You may obtain these documents for free by visiting EDGAR on the SEC website at www.sec.gov. Alternatively, the issuer, any underwriter or any dealer participating in

the offering will arrange to send you the prospectus and the prospectus supplement if you request them by calling BofA Merrill Lynch at 1-866-500-5408.

DILUTION

If you invest in our common stock in this offering, your ownership interest will be diluted immediately to the extent of the difference between the public offering price per share of our common stock and the pro forma net tangible book value per share of our common stock after this offering.

Our historical net tangible book value as of March 31, 2013 was \$14.0 million, or \$0.75 per share of our common stock. Historical net tangible book value per share represents the amount of our total tangible assets less total liabilities, divided by the number of shares of our common stock outstanding.

After giving effect to our issuance and sale of 3,750,000 shares of our common stock in this offering at the public offering price of \$19.00 per share, and after deducting the underwriting discounts and estimated offering expenses payable by us, our pro forma net tangible book value as of March 31, 2013 would have been \$80.4 million, or \$3.59 per share. This represents an immediate increase in pro forma net tangible book value per share of \$2.84 to existing stockholders and immediate dilution of \$15.41 in pro forma net tangible book value per share to new investors purchasing common stock in this offering. Dilution per share to new investors is determined by subtracting pro forma net tangible book value per share after this offering from the public offering price per share paid by new investors. The following table illustrates this dilution on a per share basis:

Public offering price per share		\$	19.00
Historical net tangible book value per share as of March 31, 2013	\$	0.75	
Increase in net tangible book value per share attributable to new investors	\$	2.84	
Pro forma net tangible book value per share after this offering	\$	3.59	
Dilution per share to new investors	\$	15.41	

If the underwriters exercise their option to purchase additional shares or if any additional shares are issued in connection with outstanding options or warrants, you will experience further dilution. In addition, we have a significant number of stock options and warrants outstanding. As of March 31, 2013, we had outstanding stock options to purchase 2,235,683 shares of common stock at prices ranging from \$1.38 to \$50.80. As of the same date thereof, we also had 1,732,817 issued warrants, consisting of 877,137 Series A Warrants to purchase 877,137 shares of common stock at an exercise price of \$0.01 per share and 855,680 Series B Warrants to purchase 855,680 shares of common stock at an exercise of \$2.49 per share, for a total of 1,732,817 shares of common stock issuable upon exercise of all such Series A and Series B Warrants. To the extent that the outstanding stock options or warrants have been or may be exercised or other shares issued, investors purchasing our common stock in this offering will experience further dilution. In the event we need to raise additional capital in the future and we issue additional equity securities, our then existing stockholders will also experience dilution.
