NEWS RELEASE

January 29, 2004

### EXCELLENT SILVER RESULTS AT IMA'S NAVIDAD DISCOVERY INCREASE DRILLING COMMITMENT TO 8,500 METERS

IMA Exploration Inc. is pleased to announce that the drilling program at the Company's 100% owned Navidad silver discovery in Patagonia, Argentina, resumed on January 11, 2004 and to date has completed 23 drill holes consisting of 3,500 meters of core. So far the results of 11 holes have been previously announced and the remaining 12 holes will be released as the assay results are received. Furthermore, management has approved an additional 5,000 meters of drilling which will focus on a chargeability anomaly at Galena Hill with a surface footprint of 1.6 km x 1.3 km that starts near surface and in some cases extends to depths of approximately 300 metres.

With approximately \$4,500,000 in the treasury, the Company has the financial strength to carry out its exploration objectives at Navidad and does not require additional financing in the immediate future to complete the planned drilling at Navidad. As of January 15th, IMA had 36.6 million shares issued and outstanding and 45 million fully diluted, including 6 million warrants that are all above their exercise price.

IMA has implemented a rigorous quality control and quality-assurance program at the Navidad project. For details of this program please see the document posted [www.imaexploration.com](http://www.imaexploration.com) in the Navidad property section. Dr. Paul Lhotka, P.Geo. is the "Qualified Person" at the Navidad Project and has overseen all aspects of sample and data handling.

IMA Exploration Inc. focuses on quality exploration work designed to define economic gold and silver deposits in Argentina and Peru. IMA has put together an enviable property portfolio including over 37 well-located, high-potential projects and is continuing to add to this package through grass-roots exploration and staking.
