- Pre-commencement communications pursuant to Rule 13e-4(c) under the Exchange Act (17 CFR 240.13e-4(c))

Item 8.01. Other Events.

On May 8, 2012, Duke Energy Corporation and Progress Energy, Inc. entered into a supplemental merger settlement agreement (the Supplemental Agreement) with the North Carolina Public Staff which was filed with the North Carolina Utilities Commission (the NCUC) in connection with the companies' proposed merger. The Supplemental Agreement addresses state regulatory issues raised by the market power mitigation proposal filed by the companies with the Federal Energy Regulatory Commission (the FERC) on March 26, 2012 and clarifies provisions in a previous settlement agreement filed September 2, 2011.

Pursuant to the Supplemental Agreement, the companies will continue to guarantee \$650 million in system savings for Carolinas retail customers which will be achieved through fuel blending and purchases and jointly operating the Carolinas generation fleets. However, the Supplemental Agreement clarifies a number of issues related to the \$650 million guarantee and provides up to 18 months beyond the original five-year timeframe in which the savings can be achieved if coal consumption at certain plants is less than originally forecasted due to declines in natural gas prices. The companies also agree not to seek recovery from North Carolina retail customers for the seven transmission projects detailed in the mitigation proposal, estimated to cost approximately \$110 million, for five years following the closing of the merger. After five years, the companies may seek to recover the costs of the transmission projects but must show that the projects are needed to provide adequate and reliable retail service regardless of the merger. During the two to three year period that the transmission projects are being constructed and the interim mitigation power sales are in place, the companies will reduce retail rates by approximately \$70 million which will be apportioned between Duke Energy Carolinas and Progress Energy Carolinas retail customers. Duke Energy Carolinas and Progress Energy Carolinas will not seek recovery from North Carolina retail customers for any revenue shortfalls or fuel-related costs associated with the three-year interim mitigation power sales agreements, which are estimated at approximately \$40-50 million over the term of the interim mitigation, nor will they seek recovery from North Carolina retail customers for the allocable portion of merger severance costs, estimated to be approximately \$220 to \$230 million total. The Supplemental Agreement is subject to the approval of the NCUC, and is also contingent upon the approval by the FERC, without material condition or change, of the market power mitigation proposal as well as the joint dispatch agreement and joint open access transmission tariff that were previously filed by the companies with the FERC.

An overview providing additional detail on the Supplemental Agreement is attached to this Form 8-K as Exhibit 99.1.

Item 9.01. Financial Statements and Exhibits.

(d) Exhibits.

99.1 Summary of Settlement Agreement with N.C. Utilities Commission Public Staff

SIGNATURE

Pursuant to the requirements of the Securities and Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the undersigned hereunto duly authorized.
