#### O/2/MICRO INTERNATIONAL LIMITED AND SUBSIDIARIES

#### NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

#### 1. BASIS OF PRESENTATION

The accompanying consolidated financial statements have been prepared by the Company, without audit, pursuant to the rules and regulations of the Securities and Exchange Commission and, in management's opinion, include all adjustments, consisting only of normal recurring accruals necessary to fairly present the resulting operations for the indicated periods. Certain information and footnote disclosures normally included in financial statements prepared in accordance with generally accepted accounting principles have been condensed or omitted pursuant to such rules and regulations. Although the Company believes that the disclosures are adequate to make the information presented not misleading, it is suggested that these consolidated financial statements be read in conjunction with the consolidated financial statements and the notes thereto included in the Company's Form 20-F registration statement for the year ended December 31, 2003.

#### 2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

#### a. Use of estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect certain reported amounts and disclosures. Accordingly, actual results could differ from those estimates.

#### b. Recent accounting pronouncements not yet adopted

In January 2003, the Financial Accounting Standards Board ("FASB") released Interpretation No. 46, "Consolidation of Variable Interest Entities" ("FIN 46") which requires that all primary beneficiaries of Variable Interest Entities ("VIE") consolidate that entity. FIN 46 is effective immediately for VIEs created after January 31, 2003 and to VIEs in which an enterprise obtains an interest after that date. It applies in the first fiscal year or interim period beginning after June 15, 2003 to VIEs in which an enterprise holds a variable interest it acquired before February 1, 2003. In December 2003, the FASB published a revision to FIN 46 ("FIN 46R") to clarify some of the provisions of the interpretation and to defer the effective date of implementation for certain entities. Under the guidance of FIN 46R, entities that do not have interests in structures that are commonly referred to as special purpose entities (SPE's) are required to apply the provisions of the interpretation in financial statements for periods ending after March 14, 2004. The Company does not have interests in special purpose entities and the adoption of FIN 46R did not impact the Company's financial statements.

	\$ ====	64,158	\$ ====	53,923

The Company's gross unrealized gains and losses at March 31, 2004 were

\$160,000 and \$97,000, respectively, and at December 31, 2003 were \$196,000 and \$47,000, respectively.

7

#### 6. LONG-TERM INVESTMENTS

	March 31, 2004		December 31, 2003	
	(Unaudited) (In Thousands)			3)
Cost method X-FAB Semiconductor Foundries AG 360 Degree Web Ltd. (360 Degree Web) Etrend Hightech Corporation (Etrend) GEM Services, Inc. Silicon Genesis Corporation	\$	4,968 1,750 647 500		
	\$ ====	7 <b>,</b> 505	\$ ====	7,865

On January 3, 2003, the Company exercised its option to convert its convertible loans of \$1,750,000 in 360 Degree Web to 2,083,333 Series B preference shares of capital stock at \$0.36 per share and 1,000,000 Series B2 preference shares of capital stock at \$1.00 per share. 360 Degree Web designs, develops and markets intelligent security software solutions that provide secure computing environment for personal computer mobile devices and the internet. After the conversion, the Company had a 35.2% ownership in 360 Degree Web. The Company did not participate in 360 Degree Web's financing during 2003 and the ownership was diluted to 29.3% as of December 31, 2003. At December 31, 2003, one of the Company's directors serves as a director of 360 Degree Web. In addition, the Company does not actively participate in the decision-making process at 360 Degree Web. Management of 360 Degree Web owns more than 50% of the outstanding voting shares and 100% of the Series A voting preferred shares which has more characteristics of common stock than the other preferred shares. Therefore, the Company accounts for the investment under the cost method of accounting.

In March 2004, the Company sold 1,000,000 shares of its stock in 360 Degree Web and recognized a gain of \$340,000. Upon completion of the transaction, the Company's ownership was reduced to 19.8%.

The Company invested in Etrend's ordinary shares in December 2002 and July 2003. Etrend is a wafer probing, packing and testing company. As of December 31, 2003, the Company acquired 2,189,288 shares for \$647,000, which represents approximately 12.5% ownership of Etrend. The Company invested additional \$320,000 in Etrend's financing in March 2004 and the Company's ownership was reduced to 11.2% as of March 31, 2004.

