SECURITIES AND EXCHANGE COMMISSION
WASHINGTON, D.C. 20549

FORM 10-Q

QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934 FOR THE QUARTERLY PERIOD ENDED JUNE 30, 2008.

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934 FOR THE TRANSITION PERIOD FROM _____ TO _____.

Commission file number: 000-32987

UNITED SECURITY BANCSHARES

(Exact name of registrant as specified in its charter)

CALIFORNIA
(State or other jurisdiction of
incorporation or organization)

91-2112732
(I.R.S. Employer
Identification No.)

2126 Inyo Street, Fresno, California
(Address of principal executive offices)

93721
(Zip Code)

Registrants telephone number, including area code (559) 248-4943

Indicate by check mark whether the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. Yes No

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing for the past 90 days.

Yes No

Indicate by check mark whether the registrant is an accelerated filer (as defined in Rule 12b-2 of the Act).

Large accelerated filer Accelerated filer Non-accelerated filer Small reporting company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Act). Yes No

Aggregate market value of the Common Stock held by non-affiliates as of the last business day of the registrant's most recently completed second fiscal quarter - June 30, 2008: \$121,168,727

Indicate the number of shares outstanding of each of the issuer's classes of common stock, as of the latest practicable date.

Common Stock, no par value

(Title of Class)

Shares outstanding as of July 31, 2008: 11,798,089

United Security Bancshares and Subsidiaries - Notes to Consolidated Financial Statements - (Unaudited)

1. *Organization and Summary of Significant Accounting and Reporting Policies*

The consolidated financial statements include the accounts of United Security Bancshares, and its wholly owned subsidiary United Security Bank (the "Bank") and two bank subsidiaries, USB Investment Trust (the "REIT") and United Security Emerging Capital Fund, (collectively the "Company" or "USB"). Intercompany accounts and transactions have been eliminated in consolidation.

These unaudited financial statements have been prepared in accordance with generally accepted accounting principles for interim financial information on a basis consistent with the accounting policies reflected in the audited financial statements of the Company included in its 2007 Annual Report on Form 10-K. These interim financial statements do not include all of the information and footnotes required by generally accepted accounting principles for complete financial statements. In the opinion of management, all adjustments (consisting of a normal recurring, nature) considered necessary for a fair presentation have been included. Operating results for the interim periods presented are not necessarily indicative of the results that may be expected for any other interim period or for the year as a whole. Certain reclassifications have been made to the 2007 financial statements to conform to the classifications used in 2008. None of these reclassifications were material.

New Accounting Standards:

In September 2006, the Emerging Issues Task Force (EITF) reached a final consensus on Issue No. 06-4 (EITF 06-4), *"Accounting for Deferred Compensation and Postretirement Benefit Aspects of Endorsement Split-Dollar Life Insurance Arrangements."* EITF 06-4 requires employers to recognize a liability for future benefits provided through endorsement split-dollar life insurance arrangements that extend into postretirement periods in accordance with SFAS No. 106, *"Employers' Accounting for Postretirement Benefits Other Than Pensions* or APB Opinion No. 12, *Omnibus Opinion-1967."* The provisions of EITF 06-4 became effective on January 1, 2008 and are to be applied as a change in accounting principle either through a cumulative-effect adjustment to retained earnings or other components of equity or net assets in the statement of financial position as of the beginning of the year of adoption, or through retrospective application to all prior periods. The Company's split-dollar life insurance benefits are limited to the employee's active service period. EITF 06-4 had no impact on the Company's financial condition or results of operations.

In March 2008, the Financial Accounting Standards Board (FASB) issued SFAS No. 161, "Disclosures about Derivative Instruments and Hedging Activities - an Amendment of FASB Statement 133." SFAS No. 161 enhances required disclosures regarding derivatives and hedging activities, including enhanced disclosures regarding how an entity uses derivative instruments and how derivative instruments and related hedged items are accounted for and affect an entity's financial position, financial performance, and cash flows. SFAS No. 161 is effective for fiscal years and interim periods beginning after November 15, 2008. Adoption of SFAS No. 161 as of January 1, 2009 will not have a material impact on the Company's consolidated financial position or results of operations, as it impacts financial statement disclosure only.

2. *Investment Securities Available for Sale*

Following is a comparison of the amortized cost and approximate fair value of securities available-for-sale, as of June 30, 2008 and December 31, 2007:

<i>(In thousands)</i>	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Fair Value (Carrying Amount)
June 30, 2008:				
U.S. Government agencies	\$ 44,120	\$ 245	\$ (220)	\$ 44,145
U.S. Government agency collateralized mortgage obligations	41,417	131	(1,984)	39,564
Obligations of state and political subdivisions	1,287	18	0	1,305
Other investment securities	13,821	0	(575)	13,246
	\$ 100,645	\$ 394	\$ (2,779)	\$ 98,260
December 31, 2007:				
U.S. Government agencies	\$ 65,764	\$ 524	\$ (302)	\$ 65,986
U.S. Government agency collateralized mortgage obligations	7,782	44	(4)	7,822
Obligations of state and political subdivisions	2,227	54	0	2,281
Other investment securities	13,752	0	(426)	13,326
	\$ 89,525	\$ 622	\$ (732)	\$ 89,415

Included in other investment securities at June 30, 2008 are a short-term government securities mutual fund totaling \$7.6 million, a CRA-qualified mortgage fund totaling \$4.8 million, and a money-market mutual fund totaling \$821,000. Included in other investment securities at December 31, 2007, is a short-term government securities mutual fund totaling \$7.7 million, a CRA-qualified mortgage fund totaling \$4.9 million, and an overnight money-market mutual fund totaling \$752,000. The short-term government securities mutual fund invests in debt securities issued or guaranteed by the U.S. Government, its agencies or instrumentalities, with a maximum duration equal to that of a 3-year U.S. Treasury Note.

There were realized gains totaling \$24,000 on calls of available-for-sale securities during the six months ended June 30, 2008. There were no realized losses on sales or calls of available-for-sale securities during the six months ended June 30, 2008. There were no realized gains or losses on sales or calls of available-for-sale securities during the six months ended June 30, 2007.

Securities that have been temporarily impaired less than 12 months at June 30, 2008 are comprised of four collateralized mortgage obligations and three U.S. government agency securities with a total weighted average life of 3.0 years. As of June 30, 2008, there were two other investment securities and one U.S. government agency security with a total weighted average life of 1.5 years that have been temporarily impaired for twelve months or more.

The following summarizes temporarily impaired investment securities at June 30, 2008:

<i>(In thousands)</i>	Less than 12 Months		12 Months or More		Total	
	Fair Value (Carrying	Unrealized	Fair Value (Carrying	Unrealized	Fair Value (Carrying	Unrealized

Edgar Filing: UNITED SECURITY BANCSHARES - Form 10-Q

	Amount)	Losses	Amount)	Losses	Amount)	Losses
<u>Securities available for sale:</u>						
U.S. Government agencies	\$ 5,336	\$ (48)	\$ 4,842	\$ (172)	\$ 10,178	\$ (220)
U.S. Government agency collateralized mortgage obligations	22,419	(1,984)	0	0	22,419	(1,984)
Obligations of state and political subdivisions	0	0	0	0	0	0
Other investment securities	0	0	12,425	(575)	12,425	(575)
Total impaired securities	\$ 27,755	\$ (2,032)	\$ 17,267	\$ (747)	\$ 45,022	\$ (2,779)

Because the decline in market value is attributable to changes in market rates of interest rather than credit quality, and because the Company has the ability and intent to hold these investments until a recovery of fair value, which may be at maturity, the Company considers these investments to be temporarily impaired at June 30, 2008.

At June 30, 2008 and December 31, 2007, available-for-sale securities with an amortized cost of approximately \$85.4 million and \$71.0 million (fair value of \$83.6 million and \$71.3 million) were pledged as collateral for public funds, treasury tax and loan balances, and repurchase agreements.

3. *Loans and Leases*

Loans include the following:

<i>(In thousands)</i>	June 30, 2008	% of Loans	December 31, 2007	% of Loans
Commercial and industrial	\$ 220,547	37.4%	\$ 204,385	34.2%
Real estate – mortgage	136,775	23.2%	142,565	23.8%
Real estate – construction	155,046	26.4%	178,296	29.8%
Agricultural	51,890	8.8%	46,055	7.7%
Installment/other	17,203	2.9%	18,171	3.0%
Lease financing	7,643	1.3%	8,748	1.5%
Total Gross Loans	\$ 589,104	100.0%	\$ 598,220	100.0%

Loans over 90 days past due and still accruing totaled \$1.2 million and \$189,000 at June 30, 2008 and December 31, 2007, respectively. Nonaccrual loans totaled \$44.0 million and \$21.6 million at June 30, 2008 and December 31, 2007, respectively.

An analysis of changes in the allowance for credit losses is as follows:

<i>(In thousands)</i>	June 30, 2008	December 31, 2007	June 30, 2007
Balance, beginning of year	\$ 10,901	\$ 8,365	\$ 8,365
Provision charged to operations	813	5,697	410
Losses charged to allowance	(564)	(4,493)	(168)
Recoveries on loans previously charged off	73	64	30
Reserve acquired in merger	0	1,268	1,268
Balance at end-of-period	\$ 11,223	\$ 10,901	\$ 9,905

The allowance for credit losses represents management's estimate of the risk inherent in the loan portfolio based on the current economic conditions, collateral values and economic prospects of the borrowers. The formula allowance for unfunded loan commitments totaling \$426,000 and \$548,000 at June 30, 2008 and December 31, 2007, respectively, is carried in other liabilities. The Company's market areas of the San Joaquin Valley, the greater Oakhurst area, East Madera County, and Santa Clara County, have all been impacted by the economic downturn related to depressed real estate markets and the tightening of liquidity markets. The Company has taken these events into account when reviewing estimates of factors that may impact the allowance for credit losses.

The following table summarizes the Company's investment in loans for which impairment has been recognized for the periods presented:

<i>(in thousands)</i>	June 30, 2008	December 31, 2007	June 30, 2007
Total impaired loans at period-end	\$ 40,735	\$ 20,627	\$ 17,921
Impaired loans which have specific allowance	8,546	10,750	14,314

4. *Deposits*

Deposits include the following:

<i>(In thousands)</i>	June 30, 2008	December 31, 2007
Noninterest-bearing deposits	\$ 134,663	\$ 139,066
Interest-bearing deposits:		
NOW and money market accounts	180,540	153,717
Savings accounts	42,001	40,012
Time deposits:		
Under \$100,000	56,966	52,297
\$100,000 and over	144,502	249,525
Total interest-bearing deposits	424,009	495,551
Total deposits	\$ 558,672	\$ 634,617

5. *Short-term Borrowings/Other Borrowings*

At June 30, 2008, the Company had collateralized and uncollateralized lines of credit with the Federal Reserve Bank of San Francisco and other correspondent banks aggregating \$331.1 million, as well as Federal Home Loan Bank (“FHLB”) lines of credit totaling \$36.8 million. At June 30, 2008, the Company had total outstanding balances of \$32.0 million drawn against its FHLB line of credit. The weighted average cost of borrowings outstanding at June 30, 2008 was 2.55%. Of the \$32.0 million in FHLB borrowings outstanding at June 30, 2008, \$4.0 million was in two-week borrowings, and the other \$28.0 million consists of FHLB term-borrowings summarized in the table below.

FHLB term borrowings at June 30, 2008 (in 000’s):

Term	Balance at 3/31/08	Fixed Rate	Maturity
1 year	\$ 7,000	2.51%	2/11/09
2 year	10,000	4.92%	3/30/09
2 year	11,000	2.67%	2/11/10
	\$ 28,000	3.43%	

At December 31, 2007, the Company had collateralized and uncollateralized lines of credit with the Federal Reserve Bank of San Francisco and other correspondent banks aggregating \$386.7 million, as well as Federal Home Loan Bank (“FHLB”) lines of credit totaling \$22.0 million. At December 31, 2007, the Company had total outstanding balances of \$32.3 million in borrowings, including \$10.4 million in federal funds purchased from correspondent banks at an average rate of 4.2%, and \$21.9 million drawn against its FHLB lines of credit. Of the \$21.9 million in FHLB borrowings outstanding at December 31, 2007, \$11.9 million was in overnight borrowings at an average rate of 3.3%, and the other \$10.0 million consists of a two-year FHLB advance at a fixed rate of 4.92% and a maturity date of March 30, 2009. The weighted average cost of borrowings for the year ended December 31, 2007 was 5.17%.

These lines of credit generally have interest rates tied to the Federal Funds rate or are indexed to short-term U.S. Treasury rates or LIBOR. FHLB advances are collateralized by all of the Company’s stock in the FHLB and certain qualifying mortgage loans. All lines of credit are on an “as available” basis and can be revoked by the grantor at any time.

