Statement on results of the 2011 EBA EU-wide stress test

Barclays PLC notes the publication of the stress test outcomes for European banks by the European Banking Authority ("EBA") today. In summary and under EBA assumptions:

- The EBA-defined stressed Core Tier 1 capital ("CT1") ratio is 7.3%. This is significantly above the 5% minimum level set by the EBA.
  - The EBA methodology assumes zero capital value for Barclays investment in BlackRock. Without this deduction Barclays stressed CT1 ratio would be close to 8%.
  - Throughout the stressed period Barclays remains profitable and its capital resources increase.
  - RWAs are assumed to increase by about £150bn resulting in the reduced CT1 ratio.

Outcome of the modelled stressed scenario at 31 December 2012

2010 Basel-defined CT1 ratio	10.8%
2010 EBA-defined CT1 ratio	10.0%
EBA Stress Test Results	
2 year cumulative operating profit	£ 14,968m
2 year cumulative banking book impairment	£ (11,018m)
EBA-calculated risk weighted assets ("RWAs")	£567,454m
Resulting EBA stressed CT1 ratio	7.3%

Barclays regularly conducts stress tests, for internal purposes and for the FSA. The results consistently demonstrate that Barclays has capital in excess of all regulatory requirements.

Notes:

- The stress test was carried out based on the EBA common methodology and key common assumptions (e.g. constant balance sheet, uniform treatment of securitisation exposures) as published in the EBA Methodological Note and is intended by the EBA to provide a what-if analysis aimed at supporting the supervisory assessment of the adequacy of capital of European banks. Therefore, the information relative to the baseline scenarios is provided only for comparison purposes. Neither the baseline scenario nor the adverse scenario should in any way be construed as a Barclays forecast or directly compared to other information prepared by Barclays.
- More details on the scenarios, assumptions and methodology are available from the EBA website: http://eba.europe.eu/EU-wide-stress-testing/2011.aspx
- The EBA stress test methodology makes no allowance for management actions regarding portfolio composition over time or cost reductions to mitigate the modelled stresses. The full summary of EBA stress test results, attached in the Appendix to this announcement, provides further details of the impact of these stresses on Barclays. A GBP-denominated spreadsheet is available via the Investor Relations website: http://group.barclays.com/Investor-Relations/Investor-news/Regulatory-announcements
- Barclays expects to announce its Interim Results for the 6 months to the end of June 2011 on 2 August 2011.
- Barclays is a major global financial services provider engaged in retail banking, credit cards, corporate and investment banking and wealth management with an extensive international presence in Europe, the Americas, Africa and Asia. With over 300 years of history and expertise in banking, Barclays operates in over 50 countries and employs over 147,000 people. Barclays moves, lends, invests and protects money for over 48 million customers and clients worldwide. For further information about Barclays, please visit our website www.barclays.com. Neither the content of the Barclays website nor any website accessible by hyperlinks on the Barclays website is incorporated in, or forms any part of, this announcement

Appendix

Results of the 2011 EBA EU-wide stress test: Summary (1-3)

Name of the bank: Barclays

Actual results at 31 December 2010	million EUR, %
Operating profit before impairments	13,243
Impairment losses on financial and non-financial assets in the banking book	-6,571
Risk weighted assets (4)	461,107
Core Tier 1 capital (4)	46,232
Core Tier 1 capital ratio, % (4)	10.0%
Additional capital needed to reach a 5 % Core Tier 1 capital benchmark	0

Outcomes of the adverse scenario at 31 December 2012, excluding all mitigating actions taken in 2011	%
Core Tier 1 Capital ratio	7.3%

Outcomes of the adverse scenario at 31 December 2012, including recognised mitigating measures as of 30 April 2011		million EUR, %
2 yr cumulative operating profit before impairments		17,340
of which 2 yr cumulative losses from the stress in the trading book	-6,137	
of which valuation losses due to sovereign shock	-752	
2 yr cumulative impairment losses on financial and non-financial assets in the banking book		-12,764
Risk weighted assets		657,378
Core Tier 1 Capital		48,039
Core Tier 1 Capital ratio (%)		7.3%
Additional capital needed to reach a 5 % Core Tier 1 capital benchmark		0

Effects from the recognised mitigating measures put in place until 30 April 2011 (5)	
Equity raisings announced and fully committed between 31 December 2010 and 30 April 2011 (CT1 million EUR)	
Effect of government support publicly announced and fully committed in period from 31 December 2010 to 30 April 2011 on Core Tier 1 capital ratio (percentage points of CT1 ratio)	
Effect of mandatory restructuring plans, publicly announced and fully committed in period from 31 December 2010 to 30 April 2011 on Core Tier 1 capital ratio (percentage points of CT1 ratio)	

