NOTES TO THE INTERIM CONDENSED CONSOLIDATED FINANCIAL INFORMATION

For the six months ended 30 June 2016

1. CORPORATE AND GROUP INFORMATION

China Eastern Airlines Corporation Limited (the “**Company**”), a joint stock company limited by shares, was established in the People’s Republic of China (the “**PRC**”) on 14 April 1995. The address of the Company’s registered office is 66 Airport Street, Pudong International Airport, Shanghai, the PRC. The Company and its subsidiaries (together, the “**Group**”) are principally engaged in the operation of civil aviation, including the provision of passenger, cargo, mail delivery, tour operations and other extended transportation services.

In the opinion of the directors, the holding company and ultimate holding company of the Company is China Eastern Air Holding Company (“**CEA Holding**”), a state-owned enterprise established in the PRC.

The A shares, H shares and American Depositary Receipts are listed on The Shanghai Stock Exchange, The Stock Exchange of Hong Kong Limited and The New York Stock Exchange, respectively.

The unaudited interim condensed consolidated financial statements were approved for issue by the Company’s Board on 30 August 2016.

2. BASIS OF PREPARATION

The unaudited interim condensed consolidated financial statements, comprising interim condensed statement of financial position as at 30 June 2016, interim condensed statement of profit or loss and other comprehensive income, interim condensed statement of changes in equity and interim condensed statement of cash flows for six months ended 30 June 2016 (collectively refer to as the “**interim financial information**”), have been prepared in accordance with International Accounting Standard (“**IAS**”) 34 “Interim Financial Reporting”. The interim financial information does not include all the information and disclosures required in the annual financial statements and should be read in conjunction with the annual financial statements for the year ended 31 December 2015, which were prepared in accordance with International Financial Reporting Standards (“**IFRS**”) as issued by the International Accounting Standard Board (“**IASB**”).

As at 30 June 2016, the Group's current liabilities exceeded its current assets by approximately RMB56.86 billion. In preparing the interim financial information, the Board conducts adequate and detailed review over the Group's going concern ability based on the current financial situation.

The Board has taken actions to deal with the situation that current liabilities exceeded its current assets, and the Board is confident that the Group has obtained adequate credit facility from the banks to support the floating capital. As at 30 June 2016, the Group had total unutilised credit facilities of approximately RMB43.71 billion from banks.

Based on the bank facility obtained by the Group, the past record of the financing and the good working relationship with major banks and financial institutions, the Board considers that the Group will be able to obtain sufficient financing to enable it to operate, as well as to meet its liabilities as and when they become due, and the capital expenditure requirements for the upcoming twelve months. Accordingly, the Board believes that it is appropriate to prepare these financial statements on a going concern basis without including any adjustments that would be required should the Company and the Group fail to continue as a going concern.

3.ACCOUNTING POLICIES

The accounting policies adopted in the preparation of the interim financial information are consistent with those followed in the preparation of the Group's annual consolidated financial statements for the year ended 31 December 2015, except for the adoption of new standards and interpretations effective as of 1

January 2016. The Group has not early adopted any other standard, interpretation or amendment that has been issued but is not yet effective.

The nature and the effect of these changes are disclosed below. Although these new standards and amendments apply for the first time in 2016, they do not have a material impact on the interim financial information of the Group. The nature and the impact of each new standard or amendment which is applicable to the Group is described below:

Amendments to IAS 1 Presentation of financial statement: Disclosure Initiative

Annual Improvements Amendments to a number of IFRSs

2012-2014 Cycle

Amendments to IAS 1, Presentation of financial statements: Disclosure initiative

The amendments to IAS 1 introduce narrow-scope changes to various presentation requirements. The amendments do not have a material impact on the presentation and disclosure of the Group's interim financial report.

Annual Improvements to IFRSs 2012-2014 Cycle

This cycle of annual improvements contains amendments to four standards. Among them, IAS 34, Interim financial reporting, has been amended to clarify that if an entity discloses the information required by the standard outside the interim financial statements by a cross-reference to the information in another statement of the interim financial statements, then users of the interim financial statements should have access to the information incorporated by the cross-reference on the same terms and at the same time. The amendments do not have an impact on the Group's interim financial statements as the Group does not present the relevant required disclosures outside the interim financial statements.

4.FINANCIAL RISK MANAGEMENT

(a)

Financial risk factors

The Group's activities expose it to a variety of financial risks: market risk (including currency risk, interest rate risk and fuel price risk), credit risk, and liquidity risk. The Group's overall risk management programme focuses on the unpredictability of financial markets and seeks to minimise potential adverse effects on the Group's financial performance. The Group uses derivative financial instruments to manage risk exposures whenever management considers necessary.

The interim financial information does not include all financial risk management information and disclosures required in the annual financial statements, and should be read in conjunction with the Group's annual financial statements for the year ended 31 December 2015.

