 10-Q

Actual maturities may differ from those scheduled as a result of prepayments by the issuers. Because of the potential for prepayment on RMBS and ABS, they are not categorized by contractual maturity. The CMBS are categorized by contractual maturity because they generally are not subject to prepayment risk.

Net investment income

Net investment income is as follows:

(\$ in millions)	Three months ended March 31,	
	2010	2009
Fixed income securities	\$ 959	\$ 1,042
Equity securities	21	16
Mortgage loans	104	137
Limited partnership interests	6	3
Short-term investments	2	13
Other	1	1
Investment income, before expense	1,093	1,212
Investment expense	(43)	(36)
Net investment income	\$ 1,050	\$ 1,176

Realized capital gains and losses

Realized capital gains and losses by security type are as follows:

(\$ in millions)	Three months ended March 31,	
	2010	2009
Fixed income securities	\$ (136)	\$ 107
Equity securities	14	(163)
Mortgage loans	(25)	(32)
Limited partnership interests	(21)	(339)
Derivatives	(185)	95
Other	5	(27)
Realized capital gains and losses	\$ (348)	\$ (359)

Realized capital gains and losses by transaction type are as follows:

(\$ in millions)	Three months ended March 31,	
	2010	2009
Impairment write-downs	\$ (223)	\$ (620)
Change in intent write-downs	(32)	(105)
Net OTTI losses recognized in earnings	(255)	(725)
Sales	88	418
Valuation of derivative instruments	(155)	103
Settlements of derivative instruments	(30)	(12)
EMA limited partnership income	4	(143)

Edgar Filing: ALLSTATE CORP - Form 10-Q

Realized capital gains and losses	\$	(348)	\$	(359)
-----------------------------------	----	-------	----	-------

Gross gains of \$142 million and \$480 million and gross losses of \$74 million and \$82 million were realized on sales of fixed income securities during the three months ended March 31, 2010 and 2009, respectively.

Edgar Filing: ALLSTATE CORP - Form 10-Q

Other-than-temporary impairment losses by asset type for the three months ended March 31, 2010 are as follows:

(\$ in millions)	Total	Included in OCI	Net
Fixed income securities:			
Municipal	\$ (37)	\$ --	(37)
Corporate	(47)	3	(44)
RMBS	(88)	(7)	(95)
CMBS	(26)	--	(26)
ABS	(3)	(1)	(4)
Total fixed income securities	(201)	(5)	(206)
Equity securities	(6)	--	(6)
Mortgage loans	(19)	--	(19)
Limited partnership interests	(24)	--	(24)
Other-than-temporary impairment losses	\$ (250)	\$ (5)	(255)

Edgar Filing: ALLSTATE CORP - Form 10-Q

The total amount of other-than-temporary impairment losses included in accumulated other comprehensive income for fixed income securities, which were not included in earnings, are presented in the following table. The amount excludes \$269 million and \$192 million as of March 31, 2010 and December 31, 2009, respectively, of net unrealized gains related to changes in valuation of the fixed income securities subsequent to the impairment measurement date.

(\$ in millions)	March 31, 2010	December 31, 2009
Municipal	\$ (9)	\$ (10)
Corporate	(51)	(51)
RMBS	(590)	(594)
CMBS	(121)	(127)
ABS	(88)	(89)
Total	\$ (859)	\$ (871)

A rollforward of the amount recognized in earnings related to credit losses for fixed income securities is presented in the following table.

(\$ in millions)	
Beginning balance at December 31, 2009	\$ (1,187)
Additional credit loss for securities previously other-than-temporarily impaired	(101)
Additional credit loss for securities not previously other-than-temporarily impaired	(79)
Reduction in credit loss for securities disposed or collected	131
Reduction in credit loss for securities other-than-temporarily impaired to fair value	--
Change in credit loss due to accretion of increase in cash flows and time value of cash flows for securities previously other-than-temporarily impaired	--
Ending balance at March 31, 2010	\$ (1,236)

The Company uses its best estimate of future cash flows expected to be collected from the fixed income security discounted at the security's original or current effective rate, as appropriate, to calculate a recovery value and determine whether a credit loss exists. The determination of cash flow estimates is inherently subjective and methodologies may vary depending on facts and circumstances specific to the security. All reasonably available information relevant to the collectability of the security, including past events, current conditions, and reasonable and supportable assumptions and forecasts, are considered when developing the estimate of cash flows expected to be collected. That information generally includes, but is not limited to, the remaining payment terms of the security, prepayment speeds, foreign exchange rates, the financial condition of the issue or issuer(s), expected defaults, expected recoveries, the value of underlying collateral and current subordination levels, vintage, geographic concentration, available reserves or escrows, third party guarantees and other credit enhancements. Additionally, other information, such as industry analyst reports and forecasts, sector credit ratings, financial condition of the bond

insurer for insured fixed income securities, and other market data relevant to the realizability of contractual cash flows, may also be considered. The estimated fair value of collateral may be used to estimate recovery value if the Company determines that the security is dependent on the liquidation of collateral for ultimate settlement. If the estimated recovery value is less than the amortized cost of the security, a credit loss exists and an other-than-temporary impairment for the difference between the estimated recovery value and amortized cost is recorded in earnings. The unrealized loss deemed to be related to factors other than credit remains classified in OCI. If the Company determines that the fixed income security does not have sufficient cash flow or other information to determine a recovery value for the security, the Company may conclude that the entire decline in fair value is deemed to be credit related and is recorded in earnings.

Unrealized net capital gains and losses

Unrealized net capital gains and losses included in accumulated other comprehensive income are as follows:

(\$ in millions) At March 31, 2010	Fair value	Gross unrealized Gains	Losses	Unrealized net gains (losses)
Fixed income securities (1)	\$ 81,284	\$ 2,782	\$ (3,984)	\$ (1,202)
Equity securities	3,807	457	(86)	371
Short-term investments	2,482	--	--	--
Derivative instruments (2)	(14)	3	(21)	(18)
Unrealized net capital gains and losses, pre-tax				(849)
Amounts recognized for:				
Insurance reserves (3)				--
DAC and DSI (4)				726
Amounts recognized				726
Deferred income taxes				39
Unrealized net capital gains and losses, after-tax				\$ (84)

(1) Unrealized net capital gains and losses for fixed income securities as of March 31, 2010 comprises \$(590) million related to unrealized net capital losses on fixed income securities with OTTI and \$(612) million related to other unrealized net capital gains and losses.

(2) Included in the fair value of derivative securities are \$2 million classified as assets and \$16 million classified as liabilities.

(3) The insurance reserves adjustment represents the amount by which the reserve balance would increase if the net unrealized gains in the applicable product portfolios were realized and reinvested at current lower interest rates, resulting in a premium deficiency. Although the Company evaluates premium deficiencies on the combined performance of life insurance and immediate annuities with life contingencies, the adjustment primarily relates to structured settlement annuities with life contingencies, in addition to annuity buy-outs and certain payout annuities with life contingencies.

(4) The DAC and DSI adjustment balance represents the amount by which the amortization of DAC and DSI would increase or decrease if the unrealized gains or losses in the respective product portfolios were realized.

At December 31, 2009	Fair value	Gross unrealized Gains	Losses	Unrealized net gains (losses)
Fixed income securities	\$ 78,766	\$ 2,477	\$ (4,954)	\$ (2,477)
Equity securities	5,024	381	(202)	179

Unrealized net capital gains and losses, after-tax			\$	(870)

(1) Included in the fair value of derivative securities are \$(2) million classified as assets and \$18 million classified as liabilities.

Change in unrealized net capital gains and losses

The change in unrealized net capital gains and losses for the three months ended March 31, 2010 is as follows:

(\$ in millions)	
Fixed income securities	\$ 1,275
Equity securities	192
Short-term investments	--
Derivative instruments	5
Total	1,472
Amounts recognized for:	
Insurance reserves	--
DAC and DSI	(264)
Decrease in amounts recognized	(264)
Deferred income taxes	(422)
Increase in unrealized net capital gains and losses	\$ 786

Portfolio monitoring

The Company has a comprehensive portfolio monitoring process to identify and evaluate each fixed income and equity security whose carrying value may be other-than-temporarily impaired.

For each fixed income security in an unrealized loss position, the Company assesses whether management with the appropriate authority has made a decision to sell or whether it is more likely than not the Company will be required to sell the security before recovery of the amortized cost basis for reasons such as liquidity, contractual or regulatory purposes. If a security meets either of these criteria, the security's decline in fair value is deemed other than temporary and is recorded in earnings.

If the Company has not made the decision to sell the fixed income security and it is not more likely than not the Company will be required to sell the fixed income security before recovery of its amortized cost basis, the Company evaluates if it expects to receive cash flows sufficient to recover the entire amortized cost basis of the security by comparing the estimated recovery value calculated by discounting the best estimate of future cash flows at the security's original or current effective rate, as appropriate, with the amortized cost of the security. If the Company does not expect to receive cash flows sufficient to recover the entire amortized cost basis of the fixed income security, the credit loss component of the impairment is recorded in earnings, with the remaining amount of the unrealized loss deemed to be related to other factors and recognized in OCI.

For equity securities, the Company considers various factors, including whether the Company has the intent and ability to hold the equity security for a period of time sufficient to recover its cost basis. Where the Company lacks the intent and ability to hold to recovery, or believes the recovery period is extended, the equity security's decline in fair value is considered other than temporary and is recorded in earnings. For equity securities managed by a third party, the Company has contractually retained its decision making authority as it pertains to selling equity securities that are in an unrealized loss position.

Edgar Filing: ALLSTATE CORP - Form 10-Q

The Company's portfolio monitoring process includes a quarterly review of all securities through a screening process which identifies instances where the fair value compared to amortized cost for fixed income securities and cost for equity securities is below established thresholds, and also includes the monitoring of other criteria such as ratings, ratings downgrades or payment defaults. The securities identified, in addition to other securities for which the Company may have a concern, are evaluated for potential other-than-temporary impairment using all reasonably available information relevant to the collectability or recovery of the security. Inherent in the Company's evaluation of other-than-temporary impairment for these fixed income and equity securities are assumptions and estimates about the financial condition of the issue or issuer and its future earnings potential. Some of the factors considered in evaluating whether a decline in fair value is other than temporary are: 1) the length of time and extent to which the fair value has been less than amortized cost for fixed income securities, or cost for equity securities; 2) the financial condition, near-term and long-term prospects of the issue or issuer, including relevant industry specific market conditions and trends, geographic location and implications of rating agency actions and offering prices; and 3) the specific reasons that a security is in a significant unrealized loss position, including overall market conditions which could affect liquidity.

Edgar Filing: ALLSTATE CORP - Form 10-Q

The following table summarizes the gross unrealized losses and fair value of fixed income and equity securities by the length of time that individual securities have been in a continuous unrealized loss position.

(\$ in millions)	Less than 12 months			12 months or more			Total unrealized losses

(1) Gross unrealized losses resulting from factors other than credit on fixed income securities with other-than-temporary impairments for which the Company has recorded a credit loss in earnings total \$8 million for the less than 12 month category and \$688 million for the 12 months or greater category.

As of March 31, 2010, \$1.18 billion of unrealized losses are related to securities with an unrealized loss position less than 20% of cost or amortized cost, the degree of which suggests that these securities do not pose a high risk of being other-than-temporarily impaired. Of the \$1.18 billion, \$921 million are related to unrealized losses on investment grade fixed income securities. Investment grade is defined as a security having a rating of Aaa, Aa, A or Baa from Moody's, a rating of AAA, AA, A or BBB from S&P, Fitch, Dominion or Realpoint, a rating of aaa, aa, a or bbb from A.M. Best, or a comparable internal rating if an externally provided rating is not available, which is consistent with the National Association of Insurance Commissioners (NAIC) rating. Unrealized losses on investment grade securities are principally related to rising interest rates or changes in credit spreads since the securities were acquired.

Edgar Filing: ALLSTATE CORP - Form 10-Q

As of March 31, 2010, the remaining \$2.89 billion of unrealized losses are related to securities in unrealized loss positions greater than or equal to 20% of cost or amortized cost. Investment grade securities comprising \$1.42 billion of these unrealized losses were evaluated based on factors such as discounted cash flows, the financial condition and near-term and long-term prospects of the issue or issuer and were determined to have adequate

resources to fulfill contractual obligations, such as recent financings or bank loans, cash flows from operations, collateral or the position of a subsidiary with respect to its parent's bankruptcy. Of the \$2.89 billion, \$1.45 billion are related to below investment grade fixed income securities and \$17 million are related to equity securities. Of these amounts, \$1.38 billion of the below investment grade fixed income securities had been in an unrealized loss position for a period of twelve or more consecutive months as of March 31, 2010. Unrealized losses on below investment grade securities are principally related to RMBS, ABS and CMBS and were the result of wider credit spreads than at initial purchase which was largely due to the impact of macroeconomic conditions and credit market deterioration on real estate valuations. Securities in an unrealized loss position were evaluated based on discounted cash flows and credit ratings, as well as the performance of the underlying collateral relative to the securities' positions in the securities' respective capital structure. RMBS and ABS in an unrealized loss position were evaluated with credit enhancements from bond insurers where applicable. Municipal bonds in an unrealized loss position were evaluated based on the quality of the underlying security, as well as with credit enhancements from bond insurers, where applicable. Unrealized losses on equity securities are primarily related to equity market fluctuations.

As of March 31, 2010, the Company has not made a decision to sell and it is not more likely than not the Company will be required to sell fixed income securities with unrealized losses before recovery of the amortized cost basis. As of March 31, 2010, the Company had the intent and ability to hold the equity securities with unrealized losses for a period of time sufficient for them to recover.

Limited partnership impairment

As of March 31, 2010 and December 31, 2009, the carrying value of equity method limited partnership interests totaled \$1.69 billion and \$1.64 billion, respectively. The Company recognizes an impairment loss in value for equity method investments when evidence demonstrates that it is other-than-temporarily impaired. Evidence of a loss in value that is other than temporary may include the absence of an ability to recover the carrying amount of the investment or the inability of the investee to sustain an earnings potential that would justify the carrying amount of the investment. The Company had no write-downs for the three months ended March 31, 2010 and had write-downs of \$10 million for the three months ended March 31, 2009, related to equity method limited partnership interests.

As of March 31, 2010 and December 31, 2009, the carrying value for cost method limited partnership interests was \$1.11 billion and \$1.10 billion, respectively. To determine if an other-than-temporary impairment has occurred, the Company evaluates whether an impairment indicator has occurred in the period that may have a significant adverse effect on the carrying value of the investment. Impairment indicators may include: actual recent cash flows received being significantly less than expected cash flows; reduced valuations based on financing completed at a lower value; completed sale of a material underlying investment at a price significantly lower than expected; significantly reduced valuations of the investments held by limited partnerships; or any other adverse events since the last financial statements received that might affect the fair value of the investee's capital. Additionally, the Company uses a screening process to identify those investments whose net asset value is below established thresholds for certain periods of time as well as investments that are performing below expectations, for further impairment consideration. If a cost method limited partnership is deemed other-than-temporarily impaired, the carrying value is written down to fair value, generally estimated to be equivalent to the reported net asset value of the underlying funds. The Company had write-downs of \$24 million and \$187 million for the three months ended March 31, 2010 and 2009, respectively, related to cost method investments that were other-than-temporarily impaired.

5. Fair Value of Assets and Liabilities

Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The hierarchy for inputs used in determining fair value maximizes the use of observable inputs and minimizes the use of unobservable inputs by requiring that observable inputs be used when available.

Edgar Filing: ALLSTATE CORP - Form 10-Q

Assets and liabilities recorded on the Condensed Consolidated Statements of Financial Position at fair value are categorized in the fair value hierarchy based on the observability of inputs to the valuation techniques as follows:

Level 1: Assets and liabilities whose values are based on unadjusted quoted prices for identical assets or liabilities in an active market that the Company can access.

Level 2: Assets and liabilities whose values are based on the following:

- (a) Quoted prices for similar assets or liabilities in active markets;
- (b) Quoted prices for identical or similar assets or liabilities in markets that are not active; or
- (c) Valuation models whose inputs are observable, directly or indirectly, for substantially the full term of the asset or liability.

Level 3: Assets and liabilities whose values are based on prices or valuation techniques that require inputs that are both unobservable and significant to the overall fair value measurement. Unobservable inputs reflect the Company's estimates of the assumptions that market participants would use in valuing the assets and liabilities.

The availability of observable inputs varies by instrument. In situations where fair value is based on internally developed pricing models or inputs that are unobservable in the market, the determination of fair value requires more judgment. The degree of judgment exercised by the Company in determining fair value is typically greatest for instruments categorized in Level 3. In many instances, valuation inputs used to measure fair value fall into different levels of the fair value hierarchy. The category level in the fair value hierarchy is determined based on the lowest level input that is significant to the fair value measurement in its entirety. The Company uses prices and inputs that are current as of the measurement date, including during periods of market disruption. In periods of market disruption, the ability to observe prices and inputs may be reduced for many instruments.

The Company has two types of situations where investments are classified as Level 3 in the fair value hierarchy. The first is where quotes continue to be received from independent third-party valuation service providers and all significant inputs are market observable; however, there has been a significant decrease in the volume and level of activity for the asset when compared to normal market activity such that the degree of market observability has declined to a point where categorization as a Level 3 measurement is considered appropriate. Among the indicators considered in determining whether a significant decrease in the volume and level of activity for a specific asset has occurred include the level of new issuances in the primary market, trading volume in the secondary market, level of credit spreads over historical levels, bid-ask spread, and price consensus among market participants and sources.

The second situation where the Company has classified securities in Level 3 is where specific inputs significant to the fair value estimation models are not market observable. This has occurred in two primary categories. The first is for broker quotes. The second is for ARS backed by student loans for which a key assumption, the anticipated date liquidity will return to this market, is not market observable.

Certain assets are not carried at fair value on a recurring basis, including investments such as mortgage loans, limited partnership interests, bank loans and policy loans. Accordingly, such investments are only included in the fair value hierarchy disclosure when the investment is subject to remeasurement at fair value after initial recognition and the resulting remeasurement is reflected in the condensed consolidated financial statements. In addition, equity options embedded in fixed income securities are not disclosed in the hierarchy with free-standing derivatives as

Edgar Filing: ALLSTATE CORP - Form 10-Q

the embedded derivatives are presented with the host contract in fixed income securities. As of March 31, 2010, 73.5% of total assets are measured at fair value and 0.5% of total liabilities are measured at fair value.

In determining fair value, the Company principally uses the market approach which generally utilizes market transaction data for the same or similar instruments. To a lesser extent, the Company uses the income approach which involves determining fair values from discounted cash flow methodologies. For the majority of Level 2 and Level 3 valuations, a combination of market and income approaches is used.

Summary of significant valuation techniques for assets and liabilities measured at fair value on a recurring basis

Level 1 measurements

- Fixed income securities: Comprise U.S. Treasuries. Valuation is based on unadjusted quoted prices for identical assets in active markets that the Company can access.
- Equity securities: Comprise actively traded, exchange-listed U.S. and international equity securities. Valuation is based on unadjusted quoted prices for identical assets in active markets that the Company can access.

- Short-term: Comprise actively traded money market funds that have daily quoted net asset values for identical assets that the Company can access.

- Separate account assets: Comprise actively traded mutual funds that have daily quoted net asset values for identical assets that the Company can access. Net asset values for the actively traded mutual funds in which the separate account assets are invested are obtained daily from the fund managers.