Additional taken or planned mitigating measures	percentage points contributing to capital ratio
Use of provisions and/or other reserves (including release of countercyclical provisions)	
Divestments and other management actions taken by 30 April 2011	
Other disinvestments and restructuring measures, including also future mandatory restructuring not yet approved with the EU Commission under the EU State Aid rules	
Future planned issuances of common equity instruments (private issuances)	
Future planned government subscriptions of capital instruments (including hybrids)	
Other (existing and future) instruments recognised as appropriate back-stop measures by national supervisory authorities	
Supervisory recognised capital ratio after all current and future mitigating actions as of 31 December 2012, % (6)	7.3%

Notes

(1) The stress test was carried using the EBA common methodology, which includes a static balance sheet

assumption and incorporates regulatory transitional floors, where binding (see http://www.eba.europa.eu/EU-wide-stress-testing/2011.aspx for the details on the EBA methodology).

(2) All capital elements and ratios are presented in accordance with the EBA definition of Core Tier 1 capital set up for the purposes of the EU-wide stress test, and therefore may differ from the definitions used by national supervisory authorities and/or reported by institutions in public disclosures.

(3) Neither baseline scenario nor the adverse scenario and results of the stress test should in any way be construed as a bank's forecast or directly compared to bank's other published information.

(4) Full static balance sheet assumption excluding any mitigating management actions, mandatory restructuring or capital raisings post 31 December 2010 (all government support measures and capital raisings fully paid in before 31 December 2010 are included).

(5) Effects of capital raisings, government support and mandatory restructuring plans publicly announced and fully committed in period from 31 December 2010 to 30 April 2011, which are incorporated in the Core Tier 1 capital ratio reported as the outcome of the stress test.

(6) The supervisory recognised capital ratio computed on the basis of additional mitigating measures presented in this section. The ratio is based primarily on the EBA definition, but may include other mitigating measures not recognised by the EBA methodology as having impacts in the Core Tier 1 capital, but which are considered by the national supervisory authorities as appropriate mitigating measures for the stressed conditions. Where applicable, such measures are explained in the additional announcements issued by banks/national supervisory authorities. Details of all mitigating measures are presented in the worksheet "3 - Mitigating measures).

Results of the 2011 EBA EU-wide stress test: Aggregate information and evolution of capital (1-4)

Name of the bank: Barclays

All in million
EUR, or %

A. Results of the stress test based on the full static balance sheet assumption without any mitigating actions, mandatory restructuring or capital raisings post 31 December 2010 (all government support measures fully paid in before 31 December 2010 are included)

Capital adequacy	2010	Baseline scenario 2011	Baseline scenario 2012	Adverse scenario 2011	Adverse scenario 2012
Risk weighted assets (full static balance sheet assumption)	461,107	527,522	541,911	595,739	657,378
Common equity according to EBA definition	46,232	49,141	54,148	46,101	48,039
of which ordinary shares subscribed by government					
Other existing subscribed government capital (before 31 December 2010)					
Core Tier 1 capital (full static balance sheet assumption)	46,232	49,141	54,148	46,101	48,039
Core Tier 1 capital ratio (%)	10.0%	9.3%	10.0%	7.7%	7.3%

B. Results of the stress test recognising capital issuance and mandatory restructuring plans publicly announced and fully committed before 31 December 2010

Capital adequacy	2010	Baseline scenario 2011	Baseline scenario 2012	Adverse scenario 2011	Adverse scenario 2012
	461,107	527,522	541,911	595,739	657,378

Risk weighted assets (full static balance sheet assumption)					
Effect of mandatory restructuring plans, publicly announced and fully committed before 31 December 2010 on RWA (+/-)					
Risk weighted assets after the effects of mandatory restructuring plans publicly announced and fully committed before 31 December 2010	461,107	527,522	541,911	595,739	657,378
Core Tier 1 Capital (full static balance sheet assumption)	46,232	49,141	54,148	46,101	48,039
Effect of mandatory restructuring plans, publicly announced and fully committed before 31 December 2010 on Core Tier 1 capital (+/-)					
Core Tier 1 capital after the effects of mandatory restructuring plans publicly announced and fully committed before 31 December 2010	46,232	49,141	54,148	46,101	48,039
Core Tier 1 capital ratio (%)	10.0%	9.3%	10.0%	7.7%	7.3%

C. Results of the stress test recognising capital issuance and mandatory restructuring plans publicly announced and fully committed before 30 April 2011

Capital adequacy	2010	Baseline scenario		Adverse scenario	
		2011	2012	2011	2012
Risk weighted assets after the effects of mandatory restructuring plans publicly announced and fully committed before 31 December 2010	461,107	527,522	541,911	595,739	657,378
Effect of mandatory restructuring plans, publicly announced and fully committed in period from 31 December 2010 to 30 April 2011 on RWA (+/-)					
Risk weighted assets after the effects of mandatory restructuring plans publicly announced and fully committed before 30 April 2011		527,522	541,911	595,739	657,378
of which RWA in banking book		349,229	350,149	370,596	384,240