There have been no changes in the risk management department since the 2015 year end or in any risk management policies.

Liquidity risk

The Group's primary cash requirements have been for day-to-day operations, additions of and upgrades to aircraft, engines and flight equipment and repayments of related borrowings. The Group finances its working capital requirements through a combination of funds generated from operations and borrowings including bank loans, debentures and bonds (both short-term and long-term). The Group generally finances its acquisition of aircraft through long-term finance leases or bank loans.

The Group operates with a working capital deficit. As at 30 June 2016, the Group's net current liabilities amounted to RMB56,863 million (2015: RMB51,309 million). For the six months ended 30 June 2016, the Group recorded a net cash inflow from operating activities of RMB10,535 million (for the six months ended 30 June 2015: RMB10,241 million), a net cash outflow from investing activities and financing activities of RMB6,491 million (for the six months ended 30 June 2015: outflow RMB10,707 million), and an increase in cash and cash equivalents of RMB4,044 million (for the six months ended 30 June 2015: decrease of RMB466 million).

The Board believes that cash from operations and bank loans will be sufficient to meet the Group's operating cash flow. Due to the dynamic nature of the underlying businesses, the Group's treasury policy aims at maintaining flexibility in funding by keeping credit lines available. The Board believes that the Group has obtained sufficient general credit facilities from the PRC banks for financing future capital commitments and for working capital purposes.

The table below analyses the Group's financial liabilities that will be settled into relevant maturity groupings based on the remaining period at the reporting date to the contractual maturity date. The amounts disclosed in the table are the contractual undiscounted cash flows.

(b) Fair value estimation of financial assets and liabilities

Financial instruments not measured at fair value

The carrying amounts and fair values of the Group's financial instruments, other than those with carrying amounts that reasonably approximate to fair values, were as follows:

	(Unaudited) 30 June 2016		(Audited) 31 December 2015	
	Carrying amounts RMB million	Fair values RMB million	Carrying amounts RMB million	Fair values RMB million
Financial assets				
Deposits relating to aircraft held under operating leases included in other non-current assets	261	249	338	316
Financial liabilities				
Long-term bank borrowings	10,139	9,920	33,386	32,880
Obligations under finance leases	55,224	59,276	52,399	50,839
Total	65,363	69,196	85,785	83,719

Management assessed cash and cash equivalents, restricted bank deposits and short-term bank deposits, trade receivables, other receivables, trade and bills payable, other payables, short-term debentures, short-term bank borrowings and short-term guaranteed bonds. Given their short term nature, their carrying amounts approximated to their fair values.

The fair values of the deposits relating to aircraft held under operating leases included in other non-current assets, Long-term bank borrowings and obligations under finance leases have been measured using significant observable inputs and calculated by discounting the expected future cash flows using rates currently available for instruments with similar terms, credit risk and remaining maturities.

Financial instruments measured at fair value

The Group enters into derivative financial instruments with various counterparties, principally financial institutions with high credit ratings. Derivative financial instruments, including forward foreign exchange contracts, interest rate swaps, cross currency swap are measured using valuation techniques similar to forward pricing and swap models, using present value calculations. The models incorporate various market observable inputs including the foreign exchange spot and forward rates and interest rate curves. As at 30 June 2016, the marked to market value of the derivative asset position is net of a credit valuation adjustment attributable to derivative counterparty default risk. The changes in counterparty credit risk had no material effect on the hedge effectiveness assessment for derivatives designated in hedge relationship and other financial instruments recognised at fair value.

Fair value hierarchy

The following tables illustrate the fair value measurement hierarchy of the Group's financial instruments:

6. SEGMENT INFORMATION

(a) CODM, office of the General Manager, reviews the Group’s internal reporting in order to assess performance and allocate resources.

The Group has one reportable operating segment, reported as “airline transportation operations”, which comprises the provision of passenger, cargo, mail delivery, ground service and cargo handling services.

Other services including primarily tour operations, air catering and other miscellaneous services are not included within the airline transportation operations segment, as their internal reports are separately provided to the CODM. The results of these operations are included in the “other segments” column.

Inter-segment transactions are entered into under normal commercial terms and conditions that would be available to unrelated third parties.

In accordance with IFRS 8, segment disclosure has been presented in a manner that is consistent with the information used by the Group's CODM. The Group's CODM monitors the results, assets and liabilities attributable to each reportable segment based on financial results prepared under the PRC Accounting Standards for Business Enterprises (the "PRC Accounting Standards"), which differ from IFRS in certain aspects. The amount of each material reconciling items from the Group's reportable segment revenue and profit or loss, arising from different accounting policies are set out in Note 6(c) below.

Reportable segment liabilities	156,041	10,260	(8,282)	39	158,058

Unallocated assets primarily represent investments in associates and joint ventures, and available-for-sale *investments. Unallocated results primarily represent the share of results of associates and joint ventures, income relating to available-for-sale investments and impairment charge on available-for-sale investments.