6. *Supplemental Cash Flow Disclosures*

<i>(In thousands)</i>	Six Months Ended June 30,	
	2008	2007
Cash paid during the period for:		
Interest	\$ 9,268	\$ 10,274

Basic earnings per share	\$ 0.18	\$ 0.27	\$ 0.39	\$ 0.58
Diluted earnings per share	\$ 0.18	\$ 0.27	\$ 0.39	\$ 0.57
Anti-dilutive shares excluded from earnings per share calculation	169	51	109	48

8. *Derivative Financial Instruments and Hedging Activities*

As part of its overall risk management, the Company pursues various asset and liability management strategies, which may include obtaining derivative financial instruments to mitigate the impact of interest fluctuations on the Company's net interest margin. During the second quarter of 2003, the Company entered into an interest rate swap agreement for the purpose of minimizing interest rate fluctuations on its interest rate margin and equity.

Under the interest rate swap agreement, the Company receives a fixed rate and pays a variable rate based on the Prime Rate ("Prime"). The swap qualifies as a cash flow hedge under SFAS No. 133, "Accounting for Derivative Instruments and Hedging Activities", as amended, and is designated as a hedge of the variability of cash flows the Company receives from certain variable-rate loans indexed to Prime. In accordance with SFAS No. 133, the swap agreement is measured at fair value and reported as an asset or liability on the consolidated balance sheet. The portion of the change in the fair value of the swap that is deemed effective in hedging the cash flows of the designated assets is recorded in accumulated other comprehensive income and reclassified into interest income when such cash flow occurs in the future. Any ineffectiveness resulting from the hedge is recorded as a gain or loss in the consolidated statement of income as part of noninterest income.

The amortizing hedge has a remaining notional value of \$198,000 at June 30, 2008, matures in September 2008, and has a duration of approximately two months. As of June 30, 2008, the maximum length of time over which the Company is hedging its exposure to the variability of future cash flows is approximately three months. As of June 30, 2008, the loss amounts in accumulated other comprehensive income associated with these cash flows totaled less than \$1,000. During the six months ended June 30, 2008, \$5,000 was reclassified from other accumulated comprehensive income into expense, and is reflected as a reduction in interest income.

The Company performed a quarterly analysis of the effectiveness of the interest rate swap agreement at June 30, 2008. As a result of a correlation analysis, the Company has determined that the swap remains highly effective in achieving

offsetting cash flows attributable to the hedged risk during the term of the hedge and, therefore, continues to qualify for hedge accounting under the guidelines of SFAS No. 133. However, during the second quarter of 2006, the Company determined that the underlying loans being hedged were paying off faster than the notional value of the hedge instrument was amortizing. This difference between the notional value of the hedge and the underlying hedged assets is considered an “overhedge” pursuant to SFAS No. 133 guidelines and may constitute ineffectiveness if the difference is other than temporary. The Company determined during 2006 that the difference was other than temporary and, as a result, reclassified a net total of \$75,000 of the pretax hedge loss reported in other comprehensive income into earnings during 2006. As of June 30, 2008, the notional value of the hedge was still in excess of the value of the underlying loans being hedged by approximately \$133,000, but had improved from the \$1.3 million difference existing at December 31, 2007. As a result, the Company recorded a pretax hedge gain related to swap ineffectiveness of approximately \$9,100 during the six months ended June 30, 2008. Amounts recognized as hedge ineffectiveness gains or losses are reflected in noninterest income.

9.

Common Stock Repurchase Plan

Since August 2001, the Company's Board of Directors has approved three separate consecutive plans to repurchase, as conditions warrant, up to approximately 5% of the Company's common stock on the open market or in privately negotiated transactions. The duration of the stock repurchase programs has been open-ended and the timing of purchases depends on market conditions. As each new stock repurchase plan was approved, the previous plan was cancelled.

On May 16, 2007, the Board of Directors approved a third stock repurchase plan to repurchase, as conditions warrant, up to 610,000 shares of the Company's common stock on the open market or in privately negotiated transactions. The repurchase plan represents approximately 5.00% of the Company's currently outstanding common stock. The duration of the program is open-ended and the timing of purchases will depend on market conditions. Concurrent with the approval of the new repurchase plan, the Company canceled the remaining 75,733 shares available under the previous 2004 repurchase plan.

During the year ended December 31, 2007, 512,332 shares were repurchased at a total cost of \$10.1 million and an average per share price of \$19.71. Of the shares repurchased during 2007, 166,660 shares were repurchased under the previous 2004 plan at an average cost of \$20.46 per shares, and 345,672 shares were repurchased under the 2007 plan at an average cost of \$19.35 per shares.

During the six months ended June 30, 2008, 64,200 shares were repurchased at a total cost of \$978,000 and an average per share price of \$15.23.

10.

Stock Based Compensation

On January 1, 2006 the Company adopted the disclosure provisions of Financial Accounting Standards Board (FASB) Statement No. 123 R, "Accounting for Share-Based Payments". SFAS No. 123R requires all share-based payments to employees, including grants of employee stock options, to be recognized in the financial statements based on the grant-date fair value of the award. The fair value is amortized over the requisite service period (generally the vesting period).

Included in salaries and employee benefits for the six months ended June 30, 2008 and 2007 is \$61,000 and \$93,000 of share-based compensation, respectively. The related tax benefit on share-based compensation recorded in the provision for income taxes was not material to either quarter.

A summary of the Company's options as of January 1, 2008 and changes during the six months ended June 30, 2008 is presented below.

	2005 Plan	Weighted Average Exercise Price	1995 Plan	Weighted Average Exercise Price
Options outstanding January 1, 2008	176,500	\$ 17.14	36,000	\$ 11.21
Exercised during the period	0	—	(8,000)	8.75
Forfeited during the period	0	—	(12,000)	11.53
Options outstanding June 30, 2008	176,500	\$ 17.14	16,000	\$ 12.21
	62,900	\$ 17.05	14,000	\$ 12.21

Options exercisable at June 30,
2008

As of June 30, 2008 and 2007, there was \$162,000 and \$317,000, respectively, of total unrecognized compensation expense related to nonvested stock options. This cost is expected to be recognized over a weighted average period of approximately 1.00 years and 1.50 years, respectively. The Company received \$70,000 and \$510,000 in cash proceeds on options exercised during the six months ended June 30, 2008 and 2007, respectively. No tax benefits were realized on stock options exercised during the six months ended June 30, 2008 or 2007, because all options exercised during the periods were incentive stock options.

12

Edgar Filing: UNITED SECURITY BANCSHARES - Form 10-Q

	Period Ended June 30, 2008	Period Ended June 30, 2007
Weighted average grant-date fair value of stock options granted	n/a	\$ 4.51
Total fair value of stock options vested	\$ 106,295	\$ 103,346
Total intrinsic value of stock options exercised	\$ 55,000	\$ 1,517,000

The Company determines fair value at grant date using the Black-Scholes-Merton pricing model that takes into account the stock price at the grant date, the exercise price, the expected life of the option, the volatility of the underlying stock and the expected dividend yield and the risk-free interest rate over the expected life of the option.

The weighted average assumptions used in the pricing model are noted in the table below. The expected term of options granted is derived using the simplified method, which is based upon the average period between vesting term and expiration term of the options. The risk free rate for periods within the contractual life of the option is based on the U.S. Treasury yield curve in effect at the time of the grant. Expected volatility is based on the historical volatility of the Bank's stock over a period commensurate with the expected term of the options. The Company believes that historical volatility is indicative of expectations about its future volatility over the expected term of the options.

For options vested as of January 1, 2006 or granted after January 1, 2006, and valued in accordance with FAS 123R, the Company expenses the fair value of the option on a straight-line basis over the vesting period for each separately vesting portion of the award. The Company estimates forfeitures and only recognizes expense for those shares expected to vest. Based upon historical evidence, the Company has determined that because options are granted to a limited number of key employees rather than a broad segment of the employee base, expected forfeitures, if any, are not material.

	June 30, 2008	June 30, 2007
Risk Free Interest Rate	—	4.53%
Expected Dividend Yield	—	2.47%
Expected Life in Years	—	6.50
Expected Price Volatility	—	20.63%

The Black-Scholes-Merton option valuation model requires the input of highly subjective assumptions, including the expected life of the stock based award and stock price volatility. The assumptions listed about represent management's best estimates, but these estimates involve inherent uncertainties and the application of management judgment. As a result, if other assumptions had been used, the Company's recorded stock-based compensation expense could have been materially different from that previously reported by the Company. In addition, the Company is required to estimate the expected forfeiture rate and only recognize expense for those shares expected to vest. The Company's current expected forfeiture rate is zero. If the Company's actual forfeiture rate is materially different from the estimate, the share-based compensation expense could be materially different.

II. *Taxes – FIN48*

The Company adopted the provisions of FASB Interpretation No. 48, "Accounting for Uncertainty in Income Taxes" (FIN48), on January 1, 2007. FIN 48 clarifies SFAS No. 109, "Accounting for Income Taxes," to indicate a criterion that an individual tax position would have to meet for some or all of the income tax benefit to be recognized in a taxable entity's financial statements. Under the guidelines of FIN48, an entity should recognize the financial statement benefit of a tax position if it determines that it is *more likely than not* that the position will be sustained on examination. The term, "more likely than not", means a likelihood of more than 50 percent. In assessing whether the more-likely-than-not criterion is met, the entity should assume that the tax position will be reviewed by the applicable

taxing authority and all available information is known to the taxing authority.

13

The Company and a subsidiary file income tax returns in the U.S federal jurisdiction, and several states within the U.S. There are no filings in foreign jurisdictions. The Company is not currently aware of any tax jurisdictions where the Company or any subsidiary is subject examination by federal, state, or local taxing authorities before 2001. The Internal Revenue Service (IRS) has not examined the Company's or any subsidiaries federal tax returns since before 2001, and the Company currently is not aware of any examination planned or contemplated by the IRS. The California Franchise Tax Board (FTB) concluded an audit of the Company's 2004 state tax return during the fourth quarter of 2007, resulting in a disallowance of approximately \$19,000 related to Enterprise Zone loan interest deductions taken during 2004. The \$19,000 was recorded as a component of tax expense for the year ended December 31, 2007.

During the second quarter of 2006, the FTB issued the Company a letter of proposed adjustments to, and assessments for, (as a result of examination of the tax years 2001 and 2002) certain tax benefits taken by the REIT during 2002. The Company continues to review the information available from the FTB and its financial advisors and believes that the Company's position has merit. The Company is pursuing its tax claims and will defend its use of these entities and transactions. The Company will continue to assert its administrative protest and appeal rights pending the outcome of litigation by another taxpayer presently in process on the REIT issue in the Los Angeles Superior Court (City National v. Franchise Tax Board).

The Company reviewed its REIT tax position as of January 1, 2007 (adoption date) and again during subsequent quarters since that time in light of the adoption of FIN48. The Bank, with guidance from advisors believes that the case has merit with regard to points of law, and that the tax law at the time allowed for the deduction of the consent dividend. However, the Bank, with the concurrence of advisors, cannot conclude that it is "more than likely" (as defined in FIN48) that the Bank will prevail in its case with the FTB. As a result of the implementation of FIN48, the Company recognized approximately a \$1.3 million increase in the liability for unrecognized tax benefits (included in other liabilities), which was accounted for as a reduction to the January 1, 2007 balance of retained earnings. The adjustment provided at adoption included penalties proposed by the FTB of \$181,000 and interest totaling \$210,000. During the year ended December 31, 2007, and the six months ended June 30, 2008, the Company recorded an additional \$87,000 and \$43,000, respectively in interest liability pursuant to the provisions of FIN48. The Company had approximately \$522,000 accrued for the payment of interest and penalties at June 30, 2008. Subsequent to the initial adoption of FIN48, it is the Company's policy to recognize interest expense related to unrecognized tax benefits, and penalties, as a component tax expense. A reconciliation of the beginning and ending amount of unrecognized tax benefits is as follows (in 000's):

Balance at January	
1, 2008	\$ 1,385
Additions for tax	
provisions of prior	
years	43
Balance at June 30,	
2008	\$ 1,428

12. *Fair Value Adjustments - Junior Subordinated Debt/Trust Preferred Securities*

Effective January 1, 2007, the Company elected early adoption of SFAS No.159, "The Fair Value Option for Financial Assets and Financial Liabilities, including an amendment of FASB Statement No. 115". The Company also adopted the provisions of SFAS No. 157, "Fair Value Measurements", effective January 1, 2007, in conjunction with the adoption of SFAS No. 159. SFAS No. 159 generally permits the measurement of selected eligible financial instruments at fair value at specified election dates. Upon adoption of SFAS No. 159, the Company elected the fair value measurement option for all the Company's pre-existing junior subordinated debentures issued under the Company's wholly-owned trust, USB Capital Trust I. The junior subordinated debt issued under USB Capital Trust I was ultimately redeemed during July 2007, and USB Capital Trust I was dissolved. The Company also elected the fair value option pursuant to

SFAS No. 159 for subsequent junior subordinated debt issued under USB Capital Trust II formed during July 2007. The rate paid on the junior subordinated debt issued under USB Capital Trust II is 3-month LIBOR plus 129 basis points, and is adjusted quarterly.