Level 2 measurements

- Fixed income securities:

U.S. government and agencies: The primary inputs to the valuation include quoted prices for identical or similar assets in markets that are not active, contractual cash flows, benchmark yields and credit spreads.

Municipal: The primary inputs to the valuation include quoted prices for identical or similar assets in markets that are not active, contractual cash flows, benchmark yields and credit spreads.

Corporate, including privately placed: The primary inputs to the valuation include quoted prices for identical or similar assets in markets that are not active, contractual cash flows, benchmark yields and credit spreads. Also includes privately placed securities valued using a discounted cash flow model that is widely accepted in the financial services industry and uses market observable inputs and inputs derived principally from, or corroborated by, observable market data. The primary inputs to the discounted cash flow model include an interest rate curve, as well as published credit spreads for similar assets in markets that are not active that incorporate the credit quality and industry sector of the issuer.

Foreign government: The primary inputs to the valuation include quoted prices for identical or similar assets in markets that are not active, contractual cash flows, benchmark yields and credit spreads.

RMBS - U.S. government sponsored entities (U.S. Agency), Prime residential mortgage-backed securities (Prime) and Alt-A residential mortgage-backed securities (Alt-A); ABS - auto and student loans: The primary inputs to the valuation include quoted prices for identical or similar assets in markets that are not active, contractual cash flows, benchmark yields, prepayment speeds, collateral performance and credit spreads.

Redeemable preferred stock: The primary inputs to the valuation include quoted prices for identical or similar assets in markets that are not active, contractual cash flows, benchmark yields, underlying stock prices and credit spreads.

Edgar Filing: ALLSTATE CORP - Form 10-Q

CMBS: The primary inputs to the valuation include quoted prices for identical or similar assets in markets that are not active, contractual cash flows, benchmark yields, collateral performance and credit spreads.

- Equity securities: The primary inputs to the valuation include quoted prices for identical or similar assets in markets that are not active.
- Short-term: The primary inputs to the valuation include quoted prices for identical or similar assets in markets that are not active, contractual cash flows, benchmark yields and credit spreads. For certain short-term investments, amortized cost is used as the best estimate of fair value.
- Other investments: Free-standing exchange listed derivatives that are not actively traded are valued based on quoted prices for identical instruments in markets that are not active.

OTC derivatives, including interest rate swaps, foreign currency swaps, foreign exchange forward contracts, certain credit default swaps, and commodity swaps, are valued using models that rely on inputs such as interest rate yield curves, currency rates, counterparty credit spreads and commodity prices that are observable for substantially the full term of the contract. The valuation techniques underlying the models are widely accepted in the financial services industry and do not involve significant judgment.

- Contractholder funds: Derivatives embedded in certain annuity contracts are valued based on internal models that rely on inputs such as interest rate yield curves and equity index volatility assumptions that are market observable for substantially the full term of the contract. The valuation techniques are widely accepted in the financial services industry and do not include significant judgment.

Level 3 measurements

- Fixed income securities:

Municipal: Auction rate securities (ARS) primarily backed by student loans that have become illiquid due to failures in the auction market are valued using a discounted cash flow model that is widely accepted in the financial services industry and uses significant non-market observable inputs, including estimates of future coupon rates if auction failures continue, maturity assumptions and illiquidity premium. Also includes municipal bonds that are not rated by third party credit rating agencies but are generally rated by the NAIC, in addition to other high-yield municipal bonds. The primary inputs to the valuation of these municipal bonds include quoted prices for identical or similar assets in markets that exhibit less liquidity relative to those markets supporting Level 2 fair value measurements, contractual cash flows, benchmark yields and credit spreads.

Corporate, including privately placed: Valued based on non-binding broker quotes. Also includes equity-indexed notes which are valued using a discounted cash flow model that is widely accepted in the financial services industry and uses significant non-market observable inputs, such as volatility. Other inputs include an interest rate curve, as well as published credit spreads for similar assets that incorporate the credit quality and industry sector of the issuer.

RMBS - Subprime residential mortgage-backed securities (Subprime) and Alt-A: The primary inputs to the valuation include quoted prices for identical or similar assets in markets that exhibit less liquidity relative to those markets supporting Level 2 fair value measurements, contractual cash flows, benchmark yields, prepayment speeds, collateral performance and credit spreads. Also includes certain Subprime and Alt-A that are valued based on non-binding broker quotes. Due to the reduced availability of actual market prices or relevant observable inputs as a result of the decrease in liquidity that has been experienced in the market for these securities, Subprime and certain Alt-A are categorized as Level 3.

Foreign government: Valued based on non-binding broker quotes.

CMBS: The primary inputs to the valuation include quoted prices for identical or similar assets in markets that exhibit less liquidity relative to those markets supporting Level 2 fair value measurements, contractual cash flows, benchmark yields, collateral performance and credit spreads. Also includes CMBS that are valued based on non-binding broker quotes. Due to the reduced availability of actual market prices or relevant observable inputs as a result of the decrease in liquidity that has been experienced in the market for these securities, certain CMBS are categorized as Level 3.

ABS - Collateralized debt obligations (CDO): Valued based on non-binding broker quotes received from brokers who are familiar with the investments. Due to the reduced availability of actual market prices or relevant observable inputs as a result of the decrease in liquidity that has been experienced in the market for these securities, all CDO are categorized as Level 3.

ABS - student loans and other: The primary inputs to the valuation include quoted prices for identical or similar assets in markets that exhibit less liquidity relative to those markets supporting Level 2 fair value measurements, contractual cash flows, benchmark yields, prepayment speeds, collateral performance and credit spreads. Also includes ABS that are valued based on non-binding broker quotes. Due to the reduced

Edgar Filing: ALLSTATE CORP - Form 10-Q

availability of actual market prices or relevant observable inputs as a result of the decrease in liquidity that has been experienced in the market for these securities, certain ABS are categorized as Level 3.

- Other investments: Certain OTC derivatives, such as interest rate caps and floors, certain credit default swaps and OTC options (including swaptions), are valued using models that are widely accepted in the financial services industry. Non-market observable inputs such as volatility assumptions may be significant to the valuation of the instruments. Other primary inputs include interest rate yield curves and credit spreads.

- Contractholder funds: Derivatives embedded in certain annuity contracts are valued internally using models widely accepted in the financial services industry that determine a single best estimate of fair value for the embedded derivatives within a block of contractholder liabilities. The models use stochastically determined cash flows based on the contractual elements of embedded derivatives and other applicable

market data. These are categorized as Level 3 as a result of the significance of non-market observable inputs.

Assets and liabilities measured at fair value on a non-recurring basis

Mortgage loans written-down to fair value in connection with recognizing other-than-temporary impairments are valued based on the fair value of the underlying collateral. Limited partnership interests written-down to fair value in connection with recognizing other-than-temporary impairments are valued using net asset values and other sources.

The following table summarizes the Company's assets and liabilities measured at fair value on a recurring and non-recurring basis as of March 31, 2010:

(\$ in millions)	Quoted prices in active markets for identical assets (Level 1)	Significant other observable inputs (Level 2)	Significant unobservable inputs (Level 3)	Counterparty and cash collateral netting	Balance as of March 31, 2010

(1) The effect to net income totals \$(59) million and is reported in the Condensed Consolidated Statements of Operations as follows: \$(286) million in realized capital gains and losses, \$32 million in net investment income, \$(1) million in interest credited to contractholder funds and \$(194) million in life and annuity contract benefits.

(2) Comprises \$58 million of assets and \$(96) million of liabilities.

Transfers between level categorizations may occur due to changes in the availability of market observable inputs, which generally are caused by changes in market conditions such as liquidity, trading volume or bid-ask spreads. Transfers between level categorizations may also occur due to changes in the valuation source. For example, in situations where a fair value quote is not provided by the Company's independent third-party valuation service provider and as a result the price is stale or has been replaced with a broker quote, the security is transferred into Level 3. Transfers in and out of level categorizations are reported as having occurred at the beginning of the quarter in which the transfer occurred. Therefore, for all transfers into Level 3, all realized and changes in unrealized gains and losses in the quarter of transfer are reflected in the Level 3 rollforward table.

There were no transfers between Level 1 and Level 2 during the three months ended March 31, 2010.

During the three months ended March 31, 2010, certain CMBS were transferred into Level 2 from Level 3 as a result of increased liquidity in the market and the availability of market observable quoted prices for similar assets. When transferring these securities into Level 2, the Company does not change the source of fair value estimates or modify the estimates received from independent third-party valuation service providers or the internal valuation approach. Accordingly, for securities included within this group, there was no change in fair value resulting in a realized

or unrealized gain or loss.

Transfers into Level 3 during the three months ended March 31, 2010 included situations where a fair value quote is not provided by the Company's independent third-party valuation service provider and as a result the price is stale or has been replaced with a broker quote resulting in the security being classified as Level 3. Transfers out of Level 3 during the three-months ended March 31, 2010 also included situations where a broker quote was used in

the prior period and a fair value quote is now available from the Company's independent third-party valuation service provider. A quote utilizing the new pricing source is not available as of the prior period, and any gains or losses related to the change in valuation source for individual securities are not significant.

The following table provides the total gains and (losses) included in net income for Level 3 assets and liabilities still held at March 31, 2010.

(\$ in millions)

(1) The effect to net income totals \$(244) million and is reported in the Condensed Consolidated Statements of Operations as follows: \$(268) million in realized capital gains and losses, \$50 million in net investment income, \$1 million in interest credited to contractholder funds, and \$25 million in life and annuity contract benefits.

(2) Comprises \$69 million of assets and \$(172) million of liabilities.

(3) The amounts represent gains and losses included in net income for the period of time that the asset or liability was determined to be in Level 3. These gains and losses total \$(232) million and are reported in the Condensed Consolidated Statements of Operations as follows: \$(257) million in realized capital gains and losses, \$50 million in net investment income, and \$25 million in life and annuity contract benefits.

Presented below are the carrying values and fair value estimates of financial instruments not carried at fair value.

Financial assets

(\$ in millions)

	March 31, 2010		December 31, 2009	
	Carrying value	Fair value	Carrying value	Fair value
Mortgage loans	\$ 7,639	\$ 6,355	\$ 7,935	\$ 6,336

Other-than-temporary impairment losses

Edgar Filing: ALLSTATE CORP - Form 10-Q

Limited partnership interests - cost basis	1,112	1,139	1,103	1,098
Bank loans	406	392	420	391

The fair value of mortgage loans is based on discounted contractual cash flows or, if the loans are impaired due to credit reasons, the fair value of collateral less costs to sell. Risk adjusted discount rates are selected using current rates at which similar loans would be made to borrowers with similar characteristics, using similar types of properties as collateral. The fair value of limited partnership interests accounted for on the cost basis is determined using reported net asset values of the underlying funds. The fair value of bank loans, which are reported in other

investments on the Condensed Consolidated Statements of Financial Position, are valued based on broker quotes from brokers familiar with the loans and current market conditions.

Financial liabilities

(\$ in millions)	March 31, 2010		December 31, 2009	
	Carrying value	Fair value	Carrying value	Fair value
Contractholder funds on investment contracts	\$ 39,290	\$ 38,179	\$ 40,943	\$ 39,328
Long-term debt	5,910	6,108	5,910	6,016
Liability for collateral	481	481	658	658

The fair value of contractholder funds on investment contracts is based on the terms of the underlying contracts utilizing prevailing market rates for similar contracts adjusted for credit risk. Deferred annuities included in contractholder funds are valued using discounted cash flow models which incorporate market value margins, which are based on the cost of holding economic capital, and the Company's own credit risk. Immediate annuities without life contingencies and fixed rate funding agreements are valued at the present value of future benefits using market implied interest rates which include the Company's own credit risk.

The fair value of long-term debt is based on market observable data (such as the fair value of the debt when traded as an asset) or, in certain cases, is determined using discounted cash flow calculations based on current interest rates for instruments with comparable terms and considers the Company's own credit risk. The liability for collateral is valued at carrying value due to its short-term nature.

6. Derivative Financial Instruments

The Company primarily uses derivatives for risk management and asset replication. In addition, the Company has derivatives embedded in non-derivative host contracts, which are required to be separated from the host contracts and accounted for at fair value as derivative instruments. With the exception of non-hedge derivatives used for asset replication and non-hedge embedded derivatives, all of the Company's derivatives are evaluated for their ongoing effectiveness as either accounting hedge or non-hedge derivative financial instruments on at least a quarterly basis. The Company does not use derivatives for trading purposes. Non-hedge accounting is generally used for portfolio level hedging strategies where the terms of the individual hedged items do not meet the strict homogeneity requirements to permit the application of hedge accounting.

The Company primarily uses derivatives to partially mitigate potential adverse impacts from changes in risk-free interest rates, negative equity market valuations and increases in credit spreads. Property-Liability uses interest rate swaption contracts and exchange traded options on Treasury futures to offset potential declining fixed income market values resulting from potential rising interest rates. Property-Liability also uses interest rate swaps to mitigate municipal bond interest rate risk within the municipal bond portfolio. Exchange traded equity put options are utilized by Property-Liability for overall equity portfolio protection from significant declines in equity market values below a targeted level. Equity index futures are used by Property-Liability to offset valuation losses in the equity portfolio during periods of declining equity market values. Credit default swaps are typically used to mitigate the credit risk within the Property-Liability fixed income portfolio.

Portfolio duration management is a risk management strategy that is principally employed by Property-Liability wherein, depending on the current portfolio duration relative to a designated target and the expectations of future interest rate movements, the Company uses financial futures and interest rate swaps to change the duration of the portfolio in order to mitigate the economic effect that interest rates would otherwise have on the fair value of its fixed income securities.

Property-Liability uses futures to hedge the market risk related to deferred compensation liability contracts and forward contracts to hedge foreign currency risk.

Allstate Financial uses foreign currency swaps primarily to reduce the foreign currency risk associated with issuing foreign currency denominated funding agreements and holding foreign currency denominated investments. Credit default swaps are also typically used to mitigate the credit risk within the Allstate Financial fixed income portfolio.

Asset-liability management is a risk management strategy that is principally employed by Allstate Financial to balance the respective interest-rate sensitivities of its assets and liabilities. Depending upon the attributes of the

assets acquired and liabilities issued, derivative instruments such as interest rate swaps, caps, floors and futures are acquired to change the interest rate characteristics of existing assets and liabilities to ensure the relationship is maintained within specified ranges and to reduce exposure to rising or falling interest rates. Allstate Financial uses financial futures and interest rate swaps to hedge anticipated asset purchases and liability issuances and financial futures and options for hedging the Company's equity exposure contained in equity indexed annuity product contracts that offer equity returns to contractholders. In addition, Allstate Financial uses interest rate swaps to hedge interest rate risk inherent in funding agreements.

When derivatives meet specific criteria, they may be designated as accounting hedges and accounted for as fair value, cash flow, foreign currency fair value or foreign currency cash flow hedges. Allstate Financial designates certain of its interest rate and foreign currency swap contracts and certain investment risk transfer reinsurance agreements as fair value hedges when the hedging instrument is highly effective in offsetting the risk of changes in the fair value of the hedged item. Allstate Financial designates certain of its foreign currency swap contracts as cash flow hedges when the hedging instrument is highly effective in offsetting the exposure of variations in cash flows for the hedged risk that could affect net income. Amounts are reclassified to net investment income or realized capital gains and losses as the hedged item affects net income.

Asset replication refers to the synthetic creation of assets through the use of derivatives and primarily investment grade host bonds to replicate securities that are either unavailable in the cash markets or more economical to acquire in synthetic form. The Company replicates fixed income securities using a combination of a credit default swap and one or more highly rated fixed income securities to synthetically replicate the economic characteristics of one or more cash market securities. The Company also creates synthetic exposure to equity markets through the use of exchange traded equity index future contracts and an investment grade host bond.

The Company's primary embedded derivatives are conversion options in fixed income securities, which provide the Company with the right to convert the instrument into a predetermined number of shares of common stock; equity options in Allstate Financial annuity product contracts, which provide equity returns to contractholders; and equity-indexed notes containing equity call options, which provide a coupon payout that is determined using one or more equity-based indices.

The notional amounts specified in the contracts are used to calculate the exchange of contractual payments under the agreements and are generally not representative of the potential for gain or loss on these agreements. However, the notional amounts specified in selling protection credit default swaps represent the maximum amount of potential loss, assuming no recoveries.

Fair value, which is equal to the carrying value, is the estimated amount that the Company would receive (pay) to terminate the derivative contracts at the reporting date. The carrying value amounts for OTC derivatives have been further adjusted for the effects, if any, of legally enforceable master netting agreements and are presented on a net basis in the Condensed Consolidated Statements of Financial Position. For certain exchange traded derivatives, the exchange requires margin deposits as well as daily cash settlements of margin accounts. As of March 31, 2010, the Company pledged \$19 million of securities and cash in the form of margin deposits.

The net impact to pre-tax income for derivatives includes valuation and settlements of derivatives. For those derivatives which qualify for fair value hedge accounting, net income includes the changes in the fair value of the hedged risk, and therefore reflects any hedging ineffectiveness. For cash flow hedges, gains and losses amortized from accumulated other comprehensive income are reported in net income. For embedded derivatives in convertible fixed income securities and equity-indexed notes, net income includes the change in fair value of the embedded derivative and accretion income related to the host instrument. For non-hedge derivatives, net income includes changes in fair value and accrued periodic settlements.

The following table provides a summary of the volume and fair value positions of derivative instruments as well as their reporting location in the Condensed Consolidated Statements of Financial Position at March 31, 2010.

(\$ in millions, except number of contracts)

	Balance sheet location	Asset derivatives				Gross asset	Gross liability

The following table provides a summary of the impacts of the Company's foreign currency contracts in cash flow hedging relationships in the Condensed Consolidated Statements of Operations and the Condensed Consolidated Statements of Financial Position for the three-month periods ended March 31. Amortization of net gains from accumulated other comprehensive income related to cash flow hedges is expected to be less than \$1 million during the next twelve months.

Total	\$ 18	\$ (36)	\$ 61	\$ (40)

The Company manages its exposure to credit risk by utilizing highly rated counterparties, establishing risk control limits, executing legally enforceable master netting agreements (MNAs) and obtaining collateral where appropriate. The Company uses MNAs for OTC derivative transactions, including interest rate swap, foreign currency swap, interest rate cap, interest rate floor, credit default swap, forward and certain option agreements (including swaptions). These agreements permit either party to net payments due for transactions covered by the agreements. Under the provisions of the agreements, collateral is either pledged or obtained when certain predetermined exposure limits are exceeded. As of March 31, 2010, counterparties pledged \$38 million in cash and \$5 million in securities to the Company, and the Company pledged \$4 million in cash and \$192 million in securities to counterparties which includes \$140 million of collateral posted under MNAs for contracts containing credit-risk-contingent provisions that are in a liability position and \$56 million of collateral posted under MNAs for contracts without credit-risk-contingent liabilities. The Company has not incurred any losses on derivative financial instruments due to counterparty nonperformance. Other derivatives including futures and certain option contracts are traded on organized exchanges, which require margin deposits and guarantee the execution of trades, thereby mitigating any potential credit risk associated with transactions executed on organized exchanges.

Counterparty credit exposure represents the Company's potential loss if all of the counterparties concurrently fail to perform under the contractual terms of the contracts and all collateral, if any, becomes worthless. This exposure is measured by the fair value of OTC derivative contracts with a positive fair value at the reporting date reduced by the effect, if any, of legally enforceable master netting agreements.

