ANNUAL REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934
For the fiscal year ended December 31, 2006

OR

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934
For the transition period from _____ to _____

Commission File Number 1-15773

Cadence Financial Corporation

(Exact name of registrant as specified in its charter)

Mississippi
(State or Other Jurisdiction of

Incorporation or Organization)

301 East Main Street, Starkville, Mississippi
(Address of Principal Executive Offices)

Registrant's telephone number, including area code:

(662) 323-1341

64-0694775
(I.R.S. Employer

Identification No.)

39759
(Zip Code)

Securities registered pursuant to Section 12(b) of the Act:

Edgar Filing: CADENCE FINANCIAL CORP - Form 10-K

Common stock, \$1 par value
(Title of Class)

The NASDAQ Global Select Market
(Exchange on Which Registered)

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. Yes No

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act. Yes No

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K is not contained herein, and will not be contained, to the best of registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K.

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, or a non-accelerated filer. See definition of accelerated filer and large accelerated filer in Rule 12b-2 of the Exchange Act.

Large accelerated filer Accelerated filer Non-accelerated filer

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Act). Yes No

Aggregate market value of the voting stock held by nonaffiliates as of June 30, 2006, was approximately \$211,030,794, based on most recent sale.

The number of shares outstanding of the registrant's common stock as of February 28, 2007 is 11,888,932 shares.

Documents incorporated by reference

Portions of the Corporation's proxy statement for the 2007 annual meeting of shareholders are incorporated by reference into Part III and portions of the Corporation's annual report to shareholders are incorporated by reference into Part IV.

PART I**Forward-Looking Statements**

Certain information included in this report contains forward-looking statements and information that are based on management's beliefs and conclusions, drawn from certain assumptions and information currently available. The Private Securities Litigation Act of 1995 encourages the disclosure of forward-looking information by management by providing a safe harbor for such information. This discussion includes forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended (the Exchange Act). Although we believe that the expectations reflected in such forward-looking statements are reasonable, such forward-looking statements are based on numerous assumptions (some of which may prove to be incorrect) and are subject to risks and uncertainties, which could cause the actual results to differ materially from our expectations. When used in our report, the words anticipate, estimate, expect, objective, projection, forecast, goal and similar expressions are intended to identify forward-looking statements. In addition to any assumptions and other factors referred to specifically in connection with forward-looking statements, factors that could cause our actual results to differ materially from those contemplated in any forward-looking statements include, among others, increased competition, regulatory factors, economic conditions, changing interest rates, changing market conditions, availability or cost of capital, employee workforce factors, cost and other effects of legal and administrative proceedings, changes in federal, state or local laws and regulations and other factors identified in Item 1A, Risk Factors, and Item 7A, Quantitative and Qualitative Disclosures about Market Risk of this Annual Report and that may be discussed from time to time in our reports filed with the Securities and

Table of Contents

Exchange Commission subsequent to this report. We undertake no obligation to update or revise any forward-looking statements, whether as a result of changes in actual results, changes in assumptions or other factors affecting such statements.

ITEM 1 - BUSINESS

Cadence Financial Corporation

Cadence Financial Corporation (the Corporation), formerly known as NBC Capital Corporation, is a financial holding company, organized under the laws of the State of Mississippi. The Corporation's assets consist primarily of its investment in Cadence Bank, N.A. (Cadence or the Bank), a national banking corporation, and its primary activities are conducted through Cadence.

Following the close of business on August 17, 2006, the Corporation acquired SunCoast Bancorp, Inc. (SunCoast), the holding company for SunCoast Bank, a commercial bank operating in Sarasota and Manatee Counties, Florida. The acquisition was valued at approximately \$35.9 million, of which 45% was paid in cash and 55% was paid in shares of the Corporation's common stock. Option holders received the difference between the cash election price and the option price of their options, or an aggregate of approximately \$1.0 million.

Following the close of business on November 14, 2006, the Corporation acquired Seasons Bancshares, Inc. (Seasons), the holding company for Seasons Bank, headquartered in Blairsville, Georgia. The acquisition was an all-cash transaction valued at approximately \$17.6 million.

Cadence Bank, N.A.