At June 30, 2008 the Company performed a fair value measurement analysis on its junior subordinated debt pursuant to SFAS No. 157 using a valuation model approach that had been utilized in previous periods because of the absences of quoted market prices. Because the trust preferred markets became effectively inactive during the first quarter of 2008 due to increasing credit concerns in the capital markets, management used unobservable pricing spreads to 3-month LIBOR in the fair value determination of its junior subordinated debt. Management utilized a similar market spread from 3-month LIBOR to that used for the fourth quarter of 2007 when observable data were more available. Management believes this market spread is still indicative of those used by market participants.

The fair value calculation performed at June 30, 2008 resulted in a pretax loss adjustment of \$39,000 for the quarter ended June 30, 2008, and a cumulative pretax gain adjustment \$501,000 for the six months ended June 30, 2008. The cumulative gain adjustment is the result of a 191 basis point decline in the 3-month LIBOR base rate between December 31, 2007 and June 30, 2008. At June 30, 2008, the total cumulative fair value gain recorded on the balance sheet for was \$2.9 million. Upon initial adoption of SFAS No. 159, fair value adjustments were reflected in retained earnings. Fair value gains and losses subsequent to initial adoption of SFAS No. 159 are reflected as a component of noninterest income.

13. *Fair Value Measurements—Adoption of SFAS No. 157*

Effective January 1, 2007, the Company adopted SFAS 157, “Fair Value Measurements”, concurrent with its early adoption of SFAS No. 159. SFAS No. 157 clarifies the definition of fair value, describes methods used to appropriately measure fair value in accordance with generally accepted accounting principles and expands fair value disclosure requirements. This statement applies whenever other accounting pronouncements require or permit fair value measurements.

The fair value hierarchy under SFAS No. 157 prioritizes the inputs to valuation techniques used to measure fair value into three broad levels (Level 1, Level 2, and Level 3). Level 1 inputs are unadjusted quoted prices in active markets (as defined) for identical assets or liabilities that the reporting entity has the ability to access at the measurement date. Level 2 inputs are inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly. Level 3 inputs are unobservable inputs for the asset or liability, and reflect the reporting entity’s own assumptions about the assumptions that market participants would use in pricing the asset or liability (including assumptions about risk).

The Company performs fair value measurements on certain assets and liabilities as the result of the application of accounting guidelines and pronouncements that were relevant prior to the adoption of SFAS No. 157. Some fair value measurements, such as for available-for-sale securities and interest rate swaps are performed on a recurring basis, while others, such as impairment of loans, goodwill and other intangibles, are performed on a nonrecurring basis.

The following tables summarize the Company’s assets and liabilities that were measured at fair value on a recurring and non-recurring basis as of June 30, 2008 (in 000’s):

Description of Assets	June 30, 2008	Quoted Prices in Active Markets		Significant Unobservable Inputs (Level 3)
		for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	
AFS Securities	\$ 98,260		\$ 98,260	
Investment in Bank equity securities	315	\$ 315		
Interest Rate Swap	(0)		(0)	
Impaired Loans (non-recurring)	4,377			\$ 4,377
Core deposit intangibles (non-recurring)	1,495			1,495
Total	\$ 104,447	\$ 315	\$ 98,260	\$ 5,872

Description of Liabilities	June 30, 2008	Quoted Prices in Active Markets		Significant Unobservable Inputs (Level 3)
		for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	
Junior subordinated debt	\$ 12,741			\$ 12,741

Edgar Filing: UNITED SECURITY BANCSHARES - Form 10-Q

Total	\$	12,741	\$	0	\$	0	\$	12,741
-------	----	--------	----	---	----	---	----	--------

The following tables summarize the Company's assets and liabilities that were measured at fair value on a recurring basis as of December 31, 2007 (in 000's):

15

Edgar Filing: UNITED SECURITY BANCSHARES - Form 10-Q

Description of Assets	December 31, 2007	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
AFS Securities	\$ 89,415	\$ 89,415		
Interest Rate Swap	(12)		\$ (12)	
Impaired Loans (non-recurring)	6,298		4,185	\$ 2,113
Total	\$ 95,701	\$ 89,415	\$ 4,173	\$ 2,113

Description of Liabilities	December 31, 2007	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
Junior subordinated debt	\$ 13,341		\$ 13,341	
Total	\$ 13,341	\$ 0	\$ 13,341	\$ 0

Available for sale securities are valued based upon open-market price quotes obtained from reputable third-party brokers that actively make a market in those securities. Market pricing is based upon specific CUSIP identification for each individual security. To the extent there are observable prices in the market, the mid-point of the bid/ask price is used to determine fair value of individual securities. If that data is not available for the last 30 days, a level 2-type matrix pricing approach based on comparable securities in the market is utilized. Level-2 pricing may include using a spread forward from the last observable trade or may use a proxy bond like a TBA mortgage to come up with a price for the security being valued. Changes in fair market value are recorded in other comprehensive income as the securities are available for sale.

Investment in Bank equity securities is classified as available for sale and is valued based upon open-market price quotes obtained from an active stock exchange. Changes in fair market value are recorded in other comprehensive income.

The fair value of interest rate swap contracts is based on the discounted net present value of the swap using third party dealer quotes. Changes in fair market value are recorded in other comprehensive income, and changes resulting from ineffectiveness are recorded in current earnings.

Fair value measurements for impaired loans are performed pursuant to SFAS No. 114, and are based upon either collateral values supported by appraisals, or observed market prices. The change in fair value of impaired assets that were valued based upon level three inputs was approximately \$37,000 and \$203,000 for the six months ended June 30, 2008, and year ended December 31, 2007, respectively. This loss is not recorded directly as an adjustment to current earnings or comprehensive income, but rather as an adjustment component in determining the overall adequacy of the loan loss reserve. Such adjustments to the estimated fair value of impaired loans may result in increases or decreases to the provision for credit losses recorded in current earnings.

The fair value of the junior subordinated debt was determined based upon a valuation discounted cash flows model utilizing observable market rates and credit characteristics for similar instruments. In its analysis, the Company used characteristics that distinguish market participants generally use, and considered factors specific to (a) the liability, (b) the principal (or most advantageous) market for the liability, and (c) market participants with whom the reporting entity would transact in that market. For the six month period ended June 30, 2008, management utilized a similar market spread from 3-month LIBOR to that used for the fourth quarter of 2007 when observable data were more available. The Company believes this adjustment is significant enough to the fair value determination of the junior

subordinated debt as to make them Level 3 inputs as of March 31, 2008 and June 30, 2008. The junior subordinated debt was classified as Level 2 as of December 31, 2007.

The nonrecurring fair value measurements performed during the quarter ended March 31, 2008 resulted in a pretax fair value impairment adjustment of \$624,000 (\$364,000 net of tax) to the core deposit intangible asset. The adjustment is reflected as a component of noninterest expense for the quarter ended March 31, 2008.

The following tables provide a reconciliation of assets and liabilities at fair value using significant unobservable inputs (Level 3) on a recurring and non-recurring basis during the periods ended June 30, 2008 and 2007 (in 000's):

	6/30/2008		6/30/2007	
	Impaired Loans and CDI		Impaired Loans	Business Combinations
Reconciliation of Assets:				
Beginning balance	\$ 2,211	\$	1,521	\$ 0
Total gains or (losses) included in earnings (or changes in net assets)	(570)		(203)	9,910

--	----	-------	----	---------

During the quarter ended March 31, 2008, the Company reclassified approximately \$12.8 million in junior subordinated debt from Level 2 to Level 3 because certain significant inputs for the fair value measurement became unobservable. The fair value of junior subordinated debt was again considered a Level 3 input at June 30, 2008. This re-class was primarily the result of continued credit market and liquidity deterioration in which credit markets for trust preferred securities became effectively inactive during the period.

14. Impairment Loss – Core Deposit Intangible

The Company conducts periodic impairment analysis on its intangible assets and goodwill. Impairment analysis is performed at least annually or more often as conditions require.

During the first quarter of 2008, the Company performed an impairment analysis of the goodwill and core deposit intangible assets associated with the Legacy Bank merger completed during February 2007. The original goodwill and core deposit intangible assets recorded as a result of the Legacy merger totaled \$8.8 million and \$3.0 million respectively. Goodwill is not amortized. The core deposit intangible asset is being amortized over an estimated life of approximately seven years. As a result, the Company recognized \$164,000 and \$63,000 in amortization expense during the first quarter of 2008 and 2007, respectively, bringing the net remaining carrying value of the Legacy core deposit intangible to \$2.3 million at March 31, 2008.

During the impairment analysis performed as of March 31, 2008, it was determined that the original deposits purchased from Legacy Bank during February 2007 had declined faster than originally anticipated when the core deposit intangible was calculated at the time of the merger. As a result of increased deposit runoff, particularly in interest-bearing and noninterest-bearing checking accounts, the estimated value of the Legacy core deposit intangible was determined to be \$1.6 million at March 31, 2008 rather than the pre-adjustment carrying value of \$2.3 million. As a result of the impairment analysis, the Company recorded a pre-tax impairment loss of \$624,000 (\$364,000 net of tax) reflected as a component of noninterest expense for the quarter ended March 31, 2008. Pursuant to the impairment analysis conducted as of March 31, 2008, the Company determined that there was no impairment to the goodwill related to the Legacy merger. During the quarter ended June 30, 2008, the Company recorded \$145,000 of amortization expense related to the Legacy core deposit intangible asset bringing the net carrying value to \$1.5 million at June 30, 2008.

Item 2 - Management's Discussion and Analysis of Financial Condition and Results of Operations**Overview**

Certain matters discussed or incorporated by reference in this Quarterly Report of Form 10-Q are forward-looking statements that are subject to risks and uncertainties that could cause actual results to differ materially from those projected in the forward-looking statements. Such risks and uncertainties include, but are not limited to, those described in Management's Discussion and Analysis of Financial Condition and Results of Operations. Such risks and uncertainties include, but are not limited to, the following factors: i) competitive pressures in the banking industry and changes in the regulatory environment; ii) exposure to changes in the interest rate environment and the resulting impact on the Company's interest rate sensitive assets and liabilities; iii) decline in the health of the economy nationally or regionally which could reduce the demand for loans or reduce the value of real estate collateral securing most of the Company's loans; iv) credit quality deterioration that could cause an increase in the provision for loan losses; v) Asset/Liability matching risks and liquidity risks; volatility and devaluation in the securities markets, and vi) expected cost savings from recent acquisitions are not realized. Therefore, the information set forth therein should be carefully considered when evaluating the business prospects of the Company. For additional information concerning risks and uncertainties related to the Company and its operations, please refer to the Company's Annual Report on Form 10-K for the year ended December 31, 2007.

The Company currently has eleven banking branches, which provide financial services in Fresno, Madera, Kern, and Santa Clara counties in the state of California.

Trends Affecting Results of Operations and Financial Position

The following table summarizes the three-month and year-to-date averages of the components of interest-bearing assets as a percentage of total interest-bearing assets and the components of interest-bearing liabilities as a percentage of total interest-bearing liabilities:

	YTD Average 6/30/08	YTD Average 12/31/07	YTD Average 6/30/07
Loans and Leases	84.17%	85.00%	83.77%
Investment securities available for sale	14.99%	13.46%	14.23%
Interest-bearing deposits in other banks	0.68%	1.02%	1.20%
Federal funds sold	0.16%	0.52%	0.80%
Total earning assets	100.00%	100.00%	100.00%
NOW accounts	8.12%	8.82%	9.34%
Money market accounts	23.08%	25.99%	27.95%
Savings accounts	7.73%	8.79%	9.45%
Time deposits	48.01%	50.05%	47.41%
Other borrowings	10.66%	3.40%	2.57%
Subordinated debentures	2.40%	2.95%	3.28%
Total interest-bearing liabilities	100.00%	100.00%	100.00%

The Company's overall operations are impacted by a number of factors, including not only interest rates and margin spreads, which impact results of operations, but also the composition of the Company's balance sheet. One of the primary strategic goals of the Company is to maintain a mix of assets that will generate a reasonable rate of return without undue risk, and to finance those assets with a low-cost and stable source of funds. Liquidity and capital resources must also be considered in the planning process to mitigate risk and allow for growth.

Although continued weakness in the real estate markets and the general economy have impacted the Company's operations to some degree, the Company continues its business development and expansion efforts throughout a diverse and growing market area, and as a result, realized stable earnings during the six months ended June 30, 2008.