The following table summarizes the counterparty credit exposure by counterparty credit rating as it relates to interest rate swap, foreign currency swap, interest rate cap, interest rate floor, credit default swap, forward and certain option agreements (including swaptions).

(\$ in millions)	March 31, 2010	December 31, 2009
Rating (1)		

Edgar Filing: ALLSTATE CORP - Form 10-Q

	Number of counter- parties	Notional amount (2)	Credit exposure (2)	Exposure, net of collateral (2)	Number of counter- parties	Notional amount (2)	Credit exposure (2)	Exposure, net of collateral (2)
AA-	3	\$ 5,725	\$ 33	\$ 16	2	\$ 3,269	\$ 26	\$ 1
A+	2	6,482	23	3	5	12,359	204	57
A	3	4,192	14	11	3	2,551	62	30
A-	1	115	25	25	1	145	23	23
Total	9	\$ 16,514	\$ 95	\$ 55	11	\$ 18,324	\$ 315	\$ 111

(1) Rating is the lower of S&P or Moody's ratings.

(2) Only OTC derivatives with a net positive fair value are included for each counterparty.

Market risk is the risk that the Company will incur losses due to adverse changes in market rates and prices. Market risk exists for all of the derivative financial instruments the Company currently holds, as these instruments

may become less valuable due to adverse changes in market conditions. To limit this risk, the Company's senior management has established risk control limits. In addition, changes in fair value of the derivative financial instruments that the Company uses for risk management purposes are generally offset by the change in the fair value or cash flows of the hedged risk component of the related assets, liabilities or forecasted transactions.

Certain of the Company's derivative instruments contain credit-risk-contingent termination events, cross-default provisions and credit support annex agreements. Credit-risk-contingent termination events allow the counterparties to terminate the derivative on certain dates if AIC's, ALIC's or Allstate Life Insurance Company of New York's (ALNY) financial strength credit ratings by Moody's or S&P fall below a certain level or in the event AIC, ALIC or ALNY are no longer rated by both Moody's and S&P.

Credit-risk-contingent cross-default provisions allow the counterparties to terminate the derivative instruments if the Company defaults by pre-determined threshold amounts on certain debt instruments. Credit-risk-contingent credit support annex agreements specify the amount of collateral the Company must post to counterparties based on AIC's, ALIC's or ALNY's financial strength credit ratings by Moody's or S&P, or in the event AIC, ALIC or ALNY are no longer rated by both Moody's and S&P.

The following summarizes the fair value of derivative instruments with termination, cross-default or collateral credit-risk-contingent features that are in a liability position, as well as the fair value of assets and collateral that are netted against the liability in accordance with provisions within legally enforceable MNAs.

(\$ in millions)	March 31, 2010	December 31, 2009
Gross liability fair value of contracts containing credit-risk-contingent features	\$ 411	\$ 429
Gross asset fair value of contracts containing credit-risk-contingent features and subject to MNAs	(231)	(265)
Collateral posted under MNAs for contracts containing credit-risk-contingent features	(140)	(122)
Maximum amount of additional exposure for contracts with credit-risk-contingent features if all features were triggered concurrently	\$ 40	\$ 42

Credit derivatives - selling protection

Credit default swaps (CDS) are utilized for selling credit protection against a specified credit event. A credit default swap is a derivative instrument, representing an agreement between two parties to exchange the credit risk of a specified entity (or a group of entities), or an index based on the credit risk of a group of entities (all commonly referred to as the reference entity or a portfolio of reference entities), for a periodic premium. In selling protection, CDS are used to replicate fixed income securities and to complement the cash market when credit exposure to certain issuers is not available or when the derivative alternative is less expensive than the cash market alternative. CDS typically have a five-year term.

Edgar Filing: ALLSTATE CORP - Form 10-Q

The following table shows the CDS notional amounts by credit rating and fair value of protection sold as of March 31, 2010:

(\$ in millions)	Notional amount					Total	Fair value
	AA	A	BBB	BB and lower

Edgar Filing: ALLSTATE CORP - Form 10-Q

In selling protection with CDS, the Company sells credit protection on an identified single name, a basket of names in a first-to-default (FTD) structure or a specific tranche of a basket, or credit derivative index (CDX) that is generally investment grade, and in return receives periodic premiums through expiration or termination of the agreement. With single name CDS, this premium or credit spread generally corresponds to the difference between the yield on the referenced entity s public fixed maturity cash instruments and swap rates, at the time the agreement

is executed. With a FTD basket or a tranche of a basket, because of the additional credit risk inherent in a basket of named credits, the premium generally corresponds to a high proportion of the sum of the credit spreads of the names in the basket and the correlation between the names. CDX index is utilized to take a position on multiple (generally 125) reference entities. Credit events are typically defined as bankruptcy, failure to pay, or restructuring, depending on the nature of the reference credit. If a credit event occurs, the Company settles with the counterparty, either through physical settlement or cash settlement. In a physical settlement, a reference asset is delivered by the buyer of protection to the Company, in exchange for cash payment at par, whereas in a cash settlement, the Company pays the difference between par and the prescribed value of the reference asset. When a credit event occurs in a single name or FTD basket (for FTD, the first credit event occurring for any one name in the basket), the contract terminates at time of settlement. When a credit event occurs in a tranche of a basket, there is no immediate impact to the Company until cumulative losses in the basket exceed the contractual subordination. To date, realized losses have not exceeded the subordination. For CDX index, the reference entity's name incurring the credit event is removed from the index while the contract continues until expiration. The maximum payout on a CDS is the contract notional amount. A physical settlement may afford the Company with recovery rights as the new owner of the asset.

The Company monitors risk associated with credit derivatives through individual name credit limits at both a credit derivative and a combined cash instrument/credit derivative level. The ratings of individual names for which protection has been sold are also monitored.

7. Reserve for Property-Liability Insurance Claims and Claims Expense

The Company establishes reserves for claims and claims expense (loss) on reported and unreported claims of insured losses. The Company's reserving process takes into account known facts and interpretations of circumstances and factors including the Company's experience with similar cases, actual claims paid, historical trends involving claim payment patterns and pending levels of unpaid claims, loss management programs, product mix and contractual terms, law changes, court decisions, changes to regulatory requirements and economic conditions. In the normal course of business, the Company may also supplement its claims processes by utilizing third party adjusters, appraisers, engineers, inspectors, other professionals and information sources to assess and settle catastrophe and non-catastrophe related claims. The effects of inflation are implicitly considered in the reserving process.

Because reserves are estimates of unpaid portions of losses that have occurred, including incurred but not reported losses, the establishment of appropriate reserves, including reserves for catastrophes, is an inherently uncertain and complex process. The ultimate cost of losses may vary materially from recorded amounts, which are based on management's best estimates. The highest degree of uncertainty is associated with reserves for losses incurred in the current reporting period as it contains the greatest proportion of losses that have not been reported or settled. The Company regularly updates its reserve estimates as new information becomes available and as events unfold that may affect the resolution of unsettled claims. Changes in prior year reserve estimates, which may be material, are reported in property-liability insurance claims and claims expense in the Condensed Consolidated Statements of Operations in the period such changes are determined.

Management believes that the reserve for property-liability insurance claims and claims expense, net of reinsurance recoverables, is appropriately established in the aggregate and adequate to cover the ultimate net cost of reported and unreported claims arising from losses which had occurred by the date of the Condensed Consolidated Statements of Financial Position based on available facts, technology, laws and regulations.

8. Reinsurance

Property-liability insurance premiums earned and life and annuity premiums and contract charges have been reduced by the reinsurance premium ceded amounts shown in the following table:

(\$ in millions)	Three months ended			
	2010		2009	
		March 31,		
Property-liability insurance premiums earned	\$	268	\$	265
Life and annuity premiums and contract charges		191		204

Edgar Filing: ALLSTATE CORP - Form 10-Q

Property-liability insurance claims and claims expense and life and annuity contract benefits and interest credited to contractholder funds have been reduced by the reinsurance recovery amounts shown in the following table.

(\$ in millions)	Three months ended March 31,			
	2010		2009	
Property-liability insurance claims and claims expense	\$	80	\$	111
Life and annuity contract benefits		130		461
Interest credited to contractholder funds		7		6

9. Company Restructuring

The Company undertakes various programs to reduce expenses. These programs generally involve a reduction in staffing levels, and in certain cases, office closures. Restructuring and related charges include employee termination and relocation benefits, and post-exit rent expenses in connection with these programs, and non-cash charges resulting from pension benefit payments made to agents in connection with the 1999 reorganization of Allstate's multiple agency programs to a single exclusive agency program. In the first quarter of 2010, restructuring programs primarily relate to Allstate Protection's claim office consolidations and realignment of litigation services. The expenses related to these activities are included in the Condensed Consolidated Statements of Operations as restructuring and related charges, and totaled \$11 million and \$45 million during the three-month period ended March 31, 2010 and 2009, respectively.

The following table presents changes in the restructuring liability during the three-month period ended March 31, 2010.

(\$ in millions)	Employee costs		Exit costs		Total liability	
Balance at December 31, 2009	\$	45	\$	6	\$	51
Expense incurred		8		--		8
Adjustments to liability		(5)		--		(5)
Payments applied against liability		(3)		(1)		(4)
Balance at March 31, 2010	\$	45	\$	5	\$	50

The payments applied against the liability for employee costs primarily reflect severance costs, and the payments for exit costs generally consist of post-exit rent expenses and contract termination penalties. As of March 31, 2010, the cumulative amount incurred to date for active programs totaled \$161 million for employee costs and \$45 million for exit costs.

10. Guarantees and Contingent Liabilities

State facility assessments

Other-than-temporary impairment losses

The Company is required to participate in assigned risk plans, reinsurance facilities and joint underwriting associations in various states that provide insurance coverage to individuals or entities that otherwise are unable to purchase such coverage from private insurers. Because of the Company's participation, it may be exposed to losses that surpass the capitalization of these facilities and/or to assessments from these facilities.

Shared markets

As a condition of maintaining its licenses to write personal property and casualty insurance in various states, the Company is required to participate in assigned risk plans, reinsurance facilities and joint underwriting associations that provide various types of insurance coverage to individuals or entities that otherwise are unable to purchase such coverage from private insurers. Underwriting results related to these arrangements, which tend to be adverse, have been immaterial to the Company's results of operations.

Guarantees

The Company owns certain fixed income securities that obligate the Company to exchange credit risk or to forfeit principal due, depending on the nature or occurrence of specified credit events for the referenced entities. In the event all such specified credit events were to occur, the Company's maximum amount at risk on these fixed income securities, as measured by the amount of the aggregate initial investment, was \$160 million at March 31,

2010. The obligations associated with these fixed income securities expire at various dates during the next five years.

Related to the disposal through reinsurance of substantially all of Allstate Financial's variable annuity business to The Prudential Insurance Company of America, a subsidiary of Prudential Financial, Inc. (collectively Prudential) in 2006, the Company and its consolidated subsidiaries, ALIC and ALNY, have agreed to indemnify Prudential for certain pre-closing contingent liabilities (including extra-contractual liabilities of ALIC and ALNY and liabilities specifically excluded from the transaction) that ALIC and ALNY have agreed to retain. In addition, the Company, ALIC and ALNY will each indemnify Prudential for certain post-closing liabilities that may arise from the acts of ALIC, ALNY and their agents, including in connection with ALIC's and ALNY's provision of transition services. The reinsurance agreements contain no limitations or indemnifications with regard to insurance risk transfer, and transferred all of the future risks and responsibilities for performance on the underlying variable annuity contracts to Prudential, including those related to benefit guarantees. Management does not believe this agreement will have a material adverse effect on results of operations, cash flows or financial position of the Company.

The Company provides residual value guarantees on Company leased automobiles. If all outstanding leases were terminated effective March 31, 2010, the Company's maximum obligation pursuant to these guarantees, assuming the automobiles have no residual value, would be \$11 million at March 31, 2010. The remaining term of each residual value guarantee is equal to the term of the underlying lease that ranges from less than one year to three years. Historically, the Company has not made any material payments pursuant to these guarantees.

In the normal course of business, the Company provides standard indemnifications to contractual counterparties in connection with numerous transactions, including acquisitions and divestitures. The types of indemnifications typically provided include indemnifications for breaches of representations and warranties, taxes and certain other liabilities, such as third party lawsuits. The indemnification clauses are often standard contractual terms and are entered into in the normal course of business based on an assessment that the risk of loss would be remote. The terms of the indemnifications vary in duration and nature. In many cases, the maximum obligation is not explicitly stated and the contingencies triggering the obligation to indemnify have not occurred and are not expected to occur. Consequently, the maximum amount of the obligation under such indemnifications is not determinable. Historically, the Company has not made any material payments pursuant to these obligations.

The aggregate liability balance related to all guarantees was not material as of March 31, 2010.

Regulation and Compliance

The Company is subject to changing social, economic and regulatory conditions. From time to time, regulatory authorities or legislative bodies seek to influence and restrict premium rates, require premium refunds to policyholders, require reinstatement of terminated policies, restrict the ability of insurers to cancel or non-renew policies, require insurers to continue to write new policies or limit their ability to write new policies, limit insurers' ability to change coverage terms or to impose underwriting standards, impose additional regulations regarding agent and broker compensation, and otherwise expand overall regulation of insurance products and the insurance industry. The Company has established procedures and policies to facilitate compliance with laws and regulations, to foster prudent business operations, and to support financial reporting. The Company routinely reviews its practices to validate compliance with laws and regulations and with internal procedures and policies. As a result of these reviews, from time to time the Company may decide to modify some of its procedures and policies. Such modifications, and the reviews that led to them, may be accompanied by payments being made and costs being incurred. The ultimate changes and eventual effects of these actions on the Company's business, if any, are uncertain.

Edgar Filing: ALLSTATE CORP - Form 10-Q

A multi-state market conduct examination of Allstate's claims handling practices is in process and Florida, Illinois, Iowa, and New York are serving as the lead states. The official notice of the examination was issued by the Illinois Department of Insurance (formerly Illinois Division of Insurance) on March 30, 2009.

Legal and regulatory proceedings and inquiries

Background

The Company and certain subsidiaries are involved in a number of lawsuits, regulatory inquiries, and other legal proceedings arising out of various aspects of its business. As background to the Proceedings subsection below, please note the following:

- These matters raise difficult and complicated factual and legal issues and are subject to many uncertainties and complexities, including the underlying facts of each matter; novel legal issues; variations between jurisdictions in which matters are being litigated, heard, or investigated; differences in applicable laws and judicial interpretations; the length of time before many of these matters might be resolved by settlement, through litigation or otherwise; the fact that some of the lawsuits are putative class actions in which a class has not been certified and in which the purported class may not be clearly defined; the fact that some of the lawsuits involve multi-state class actions in which the applicable law(s) for the claims at issue is in dispute and therefore unclear; and the current challenging legal environment faced by large corporations and insurance companies.
- The outcome of these matters may be affected by decisions, verdicts, and settlements, and the timing of such decisions, verdicts, and settlements, in other individual and class action lawsuits that involve the Company, other insurers, or other entities and by other legal, governmental, and regulatory actions that involve the Company, other insurers, or other entities. The outcome may also be affected by future state or federal legislation, the timing or substance of which cannot be predicted.
- In the lawsuits, plaintiffs seek a variety of remedies including equitable relief in the form of injunctive and other remedies and monetary relief in the form of contractual and extra-contractual damages. In some cases, the monetary damages sought include punitive or treble damages. Often specific information about the relief sought, such as the amount of damages, is not available because plaintiffs have not requested specific relief in their pleadings. When specific monetary demands are made, they are often set just below a state court jurisdictional limit in order to seek the maximum amount available in state court, regardless of the specifics of the case, while still avoiding the risk of removal to federal court. In Allstate's experience, monetary demands in pleadings bear little relation to the ultimate loss, if any, to the Company.
- In connection with regulatory examinations and proceedings, government authorities may seek various forms of relief, including penalties, restitution, and changes in business practices. The Company may not be advised of the nature and extent of relief sought until the final stages of the examination or proceeding.
- For the reasons specified above, it is often not possible to make meaningful estimates of the amount or range of loss that could result from the matters described below in the Proceedings subsection. The Company reviews these matters on an ongoing basis and follows appropriate accounting guidance when making accrual and disclosure decisions. When assessing reasonably possible and probable outcomes, the Company bases its decisions on its assessment of the ultimate outcome following all appeals.

Edgar Filing: ALLSTATE CORP - Form 10-Q

- Due to the complexity and scope of the matters disclosed in the Proceedings subsection below and the many uncertainties that exist, the ultimate outcome of these matters cannot be reasonably predicted. In the event of an unfavorable outcome in one or more of these matters, the ultimate liability may be in excess of amounts currently reserved, if any, and may be material to the Company's operating results or cash flows for a particular quarterly or annual period. However, based on information currently known to it, management believes that the ultimate outcome of all matters described below, as they are resolved over time, is not likely to have a material adverse effect on the financial position of the Company.

Proceedings

There are a number of state and nationwide class action lawsuits pending in various state courts challenging the legal propriety of Allstate's medical bill review processes on a number of grounds, including the manner in which Allstate determines reasonableness and necessity. These lawsuits, which to a large degree mirror similar lawsuits filed against other carriers in the industry, allege these processes are used by Allstate systematically to undervalue claims. Plaintiffs seek monetary damages in the form of contractual and extra-contractual damages. The Company denies these allegations and continues to vigorously defend the pending lawsuits. Management believes that the

ultimate liability arising from these lawsuits as they are resolved over time is not likely to have a material effect on the operating results, cash flows, or financial position of the Company.

There is a nationwide putative class action pending against Allstate that challenges Allstate's use of a vendor's automated database in valuing total loss automobiles. To a large degree, this lawsuit mirrors similar lawsuits filed against other carriers in the industry. Plaintiffs allege that Allstate systematically underpays first party total loss vehicle claims. The plaintiffs are seeking actual and punitive damages. The lawsuit is in the discovery stage and Allstate is vigorously defending it.

The Company is vigorously defending a number of matters filed in the aftermath of Hurricane Katrina, including individual lawsuits and two statewide putative class actions in Louisiana. These matters are in various stages of development. The lawsuits and developments in litigation arising from the hurricanes include the following:

- The Company has been sued in a putative class action in the United States District Court for the Western District of Louisiana. The plaintiffs allege that they were entitled to, but did not receive, payment for general contractor overhead and profit (GCOP) or that the GCOP they received was not adequate to compensate them for the entire costs of a general contractor. The plaintiffs also alleged that Allstate incorrectly calculated depreciation on property losses. The Court granted partial summary judgment and dismissed the claim challenging the method of calculating depreciation. In October 2008, the Court heard plaintiffs' motion to certify three subclasses: the first class would impose a three trade rule meaning any time three or more trades are reflected on the estimate, GCOP must be paid; the second class encompassed the alleged miscalculation of GCOP when both general and specialty contractors are involved; and the third class sought to impose on the Company statutory penalties for its alleged breach of contract with regard to the first two subclasses. At the October 2008 hearing, the Court denied plaintiffs' motion on the certification of the first and third subclasses referred to above. The Court took under advisement the plaintiffs' motion for certification of the second subclass. On April 6, 2010, the Court issued its ruling denying plaintiffs' motion to certify the second subclass. Plaintiffs had until April 20, 2010 to file a petition for interlocutory appeal of the denial of class certification and did not file by the end of that day. The case should now proceed at the trial court on the named plaintiffs' individual claims only. Once the trial court enters a final judgment on plaintiffs' individual claims (either as a result of a dispositive motion or a trial on the merits), plaintiffs will have the right to appeal the trial court's rulings, including the denial of class certification.