Cadence is engaged in the general banking business and activities closely related to banking, as authorized by the banking laws and regulations of the United States. There were no significant changes in the Bank's business activities during 2006, other than the acquisitions described above, nor has there been any disposition of material amounts of assets. There are no major operational changes planned for the near future.

Cadence provides a complete line of wholesale and retail financial services, including mortgage loans and trusts. The customer base is well diversified and consists of business, industry, agriculture, government, education and individual accounts. Profitability and growth have been consistent throughout the Bank's history; however, both have slowed recently, as the Corporation has dealt with a very slow economy and low loan demand in its core Mississippi market area. In 2006, the Corporation took several steps to address this situation through its overall growth strategy, which included branch expansion in its existing higher growth markets, de novo branching in other high growth markets and external acquisitions.

Cadence is the largest commercial bank domiciled in the north central Golden Triangle area of Mississippi. In Mississippi, a total of twenty banking facilities and an operations/administration center serve the communities of Aberdeen, Amory, Brooksville, Columbus, Hamilton, Maben, New Hope, Philadelphia, West Point and Starkville. This area extends into six Mississippi counties with a radius of approximately 65 miles from the main office in Starkville.

The Bank also serves the Tuscaloosa and Hoover, Alabama areas with six banking facilities, and the Memphis, Tennessee area with five banking facilities and an operations/data center. In 2006, Cadence opened its first banking facility in Brentwood, Tennessee (Nashville MSA). Also in 2006, the SunCoast and Seasons acquisitions added a total of five Cadence banking facilities—three in Sarasota and Bradenton, Florida and two in Blairsville and Blue Ridge, Georgia.

The following chart reflects, as of December 31, 2006, the distribution of total assets, loans, deposits and branches in the states in which Cadence conducts its business:

State	Assets	Loans	Deposits	Branches
Alabama	9%	14%	12%	16%
Florida	7%	10%	6%	8%
Georgia	4%	6%	5%	6%
Mississippi	57%	34%	60%	54%
Tennessee	23%	36%	17%	16%
	100%	100%	100%	100%

Edgar Filing: CADENCE FINANCIAL CORP - Form 10-K

Galloway-Chandler-McKinney Insurance Agency, Inc. (GCM), a wholly owned subsidiary of Cadence, operates as an independent insurance agency with its primary source of revenue coming from commissions and premiums on the sale of property and casualty insurance, title insurance, life insurance, annuities and other commercial lines. GCM has locations in Aberdeen, Amory, Columbus, Starkville and West Point, Mississippi. At December 31, 2006, GCM had total assets of approximately \$5.1 million, and for the year ended December 31, 2006, reported gross revenues of approximately \$4.6 million.

Table of Contents

Cadence has two other wholly owned subsidiaries, NBC Service Corporation (Service), and NBC Insurance Services of Alabama (Insurance). Service was formed to provide additional financial services that otherwise might not be provided by Cadence. For 2006, its primary activity was limited to its investment in Commerce National Insurance Company (CNIC). CNIC is a credit life insurance company whose primary source of income is from investment income on securities held in its portfolio. In 2002, the Bank discontinued selling credit life insurance on loans. As a result, the Corporation plans to allow CNIC 's outstanding insurance policies to run-off over the next several years and then to dissolve and liquidate CNIC. Insurance was formed in 1999 for the purpose of selling annuity products in the state of Alabama. For 2006, its activities were not significant.

Competition

Cadence encounters strong competition in each of its markets, based upon interest rates offered on deposit accounts, interest rates charged on loans, other credit and service charges relating to loans, the quality and scope of services provided, the convenience of banking facilities and, in the case of loans to commercial borrowers, relative lending limits.

Cadence and its subsidiaries currently serve six counties and ten municipalities in north central Mississippi. In this area, the Bank competes directly with numerous banking institutions, credit unions, finance companies, brokerage firms, mortgage companies and insurance companies. The competing banking institutions range in asset size from approximately \$508 million to in excess of \$86 billion (size of parent companies). Cadence is the largest bank domiciled in its immediate service area.