With market rates of interest declining 100 basis points during the fourth quarter of 2007, and another 225 basis points during the first six months of 2008, the Company has experienced continued declines in its net interest margin. The Company's net interest margin was 4.57% for the six months ended June 30, 2008, as compared to 5.35% for the year ended December 31, 2007, and 5.68% for the six months ended June 30, 2007. With approximately 62% of the loan portfolio in floating rate instruments at June 30, 2008, the effects of market rates continue to be realized almost immediately on loan yields. Loans yielded 7.41% during the six months ended June 30, 2008, as compared to 9.07% for the year ended December 31, 2007, and 9.45% for the six months ended June 30, 2007. With a significant increase in nonaccrual loans during the first six months of 2008, the Company reversed approximately \$585,000 in interest income during the period, reducing the loan yield by approximately 20 basis points during the first six months of 2008. Loan yield was enhanced during 2007, as a nonperforming loan was paid off during the first quarter of 2007, providing an additional \$825,000 in previously unrecognized interest income that would not have otherwise been recognized during 2007, and an enhancement to loan yield of approximately 30 basis points for the six months ended June 30, 2007 and 14 basis points for the year ended December 31, 2007. With market rates of interest declining so rapidly during the past three quarters, deposit repricing has been slow to follow loan repricing, as deposit rate changes tend to lag the market, while floating-rate loans reprice immediately. While deposit rates have declined, the Company continues to experience pricing pressures on deposits, especially money market accounts and time deposits, as increased competition for deposits continues throughout the Company's market area. The Company's average cost of funds was 3.18% for the six months ended June 30, 2008 as compared to 3.91% for the year ended December 31, 2007, and 3.86% for the six months ended June 30, 2007.

Total noninterest income of \$4.1 million reported for the six months ended June 30, 2008 increased \$519,000 or 14.7% as compared to the six months ended June 30, 2007, and was enhanced by \$501,000 in fair value gains recorded on the Company junior subordinated debt pursuant to SFAS No. 159, as well as \$143,000 in shared appreciation income recorded during the first six months of 2008. Noninterest income continues to be driven by customer service fees, which totaled \$2.5 million for the six months ended June 30, 2008, representing an increase of \$157,000 or 6.8% over the \$2.3 million in customer service fees reported for the six months ended June 30, 2007. Customer service fees represented 60.9% and 65.4% of total noninterest income for the six-month periods ended June 30, 2008 and 2007, respectively.

Noninterest expense increased approximately \$1.0 million or 9.7% between the six-month periods ended June 30, 2007 and June 30, 2008. An impairment loss on the Company's core deposit intangible asset related to the Legacy Bank merger totaled \$624,000 or 59.8% of the increase in noninterest expense experienced during the first six months of 2008. Other components of the increase experienced during 2008 were employee salary and benefit costs, including additional employee costs associated with the new financial services department, increased amortization costs for intangible assets, and increased correspondent bank charges. Professional fees declined \$49,000 or 6.4% between the six-month periods ended June 30, 2007 and June 30, 2008 as the result of reductions in corporate legal fees between the two periods.

The Company has maintained a strong, yet conservative balance sheet, with moderate runoff experienced in both loans and deposits during the first six months of 2008. Total assets showed little change, increasing approximately \$1.1 million during the six months ended June 30, 2008, with increases of \$12.7 million in investment securities and interest-bearing deposits in other banks offsetting the decrease in loans. Even with decreased loan volume during 2008, average loans comprised approximately 84% of overall average earning assets during the six months ended June 30, 2008.

Nonperforming assets increased during the quarter ended June 30, 2008 as real estate markets continue to suffer from the mortgage crisis which began during mid-2007. Nonaccrual loans increased \$21.7 million from the balance reported at March 31, 2008, and increased \$22.5 million from the balance reported at December 31, 2007, to a balance of \$44.0 million at June 30, 2008. This increase in nonaccrual loans during the quarter was almost exclusively in construction loans. Most of these nonaccrual loans are collateral dependent and as such do not require large specific

loss reserves at this time. In determining the adequacy of the underlying collateral related to these loans, management monitors trends within specific geographical areas, loan-to-value ratios, appraisals, and other credit issues related to the specific loans. Impaired loans (comprised exclusively of nonaccrual loans at June 30, 2008) increased \$20.0 million during the second quarter of 2008 to a balance of \$40.7 million at June 30, 2008. Other real estate owned through foreclosure increased a moderate \$848,000 between December 31, 2007 and June 30, 2008, as four properties were moved through foreclosure proceedings when all other means of collection failed. One of those foreclosed properties totaling \$1.6 million was subsequently sold during the second quarter of 2008. As a result of these events, nonperforming assets as a percentage of total assets increased from 3.66% at December 31, 2007 to 6.67% at June 30, 2008.

Management continues to monitor economic conditions in the real estate market for signs of further deterioration or improvement which may impact the level of the allowance for loan losses required to cover identified losses in the loan portfolio. Increased charge-offs and additional loan loss provisions made during the six months ended June 30, 2008 impacted earnings to some degree, but the provisions made to the allowance for credit losses, totaling \$265,000 and \$548,000 during the first and second quarters of 2008, respectively, are adequate to cover inherent losses in the loan portfolio.

Deposits decreased by \$75.9 million during the six months ended June 30, 2008, as brokered deposits of \$100,000 or more matured and were replaced with less costly borrowings from the Company's FHLB lines of credit or from the Federal Reserve Discount Window. In total, average core deposits, including NOW accounts, money market accounts, and savings accounts, continue to comprise a high percentage of total interest-bearing liabilities for the six months ended June 30, 2008, as brokered time deposits have been allowed to run off as they matured during 2008. The Company has increasingly utilized its overnight borrowing and other term credit lines, with borrowings totaling \$110.6 million at June 30, 2008 as compared to \$32.3 million at December 31, 2007. In addition, the Company increased its use of FHLB term credit lines during the first six months of 2008, with one-to-two year fixed-rate borrowings totaling \$28.0 million at June 30, 2008, as compared to \$10.0 million in a single two year fixed rate note at December 31, 2007. The average rate of those term borrowings was 3.43% at June 30, 2008 as compared to 4.92% at December 31, 2007, representing a cost reduction of 149 basis points during the first six months of 2008. Overnight borrowings have increased significantly during the second quarter of 2008, as maturing brokered deposits were replaced with less expensive overnight borrowings through the Federal Reserve Discount window. Although the Company has realized significant interest expense reductions by utilizing these overnight borrowings lines, the use of such lines will monitored closely to ensure sound balance sheet management in light of the current economic and credit environment.

The cost of the Company's subordinated debentures issued by USB Capital Trust II has declined as market rates of interest have fallen over the past several quarters. With pricing at 3-month-LIBOR plus 129 basis points, the effective cost of the subordinated debt was 4.08% at June 30, 2008, representing a rate reduction of 191 basis points between December 31, 2007 and June 30, 2008. As a result of interest rate declines experienced during the first six months of 2008, the Company recorded an additional \$501,000 pretax fair value gain on its junior subordinated debt bring the total cumulative gain recorded on the debt to \$2.9 million at June 30, 2008.

The Company continues to emphasize relationship banking and core deposit growth, and has focused greater attention on its market area of Fresno, Madera, and Kern Counties, as well as Campbell, in Santa Clara County. The San Joaquin Valley and other California markets have shown weaker demand for construction lending and commercial lending from small and medium size businesses, as commercial and residential real estate markets declined during 2007 and have remained soft during the first six months of 2008. The first six months of 2008 have presented challenges with tightening credit, weakening real estate markets, and loan losses affecting the loan portfolio.

The Company continually evaluates its strategic business plan as economic and market factors change in its market area. Growth and increasing market share will be of primary importance during 2008 and beyond. The banking industry is currently experiencing continued pressure on net margins as well as asset quality resulting from conditions in the sub-prime real estate market, and a general deterioration in credit markets. As a result, market rates of interest and asset quality will continue be an important factor in the Company's ongoing strategic planning process.

Results of Operations

For the six months ended June 30, 2008, the Company reported net income of \$4.6 million or \$0.39 per share (\$0.39 diluted) as compared to \$6.9 million or \$0.58 per share (\$0.57 diluted) for the six months ended June 30, 2007. The Company's return on average assets was 1.19% for the six-month period ended June 30, 2008 as compared to 1.89% for the six-month period ended June 30, 2007. The Bank's return on average equity was 10.98% for the six months ended June 30, 2008 as compared to 17.42% for the same six-month period of 2007.

Net Interest Income

Net interest income before provision for credit losses totaled \$15.7 million for the six months ended June 30, 2008, representing a decrease of \$2.9 million, or 15.4% when compared to the \$18.6 million reported for the same six months of the previous year. The decrease in net interest income between 2007 and 2008 is primarily the result of

decreased yields on interest-earning assets, which more than offset increases in volumes of earning assets, as well as decreases in the Company's cost of interest-bearing liabilities.

The Bank's net interest margin, as shown in Table 1, decreased to 4.57% at June 30, 2008 from 5.68% at June 30, 2007, a decrease of 111 basis point (100 basis points = 1%) between the two periods. Average market rates of interest have decreased significantly between the six-month periods ended June 30, 2007 and 2008. The prime rate averaged 5.65% for the six months ended June 30, 2008 as compared to 8.25% for the comparative six months of 2007.

Table 1. Distribution of Average Assets, Liabilities and Shareholders' Equity:

Interest rates and Interest Differentials

Six Months Ended June 30, 2008 and 2007

(dollars in thousands)	2008			2007

Interest income as a percentage of average earning assets	7.03%	8.62%
Interest expense as a percentage of average earning assets	2.46%	2.94%
Net interest margin	4.57%	5.68%

(1) Loan amounts include nonaccrual loans, but the related interest income has been included only if collected for the period prior to the loan being placed on a nonaccrual basis. Loan interest income includes loan fees of approximately \$1,876,000 and \$1,557,000 for the six months ended June 30, 2008 and 2007, respectively.

(2) Applicable nontaxable securities yields have not been calculated on a tax-equivalent basis because they are not material to the Company's results of operations.

Both the Company's net interest income and net interest margin are affected by changes in the amount and mix of interest-earning assets and interest-bearing liabilities, referred to as "volume change." Both are also affected by changes in yields on interest-earning assets and rates paid on interest-bearing liabilities, referred to as "rate change". The following table sets forth the changes in interest income and interest expense for each major category of interest-earning asset and interest-bearing liability, and the amount of change attributable to volume and rate changes for the periods indicated.

Table 2. Rate and Volume Analysis

<i>(In thousands)</i>	Increase (decrease) in the three months ended June 30, 2008 compared to June 30, 2007		
	Total	Rate	Volume
Increase (decrease) in interest income:			
Loans and leases	\$ (4,474)	\$ (5,827)	\$ 1,353
Investment securities available for sale	652	423	229
Interest-bearing deposits in other banks	(73)	(23)	(50)
Federal funds sold and securities purchased under agreements to resell	(128)	(45)	(83)
Total interest income	(4,023)	(5,472)	1,449
Increase (decrease) in interest expense:			
Interest-bearing demand accounts	(667)	(441)	(226)
Savings accounts	(172)	(119)	(53)
Time deposits	(528)	(977)	449
Other borrowings	513	(214)	727
Subordinated debentures	(314)	(183)	(131)
Total interest expense	(1,168)	(1,934)	766
Increase (decrease) in net interest income	\$ (2,855)	\$ (3,538)	\$ 683

For the six months ended June 30, 2008, total interest income decreased approximately \$4.0 million, or 14.3% as compared to the six-month period ended June 30, 2007. Earning asset volumes increased almost exclusively in loans, with minor increases experienced in investment securities.

For the six months ended June 30, 2008, total interest expense decreased approximately \$1.2 million, or 12.1% as compared to the six-month period ended June 30, 2007. Between those two periods, average interest-bearing liabilities increased by \$32.5 million, while the average rates paid on these liabilities decreased by 68 basis points.

Provisions for credit losses are determined on the basis of management's periodic credit review of the loan portfolio, consideration of past loan loss experience, current and future economic conditions, and other pertinent factors. Such factors consider the allowance for credit losses to be adequate when it covers estimated losses inherent in the loan portfolio. Based on the condition of the loan portfolio, management believes the allowance is sufficient to cover risk elements in the loan portfolio. For the six months ended June 30, 2008, the provision to the allowance for credit losses amounted to \$813,000 as compared to \$410,000 for the six months ended June 30, 2007. The provision to the allowance for credit losses for the quarter ended June 30, 2008 totaled \$548,000 as compared to \$208,000 for the quarter ended June 30, 2007. The amount provided to the allowance for credit losses during the first six months brought the allowance to 1.91% of net outstanding loan balances at June 30, 2008, as compared to 1.83% of net outstanding loan balances at December 31, 2007, and 1.68% at June 30, 2007.