- The Louisiana Attorney General filed a putative class action lawsuit in state court against Allstate and other insurers on behalf of Road Home fund recipients alleging that the insurers have failed to pay all damages owed under their policies. The insurers removed the matter to federal court. The district court denied plaintiffs' motion to remand the matter to state court and the U.S. Court of Appeals for the Fifth Circuit (Fifth Circuit) affirmed that ruling. The defendants filed a motion to dismiss and the plaintiffs filed a motion to remand the claims involving a Road Home subrogation agreement. In March 2009, the district court denied the State's request that its claims be remanded to state court. As for the defendant insurers' motion, the judge granted it in part and denied it in part. Dismissal of all of the extra-contractual claims, including the bad faith and breach of fiduciary duty claims, was granted. Dismissal also was granted of all claims based on the Valued Policy Law and all flood loss claims based on the levee breaches finding that the insurers flood exclusions precluded coverage. The remaining claims are for breach of contract and for declaratory relief on the alleged underpayment of claims by the insurers. The judge did not dismiss the class action allegations. The defendants also had moved to dismiss the complaint on grounds that the State had no standing to bring the lawsuit as an assignee of insureds because of anti-assignment language in the insurers' policies. The judge denied the defendants' motion for reconsideration on the assignment issue but found the matter was ripe for consideration by the federal appellate court. The defendants have filed a petition for permission to appeal to the Fifth Circuit. The Fifth Circuit has accepted review. After the Fifth Circuit accepted review, plaintiffs filed a motion to remand the case to state court, asserting that the class claims on which federal jurisdiction was premised have now effectively been dismissed as a result of a ruling in a related case. The Fifth Circuit has denied the motion for remand, without prejudice to plaintiffs' right to refile the motion for remand after the Fifth Circuit disposes of the pending appeal. The Fifth Circuit has tentatively scheduled oral argument during the week of July 5, 2010.

Allstate is vigorously defending a lawsuit involving worker classification issues. This lawsuit is a certified class action challenging a state wage and hour law. In December 2009, the liability phase of the case was tried and a decision is pending. In this case, plaintiffs seek monetary relief, such as penalties and liquidated damages, and non-monetary relief, such as injunctive relief.

The Company is defending certain matters relating to the Company's agency program reorganization announced in 1999. These matters are in various stages of development.

- These matters include a lawsuit filed in 2001 by the U.S. Equal Employment Opportunity Commission (EEOC) alleging retaliation under federal civil rights laws (the EEOC I suit) and a class action filed in 2001 by former employee agents alleging retaliation and age discrimination under the Age Discrimination in Employment Act (ADEA), breach of contract and ERISA violations (the Romero I suit). In 2004, in the consolidated EEOC I and Romero I litigation, the trial court issued a memorandum and order that, among other things, certified classes of agents, including a mandatory class of agents who had signed a release, for purposes of effecting the court's declaratory judgment that the release is voidable at the option of the release signer. The court also ordered that an agent who voids the release must return to Allstate any and all benefits received by the [agent] in exchange for signing the release. The court also stated that, on the undisputed facts of record, there is no basis for claims of age discrimination. The EEOC and plaintiffs asked the court to clarify and/or reconsider its memorandum and order and in January 2007, the judge denied their request. In June 2007, the court granted the Company's motions for summary judgment. Following plaintiffs' filing of a notice of appeal, the U.S. Court of Appeals for the Third Circuit (Third Circuit) issued an order in December 2007 stating that the notice of appeal was not taken from a final order within the meaning of the federal law and thus not appealable at this time. In March 2008, the Third Circuit decided that the appeal should not summarily be dismissed and that the question of whether the matter is appealable at this time will be addressed by the Third Circuit along with the merits of the appeal. In July 2009, the Third Circuit vacated the decision which granted the Company's summary judgment motions, remanded the cases to the trial court for additional discovery, and directed that the cases be reassigned to another trial court judge. In January 2010, the cases were assigned to a new judge for further proceedings in the trial court.

- A putative nationwide class action has also been filed by former employee agents alleging various violations of ERISA, including a worker classification issue. These plaintiffs are challenging certain amendments to the Agents Pension Plan and are seeking to have exclusive agent independent contractors treated as employees for benefit purposes. This matter was dismissed with prejudice by the trial court, was the subject of further proceedings on appeal, and was reversed and remanded to the trial court in 2005. In June 2007, the court granted the Company's motion to dismiss the case. Following plaintiffs' filing of a notice of appeal, the U.S. Court of Appeals for the Third Circuit issued an order in December 2007 stating that the notice of appeal was not taken from a final order within the meaning of the federal law and thus not appealable at this time. In March 2008, the Third Circuit decided that the appeal should not summarily be dismissed and that the question of whether the matter is appealable at this time will be addressed by the Third Circuit along with the merits of the appeal. In July 2009, the Third Circuit vacated the decision which granted the Company's motion to dismiss the case, remanded the case to the trial court for additional discovery, and directed that the case be reassigned to another trial court judge. In January 2010, the case was assigned to a new judge for further proceedings in the trial court.

In all of these various matters, plaintiffs seek compensatory and punitive damages, and equitable relief. Allstate has been vigorously defending these lawsuits and other matters related to its agency program reorganization.

In New Mexico, Allstate is defending a certified class action challenging the method by which Allstate discloses installment fees. The class members are limited to New Mexico policyholders based on the trial court's acceptance of plaintiffs' amended complaint. The plaintiffs contend that installment fees must be disclosed on the insurance policy itself, which would include the declarations page, because the fees allegedly meet the legal definition of premium. Plaintiffs seek repayment of installment fees since October 1996.

Other Matters

Various other legal, governmental, and regulatory actions, including state market conduct exams, and other governmental and regulatory inquiries are currently pending that involve the Company and specific aspects of its conduct of business. Like other members of the insurance industry, the Company is the target of a number of class

action lawsuits and other types of proceedings, some of which involve claims for substantial or indeterminate amounts. These actions are based on a variety of issues and target a range of the Company's practices. The outcome of these disputes is currently unpredictable.

One or more of these matters could have an adverse effect on the Company's operating results or cash flows for a particular quarterly or annual period. However, based on information currently known to it, management believes that the ultimate outcome of all matters described in this Other Matters subsection, in excess of amounts currently reserved, if any, as they are resolved over time is not likely to have a material effect on the operating results, cash flows or financial position of the Company.

Shareholder demand letter

On April 16, 2009, Allstate received the Service Employees International Union (SEIU) Pension Plans Master Trust's shareholder demand for board action concerning the Company's past executive compensation practices. The Company believes that as many as 28 other companies may have received similar letters from the SEIU. The SEIU correspondence has been referred to Allstate's Board of Directors for its consideration and disposition.

Asbestos and environmental

Allstate's reserves for asbestos claims were \$1.16 billion and \$1.18 billion, net of reinsurance recoverables of \$587 million and \$600 million, at March 31, 2010 and December 31, 2009, respectively. Reserves for environmental claims were \$197 million and \$198 million, net of reinsurance recoverables of \$49 million and \$49 million, at March 31, 2010 and December 31, 2009, respectively. Approximately 61% and 62% of the total net asbestos and environmental reserves at March 31, 2010 and December 31, 2009, respectively, were for incurred but not reported estimated losses.

Management believes its net loss reserves for asbestos, environmental and other discontinued lines exposures are appropriately established based on available facts, technology, laws and regulations. However, establishing net loss reserves for asbestos, environmental and other discontinued lines claims is subject to uncertainties that are greater than those presented by other types of claims. The ultimate cost of losses may vary materially from recorded amounts, which are based on management's best estimate. Among the complications are lack of historical data, long reporting delays, uncertainty as to the number and identity of insureds with potential exposure and unresolved legal issues regarding policy coverage; unresolved legal issues regarding the determination, availability and timing of exhaustion of policy limits; plaintiffs' evolving and expanding theories of liability, availability and collectability of recoveries from reinsurance, retrospectively determined premiums and other contractual agreements; and estimating the extent and timing of any contractual liability, and other uncertainties. There are also complex legal issues concerning the interpretation of various insurance policy provisions and whether those losses are covered, or were ever intended to be covered, and could be recoverable through retrospectively determined premium, reinsurance or other contractual agreements. Courts have reached different and sometimes inconsistent conclusions as to when losses are deemed to have occurred and which policies provide coverage; what types of losses are covered; whether there is an insurer obligation to defend; how policy limits are determined; how policy exclusions and conditions are applied and interpreted; and whether clean-up costs represent insured property damage. Management believes these issues are not likely to be resolved in the near future, and the ultimate cost may vary materially from the amounts currently recorded resulting in an increase in loss reserves. In addition, while the Company believes that improved actuarial techniques and databases have assisted in its ability to estimate asbestos, environmental, and other discontinued lines net loss reserves, these refinements may subsequently prove to be inadequate indicators of the extent of probable losses. Due to the uncertainties and factors described above, management believes it is not practicable to develop a meaningful range for any such additional net loss reserves that may be required.

11. Income Taxes

A reconciliation of the statutory federal income tax rate to the effective income tax rate on income from operations for the three months ended March 31 is as follows:

(\$ in millions)	2010		2009	
Statutory federal income tax rate expense (benefit)	\$ 37	35.0 %	\$ (46)	(35.0) %
Tax-exempt income	(50)	(47.3)	(69)	(52.6)
Dividends received deduction	(4)	(3.7)	(4)	(2.9)
(Increase) decrease in cash surrender value of company-owned life insurance	(1)	(0.4)	4	3.2
State income taxes	3	2.4	4	3.1
Other	2	1.7	--	--
Valuation allowance	--	--	254	193.6
Effective income tax rate (benefit) expense	\$ (13)	(12.3) %	\$ 143	109.4 %

Income tax expense for the first quarter of 2009 included expense of \$254 million attributable to an increase in the valuation allowance relating to the deferred tax asset on capital losses.

12. Components of Net Periodic Pension and Postretirement Benefit Costs

The components of net periodic cost for the Company's pension and postretirement benefit plans are as follows:

(\$ in millions)	Three months ended March 31,	
	2010	2009
Pension benefits		
Service cost	\$ 38	\$ 32
Interest cost	80	82
Expected return on plan assets	(83)	(99)
Amortization of:		
Prior service credit	(1)	(1)
Net actuarial loss	40	4
Settlement loss	13	16
Net periodic pension cost	\$ 87	\$ 34
Postretirement benefits		
Service cost	\$ 3	\$ 4
Interest cost	10	14
Amortization of:		
Prior service credit	(6)	--
Net actuarial gain	(5)	(8)
Net periodic postretirement cost	\$ 2	\$ 10

13. Business Segments

Summarized revenue data for each of the Company's business segments are as follows:

(\$ in millions)	Three months ended	
	2010	March 31, 2009
Revenues		
<i>Property-Liability</i>		
Property-liability insurance premiums earned		
Standard auto	\$ 4,137	\$ 4,164
Non-standard auto	234	246
Total auto	4,371	4,410
Homeowners	1,516	1,535
Other personal lines	616	638
Allstate Protection	6,503	6,583
Discontinued Lines and Coverages	--	(1)
Total property-liability insurance premiums earned	6,503	6,582
Net investment income	304	344
Realized capital gains and losses	(190)	(314)
Total Property-Liability	6,617	6,612
<i>Allstate Financial</i>		
Life and annuity premiums and contract charges		
Traditional life insurance	106	100
Immediate annuities with life contingencies	27	34
Accident and health	156	112
Total life and annuity premiums	289	246
Interest-sensitive life insurance	242	226
Fixed annuities	13	12
Total contract charges	255	238
Total life and annuity premiums and contract charges	544	484
Net investment income	731	819
Realized capital gains and losses	(162)	(43)
Total Allstate Financial	1,113	1,260
<i>Corporate and Other</i>		
Service fees	3	3
Net investment income	15	13
Realized capital gains and losses	4	(2)
Total Corporate and Other before reclassification of service fees	22	14
Reclassification of service fees (1)	(3)	(3)
Total Corporate and Other	19	11
Consolidated revenues	\$ 7,749	\$ 7,883

(1) For presentation in the Condensed Consolidated Statements of Operations, service fees of the Corporate and Other segment are reclassified to operating costs and expenses.

Edgar Filing: ALLSTATE CORP - Form 10-Q

Summarized financial performance data for each of the Company's reportable segments are as follows:

(\$ in millions)	Three months ended March 31,	
	2010	2009
Net income		
<i>Property-Liability</i>		
Underwriting income		
Allstate Protection	\$ 75	\$ 214
Discontinued Lines and Coverages	(4)	(6)

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Shareholders of

The Allstate Corporation

Northbrook, IL 60062

We have reviewed the accompanying condensed consolidated statement of financial position of The Allstate Corporation and subsidiaries (the Company) as of March 31, 2010, and the related condensed consolidated statements of operations and cash flows for the three-month periods ended March 31, 2010 and 2009. These interim financial statements are the responsibility of the Company's management.

We conducted our reviews in accordance with the standards of the Public Company Accounting Oversight Board (United States). A review of interim financial information consists principally of applying analytical procedures and making inquiries of persons responsible for financial and accounting matters. It is substantially less in scope than an audit conducted in accordance with the standards of the Public Company Accounting Oversight Board (United States), the objective of which is the expression of an opinion regarding the financial statements taken as a whole. Accordingly, we do not express such an opinion.

Based on our reviews, we are not aware of any material modifications that should be made to such condensed consolidated interim financial statements for them to be in conformity with accounting principles generally accepted in the United States of America.

We have previously audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated statement of financial position of The Allstate Corporation and subsidiaries as of December 31, 2009, and the related consolidated statements of operations, comprehensive income, shareholders' equity, and cash flows for the year then ended (not presented herein); and in our report dated February 25, 2010, which report includes an explanatory paragraph relating to a change in the Company's recognition and presentation for other-than-temporary impairments of debt securities in 2009, we expressed an unqualified opinion on those consolidated financial statements. In our opinion, the information set forth in the accompanying condensed consolidated statement of financial position as of December 31, 2009 is fairly stated, in all material respects, in relation to the consolidated statement of financial position from which it has been derived.

Item 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS FOR THE THREE-MONTH PERIODS ENDED MARCH 31, 2010 AND 2009

OVERVIEW

The following discussion highlights significant factors influencing the consolidated financial position and results of operations of The Allstate Corporation (referred to in this document as we, our, us, the Company or Allstate). It should be read in conjunction with the condensed consolidated financial statements and notes thereto found under Part I. Item 1. contained herein, and with the discussion, analysis, consolidated financial statements and notes thereto in Part I. Item 1. and Part II. Item 7. and Item 8. of The Allstate Corporation Annual Report on Form 10-K for 2009. Further analysis of our insurance segments is provided in the Property-Liability Operations (which includes the Allstate Protection and the Discontinued Lines and Coverages segments) and in the Allstate Financial Segment sections of Management's Discussion and Analysis (MD&A). The segments are consistent with the way in which we use financial information to evaluate business performance and to determine the allocation of resources.

Allstate is focused on three priorities: improve customer loyalty, reinvent protection and retirement for the consumer and grow our businesses.

HIGHLIGHTS

- Consolidated net income was \$120 million in the first quarter of 2010 compared to a net loss of \$274 million in the first quarter of 2009. Net income per diluted share was \$0.22 in the first quarter of 2010 compared to net loss per diluted share of \$0.51 in the first quarter of 2009.
- Property-Liability net income was \$164 million in the first quarter of 2010 compared to \$100 million in the first quarter of 2009.
- The Property-Liability combined ratio was 98.9 in the first quarter of 2010 compared to 96.8 in the first quarter of 2009.
- Allstate Financial had net income of \$4 million in the first quarter of 2010 compared to a net loss of \$327 million in the first quarter of 2009.
- Total revenues were \$7.75 billion in the first quarter of 2010 compared to \$7.88 billion in the first quarter of 2009.
- Property-Liability premiums earned in the first quarter of 2010 totaled \$6.50 billion, a decrease of 1.2% from \$6.58 billion in the first quarter of 2009.
- Net realized capital losses were \$348 million in the first quarter of 2010 compared to \$359 million in the first quarter of 2009.
- Investments as of March 31, 2010 totaled \$100.22 billion, an increase of 0.4% from \$99.83 billion as of December 31, 2009. Net investment income in the first quarter of 2010 was \$1.05 billion, a decrease of 10.7% from \$1.18 billion in the first quarter of 2009.
- Book value per diluted share (ratio of shareholders' equity to total shares outstanding and dilutive potential shares outstanding) was \$32.26 as of March 31, 2010, an increase of 42.4% from \$22.65 as of March 31, 2009 and an increase of 4.6% from \$30.84 as of December 31, 2009.
- For the twelve months ended March 31, 2010, return on the average of beginning and ending period shareholders' equity was 8.4%, an increase of 22.5 points from (14.1)% for the twelve months ended March 31, 2009.
- At March 31, 2010, we had \$17.56 billion in capital. This total included \$3.05 billion in deployable invested assets at the parent holding company level.