Cadence also serves the cities of Tuscaloosa and Hoover, Alabama; Memphis and Brentwood, Tennessee; Sarasota and Bradenton, Florida; and Blairsville and Blue Ridge, Georgia. In these markets, the Bank competes with numerous financial institutions ranging in asset size from approximately \$130 million to \$1.4 trillion (size of parent companies). Cadence also competes with numerous credit unions, finance companies, brokerage firms, mortgage companies and insurance companies in these markets.

Refer to Item 1A - Risk Factors, for discussion of the Corporation 's risks related to competition.

Supervision and Regulation

The Corporation and the Bank are subject to state and federal banking laws and regulations which impose specific requirements and restrictions on, and provide for general regulatory oversight with respect to, virtually all aspects of operations. To the extent that the following summary describes statutory or regulatory provisions, it is qualified in its entirety by reference to the particular statutory and regulatory provisions. Refer to Item 1A Risk Factors, for discussion of the Corporation 's risks relating to industry regulations.

Beginning with the enactment of the Financial Institutions Reform, Recovery and Enforcement Act of 1989 (FIRREA) and following with the Federal Deposit Insurance Corporation Improvement Act (FDICIA), which was enacted in 1991, numerous additional regulatory requirements have been placed on the banking industry, and additional changes have been proposed. The operations of the Corporation and its subsidiaries may be affected by legislative changes and the policies of various regulatory authorities, and we are unable to predict the nature or the extent of the effect that fiscal or monetary policies, economic control or new federal or state legislation may have on future business and earnings.

The Corporation is a bank holding company within the meaning of the Bank Holding Company Act of 1956 (the BHC Act) and a financial holding company under the Gramm-Leach-Bliley Financial Modernization Act of 1999 (the GLB Act) and is registered as such with the Board of Governors of the Federal Reserve System (the Federal Reserve Board). As a financial holding company, the Corporation is required to file with the Federal Reserve Board an annual report and such other information as may be required. The Federal Reserve Board also performs examinations of the Corporation and has the authority to regulate provisions of certain holding company debt.

The BHC Act restricts the Corporation 's non-banking activities to those that are determined by the Federal Reserve Board to be financial in nature, incidental to such financial activity or complementary to a financial activity. The BHC Act does not place territorial restrictions on the activities of non-bank subsidiaries of holding companies. The Corporation 's banking subsidiary is subject to limitations with respect to transactions with affiliates.

The BHC Act requires every holding company to obtain the prior approval of the Federal Reserve Board before acquiring substantially all the assets of or direct or indirect ownership or control of more than 5% of the voting shares of any

Table of Contents

bank that is not already majority-owned. The BHC Act also prohibits a holding company, with certain exceptions, from engaging in or acquiring direct or indirect control of more than 5% of the voting shares of any company engaged in non-banking activities. One of the principal exceptions to these prohibitions is for engaging in or acquiring shares of a company engaged in activities found by the Federal Reserve Board by order or regulation to be so closely related to banking or managing banks as to be a proper incident thereto. The BHC Act permits the acquisition by a holding company of more than 5% of the outstanding voting shares of a bank located outside the state in which the operations of its banking subsidiaries are principally conducted, subject to certain state laws, including the establishment by states of a minimum age of their local banks before such banks can be acquired by an out-of-state institution. The BHC Act and regulations of the Federal Reserve Board also prohibit a holding company and its subsidiaries from engaging in certain tie-in arrangements in connection with any extension of credit or provision of any property or services.

In addition, and subject to certain exceptions, the BHC Act and the Change in Bank Control Act require Federal Reserve Board approval prior to any person or company acquiring control of a holding company. Control is conclusively presumed to exist if an individual or company acquires 25% or more of any class of voting securities of a bank holding company. Control is rebuttably presumed to exist if a person acquires 10% or more, but less than 25%, of any class of voting securities and either the company has registered securities under Section 12 of the Exchange Act or no other person owns a greater percentage of that class of voting securities immediately after the transaction.

In accordance with Federal Reserve Board policy, the Corporation is expected to act as a source of financial strength to its subsidiaries. The Federal Reserve Board may require a holding company to terminate any activity or relinquish control of a non-bank subsidiary (other than a non-bank subsidiary of a bank) upon the Federal Reserve Board's determination that such activity or control constitutes a serious risk to the financial soundness or stability of any subsidiary depository institution of the holding company. Further, federal bank regulatory authorities have additional discretion to require a holding company to divest itself of any bank or non-bank subsidiary if the agency determines that divestiture may aid the depository institution's financial condition.