#### 7. INCOME TAX

The effective income tax rate for the three months ended March 31 was 11.9% in 2004 and 13.8% in 2003, respectively.

#### 8. EARNINGS PER SHARE

The following table shows the calculation of basic and diluted earnings per share:

All numbers in thousands except earnings per share

	Three Months Ended  March 31			
			2003	
Basic earnings per share:	(Unaudited)			
Net income		4,206		1,687
Weighted average shares outstanding - basic		39,054		38,091
Earnings per share - basic		0.11		
Diluted earnings per share:				
Net income		4,206		
Weighted average shares outstanding - basic		39,054		38,091
Effect of dilutive securities: Options Warrants		1,563 -		737 
Weighted average shares outstanding - diluted		40,617		
Earnings per share - diluted		0.10		0.04

#### 9. OBLIGATIONS UNDER CAPITAL LEASE

The Company leases office space and certain equipment under non-cancellable operating lease agreements that expire at various dates through June 2006. The Company's office lease provides for periodic rent increases based on the general rate of inflation. The Company also leases certain equipment under a capital lease that expires in May 2004. There are provisions in the lease that provides for a bargain purchase option upon the expiration of the lease. Capital lease obligations are secured by the related equipment and the total costs of the equipment under capital lease were both \$165,000 as of March 31, 2004 and as of March 31, 2003. Accumulated amortization was \$163,000 as of March 31, 2004 and \$162,000 as of December 31, 2003, respectively.

As of March 31, 2004, minimum lease payments under all operating leases were as follows:

Operating
Leases

Year

(In Thousands)

2004 2005 2006 2007	\$	952 583 113 -
2008  Total minimum lease payments	 \$ ====	1,648

9

#### 10. RELATED PARTY TRANSACTIONS

In 2001, James Keim, one of the Company's directors, accepted the assignment of Head of Marketing and Sales in the Cayman Islands, and moved to the Cayman Islands in December 2001. In connection with the move and to assist Mr. Keim to purchase a residence in the Cayman Islands, the Company entered into a term loan agreement with Mr. Keim in February 2002, under which the Company made an interest free, unsecured loan in the amount of \$400,000 to Mr. Keim. The loan is repayable in February 2007. As of March 31, 2004, \$18,000 had been repaid.

#### 11. CONTINGENCIES

Monolithic Power Systems, Inc. ("MPS"), a privately held company in Los Gatos, California, USA has alleged in a counterclaim that certain products of the Company infringe on two of MPS' patents. Litigation on such claim is pending in the United States District Court in the Northern District of California. Trial is currently scheduled for August 2004.

While the Company cannot make any assurance regarding the eventual resolution of this matter, the Company does not believe the final outcome will have a material adverse effect on its consolidated results of operations or financial condition.

The Company, as a normal course of business, is a party to various litigation matters, legal proceedings and claims. These actions may be in various jurisdictions, and may involve patent protection and/or patent infringement. While the results of such litigations and claims cannot be predicted with certainty, the final outcome of such matters is not expected to have a material adverse effect on its consolidated financial position or results of operations. No assurance can be given, however, that these matters will be resolved without the Company becoming obligated to make payments or to pay other costs to the opposing parties, with the potential for having an adverse effect on the Company's financial position or its results of operations.

#### 12. SEGMENT INFORMATION

The Company designs, develops and markets innovative power management and security components for mobile communication, computer, information appliance and LCD products. The Company's integrated circuit products are produced with digital, analog, and mixed signal integrated circuit manufacturing processes. The Company's Chief Operating Decision Maker ("CODM"), the Chief Executive Officer, reviews information on an enterprise-wide basis to assess performance and allocate resources so the Company has one reporting segment.

Net revenues from unaffiliated customers by geographic region are based on the customer's bill-to location and are as follows:

Three Months Ended

March 31,

2004 2003

	 \$ ====	4,841	 \$ ====	4,880

During the quarter ended March 31, 2004, one customer accounted for 10% or more of net revenues (10.4%). During the quarter ended March 31, 2003, three customers accounted for 10% or more of net revenues (20.3%, 10.7% and 10.1%).

11

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following information should be read in conjunction with the interim financial statements and the notes thereto in Part I, Item 1 of this quarterly report and with Operating and Financial Review and Prospects contained in the Company's Annual Report on Form 20-F (the "Annual Report").

