ELECTRONIC CLEARING HOUSE, INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

NOTE 1 - Basis of Presentation:

The accompanying consolidated financial statements as of and for the three-month period ended December 31, 2006, are unaudited and reflect all adjustments (consisting only of normal recurring adjustments) which are, in the opinion of management, necessary for a fair presentation of the financial position and the results of operations for the interim periods. The consolidated financial statements herein should be read in conjunction with the consolidated financial statements and notes thereto, together with management's discussion and analysis of financial condition and results of operations, contained in the Company's Annual Report on Form 10-K for the fiscal year ended September 30, 2006. The results of operations for the three months ended December 31, 2006 are not necessarily indicative of the likely results for the entire fiscal year ending September 30, 2007.

Reclassifications:

Certain amounts in the December 31, 2006 and 2005 consolidated financial statements have been reclassified to conform to the current year presentation. The Company previously included the amount of the Trust Collection bank account in Restricted Cash. That cash account has been reclassified to Settlement Deposits and the Statement of Cash Flows was adjusted accordingly for the affected periods. Also, the Company reclassified a small portion of Settlements Receivable relating to an accrual resulting in a corresponding reduction in Settlement Payable. The Statement of Cash Flows was adjusted accordingly for the affected periods. The Company also broke out Accrued Compensation Expenses from Accrued Expenses, and the Statement of Cash Flows has been adjusted accordingly. Lastly, the Company reclassified amounts related to the Excess tax benefit from stock-based compensation and has reflected the change in the Statement of Cash Flows for the affected periods.

New Accounting Pronouncements:

In 2006, the FASB issued SFAS No. 157, "Fair Value Measurement" (SFAS No. 157). SFAS No. 157 provides guidance for using fair value to measure assets and liabilities. The standard expands required disclosures about the extent to which companies measure assets and liabilities at fair value, the information used to measure fair value, and the effect of fair value measurements on earnings. SFAS No. 157 applies whenever other standards require (or permit) assets or liabilities to be measured at fair value. SFAS No. 157 does not expand the use of fair value in any new circumstances. SFAS No. 157 is effective for financial statements issued for fiscal years beginning after November 15, 2007, and interim periods within those fiscal years. Management of the Company does not expect the impact to be material to its financial condition or results of operations.

In 2006, the FASB issued Interpretation No. 48, "Accounting for Uncertainty in Income Taxes - an interpretation of FASB Statement 109" (FIN 48). This interpretation clarifies the accounting for uncertain taxes recognized in a company's financial statements in accordance with SFAS No. 109, "Accounting for Income Taxes." The interpretation requires us to analyze the amount at which each tax position meets a "more likely than not" standard for sustainability upon examination by taxing authorities. Only tax benefit amounts meeting or exceeding this standard will be reflected in tax provision expense and deferred tax asset balances. The interpretation also requires that any differences between the amounts of tax benefits reported on tax returns and tax benefits reported in the financial statements be recorded in a liability for unrecognized tax benefits. The liability for unrecognized tax benefits is reported separately from deferred tax assets and liabilities and classified as current or noncurrent based upon the expected period of payment. Additional disclosure in the footnotes to the audited financial statements will be required concerning the income tax liability for unrecognized tax benefits, any interest and penalties related to taxes that are included in the financial statements, and open statutes of limitations for examination by major tax jurisdictions. FIN 48 is effective for annual periods beginning after December 15, 2006 and any cumulative effect of adopting FIN 48 will be recorded as a change

in accounting principle in the financial statements for the three months ended March 31, 2007. Management is currently evaluating the potential impact of FIN 48 on the Company's consolidated financial statements.

6

NOTE 2 - Stock-Based Compensation:

Effective October 1, 2005, the Company began recording compensation expense associated with stock options in accordance with SFAS No.123(R), Share-Based Payment. Prior to October 1, 2005, the Company accounted for stock-based compensation related to stock options under the recognition and measurement principles of Accounting Principles Board Opinion No. 25; therefore, the Company measured compensation expense for its stock option plan using the intrinsic value method, that is, as the excess, if any, of the fair market value of the Company's stock at the grant date over the amount required to be paid to acquire the stock, and provided the disclosures required by SFAS Nos. 123 and 148. The Company has adopted the modified prospective transition method provided under SFAS No. 123(R), and as a result, has not retroactively adjusted results from prior periods. Under this transition method, compensation expense associated with stock options recognized in fiscal year 2006 includes expense related to the remaining unvested portion of all stock option awards granted prior to October 1, 2005, based on the grant date fair value estimated in accordance with the original provisions of SFAS No. 123. The Company has not granted any stock options since the adoption of SFAS No. 123(R).

The Company entered into an Agreement and Plan of Merger (the Merger Agreement) with Intuit, Inc. on December 14, 2006. The Merger Agreement prohibits the Company from issuing any equity awards from the date of the Merger Agreement through the closing date of the transaction unless consented to by Intuit.

Stock Options:

At December 31, 2006, the Company had one stock option plan. The plan is administered by the Board of Directors or its designees and provides that options granted under the plan will be exercisable at such times and under such conditions as may be determined by the Board of Directors at the time of grant of such options; however, options may not be granted for terms in excess of ten years. Compensation expense related to stock options granted is recognized ratably over the service vesting period for the entire option award. The total number of stock option awards expected to vest is adjusted by estimated forfeiture rates. The terms of the plan provide for the granting of options at an exercise price not less than 100% of the fair market value of the stock at the date of grant, as determined by the closing market value stock price on the grant date. During December 2006, the Company amended certain stock option grant agreements with some of its employees who were previously granted in-the-money options in error. The primary purpose of the amendments was to increase the option exercise price equal to the fair market value on the measurement dates. To compensate those employees for these amendments, the Company has accrued approximately \$87,000 of compensation expense during the quarter ended December 31, 2006. All options outstanding at December 31, 2006 were granted at 100% of the fair market value of the stock at the date of grant and have five-year vesting terms.

A summary of the status of the Company's stock option plan as of December 31, 2006 and of changes in options outstanding under the plan during the three months ended December 31, 2006 is as follows:

	Number of Shares	Weighted- Average Exercise Price per Share	Weighted- Average Remaining Contractual Term (in years)	Aggregate Intrinsic Value
Options outstanding at September 30, 2006	972,275	\$ 5.61		
Options granted	-0-			

Edgar Filing: ELECTRONIC CLEARING HOUSE INC - Form 10-Q

Options exercised	(35,000)	\$	4.22		
Options forfeited or expired	(-0-)				
Options outstanding at December 31, 2006	937,275	\$	5.66	6.2	\$ 11,943,000
Options vested and exercisable at December 31, 2006	597,075	\$	5.23	5.6	\$ 7,863,000

7

NOTE 2: (Continued)

Non-vested share activity under our Stock Option Plan for the three-month period ended December 31, 2006 is summarized as follows:

	Non-vested Number Of Shares	Weighted Average Grant-Date Fair Value
Non-vested balance at October 1, 2006	490,600	\$ 4.47
Vested	(150,400)	\$ 4.11
Non-vested balance at December 31, 2006	340,200	\$ 4.63

As of December 31, 2006, there was \$1,576,000 of unamortized compensation cost related to non-vested stock option awards, which is expected to be recognized over a remaining weighted-average vesting period of 2.3 years.

Cash received from stock option exercises for the three months ended December 31, 2006 and 2005 was \$149,000 and \$291,000, respectively. The income tax benefits from stock option exercises totaled \$18,000 and \$41,000 for the three months ended December 31, 2006 and 2005, respectively.

Restricted Stock:

Restricted Stock is granted under the 2003 Option Plan. Compensation expense related to restricted stock issued is recognized ratably over the service vesting period. Restricted stock grants are normally vested over a five-year period.

In accordance with SFAS No. 123(R), the fair value of restricted stock awards is estimated based on the closing market value stock price on the date of share issuance. The total number of restricted stock awards expected to vest is adjusted by estimated forfeiture rates. As of December 31, 2006, there was \$1,181,000 of unamortized compensation cost related to non-vested restricted stock awards, which is expected to be recognized over a remaining weighted-average vesting period of 4.12 years.