Item 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS FOR THE THREE-MONTH PERIODS ENDED MARCH 31, 2010 AND 2009

Item 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS FOR THE THREE-MONTH PERIODS ENDED MARCH 31, 2010 AND 2009

PROPERTY-LIABILITY HIGHLIGHTS

- Premiums written, an operating measure that is defined and reconciled to premiums earned in the Property-Liability Operations section of the MD&A, decreased 0.2% to \$6.26 billion in the first quarter of 2010 from \$6.27 billion in the first quarter of 2009.
 - Allstate brand standard auto premiums written increased 1.1% to \$4.02 billion in the first quarter of 2010 from \$3.98 billion in the first quarter of 2009.
 - Allstate brand homeowners premiums written increased 1.5% to \$1.19 billion in the first quarter of 2010 from \$1.17 billion in the first quarter of 2009.
 - Encompass brand premiums written decreased 21.3% to \$263 million in the first quarter of 2010 from \$334 million in the first quarter of 2009.
- Premium operating measures and statistics contributing to overall Allstate brand standard auto premiums written increase were the following:
 - 1.5% decrease in policies in force (PIF) as of March 31, 2010 compared to March 31, 2009
 - 0.2 point increase in the six month renewal ratio to 88.8% in the first quarter of 2010 compared to 88.6% in the first quarter of 2009
 - 3.0% increase in the six month policy term average gross premium before reinsurance to \$443 in the first quarter of 2010 from \$430 in the first quarter of 2009
 - 10.9% decrease in new issued applications in the first quarter of 2010 compared to the first quarter of 2009
- Premium operating measures and statistics contributing to overall Allstate brand homeowners premiums written increase were the following:
 - 4.1% decrease in PIF as of March 31, 2010 compared to March 31, 2009
 - 0.5 point increase in the twelve month renewal ratio to 88.0% in the first quarter of 2010 compared to 87.5% in the first quarter of 2009
 - 7.0% increase in the twelve month policy term average gross premium before reinsurance to \$921 in the first quarter of 2010 from \$861 in the first quarter of 2009
 - 6.3% decrease in new issued applications in the first quarter of 2010 compared to the first quarter of 2009
 - \$6 million decrease in catastrophe reinsurance costs to \$135 million in the first quarter of 2010 from \$141 million in the first quarter of 2009
- Factors comprising the Allstate brand standard auto loss ratio increase of 0.6 points to 69.4 in the first quarter of 2010 from 68.8 in the first quarter of 2009 were the following:
 - 0.1% decrease in standard auto claim frequency (rate of claim occurrence per policy in force) for property damage in the first quarter of 2010 compared to the first quarter of 2009
 - 5.4% increase in standard auto claim frequency for bodily injury in the first quarter of 2010 compared to the first quarter of 2009
 - 0.4% increase in auto claim severities for property damage in the first quarter of 2010 compared to the first quarter of 2009
 - 1.3% decrease in auto claim severities (average cost per claim) for bodily injury in the first quarter of 2010 compared to the first quarter of 2009
- Factors comprising the Allstate brand homeowners loss ratio, which includes catastrophes, increase of 4.8 points to 87.5 in the first quarter of 2010 from 82.7 in the first quarter of 2009 were the following:
 - 9.6 percentage point increase in the effect of catastrophe losses to 37.1 points in the first quarter of 2010 compared to 27.5 points in the first quarter of 2009
 - 5.1% increase in homeowner claim frequency, excluding catastrophes, in the first quarter of 2010 compared to the first quarter of 2009
 - 2.1% decrease in claim severity, excluding catastrophes, in the first quarter of 2010 compared to the first quarter of 2009
- Factors comprising the \$132 million increase in catastrophe losses to \$648 million in the first quarter of 2010 compared to \$516 million in the first quarter of 2009 were the following:
 - \$15 million of favorable reserve reestimates in the first quarter of 2010 compared to \$60 million favorable reserve reestimates in the first quarter of 2009

Edgar Filing: ALLSTATE CORP - Form 10-Q

11 events with \$663 million of losses in the first quarter of 2010 compared to 14 events with losses of \$576 million in the first quarter of 2009

Item 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS FOR THE THREE-MONTH PERIODS ENDED MARCH 31, 2010 AND 2009

- Factors comprising prior year reserve reestimates of \$23 million favorable in the first quarter of 2010 compared to \$55 million favorable in the first quarter of 2009 included:
 - Prior year reserve reestimates related to auto, homeowners and other personal lines in the first quarter of 2010 contributed \$5 million unfavorable, \$8 million favorable and \$22 million favorable, respectively, compared to prior year reserve reestimates in the first quarter of 2009 of \$35 million favorable, \$32 million favorable and \$9 million unfavorable, respectively. Prior year reserve reestimates in the first quarter of 2010 and 2009 are largely attributable to prior year catastrophes.
- Property-Liability underwriting income of \$71 million in the first quarter of 2010 compared to \$208 million in the first quarter of 2009 included the following primary contributing factors:
 - Allstate brand standard auto loss ratio increased 0.6 points to 69.4 in the first quarter of 2010 from 68.8 in the first quarter of 2009.
 - Allstate brand homeowners loss ratio, which includes catastrophes, increased 4.8 points to 87.5 in the first quarter of 2010 from 82.7 in the first quarter of 2009.

Underwriting income, a measure not based on accounting principles generally accepted in the United States of America (GAAP), is defined below.
- Property-Liability investments as of March 31, 2010 were \$34.81 billion, an increase of 0.8% from \$34.53 billion as of December 31, 2009. Net investment income was \$304 million in the first quarter of 2010, a decrease of 11.6% from \$344 million in the first quarter of 2009.
- Net realized capital losses were \$190 million in the first quarter of 2010 compared to \$314 million in the first quarter of 2009.

PROPERTY-LIABILITY OPERATIONS

Overview Our Property-Liability operations consist of two business segments: Allstate Protection and Discontinued Lines and Coverages. Allstate Protection comprises two brands, the Allstate brand and Encompass® brand. Allstate Protection is principally engaged in the sale of personal property and casualty insurance, primarily private passenger auto and homeowners insurance, to individuals in the United States and Canada. Discontinued Lines and Coverages includes results from insurance coverage that we no longer write and results for certain commercial and other businesses in run-off. These segments are consistent with the groupings of financial information that management uses to evaluate performance and to determine the allocation of resources.

Underwriting income, a measure that is not based on GAAP and is reconciled to net income below, is calculated as premiums earned, less claims and claims expense (losses), amortization of deferred policy acquisition costs (DAC), operating costs and expenses and restructuring and related charges, as determined using GAAP. We use this measure in our evaluation of results of operations to analyze the profitability of the Property-Liability insurance operations separately from investment results. It is also an integral component of incentive compensation. It is useful for investors to evaluate the components of income separately and in the aggregate when reviewing performance. Net income is the GAAP measure most directly comparable to underwriting income. Underwriting income should not be considered as a substitute for net income and does not reflect the overall profitability of the business.

The table below includes GAAP operating ratios we use to measure our profitability. We believe that they enhance an investor's understanding of our profitability. They are calculated as follows:

- Claims and claims expense (loss) ratio - the ratio of claims and claims expense to premiums earned. Loss ratios include the impact of catastrophe losses.
- Expense ratio - the ratio of amortization of DAC, operating costs and expenses, and restructuring and related charges to premiums earned.

Edgar Filing: ALLSTATE CORP - Form 10-Q

- Combined ratio - the ratio of claims and claims expense, amortization of DAC, operating costs and expenses, and restructuring and related charges to premiums earned. The combined ratio is the sum of the loss ratio and the expense ratio. The difference between 100% and the combined ratio represents underwriting income as a percentage of premiums earned.

Item 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS FOR THE THREE-MONTH PERIODS ENDED MARCH 31, 2010 AND 2009

We have also calculated the following impacts of specific items on the GAAP operating ratios because of the volatility of these items between fiscal periods.

- Effect of catastrophe losses on combined ratio - the percentage of catastrophe losses included in claims and claims expense to premiums earned. This ratio includes prior year reserve reestimates of catastrophe losses.
- Effect of prior year reserve reestimates on combined ratio - the percentage of prior year reserve reestimates included in claims and claims expense to premiums earned. This ratio includes prior year reserve reestimates of catastrophe losses.
- Effect of restructuring and related charges on combined ratio - the percentage of restructuring and related charges to premiums earned.
- Effect of Discontinued Lines and Coverages on combined ratio - the ratio of claims and claims expense and other costs and expenses in the Discontinued Lines and Coverages segment to Property-Liability premiums earned. The sum of the effect of Discontinued Lines and Coverages on the combined ratio and the Allstate Protection combined ratio is equal to the Property-Liability combined ratio.

Summarized financial data, a reconciliation of underwriting income to net income and GAAP operating ratios for our Property-Liability operations are presented in the following table.

(\$ in millions, except ratios)

	Three months ended	
	March 31,	
	2010	2009
Premiums written	\$ 6,258	\$ 6,269
Revenues

Realized capital gains and losses	(190)	(314)
Total revenues	6,617	6,612
Costs and expenses		
Claims and claims expense	(4,792)	(4,720)
Amortization of DAC	(925)	(949)
Operating costs and expenses	(704)	(678)
Restructuring and related charges	(11)	(27)
Total costs and expenses	(6,432)	(6,374)
Income tax expense	(21)	(138)
Net income	\$ 164	\$ 100
Underwriting income	\$ 71	\$ 208
Net investment income	304	344
Income tax expense on operations	(88)	(136)
Realized capital gains and losses, after-tax	(123)	(316)
Net income	\$ 164	\$ 100
Catastrophe losses (1)	\$ 648	\$ 516
GAAP operating ratios		
Claims and claims expense ratio	73.7	71.7
Expense ratio	25.2	25.1
Combined ratio	98.9	96.8

Edgar Filing: ALLSTATE CORP - Form 10-Q

Effect of catastrophe losses on combined ratio (1)	10.0	7.8
Effect of prior year reserve reestimates on combined ratio (1)	(0.4)	(0.8)
Effect of restructuring and related charges on combined ratio	0.2	0.4
Effect of Discontinued Lines and Coverages on combined ratio	0.1	0.1

(1) Prior year reserve reestimates included in catastrophe losses totaled \$15 million favorable in the three months ended March 31, 2010 compared to \$60 million favorable in the three months ended March 31, 2009.

Item 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS FOR THE THREE-MONTH PERIODS ENDED MARCH 31, 2010 AND 2009

Premiums written, an operating measure, is the amount of premiums charged for policies issued during a fiscal period. Premiums earned is a GAAP measure. Premiums are considered earned and are included in the financial results on a pro-rata basis over the policy period. The portion of premiums written applicable to the unexpired terms of the policies is recorded as unearned premiums on our Condensed Consolidated Statements of Financial Position.

A reconciliation of premiums written to premiums earned is shown in the following table.

(\$ in millions)	Three months ended March 31			
	2010		2009	
Premiums written:				
Allstate Protection	\$	6,258	\$	6,270
Discontinued Lines and Coverages				(1)
Property-Liability premiums written		6,258		6,269
Decrease in unearned premiums		245		337
Other				(24)
Property-Liability premiums earned	\$	6,503	\$	6,582
Premiums earned:				
Allstate Protection	\$	6,503	\$	6,583
Discontinued Lines and Coverages				(1)
Property-Liability	\$	6,503	\$	6,582

ALLSTATE PROTECTION SEGMENT

Premiums written by brand are shown in the following table.

(\$ in millions)	Three months ended March 31,					
	Allstate brand		Encompass brand		Allstate Protection	
	2010	2009	2010	2009	2010	2009
Standard auto	\$ 4,023	\$ 3,978	\$ 160	\$ 204	\$ 4,183	\$ 4,182
Non-standard auto	237	241	3	8	240	249
Homeowners	1,189	1,171	80	97	1,269	1,268
Other personal lines (1)	546	546	20	25	566	571
Total	\$ 5,995	\$ 5,936	\$ 263	\$ 334	\$ 6,258	\$ 6,270

(1) Other personal lines include commercial, condominium, renters, involuntary auto and other personal lines.

Allstate brand premiums written, excluding Allstate Canada, by the direct channel increased 26.7% to \$185 million in the first quarter of 2010 from \$146 million in the first quarter of 2009. The direct channel includes call centers and the internet.

Premiums earned by brand are shown in the following table.

(\$ in millions)	Three months ended March 31,							
	Allstate brand		Encompass brand				Allstate Protection	
	2010	2009	2010	2009	2010	2009		
Standard auto	\$ 3,943	\$ 3,917	\$ 194	\$ 247	\$ 4,137	\$ 4,164		
Non-standard auto	230	237	4	9	234	246		
Homeowners	1,416	1,417	100	118	1,516	1,535		
Other personal lines	592	610	24	28	616	638		
Total	\$ 6,181	\$ 6,181	\$ 322	\$ 402	\$ 6,503	\$ 6,583		

Item 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS FOR THE THREE-MONTH PERIODS ENDED MARCH 31, 2010 AND 2009

Premium operating measures and statistics that are used to analyze the business are calculated and described below. Measures and statistics presented for Allstate brand exclude Allstate Canada, loan protection and specialty auto.

- PIF: Policy counts are based on items rather than customers. A multi-car customer would generate multiple item (policy) counts, even if all cars were insured under one policy.
- Average premium-gross written: Gross premiums written divided by issued item count. Gross premiums written include the impacts from discounts and surcharges; and exclude the impacts from mid-term premium adjustments, ceded reinsurance premiums, or premium refund accruals. Allstate brand average gross premiums represent the appropriate policy term for each line, which is 6 months for standard and non-standard auto and 12 months for homeowners. Encompass brand average gross premiums represent the appropriate policy term for each line, which is 12 months for standard auto and homeowners and 6 months for non-standard auto.
- Renewal ratio: Renewal policies issued during the period, based on contract effective dates, divided by the total policies issued 6 months prior for standard and non-standard auto (12 months prior for Encompass brand standard auto) or 12 months prior for homeowners.
- New issued applications: Item counts of automobiles or homeowners insurance applications for insurance policies that were issued during the period. Does not include automobiles that are added by existing customers.

Standard auto premiums written totaled \$4.18 billion in the first quarter of 2010 and were comparable to the first quarter of 2009.

<u>Standard Auto</u>	Three months ended March 31,			
	Allstate brand		Encompass brand	
	2010	2009	2010	2009
PIF (thousands)	17,581	17,843	802	1,042
Average premium-gross written				
(1)	\$ 443	\$ 430	\$ 996	\$ 956
Renewal ratio (%) (1)	88.8	88.6	68.6	70.3

(1) Policy term is six months for Allstate brand and twelve months for Encompass brand.

Allstate brand standard auto premiums written totaled \$4.02 billion in the first quarter of 2010, an increase of 1.1% from \$3.98 billion in the first quarter of 2009. Contributing to the Allstate brand standard auto premiums written increase in the first quarter of 2010 compared to the first quarter of 2009 were the following:

decrease in PIF as of March 31, 2010 compared to March 31, 2009, due to fewer policies available to renew
 10.9% decrease in new issued applications on a countrywide basis to 464 thousand in the first quarter of 2010 from 521 thousand in the first quarter of 2009 driven by Florida and California, due to in part to rate actions that were approved in 2009 in these markets and other actions to improve profitability. Excluding Florida and California, new issued applications on a countrywide basis increased 5.2% to 366 thousand in the first quarter of 2010 from 348 thousand in the first quarter of 2009, with new issued application increases in 36 states, most of which offer an auto discount (the Preferred Package Discount) for the high lifetime value customer segment.
 increase in average gross premium in the first quarter of 2010 compared to the first quarter of 2009, primarily due to rate changes, partially offset by customers electing to change coverage levels of their policy
 increase of 0.2 in the renewal ratio in the first quarter of 2010 compared to the first quarter of 2009

Item 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS FOR THE THREE-MONTH PERIODS ENDED MARCH 31, 2010 AND 2009

Rate changes that are indicated based on loss trend analysis to achieve a targeted return will continue to be pursued. The following table shows the rate changes that were approved for standard auto and does not include rating plan enhancements, including the introduction of discounts and surcharges, that result in no change in the overall rate level in the state. These rate changes do not reflect initial rates filed for insurance subsidiaries initially writing business in a state.

	# of States		Three months ended March 31,			
	2010	2009	Countrywide(%) (1)		State Specific(%) (2) (3)	
			2010	2009	2010	2009
Allstate brand	8	18(4)	0.3	0.9	2.9	3.3
Encompass brand	6	24	1.5	3.7	7.1	8.1

(1) Represents the impact in the states where rate changes were approved during the three months ended March 31, 2010 and 2009, respectively, as a percentage of total countrywide prior year-end premiums written.

(2) Represents the impact in the states where rate changes were approved during the three months ended March 31, 2010 and 2009, respectively, as a percentage of its respective total prior year-end premiums written in those states.

(3) Based on historical premiums written in those states, rate changes approved for standard auto totaled \$59 million in the three months ended March 31, 2010 compared to \$178 million in the three months ended March 31, 2009.

(4) Includes Washington D.C.

Non-standard auto premiums written totaled \$240 million in the first quarter of 2010, a decrease of 3.6% from \$249 million in the first quarter of 2009.

<u>Non-Standard Auto</u>	Three months ended March 31,			
	Allstate brand		Encompass brand	
	2010	2009	2010	2009
PIF (thousands)	724	750	14	33
Average premium-gross written	\$ 619	\$ 615	\$ 441	\$ 490
Renewal ratio (%)	71.8	71.6	48.7	68.3

Allstate brand non-standard auto premiums written totaled \$237 million in the first quarter of 2010, a decrease of 1.7% from \$241 million in the first quarter of 2009. Contributing to the Allstate brand non-standard auto premiums written decrease in the first quarter of 2010 compared to the first quarter of 2009 were the following:

Edgar Filing: ALLSTATE CORP - Form 10-Q

decrease in PIF as of March 31, 2010 compared to March 31, 2009, due to a decline in the number of policies available to renew
 2.9% decrease in new issued applications to 99 thousand in the first quarter of 2010 from 102 thousand in the first quarter of 2009
 increase in average gross premium in the first quarter of 2010 compared to the first quarter of 2009
 increase in the renewal ratio in the first quarter of 2010 compared to the first quarter of 2009

Rate changes that are indicated based on loss trend analysis to achieve a targeted return will continue to be pursued. The following table shows the rate changes that were approved for non-standard auto and does not include rating plan enhancements, including the introduction of discounts and surcharges, that result in no change in the overall rate level in the state. These rate changes do not reflect initial rates filed for insurance subsidiaries initially writing business in a state.

	Three months ended March 31,					
	# of States		Countrywide(%) (1)		State Specific(%) (2) (3)	
	2010	2009	2010	2009	2010	2009
Allstate brand	1	4	0.9	0.1	22.1	1.6
Encompass brand	--	1	--	0.9	--	31.7

(1) Represents the impact in the states where rate changes were approved during the three months ended March 31, 2010 and 2009, respectively, as a percentage of total countrywide prior year-end premiums written.

(2) Represents the impact in the states where rate changes were approved during the three months ended March 31, 2010 and 2009, respectively, as a percentage of its respective total prior year-end premiums written in those states.

(3) Based on historical premiums written in those states, rate changes approved for non-standard auto totaled \$8 million in the three months ended March 31, 2010 compared to \$2 million in the three months ended March 31, 2009.

Item 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS FOR THE THREE-MONTH PERIODS ENDED MARCH 31, 2010 AND 2009

Homeowners premiums written totaled \$1.27 billion in the first quarter of 2010 and were comparable to the first quarter of 2009. Excluding the cost of catastrophe reinsurance, premiums written declined 0.4% in the first quarter of 2010 compared to the first quarter of 2009.

<u>Homeowners</u>	Three months ended March 31,			
	Allstate brand		Encompass brand	
	2010	2009	2010	2009
PIF (thousands)	6,886	7,181	354	431
Average premium-gross written (12 months)	\$ 921	\$ 861	\$ 1,299	\$ 1,251
Renewal ratio (%)	88.0	87.5	77.3	79.4

Allstate brand homeowners premiums written totaled \$1.19 billion in the first quarter of 2010, an increase of 1.5% from \$1.17 billion in the first quarter of 2009. Contributing to the Allstate brand homeowners premiums written increase in the first quarter of 2010 compared to the first quarter of 2009 were the following:

decrease in PIF of 4.1% as of March 31, 2010 compared to March 31, 2009, due to fewer policies available to renew and fewer new issued applications

6.3% decrease in new issued applications to 119 thousand in the first quarter of 2010 from 127 thousand in the first quarter of 2009

increase in average gross premium in the first quarter of 2010 compared to the first quarter of 2009, primarily due to rate changes

increase in the renewal ratio in the first quarter of 2010 compared to the first quarter of 2009

decrease in the net cost of our catastrophe reinsurance program in the first quarter of 2010 compared to the first quarter of 2009

As of March 2010, an increased Home and Auto discount is now available in 29 states. This has successfully shifted our mix of new business towards multi-line customers.

Rate changes that are indicated based on loss trend analysis to achieve a targeted return will continue to be pursued. The following table shows the rate changes that were approved for homeowners, including rate changes approved based on our net cost of reinsurance, and does not include rating plan enhancements, including the introduction of discounts and surcharges, that result in no change in the overall rate level in the state.

	Three months ended March 31,					
	# of States		Countrywide(%) (1)		State Specific(%) (2) (3)	
	2010	2009	2010	2009	2010	2009
Allstate brand	6	14	0.9	2.5	7.4	7.4
Encompass brand	5	18	0.7	1.6	5.2	6.7

(1) Represents the impact in the states where rate changes were approved during the three months ended March 31, 2010 and 2009, respectively, as a percentage of total countrywide prior year-end premiums written.

Edgar Filing: ALLSTATE CORP - Form 10-Q

(2) Represents the impact in the states where rate changes were approved during the three months ended March 31, 2010 and 2009, respectively, as a percentage of its respective total prior year-end premiums written in those states.

