FOR IMMEDIATE RELEASE

PYRAMID COMPUTER GMBH, LEADING
EUROPEAN SUPPLIER OF APPLIANCE
SERVERS, CHOOSES SILICOM'S SETAC

- SETAC to Enable New Series of Innovative Network Appliances -
- 2nd SETAC Success Since Prototype Launch in July -

KFAR SAVA, Israel - December 15, 2009 - Silicom Ltd. (NASDAQ and TASE: SILC) today announced that Pyramid Computer GmbH, a leading European OEM manufacturer of hardware solutions for networking and data centers, plans to roll out a new line of network appliances designed to take advantage of the unique capabilities of Silicom's recently-launched SETAC Server To Appliance Converter.

The use of the SETAC will enable Pyramid to create a flexible solution without sacrificing the use of a branded, highly-reliable and supportable motherboard, and to bring the unit to market in a short time period and at a reasonable price.

“The SETAC is an exceptional product that will bring about a revolution in network appliance design - a clear demonstration of Silicom's out-of-the-box thinking and insight into market needs,” commented Peter Trosien, Head of Product Management at Pyramid Computer. “Our customers have been looking for more flexibility in their appliances, and especially the ability to re-configure them in the field. We are delighted to be able to offer them a reasonably-priced branded solution – in fact, we have already started to submit proposals and evaluation units and are encouraged by the early market reception.”

This is Silicom's second SETAC marketing success since announcing the product line in July. At that time, the Company announced that a leading European provider of network security solutions had committed to buy SETAC units, representing an early validation of the concept.

“We are very excited that our SETAC has been chosen by one of the network appliance industry's leading suppliers, and look forward to working together closely as they begin to roll out their new product line,” added Shaike Orbach, Silicom's President and CEO. “The fact that we have achieved a second success for our new SETAC concept in just five months confirms our ‘read’ of the market and its need for a new genre of flexible, reasonably priced server-grade appliances. We believe that as appliances of this type begin to prove themselves in commercial deployments, demand for the SETAC will grow, making it into an important new growth driver for our Company.”

About Pyramid Computer GmbH

Pyramid Computer GmbH is a leading OEM manufacturer of hardware solutions for networking and data centers. Established in 1985, Pyramid employs approximately 100 people in its headquarters, manufacturing and logistical centers, and is differentiated by the quality of its manufacturing, global logistics and technical support.