A summary of the status of the Company's restricted stock awards as of December 31, 2006, and of changes in restricted stock outstanding under the plan during the three months ended December 31, 2006 is as follows:

	Number Of Shares	Weighted-Average Grant Date Fair Value Per Share
Restricted stock awards outstanding at September 30, 2006	133,088	\$ 11.16
Shares issued	-0-	
Shares forfeited	(1,600)	\$ 10.25
Restricted stock awards outstanding at December 31, 2006	131,488	\$ 11.17

In May 2006, the Company entered into an agreement with certain of its employees and executives to potentially grant 80,000 shares of restricted stock and 10,000 shares payable in cash. The restricted stock will only be granted and cash only be paid if the Company achieves predetermined cumulative Earnings Before Income Taxes and Depreciation and Amortization (“EBITDA”) for the fiscal years ending 2006, 2007 and 2008 or upon a change in control. Cumulative EBITDA results must be reached or a reduced number of shares will be granted, if any. As required by SFAS 123(R), 80,000 shares of this award have been treated as an equity award, with the fair value measured at the grant date and 10,000 shares have been treated as a liability award, with the fair value measured at the grant date and remeasured at the end of each reporting period (marked to market). In conjunction with this award, the Company recognized \$99,000 of compensation expense for the quarter ended December 31, 2006.

NOTE 3 - Earnings Per Share:

The Company calculates earnings per share as required by Statement of Financial Accounting Standard No. 128, "Earnings per Share."

	Three Months Ended December 31,	
	2006	2005
Numerator:		
Net income	\$ 339,000	\$ 592,000
Denominator:		
Weighted average shares outstanding for basic earnings per share	6,702,680	6,627,275
Effect of dilutive common stock equivalents	501,000	333,098
Adjusted weighted average shares outstanding for diluted earnings per share	7,203,680	6,960,373
Basic net earnings per share	\$ 0.05	\$ 0.09
Diluted net earnings per share	\$ 0.05	\$ 0.09

For the three months ended December 31, 2006 and 2005, approximately 39,500 and 80,088 option shares, respectively, attributable to the exercise of outstanding options and restricted stock grants, were excluded from the calculation of diluted EPS because the effect was antidilutive.

NOTE 4 - Supplemental Cash Flow Information:

	Three Months Ended December 31,	
	2006	2005
Cash paid for:		
Interest	\$ 17,000	\$ 25,000
Income Taxes	\$ 89,000	-0-

Significant non-cash transactions for the three months ended December 31, 2006 were as follows:

None

Significant non-cash transaction for the three months ended December 31, 2005 was as follows:

Restricted stock valued at \$397,000 was issued to certain executives and employees.

NOTE 5 - Segment Information:

The Company primarily operates in two business segments: Bankcard and transaction processing and check-related products, all of which are located in the United States.

The Company's reportable operating segments have been determined in accordance with the Company's internal management structure, which is organized based on the Company's product lines. The Company evaluates performance based upon two primary factors; one is the segment's operating income and the other is based on the segment's contribution to the Company's future strategic growth.

NOTE 5: (Continued)

**Three Months Ended
December 31,
2006 2005**

Revenues:

Bankcard and transaction processing	\$ 14,899,000	\$ 12,580,000
Check-related products	4,480,000	4,346,000
	\$ 19,379,000	\$ 16,926,000

Income from operations:

Bankcard and transaction processing	\$ 2,274,000	\$ 1,982,000

Other - Corporate Expenses	(2,405,000)	(2,062,000)
	\$ 560,000	\$ 1,061,000

**December 31, September 30,
2006 2006**

Total assets:

Bankcard and transaction processing	\$ 13,569,000	\$ 12,707,000
Check-related products	19,907,000	31,412,000
Other	9,996,000	10,888,000
	\$ 43,472,000	\$ 55,007,000

NOTE 6 - Commitments, Contingent Liabilities, and Guarantees:

The Company currently relies on cooperative relationships with, and sponsorship by, one bank in order to process its Visa, MasterCard and other bankcard transactions. The agreement between the bank and the Company requires the Company to assume and compensate the bank for bearing the risk of "chargeback" losses. Under the rules of Visa and MasterCard, when a merchant processor acquires card transactions, it has certain contingent liabilities for the transactions processed. This contingent liability arises in the event of a billing dispute between the merchant and a cardholder that is ultimately resolved in the cardholder's favor. In such a case, the disputed transaction is charged back to the merchant and the disputed amount is credited or otherwise refunded to the cardholder. If the Company is unable to collect this amount from the merchant's account, and if the merchant refuses or is unable to reimburse the Company for the chargeback due to merchant fraud, insolvency or other reasons, the Company will bear the loss for the amount of the refund paid to the cardholders. The Company utilizes a number of systems and procedures to manage merchant risk. In addition, the Company requires cash deposits by certain merchants, which are held by the Company's sponsoring bank to minimize the risk that chargebacks are not collectible from merchants. A cardholder, through its issuing bank, generally has until the later of up to four months after the date a transaction is processed or the delivery of the product or service to present a chargeback to the Company's sponsoring bank as the merchant processor. Therefore, management believes that the maximum potential exposure for the chargebacks would not exceed the total amount of transactions processed through Visa and MasterCard for the last four months and other unresolved chargebacks in the process of resolution. For the last four months through December 31, 2006, this potential exposure totaled approximately \$621 million. At December 31, 2006, the Company, through its sponsoring bank, had approximately \$154,000 of unresolved chargebacks that were in the process of resolution. At December 31, 2006, the

Company, through its sponsoring bank, had access to \$18.5 million in merchant deposits to cover any potential chargeback losses.

For the three-month periods ended December 31, 2006 and 2005, the Company processed approximately \$467 million and \$388 million, respectively, of Visa and MasterCard transactions, which resulted in \$2.4 million in gross chargeback activities for the three months ended December 31, 2006 and \$2.4 million for the three months ended December 31, 2005. Substantially all of these chargebacks were recovered from the merchants.

NOTE 6: (Continued)

The Company's contingent obligation with respect to chargebacks constitutes a guarantee as defined in Financial Accounting Interpretation No. 45, "Guarantor's Accounting and Disclosure Requirements for Guarantee, Including Indirect Guarantees of Others" ("FIN 45"). FIN 45 requires that guarantees issued or modified subsequent to December 31, 2002 be initially recorded as liabilities in the Statement of Financial Position at fair value. Since the Company's agreement with its sponsoring bank, which establishes the guarantee obligation, was entered into prior to December 31, 2002 and has not been modified since that date, the measurement provisions of FIN 45 are not applicable to this guarantee arrangement.

In accordance with SFAS No. 5, "Accounting for Contingencies," the Company records a reserve for chargeback loss allowance based on its processing volume and historical trends and data. As of December 31, 2006 and 2005, the allowance for chargeback losses, which is classified as a component of the allowance for uncollectible accounts receivable, was \$329,000 and \$162,000, respectively. The expense associated with the valuation allowance is included in processing and transaction expense in the accompanying consolidated statements of income. For the three-month periods ended December 31, 2006 and 2005, the Company expensed \$26,000 and \$134,000, respectively.

In its check guarantee business, the Company charges the merchant a percentage of the face amount of the check and guarantees payment of the check to the merchant in the event the check is not honored by the checkwriter's bank. Merchants typically present customer checks for processing on a regular basis and, therefore, dishonored checks are generally identified within a few days of the date the checks are guaranteed by the Company. Accordingly, management believes that its best estimate of the Company's maximum potential exposure for dishonored checks at any given balance sheet date would not exceed the total amount of checks guaranteed in the last 10 days prior to the balance sheet date. As of December 31, 2006, the Company estimates that its maximum potential dishonored check exposure was approximately \$2,523,000.

For the quarters ended December 31, 2006 and 2005, the Company guaranteed approximately \$21,255,000 and \$12,088,000 of merchant checks, respectively, which resulted in \$148,000 and \$95,000 of dishonored checks presented to the Company for payments, respectively. The Company has the right to collect the full amount of the check from the checkwriter. The Company establishes a reserve for this activity based on historical and projected loss experience. For the quarter ended December 31, 2006 and 2005, the check guarantee loss was \$92,000 and \$76,000, respectively. The check guarantee loss is included in processing and transaction expense in the accompanying consolidated statements of income.

NOTE 7 - Litigation:

The Company is involved in various legal cases arising in the ordinary course of business. Based upon current information, management, after consultation with legal counsel, believes the ultimate disposition thereof will have no material affect, individually or in the aggregate, on the Company's business, financial condition or results of operations. It is possible that in the future, the Company could become a party to such proceedings.

NOTE 8 - Effective Tax Rate:

The effective tax rate for the three months ended December 31, 2006 was 49.6% as compared to 45.3% for the corresponding prior year period. The increase in the tax rate was primarily due to stock compensation expense which was a non-deductible expense as the Company does not recognize a tax benefit in incentive stock options until a disqualifying disposition occurs.