(3) Based on historical premiums written in those states, rate changes approved for homeowners totaled \$54 million in the three months ended March 31, 2010 compared to \$160 million in the three months ended March 31, 2009.

Item 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS FOR THE THREE-MONTH PERIODS ENDED MARCH 31, 2010 AND 2009

Underwriting results are shown in the following table.

(\$ in millions)	Three months ended March 31,	
	2010	2009
Premiums written	\$ 6,258	\$ 6,270
Premiums earned	\$ 6,503	\$ 6,583
Claims and claims expense	(4,790)	(4,717)
Amortization of DAC	(925)	(949)
Other costs and expenses	(702)	(676)
Restructuring and related charges	(11)	(27)
Underwriting income	\$ 75	\$ 214
Catastrophe losses	\$ 648	\$ 516
Underwriting income (loss) by line of business		
Standard auto	\$ 213	\$ 258
Non-standard auto	15	19
Homeowners	(192)	(85)
Other personal lines	39	22
Underwriting income	\$ 75	\$ 214
Underwriting income (loss) by brand		
Allstate brand	\$ 118	\$ 207
Encompass brand	(43)	7
Underwriting income	\$ 75	\$ 214

Allstate Protection experienced underwriting income of \$75 million during the first quarter of 2010 compared to \$214 million in the first quarter of 2009 primarily due to increases in homeowners underwriting loss and decreases in standard auto underwriting income. Homeowners underwriting loss increased 125.9% to an underwriting loss of \$192 million in the first quarter of 2010 from an underwriting loss of \$85 million in the first quarter of 2009, primarily due to higher catastrophe losses and increases in homeowner claim frequency excluding catastrophes, partially offset by lower severities. Standard auto underwriting income decreased 17.4% to \$213 million in the first quarter of 2010 from \$258 million in the first quarter of 2009, primarily due to increases in auto claim frequency and severity, partially offset by higher premiums earned.

Catastrophe losses in the first quarter of 2010 were \$648 million as detailed in the table below. This compares to catastrophe losses in the first quarter of 2009 of \$516 million.

We define a catastrophe as an event that produces pre-tax losses before reinsurance in excess of \$1 million and involves multiple first party policyholders, or an event that produces a number of claims in excess of a preset, per-event threshold of average claims in a specific area, occurring within a certain amount of time following the event. Catastrophes are caused by various natural events including high winds, winter storms, tornadoes, hailstorms, wildfires, tropical storms, hurricanes, earthquakes and volcanoes. We are also exposed to man-made catastrophic events, such as certain acts of terrorism or industrial accidents. The nature and level of catastrophes in any future period cannot be reliably predicted.

Item 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS FOR THE THREE-MONTH PERIODS ENDED MARCH 31, 2010 AND 2009

Catastrophe losses related to events that occurred by the size of the event are shown in the following table.

(\$ in millions)	Three months ended					
	March 31, 2010					
	Number of events		Claims and claims expense		Combined ratio impact	Average catastrophe loss per event
Size of catastrophe						
\$101 million to \$250 million	2	18.2%	\$ 400	61.7%	6.1	\$ 200
\$50 million to \$100 million	2	18.2	123	19.0	1.9	62
Less than \$50 million	7	63.6	140	21.6	2.2	20
Total	11	100.0%	663	102.3	10.2	60
Prior year reserve reestimates			(15)	(2.3)	(0.2)	
Total catastrophe losses			\$ 648	100.0%	10.0	

Catastrophe losses incurred by the type of event are shown in the following table.

(\$ in millions)	Three months ended			
	2010	March 31, 2010	2009	March 31, 2009
		Number of events		Number of events
Tornadoes	\$ --	--	\$ 119	1
Wind/Hail	379	6	322	10
Other events	284	5	135	3
Prior year reserve reestimates	(15)		(60)	
Total catastrophe losses	\$ 648	11	\$ 516	14

Item 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS FOR THE THREE-MONTH PERIODS ENDED MARCH 31, 2010 AND 2009

Combined ratio Loss ratios are a measure of profitability. Loss ratios by product, and expense and combined ratios by brand, are shown in the following table. These ratios are defined in the Property-Liability Operations section of the MD&A.

	Three months ended March 31,					
	Loss ratio (1)		Effect of catastrophe losses on the loss ratio		Effect of pre-tax reserve reestimates on the combined ratio	
	2010	2009	2010	2009	2010	2009
Allstate brand loss ratio:						
Standard auto	69.4	68.8	0.7	1.6	(0.1)	(0.7)
Non-standard auto	68.7	68.4	0.4	0.8	(1.3)	(0.4)
Homeowners	87.5	82.7	37.1	27.5	(0.4)	(1.2)
Other personal lines	63.5	66.1	7.3	7.7	(3.9)	0.8
Total Allstate brand loss ratio	73.0	71.7	9.7	8.1	(0.6)	(0.7)
Allstate brand expense ratio	25.1	25.0				
Allstate brand combined ratio	98.1	96.7				
Encompass brand loss ratio:						
Standard auto	76.8	74.1	1.0	0.8	5.2	(2.4)
Non-standard auto	100.0	66.7	--	--	--	--
Homeowners	103.0	61.9	46.0	10.2	(2.0)	(12.7)
Other personal lines	91.7	78.6	12.5	--	4.2	14.3
Total Encompass brand loss ratio	86.4	70.7	15.8	3.5	2.8	(4.2)
Encompass brand expense ratio	27.0	27.6				
Encompass brand combined ratio	113.4	98.3				
Allstate Protection loss ratio	73.6	71.6	10.0	7.8	(0.4)	(0.9)
Allstate Protection expense ratio	25.2	25.1				
Allstate Protection combined ratio	98.8	96.7				

(1) Ratios are calculated using the premiums earned for the respective line of business.

Standard auto loss ratio for the Allstate brand increased 0.6 points in the first quarter of 2010 compared to the first quarter of 2009 due to higher claim frequencies. In the first quarter of 2010, claim frequencies in the bodily injury and physical damage coverages have increased compared to the first quarter of 2009, but remain within historical norms. Bodily injury and physical damage coverages severity results increased in line with historical Consumer Price Index (CPI) trends.

Non-standard auto loss ratio for the Allstate brand increased 0.3 points in the first quarter of 2010 compared to the first quarter of 2009 due to higher claim frequencies, partially offset by favorable reserve reestimates. Bodily injury and physical damage coverages severity results increased in line with historical CPI trends.

Homeowners loss ratio for the Allstate brand increased 4.8 points to 87.5 in the first quarter of 2010 from 82.7 in the first quarter of 2009 due to higher catastrophe losses and higher frequencies excluding catastrophes, partially offset by lower severities. Frequencies excluding catastrophes increased in the first quarter of 2010 compared to the first quarter of 2009, in part, due to inclement weather in the first quarter of 2010, including an increase in freeze related claims, driven by winter weather.

Item 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS FOR THE THREE-MONTH PERIODS ENDED MARCH 31, 2010 AND 2009

Expense ratio for Allstate Protection increased 0.1 points in the first quarter of 2010 compared to the first quarter of 2009. Restructuring costs decreased 0.2 points in the first quarter of 2010 compared to the first quarter of 2009, driven by prior year accruals for reorganization of the Business Insurance sales and support model. Excluding restructuring, the expense ratio for Allstate Protection increased 0.3 points in the first quarter of 2010 compared to the first quarter of 2009. Improved operational efficiencies were offset by increased investments in marketing, pension costs and lower earned premium.

The impact of specific costs and expenses on the expense ratio are included in the following table.

	Three months ended March 31,					
	Allstate brand		Encompass brand		Allstate Protection	
	2010	2009	2010	2009	2010	2009
Amortization of DAC	14.0	14.2	18.5	18.6	14.2	14.4
Other costs and expenses	11.0	10.4	7.8	8.4	10.8	10.3
Restructuring and related charges	0.1	0.4	0.7	0.6	0.2	0.4
Total expense ratio	25.1	25.0	27.0	27.6	25.2	25.1

Reserve reestimates The tables below shows Allstate Protection net reserves representing the estimated cost of outstanding claims as they were recorded at the beginning of years 2010 and 2009, and the effect of reestimates in each year.

(\$ in millions)	January 1 reserves	
	2010	2009
	Auto	\$ 10,606\$
Homeowners	2,399	2,824

(1) Favorable reserve reestimates are shown in parentheses.

(2) Discontinued Lines and Coverages segment reserve reestimates in the three months ended March 31, 2010 totaled \$2 million unfavorable compared to \$3 million unfavorable in the three months ended March 31, 2009. The effect on the combined ratio totaled 0.1 in the three months ended March 31, 2009. There was no effect on the combined ratio in the three months ended March 31, 2010.

(3) Reserve reestimates included in catastrophe losses totaled \$15 million favorable in the three months ended March 31, 2010 compared to \$60 million favorable in the three months ended March 31, 2009.

Item 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS FOR THE THREE-MONTH PERIODS ENDED MARCH 31, 2010 AND 2009

DISCONTINUED LINES AND COVERAGES SEGMENT

Overview The Discontinued Lines and Coverages segment includes results from insurance coverage that we no longer write and results for certain commercial and other businesses in run-off. Our exposure to asbestos, environmental and other discontinued lines claims is reported in this segment. We have assigned management of this segment to a designated group of professionals with expertise in claims handling, policy coverage interpretation, exposure identification and reinsurance collection. As part of its responsibilities, this group is also regularly engaged in policy buybacks, settlements and reinsurance assumed and ceded commutations.

Summarized underwriting results are presented in the following table.

(\$ in millions)	Three months ended	
	2010	March 31, 2009
Premiums written	\$ --	\$ (1)
Premiums earned	\$ --	\$ (1)
Claims and claims expense	(2)	(3)
Operating costs and expenses	(2)	(2)
Underwriting loss	\$ (4)	\$ (6)

PROPERTY-LIABILITY INVESTMENT RESULTS

Net investment income decreased 11.6% or \$40 million to \$304 million in the first quarter of 2010 compared to \$344 million in the first quarter of 2009. The decrease was primarily due to lower yields and duration shortening actions taken to protect the portfolio from rising interest rates, partially offset by higher average asset balances. Net investment income was \$326 million and \$324 million in the third and fourth quarter of 2009, respectively.

Net realized capital gains and losses are presented in the following table.

(\$ in millions)	Three months ended	
	2010	March 31, 2009
Impairment write-downs	\$ (79)	\$ (256)
Change in intent write-downs	(9)	(72)

For a further discussion of net realized capital gains and losses, see the Investments section of the MD&A.

Item 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS FOR THE THREE-MONTH PERIODS ENDED MARCH 31, 2010 AND 2009

ALLSTATE FINANCIAL HIGHLIGHTS

- Net income was \$4 million in the first quarter of 2010 compared to a net loss of \$327 million in the first quarter of 2009.
- During the first quarter of 2010, amortization deceleration (credit to income) of \$12 million was recorded related to our annual comprehensive review of the DAC and deferred sales inducement costs (DSI) balances and assumptions for our interest-sensitive life, fixed annuities and other investment contracts. This compares to DAC and DSI amortization acceleration of \$322 million in the first quarter of 2009.
- Net realized capital losses totaled \$162 million in the first quarter of 2010 compared to \$43 million in the first quarter of 2009.
- Investments as of March 31, 2010 totaled \$62.34 billion, reflecting an increase in carrying value of \$120 million from \$62.22 billion as of December 31, 2009. Net investment income decreased 10.7% to \$731 million in the first quarter of 2010 from \$819 million in the first quarter of 2009.
- Contractholder fund deposits for the first quarter of 2010 totaled \$938 million compared to \$1.40 billion in the first quarter of 2009.

ALLSTATE FINANCIAL SEGMENT

Summary analysis Summarized financial data is presented in the following table.

(\$ in millions)	Three months ended March 31,	
	2010	2009
Revenues		
Life and annuity premiums and contract charges	\$ 544	\$ 484
Net investment income	731	819
Realized capital gains and losses	(162)	(43)
Total revenues	1,113	1,260
Costs and expenses		
Life and annuity contract benefits	(442)	(387)
Interest credited to contractholder funds	(463)	(579)
Amortization of DAC	(89)	(448)
Operating costs and expenses	(120)	(121)
Restructuring and related charges	--	(18)
Total costs and expenses	(1,114)	(1,553)
Gain on disposition of operations	1	3
Income tax benefit (expense)	4	(37)
Net income (loss)	\$ 4	\$ (327)
Investments at March 31	\$ 62,336	\$ 59,576

Net income in the first quarter of 2010 was \$4 million compared to a net loss of \$327 million in the same period of 2009. The improvement of \$331 million was primarily due to lower amortization of DAC and interest credited to contractholder funds, and increased premiums and contract charges, partially offset by higher net realized capital losses, lower net investment income and increased life and annuity contract benefits. Additionally, the first quarter of 2009 included \$142 million of income tax expense related to an increase in the deferred tax asset valuation allowance.

Effective March 31, 2010, we will no longer wholesale or provide distribution support to banks and broker-dealers. Although we will continue to service inforce contracts sold through these channels, we will no longer solicit new sales through our direct relationships with banks or broker-dealers. Certain of our master brokerage agencies and independent agents may continue to wholesale our products to banks and broker-dealers through their relationships. These distribution channels have primarily been used to sell deferred fixed annuities and interest-sensitive life insurance. In 2009, contract charges on products

Item 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS FOR THE THREE-MONTH PERIODS ENDED MARCH 31, 2010 AND 2009

sold through these distribution channels were \$44 million and contractholder deposits were \$896 million. In the first quarter of 2010, contract charges on products sold through these distribution channels were \$11 million and contractholder deposits were \$102 million. As of March 31, 2010, contractholder funds associated with these distribution channels totaled \$17.96 billion.

Analysis of revenues Total revenues decreased 11.7% or \$147 million in the first quarter of 2010 compared to the same period of 2009 due to higher net realized capital losses and lower net investment income, partially offset by increased premiums and contract charges.

Life and annuity premiums and contract charges Premiums represent revenues generated from traditional life insurance, immediate annuities with life contingencies, and accident and health insurance products that have significant mortality or morbidity risk. Contract charges are revenues generated from interest-sensitive and variable life insurance and fixed annuities for which deposits are classified as contractholder funds or separate account liabilities. Contract charges are assessed against the contractholder account values for maintenance, administration, cost of insurance and surrender prior to contractually specified dates. As a result, changes in contractholder funds are considered in the evaluation of growth and as indicators of future levels of revenues.

The following table summarizes life and annuity premiums and contract charges by product.

(\$ in millions)	Three months ended	
	March 31,	
	2010	2009
Premiums		
Traditional life insurance	\$ 106	\$ 100
Immediate annuities with life contingencies	27	34
Accident and health	156	112
Total premiums	289	246
Contract charges		
Interest-sensitive life insurance	242	226
Fixed annuities	13	12
Total contract charges (1)	255	238
Life and annuity premiums and contract charges	\$ 544	\$ 484

(1) Total contract charges for the first quarter of 2010 and 2009 include contract charges related to the cost of insurance totaling \$156 million and \$152 million, respectively.

Total premiums increased 17.5% in the first quarter of 2010 compared to the same period of 2009 primarily due to higher sales of accident and health insurance, with a large portion of the increase resulting from a new large employer case sold through the Allstate Workplace Division.

Edgar Filing: ALLSTATE CORP - Form 10-Q

Total contract charges increased 7.1% in the first quarter of 2010 compared to the same period of 2009 primarily due to higher contract charges on interest-sensitive life insurance products resulting from increases in certain policy administration fees and higher rates charged for the cost of insurance.

Item 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS FOR THE THREE-MONTH PERIODS ENDED MARCH 31, 2010 AND 2009

Contractholder funds represent interest-bearing liabilities arising from the sale of individual and institutional products, such as interest-sensitive life insurance, fixed annuities, funding agreements and bank deposits. The balance of contractholder funds is equal to the cumulative deposits received and interest credited to the contractholder less cumulative contract maturities, benefits, surrenders, withdrawals and contract charges for mortality or administrative expenses. The following table shows the changes in contractholder funds.

(\$ in millions)	Three months ended March 31,	
	2010	2009
Contractholder funds, beginning balance	\$ 52,582	\$ 58,413
Deposits		
Fixed annuities	291	635
Interest-sensitive life insurance	395	342
Bank and other deposits	252	427
Total deposits	938	1,404
Interest credited	462	531
Maturities, benefits, withdrawals and other adjustments		
Maturities and retirements of institutional products	(954)	(1,951)
Benefits	(395)	(450)
Surrenders and partial withdrawals	(1,248)	(1,213)
Contract charges	(241)	(221)
Net transfers from separate accounts	2	4
Fair value hedge adjustments for institutional products	(123)	(48)
Other adjustments (1)	4	152
Total maturities, benefits, withdrawals and other adjustments	(2,955)	(3,727)
Contractholder funds, ending balance	\$ 51,027	\$ 56,621

(1) The table above illustrates the changes in contractholder funds, which are presented gross of reinsurance recoverables on the Condensed Consolidated Statements of Financial Position. The table above is intended to supplement our discussion and analysis of revenues, which are presented net of reinsurance on the Condensed Consolidated Statements of Operations. As a result, the net change in contractholder funds associated with products reinsured to third parties is reflected as a component of the other adjustments line.

Contractholder funds decreased 3.0% and 3.1% in the first quarter of 2010 and 2009, respectively. Average contractholder funds decreased 9.9% in the first quarter of 2010 compared to the same period of 2009.

Contractholder deposits decreased 33.2% in the first quarter of 2010 compared to the same period of 2009 due to lower deposits on fixed annuities and Allstate Bank products. Deposits on fixed annuities decreased 54.2% in the first quarter of 2010 compared to the same period of 2009 due to pricing actions to improve returns on new business and reduce our concentration in spread based products. Bank and other deposits declined 41.0% as a result of a temporary savings account promotion offered in the prior year period.

Edgar Filing: ALLSTATE CORP - Form 10-Q

Maturities and retirements of institutional products decreased 51.1% to \$954 million in the first quarter of 2010 from \$1.95 billion in the same period of 2009. The prior year period included the retirement of \$1.36 billion of extendible institutional market obligations, all of which were retired during 2009.

Surrenders and partial withdrawals on deferred fixed annuities, interest-sensitive life insurance products and Allstate Bank products (including maturities of certificates of deposit) increased 2.9% to \$1.25 billion in the first quarter of 2010 from \$1.21 billion in the same period of 2009 due to higher surrenders and partial withdrawals on market value adjusted annuities, partially offset by lower surrenders and partial withdrawals on Allstate Bank products and traditional fixed annuities. The annualized surrender and partial withdrawal rate on deferred fixed annuities, interest-sensitive life insurance products and Allstate Bank products, based on the beginning of period contractholder funds, was 11.7% in the first quarter of 2010 compared to 11.1% in the same period of 2009.

Item 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS FOR THE THREE-MONTH PERIODS ENDED MARCH 31, 2010 AND 2009

Net investment income decreased 10.7% or \$88 million to \$731 million in the first quarter of 2010 from \$819 million in the same period of 2009 primarily due to lower yields and actions to reduce the portfolio's exposure to commercial real estate, along with reduced average asset balances. Net investment income was \$744 million and \$737 million in the third and fourth quarter of 2009, respectively.

Net realized capital gains and losses are presented in the following table.