(b) **The Group's business operates in three main geographical areas, even though they are managed on a worldwide basis.**

The Group's revenues by geographical area are analysed based on the following criteria:

- 1) Traffic revenue from services within the Mainland China (the PRC excluding the Hong Kong Special Administrative Region ("**Hong Kong**"), Macau Special Administrative Region ("**Macau**") and Taiwan, (collectively known as "**Regional**")) is classified as domestic operations. Traffic revenue from inbound and outbound services between overseas markets excluding Regional is classified as international operations.
- 2) Revenue from ticket handling services, ground services, cargo handling service and other miscellaneous services are classified on the basis of where the services are performed.

Edgar Filing: CHINA EASTERN AIRLINES CORP LTD - Form 6-K

Domestic (the PRC, excluding Hong Kong, Macau and Taiwan)	29,965	28,982
Regional (Hong Kong, Macau and Taiwan)	1,785	1,760
International	14,585	13,629
	46,335	44,371

The major revenue-earning assets of the Group are its aircraft, all of which are registered in the PRC. Since the Group's aircraft are deployed flexibly across its route network, there is no suitable basis of allocating such assets and the related liabilities by geographic area and hence segment non-current assets and capital expenditure by geographic area are not presented. Except the aircraft, most non-current assets (except financial instruments) are registered and located in the PRC.

Notes:

(i) The difference represents the different classification of business tax and expired sales in advance of carriage under the PRC Accounting Standards and IFRS.

The difference is attributable to the differences in the useful lives and residual values of aircraft and engines adopted for depreciation purposes in prior years under the PRC Accounting Standards and IFRS. Despite the (ii) depreciation policies of these assets have been unified under IFRS and the PRC Accounting Standards in recent years, the changes were applied prospectively as changes in accounting estimates which result in the differences in the carrying amounts and related depreciation charges under IFRS and the PRC Accounting Standards.

The difference represents the different measurement of the fair value of acquisition cost of the shares from (iii) Shanghai Airlines between the PRC Accounting standards and IFRS, which results in the different measurement of goodwill.

FLEET STRUCTURE

In the first half of 2016, the Group continued to build a modernized fleet in the industry. A total of 42 aircraft of major models including B777-300ER, A320 series and B737 series were introduced while a total of 12 aircraft of older models including EMB145, and B737-300 were retired. The fleet scale of the Group was further expanded and the aircraft models were further made better fit in with the route coverage, contributing to a more reasonable structure of fleet.

As at 30 June 2016, the Group operated a fleet of 581 aircraft, which included 556 passenger aircraft, 9 freighters and 16 business aircraft.

REPORT OF DIRECTORS

In the first half of 2016, the global economy was exposed to downside risks and experienced a period of slackened growth. Growth was sluggish in developed economies and diverged among emerging economies. In China, economic performance was stable in general, with the government's ongoing efforts in fostering an enhanced and upgraded industrial structure and the increased contribution from consumption expenditure. Benefiting from the robust consumption demand arising from the outbound travel of residents, the air passenger transportation market continued to report stable growth. Further, affected by factors including continual decline in the volume of import and export trade and fierce market competition, the air freight transportation market further slowed down in growth. In the first half of 2016, the air transportation industry continued to benefit from the low international crude oil prices, but at the same time it was adversely affected by exchange rate fluctuations, geopolitical conflicts and terrorist attacks overseas.

In face of the complex business environment, the management and all staff of the Group worked together and achieved smooth progress as scheduled in the first half of the year. On the precondition of securing safe operation, the Group enhanced efforts in conducting market research and marketing, flexibly adjusted the deployment of capacity, continued to improve service quality and expedited the pace of transformation of its business. It also strengthened external cooperation at various levels, and made steady progress in projects including the non-public issuance of A Shares. The Group achieved favorable operational results and thus solid performance at the outset of the thirteenth five-year period.

In the first half of 2016, the Group recorded revenue of RMB46,335 million. Profit of the Group decreased slightly due to exchange rate fluctuations. Total profit amounted to RMB4,571 million. Net profit attributable to shareholders of parent company amounted to RMB3,230 million.

Safe Operation

The Group placed great emphasis on ensuring safe operation and will continue to do so. In the first half of 2016, the Group enhanced its safety management system, strengthened the enforcement of safety responsibilities, intensively proceeded with safety supervision and inspection, uplifted the quality of training for pilots, improved the system of incubating talents with core skills and strictly implemented in-flight safety requirements. The Group had 952,000 safe flying hours and 398,000 take-off and landing flights, which have increased by 9.9% and 7.2%, respectively, over the same period last year.