NOTE 9 - Merger Transaction:

On December 14, 2006, the Company entered into an Agreement and Plan of Merger (the Merger Agreement) to be acquired by Intuit, Inc. (Intuit) in a merger transaction in which *ECHO* will become a wholly owned subsidiary of Intuit (the merger). Pursuant to the terms of the Merger Agreement and subject to the conditions thereof, Intuit will acquire all of the outstanding shares of the Company's common stock and all outstanding equity awards (which will vest in connection with the transactions) for a cash amount of \$18.75 per share (less the applicable exercise price in the case of *ECHO* options), for a total purchase price of approximately \$142 million on a fully diluted basis. The transaction is subject to regulatory review, the Company's shareholder approval and other customary closing conditions. If all of the above reviews and approvals are satisfactorily completed and the other conditions to closing are satisfied or waived, the merger is expected to be completed during March 2007.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

FORWARD-LOOKING STATEMENTS

The discussion of the financial condition and results of operations of the Company should be read in conjunction with the consolidated financial statements and notes thereto included elsewhere herein. This discussion contains forward-looking statements, including statements regarding the Company's strategy, financial performance and revenue sources, which involve risks and uncertainties. The Company's actual results may differ materially from those anticipated in these forward-looking statements as a result of certain factors, including, but not limited to, those set forth elsewhere herein, and in the Company's Annual Report on Form 10-K for the fiscal year ended September 30, 2006.

OVERVIEW

Electronic Clearing House, Inc. is an electronic payment processor that provides for the payment processing needs of merchants, banks and collection agencies. We derive the majority of our revenue from two main business segments: 1) bankcard and transaction processing services ("bankcard services"), whereby we provide solutions to merchants and banks to allow them to accept credit and debit card payments from consumers; and 2) check-related products ("check services"), whereby we provide various services to merchants and banks to allow them to accept and process check payments from consumers. The principal services we offer within these two segments include, with respect to our bankcard services, debit and credit card processing, and with respect to our check services, check guarantee (where, if we approve a check transaction and a check is subsequently dishonored by the check writer's bank, the merchant is reimbursed by us), check verification (where, prior to approving a check, we search our negative and positive check writer database to determine whether the check writer has a positive record or delinquent check-related debts), electronic check conversion (the conversion of a paper check at the point of sale to a direct bank debit which is processed for settlement through the Federal Reserve System's Automated Clearing House ("ACH") network), check re-presentation (where we attempt to clear a check on multiple occasions via the ACH network prior to returning the check to the merchant so as to increase the number of cleared check transactions), and check collection (where we provide national scale collection services for a merchant or bank). We operate our services under the following brands:

- MerchantAmerica, our retail provider of all credit card, debit card and check payment processing services to both the merchant and bank markets;
- National Check Network ("NCN"), our proprietary database of negative and positive check writer accounts (i.e., accounts that show delinquent history in the form of non-sufficient funds and other negative transactions), for check verification, check conversion capture services, and for membership to collection agencies;
 - *XPRESSCHEX*, Inc. for check collection services; and
 - *ECHO*, for wholesale credit card and check processing services.

We discuss our services in greater detail below. Overall, our ability to program and oversee the management of a merchant's point-of-sale (POS) system, provide credit card and debit card processing, provide multiple services for the processing of checks, provide both electronic and traditional collection services, and fully integrate all of these services into a single Internet-based reporting capability allows us to provide for the majority of the payment processing needs of our customers.

We were incorporated in Nevada in December 1981. Our executive offices are located at 730 Paseo Camarillo, Camarillo, California 93010, and our telephone number is (805) 419-8700. Our common stock is traded on the NASDAQ Capital Market under the ticker symbol "ECHO." Information on our website, www.echo-inc.com, does not constitute part of this quarterly report.

Bankcard and transaction processing services provide for the majority of our revenues. We typically receive a percentage-based fee on the dollar amount processed and a transaction fee on the number of transactions processed. For the quarter ended December 31, 2006, the bankcard and transaction processing business segment accounted for approximately 76.9% of the Company's total revenue.

We purchased a fully integrated, multi-modular bankcard processing system which, once fully implemented, should provide us with greater flexibility to price our credit card processing services and allow us to offer our services to other third parties. The clearing portion of this system began live customer deployment in the last quarter of 2006 and continued in the first quarter of 2007.

ECHO has invested significant resources and management focus in its check services business. Check services revenue increased approximately 3.1% from \$4,346,000 in the first fiscal quarter of 2006 to \$4,480,000 for the current fiscal quarter. In October 2006, the Unlawful Internet Gaming Enforcement Act was passed and signed into law. Several of our Internet Wallet merchants had a significant drop in processing activities during the quarter ended December 31, 2006. During February 2007, the Company decided to cease processing for all Internet Wallet customers.

Approximately 70% of *ECHO*'s credit card processing merchants operate their businesses in non-face-to-face environments such as mail order, phone order and the Internet. These relationships historically have higher margins than those seen with normal retail merchants because of the higher risk of fraud.

ECHO has established an integrated processing relationship with the largest check cashing provider to the gaming and casino market. Our services are primarily centered on providing check verification (using our NCN data base), funds movement, and several sophisticated risk management services that are used to assist the provider in confidently accepting checks.

ECHO is both a Third-Party Processor and an Acquirer Processor for the Visa POS Check Program. Visa officially released its POS Check Service as of December 2002 and several national banks have entered the program since its inception to both sell the service to their merchants and to connect all of their checking accounts to the Visa network. Visa's connectivity to checking account balances has increased significantly over the past year, moving nationally to 30% and higher in many metropolitan areas. (See the discussion of the Visa POS Check Service Program below.)

In addition to being a Third-Party Processor, we are currently certified as an Acquirer Processor with Visa, a role that accepts transactions from the merchant's point-of-sale terminal/systems and reformats them for submission to the Visa network. Most banks presently in the Visa Program are large national or regional banks and already had terminal management service providers that could act as Acquirer Processor for the Visa Program. In the future, as smaller banks make the decision to enter the Visa Program, it is expected that many will have no prior relationship with a terminal management provider and therefore, may potentially choose us as their Acquirer Processor.

We derive transaction revenue in our role as a Third-Party Processor and/or Acquirer Processor by negotiating a transaction fee with Visa and/or the bank that chose us as its Third-Party Processor and/or Acquirer Processor. This Third-Party Processor transaction fee averages \$0.07 to \$0.09 per transaction and the Acquirer Processor transaction fee is generally \$0.02 to \$0.04. The party that sells the service to the merchant (usually the bank) enjoys the largest mark-up on the product, offering the service in the range of \$0.20 to \$0.50 per check, with external cost in the \$0.12 to \$0.15 range, depending on what the bank negotiates with Visa and any third-party provider.

We entered into a sponsorship agreement with our primary credit card processing bank, First Regional Bank, to enable us to sell the Visa Program directly to merchants with an obligation to pay a \$0.01 transaction fee per check to the bank. This allows the bank to realize added revenue, allows us to realize higher revenue in a marked-up pricing model, and a portion of the mark-up to be used to compensate and motivate resellers of our products and services to offer the Visa Program to merchants in the marketplace. The balance of the mark-up after paying the bank and the sales organization would be additional revenue to us. This will also enable us to use our direct sales channels to provide the Visa Program to *ECHO*'s current and potential merchant base.

On December 14, 2006, we entered into an Agreement and Plan of Merger (the Merger Agreement) to be acquired by Intuit, Inc. (Intuit) in a merger transaction in which we will become a wholly owned subsidiary of Intuit (the Intuit merger). Pursuant to the terms of the Merger Agreement and subject to the conditions thereof, Intuit will acquire all of the outstanding shares of our common stock and all outstanding equity awards (which will vest in connection with the transactions) for a cash amount of \$18.75 per share, for a total purchase price of approximately \$142 million on a fully diluted basis. The transaction is subject to regulatory review, our shareholder approval and other customary closing

conditions. If all of the above reviews and approvals are satisfactorily completed and the other conditions to closing are satisfied or waived, the merger is expected to be completed during March 2007.

STRATEGY

Overview

ECHO's service strategy is to provide merchants, banks, technology partners and collection agencies with electronic payment services that combine credit card, debit card and electronic check and collection services with quality customer support. *ECHO's* services enable merchants to maximize revenue by offering a wide variety of payment options, minimize costs by dealing with one source and improve their bad debt collection rates through use of *ECHO's* integrated collection and risk management services.