Dividends paid by the Corporation are substantially provided from dividends from Cadence. Generally, the approval of the Office of the Comptroller of the Currency (the OCC) is required if the total of all dividends declared by a bank in any calendar year exceeds the total of its net profits for that year combined with its retained net profits of the preceding two years. For the year 2007, Cadence has available approximately \$11.8 million plus its net income for 2007 to pay as dividends, without obtaining permission from the OCC.

The Federal Reserve Board, Federal Deposit Insurance Corporation (FDIC) and OCC have established risk-based capital guidelines for holding companies, such as the Corporation, and for the subsidiary banks of holding companies, such as Cadence. The capital-based regulatory framework contains five categories of compliance with regulatory capital requirements, including well capitalized, adequately capitalized, undercapitalized, significantly undercapitalized, and critically undercapitalized. The Corporation's risk-based capital strategy is to maintain sufficient capital levels to qualify the Corporation's bank subsidiary as well capitalized under the guidelines set forth by the FDICIA. Maintaining capital ratios at the well capitalized level avoids certain restrictions, which, for example, could impact the FDIC assessment, trust services and asset/liability management of the Corporation's subsidiary bank. At December 31, 2006, the Tier 1 and total capital ratios, respectively, of the Corporation (consolidated) and Cadence (individually) were well above the minimum 6% and 10% levels required to be categorized as well capitalized insured depository institutions.

The FDIC, OCC and Federal Reserve Board have historically had common capital adequacy guidelines involving minimum (a) leverage capital and (b) risk-based capital requirements:

(a) The first requirement establishes a minimum ratio of capital as a percentage of total assets. The FDIC, OCC and Federal Reserve Board require institutions to maintain a minimum leverage ratio of Tier 1 capital (as defined) to total average assets based on the institution's rating under the regulatory CAMELS rating system. Institutions with CAMELS ratings of 1 that are not anticipating or experiencing significant growth and have well-diversified risk are required to maintain a minimum leverage ratio of 3 percent. An additional 100 to 200 basis points are required for all but these most highly rated institutions. At December 31, 2006, the Corporation's leverage capital ratio was 9.2%.

(b) The second requirement also establishes a minimum ratio of capital as a percentage of total assets, but gives weight to the relative risk of each asset. The FDIC, OCC and Federal Reserve Board require institutions to maintain a minimum ratio of Tier 1 capital to risk-weighted assets of 4 percent. Banks must also maintain a minimum ratio of total capital to risk-weighted assets of 8 percent. At December 31, 2006, the Corporation's Tier 1 and total capital ratios were 11.7% and 12.5%, respectively.

The OCC is the primary supervisory authority for Cadence. The OCC regulates or monitors virtually all areas of operations, including security devices and procedures, adequacy of capitalization and loss reserves, loans, investments,

Table of Contents

borrowings, deposits, mergers, issuance of securities, payment of dividends, interest rates payable on deposits, interest rates or fees chargeable on loans, establishment of branches, corporate reorganizations, maintenance of books and records, and adequacy of staff training to carry on safe lending and deposit gathering practices. The OCC also imposes limitations on the aggregate investment by a national bank in real estate, bank premises, and furniture and fixtures. In addition to regular examinations, each national bank must furnish to its regulator quarterly reports containing a full and accurate statement of its affairs.

Banks are subject to the provisions of Sections 23A and 23B of the Federal Reserve Act. Section 23A places limits on the amount of loans or extensions of credit to, investments in, or certain other transactions with affiliates and on the amount of advances to third parties collateralized by the securities or obligations of affiliates. Section 23B, among other things, prohibits an institution from engaging in certain transactions with affiliates unless the transactions are on terms substantially the same, or at least as favorable to the institution, as those prevailing at the time for comparable transactions with non-affiliated companies.

The Bank is subject to certain restrictions on extensions of credit to executive officers, directors, certain principal shareholders and their related interests. Such extensions of credit (i) must be made on substantially the same terms, including interest rates and collateral, as those prevailing at the time for comparable transactions with third parties, and (ii) must not involve more than the normal risk of repayment or present other unfavorable features.