Marketing

In the first half of 2016, seizing the opportunities brought about by international low oil prices and growth in demand for outbound tourism, the Group stepped up its flight capacity and marketing efforts. Amidst adversity contributed by geopolitical instability around the globe, terrorist attacks overseas and the impact caused by the formation of a high-speed railway network in China, the Company's passenger traffic volume was 80,002.98 million passenger-kilometres, representing a year-on-year increase of 15.5%. Revenue from passenger transportation amounted to RMB39,298 million, representing an increase of 5.78% year on year.

By proactively optimizing the production structure, the Group adjusted the deployment of flight capacity based on market demand. The flight capacity for passenger transportation grew by 15.0% year-on-year and passenger load factor grew by 0.4 pts year-on-year, to 80.8%. The Group also steadily proceeded with the establishment of the network of transportation hubs. With Shanghai as the core hub, five international routes for long-haul flights have been added to the network, connecting Shanghai and Prague, Amsterdam, Madrid, St Petersburg and Chicago, respectively. Such addition is to optimize transit connection and expand the structure of transit routes. The number of passengers of and revenue generated from interline transit grew by 27.5% and 24.1%, respectively. By enhancing the system of marketing and sales and greatly improving e-commerce channels for direct sales including the official website and mobile user terminals, revenue from direct sales increased by 57.2% and the contribution of which increased by 14.4 pts. Among the selling expenses, handling fee for agency business decreased by RMB420 million year-on-year. Through exploring high-end customer resources, the total number of customers and revenue of direct group customers grew by 63% and 26%, respectively. The number of frequent flyer members reached 27.40 million, representing a year-on-year increase of 10.3%, and the chance of them taking a second flight increased by 4.0 pts.

Service Quality

In the first half of 2016, the Group continued to adhere to the philosophy of “Customer- Oriented and Dedicated Service”. For ground service, air service and online service, the Group has improved its service capability and enhanced its branding, thereby continually uplifting customer experience.

Construction and renovation of 24 new or existing VIP lounges of the Group located in nine major airports has been underway with steady progress. The Group also promoted the use of self-check-in machine service available in domestic and overseas ports. In China, the usage rate of self-check-in machines has exceeded 60%, representing an increase of 17.9 pts year-on-year, and thereafter self-check-in service has become available at both ports to 42 international routes for which Shanghai is a transportation hub, bringing uplifted waiting experience to travelers. Besides, the “comfortable cabin” project has commenced, the Group has started the provision of new wine of the year to create a cozy atmosphere for flight journeys and to uplift the flight experience of travelers. On the back of online notification platform, the Group managed to improve the timeliness and coverage of the notification of flight information on any irregularities. In reliance of such platform, the Group also promoted a global baggage inquiry system, under which the error of wrongful transportation of baggage decreased by 3.51% year- on-year. The self-rebooking system has also been made available online, adding to the further enhancement in the overall quality of online services. On 18 June 2016, the “Eastern Miles” platinum card was duly introduced, further improving the system of high-end customers and forging a dedicated brand for high-end services.

Reform and Transformation

In the first half of 2016, based on the reform initiatives including the expedition of the formation of an e-commerce platform, the continual enhancement in the operations level of the low-cost airline of China United Airlines Co., Ltd. (“**China United Airlines**”) and the gradual promotion of the market reform of supporting business, the Group made new progress in the course of its transformation.

For e-commerce, the Group expedited the construction of in-flight connection platform, under which internet access has become available in 36 long-haul wide-body aircraft of the Group. The Group also facilitated the construction of e-commerce platform, with 8.7 times and 7.6 times of growth in the number of registered users and the sales amount of air tickets from direct sales, respectively. Besides, the applications of aviation points and the variety of integrated products were further enriched, with 46% and 311% growth in the revenue from aviation points and revenue from direct online sales of integrated products, respectively.

For low-cost airline business, on the basis of the completion of the all-economy class cabin renovation, China United Airlines continued with the introduction of aircraft with all-economy class layout, thereby effectively enhancing its passenger transportation capability per-flight. Proactive efforts were made to expand the channels of direct sales. The

revenue from direct sales increased by 3.2 times, whereas the agency fees decreased by RMB40.87 million year-on-year. Ancillary revenue services including baggage charges, in-flight sales and insurance sales have been launched, thereby achieving the year-on-year increase in non-aviation revenue. Passenger load factor increased by 7.6 pts, which further increased its operational efficiency.

Regarding the market reform of supporting business, the Group continued to step up the construction of external aviation service centres and fostered the market-oriented operation of ground service business. Seven customers including Scandinavian Airline and Austria Airline have been added. External aviation agency of Pudong Airport accounts for an uplifted 66.6% market share. Revenue amounted to RMB120 million.

External Cooperation and Major Projects

In the first half of 2016, the Group continued to enhance and intensify its external cooperation. Ongoing efforts have been made to foster the implementation of major projects.