Our sales strategy is four-fold: to target technology partners providing point-of-sale systems who serve various industries in the merchant marketplace; to continue to pursue community banks with the combined set of services we currently offer; to focus our direct sales team on specific associations and merchants in industries where both checks and credit cards are common forms of payment; and to continue to support and promote the Visa POS Check Program. We intend to capitalize on our advantage of being a full credit card and check processor by combining our products and using our lower overall processing costs to allow the technology partner, community bank or association to enjoy a financial benefit from their customers' processing activity.

Electronic Payment Services for Technology Partners Providing POS Systems

We believe there are significant opportunities in working closely with those firms that specialize in certain industries and provide a point-of-sale (POS) capability to merchants of some nature. By aligning our processing with these parties, we believe we can leverage our sales activity and have longer term relationships with merchants than are historically the case for most processors. We also believe our full processing capability allows us to include the POS system provider with some economic benefit from the processing volume of the users of its system.

Along similar lines, we believe there are quality independent sales organizations, many of which are focused on select markets, where we can establish a viable and mutually profitable relationship wherein they sell our processing services.

Promote Merchant Payment Processing for Regional and Community Banks

ECHO pursues small regional and community banks for credit card and check payment programs that are characterized by having an asset base in the \$500 million range or less, and/or equity capital in the \$10 to \$50 million range. *ECHO* has developed a service that allows smaller banks to offer credit card and check processing services on a private-label basis using our back-end infrastructure with little or no technical involvement by the bank. Much of the reporting to the merchant utilizes the Internet as a delivery channel, an environment in which we have significant experience and knowledge. Due to the high costs and the perceived high risk, most small banks are either unable or unwilling to compete with national banks in providing credit card and real time check processing services and Internet-based reporting tools to their merchants. We have designed the program to be adopted by a bank at little or no cost while it allows the bank to generate revenue and earnings in competition to those earned by much larger banks that have had to make major investments in the technology.

This merchant payment processing service, which is marketed under the MerchantAmerica name, incorporates all of *ECHO's* web-based features and functionalities and our full set of services and payment options. We believe that our fully integrated payment and reporting system allows smaller banks to enjoy competitive equality with much bigger banks without making significant investments in technology. We, in turn, benefit from the increased processing and transaction revenue. Additional benefits of the MerchantAmerica program to regional and community banks include the:

- Ability for banks to set processing fees for each merchant;
- Assurance that the bank controls the merchant relationship; and
- Reduction of fraud risk.

In addition to the benefits that the bank receives from the MerchantAmerica program, the bank's merchants also receive numerous benefits, including a retail merchant account for credit cards, debit cards and checks; an online shopping cart and check-out payment system; sales tracking and online transaction history; all returned checks being automatically referred to our collection agency; and dedicated customer service available 24 hours a day, seven days a week.

The program was launched in August 2002 and at the end of fiscal 2006 had 38 participating banks. *ECHO* estimates that there are approximately 8,000 community banks in the United States. Based on third-party research, we estimate that approximately 57% of these banks offer payment solutions for their merchants. We believe these banks will be very responsive to the MerchantAmerica value proposition when a comparison of features and costs is reviewed.

Promote to Associations and Guilds

There are over 8,000 associations and guilds in the United States and many of the 4.1 million merchants belong to one of these organizations. We believe our combination of services and our controlled cost structure will allow us to attract many of these organizations to actively refer their members to us for meeting their payment processing needs.

Promote Visa POS Check Service Program

Given *ECHO*'s role as a "first adopter" in the early stages of the Visa Program and our subsequent investment of significant resources and management focus with respect to the Visa Program, we expect to see increased growth in check services as the marketing efforts of participating banks in the Visa Program become more widely implemented.

While *ECHO* believes that the Visa Program has the potential to generate significant revenue for us in the future, the market potential of this service is still unproven and its success is largely dependent on the continuing marketing support of *ECHO*, Visa and Visa's member banks.

SALES AND MARKETING

ECHO offers its payment services through several sales channels.

· *Primary Sales Channels* - Direct sales personnel are dedicated to various industries and/or services. We employ approximately 20 people who serve in either field or office positions that are dedicated to sales.

· *Secondary Sales Channels* - All or a portion of our services are sold through banks who sign up with our MerchantAmerica Agent Bank program, through banks who are selling the Visa POS Check Program, through authorized resellers, technology partners, independent sales organizations (ISOs) and through one of our 236 NCN Collection Agency Members. These channels offer lower margins to us due to the added participation in the overall revenue such channels require. Currently, *ECHO* has 292 authorized resellers registered to sell *ECHO*'s check products.

Management believes that we are distinctive in the number of payment methods that we enable, the combination of transaction types that we manage directly, our ability to integrate additional services, and our ability to support each merchant through one vertically integrated source.

Our marketing strategy is to pursue direct sales opportunities where there is a significant amount of card and check acceptance; to build processing relationships with certain providers of POS software/hardware that serve select merchant markets; to maximize cross-selling opportunities within our existing base of retail merchants and financial institutions; to sell integrated suites of check, credit and debit card processing services through small banks; to enhance and market MerchantAmerica.com; and to pursue associations aggressively.

COMPETITION

Bankcard processing and check processing services are highly competitive industries and are characterized by consolidation, rapid technological change, rapid rates of product obsolescence and introductions of competitive products often at lower prices and/or with greater functionality than those currently on the market. Credit card and debit card processors have similar direct costs and therefore their products are becoming somewhat of a commodity product where a natural advantage accrues to the highest volume processors. To offset this fact, we have focused on marketing to niche markets where we can maintain the margins we deem necessary to operate profitably but no assurance can be given that this strategy will be successful in the future.

ECHO is among the top 50 credit card processors in the nation when evaluated by processing volume. *ECHO* is among a much smaller group when evaluated by processing capability. Of the top 50 firms, approximately 40 of them

are independent sales organizations or banks that may manage the front-end authorization service but they outsource the back-end clearing and settlement services from a full service processor. There are probably 10 or fewer firms capable of full credit card processing and these would include First Data Corporation, Total Systems, NPC (Bank of America), Global Payments, Heartland Payments and RBS (Lynx). We believe we hold the distinction of being the smallest public company who, with the installation of the Oasis Clearing module in 2006, will serve as a full service processor in credit cards. All of our competitors have greater financial and marketing resources than us. As a result, they may be better able to respond more quickly to new or emerging technologies and changes in customer requirements. Competitors also may enjoy per transaction cost advantages due to their high processing volumes that may make it difficult for *ECHO* to compete.

There are a number of competitors in the check services industry, the largest of which are TeleCheck (the leading provider of conversion and guarantee services and a subsidiary of First Data Corporation), SCAN/eFunds (the largest verification provider in the nation), Certegy (purchased by Fidelity) and Global Payments. While all four have major national accounts, we have been successful in winning the processing relationships for national accounts when competing for such business against these parties. *ECHO* believes that it can effectively compete due to its ownership of the NCN database, its integrated set of check and collection services and the technological advantage of having been certified as both a Third-Party Processor and Acquirer Processor with the Visa POS Check Program.

We believe that being the smallest processor also has some advantages. There are many merchants who are sizable to us that the larger processors do not consider to be major merchants. We are finding that these merchants appreciate getting preferential treatment from their processor. Also, our willingness to send top management into the field to meet regularly with our major merchants at their locations is a perceived distinction and we are using it as a merchant retention tool. While we understand that slightly lower costs can be generated by processing high volumes, we do not think the economic advantages that high volume affords are enough to eliminate *ECHO* as an acceptable and competitive processor in most cases. Despite these potential advantages, we believe that our success will depend largely on our ability to continuously exceed expectations in terms of performance, service, and price, on our ability to develop new products and services, and on how well and how quickly we enhance our current products and introduce them into the market.

RESULTS OF OPERATIONS

Three Months Ended December 31, 2006 and 2005

Financial highlights for the first quarter of fiscal 2007 as compared to the same period last year were as follows:

Total revenue increased 14.5% to \$19.4 million

Gross margins from processing and transaction revenue was 33.2% for the current quarter as compared to 34.2% for the prior year

Operating income decreased 47.2% from \$1,061,000 to \$560,000

Diluted earnings per share were \$0.05 as compared to \$0.09 per share

Bankcard and transaction processing revenue increased 18.4% to \$ 14.9 million

Bankcard processing volume increased 20.6% from \$387.5 million to \$467.3 million

Check-related revenue increased 3.1% to \$4.5 million

ACH transactions processed decreased 11.0% to 8.7 million transactions

Revenue. Total revenue increased 14.5% to \$19,379,000 for the three months ended December 31, 2006, from \$16,926,000 for the same period last year. The increase can be primarily attributed to the 18.4% growth in the bankcard processing revenue and 3.1% growth in the check services business segment as compared to the same period last year. This growth has occurred organically from our existing merchants and from our marketing initiatives. We have two merchants who generated approximately 16.6% of the total bankcard processing revenue during the current quarter. The increase in revenue was primarily the result of a 20.6% increase in bankcard processing volume as compared to the prior year quarter.