The GLB Act was signed into law in November 1999, and allows banks to engage in a wider range of non-banking activities, including greater authority to engage in securities and insurance activities through the use of financial holding companies. The expanded powers, which became effective March 11, 2000, generally are available to banks only if the Corporation and its bank subsidiary remain well capitalized and well managed, and have a satisfactory Community Reinvestment Act (CRA) rating. Under the GLB Act, a national bank may engage in expanded financial activities through a financial subsidiary, provided the aggregate assets of all of its financial subsidiaries do not exceed the lesser of 45 percent of the bank's assets or \$50 billion. A financial subsidiary may underwrite any financial product other than insurance and may sell any financial product, including title insurance. A national bank itself may not sell title insurance, however, unless the state in which the bank is located permits state banks to sell title insurance.

National banks are required by the National Bank Act to adhere to branch office banking laws of the states in which they operate. Cadence may open branches throughout Mississippi, Alabama, Tennessee, Florida and Georgia with the prior approval of the OCC. In addition, with prior regulatory approval, Cadence is able to acquire existing banking operations in Mississippi, Alabama, Tennessee, Florida and Georgia. Furthermore, federal legislation permits interstate branching. The law also permits out of state acquisitions by bank holding companies (subject to veto by new state law), interstate branching by banks if allowed by state law, interstate merging by banks, and de novo branching by national banks if allowed by state law. Effective June 1, 1997, the Interstate Banking Act allows banks with different home states to merge, unless a particular state opts out of the statute. The Interstate Banking Act also permits national and state banks to establish de novo branches in another state if the state law applies equally to all banks and expressly permits all out-of-state banks to establish de novo branches.

The CRA requires that, in connection with examinations of financial institutions within their respective jurisdictions, the Federal Reserve, the FDIC or the OCC shall evaluate the record of the financial institutions in meeting the credit needs of their local communities, including low and moderate income neighborhoods, consistent with the safe and sound operation of those institutions. These factors are also considered in evaluating mergers, acquisitions and applications to open a branch or facility.

Interest and certain other charges collected or contracted by banks are often subject to state usury laws and certain federal laws concerning interest rates. The loan operations are also subject to certain federal laws applicable to credit transactions. These include but are not limited to: (i) the federal Truth-In-Lending Act, governing disclosures of credit terms to consumer borrowers; (ii) the Home Mortgage Disclosure Act of 1975, requiring financial institutions to provide information to enable the public and public officials to determine whether a financial institution will be fulfilling its obligation to help meet the housing needs of the community it serves; (iii) the Equal Credit Opportunity Act, prohibiting discrimination on the basis of race, creed or other prohibited factors in extending credit; and (iv) the rules and regulations of the various federal agencies charged with the responsibility of implementing such federal laws. The deposit operations also are subject to certain laws and regulations, including but not limited to, the Right to Financial Privacy Act, which imposes a duty to maintain confidentiality of consumer financial records and prescribes procedures for complying with administrative subpoenas of financial records, and the Electronic Funds Transfer Act and Regulation E issued by the Federal Reserve Board to implement that act, which governs automatic deposits to and withdrawals from deposit accounts and customers' rights and liabilities arising from the use of automated teller machines and other electronic banking services.

Cadence is a member of the FDIC and its deposits are insured as provided by law.

Table of Contents

CNIC, GCM, and NBC Insurance Services of Alabama, Inc. are subject to regulation by the applicable state agencies. These agencies set reserve requirements and reporting standards and establish regulations, all of which affect business operations.

In 2001, the Uniting and Strengthening America by Providing Appropriate Tools Required to Intercept and Obstruct Terrorism Act of 2001 (the USA Patriot Act) was signed into law. The USA Patriot Act broadened anti-money laundering requirements on financial institutions, including national banks such as Cadence. Among its provisions, the USA Patriot Act requires a financial institution: (i) to establish an anti-money laundering program; (ii) to establish due diligence policies, procedures and controls with respect to its private banking accounts and correspondent banking accounts involving foreign individuals and certain foreign banks; and (iii) to avoid establishing, maintaining, administering or managing correspondent accounts in the United States for, or on behalf of, a foreign bank that does not have a physical presence in any country. In addition, the USA Patriot Act contains a provision encouraging cooperation among financial institutions, regulatory authorities and law enforcement authorities with respect to individuals, entities and organizations engaged in, or reasonably suspected of engaging in, terrorist acts or money laundering activities.