On the back of the cooperation platform of SkyTeam Alliance, the Group continued to enhance its cooperation with member airlines in the SkyTeam Alliance. In collaboration with Delta Air Lines, the Group has forged an industry-leading aviation network between China and the United States, with nine international routes and 116 domestic routes in the two countries adopting code-sharing, with a view to uplifting the operation capability of the transportation hubs and shorten the transit time. The Group's cooperation with Air France further expanded the route coverage; code-sharing has been achieved for 55 routes in Central Europe. Through the aforesaid cooperation, there has been substantial growth in the Group's carriage of member customers under the alliance and also in the alliance partners' carriage of the Company's customers. The Group has due regards for and will continue to strengthen the cooperation with airlines which are not members of the alliance. Under its increasingly enhanced cooperation with Qantas in joint sales, ground service etc., 26 new code-sharing destinations in China and Australia have been added to the list.

In addition, the Group proactively extended its cooperation with world-famous tourism brands. Its cooperation with Ctrip Computer Technology (Shanghai) Co., Ltd ("**Ctrip**") in different areas represents a new mode of cooperation under which capital fund is leveraged to establish the "aviation + internet" combination. In its strategic cooperation with Shanghai Disneyland Resort, having obtained the sole right of airline brand display in Shanghai Disneyland Resort, the Group has launched six models of colour-painted aircraft and products of "air ticket + entry ticket" packages. Direct access to the Group's customer service hotline 95530 from the official hotels of Disneyland Resort has also been made available.

In the first half of 2016, amidst the adversity under the significant fluctuations of the capital market in China, the Group completed the issuance of A Shares on a non-public basis to four investors including Ctrip and China National Aviation Fuel Holding Company ("**China National Aviation Fuel**"), with proceeds of approximately RMB8,548 million, thereby further optimizing the structure of assets and liabilities of the Group. To capture future opportunities arising from the market of long-haul routes, the Group entered into agreements with Boeing and Airbus, respectively for the introduction of fifteen B787-9 and twenty A350-900 aircraft, after rounds of negotiation. The aforesaid new generation of long-haul wide-body aircraft is expected to be delivered to the Group during the period 2018–2022.

Social Responsibilities

While pursuing its own sustainable corporate development, the Group has always incorporated a social responsibility philosophy into corporate decision making, production and operations, which seeks to unify corporate development and social responsibility.

In the first half of 2016, the Group's large-scale charitable programme "Love at China Eastern Airlines" launched 5,629 projects in total, with 277,061 participants from our staff team, serving a total of 286,318 people in a total of 822,136 service hours.

In the first half of 2016, the Group was bestowed "Best China Airline" for the second consecutive year at the TTG (Asia Media) China Travel Awards. The Group's social responsibility report 2015 and the "Winning of Youth" () project were granted the "Golden Bee – Leading Enterprises Award" () and "2015 Golden Bee CSR Competitiveness Outstanding Cases Collection" (2015) by organizations including China WTO Tribune (WTO) and GIZ ().

Passenger traffic volume was 80,002.98 million passenger-kilometres, representing an increase of 15.5% from the same period last year.

The passenger traffic volume of the Group's domestic routes was 50,631.30 million passenger-kilometres, representing an increase of 8.4% from the same period last year. Compared to the first half of 2015, domestic passenger revenues increased by 3.23% to RMB25,285 million, accounting for 64.34% of the Group's passenger revenues.

The passenger traffic volume of the Group's international routes was 27,197.36 million passenger-kilometres, representing an increase of 32.8% from the same period last year. Compared to the same period of 2015, international passenger revenues increased by 12.07% to RMB12,422 million, accounting for 31.61% of the Group's passenger revenues.

The passenger traffic volume of the Group's regional routes was 2,174.31 million passenger-kilometres, representing an increase of 5.9% from the same period last year. Compared to the first half of 2015, regional passenger revenues increased by 1.08% to RMB1,591 million, accounting for 4.05% of the Group's passenger revenues.

In the first half of 2016, the Group's cargo and mail traffic volume was 2,299.89 million tonne-kilometres, representing a decrease of 4.8% from the same period last year; cargo and mail traffic revenues amounted to RMB2,690 million, representing a decrease of 16.38% from the same period last year, and accounting for 6.41% of the Group's traffic revenues.

In the first half of 2016, other revenues of the Group amounted to RMB4,347 million, representing an increase of 8.62% from the same period last year.

Operating Expenses

In the first half of 2016, the Group's total operating costs were RMB41,951 million, representing an increase of 2.56% from the same period last year. Analysis of the changes in items under operating costs of the Group is set out as follows:

Aircraft fuel costs accounted for the most significant operating costs of the Group. In the first half of 2016, the average price of fuel decreased by 29.66% from the same period last year. The Group's total aircraft fuel consumption was approximately 2,879,700 tonnes, representing an increase of 12.57% from the same period last year. Jet fuel expenditures of the Group reached RMB8,363 million, representing a decrease of 20.82% from the same period last year.