Noninterest Income**Table 3. Changes in Noninterest Income**

The following table sets forth the amount and percentage changes in the categories presented for the six months ended June 30, 2008 as compared to the six months ended June 30, 2007:

<i>(In thousands)</i>	2008	2007	Amount of Change	Percent Change
Customer service fees	\$ 2,469	\$ 2,312	\$ 157	6.79%
Gain on redemption of securities	24	0	24	—
Gain on sale of OREO	67	23	44	191.30%
Proceeds from bank-owned life insurance	0	219	(219)	-100.00%
Gain (loss) on swap ineffectiveness	9	32	(23)	-71.88%
Gain on fair value of financial liabilities	501	113	388	343.36%
Shared appreciation income	143	24	119	495.83%
Other	841	812	29	3.57%
Total noninterest income	\$ 4,054	\$ 3,535	\$ 519	14.68%

Noninterest income for the six months ended June 30, 2008 increased \$519,000 or 14.7% when compared to the same period of 2007. Net increases in total noninterest income experienced during 2008 were the primarily the result of a fair value gain adjustment totaling \$501,000 on the Company's junior subordinate debt, and shared appreciation income of \$143,000 recognized during 2008. Customer service fees increased \$157,000 or 6.8% between the two six-month periods presented, which is attributable in part to increases in revenues from the Company's newly acquired financial services department, as well as increases in NSF fees, which were partially offset by declines in ATM fees. Proceeds from bank-owned life insurance decreased \$219,000 between the six months ended June 30, 2007 and June 30, 2008 as the result of an employee death-benefit payment received during 2007 that did not again occur during 2008.

Noninterest Expense

The following table sets forth the amount and percentage changes in the categories presented for the six months ended June 30, 2008 as compared to the six months ended June 30, 2007:

Table 4. Changes in Noninterest Expense

<i>(In thousands)</i>	2008	2007	Amount of Change	Percent Change
Salaries and employee benefits	\$ 5,745	\$ 5,482	\$ 263	4.80%
Occupancy expense	1,960	1,740	220	12.64%
Data processing	149	236	(87)	-38.86%
Professional fees	717	766	(49)	-6.40%
Directors fees	131	128	3	2.34%
Amortization of intangibles	535	462	73	15.80%
Correspondent bank service charges	226	205	21	10.24%
Impairment loss on core deposit intangible	624	0	624	—
Loss on California tax credit partnership	216	217	(1)	-0.46%
Write-down on OREO	31	0	31	
OREO expense	80	75	5	6.67%
Other	1,346	1,406	(60)	-4.27%
Total expense	\$ 11,760	\$ 10,717	\$ 1,043	9.73%

Increases in noninterest expense between the six months ended June 30, 2007 and 2008 are associated primarily with normal continued growth of the Company, including additional staffing costs, and costs associated, in part, with the new financial services department located in Fresno, California. Amortization expense of intangible assets increased \$73,000 between the six months ended June 30, 2007 and June 30, 2008 as the result of core deposit intangible assets originating from the Legacy Bank merger during February 2007. During the first quarter of 2008, the Company recorded an impairment loss of \$624,000 on the core deposit intangible related to the Legacy Bank merger.

The Company recognized stock-based compensation expense of \$61,000 and \$93,000 for the six months ended June 30, 2008 and 2007, respectively. This expense is included in noninterest expense under salaries and employee benefits. The Company expects stock-based compensation expense to be about \$29,000 per quarter during the remainder of 2008. Under the current pool of stock options, stock-based compensation expense will decline to approximately \$17,000 per quarter during 2009, then to \$8,000 per quarter for 2010, and decline after that through 2011. If new stock options are issued, or existing options fail to vest, for example, due to unexpected forfeitures, actual stock-based compensation expense in future periods will change.

Income Taxes

On December 31, 2003, the California Franchise Tax Board (FTB) announced certain tax transactions related to real estate investment trusts (REITs) and regulated investment companies (RICs) will be disallowed pursuant to Senate Bill 614 and Assembly Bill 1601, which were signed into law in the 4th quarter of 2003. As a result, the Company reversed related net state tax benefits recorded in the first three quarters of 2003 and has taken no related tax benefits since that time. The Company continues to review the information available from the FTB and its financial advisors and believes that the Company's position has merit. The Company will pursue its tax claims and defend its use of these entities and transactions. At this time, the Company cannot predict the ultimate outcome.

During the first quarter of 2005, the FTB notified the Company of its intent to audit the REIT for the tax years ended December 2001 and 2002. The Company has retained legal counsel to represent it in the tax audit, and counsel has provided the FTB with documentation supporting the Company's position. The FTB concluded its audit during January 2006. During April 2006, the FTB issued a Notice of Proposed Assessment to the Company, which included proposed tax and penalty assessments related to the tax benefits taken for the REIT during 2002. The Company still believes the case has merit based upon the fact that the FTB is ignoring certain facts of law in the case. The issuance of the Notice of Proposed Assessment by the FTB will not end the administrative processing of the REIT issue because the Company has asserted its administrative protest and appeal rights pending the outcome of litigation by another taxpayer presently in process on the REIT issue in the Los Angeles Superior Court (City National v. Franchise Tax Board). The case is ongoing and may take several years to complete.

On January 1, 2007 the Company adopted Financial Accounting Standards Board (FASB) Interpretation 48 (FIN 48), "Accounting for Uncertainty in Income Taxes: an interpretation of FASB Statement No. 109". FIN 48 clarifies SFAS No. 109, "Accounting for Income Taxes", to indicate a criterion that an individual tax position would have to meet for some or all of the income tax benefit to be recognized in a taxable entity's financial statements. Under the guidelines of FIN48, an entity should recognize the financial statement benefit of a tax position if it determines that it is *more likely than not* that the position will be sustained on examination. The term "more likely than not" means a likelihood of more than 50 percent." In assessing whether the more-likely-than-not criterion is met, the entity should assume that the tax position will be reviewed by the applicable taxing authority.

The Company has reviewed its REIT tax position as of January 1, 2007 (adoption date), and then again each subsequent quarter since the adoption of FIN48. The Bank, with guidance from advisors believes that the case has merit with regard to points of law, and that the tax law at the time allowed for the deduction of the consent dividend. However, the Bank, with the concurrence of advisors, cannot conclude that it is "more than likely" (as defined in FIN48) that the Bank will prevail in its case with the FTB. As a result of this determination, effective January 1, 2007 the Company recorded an adjustment of \$1.3 million to beginning retained earnings upon adoption of FIN48 to recognize the potential tax liability under the guidelines of the interpretation. The adjustment includes amounts for assessed taxes, penalties, and interest. Since the adoption of FIN48 on January 1, 2007, the Company has increased the unrecognized tax liability by an additional \$109,000 in interest \$87,000 during 2007 and \$43,000 during the first six months of 2008, bringing the total recorded tax liability under FIN48 to \$1.4 million at June 30, 2008. It is the Company's policy to recognize interest and penalties under FIN48 as a component of income tax expense. The Company has reviewed all of its tax positions as of June 30, 2008, and has determined that, other than the REIT, there are no other material amounts that should be recorded under the guidelines of FIN48.

Financial Condition

Total assets increased \$1.1 million, or 0.15% to a balance of \$772.9 million at June 30, 2008, from the balance of \$771.7 million at December 31, 2007, and increased \$549,000 or 0.07% from the balance of \$772.3 million at June 30, 2007. Total deposits of \$558.7 million at June 30, 2008 decreased \$75.9 million, or 11.97% from the balance reported at December 31, 2007, and decreased \$82.5 million from the balance of \$641.2 million reported at June 30, 2007. Between December 31, 2007 and June 30, 2008, loans declined \$9.1 million, or 1.52% to a balance of \$589.1 million, while investment securities increased by \$8.8 million, or 9.89%.

Earning assets averaged approximately \$691.2 million during the six months ended June 30, 2008, as compared to \$659.8 million for the same six-month period of 2007. Average interest-bearing liabilities increased to \$535.8 million for the six months ended June 30, 2008, as compared to \$503.3 million for the comparative six-month period of 2007.

Loans and Leases

The Company's primary business is that of acquiring deposits and making loans, with the loan portfolio representing the largest and most important component of its earning assets. Loans totaled \$589.1 million at June 30, 2008, a decrease of \$9.1 million or 1.52% when compared to the balance of \$598.2 million at December 31, 2007, and a decrease of \$1.2 million or 0.20% when compared to the balance of \$590.3 million reported at June 30, 2007. Loans on average increased \$29.1 million or 5.27% between the six-month periods ended June 30, 2007 and June 30, 2008, with loans averaging \$581.8 million for the six months ended June 30, 2008, as compared to \$552.7 million for the same six-month period of 2007.

During the first six months of 2008, decreases were experienced in all loan categories except commercial and industrial, and agricultural loans, with the strongest decline experienced in real estate construction lending as a result of declines in new home sales within the Company's market area. The following table sets forth the amounts of loans outstanding by category at June 30, 2008 and December 31, 2007, the category percentages as of those dates, and the net change between the two periods presented.

Table 5. Loans

<i>(In thousands)</i>	June 30, 2008		December 31, 2007		Net Change	% Change
	Dollar Amount	% of Loans	Dollar Amount	% of Loans		
Commercial and industrial	\$ 220,547	37.4%	\$ 204,385	34.2%	\$ 16,162	7.91%
Real estate – mortgage	136,775	23.2%	142,565	23.8%	(5,790)	-4.06%
Real estate – construction	155,046	26.4%	178,296	29.8%	(23,250)	-13.04%
Agricultural	51,890	8.8%	46,055	7.7%	5,835	12.67%
Installment/other	17,203	2.9%	18,171	3.0%	(968)	-5.33%
Lease financing	7,643	1.3%	8,748	1.5%	(1,105)	-12.63%
Total Gross Loans	\$ 589,104	100.0%	\$ 598,220	100.0%	\$ (9,116)	-1.52%

The overall average yield on the loan portfolio was 7.41% for the six months ended June 30, 2008, as compared to 9.45% for the six months ended June 30, 2007, and decreased between the two periods primarily as the result of a decline in average market rates of interest between the two periods. Loan yields declined, in part, as the result of the reversal of approximately \$585,000 in interest income on nonaccrual loans during the six months ended June 30, 2008, which reduced loan yield by approximately 0.20% during the period. The loan yield realized during the first six months of 2007 was enhanced to some degree as the result of a nonperforming loan that was paid off during the quarter, providing an additional \$825,000 in previously unrecognized interest income, and an increase in loan yield for the first six months of 2007 of approximately 0.30%. At June 30, 2008, 62.1% of the Company's loan portfolio consisted of floating rate instruments, as compared to 62.2% of the portfolio at December 31, 2007, with the majority of those tied to the prime rate.

Deposits

Total deposits decreased during the period to a balance of \$558.7 million at June 30, 2008 representing a decrease of \$75.9 million, or 11.97% from the balance of \$634.6 million reported at December 31, 2007, and a decrease of \$82.5 million, or 12.87% from the balance reported at June 30, 2007. During the first six months of 2008, decreases were experienced primarily in time deposits of \$100,000 or more, with minor declines in noninterest bearing deposits. Increases were experienced in NOW and money market accounts, savings accounts, and time deposits of less than \$100,000. The decline of \$105.0 million in time deposits of \$100,000 or more experienced during the first six months of 2008 was primarily in brokered deposits, as maturing brokered deposits were replaced with less expensive overnight and short-term borrowings.

The following table sets forth the amounts of deposits outstanding by category at June 30, 2008 and December 31, 2007, and the net change between the two periods presented.

Table 6. Deposits

<i>(In thousands)</i>	June 30, 2008	December 31, 2007	Net Change	Percentage Change
Noninterest bearing deposits	\$ 134,663	\$ 139,066	\$ (4,403)	-3.17%
Interest bearing deposits:				
NOW and money market accounts	180,540	153,717	26,823	17.45%
Savings accounts	42,001	40,012	1,989	4.97%
Time deposits:				
Under \$100,000	56,966	52,297	4,669	8.93%
\$100,000 and over	144,502	249,525	(105,023)	-42.09%

Edgar Filing: UNITED SECURITY BANCSHARES - Form 10-Q

Total interest bearing deposits	424,009	495,551	(71,542)	-14.44%
Total deposits	\$ 558,672	\$ 634,617	\$ (75,945)	-11.97%

26

The Company's deposit base consists of two major components represented by noninterest-bearing (demand) deposits and interest-bearing deposits. Interest-bearing deposits consist of time certificates, NOW and money market accounts and savings deposits. Total interest-bearing deposits decreased \$71.5 million, or 14.44% between December 31, 2007 and June 30, 2008, while noninterest-bearing deposits decreased \$4.4 million, or 3.17% between the same two periods presented. Core deposits, consisting of all deposits other than time deposits of \$100,000 or more, and brokered deposits, continue to provide the foundation for the Company's principal sources of funding and liquidity. These core deposits amounted to 71.7% and 59.9% of the total deposit portfolio at March 31, 2008 and December 31, 2007, respectively.

On a year-to-date average (refer to Table 1), the Company experienced a decrease of \$9.8 million or 1.58% in total deposits between the six-month periods ended June 30, 2007 and June 30, 2008. Between these two periods, average interest-bearing deposits decreased \$8.1 million or 1.70%, while total noninterest-bearing checking decreased \$1.7 million or 1.18% on a year-to-date average basis.