(\$ in millions)	Three months ended	
	March 31,	
	2010	2009
Impairment write-downs	\$ (144)	\$ (357)
Change in intent write-downs	(23)	(33)
Net other-than-temporary impairment losses recognized in earnings	(167)	(390)
Sales	44	359
Valuation of derivative instruments	(54)	83
Settlements of derivative instruments	19	(18)
EMA limited partnership income	(4)	(77)
Realized capital gains and losses, pre-tax	(162)	(43)
Income tax benefit (expense)	57	(127)
Realized capital gains and losses, after-tax	\$ (105)	\$ (170)

For further discussion of realized capital gains and losses, see the Investments section of the MD&A.

Analysis of costs and expenses Total costs and expenses decreased 28.3% or \$439 million in the first quarter of 2010 compared to the same period of 2009 due primarily to lower amortization of DAC and interest credited to contractholder funds, partially offset by higher life and annuity contract benefits.

Life and annuity contract benefits increased 14.2% or \$55 million in the first quarter of 2010 compared to the same period of 2009 due to higher contract benefits on accident and health insurance and interest-sensitive life insurance. The increase in contract benefits on accident and health insurance business was proportionate to the growth in premiums. The higher contract benefits on interest-sensitive life insurance were primarily due to unfavorable mortality experience in 2010.

We analyze our mortality and morbidity results using the difference between premiums and contract charges earned for the cost of insurance and life and annuity contract benefits excluding the portion related to the implied interest on immediate annuities with life contingencies (benefit

Edgar Filing: ALLSTATE CORP - Form 10-Q

spread). This implied interest totaled \$139 million in both the first quarter of 2010 and 2009. The benefit spread by product group is disclosed in the following table.

(\$ in millions)	Three months ended	
	March 31,	
	2010	2009
Life insurance	\$ 88	\$ 103
Accident and health	64	49
Annuities	(10)	(2)
Total benefit spread	\$ 142	\$ 150

Benefit spread decreased 5.3% or \$8 million in the first quarter of 2010 compared to the same period of 2009 primarily due to unfavorable mortality experience on interest-sensitive life insurance, partially offset by growth in accident and health insurance business sold through the Allstate Workplace Division.

Interest credited to contractholder funds decreased 20.0% or \$116 million in the first quarter of 2010 compared to the same period of 2009 primarily due to lower average contractholder funds, decreased weighted average interest crediting rates on deferred fixed annuities and institutional products, and lower amortization of DSI. Amortization of DSI in the first quarter of 2010 and 2009 was \$5 million and \$57 million, respectively. The decrease is primarily due to the first quarter of 2009 including \$38 million in amortization acceleration due to changes in assumptions.

Item 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS FOR THE THREE-MONTH PERIODS ENDED MARCH 31, 2010 AND 2009

In order to analyze the impact of net investment income and interest credited to contractholders on net income, we monitor the difference between net investment income and the sum of interest credited to contractholder funds and the implied interest on immediate annuities with life contingencies, which is included as a component of life and annuity contract benefits on the Condensed Consolidated Statements of Operations (investment spread).

The investment spread by product group is shown in the following table.

(\$ in millions)	Three months ended	
	March 31,	
	2010	2009 ⁽¹⁾
Annuities and institutional products	\$ 50	\$ 34
Life insurance	7	(3)
Bank	8	6
Accident and health	4	4
Net investment income on investments supporting capital	60	60
Total investment spread	\$ 129	\$ 101

(1) To conform to the current year presentation, certain amounts in the prior year have been reclassified.

Investment spread increased 27.7% or \$28 million in the first quarter of 2010 compared to the same period of 2009 as lower net investment income was more than offset by decreased interest credited to contractholder funds.

To further analyze investment spreads, the following table summarizes the weighted average investment yield on assets supporting product liabilities and capital, interest crediting rates and investment spreads for the three months ended March 31.

	Weighted average investment yield				Weighted average interest crediting rate				Weighted average investment spreads			
	2010		2009		2010		2009		2010		2009	
Interest-sensitive life insurance	5.4	%	5.4	%	4.4	%	4.7	%	1.0	%	0.7	%
Deferred fixed annuities and institutional products	4.4		4.7		3.2		3.4		1.2		1.3	
Immediate fixed annuities with and without life contingencies	6.3		6.3		6.4		6.4		(0.1)		(0.1)	
Investments supporting capital, traditional life and other products	4.1		4.1		N/A		N/A		N/A		N/A	

Edgar Filing: ALLSTATE CORP - Form 10-Q

The following table summarizes our product liabilities and indicates the account value of those contracts and policies in which an investment spread is generated.

(\$ in millions)	March 31,	
	2010	2009
Immediate fixed annuities with life contingencies	\$ 8,517	\$ 8,368
Other life contingent contracts and other	4,535	4,301
Reserve for life-contingent contract benefits	\$ 13,052	\$ 12,669
Interest-sensitive life insurance	\$ 10,417	\$ 10,015
Deferred fixed annuities	31,570	33,554
Immediate fixed annuities without life contingencies	3,870	3,884
Institutional products	3,448	7,078
Allstate Bank	1,095	1,097
Market value adjustments related to fair value hedges and other	627	993
Contractholder funds	\$ 51,027	\$ 56,621

Item 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS FOR THE THREE-MONTH PERIODS ENDED MARCH 31, 2010 AND 2009

Amortization of DAC decreased 80.1% in the first quarter of 2010 compared to the same period of 2009. The components of amortization of DAC are summarized in the following table.

(\$ in millions)	Three months ended	
	2010	2009
Amortization of DAC before amortization relating to realized capital gains and losses and changes in assumptions	\$ (98)	\$ (144)
Amortization relating to realized capital gains and losses (1)	(3)	(27)
Amortization deceleration (acceleration) for changes in assumptions (DAC unlocking)	12	(277)
Total amortization of DAC	\$ (89)	\$ (448)

(1) The impact of realized capital gains and losses on amortization of DAC is dependent upon the relationship between the assets that give rise to the gain or loss and the product liability supported by the assets. Fluctuations result from changes in the impact of realized capital gains and losses on actual and expected gross profits.

The decrease of \$359 million in the first quarter of 2010 compared to the same period of 2009 was primarily due to a favorable change in amortization acceleration/deceleration for changes in assumptions.

During the first quarter of 2010, we completed our annual comprehensive review of the profitability of our products to determine DAC balances for our interest-sensitive life, fixed annuities and other investment contracts, which covers assumptions for investment returns, including capital gains and losses, interest crediting rates to policyholders, the effect of any hedges, persistency, mortality and expenses in all product lines. In the first quarter of 2010, the review resulted in a deceleration of DAC amortization (credit to income) of \$12 million. Amortization deceleration of \$45 million related to variable life insurance and was primarily due to appreciation in the underlying separate account valuations. Amortization acceleration of \$32 million related to interest-sensitive life insurance and was primarily due to an increase in projected realized capital losses and lower projected renewal premium (which is also expected to reduce persistency), partially offset by lower expenses.

In the first quarter of 2009, our annual comprehensive review resulted in the acceleration of DAC amortization (charge to income) of \$277 million. \$289 million related to fixed annuities, of which \$210 million was attributable to market value adjusted annuities, and \$18 million related to variable life insurance. Partially offsetting these amounts was amortization deceleration (credit to income) for interest-sensitive life insurance of \$30 million. The principal assumption impacting fixed annuity amortization acceleration was an increase in the level of expected realized capital losses in 2009 and 2010. For interest-sensitive life insurance, the amortization deceleration was due to a favorable change in our mortality assumptions, partially offset by increased expected capital losses.

The following table provides the effect on DAC amortization of changes in assumptions relating to the gross profit components of investment margin, benefit margin and expense margin.

Item 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS FOR THE THREE-MONTH PERIODS ENDED MARCH 31, 2010 AND 2009

Operating costs and expenses were consistent in the first quarter of 2010 compared to the same period of 2009. The following table summarizes operating costs and expenses.

(\$ in millions)	Three months ended	
	2010	2009
	March 31,	
Non-deferrable acquisition costs		
Other operating costs and expenses	\$ 44	\$ 40
Total operating costs and expenses	76	81
	\$ 120	\$ 121
Restructuring and related charges	\$ --	\$ 18

Non-deferrable acquisition costs increased 10.0% or \$4 million in the first quarter of 2010 compared to the same period of 2009 primarily due to higher non-deferrable commissions related to accident and health insurance business sold through the Allstate Workplace Division. Other operating costs and expenses decreased 6.2% or \$5 million in the first quarter of 2010 compared to the same period of 2009 due primarily to our expense reduction actions, which resulted in lower employee, professional services and sales support expenses.

Income tax benefit of \$4 million was recognized for the first quarter of 2010 compared to expense of \$37 million for the same period of 2009. Income tax expense for the first quarter of 2009 included expense of \$142 million attributable to an increase in the valuation allowance relating to the deferred tax asset on capital losses.

INVESTMENTS HIGHLIGHTS

- Investments as of March 31, 2010 totaled \$100.22 billion, an increase of 0.4% from \$99.83 billion as of December 31, 2009.
- Unrealized net capital losses totaled \$849 million as of March 31, 2010, declining from \$2.32 billion as of December 31, 2009. This resulted from improving fixed income and equity portfolio valuations. The fair value of fixed income securities increased primarily as a result of tightening credit spreads.
- Net investment income was \$1.05 billion in the first quarter of 2010, a decrease of 10.7% from \$1.18 billion in the first quarter of 2009.
- Net realized capital losses were \$348 million in the first quarter of 2010 compared to \$359 million in the first quarter of 2009. First quarter 2010 net realized capital losses include \$255 million of impairment and intent write-downs, compared to \$725 million in the first quarter of 2009, and \$185 million of derivative losses primarily resulting from risk mitigation initiatives, compared to \$91 million of derivative gains in the first quarter of 2009. Net realized capital losses in the first quarter of 2010 were partially offset by net realized capital gains of \$88 million from

investment sales, compared to \$418 million in the first quarter of 2009, and EMA limited partnership income of \$4 million, compared to losses of \$143 million in the first quarter of 2009.

- Derivative net realized capital losses from our risk mitigation and return optimization programs (macro hedge program) totaled \$161 million in the first quarter of 2010 and stemmed primarily from interest rate swaptions used to protect our fixed income portfolio, where valuations were negatively impacted by the decline in interest rates and volatility.
- During the first quarter of 2010, our fixed income and mortgage loan portfolio continued to generate significant cash flows totaling \$2.37 billion, which provides flexibility to take advantage of market opportunities and manage liabilities.

**Item 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS
FOR THE THREE-MONTH PERIODS ENDED MARCH 31, 2010 AND 2009**

INVESTMENTS

We continue to focus our strategic risk mitigation efforts towards managing interest rate, equity, credit and real estate investment risks, while our return optimization efforts focus on investing in new opportunities to generate income and capital appreciation. As a result, during the first quarter of 2010 we took the following actions:

- Reduced our municipal bond exposure by 5.9% or \$1.28 billion of amortized cost primarily through targeted dispositions, calls and scheduled maturities.
- Decreased our commercial real estate exposure by 4.9% or \$609 million of amortized cost primarily through targeted dispositions and principal repayments from borrowers.
- Reduced our exposure to equity markets by \$1.41 billion of cost as a result of an updated asset allocation strategy.
- Macro hedges were adjusted in respect to our portfolio allocations, but remain in place to protect our portfolio against interest rate and equity risks. Hedge results were consistent with our positions in relation to the movement in the underlying market indices and the resulting realized capital losses were significantly offset by the increase in fair value of our fixed income and equity securities which is reflected in other comprehensive income.

The composition of the investment portfolios at March 31, 2010 is presented in the table below.

(\$ in millions)	Property-Liability (5)		Allstate Financial (5)		Corporate and Other (5)		Total	
		Percent to total		Percent to total		Percent to total		Percent to total
Fixed income securities								
(1)	\$ 28,733	82.5%	\$ 50,310	80.7%	\$ 2,241	72.8%	\$ 81,284	81.1%
Equity securities (2)	3,580	10.3	227	0.4	--	--	3,807	3.8
Mortgage loans	50	0.1	7,589	12.2	--	--	7,639	7.6
Limited partnership interests (3)	1,744	5.0	1,023	1.6	35	1.1	2,802	2.8
Short-term (4)	608	1.8	1,074	1.7	800	26.0	2,482	2.5
Other	94	0.3	2,113	3.4	2	0.1	2,209	2.2
Total	\$ 34,809	100.0%	\$ 62,336	100.0%	\$ 3,078	100.0%	\$ 100,223	100.0%

(1) Fixed income securities are carried at fair value. Amortized cost basis for these securities was \$28.83 billion, \$51.45 billion and \$2.20 billion for Property-Liability, Allstate Financial and Corporate and Other, respectively.

(2) Equity securities are carried at fair value. Cost basis for these securities was \$3.25 billion and \$183 million for Property-Liability and Allstate Financial, respectively.

Edgar Filing: ALLSTATE CORP - Form 10-Q

(3) We have commitments to invest in additional limited partnership interests totaling \$595 million and \$759 million for Property-Liability and Allstate Financial, respectively.

(4) Short-term investments are carried at fair value. Amortized cost basis for these investments was \$608 million, \$1.07 billion and \$800 million for Property-Liability, Allstate Financial and Corporate and Other, respectively.

(5) Balances reflect the elimination of related party investments between segments.

Total investments increased to \$100.22 billion at March 31, 2010, from \$99.83 billion at December 31, 2009, primarily due to higher valuations for fixed income and equity securities from improved market conditions, partially offset by net reductions in contractholder obligations of \$1.56 billion. Fair values of fixed income securities increased as a result of tightening credit spreads. Credit spread is the additional yield on fixed income securities above the risk-free rate (typically defined as the yield on U.S. Treasury securities) that market participants require to compensate them for assuming credit, liquidity and/or prepayment risks. Credit spreads vary (i.e., widening or tightening) in response to the market's perception of risk and liquidity in a specific issuer or specific sector.

The Property-Liability investment portfolio increased to \$34.81 billion at March 31, 2010, from \$34.53 billion at December 31, 2009, primarily due to higher valuations for fixed income and equity securities from improved market conditions, partially offset by operating cash flows.

The Allstate Financial investment portfolio increased to \$62.34 billion at March 31, 2010, from \$62.22 billion at December 31, 2009, primarily due to higher valuations for fixed income securities from improved market conditions that was almost entirely offset by net reductions in contractholder obligations of \$1.56 billion primarily from maturities and retirements of institutional products.

Item 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS FOR THE THREE-MONTH PERIODS ENDED MARCH 31, 2010 AND 2009

The Corporate and Other investment portfolio decreased to \$3.08 billion at March 31, 2010, from \$3.09 billion at December 31, 2009, as dividends paid to shareholders more than offset higher valuations for fixed income securities from improved market conditions.

Fixed income securities by type are listed in the table below.

(\$ in millions)		Fair value at March 31, 2010	Percent to total investments		Fair value at December 31, 2009	Percent to total investments
U.S. government and agencies	\$	8,422	8.4%	\$	7,536	7.6%
Municipal		20,148	20.1		21,280	21.3
Corporate		34,499	34.4		33,115	33.2
Foreign government		3,314	3.3		3,197	3.2
Residential mortgage-backed securities (RMBS)		9,112	9.1		7,987	8.0
Commercial mortgage-backed securities (CMBS)		2,452	2.5		2,586	2.6
Asset-backed securities (ABS)		3,297	3.3		3,026	3.0

Total fixed income securities	\$	81,284	81.1%	\$	78,766	78.9%

At March 31, 2010, 93.3% of the consolidated fixed income securities portfolio was rated investment grade, which is defined as a security having a rating of Aaa, Aa, A or Baa from Moody's, a rating of AAA, AA, A or BBB from Standard & Poor's (S&P), Fitch, Dominion, or Realpoint, a rating of aaa, aa, a, or bbb from A.M. Best, or a comparable internal rating, if an externally provided rating is not available, which is consistent with the National Association of Insurance Commissioners (NAIC) rating.

**Item 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS
FOR THE THREE-MONTH PERIODS ENDED MARCH 31, 2010 AND 2009**

The following table summarizes the fair value and unrealized net capital gains and losses for fixed income securities by credit rating as of March 31, 2010.

Item 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS FOR THE THREE-MONTH PERIODS ENDED MARCH 31, 2010 AND 2009

Municipal Bonds, including tax exempt, taxable and ARS securities, totaled \$20.15 billion as of March 31, 2010 with an unrealized net capital loss of \$256 million. Taxable municipal bonds have an unrealized net capital loss of \$330 million resulting from wider credit spreads than at initial purchase, which is largely due to the macroeconomic conditions and credit market deterioration that persisted into 2010, as well as specific issue or issuer conditions.

Included in our municipal bond holdings at March 31, 2010 are \$1.18 billion of municipal securities which are not rated by third party credit rating agencies, but are rated by the NAIC and also internally rated. These holdings include \$599 million of below investment grade municipal bonds that provide the opportunity to achieve incremental returns. Our initial investment decisions and ongoing monitoring procedures for these securities are based on a thorough due diligence process which includes, but is not limited to, an assessment of the credit quality, sector, structure, and liquidity risks of each issue.

48.1% or \$9.68 billion of our municipal bond portfolio is insured by nine bond insurers and 39.5% of these securities have a credit rating of Aaa or Aa. Our practices for acquiring and monitoring municipal bonds primarily are based on the credit quality of the primary obligor. As of March 31, 2010, we believe valuations substantially reflected the decline in the value of the insurance, and further related valuation declines, if any, are not expected to be material. While the valuation of these holdings may be temporarily impacted by negative market developments, we expect to receive all of the contractual cash flows. As of March 31, 2010, 47.3% of our insured municipal bond portfolio was insured by National Public Finance Guarantee Corporation, Inc., 23.9% by Ambac Assurance Corporation, 22.3% by Assured Guaranty Municipal Corporation and 2.8% by Assured Guaranty Ltd.

Corporate bonds, including publicly traded, privately placed and hybrid securities, totaled \$34.50 billion as of March 31, 2010 with an unrealized net capital gain of \$914 million. Privately placed securities primarily consist of corporate issued senior debt securities that are in unregistered form or are directly negotiated with the borrower. Privately placed corporate securities are rated by the NAIC in instances when information is provided to them. 49.6% of the privately placed corporate securities in our portfolio are rated by an independent rating agency.

The following table shows details of hybrid securities as of March 31, 2010.

(\$ in millions)	Public		Privately placed		Total	
	Fair value	Unrealized gain/(loss)	Fair value	Unrealized gain/(loss)	Fair value	Unrealized gain/(loss)
United Kingdom (UK)	\$ 77	\$ (5)	\$ 60	\$ (3)	\$ 137	\$ (8)
Europe (non-UK)	131	9	313	(33)	444	(24)
Asia/Australia	12	--	137	(11)	149	(11)
North America	421	(56)	214	(43)	635	(99)
Total	\$ 641	\$ (52)	\$ 724	\$ (90)	\$ 1,365	\$ (142)

Hybrid securities have attributes most similar to those of fixed income securities such as stated interest rates and mandatory redemption dates. Additionally, some hybrids may have an interest rate step-up feature which is intended to incent the issuer to redeem the security at a specified call date. Hybrid securities include publicly-traded and privately placed securities. While hybrid securities are generally issued by investment grade-rated financial institutions, they have structural features, such as the ability to defer principal and interest payments, which make them more sensitive to credit market deterioration. \$1.13 billion of our hybrid securities with \$140 million of unrealized net capital losses are Tier 1 securities, and \$239 million with \$2 million of unrealized net capital losses are Tier 2 securities. Tier 1 securities are lower in the capital

structure than Tier 2 securities.