In the first half of 2016, the Group's take-off and landing charges amounted to RMB5,794 million, representing an increase of 14.01% from the same period last year, and was primarily due to the increase in the number of take-off and landing of the Group.

In the first half of 2016, the Group's depreciation and amortisation amounted to RMB5,801 million, representing an increase of 15.77% from the same period last year, and was primarily due to the introduction of new aircraft and engines by the Group, resulting in a greater base for depreciation.

In the first half of 2016, the Group's wages, salaries and benefits amounted to RMB8,314 million, representing an increase of 9.74% from the same period last year, and was primarily due to an increase in remuneration brought about by business growth.

In the first half of 2016, the Group's aircraft maintenance expenses amounted to RMB2,259 million, representing an increase of 19.15% from the same period last year, and was primarily due to an increase in repairing of engines.

In the first half of 2016, the Group's food and beverage expenses amounted to RMB1,401 million, representing an increase of 15.59% from the same period last year, and was primarily due to the increase in the number of passengers carried.

In the first half of 2016, the Group's aircraft operating lease rentals amounted to RMB2,317 million, representing an increase of 5.32% from the same period last year, and was primarily due to the increase in the number of aircraft held under operating leases.

In the first half of 2016, the Group's other operating lease rentals amounted to RMB345 million, representing an increase of 6.15% from the same period last year, and was primarily due to the increase in the number VIP rooms rented.

In the first half of 2016, the Group's selling and marketing expenses amounted to RMB1,631 million, representing a decrease of 13.61% from the same period last year, and was primarily due to a year-on-year decrease in the handling fees of agency businesses brought by the increase in the proportion of direct sales.

In the first half of 2016, the amount of civil aviation infrastructure levies payable to the Civil Aviation Administration of China by the Group was RMB945 million, representing an increase of 7.63% from the same period last year. This increase was primarily due to the increase in the miles flown by the Group.

In the first half of 2016, the Group's ground service and other expense amounted to RMB2,769 million, representing a decrease of 0.89% from the same period last year.

In the first half of 2016, the Group's indirect operating expenses were RMB2,009 million, representing an increase of 49.04% from the same period last year. This was primarily due to an increase in corresponding expenses following the expansion of fleet scale of the Group.

Other Operating Income

In the first half of 2016, other operating income of the Group amounted to RMB2,772 million, representing an increase of 22.87% from the same period last year, primarily due to the increase in income from cooperative routes and increase in income from government grants.

Finance Income/Costs

In the first half of 2016, the Group's finance income was RMB34 million, representing a decrease of 37.04% from the same period last year. Finance costs amounted to RMB2,717 million, representing an increase of 134.22% from the same period last year, primarily due to an increase in net exchange losses recognised during the reporting period brought by an appreciation of USD against RMB.

Profit

In the first half of 2016, the Group's profit attributable to the equity shareholders of the Company decreased by RMB332 million from the same period last year to RMB3,230 million. Earnings per share attributable to the equity shareholders of the Company were RMB0.2458.

Liquidity and Capital Structure

The Group monitors its capital position on the basis of its debt ratio, which is calculated as total liabilities divided by total assets. As at 30 June 2016, the debt ratio of the Group was 75.79%, representing a decrease of 4.04 pts from the same period last year.

As at 30 June 2016, the Group's current liabilities exceeded its current assets by RMB56,863 million. The Group has been and believes it will continue to be capable of satisfying its working capital requirements through obtaining loans from banks, bonds and various financing means.

The Group generally finances its working capital requirements through business operations and short-term bank loans. As at 30 June 2015 and 30 June 2016, the Group's cash and cash equivalents amounted to RMB833 million and RMB13,214 million, respectively. In the first half of 2015 and first half of 2016, net cash inflow generated from the Group's operating activities was RMB10,241 million and RMB10,535 million, respectively.

Capital expenditures for the purchase of aircraft etc. were partly funded by internal funds, the balance of which was mainly financed by long-term and short-term borrowings and finance leasing etc.. In the first half of 2015 and first half of 2016, the Group's net cash outflow from investment activities was RMB11,402 million and RMB16,372 million, respectively. Net cash inflow from the Group's financing activities was RMB695 million and RMB9,881 million, respectively.

As at 31 December 2015 and 30 June 2016, the Group's borrowings payable within one year were RMB38,214 million and RMB52,181 million, respectively. As at 31 December 2015, the Group's borrowings payable within one to two years, within three to five years and beyond five years were RMB10,306 million, RMB8,224 million and RMB9,968 million, respectively, as compared to RMB1,731 million, RMB7,082 million and RMB7,438 million, respectively, as at 30 June 2016.

The Group's obligations under finance leases as at 31 December 2015 and 30 June 2016, converted into RMB, were RMB52,399 million and RMB55,224 million, respectively. As at 31 December 2015, the Group's lease obligations payable within two years, within three to five years and beyond five years were RMB12,051 million, RMB16,679 million and RMB23,669 million, respectively, as compared to RMB10,892 million, RMB15,798 million and RMB28,534 million, respectively, as at 30 June 2016.