#### OVERVIEW

Asia

United States

We design, develop and market high performance mixed signal integrated circuits for power management, power saving applications and computer security applications. Our net sales have been derived primarily from the sale of integrated circuit products to customers in the computer, consumer electronics, industrial and communications markets.

We utilize a "fabless" semiconductor business model, which means we focus on designing, developing and marketing products, while having these products manufactured by large independent semiconductor foundries. Because we

are a fabless semiconductor company, we do not need to invest significant capital to manufacture semiconductor devices, and can take advantage of some of the cost-efficiencies of third-party foundries. We place purchase orders with third parties for specific quantities of packaged semiconductor devices or wafers at set prices. We also use third parties to test and assemble our products, which reduces the capital we need to invest in these activities.

#### RESULTS OF OPERATIONS

Net Sales. Net sales for the three months ended March 31, 2004 were \$22.2 million, an increase of \$2.9 million or 14.8% from \$19.3 million for the three months ended March 31, 2003. The increase in net sales reflects increased unit shipments of our existing products as well as shipments of new products.

Gross Profit. Gross profit for the three months ended March 31, 2004 was \$12.8 million, an increase of \$1.8 million or 16.8% from \$11.0 million for the three months ended March 31, 2003. This increase in dollar amount was due to increased sales of products. We expect that our gross profit as a percentage of net sales will fluctuate in the future as a result of the stages of our products in their life cycles, variations in our product mix, the timing of our product introductions and specific product manufacturing costs.

Research and Development Expenses. Research and development expenses for the three months ended March 31, 2004 were \$4.6 million, a decrease of \$351,000 or 7.1% from \$4.9 million for the three months ended March 31, 2003. This decrease was primarily due to re-arrangement of several shuttle runs or shared engineering test wafers.

Selling, General and Administrative Expenses. Selling, general and administrative expenses for the three months ended March 31, 2004 were \$4.3 million, a decrease of \$60,000 or 1.4% from \$4.3 million for the three months ended March 31, 2003. This decrease in absolute dollar amount was primarily due to decreased expenses relating to intellectual property protection activities offset by the hiring of additional personnel, traveling, and other expenses associated with the hiring of additional personnel. We expect that selling, general and administrative expenses will continue to increase in dollar amount for the foreseeable future.

Non-operating Income-net. Non-operating income-net for the three months ended March 31, 2004 was \$796,000, an increase of \$565,000 from \$231,000 for the three months ended March 31, 2003, primarily reflecting an increase in gain on sale of long-term investments and foreign exchange gain.

Income Taxes. Income tax expenses for the three months ended March 31, 2004 was \$566,000, an increase of \$296,000 from \$270,000 for the three months ended March 31, 2003. The effective income tax rate for three months ended March 31, 2004 was 11.9% and 13.8% for the three months ended March 31, 2003. The effective rate was lower for the three months ended March 31, 2004 primarily due to the sales mix in different countries.

12

Our quarterly results of operations have fluctuated significantly in the past and may continue to fluctuate in the future based on a number of factors, not all of which are in our control. In particular, our results of operations have fluctuated in the past due, among other things, to competitive pressures on selling prices; the volume of product sales; the timing and cancellation of customer orders; lengthy sales cycles; pricing concessions on volume sales; changes in product mix; product pricing from foundries; our ability to develop, introduce and market new products and technologies on a timely basis;

introduction of products and technologies by our competitors; and market acceptance of our and our customers' products. Our results of operations may also fluctuate in the future based on a number of factors, including but not limited to, those listed above, general business conditions in the semiconductor industry; general economic conditions; currency fluctuations; the availability of foundry capacity and raw materials, and our ability to expand and implement our sales and marketing programs. As a result of the foregoing factors, we believe period to period comparisons are not necessarily meaningful and should not be relied upon as indicative of future results.

#### LIQUIDITY AND CAPITAL RESOURCES

On March 31, 2004, we had \$149.1 million in total current assets, including \$59.9 million in cash and cash equivalents and \$64.2 million in short-term investments. Our operating activities provided \$3.3 million cash during the three months ended March 31, 2004. Additionally, our investing activities used cash of \$10.6 million in the three months ended March 31, 2004 and our financing activities provided cash of \$657,000 in the three months ended March 31, 2004. We expect our operating activities will continue to generate additional cash but we expect to continue to deposit more cash in the Taiwan courts for preliminary injunctions and provisional attachment actions. In May 2004, we purchased the 37,180 square foot building in Santa Clara, California housing our California operations. The purchase price was approximately \$4.6 million.