Short-Term Borrowings

The Company had collateralized and uncollateralized lines of credit aggregating \$331.1 million, as well as FHLB lines of credit totaling \$36.8 million at June 30, 2008. These lines of credit generally have interest rates tied to the Federal Funds rate or are indexed to short-term U.S. Treasury rates or LIBOR. All lines of credit are on an "as available" basis and can be revoked by the grantor at any time. At June 30, 2008, the Company had \$32.0 million borrowed against its FHLB lines of credit. Of the \$32.0 million in FHLB borrowings outstanding at June 30, 2008, \$4.0 million was in overnight borrowings, and the other \$28.0 million consists of a various FHLB term-advances (summarized in table below.) The Company had collateralized and uncollateralized lines of credit aggregating \$386.7 million, as well as FHLB lines of credit totaling \$22.0 million at December 31, 2007.

FHLB term borrowings at June 30, 2008 (in 000's):

Term	Balance at 6/30/08	Rate	Maturity
1 year	\$ 7,000	2.51%	2/11/09
2 year	10,000	4.92%	3/30/09
2 year	11,000	2.67%	2/11/10
	\$ 28,000	3.43%	

Asset Quality and Allowance for Credit Losses

Lending money is the Company's principal business activity, and ensuring appropriate evaluation, diversification, and control of credit risks is a primary management responsibility. Implicit in lending activities is the fact that losses will be experienced and that the amount of such losses will vary from time to time, depending on the risk characteristics of the loan portfolio as affected by local economic conditions and the financial experience of borrowers.

The allowance for credit losses is maintained at a level deemed appropriate by management to provide for known and inherent risks in existing loans and commitments to extend credit. The adequacy of the allowance for credit losses is based upon management's continuing assessment of various factors affecting the collectibility of loans and commitments to extend credit; including current economic conditions, past credit experience, collateral, and concentrations of credit. There is no precise method of predicting specific losses or amounts which may ultimately be charged off on particular segments of the loan portfolio. The conclusion that a loan may become uncollectible, either in part or in whole is judgmental and subject to economic, environmental, and other conditions which cannot be predicted with certainty. When determining the adequacy of the allowance for credit losses, the Company follows, in accordance with GAAP, the guidelines set forth in the Revised Interagency Policy Statement on the Allowance for

Loan and Lease Losses (“Statement”) issued by banking regulators during December 2006. The Statement is a revision of the previous guidance released in July 2001, and outlines characteristics that should be used in segmentation of the loan portfolio for purposes of the analysis including risk classification, past due status, type of loan, industry or collateral. It also outlines factors to consider when adjusting the loss factors for various segments of the loan portfolio, and updates previous guidance that describes the responsibilities of the board of directors, management, and bank examiners regarding the allowance for credit losses. Securities and Exchange Commission Staff Accounting Bulletin No. 102 was released during July 2001, and represents the SEC staff’s view relating to methodologies and supporting documentation for the Allowance for Loan and Lease Losses that should be observed by all public companies in complying with the federal securities laws and the Commission’s interpretations. It is also generally consistent with the guidance published by the banking regulators. The Company segments the loan and lease portfolio into eleven (11) segments, primarily by loan class and type, that have homogeneity and commonality of purpose and terms for analysis under SFAS No. 5. Those loans, which are determined to be impaired under SFAS No. 114, are not subject to the general reserve analysis under SFAS No. 5, and evaluated individually for specific impairment.

The Company's methodology for assessing the adequacy of the allowance for credit losses consists of several key elements, which include:

- the formula allowance,
- specific allowances for problem graded loans ("classified loans")
- and the unallocated allowance

In addition, the allowance analysis also incorporates the results of measuring impaired loans as provided in:

- Statement of Financial Accounting Standards ("SFAS") No. 114, "Accounting by Creditors for Impairment of a Loan" and
- SFAS 118, "Accounting by Creditors for Impairment of a Loan - Income Recognition and Disclosures."

The formula allowance is calculated by applying loss factors to outstanding loans and certain unfunded loan commitments. Loss factors are based on the Company's historical loss experience and on the internal risk grade of those loans and, may be adjusted for significant factors that, in management's judgment, affect the collectibility of the portfolio as of the evaluation date. Management determines the loss factors for problem graded loans (substandard, doubtful, and loss), special mention loans, and pass graded loans, based on a loss migration model. The migration analysis incorporates loan losses over the past twelve quarters (three years) and loss factors are adjusted to recognize and quantify the loss exposure from changes in market conditions and trends in the Company's loan portfolio. For purposes of this analysis, loans are grouped by internal risk classifications, which are "pass", "special mention", "substandard", "doubtful", and "loss". Certain loans are homogenous in nature and are therefore pooled by risk grade. These homogenous loans include consumer installment and home equity loans. Special mention loans are currently performing but are potentially weak, as the borrower has begun to exhibit deteriorating trends, which if not corrected, could jeopardize repayment of the loan and result in further downgrade. Substandard loans have well-defined weaknesses which, if not corrected, could jeopardize the full satisfaction of the debt. A loan classified as "doubtful" has critical weaknesses that make full collection of the obligation improbable. Classified loans, as defined by the Company, include loans categorized as substandard, doubtful, and loss.

Specific allowances are established based on management's periodic evaluation of loss exposure inherent in classified loans, impaired loans, and other loans in which management believes there is a probability that a loss has been incurred in excess of the amount determined by the application of the formula allowance.

The unallocated portion of the allowance is based upon management's evaluation of various conditions that are not directly measured in the determination of the formula and specific allowances. The conditions may include, but are not limited to, general economic and business conditions affecting the key lending areas of the Company, credit quality trends, collateral values, loan volumes and concentrations, and other business conditions.

The following table summarizes the specific allowance, formula allowance, and unallocated allowance at June 30, 2008 and December 31, 2007.

(in 000's)	Balance June 30, 2008	Balance December 31, 2007
Specific allowance - impaired loans	\$ 4,169	\$ 4,452
Specific allowance - other than impaired loans	2,960	\$ 2,459
Total specific allowance	7,129	6,911
Formula allowance	4,094	3,990
Unallocated allowance	0	0
Total allowance	\$ 11,223	\$ 10,901

Although impaired loans increased approximately \$20.0 million between December 31, 2007 and June 30, 2008, the specific allowance related to impaired loans actually decreased during the period because the majority of impaired loans were adequately collateralized (see discussion of impaired loans following). The specific allowance related to loans that are not impaired (including special mention and substandard) increased approximately \$501,000 between December 31, 2007 and June 30, 2008 as the result of minor increases in the volume of substandard and special mention loans, as well as minor increases in adjusting factors for current economic trends and conditions, and trends in delinquent and nonaccrual loans. Even though the level of "pass" loans decreased during the six-month period ended June 30, 2008, the related formula allowance increased approximately \$104,000 as a result of an increase in commercial and industrial loans which have a higher percentage loss allocation, as well as factor allocation increases due to current economic conditions.

The Company's methodology includes features that are intended to reduce the difference between estimated and actual losses. The specific allowance portion of the analysis is designed to be self-correcting by taking into account the current loan loss experience based on that portion of the portfolio. By analyzing the probable estimated losses inherent in the loan portfolio on a quarterly basis, management is able to adjust specific and inherent loss estimates using the most recent information available. In performing the periodic migration analysis, management believes that historical loss factors used in the computation of the formula allowance need to be adjusted to reflect current changes in market conditions and trends in the Company's loan portfolio. There are a number of other factors which are reviewed when determining adjustments in the historical loss factors. They include 1) trends in delinquent and nonaccrual loans, 2) trends in loan volume and terms, 3) effects of changes in lending policies, 4) concentrations of credit, 5) competition, 6) national and local economic trends and conditions, 7) experience of lending staff, 8) loan review and Board of Directors oversight, 9) high balance loan concentrations, and 10) other business conditions. During the first six months of 2008, there were no changes in estimation methods or assumptions that affected the methodology for assessing the adequacy of the allowance for credit losses.

Management and the Company's lending officers evaluate the loss exposure of classified and impaired loans on a weekly/monthly basis and through discussions and officer meetings as conditions change. The Company's Loan Committee meets weekly and serves as a forum to discuss specific problem assets that pose significant concerns to the Company, and to keep the Board of Directors informed through committee minutes. All special mention and classified loans are reported quarterly on Criticized Asset Reports which are reviewed by senior management. With this information, the migration analysis and the impaired loan analysis are performed on a quarterly basis and adjustments are made to the allowance as deemed necessary.

Impaired loans are calculated under SFAS No. 114, and are measured based on the present value of the expected future cash flows discounted at the loan's effective interest rate or the fair value of the collateral if the loan is collateral dependent. The amount of impaired loans is not directly comparable to the amount of nonperforming loans disclosed later in this section. The primary differences between impaired loans and nonperforming loans are: i) all loan categories are considered in determining nonperforming loans while impaired loan recognition is limited to commercial and industrial loans, commercial and residential real estate loans, construction loans, and agricultural loans, and ii) impaired loan recognition considers not only loans 90 days or more past due, restructured loans and nonaccrual loans but also may include problem loans other than delinquent loans.

The Company considers a loan to be impaired when, based upon current information and events, it believes it is probable the Company will be unable to collect all amounts due according to the contractual terms of the loan agreement. Impaired loans include nonaccrual loans, restructured debt, and performing loans in which full payment of principal or interest is not expected. Management bases the measurement of these impaired loans on the fair value of the loan's collateral or the expected cash flows on the loans discounted at the loan's stated interest rates. Cash receipts on impaired loans not performing to contractual terms and that are on nonaccrual status are used to reduce principal balances. Impairment losses are included in the allowance for credit losses through a charge to the provision, if applicable.

At June 30, 2008 and 2007, the Company's recorded investment in loans for which impairment has been recognized totaled \$40.7 million and \$17.9 million, respectively. Included in total impaired loans at June 30, 2008, are \$8.5 million of impaired loans for which the related specific allowance is \$4.2 million, as well as \$32.2 million of impaired loans that as a result of write-downs or the fair value of the collateral, did not have a specific allowance. Total impaired loans at June 30, 2007 included \$14.3 million of impaired loans for which the related specific allowance is \$5.1 million, as well as \$3.6 million of impaired loans that, as a result of write-downs or the fair value of the collateral, did not have a specific allowance. The average recorded investment in impaired loans was \$25.8 million during the first six months of 2008 and \$12.0 million during the first six months of 2007. In most cases, the Company uses the cash basis method of income recognition for impaired loans. In the case of certain troubled debt restructuring, for which the loan is performing under the current contractual terms, income is recognized under the accrual method.

For the six months ended June 30, 2008 and 2007, the Company recognized no income on such loans.

As with nonaccrual loans, the greatest increase in impaired loans during the six months ended June 30, 2008 has been in real estate construction loans, with that loan category comprising nearly 69% of total impaired loans at June 30, 2008. Because construction loans are generally collateral dependent and the related collateral is considered adequate to cover the loan's carrying value, the specific reserve related to impaired construction loans has actually decreased since December 31, 2007. Specific collateral related to impaired loans is reviewed for current appraisal information, economic trends within geographic markets, loan-to-value ratios, and other factors that may impact the value of the loan collateral. Adjustments are made to collateral values as needed for these factors. Of total impaired loans, approximately \$33.7 million or 82.8% are secured by real estate, and \$32.7 million of total impaired loans are for the purpose of residential construction, residential and commercial acquisition and development, and land development. Residential construction loans are made for the purpose of building residential 1-4 single family homes. Residential and commercial acquisition and development loans are made for the purpose of purchasing land, and developing that land if required, and to develop real estate or commercial construction projects on those properties. Land development loans are made for the purpose of converting raw land into construction-ready building sites. The following table summarizes the components of impaired loans and their related specific reserves at June 30, 2008 and December 31, 2007.

(in 000's)	Balance June 30, 2008	Reserve June 30, 2008	Balance December 31, 2007	Reserve December 31, 2007
Commercial and industrial	\$ 6,714	\$ 326	\$ 7,617	\$ 339
Real estate - mortgage	600	0	0	0
Real estate - construction	27,996	275	7,474	598
Agricultural	0	0	0	0
Installment/other	0	0	0	0
Lease financing	5,425	3,568	5,536	3,516
Total	\$ 40,735	\$ 4,169	\$ 20,627	\$ 4,453

Of the \$28.0 million in impaired construction loans shown above, approximately \$14.5 million or 51.8% are for residential construction, \$4.0 million or 14.2% are for residential acquisition and development, and another \$9.5 million or 34.0% are for land development. Of the \$6.7 million in impaired commercial and industrial loans, nearly \$3.5 million or 51.3% are for land development. Geographically, the \$32.7 million in impaired loans made for the purpose of residential construction, residential and commercial acquisition and development, and land development, are disbursed throughout a wide area of California, with only about 20.8% of those loans within Fresno, Madera, Kern, and Santa Clara Counties. The following table summarizes the impaired loan balances by county of loans made for the purpose of residential construction, residential and commercial acquisition and development, and land development.