RMBS, CMBS and ABS are structured securities that are primarily collateralized by residential and commercial real estate related loans and other consumer related borrowings. The cash flows are generally applied in a pre-determined order and are designed so that each security issued qualifies for a specific original rating. The security issue is typically referred to as the class. For example, the senior portion or top of the capital structure, or rating class, which would originally qualify for a rating of Aaa typically has priority in receiving the principal repayments on the collateral. In a sequential structure, underlying collateral principal repayments are directed to the most senior rated Aaa class in the structure until paid in full, after which principal repayments are directed to the next most senior Aaa class in the structure until it is paid in full. Senior Aaa classes generally share any losses from the underlying collateral on a pro-rata basis after losses are absorbed by classes with lower original ratings and include other junior or subordinate securities. The collateral can have fixed interest rates, variable interest rates (such as adjustable rate mortgages (ARM)) or may contain features of both fixed and variable rate mortgages.

Item 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS FOR THE THREE-MONTH PERIODS ENDED MARCH 31, 2010 AND 2009

RMBS, including U.S. Agency, Prime, Alt-A and Subprime, totaled \$9.11 billion, with 82.4% rated investment grade, at March 31, 2010. The RMBS portfolio is subject to interest rate risk, but unlike other fixed income securities, is additionally subject to significant prepayment risk from the underlying mortgages. The credit risk associated with our RMBS is mitigated due to the fact that 59.8% of the portfolio consists of securities that were issued by, or have underlying collateral that is guaranteed by, U.S. government agencies. The unrealized net capital loss of \$1.23 billion at March 31, 2010 on our RMBS portfolio was the result of wider credit spreads than at initial purchase on non-U.S. Agency securities, which is largely due to the macroeconomic conditions and credit market deterioration, including the impact of real estate valuations, that persisted into 2010. The following table shows our RMBS portfolio at March 31, 2010 based upon vintage year of the issuance of the securities.

(\$ in millions)	U.S. Agency		Prime		Alt-A		Subprime		Total RMBS	
	Fair value	Unrealized gain/(loss)	Fair value	Unrealized gain/(loss)	Fair value	Unrealized gain/(loss)	Fair value	Unrealized gain/(loss)	Fair value	Unrealized gain/(loss)
2010	\$ 255	\$ (1)	\$ 237	\$ --	\$ 75	\$ --	\$ --	\$ --	\$ 567	\$ (1)
2009	968	10	76	--	12	--	--	--	1,056	10
2008	1,017	18	--	--	--	--	--	--	1,017	18
2007	593	10	171	(12)	112	(78)	412	(393)	1,288	(473)
2006	369	9	219	(16)	195	(30)	487	(338)	1,270	(375)
2005	682	20	218	(29)	145	(48)	404	(246)	1,449	(303)
Pre-2005	1,568	80	369	(13)	197	(43)	331	(131)	2,465	(107)
Total	\$ 5,452	\$ 146	\$ 1,290	\$ (70)	\$ 736	\$ (199)	\$ 1,634	\$ (1,108)	\$ 9,112	\$ (1,231)

Prime are collateralized by residential mortgage loans issued to prime borrowers. As of March 31, 2010, \$988 million of the Prime were fixed rate and \$302 million were variable rate.

Alt-A includes securities collateralized by residential mortgage loans issued to borrowers with stronger credit profiles than subprime borrowers, but who do not qualify for prime financing terms due to high loan-to-value ratios or limited supporting documentation. As of March 31, 2010, \$546 million of the Alt-A were fixed rate and \$190 million were variable rate.

Subprime includes securities that are collateralized by mortgage loans issued to borrowers that cannot qualify for Prime or Alt-A financing terms due in part to weak or limited credit history. It also includes securities that are collateralized by certain second lien mortgages regardless of the borrower's credit history. The Subprime portfolio consisted of \$1.35 billion and \$284 million of first lien and second lien securities, respectively. Subprime included \$834 million of fixed rate and \$800 million of variable rate securities.

CMBS totaled \$2.45 billion, with 95.1% rated investment grade, at March 31, 2010. The CMBS portfolio is subject to credit risk, but unlike certain other structured securities, is generally not subject to prepayment risk due to protections within the underlying commercial mortgages whereby borrowers are effectively restricted from prepaying their mortgages due to changes in interest rates. Of the CMBS investments, 90.2% are traditional conduit transactions collateralized by pools of commercial mortgages, broadly diversified across property types and geographical area. The remainder consists of non-traditional CMBS such as small balance transactions, large loan pools and single borrower transactions.

Edgar Filing: ALLSTATE CORP - Form 10-Q

The following table shows our CMBS portfolio at March 31, 2010 based upon vintage year.

(\$ in millions)		Fair value	Unrealized gain/(loss)
2007	\$	619	\$ (229)
2006		551	(399)
2005		381	(100)
Pre-2005		901	(40)
Total CMBS	\$	2,452	\$ (768)

The unrealized net capital loss of \$768 million at March 31, 2010 on our CMBS portfolio was the result of wider credit spreads than at initial purchase, which is largely due to the macroeconomic conditions and credit market deterioration, including the impact of real estate valuations, that persisted into 2010. While CMBS spreads tightened during 2009 and 2010, credit spreads in most rating classes remain wider than at initial purchase, which is particularly evident in our 2005-2007 vintage year and non-traditional CMBS. These holdings accounted for \$692 million, or 90.1%, of the unrealized net capital loss.

Item 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS FOR THE THREE-MONTH PERIODS ENDED MARCH 31, 2010 AND 2009

ABS, including CDO and Consumer and other ABS, totaled \$3.30 billion, with 86.4% rated investment grade, at March 31, 2010. Credit risk is managed by monitoring the performance of the collateral. In addition, many of the securities in the ABS portfolio are credit enhanced with features such as overcollateralization, subordinated structures, reserve funds, guarantees and/or insurance. The unrealized net capital loss of \$387 million at March 31, 2010 on our ABS portfolio was the result of wider credit spreads than at initial purchase.

CDO totaled \$1.76 billion, with 76.4% rated investment grade, at March 31, 2010. CDO consist primarily of obligations secured by high yield and investment grade corporate credits including \$1.37 billion of cash flow collateralized loan obligations (CLO) and \$98 million of synthetic CDO with unrealized losses of \$174 million and \$97 million, respectively. The remaining \$295 million of securities consisted of trust preferred CDO, market value CDO, project finance CDO, collateralized bond obligations and other CLO with unrealized losses of \$102 million.

Cash flow CLO are structures where the underlying assets are primarily comprised of below investment grade senior secured corporate loans. The collateral is actively managed by external managers that monitor the collateral performance. The underlying investments are well diversified across industries and among issuers. A transaction will typically issue notes with various capital structure classes (i.e. Aaa, Aa, A, etc.) as well as equity-like tranches. In general, these securities are structured with overcollateralization ratios and performance is impacted by downgrades, defaults and recoveries of the underlying assets within the structures. Downgrades of underlying assets, along with increased defaults reduce overcollateralization ratios over time. A violation of the senior overcollateralization test could result in an event of default of the structure. This would give the controlling class, defined as the majority of the senior lenders, certain rights which could include diverting cash flows or liquidating the underlying portfolio to pay off the senior liabilities.

Synthetic CDO primarily consist of a portfolio of corporate credit default swaps (CDS) which are collateralized by Aaa rated LIBOR-based securities (i.e. fully funded synthetic CDO). Our synthetic CDO collateral primarily is actively managed by external managers monitoring the CDS selection and performance.

Consumer and other ABS totaled \$1.54 billion, with 97.8% rated investment grade, at March 31, 2010. Consumer and other ABS consists of \$844 million of auto, \$76 million of student loan and \$615 million of other ABS securities with unrealized gains of \$14 million for auto and unrealized losses of \$28 million for other ABS securities.

Mortgage loans Our mortgage loan portfolio, which is primarily held in the Allstate Financial portfolio, totaled \$7.64 billion at March 31, 2010, compared to \$7.94 billion at December 31, 2009, and is primarily comprised of loans secured by first mortgages on developed commercial real estate. Key considerations used to manage our exposure include property type and geographic diversification. Our exposure to any metropolitan area is also highly diversified, with the largest exposure not exceeding 9.6% of the portfolio. The portfolio is diversified across several property types, with the largest concentrations of 34.2% in office buildings and 24.6% in retail property. Debt service coverage ratio represents the amount of cash flows from the property available to the borrower to meet principal and interest payment obligations. For fixed rate mortgage loans, which comprise 90% of the total portfolio, the average debt service coverage ratios as of both March 31, 2010 and December 31, 2009 were 1.7. Mortgage loans with debt service coverage ratios below 1.0 generally have a higher level of risk. 5.5% of the mortgage loan portfolio had a debt service coverage ratio under 1.0 compared to 5.8% as of December 31, 2009. As of March 31, 2010, 27.2% of these loans have valuation allowances totaling \$36 million compared to 18.4% totaling \$26 million as of December 31, 2009. Mortgage loans with debt service coverage below 1.0 for which valuation allowances have not been established primarily relate to instances where the borrower has the financial capacity to fund the revenue shortfalls from the properties for the foreseeable term, the decrease in occupancy is considered temporary, or there are other risk mitigating circumstances such as additional collateral, escrow balances or borrower guarantees.

Edgar Filing: ALLSTATE CORP - Form 10-Q

In the first three months of 2010, \$346 million of commercial mortgage loans were contractually due. Of these, 9% were paid as due, 72% were extended generally for less than one year, 11% were refinanced and 8% were foreclosed or in the process of foreclosure. In addition, \$193 million that were not contractually due in the first three months of 2010 were paid in full. We have nine additional loans totaling \$129 million in the process of foreclosure that were not contractually due in the first three months of 2010. In total we have eleven loans totaling \$158 million in foreclosure, reflecting an increase from five loans totaling \$49 million as of December 31, 2009.

**Item 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS
FOR THE THREE-MONTH PERIODS ENDED MARCH 31, 2010 AND 2009**

The net carrying value of impaired loans at March 31, 2010 and December 31, 2009 was \$339 million and \$383 million, respectively. Total valuation allowances of \$104 million were held on impaired loans at March 31, 2010. We recognized \$13 million of realized capital losses related to net increases in the valuation allowances on impaired loans for the three months ended March 31, 2010 primarily due to deteriorating debt service coverage resulting from a decrease in occupancy and the risk associated with refinancing near-term maturities due to declining collateral valuations. Realized capital losses recognized on mortgage loans held for sale totaled \$6 million for the three months ended March 31, 2010.

Limited partnership interests consist of investments in private equity/debt funds, real estate funds and hedge funds. The overall limited partnership interests portfolio is well diversified across a number of characteristics including fund sponsors, vintage years, strategies, geography (including international), and company/property types. The following table presents information about our limited partnership interests as of March 31, 2010.

(\$ in millions)		Private equity/ debt funds	Real estate funds	Hedge funds	Total
Cost method of accounting (Cost)	\$	788 \$	268 \$	56 \$	1,112
Equity method of accounting (EMA)		650	261	779	1,690
Total	\$	1,438 \$	529 \$	835 \$	2,802
Number of sponsors		84	40	11	
Number of individual funds		133	88	92	
Largest exposure to single fund	\$	40 \$	35 \$	107	

As of both March 31, 2010 and December 31, 2009, our aggregate limited partnership exposure represented 2.8% of total invested assets.

The following table shows the results from our limited partnership interests by fund type and accounting classification.

(\$ in millions)	Three months ended March 31,							
	2010				2009			
	Cost	EMA	Total income	Impairment write-downs (1)	Cost	EMA	Total income	Impairment write-downs (1)
Private equity/debt funds	\$ 6 \$	15 \$	21 \$	(2) \$	3 \$	(63) \$	(60) \$	(71)
Real estate funds	--	(28)	(28)	(21)	--	(78)	(78)	(124)
Hedge funds	--	17	17	(1)	--	(2)	(2)	(2)
Total	\$ 6 \$	4 \$	10 \$	(24) \$	3 \$	(143) \$	(140) \$	(197)

(1) Impairment write-downs related to Cost limited partnerships were \$24 million and \$187 million in the three months ended March 31, 2010 and 2009, respectively. Impairment write-downs related to EMA limited partnerships were \$10 million in the three months ended March 31, 2009. There were no impairment write-downs related to EMA limited partnerships in the three months ended March 31, 2010.

Limited partnership interests, excluding impairment write-downs, produced income of \$10 million in the three months ended March 31, 2010 compared to losses of \$140 million in the three months ended March 31, 2009. Income on EMA limited partnerships is recognized on a delay due to the availability of the related financial statements. The recognition of income on hedge funds is primarily on a one-month delay and the income recognition on private equity/debt funds and real estate funds are generally on a three-month delay. Limited partnership interests accounted for under the cost method of accounting recognize income only upon cash distributions by the partnership.

**Item 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS
FOR THE THREE-MONTH PERIODS ENDED MARCH 31, 2010 AND 2009**

Unrealized net capital losses totaled \$849 million as of March 31, 2010 compared to unrealized net capital losses of \$2.32 billion as of December 31, 2009. The improvement since December 31, 2009 for fixed income securities was primarily a result of tightening credit spreads on certain fixed income securities. The improvement since December 31, 2009 for equity securities was a result of higher equity security valuations. The following table presents unrealized net capital gains and losses, pre-tax and after-tax.

(\$ in millions)		March 31, 2010		December 31, 2009
U.S. government and agencies	\$	218	\$	203
Municipal		(256)		(403)
Corporate		914		345
Foreign government		306		291
RMBS		(1,231)		(1,500)
CMBS		(768)		(925)
ABS		(387)		(488)
Redeemable preferred stock		2		--
Fixed income securities (1)		(1,202)		(2,477)
Equity securities		371		179
Short-term investments		--		--
Derivatives		(18)		(23)
Unrealized net capital gains and losses, pre-tax		(849)		(2,321)
Amounts recognized for:				
Insurance reserves (2)		--		--
DAC and DSI (3)		726		990
Amounts recognized		726		990
Deferred income taxes		39		461
Unrealized net capital gains and losses, after-tax	\$	(84)	\$	(870)

(1) Unrealized net capital gains and losses for fixed income securities as of March 31, 2010 and December 31, 2009 comprises \$(590) million and \$(679) million, respectively, related to unrealized net capital losses on fixed income securities with other-than-temporary impairment and \$(612) million and \$(1,798) million, respectively, related to other unrealized net capital gains and losses.

(2) The insurance reserves adjustment represents the amount by which the reserve balance would increase if the net unrealized gains in the applicable product portfolios were realized and reinvested at current lower interest rates, resulting in a premium deficiency. Although we evaluate premium deficiencies on the combined performance of our life insurance and immediate annuities with life contingencies, the adjustment primarily relates to structured settlement annuities with life contingencies, in addition to annuity buy-outs and certain payout annuities with life contingencies.

(3) The DAC and DSI adjustment balance represents the amount by which the amortization of DAC and DSI would increase or decrease if the unrealized gains or losses in the respective product portfolios were realized. Only the unrealized net capital gains and losses on the Allstate Financial fixed annuity and interest-sensitive life product portfolios are used in this calculation. The reduction in unrealized net capital losses in the first quarter of 2010 for these product portfolios was less than the reduction in unrealized net capital losses for the total Allstate Financial and consolidated portfolios. The DAC and DSI adjustment balance, subject to limitations, is determined by applying the DAC and DSI amortization rate to unrealized net capital gains or losses. Recapitalization of the DAC and DSI balances is limited to the originally deferred costs plus interest.

The net unrealized loss for the fixed income portfolio totaled \$1.20 billion, comprised of \$2.78 billion of gross unrealized gains and \$3.98 billion of gross unrealized losses at March 31, 2010. This is compared to a net unrealized loss for the fixed income portfolio totaling \$2.48 billion,

Edgar Filing: ALLSTATE CORP - Form 10-Q

comprised of \$2.47 billion of gross unrealized gains and \$4.95 billion of gross unrealized losses at December 31, 2009.

**Item 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS
FOR THE THREE-MONTH PERIODS ENDED MARCH 31, 2010 AND 2009**

Gross unrealized gains and losses as of March 31, 2010 on fixed income securities by type and sector are provided in the table below.

(\$ in millions)	Gross unrealized				Fair value	Amortized cost as a percent of par value (2)	Fair value as a percent of par value (2)
	Par value (1)	Amortized cost	Gains	Losses			
Corporate:

Total fixed income securities	\$ 90,485	\$ 82,486	2,782	\$ (3,984)	\$ 81,284	91.2	89.8

(1) Included in par value are zero-coupon securities that are generally purchased at a deep discount to the par value that is received at maturity. These primarily included corporate, municipal, foreign government and U.S. government and agencies zero-coupon securities with par value of \$882 million, \$7.83 billion, \$1.35 billion and \$1.49 billion, respectively.

(2) Excluding the impact of zero-coupon securities, the percentage of amortized cost to par value would be 99.7% for corporates, 99.9% for municipals, 104.2% for foreign governments and 101.3% for U.S. government and agencies. Similarly, excluding the impact of zero-coupon securities, the percentage of fair value to par value would be 102.3% for corporates, 99.8% for municipals, 108.9% for foreign governments and 102.8% for U.S. government and agencies.

The banking, financial services, consumer goods and utilities sectors had the highest concentration of gross unrealized losses in our corporate fixed income securities portfolio at March 31, 2010. While credit spreads tightened in 2009 and 2010, they remain wider than at initial purchase for select securities in the portfolio.

The net unrealized gain for the equity portfolio totaled \$371 million, comprised of \$457 million of unrealized gains and \$86 million of unrealized losses at March 31, 2010. This is compared to a net unrealized gain for the equity portfolio totaling \$179 million, comprised of \$381 million of unrealized gains and \$202 million of unrealized losses at December 31, 2009. Within the equity portfolio, the losses were primarily concentrated in index-based securities, banking, consumer goods and financial services sectors. The unrealized losses in these sectors were

Edgar Filing: ALLSTATE CORP - Form 10-Q

company and sector specific. As of March 31, 2010, we have the intent and ability to hold our equity securities with unrealized losses until recovery.

We have a comprehensive portfolio monitoring process to identify and evaluate each fixed income and equity security whose carrying value may be other-than-temporarily impaired. The process includes a quarterly review of all securities through a screening criteria which identifies instances where the fair value compared to amortized cost for fixed income securities and cost for equity securities is below established thresholds, and also includes the monitoring of other criteria such as ratings, ratings downgrades or payment defaults. The securities identified, in addition to other securities for which we may have a concern, are evaluated based on facts and circumstances for

**Item 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS
FOR THE THREE-MONTH PERIODS ENDED MARCH 31, 2010 AND 2009**

inclusion on our watch-list. All investments in an unrealized loss position at March 31, 2010 were included in our portfolio monitoring process for determining whether declines in value were other than temporary.

The extent and duration of a decline in fair value have become less indicative of when the market may believe there has been credit deterioration with respect to an issue or issuer. While we continue to use declines in fair value and the length of time a security is in an unrealized loss position as indicators of potential credit deterioration, our determination of whether a security's decline in fair value is other than temporary has placed greater emphasis on our analysis of the underlying credit and collateral.

The following table summarizes fixed income and equity securities in a gross unrealized loss position according to significance, aging and investment grade classification.

(\$ in millions, except number of issues)	March 31, 2010				December 31, 2009			
	Fixed income		Equity	Total	Fixed income		Equity	Total
	Investment grade	Below investment grade			Investment grade	Below investment grade