The Group's obligations under finance leases comprised only floating-rate obligations. As at 31 December 2015, the Group's obligations under finance leases comprised USD-denominated obligations of USD7,753 million, SGD-denominated obligations of SGD178 million, HKD-denominated obligations of HKD1,072 million and JPY-denominated obligations of JPY6,395 million. As at 30 June 2016, the Group's obligations under finance leases comprised USD-denominated obligations of USD6,916million, SGD-denominated obligations of SGD166 million, HKD-denominated obligations of HKD1,005 million and JPY-denominated obligations of JPY5,939 million, RMB-denominated obligations of RMB7,300 million.

As at 31 December 2015, the Group's borrowings comprised USD-denominated borrowings of USD5,689 million and RMB-denominated borrowings of RMB29,769 million. Fixed-rate borrowings accounted for 47.80% of the total borrowings, and floating-rate borrowings accounted for 52.20% of the total borrowings. As at 30 June 2016, the Group's borrowings comprised USD-denominated borrowings of USD809 million and RMB-denominated borrowings of RMB58,586 million. Fixed-rate borrowings accounted for 85.22% of the total borrowings, and floating-rate borrowings accounted for 14.78% of the total borrowings.

Interest Rate Fluctuation

The Group's total interest-bearing liabilities (including long-term and short-term borrowings, obligations under finance leases, super short-term commercial paper and bonds payable) as at 31 December 2015 and 30 June 2016 were RMB119,111 million and RMB123,656 million, respectively, and the proportion of short-term liabilities accounted for 37.21% and 46.69%, respectively. Most of the long-term interest-bearing liabilities were liabilities with floating interest rates. Both of the short-term and the long-term liabilities were affected by fluctuations in current market interest rates.

The Group's interest-bearing liabilities were primarily denominated in USD and RMB. As at 31 December 2015 and 30 June 2016, the Group's USD-denominated liabilities accounted for 73.28% and 41.43%, respectively, of total liabilities for the relevant periods while RMB- denominated liabilities accounted for 24.99% and 53.28%, respectively, of total interest- bearing liabilities. Fluctuations in the USD and RMB interest rates have and will continue to have significant impact on the Group's finance costs. As at 31 December 2015, the notional amount of the outstanding interest rate swap agreements was approximately USD1,466 million. As at 30 June 2016, such amount was USD1,658 million and these agreements will expire between the second half of 2016 and 2025.

Exchange Rate Fluctuation

As at 30 June 2016, the Group's total interest-bearing liabilities denominated in foreign currencies, converted to RMB, amounted to RMB57,770 million, of which USD liabilities accounted for 88.68% of the total interest-bearing liabilities denominated in foreign currencies. Therefore, a significant fluctuation in foreign exchange rates will subject the Group to significant foreign exchange loss arising from the conversion of foreign currency denominated liabilities, which will also affect the profitability and development of the Group. The Group typically uses hedging contracts for foreign currencies to reduce the foreign exchange risks for foreign currency revenue generated from ticket sales and expenses to be paid in foreign currencies. The Group's foreign currency hedging contracts mainly involve the selling of JPY and the purchase of USD at fixed exchange rates. As at 31 December 2015, the subsisting foreign currency hedging contracts held by the Group amounted to a notional amount of USD12 million. Such amount was USD9 million as at 30 June 2016, and will expire in 2017.

Fluctuation of Aircraft Fuel Prices

In the first half of 2016, assuming other factors remain unchanged, if the average price of aircraft fuel had increased or decreased by 5%, aircraft fuel costs of the Group would have increased or decreased by approximately RMB418 million.

In the first half of 2016, the Group did not engage in any aviation fuel hedging activities.

Pledges on Assets and Contingent Liabilities

The Group generally finances the purchases of aircraft through finance leases and bank loans secured by its assets. As at 31 December 2015, the value of the Group's relevant assets used to secure certain bank loans was RMB29,147

million. As at 30 June 2016, the value of the Group's relevant assets pledged to secure certain bank loans was RMB18,239 million, representing a decrease of 37.42% when compared to that as at 31 December 2015.

As at 30 June 2016, the Group had no material contingent liabilities.

Human Resources

As at 30 June 2016, the Group had 72,010 employees, the majority of whom were employed in the PRC. The wages of the Group's employees generally consisted of basic salaries and performance bonuses.

COMPLIANCE WITH THE RELEVANT LAWS AND REGULATIONS WHICH MAY HAVE A SIGNIFICANT IMPACT ON THE COMPANY

As at 30 June 2016, the Board was not aware of any significant matters which may cause impact on the Group or any non-compliance with the laws and regulations which may have a significant impact on the Group.