#### DISCLOSURE REGARDING FORWARD-LOOKING STATEMENTS

This Form 6-K contains statements of a forward-looking nature. These statements are made under the "safe harbor" provisions of the U.S. Private Securities Litigation Reform Act of 1995. You can identify these forward-looking statements by terminology such as "may," "will," "expects," "should," "could," "plans," "intends," "anticipates," "believes," "estimates," "predicts," "potential" or "continue" or the negative of these terms and other comparable terminology. These forward-looking statements include statements relating to our future gross profits, research and development expenses and selling, general and administrative expenses. The forward-looking statements contained in this Form 6-K involve known and unknown risks, uncertainties and other factors that may cause our or the industry's actual results, levels of activity, performance or achievements to be materially different from the future results, levels of activity, performance or achievements expressed or implied by these statements. Such risks and uncertainties include the stages of our products in their life cycles, variations in our product mix, the timing of our product introductions, specific product manufacturing costs, increased competition, introduction of new competing technologies and the increase of unexpected expenses. These factors also include, among other things, those risks outlined in our filings with the Securities and Exchange Commission, including our Annual Report, that could cause actual results to differ materially from the results contemplated by the forward-looking statements. We assume no obligation to update or revise any forward-looking information, whether as a result of new information, future events or otherwise.

#### ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURE ABOUT MARKET RISK

Market risk is the risk of loss related to adverse changes in market prices, including interest rates and foreign exchange rates, of financial instruments. In the normal course of business, our financial position is routinely subject to a variety of risks, including market risk associated with interest rate movements and currency rate movements on non-U.S. dollar denominated assets and liabilities, as well as collectibility of accounts receivable.

We regularly assess these financial instruments and their ability to

address market risk and have established policies and business practices to protect against the adverse effects of these and other potential exposures.

13

Interest Rate Risk

Our major market risk exposure is changing interest rates. Our exposure to market risk for changes in interest rates relates primarily to our investments in US treasury bills, time deposits, government and corporate bonds.

We maintain an investment portfolio consisting mainly of fixed income securities. These securities are subject to interest rate risk and will fall in value if market interest rates increase. If market rates were to increase immediately and uniformly by 10.0% from the levels at March 31, 2004, the fair value of the portfolio would decline by an immaterial amount. We presently intend to treat our fixed income investments as available for sale, and therefore we do not expect our operating results or cash flows to be affected to any significant degree by the effect of a sudden short-term change in market interest rate exposures. We did not purchase or hold any derivative financial instruments for trading purposes.

The table below provides information about our financial instruments whose maturity dates are greater than three months as of March 31, 2004.

	EXPECTED MATURITY DATES					
	2004	2005	2006	2007	2008 AND THEREAFTER	TOTAI CARRYI VALUI
	(in thousands)					
US Treasury Bills Fixed rate (US\$)	43,602	_	_	_	-	43,
Government Bonds: Fixed rate (US\$) Time Deposits:	1,189	_	5,251	6 <b>,</b> 784	1,616	14,

EVDECTED MATHDITY DATES

#### Foreign currency risk

Corporate Bonds

Fluctuations in exchange rates may adversely affect our financial results. The functional currencies for our foreign subsidiaries are the local currency. As a result, certain of our assets and liabilities, including certain bank accounts, accounts receivable, restricted assets and accounts payable, exist in non-U.S. dollar denominated currencies such as New Taiwan Dollar, which are sensitive to foreign currency exchange rate fluctuations. As of March 31, 2004, we held approximately \$15.3 million in government bonds, certificates of deposits, time deposits and demand accounts denominated in New Taiwan Dollars.

Fixed rate (US\$).................. 5,866

We have not engaged in hedging techniques designed to mitigate foreign currency exposures and we may experience economic loss as a result of foreign currency exchange fluctuations. In the three month period ended March 31, 2004, we experienced gains of \$222,000 due to foreign currency exchange fluctuations,

11,

5,

which are reflected in the results of operations