Cost of Sales. Bankcard processing expenses are directly related to the changes in processing revenue. A major component of the Company's bankcard processing expense, the interchange fees paid to the card issuing banks, is normally fixed as a percentage of each bankcard transaction dollar processed. Processing-related expenses, consisting primarily of data center processing costs, interchange fees, third-party processing fees, and communication expense, increased from \$11,142,000 in the first fiscal quarter of 2006 to \$12,950,000 in the current quarter, a 16.2% increase. The increase was primarily attributable to the 18.4% increase in bankcard processing revenue for the current quarter.

Gross margin was 33.2% for the current quarter as compared to 34.2% for the same period last year. The decrease in gross margin was primarily attributable to several high volume merchants that contributed slightly lower margin.

Expense. Other operating costs such as personnel costs, telephone and depreciation expenses increased, from \$1,341,000 in the first quarter of 2006 to \$1,571,000 for the current fiscal quarter, a 17.2% increase. This was attributable to the 14.5% increase in total revenue and new hires to support the product development group.

Research and development expenses decreased from \$479,000 for the quarter ended December 31, 2005 to \$467,000 in the current year quarter. Continued investment in research and development and IT initiatives is critical to our ability to maintain our competitive position and strengthen our infrastructure to support growth. Several of our major IT projects were completed in the current quarter. However, we anticipate making continued investments in our IT initiatives and expect research and development expenses to remain at current levels for the remainder of the 2007 fiscal year.

Selling, general and administrative expenses increased from \$2,903,000 in the first fiscal quarter of 2006 to \$3,831,000 for the current fiscal quarter, an increase of 32.0%. This increase was primarily attributable to 1) a \$587,000 increase in salaries and bonuses; 2) a \$426,000 increase in SOX 404 compliance and audit fees; and 3) a \$131,000 increase in stock compensation expense. This increase was partially offset by the decrease in legal expenses in the current quarter of \$193,000. Included in selling, general and administrative expenses was \$286,000 of legal and other professional service expenses related to the Intuit merger. As a percentage of total revenue, selling, general and administrative expenses increased from 17.2% in the prior year quarter to 19.8% in the current quarter.

Operating Income. Operating income for the quarter ended December 31, 2006 was \$560,000, as compared to operating income of \$1,061,000 in the same period last year, a 47.2% decrease. The decrease in operating income was primarily due to the 14.5% increase in revenue offset by the increase in processing and transaction expense and increase in selling, general and administrative expenses described above.

Interest Expense and Income. Net interest income was \$113,000 for the three months ended December 31, 2006 as compared to \$22,000 interest income for the prior year quarter. The increase was due to the increased cash and cash equivalents balances and increase in interest rates being earned.

Effective Tax Rate. The effective tax rate for the quarter ended December 31, 2006 was 49.6% as compared to 45.3% for the prior year quarter. The increase in the tax rate was primarily due to additional stock compensation expense which is a non-deductible expense as the Company does not recognize a tax benefit from incentive stock options until a disqualifying disposition occurs.

Segment Results

Bankcard and Transaction Processing. Bankcard processing and transaction revenue increased 18.4%, from \$12,580,000 in the fiscal quarter ended December 31, 2005 to \$14,899,000 for the current year quarter ended December 31, 2006. This revenue increase was mainly attributable to organic growth from our existing merchants and several new merchants with high processing volume. We have two bankcard merchants who together generated approximately 16.6% of the total bankcard processing revenue and a total of 21.3% of the bankcard processing volume during the current quarter. Bankcard revenue made up 76.9% of total revenue for the current quarter as compared to 74.3% for the same period last year.

Operating income from our bankcard and transaction processing segment was \$2,274,000 for the current period as compared to \$1,982,000 in the same period last year, a 14.7% increase. The increase in operating income was primarily attributable to the 18.4% revenue growth and offset by lower margin from the merchants with high processing volume.

Check Related Products. Check-related revenues increased from \$4,346,000 for the prior year quarter to \$4,480,000 for the current fiscal quarter, an increase of 3.10%. This increase was attributable to a 28.5% increase in collection revenue offset by a decrease of 9.1% in check verification revenue. In October 2006, the Unlawful Internet Gambling Enforcement Act was passed and signed into law. Several of our merchants had a significant drop in processing activities during the quarter ended December 31, 2006. As a result, our ACH processing revenue was flat as compared to the prior year quarter. During February 2007, the Company decided to cease processing for all Internet Wallet customers.

Check services revenue made up 23.1% of total revenues in the current quarter as compared to 25.7% in the prior year quarter. Check-related operating income was \$691,000 for the quarter ended December 31, 2006 as compared to \$1,141,000 in the same period last year.

LIQUIDITY AND CAPITAL RESOURCES

As of December 31, 2006 we had available cash and cash equivalents of \$11,895,000, restricted cash of \$1,629,000 in reserve with our primary processing bank and working capital of \$13,288,000.

Accounts receivable, net of allowance for doubtful accounts, increased from \$2,914,000 at September 30, 2006 to \$3,116,000 at December 31, 2006. Allowance for doubtful accounts reserved mainly for chargeback losses increased to \$443,000 at December 31, 2006 from \$392,000 at September 30, 2006. The higher allowance was primarily related to provision for doubtful accounts related to several bankcard merchants' chargeback receivables.

Net cash provided by operating activities for the three months ended December 31, 2006 was \$1,254,000, as compared to net cash provided by operating activities of \$981,000 for the three months ended December 31, 2005.

Cash amounts classified as settlement receivable/payable are amounts due to/from merchants and result from timing differences in our settlement process with those merchants. These timing differences account for the difference between the time that funds are received in our bank accounts and the time that settlement payments are made to merchants. Therefore, at any given time, settlement receivable/payable may vary and ultimately depends on the volume of transactions processed and the timing of the cut-off date. Settlement deposits are cash deposited in our bank accounts from the merchant settlement transactions.

In the three months ended December 31, 2006, we used \$126,000 mainly for the purchase of computer equipment and \$931,000 for the acquisition and capitalization of software costs, as compared to \$227,000 for the purchase of equipment and \$802,000 for the acquisition and capitalization of software costs for the same three-month period last year. During the three months ended December 31, 2006, we paid off \$72,000 of notes payable obligations. During the three months ended December 31, 2006, we had proceeds of \$148,000 from stock option exercises.

At December 31, 2006 we had the following cash commitments:

Payment Due By Period

Contractual Obligations	Total	Less than 1 year	2-3 years	4-5 years	After 5 years
Long-term debt including interest	\$ 668,000	\$ 295,000	\$ 363,000	\$ 10,000	\$ -0-
Capital lease obligations	62,000	37,000	25,000	-0-	-0-
Operating leases	924,000	555,000	369,000	-0-	-0-
Minimum vendor commitments	475,000	300,000	175,000	-0-	-0-
Total contractual cash obligations	\$ 2,129,000	\$ 1,187,000	\$ 932,000	\$ 10,000	\$ -0-

Our primary source of liquidity is expected to be cash flow generated from operations and cash and cash equivalents currently on hand. As of January 31, 2007, the \$3 million line of credit with Bank of the West expired. We have not renewed this credit line as a result of the pending Intuit merger. Management believes that our cash flow from operations together with cash on hand will be sufficient to meet our working capital and other commitments.

OFF-BALANCE SHEET ARRANGEMENTS

At December 31, 2006, we did not have any off-balance sheet arrangements.

18

RISK FACTORS

Our business, and accordingly, your investment in our common stock, is subject to a number of risks. These risks could affect our operating results and liquidity. You should consider the following risk factors, among others, before investing in our common stock:

Risks Related To Our Business

We rely on cooperative relationships with, and sponsorship by, banks, the absence of which may affect our operations.