County:	Impaired	
	Balance (000's)	Percentage
Fresno	\$ 2,441	7.47%
Madera	297	0.91%
Kern	215	0.66%
Santa Clara	3,859	11.80%
Alpine	7,973	24.38%

30

The Company focuses on competition and other economic conditions within its market area and other geographical areas in which it does business, which may ultimately affect the risk assessment of the portfolio. The Company continues to experience increased competition from major banks, local independents and non-bank institutions creating pressure on loan pricing. With interest rates decreasing 100 basis points during the fourth quarter of 2007, and another 225 basis points during the first six months of 2008, indications are that the economy will continue to suffer in the near future as a result of sub-prime lending problems, a weakened real estate market, and tight credit markets. Both business and consumer spending have showed signs of slowing during the past several quarters, and current GDP projections for the next year have softened. It is difficult to determine to what degree the Federal Reserve will adjust short-term interest rates in its efforts to influence the economy. It is likely that the business environment in California will continue to be influenced by these domestic as well as global events. The local market has remained more stable economically during the past several years than other areas of the state and the nation, which have experienced more volatile economic trends, including significant softening of residential real estate markets. Although the local area residential housing markets have softened to some degree, they continue to perform better than other parts of the state, which should bode well for sustained, but slower growth in the Company's market areas of Fresno and Madera, Kern, and Santa Clara Counties. Local unemployment rates in the San Joaquin Valley remain high primarily as a result of the areas' agricultural dynamics, however unemployment rates have improved during the past several years. It is difficult to predict what impact this will have on the local economy. The Company believes that the Central San Joaquin Valley will continue to grow and diversify as property and housing costs remain reasonable relative to other areas of the state. Management recognizes increased risk of loss due to the Company's exposure from local and worldwide economic conditions, as well as potentially volatile real estate markets, and takes these factors into consideration when analyzing the adequacy of the allowance for credit losses.

The following table provides a summary of the Company's allowance for possible credit losses, provisions made to that allowance, and charge-off and recovery activity affecting the allowance for the periods indicated.

Table 7. Allowance for Credit Losses - Summary of Activity (unaudited)

<i>(In thousands)</i>	June 30, 2008	June 30, 2007
Total loans outstanding at end of period before deducting allowances for credit losses	\$ 587,655	\$ 589,030
Average net loans outstanding during period	581,835	552,701
Balance of allowance at beginning of period	10,901	8,365
Loans charged off:		
Real estate	(288)	0
Commercial and industrial	(60)	(70)
Lease financing	(186)	(3)
Installment and other	(30)	(95)
Total loans charged off	(564)	(168)
Recoveries of loans previously charged off:		
Real estate	0	0
Commercial and industrial	68	17
Lease financing	1	0
Installment and other	4	13
Total loan recoveries	73	30
Net loans charged off	(491)	(138)
Provision charged to operating expense	813	410
Reserve acquired in business combination	0	1,268

Balance of allowance for credit losses at end of period	\$	11,223	\$	9,905
Net loan charge-offs to total average loans (annualized)		0.17%		0.05%
Net loan charge-offs to loans at end of period (annualized)		0.17%		0.05%
Allowance for credit losses to total loans at end of period		1.91%		1.68%
Net loan charge-offs to allowance for credit losses (annualized)		8.80%		2.81%
Net loan charge-offs to provision for credit losses (annualized)		60.39%		33.66%

At June 30, 2008 and 2007, \$426,000 and \$593,000, respectively, of the formula allowance is allocated to unfunded loan commitments and is, therefore, carried separately in other liabilities. Management believes that the 1.91% credit loss allowance at June 30, 2008 is adequate to absorb known and inherent risks in the loan portfolio. No assurance can be given, however, that the economic conditions which may adversely affect the Company's service areas or other circumstances will not be reflected in increased losses in the loan portfolio.

It is the Company's policy to discontinue the accrual of interest income on loans for which reasonable doubt exists with respect to the timely collectibility of interest or principal due to the ability of the borrower to comply with the terms of the loan agreement. Such loans are placed on nonaccrual status whenever the payment of principal or interest is 90 days past due or earlier when the conditions warrant, and interest collected is thereafter credited to principal to the extent necessary to eliminate doubt as to the collectibility of the net carrying amount of the loan. Management may grant exceptions to this policy if the loans are well secured and in the process of collection.

Table 8. Nonperforming Assets

<i>(In thousands)</i>	June 30, 2008	December 31, 2007
Nonaccrual Loans	\$ 44,049	\$ 21,583
Restructured Loans	12	23
Total nonperforming loans	44,061	21,606
Other real estate owned	7,514	6,666
Total nonperforming assets	\$ 51,575	\$ 28,272
Loans past due 90 days or more, still accruing	\$ 1,222	\$ 189
Nonperforming loans to total gross loans	7.48%	3.61%
Nonperforming assets to total gross loans	8.75%	4.73%

Non-performing assets have increased between December 31, 2007 and June 30, 2008 as declines in real estate markets and related sectors experienced during the second half of 2007 resulting from sub-prime lending problems; continue to impact credit markets and the general economy during 2008. Nonaccrual loans increased \$22.5 million between December 31, 2007 and June 30, 2008, with construction loans comprising approximately 67% of total nonaccrual loans at June 30, 2008, and commercial and industrial loans comprising another 17%. The following table summarizes the nonaccrual totals by loan category for the periods shown.

	Balance June 30, 2008	Balance March 31, 2008	Balance December 31, 2007	Change from March 31, 2008	Change from December 31, 2007
Nonaccrual Loans (in 000's):					
Commercial and industrial	\$ 7,849	\$ 6,727	\$ 6,372	\$ 1,122	\$ 1,477
Real estate - mortgage	1,027	428	428	599	599
Real estate - construction	29,571	7,974	7,548	21,597	22,023
Agricultural	0	1,633	1,684	(1,633)	(1,684)
Installment/other	12	9	3	3	9
Lease financing	5,590	5,539	5,548	51	42
Total Nonaccrual Loans	\$ 44,049	\$ 22,310	\$ 21,583	\$ 21,739	\$ 22,466

Increases in nonaccrual construction loans are the result of a significant slowdown in new housing starts and the resultant depreciation in land, and both partially completed and completed construction projects. As with impaired loans, a large percentage of nonaccrual loans were made for the purpose of residential construction, residential and commercial acquisition and development, and land development. The following table summarizes nonaccrual balances by purpose at June 30, 2008.

<i>(in 000's)</i>	June 30, 2008
Residential construction	\$ 14,960
Residential and commercial acquisition and development	4,189
Land development	16,478

Other purposes	8,422
Total nonaccrual loans	\$ 44,049

During the six months ended June 30, 2008, four loans totaling approximately \$2.5 million were transferred from nonaccrual status to other real estate owned. Non-performing assets totaled 8.75% of total loans at June 30, 2008 as compared to 4.73% of total loans at December 31, 2007.

The Company purchased a schedule of payments collateralized by Surety Bonds and lease payments in September 2001 that have a current balance owing of \$5.4 million plus interest. The leases have been nonperforming since June 2002 (see “*Asset Quality and Allowance for Credit Losses*” section of *Management’s Discussion and Analysis of Financial Condition and Results of Operations* contained in the Company’s 2007 Annual Report on Form 10-K). The impaired lease portfolio is on non-accrual status and has a specific allowance allocation of \$3.6 million and \$3.5 million allocated at June 30, 2008 and December 31, 2007, respectively, and a net carrying value of \$1.9 million and \$2.0 million at June 30, 2008 and December 31, 2007, respectively. The specific allowance was determined based on an estimate of expected future cash flows.

The Company believes that under generally accepted accounting principles a total loss of principal is not probable, and the specific allowance of \$3.6 million calculated for the impaired lease portfolio at June 30, 2008 under SFAS No. 114 is in accordance with generally accepted accounting principles.

Loans past due more than 30 days are receiving increased management attention and are monitored for increased risk. The Company continues to move past due loans to nonaccrual status in its ongoing effort to recognize loan problems at an earlier point in time when they may be dealt with more effectively. As impaired loans, nonaccrual and restructured loans are reviewed for specific reserve allocations and the allowance for credit losses is adjusted accordingly.

Except for the loans included in the above table, or those otherwise included in the impaired loan totals, there were no loans at June 30, 2008 where the known credit problems of a borrower caused the Company to have serious doubts as to the ability of such borrower to comply with the present loan repayment terms and which would result in such loan being included as a nonaccrual, past due, or restructured loan at some future date.

Asset/Liability Management – Liquidity and Cash Flow

The primary function of asset/liability management is to provide adequate liquidity and maintain an appropriate balance between interest-sensitive assets and interest-sensitive liabilities.

Liquidity

Liquidity management may be described as the ability to maintain sufficient cash flows to fulfill financial obligations, including loan funding commitments and customer deposit withdrawals, without straining the Company’s equity structure. To maintain an adequate liquidity position, the Company relies on, in addition to cash and cash equivalents, cash inflows from deposits and short-term borrowings, repayments of principal on loans and investments, and interest income received. The Company’s principal cash outflows are for loan origination, purchases of investment securities, depositor withdrawals and payment of operating expenses.

The Company continues to emphasize liability management as part of its overall asset/liability strategy. Through the discretionary acquisition of short term borrowings, the Company has been able to provide liquidity to fund asset growth while, at the same time, better utilizing its capital resources, and better controlling interest rate risk. The borrowings are generally short-term and more closely match the repricing characteristics of floating rate loans, which comprise approximately 62.1% of the Company’s loan portfolio at June 30, 2008. This does not preclude the Company from selling assets such as investment securities to fund liquidity needs but, with favorable borrowing rates, the Company has maintained a positive yield spread between borrowed liabilities and the assets which those liabilities fund. If, at some time, rate spreads become unfavorable, the Company has the ability to utilize an asset management approach and, either control asset growth or, fund further growth with maturities or sales of investment securities.

The Company’s liquid asset base which generally consists of cash and due from banks, federal funds sold, securities purchased under agreements to resell (“reverse repos”) and investment securities, is maintained at a level deemed

sufficient to provide the cash outlay necessary to fund loan growth as well as any customer deposit runoff that may occur. Additional liquidity requirements may be funded with overnight or term borrowing arrangements with various correspondent banks, FHLB and the Federal Reserve Bank. At June 30, 2008, the Company had available secured and unsecured borrowing lines of credit totaling \$234.0 million. Within this framework is the objective of maximizing the yield on earning assets. This is generally achieved by maintaining a high percentage of earning assets in loans, which historically have represented the Company's highest yielding asset. At June 30, 2008, the Bank had 74.6% of total assets in the loan portfolio and a loan to deposit ratio of 105.2%, as compared to 75.9% of total assets in the loan portfolio and a loan to deposit ratio of 94.0% at December 31, 2007. Liquid assets at June 30, 2008 include cash and cash equivalents totaling \$23.4 million as compared to \$25.3 million at December 31, 2007. Other sources of liquidity include collateralized and uncollateralized lines of credit from other banks, the Federal Home Loan Bank, and from the Federal Reserve Bank totaling \$334.8 million at June 30, 2008.

The liquidity of the parent company, United Security Bancshares, is primarily dependent on the payment of cash dividends by its subsidiary, United Security Bank, subject to limitations imposed by the Financial Code of the State of California. During the six months ended June 30, 2008, dividends paid by the Bank to the parent company totaled \$4.3 million dollars.

Cash Flow

Cash and cash equivalents have declined during the two six-month periods ended June 30, 2007 and 2008 with period-end balances as follows (*from Consolidated Statements of Cash Flows – in 000's*):

	Balance
December 31, 2006	\$ 43,068
June 30, 2007	\$ 26,566
December 31, 2007	\$ 25,300
June 30, 2008	\$ 23,429

Cash and cash equivalents decreased \$1.9 million during the six months ended June 30, 2008, as compared to a decrease of \$16.5 million during the six months ended June 30, 2007.

The Company has maintained positive cash flows from operations, which amounted to \$7.2 million, and \$8.1 million for the six months ended June 30, 2008, and June 30, 2007, respectively. The Company experienced net cash outflows from investing activities totaling \$7.6 million during the six months ended June 30, 2008, as purchases of investment securities exceeded net loan payoffs and maturities of investment securities during the period. The Company experienced net cash outflows from investing activities totaling \$21.0 million during the six months ended June 30, 2007 as loan growth exceeded net maturities of investment securities and other sources from investing activities during that six-month period.

Net cash flows from financing activities, including deposit growth and borrowings, have traditionally provided funding sources for loan growth, but as a result of planned runoff in brokered time deposits during the first six months of 2008, the Company experienced net cash outflows totaling \$1.2 million as declines in time deposit accounts exceeded growth in other deposit and financing categories, including borrowings. The Company has the ability to decrease loan growth, increase deposits and borrowings, or a combination of both to manage balance sheet liquidity.