OUTLOOK FOR THE SECOND HALF OF 2016

The Group would like to bring to the attention of readers of this announcement that this announcement contains certain forward-looking statements, including a general outlook of international and domestic economies and the aviation industry, and descriptions of the Group's future operating plans for the second half of 2016 and beyond. Such forward-looking statements are subject to many uncertainties and risks. The actual events that occur may be different from these forward-looking statements.

In the second half of 2016, greater uncertainties exist in the global economy as affected by the decision of withdrawal of the United Kingdom from the European Union in the Brexit referendum and the escalated disputes in the geopolitics worldwide. It is expected that economic recovery will be weak on a full-year basis. In July 2016, the International Monetary Fund downward-adjusted the projection of the pace of growth of the world economy and total trade volume. In China, albeit the downside pressure on economic growth, it is anticipated that a mid-to-high pace of growth will persist. With the further optimization of the economic structure, especially the rapid development of the service industry and the start of an era of general public tourism as well as the stronger role played by consumption in driving economic growth, the demand for air passenger transportation is expected to maintain robust growth, whilst the demand for air freight transportation is expected to be relatively sluggish.

In face of a complicated and dynamic external environment, the Company will continue to seize the opportunities arising from the low oil prices, the rising demand for tourism and consumption and the opening of the Shanghai Disneyland, and focus on the following areas in order to achieve better operating results:

1. reinforcing the application of safety systems, intensifying operation inspection, fostering development of safety culture, improving flying techniques and abilities, enhancing the development of aviation security, to assure flight safety on an ongoing basis;
2. seizing the opportunities presented by the summer peak season, riding on scientific market research, implementing precise allocation of flight capacity, optimizing flight seating management, improving fare management, thereby

effectively uplifting operational efficiency;

intensifying the development of hub network, strengthening the deployment of international route network, stepping up efforts in international marketing and sales, proactively exploring high-end customers in the international market, intensifying level of cooperation with overseas airlines, and steadily pressing ahead with its strategy of international development;

– 45 –

building an IT system for managing the service quality, uplifting the normalization of flights, optimizing the mechanism for coping with flight irregularities, pressing ahead with the development of integration of online services and products, building the image of high-end service of the platinum card, and continually improving service experience;

strengthening the analysis of and research on the movements of oil prices, exchange rates and interest rates, strengthening risk control, proactively expanding financing channels, optimizing the debt structure of the Company and exercising stricter control over costs;

fostering the market reform of maintenance and ground service business, expediting the establishment of in-flight internet access and e-commerce platforms, uplifting the level of operation of the low-cost airline of China United Airlines, seeking to achieve new progress of the reform and transformation of the Company.

FLEET PLAN

In the future, the Group will seek to maintain a streamlined and effective fleet structure, and a good match between aircraft models and aviation routes.

For details, please refer to the announcements disclosed by the Company on the website of Hong Kong Stock Exchange on 27 July 2015, 1 September 2015 and 9 September 2015 and the annual report for the year ended 31 December 2015 published by the Company on 22 April 2016.

4.Dividend

In considering and approving the 2015 profit distribution proposal, the Board also proposed, in 2016, an interim cash dividend distribution of not less than 40% of the net profit (i.e. RMB737 million) of the parent company for the year 2015 under the domestic accounting principles.

In its fourth regular meeting in 2016, the Board also considered and approved the 2016 interim profit distribution proposal. It was recommended by the Board that the 2016 interim distribution be RMB0.51 per ten shares (inclusive of tax) in cash. Based on the total share capital of 14,467,585,682 shares of the Company, the total distribution would be approximately RMB738 million (inclusive of tax) in cash.

The independent non-executive directors of the Company are of the view that the aforesaid interim profit distribution proposal is in line with the objective situation of the Company, in the long-term interests of the Company and its shareholders, in compliance with relevant laws, regulations and the Articles of Association of the Company, and not detrimental to the interests of investors (especially minority shareholders) of the Company.

The aforesaid interim profit distribution proposal of the Group for the year 2016 is subject to consideration and approval by the shareholders at the forthcoming general meeting of the Company.

5.Purchase, Sale or Redemption of Securities

During the first half of 2016, neither the Company nor its subsidiaries purchased, sold or redeemed any of its listed securities (“**securities**”, having the meaning ascribed thereto under Section 1 of Appendix 16 to the Rules Governing the Listing of Securities on The Stock Exchange of Hong Kong Limited (the “**Listing Rules**”)).

During the six months ended 30 June 2016, the Company has adopted the Model Code for Securities Transactions by Directors of Listed Issuers (“**Model Code**”) set out in Appendix 10 to the Listing Rules as the securities transactions code for the directors of the Company (“**Directors**”). Having made specific enquiries to all the Directors, it is the Company’s understanding that the Directors have complied with the requirements as set forth in the Model Code regarding Directors’ securities transactions.