The Corporation's common stock is registered with the Securities and Exchange Commission (SEC) under the Exchange Act. Consequently, the Corporation is subject to the information, proxy solicitation, insider trading and other restrictions and requirements of the SEC under the Exchange Act.

The Corporation's common stock is traded on The NASDAQ Global Select Market (NASDAQ) and is subject to the rules and by-laws of NASDAQ. Penalties for violations of the rules can result in fines for the Corporation and in certain cases the suspension of trading in the Corporation's common stock or delisting.

In 2002, the Sarbanes-Oxley Act of 2002 (the Sarbanes-Oxley Act) was signed into law. This Act attempts to strengthen the independence of public company auditors by, among other things, (i) prohibiting public company auditors from providing certain non-audit services to their audit clients, (ii) requiring a company's audit committee to pre-approve all audit and non-audit services being provided by its independent auditor, (iii) requiring the rotation of audit partners and (iv) prohibiting an auditor from auditing a client that has as its chief executive officer, chief financial officer, chief accounting officer or controller a person that was employed by the auditor during the previous year.

The Sarbanes-Oxley Act also seeks to enhance the responsibility of corporate management by, among other things, (i) requiring the chief executive officer and chief financial officer of public companies to provide certain certifications in their companies' periodic reports regarding the accuracy of the periodic reports filed with the Securities and Exchange Commission, (ii) prohibiting officers and directors of public companies from fraudulently influencing an accountant engaged in the audit of the company's financial statements, (iii) requiring chief executive officers and chief financial officers to forfeit certain bonuses in the event of a misstatement of financial results, (iv) prohibiting officers and directors found to be unfit from serving in a similar capacity with other public companies and (v) prohibiting officers and directors from trading in the company's equity securities during pension blackout periods. In addition, public companies with securities listed on a national securities exchange or association must satisfy the following additional requirements: (i) the company's audit committee must appoint and oversee the company's auditors; (ii) each member of the company's audit committee must be independent; (iii) the company's audit committee must establish procedures for receiving complaints regarding accounting, internal accounting controls and audit-related matters; (iv) the company's audit committee must have the authority to engage independent advisors; and (v) the company must provide appropriate funding to its audit committee, as determined by the audit committee.

The Sarbanes-Oxley Act contains several provisions intended to enhance the quality of financial disclosures of public companies, including provisions that (i) require that financial disclosures reflect all material correcting adjustments identified by the company's auditors, (ii) require the disclosure of all material off-balance sheet transactions, (iii) require the reconciliation by public companies of pro forma financial information to financial statements prepared in accordance with generally accepted accounting principles, (iv) with certain limited exceptions, including an exception for financial institutions making loans in compliance with federal banking regulations, prohibit a public company from making personal loans to its officers and directors, (v) with certain limited exceptions, require directors, officers and principal shareholders of public companies to report a change in their ownership in the company's securities within two business days of the change, (vi) require a company's management to provide a report of management's assessment of the internal controls of the company in the company's annual report and requires an opinion from the company's independent auditors on management's report on internal controls, (vii) require public companies to adopt codes of conduct and ethics for senior executive officers and (viii) require a public company to disclose whether the company's audit committee has a financial expert as a member.

Table of Contents

The Sarbanes-Oxley Act imposes criminal liability for certain acts, including altering documents involving federal investigations, bankruptcy proceedings, and corporate audits and the act increases the penalties for certain offenses, including mail and wire fraud. In addition, the Sarbanes-Oxley Act gives added protection to corporate whistle-blowers.

Governmental Monetary Policies

As a bank chartered under the laws of the United States, Cadence is a member of the Federal Reserve System. Its earnings are affected by the fiscal and monetary policies of the Federal Reserve System, which regulates the national money supply in order to mitigate recessionary and inflationary pressures. The techniques used by the Federal Reserve System include setting the reserve requirements of depository institutions and establishing the discount rate on member bank borrowings. The Federal Reserve System also conducts open market operations in United States government securities. Refer to Item 1A - Risk Factors, for discussion of the Corporation's risks relating to governmental monetary policies.