We currently rely on cooperative relationships with, and sponsorship by, banks in order to process our Visa, MasterCard and other bankcard transactions. We also rely on several banks for access to the Automated Clearing House ("ACH") for submission of both credit card and check settlements. Our banking relationships are currently with smaller banks (with assets of less than \$500,000,000). Even though smaller banks tend to be more susceptible to mergers or acquisitions and are therefore less stable, these banks find the programs we offer more attractive and we believe we cannot obtain similar relationships with larger banks at this time. A bank could at any time curtail or place restrictions on our processing volume because of its internal business policies or due to other adverse circumstances. If a volume restriction is placed on us, it could materially adversely affect our business operations by restricting our ability to process credit card transactions and receive the related revenue. Our relationships with our customers and merchants would also be adversely affected by our inability to process these transactions.

We currently maintain one primary bankcard processing and sponsorship relationship with First Regional Bank in Agoura Hills, California. Our agreement with First Regional Bank continues through July 2010. We also maintain several banking relationships for ACH processing. While we believe our current bank relationships are sound, we cannot assure that these banks will not restrict our increasing processing volume or that we will always be able to maintain these relationships or establish new banking relationships. Even if new banking relationships are available, they may not be on terms acceptable to us. With respect to First Regional Bank, while we believe their ability to terminate our relationship is cost-prohibitive, they may determine that the cost of terminating their agreement is less than the cost of continuing to perform in accordance with its terms, and may therefore determine to terminate their agreement prior to its expiration. Ultimately, our failure to maintain these banking relationships and sponsorships may have a material adverse effect on our business and results of operations.

Merchant fraud with respect to bankcard and ACH transactions could cause us to incur significant losses.

We significantly rely on the processing revenue derived from bankcard and ACH transactions. If any merchants were to submit or process unauthorized or fraudulent bankcard or ACH transactions, depending on the dollar amount, *ECHO* could incur significant losses which could have a material adverse effect on our business and results of operations. *ECHO* assumes and compensates the sponsoring bank for bearing the risk of these types of transactions.

We have implemented systems and software for the electronic surveillance and monitoring of fraudulent bankcard and ACH use. As of December 31, 2006, we maintained a dedicated chargeback reserve of \$832,000 at our primary bank specifically earmarked for such activity. Additionally, through our sponsoring bank, as of December 31, 2006, we had access to approximately \$18.5 million in merchant deposits to cover any potential chargeback losses. Despite a long history of managing such risk, we cannot guarantee that these systems will prevent fraudulent transactions from being submitted and processed or that the funds set aside to address such activity will be adequate to cover all potential situations that might occur. We do not have insurance to protect us from these losses. There is no assurance that our chargeback reserve will be adequate to offset against any unauthorized or fraudulent processing losses that we may incur. Depending on the size of such losses, our results of operations could be immediately and materially adversely affected.

Excessive chargeback losses could significantly affect our results of operations and liquidity.

Our agreements with our sponsoring bank require us to assume and compensate the bank for bearing the risk of “chargeback” losses. Under the rules of Visa and MasterCard, when a merchant processor acquires card transactions, it has certain contingent liabilities for the transactions processed. This contingent liability arises in the event of a billing dispute between the merchant and a cardholder that is ultimately resolved in the cardholder’s favor. In such a case, the disputed transaction is charged back to the merchant and the disputed amount is credited or otherwise refunded to the cardholder. If we are unable to collect this amount from the merchant’s account, or if the merchant refuses or is unable to reimburse us for the chargeback due to merchant fraud, insolvency or other reasons, we will bear the loss for the amount of the refund paid to the cardholders.

A cardholder, through its issuing bank, generally has until the later of up to four months after the date a transaction is processed or the delivery of the product or service to present a chargeback to our sponsoring bank as the merchant processor. Therefore, management believes that the maximum potential exposure for the chargebacks would not exceed the total amount of transactions processed through Visa and MasterCard for the last four months and other unresolved chargebacks in the process of resolution. For the last four months through December 31, 2006, this potential exposure totaled approximately \$621 million. At December 31, 2006, we, through our sponsoring banks, had approximately \$154,000 of unresolved chargebacks that were in the process of resolution. At December 31, 2006, we, through our sponsoring banks, had access to \$18.5 million belonging to our merchants. This money has been deposited at the sponsoring bank by the merchants to cover any potential chargeback losses.

For the three-month periods ended December 31, 2006 and 2005, we processed approximately \$467 million and \$388 million, respectively, of Visa and MasterCard transactions, which resulted in \$2.4 million in gross chargeback activities for the three months ended December 31, 2006 and \$2.4 million for the three months ended December 31, 2005. Substantially all of these chargebacks were recovered from the merchants.

Nevertheless, if we are unable to recover these chargeback amounts from merchants, having to pay the aggregate of any such amounts would significantly affect our results of operations and liquidity.

Failure to participate in the Visa POS Check Service Program would cause us to significantly shift our operating and marketing strategy.

We have significantly increased our infrastructure, personnel and marketing strategy to focus on the potential growth of our check services through the Visa POS Check Service Program. We currently provide critical back-end infrastructure for the service, including our NCN database for verification and our access to the Federal Reserve System's Automated Clearing House for funds settlement and for checks written on bank accounts with banks not participating in the program.

Because we believe the market will continue to gain acceptance of the Visa POS Check Service Program, we have expended significant resources to market our check conversion services and verification services to our merchant base, to solidify our strategic relationships with the various financial institutions that have chosen us as their Acquirer Processor and Third-Party processor under the program, and to sell our other check products such as electronic check re-presentments and check guarantee to the Visa member banks. We have also increased our personnel to handle the increased volume of transactions arising directly from our participation in the program.

Our failure to adequately market our services through this relationship could materially affect our marketing strategy going forward. Additionally, if we fail to adequately grow our infrastructure to address increases in the volume of transactions, cease providing services as a Third-Party processor or Acquirer Processor or are otherwise removed or terminated from the Visa Program, this would require us to dramatically shift our current operating strategy.

Our inability to implement, and/or the inability of third-party software vendors to continue to support and provide maintenance services with respect to, the third-party vendors' products, could significantly affect our results of operations and financial condition.

We utilize various third-party software applications and depend on the providers of such software applications to provide support and maintenance services to us. In the event that a third-party software vendor fails to continue to support and maintain its software application, or fails to do so in a timely manner, this could significantly affect our results of operations and financial condition.

Our inability to ultimately implement, or a determination to cease the implementation of various of our software technology initiatives will significantly adversely affect our results of operations and financial condition.

We have spent significant time and monetary resources implementing several software technologies, which resulted in significant cost being capitalized by us as non-current software assets. The implementation of these technologies will provide us with substantial operational advantages that would allow us to attract and retain larger merchants, as well as the small and mid-market merchants that have been our target market. Management believes that the implementation of these software technologies, and the technologies themselves, continues to be in the best interests of, and the most viable alternative for, the Company. However, the inability to ultimately implement, or a determination to cease the implementation of these software technologies would cause these assets to become impaired, and the corresponding impairment would significantly adversely affect our results of operations and financial condition.

A significant amount of our bankcard processing revenue is dependent on approximately 100 merchant accounts, several of which are very large merchants. The loss of a substantial portion of these accounts would adversely affect our results of operations.

We depend on approximately 100 key merchant accounts for our organic growth and profitability. Two merchants accounted for approximately 16.6% of our bankcard processing revenue during the three months ended December 31, 2006. The loss of those accounts or the loss of merchants from this select group could adversely affect our results of operations.

The business activities of our merchants could affect our business and results of operations.

We provide direct and back-end bankcard and check processing services to merchants across many industries. Several of these merchants provide consumers access to “Internet Wallets,” which subsequently permit consumers to use funds in those “Internet Wallets” to, among other transactions, participate in gaming activities over the Internet. Our “Internet Wallet” merchants collectively comprised approximately 29% of our check revenue for the quarter ended December 31, 2006. To the extent any of these merchants conduct activities which are deemed illegal by future legislation (including regulations promulgated under the Unlawful Internet Gambling Enforcement Act) or otherwise become involved in activities that incur civil liability from third parties, legal authorities or those third parties could attempt to pursue claims against us for aiding the activities of those merchants. While we believe that the services we provide do not directly aid in the activities of our merchants, and while we have no intent to assist any such activities, other than to provide general processing services consistent with past practice, any claims by legal authorities or third parties would require us to expend financial and management resources to address and defend such claims, the aggregate effect of which could have an adverse impact on our business and results of operations. Additionally, actions by legal authorities or third parties could attempt to claim or could otherwise affect the reserves we hold pursuant to our agreements with these merchants (to protect against returns and other losses we may incur). The loss or decrease of any of these reserve accounts could cause us to become directly responsible for returns and other losses, which could negatively affect our results of operations and liquidity. Moreover, even if those legal authorities or third parties do not pursue claims against us, legislation could significantly affect our business operations and the business operations of those merchants. With respect to the affects of the Unlawful Internet Gambling Enforcement Act on our “Internet Wallet” merchants, and correspondingly, on our business and results of operations, please see our discussion in the “Business” section of our Annual Report on Form 10-K for the fiscal year ended September 30, 2006.