Regulatory Matters

Capital Adequacy

The Board of Governors of the Federal Reserve System (“Board of Governors”) has adopted regulations requiring insured institutions to maintain a minimum leverage ratio of Tier 1 capital (the sum of common stockholders' equity, noncumulative perpetual preferred stock and minority interests in consolidated subsidiaries, minus intangible assets, identified losses and investments in certain subsidiaries, plus unrealized losses or minus unrealized gains on available for sale securities) to total assets. Institutions which have received the highest composite regulatory rating and which are not experiencing or anticipating significant growth are required to maintain a minimum leverage capital ratio of 3% Tier 1 capital to total assets. All other institutions are required to maintain a minimum leverage capital ratio of at least 100 to 200 basis points above the 3% minimum requirement.

The Board of Governors has also adopted a statement of policy, supplementing its leverage capital ratio requirements, which provides definitions of qualifying total capital (consisting of Tier 1 capital and Tier 2 supplementary capital, including the allowance for loan losses up to a maximum of 1.25% of risk-weighted assets) and sets forth minimum risk-based capital ratios of capital to risk-weighted assets. Insured institutions are required to maintain a ratio of

qualifying total capital to risk weighted assets of 8%, at least one-half (4%) of which must be in the form of Tier 1 capital.

The following table sets forth the Company's and the Bank's actual capital positions at June 30, 2008 and the minimum capital requirements for both under the regulatory guidelines discussed above:

34

Table 9. Capital Ratios

	Company Actual Capital Ratios	Bank Actual Capital Ratios	Minimum Capital Ratios
Total risk-based capital ratio	12.89%	12.46%	10.00%
Tier 1 capital to risk-weighted assets	11.63%	11.21%	6.00%
Leverage ratio	10.89%	10.48%	5.00%

As is indicated by the above table, the Company and the Bank exceeded all applicable regulatory capital guidelines at June 30, 2008. Management believes that, under the current regulations, both will continue to meet their minimum capital requirements in the foreseeable future.

Dividends

The primary source of funds with which dividends will be paid to shareholders is from cash dividends received by the Company from the Bank. During the first six months of 2008, the Company has received \$4.3 million in cash dividends from the Bank, from which the Company paid \$3.0 million in dividends to shareholders.

Reserve Balances

The Bank is required to maintain average reserve balances with the Federal Reserve Bank. At June 30, 2008 the Bank's qualifying balance with the Federal Reserve was approximately \$25,000 consisting of balances held with the Federal Reserve.

Item 3. Quantitative and Qualitative Disclosures about Market Risk

Interest Rate Sensitivity and Market Risk

There have been no material changes in the Company's quantitative and qualitative disclosures about market risk as of June 30, 2008 from those presented in the Company's Annual Report on Form 10-K for the year ended December 31, 2007.

As part of its overall risk management, the Company pursues various asset and liability management strategies, which may include obtaining derivative financial instruments to mitigate the impact of interest fluctuations on the Company's net interest margin. During the second quarter of 2003, the Company entered into an interest rate swap agreement with the purpose of minimizing interest rate fluctuations on its interest rate margin and equity.

Under the interest rate swap agreement, the Company receives a fixed rate and pays a variable rate based on a spread from the Prime Rate ("Prime"). The swap qualifies as a cash flow hedge under SFAS No. 133, "Accounting for Derivative Instruments and Hedging Activities", as amended, and is designated as a hedge of the variability of cash flows the Company receives from certain variable-rate loans indexed to Prime. In accordance with SFAS No. 133, the swap agreement is measured at fair value and reported as an asset or liability on the consolidated balance sheet. The portion of the change in the fair value of the swap that is deemed effective in hedging the cash flows of the designated assets are recorded in accumulated other comprehensive income and reclassified into interest income when such cash flow occurs in the future. Any ineffectiveness resulting from the hedge is recorded as a gain or loss in the consolidated statement of income as part of noninterest income. The amortizing hedge has a remaining notional value of \$198,000 at June 30, 2008, matures in September 2008, and has a duration of approximately two months. As of June 30, 2008, the maximum length of time over which the Company is hedging its exposure to the variability of future cash flows is approximately three months. As of June 30, 2008, the loss amounts in accumulated other comprehensive income

associated with these cash flows totaled less than \$1,000. During the six months ended June 30, 2008, \$5,000 was reclassified from other accumulated other comprehensive income into expense, and is reflected as a reduction in interest income.

The Company performed a quarterly analysis of the effectiveness of the interest rate swap agreement at June 30, 2008. As a result of a correlation analysis, the Company has determined that the swap remains highly effective in achieving offsetting cash flows attributable to the hedged risk during the term of the hedge and, therefore, continues to qualify for hedge accounting under the guidelines of SFAS No. 133. However, during the second quarter of 2006, the Company determined that the underlying loans being hedged were paying off faster than the notional value of the hedge instrument was amortizing. This difference between the notional value of the hedge and the underlying hedged assets is considered an “overhedge” pursuant to SFAS No. 133 guidelines and may constitute ineffectiveness if the difference is other than temporary. The Company determined during 2006 that the difference was other than temporary and, as a result, reclassified a net total of \$75,000 of the pretax hedge loss reported in other comprehensive income into earnings during 2006. As of June 30, 2008, the notional value of the hedge was still in excess of the value of the underlying loans being hedged by approximately \$133,000, but had improved from the \$1.3 million difference existing at December 31, 2007. As a result, the Company recorded a pretax hedge gain related to swap ineffectiveness of approximately \$9,000 during the six months ended June 30, 2008. Amounts recognized as hedge ineffectiveness gains or losses are reflected in noninterest income.

The Board of Directors has adopted an interest rate risk policy which establishes maximum decreases in net interest income of 12% and 15% in the event of a 100 BP and 200 BP increase or decrease in market interest rates over a twelve month period. Based on the information and assumptions utilized in the simulation model at June 30, 2008, the resultant projected impact on net interest income falls within policy limits set by the Board of Directors for all rate scenarios run.

The Company's interest rate risk policy establishes maximum decreases in the Company's market value of equity of 12% and 15% in the event of an immediate and sustained 100 BP and 200 BP increase or decrease in market interest rates. As shown in the table below, the percentage changes in the net market value of the Company's equity are within policy limits for both rising and falling rate scenarios.

The following sets forth the analysis of the Company's market value risk inherent in its interest-sensitive financial instruments as they relate to the entire balance sheet at June 30, 2008 and December 31, 2007 (\$ in thousands). Fair value estimates are subjective in nature and involve uncertainties and significant judgment and, therefore, cannot be determined with absolute precision. Assumptions have been made as to the appropriate discount rates, prepayment speeds, expected cash flows and other variables. Changes in these assumptions significantly affect the estimates and as such, the obtained fair value may not be indicative of the value negotiated in the actual sale or liquidation of such financial instruments, nor comparable to that reported by other financial institutions. In addition, fair value estimates are based on existing financial instruments without attempting to estimate future business.

Change in Rates	June 30, 2008			December 31, 2007		
	Estimated MV of Equity	Change in MV of Equity \$	Change in MV of Equity %	Estimated MV Of Equity	Change in MV of Equity \$	Change in MV of Equity %
+ 200 BP	\$ 95,288	\$ 4,979	5.51%	\$ 105,596	\$ 3,028	2.95%
+ 100 BP	94,121	3,811	4.22%	105,207	2,639	2.57%
0 BP	90,309	0	0.00%	102,568	0	0.00%
- 100 BP	84,568	(5,741)	-6.36%	97,410	(5,158)	-5.03%
- 200 BP	77,906	(12,403)	-13.73%	91,212	(11,356)	-11.07%

Item 4. Controls and Procedures

a) As of the end of the period covered by this report, the Company carried out an evaluation, under the supervision and with the participation of the Company's management, including the Chief Executive Officer and the Chief Financial Officer, of the effectiveness of the design and operation of the Company's disclosure controls and procedures, as defined in the Securities and Exchange Act Rule 13(a)-15(e). Based on that evaluation, the Chief Executive Officer and the Chief Financial Officer concluded that the Company's disclosure controls and procedures are effective on a timely manner to alert them to material information relating to the Company which is required to be included in the Company's periodic Securities and Exchange Commission filings.

(b) Changes in Internal Controls over Financial Reporting: During the quarter ended June 30, 2008, the Company did not make any significant changes in, nor take any corrective actions regarding, its internal controls over financial reporting or other factors that could significantly affect these controls.

The Company does not expect that its disclosure controls and procedures and internal control over financial reporting will prevent all error and fraud. A control procedure, no matter how well conceived and operated, can provide only reasonable, not absolute, assurance that the objectives of the control procedure are met. Because of the inherent limitations in all control procedures, no evaluation of controls can provide absolute assurance that all control issues and instances of fraud, if any, within the Company have been detected. These inherent limitations include the realities that judgments in decision-making can be faulty, and that breakdowns in controls or procedures can occur because of simple error or mistake. Additionally, controls can be circumvented by the individual acts of some persons, by collusion of two or more people, or by management override of the control. The design of any control procedure is based in part upon certain assumptions about the likelihood of future events, and there can be no assurance that any design will succeed in achieving its stated goals under all potential future conditions; over time, controls become inadequate because of changes in conditions, or the degree of compliance with the policies or procedures may deteriorate. Because of the inherent limitations in a cost-effective control procedure, misstatements due to error or fraud may occur and not be detected.

PART II. Other Information

Item 1. Not applicable

Item 1A. There have been no material changes in the Company's risk factors during the first six months of 2008.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds*Purchases of Equity Securities by Affiliates and Associated Purchasers*

Period	Total Number Of Shares Purchased	Weighted Average Price Paid Per Share	Total Number of Shares Purchased as Part of Publicly Announced Plan or Program	Maximum Number of Shares That May Yet be Purchased Under the Plans or Programs
04/01/08 to 04/30/08	4,872	\$ 14.95	4,872	229,830
05/01/08 to 05/31/08	16,702	\$ 15.41	16,702	213,128
06/01/08 to 06/30/08	13,000	\$ 15.08	13,000	200,128
Total second quarter 2008	34,574	\$ 15.22	34,574	

On August 30, 2001 the Company announced that its Board of Directors approved a plan to repurchase, as conditions warrant, up to 280,000 shares (560,000 shares adjusted for May 2006 stock split) of the Company's common stock on the open market or in privately negotiated transactions. The duration of the program was open-ended and the timing of purchases was dependent on market conditions. A total of 215,423 shares (430,846 shares adjusted for May 2006 stock split) had been repurchased under that plan as of December 31, 2003, at a total cost of \$3.7 million.

On February 25, 2004 the Company announced a second stock repurchase plan under which the Board of Directors approved a plan to repurchase, as conditions warrant, up to 276,500 shares (553,000 shares adjusted for May 2006 stock split) of the Company's common stock on the open market or in privately negotiated transactions. As with the first plan, the duration of the new program is open-ended and the timing of purchases will depend on market conditions. Concurrent with the approval of the new repurchase plan, the Board terminated the 2001 repurchase plan and canceled the remaining 64,577 shares (129,154 shares adjusted for May 2006 stock split) yet to be purchased under the earlier plan.

On May 16, 2007, the Company announced another stock repurchase plan to repurchase, as conditions warrant, up to 610,000 shares of the Company's common stock on the open market or in privately negotiated transactions. The repurchase plan represents approximately 5.00% of the Company's currently outstanding common stock. The duration of the program is open-ended and the timing of purchases will depend on market conditions. Concurrent with the approval of the new repurchase plan, the Company canceled the remaining 75,733 shares available under the 2004 repurchase plan. During the year ended December 31, 2007, 512,332 shares were repurchased at a total cost of \$10.1 million and an average per share price of \$19.71. Of the shares repurchased during 2007, 166,660 shares were repurchased under the 2004 plan at an average cost of \$20.46 per shares, and 345,672 shares were repurchased under the 2007 plan at an average cost of \$19.35 per share.

During the six months ended June 30, 2008, 64,200 shares were repurchased at a total cost of \$978,000 at an average per share price of \$15.23.

Item 3. Not applicable

Item 4. Submission of Matters to a Vote of Security Holders

The Company's Annual Shareholder's Meeting was held on Wednesday May 21, 2008 in Fresno, California. Shareholders were asked to vote on the following matter:

1) The shareholders were asked to vote on the election of eleven nominees to serve on the Company's Board of Directors. Such Directors nominate for election will serve on the Board until the 2009 annual meeting of shareholders and until their successors are elected and have been qualified. Votes regarding the election of Directors were as follows:

Director Nominee	Votes For	Votes Withheld
Robert G. Bitter, Pharm. D.	8,380,295	85,281
Stanley J. Cavalla	8,449,741	15,836
Tom Ellithorpe	8,212,241	253,336
R. Todd Henry	8,447,862	17,715
Gary Luke Hong	8,449,741	15,836
Ronnie D. Miller	8,449,741	15,836
Robert M. Mochizuki	8,446,678	18,899
Walter Reinhard	8,445,259	20,317
John Terzian	8,421,719	43,858
Dennis R. Woods	8,373,035	92,541
Michael T. Woolf, D.D.S.	8,437,259	28,318
