The blended average selling price (ASP) rose 2% in US dollar terms during 4Q05 due to increasing demand for advanced process technologies. The percentage of revenue from advanced 90nm business increased to 15%, and is 11% of revenue in 2005. Revenue from the communication segment increased to 54% of total revenue in 4Q05 from 47% in 3Q05.

We are pleased to report another quarter of sequential growth, said UMC Chairman and CEO, Dr. Jackson Hu. Increased demand for wireless communication products, PC chipsets and LCD drivers in the computer segment was the key driver for the growth. Higher shipments of leading-edge technologies were also a primary reason for the 2% sequential increase in blended ASP. As a result, our Q4 revenue grew 16.5% and gross profit increased 68.3% sequentially.

Dr. Hu continued, Many of you may already know that the UMC Board of Directors elected me to the position of Chairman at their last meeting following the resignation of former UMC Chairman Bob Tsao and former vice Chairman John Hsuan on January 9. I would like to take this opportunity to comment on my vision of UMC's direction going forward.

In order to best leverage Taiwan's unique environment and business culture, UMC will reinvent itself in the spirit of a start-up company. The attributes of a start-up company include solid execution, a low profile attitude, a strong focus on customer satisfaction, and the ability to quickly deliver the technologies and services that customers require. We are fully prepared to use the considerable financial strength that we have accumulated over the years to fund aggressive research and development programs, expand production capacity, and retain and hire the best people in the industry.

We will focus on our core operations, making a complete effort to maintain and further strengthen our technological leadership, and continue to improve our foundry service model. UMC has an excellent team, and over the last two years we have seen great improvement in many areas including the development of advanced process technologies, the enhancement of production efficiency, the expansion of our customer base, and the development of intellectual property. I am extremely proud of the accomplishments of UMC's world-class team, and you can expect to see a positive impact on our operating results in the near future.