The business in which we compete is highly competitive and there is no assurance that our current products and services will stay competitive or that we will be able to introduce new products and services to compete successfully.

We are in the business of processing payment transactions and designing and implementing integrated systems for our customers so that they can better use our services. This business is highly competitive and is characterized by rapid technological change, rapid rates of product obsolescence, and rapid rates of new product introduction. Our market share is relatively small as compared to most of our competitors and most of these competitors have substantially more financial and marketing resources to run their businesses. While we believe our small size provides us the ability to move quickly in some areas, our competitors’ greater resources enable them to investigate and embrace new and emerging technologies, to quickly respond to changes in customers’ needs, and to devote more resources to product and services development and marketing. We may face increased competition in the future and there is no assurance that current or new competition will allow us to keep our customers. If we lose customers, our business operations may be materially adversely affected, which could cause us to cease our business or curtail our business to a point where we are no longer able to generate sufficient revenue to fund operations. There is no assurance that our current products and services will stay competitive with those of our competitors or that we will be able to introduce new products and services to compete successfully in the future.

If we are unable to process significantly increased volume activity, this could affect our operations and we could lose our competitive position.

We have built transaction processing systems for check verification, check conversion, ACH processing, and bankcard processing activities. While current estimates regarding increased volume are within the capabilities of each system, it is possible that a significant increase in volume in one of the markets would exceed a specific system’s capabilities. To minimize this risk, we have redesigned and upgraded our check related processing systems and have purchased a high end system to process bankcard activity. No assurance can be given that it would be able to handle a significant increase in volume or that the operational enhancements and improvements will be completed in time to avoid such a

situation. In the event we are unable to process increases in volume, this could significantly adversely affect our banking relationships, our merchant customers and our overall competitive position, and could potentially result in violations of service level agreements which would require us to pay penalty fees to the other parties to those agreements. Losses of such relationships, or the requirement to pay penalties, may severely impact our results of operations and financial condition.

We incur financial risk from our check guarantee service.

The check guarantee business is essentially a risk management business. Any limitation of a risk management system could result in financial obligations being incurred by *ECHO* relative to our check guarantee activity. While *ECHO* has provided check guarantee services for several years, there can be no assurance that our current risk management systems are adequate to assure against any financial loss relating to check guarantee. *ECHO* is enhancing its current risk management systems and it is being conservative with reference to the type of merchants to which it offers guarantee services in order to minimize this risk but no assurance can be given that such measures will be adequate. During the quarter ended December 31, 2006, we incurred \$92,000 in losses from uncollected guaranteed checks.

Security breaches could impact our continued operations.

We process confidential financial information and maintain several levels of security to protect this data. Security includes hand and card-based identification systems at our data center locations that restrict access to the specific facilities, various employee monitoring and access restriction policies, and various firewall and network management methodologies that restrict unauthorized access through the Internet. While these systems have worked effectively in the past, there can be no assurance that they will continue to operate without a security breach in the future. Depending upon the nature of the breach, the consequences of security breaches could be significant and dramatic to *ECHO*'s continued operations.

The industry in which we operate involves rapidly changing technology and our failure to improve our products and services or to offer new products and services could cause us to lose customers.

Our business industry involves rapidly changing technology. Recently, we have observed rapid changes in technology as evidenced by the Internet and Internet-related services and applications, new and better software, and faster computers and modems. As technology changes, *ECHO*'s customers desire and expect better products and services. Our success depends on our ability to improve our existing products and services and to develop and market new products and services. The costs and expenses associated with such an effort could be significant to us. There is no assurance that we will be able to find the funds necessary to keep up with new technology or that if such funds are available that we can successfully improve our existing products and services or successfully develop new products and services. Our failure to provide improved products and services to our customers or any delay in providing such products and services could cause us to lose customers to our competitors. Loss of customers could have a material adverse effect on *ECHO*.

Our inability to protect or defend our trade secrets and other intellectual property could hurt our business.

We have expended a considerable amount of time and money to develop information systems for our merchants. We regard these information systems as trade secrets that are extremely important to our payment processing operations. We rely on trade secret protection and confidentiality and/or license agreements with employees, customers, partners and others to protect this intellectual property and have not otherwise taken steps to obtain additional intellectual property protection or other protection on these information systems. We cannot be certain that we have taken adequate steps to protect our intellectual property. In addition, our third-party confidentiality agreements can be breached and, if they are, there may not be an adequate remedy available to us. If our trade secrets become known, we may lose our competitive position, including the loss of our merchant and bank customers. Such a loss could severely impact our results of operations and financial condition.

Additionally, while we believe that the technology underlying our information systems does not infringe upon the rights of any third parties, there is no assurance that third parties will not bring infringement claims against us. We also have the right to use the technology of others through various license agreements. If a third party claimed our activities and/or these licenses were infringing their technology, while we may have some protection from our third-party licensors, we could face additional infringement claims or otherwise be obligated to stop utilizing intellectual property critical to our technology infrastructure. If we are not able to implement other technology to substitute the intellectual property underlying a claim, our business operations could be severely effected. Additionally, infringement claims would require us to incur significant defense costs and expenses and, to the extent we are unsuccessful in defending these claims, could cause us to pay monetary damages to the person or entity making the claim. Continuously having to defend such claims or otherwise making monetary damages payments could materially adversely affect our results of operations.

If we do not continue to invest in research and development, and/or otherwise improve our technology platforms, we could lose our competitive position.

Because technology in the payment processing industry evolves rapidly, we need to continue to invest in research and development in both the bankcard processing business segment and the check-related products segment in order to remain competitive. This includes investments in our technology platforms to permit them to process higher transaction volumes, to transition some of these technologies to more commonly used platforms, to permit us to process foreign currency transactions, and to expand our point-of-sale connection capability for our bankcard processing services. Research and development expenses decreased from \$479,000 in the first quarter of fiscal 2006 to \$467,000 for the quarter ended December 31, 2006. Most of our development project costs were capitalized once we entered into coding and testing phases. We continue to evaluate projects, which we believe will assist us in our efforts to stay competitive. Although we believe that our investment in these projects will ultimately increase earnings, there is no assurance as to when or if these new products will show profitability or if we will ever be able to recover the costs invested in these projects. Additionally, if we fail to commit adequate resources to grow our technology on pace with market growth, we could quickly lose our competitive position, including the loss of our merchant and bank customers.

Failure to obtain additional funds can impact our operations and future growth.

We use funds generated from operations, as well as funds obtained through credit facilities and equity financing, to finance our operations. As a result of the cash flow generated from operations, we believe we have sufficient cash to support our business activities, including research, development and marketing costs. However, future growth may depend on our ability to continue to raise additional funds, either through operations, bank borrowings, or equity or debt financings. There is no assurance that we will be able to continue to raise the funds necessary to finance growth or continue to generate the funds necessary to finance operations, and even if such funds are available, that the terms will be acceptable to us. The inability to generate the necessary funds from operations or from third parties in the future may require us to scale back our research, development and growth opportunities, which could harm our overall operations.

While we maintain insurance protection against claims related to our services, there is no assurance that such protection will be adequate to cover potential claims and our inability to otherwise pay such claims could harm our business.

We maintain errors and omissions insurance for the services we provide. While we believe the limit on our errors and omissions insurance policy is adequate and consistent with industry practice, if claims are brought by our customers or other third parties, we could be required to pay the required claim or make significant expenditures to defend against such claims in amounts that exceed our current insurance coverage. There is no assurance that we will have the money to pay potential plaintiffs for such claims if they arise beyond the amounts insured by us. Making these payments could have a material adverse effect on our business.

Involvement in litigation could harm our business.

We are involved in various lawsuits arising in the ordinary course of business. Although we believe that the claims asserted in such lawsuits are without merit, the cost to us for the fees and expenses to defend such lawsuits could have a material adverse effect on our financial condition, results of operations or cash flow. In addition, there can be no assurance that we will not at some time in the future experience significant liability in connection with such claims. For the first quarter ended December 31, 2006, we did not incur any legal fees or expenses defending these claims.

Our inability to recover from natural disasters could harm our business.

We currently maintain two data centers: one in Camarillo, California, and one in Albuquerque, New Mexico. Should a natural disaster occur in any of the locations, it is possible that we would not be able to fully recover full functionality at one of our data centers. To minimize this risk, we centralized our data processing functionality in Camarillo during fiscal 2005 and completed a fully redundant site in Albuquerque in October of 2006. Despite such contingent capabilities, it is possible a natural disaster could limit or completely disable a specific service offered by *ECHO* until such time that the specific location could resume its functionality. Our inability to provide such service could have a material adverse effect on our business and results of operations.

Increases in the costs and requirements of technical compliance could harm our business.

The services which we offer require significant technical compliance. This includes compliance to both Visa and MasterCard regulations and association rules, NACHA guidelines and regulations with regard to the Federal Reserve System's Automated Clearing House and check related issues, and various banking requirements and regulations. We have personnel dedicated to monitoring our compliance to the specific industries we serve and when possible, we are moving the technical compliance responsibility to other parties. As the compliance issues become more defined in each industry, the costs and requirements associated with that compliance may present a risk to *ECHO*. These costs could be in the form of additional hardware, software or technical expertise that we must acquire and/or maintain. Additionally, burdensome or unclear requirements could increase the cost of compliance. While *ECHO* currently has these costs under control, we have no control over those entities that set the compliance requirements so no assurance can be given that we will always be able to underwrite the costs of compliance in each industry wherein we compete.

Risks Associated With Our Common Stock

If we need to sell or issue additional shares of common stock or assume additional debt to finance future growth, our stockholders' ownership could be diluted or our earnings could be adversely impacted.

Our business strategy may include expansion through internal growth, by acquiring complementary businesses or by establishing strategic relationships with targeted customers and suppliers. In order to do so, or to fund our other activities, we may issue additional equity securities that could dilute our stockholders' stock ownership. We may also assume additional debt and incur impairment losses related to goodwill and other tangible assets if we acquire another company and this could negatively impact our results of operations. As of the date of this report, management has no plan to raise additional capital through the sale of securities and believes that our cash flow from operations together with cash on hand will be sufficient to meet our working capital and other commitments.

We have adopted a number of anti-takeover measures that may depress the price of our common stock.

Our rights agreement, our ability to issue additional shares of preferred stock and some provisions of our articles of incorporation and bylaws could make it more difficult for a third party to make an unsolicited takeover attempt of us. These anti-takeover measures may depress the price of our common stock by making it more difficult for third parties to acquire us by offering to purchase shares of our stock at a premium to its market price.

Our stock price has been volatile.

Our common stock is quoted on the NASDAQ Capital Market, and there can be substantial volatility in the market price of our common stock. Over the course of the quarter ended December 31, 2006, the market price of our common stock has been as high as \$18.49, and as low as \$10.97. Additionally, over the course of the year ended September 30, 2006, the market price of our common stock has been as high as \$18.19 and as low as \$9.00. The market price of our common stock has been, and is likely to continue to be, subject to significant fluctuations due to a variety of factors, including quarterly variations in operating results, operating results which vary from the expectations of securities analysts and investors, changes in financial estimates, changes in market valuations of competitors, announcements by us or our competitors of a material nature, loss of one or more customers, additions or departures of key personnel, future sales of common stock and stock market price and volume fluctuations. In addition, general political and economic conditions such as a recession, or interest rate or currency rate fluctuations may adversely affect the market price of our common stock.

We have not paid and do not currently plan to pay dividends, and you must look to price appreciation alone for any return on your investment.

Some investors favor companies that pay dividends, particularly in general downturns in the stock market. We have not declared or paid any cash dividends on our common stock. We currently intend to retain any future earnings for funding growth, and we do not currently anticipate paying cash dividends on our common stock in the foreseeable future. Because we may not pay dividends, your return on this investment likely depends on your selling our stock at a profit.

Risks Related To Merger

Our proposed transaction with Intuit may adversely affect our results of operations whether or not the merger is completed, and the merger may not be completed on a timely basis or at all.

In response to our pending merger transaction with Intuit, our customers may defer purchasing decisions or elect to switch to other suppliers due to uncertainty about the direction of our product and service offerings following the

merger and our willingness to support, service, develop and upgrade existing products. In order to address customer uncertainty, we may incur additional obligations. Uncertainty surrounding the proposed transaction also may have an adverse effect on employee morale and retention, and result in the diversion of management attention and resources. In addition, the market value of our common stock will continue to vary prior to completion of the merger transaction due to changes in the business, operations, or prospects of *ECHO*, market assessments of the merger, market and economic considerations, or other factors. However, there will be no adjustment to the consideration to be received by our stockholders in connection with the merger, and in particular there will be no increase in the consideration payable by Intuit even if our value or Intuit's value increases or we or Intuit report better than expected financial results. We do not have a right to terminate the merger agreement based upon increases in the value of our common stock. In addition, because the consideration is payable in cash, our stockholders will not have any opportunity to benefit from an increase in the value of Intuit's common stock after the merger closes.

The merger is subject to a number of conditions, many of which are beyond our control. If the merger is not completed, the price of our common stock may decline to the extent that the current market price of our common stock reflects a market assumption that the merger will be completed. In addition, our business may be harmed to the extent that customers, suppliers or others believe that we cannot effectively compete in the marketplace without the merger or there is customer and employee uncertainty surrounding the future direction of our product and service offerings and strategy on a stand-alone basis. The closing of the merger and the integration of our business into Intuit's business will make substantial demands on our management, which may limit the time available to management to attend to other operational, financial and strategic issues of our company, which could adversely affect our business. We also will be required to pay significant costs incurred in connection with the merger, including legal, accounting and financial advisory fees, whether or not the merger is completed. Moreover, under specified circumstances, we may be required to pay Intuit a termination fee of \$4,271,000 in connection with the termination of the merger agreement under certain circumstances.

Some of our material agreements have provisions which require us to obtain consents from other parties to such agreements in connection with a merger or change of control. Our failure to obtain such consents could adversely impact our ability to consummate the merger.

Some of our material agreements require us to obtain consents from other parties in connection with mergers or changes in control. While we are currently in the process of obtaining consents from all required third parties, there can be no assurance that we will obtain consents from all required third parties. Our failure to obtain necessary third party consents could violate the terms of the relevant contracts, violate the conditions to the closing, and could result in our failure to consummate the merger.

If the merger does not occur, we will not benefit from the expenses we have incurred in connection with the merger.

The merger may not be completed. If the merger is not completed, we will have incurred substantial expenses for which no ultimate benefit will have been received.

There may be unforeseen liabilities in connection with the merger.

We may be subject to undisclosed or otherwise unforeseen tax, pension, litigation or other liabilities which are not currently known or which have been underestimated in connection with the merger. If unforeseen liabilities materialize or known liabilities are greater than are currently estimated, they could have a material adverse effect on our business, financial condition and results of operations and, going forward, could adversely affect the results of the combined company.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

Our exposure to interest rate risk is very limited. A hypothetical 1% interest rate change would have no impact on our results of operations.

Item 4. Controls and Procedures

As of December 31, 2006, the end of the period covered by this report, we carried out an evaluation, under the supervision and with the participation of our management, including our Chief Executive Officer and Chief Financial Officer, of the effectiveness of the design and operation of our disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) of the Securities Exchange Act of 1934). Based upon that evaluation (except as described below), our Chief Executive Officer and our Chief Financial Officer concluded that as of December 31, 2006, our disclosure controls and procedures were effective.

During the quarter ended December 31, 2006, there was no change in our internal control over financial reporting that materially affects, or that is reasonably likely to materially affect, our internal control over financial reporting. However, as a result of our review process in preparation of our Form 10Q for the quarter ended December 31, 2006, we identified a deficiency in our identification and interpretation of the appropriate accounting principles related to the accounting for compensation to be recognized upon payments of approximately \$87,000 to employee optionees. These payments were made in connection with an amendment of the employees' previously issued stock option grants - as a reimbursement of additional amounts to be paid by the optionees to exercise their stock options. Additionally, we found that we did not record an accrual of approximately \$79,000 related to employee bonuses that had been approved during the quarter ended December 31, 2006. These adjustments required us to record additional compensation expense in the total amount of approximately \$166,000 in the quarter ended December 31, 2006. Because these amounts each exceed an amount considered to be material by management, we have deemed these deficiencies to be a material weakness. We do not anticipate amending previously issued stock option grants in the future and will accrue future bonuses as they are approved. Accordingly, we believe we will remediate this material weakness.