Sources and Availability of Funds

The materials essential to the business of the Corporation and its subsidiaries consist primarily of funds derived from deposits and other borrowings in the financial markets. The availability of funds is primarily dependent upon the economic policies of the government, the economy in general and the institution's ability to compete in its markets. Refer to Item 1A - Risk Factors, for discussion of the Corporation's risks relating to governmental monetary policy, economic conditions, and competition.

Seasonality

Neither the Corporation nor any of its subsidiaries are engaged in a business that is seasonal in nature.

Dependence Upon A Single Customer

Neither the Corporation nor any of its subsidiaries are dependent upon a single customer or any small group of customers.

Available Information

The Corporation maintains an Internet address at www.cadencebanking.com. The Corporation makes available, free of charge on or through its Internet website, access to the Corporation's annual report on Form 10-K, quarterly reports on Form 10-Q and current reports on Form 8-K, and all amendments thereto filed pursuant to Section 13(a) of the Exchange Act, as soon as reasonably practicable after such material is filed with or furnished to the SEC. The Corporation is not incorporating the information on that website into this report, and the website and the information appearing on the website are not included in, and are not a part of, this report.

Personnel

At December 31, 2006, Cadence had 446 full-time employees and GCM had 42 full-time employees. The Corporation, Service, Insurance and CNIC had no employees at December 31, 2006.

Table of Contents

Executive Officers

The executive officers of the Corporation and a brief description of their principal employment during the last five years are listed below:

Name and Title	Age	Five-Year Experience
L. F. Mallory, Jr. Chairman and Chief Executive Officer, Cadence Financial Corporation and Cadence	64	Chairman and Chief Executive Officer, Cadence Financial Corporation and Cadence, since 1993
Mark A. Abernathy President and Chief Operating Officer and Chairman of Executive Committee, Cadence Financial Corporation and Cadence	50	President and Chief Operating Officer, Cadence Financial Corporation and Cadence, since 1997; Chairman of Executive Committee, Cadence Financial Corporation and Cadence, since 2006
Richard T. Haston Executive Vice President, Chief Financial Officer, and Assistant Secretary, Cadence Financial Corporation; Executive Vice President and Chief Financial Officer, Cadence	60	Executive Vice President, Chief Financial Officer, and Assistant Secretary, Cadence Financial Corporation, since July 2005; Executive Vice President, Chief Financial Officer, Treasurer, and Assistant Secretary, Cadence Financial Corporation, from January 1997 - July 2005; Executive Vice President and Chief Financial Officer, Cadence, since 1996
Shane C. Williams Vice President and Treasurer, Cadence Financial Corporation; Executive Vice President and Treasurer, Cadence	39	Vice President and Treasurer, Cadence Financial Corporation, and Executive Vice President and Treasurer, Cadence, since July 2005; Assistant Treasurer, United Community Bank, Blairsville, Georgia, from 2003 - July 2005; Portfolio Manager and Asset Liability Manager, Provident Bank, Cincinnati, Ohio, from 1999 - 2003
John R. Davis Vice President, Cadence Financial Corporation; Executive Vice President and Manager of Consumer Financial Services, Cadence	51	Vice President, Cadence Financial Corporation, since January 1999; Executive Vice President and Manager of Consumer Financial Services, Cadence, since December 2005; Senior Vice President and Trust Officer, Cadence, from January 1999 - December 2005

Table of Contents

Officers of the Corporation are elected annually by the Board of Directors at its January meeting and serve at the discretion of the Board of Directors.

ITEM 1A - RISK FACTORS

There are many risks and uncertainties related to the Corporation's business that may impair our business operations. Additional risks and uncertainties not presently known to us or that we currently deem immaterial also may impair our business operations. Any of the following risks could negatively impact our business, results of operations and financial condition. The risks discussed below also include forward-looking statements, and actual results may differ substantially from those discussed. See "Forward-Looking Statements" above.

We have a concentration of credit exposure in commercial real estate.

At December 31, 2006, we had approximately \$515.0 million in loans to borrowers in the commercial real estate industry, representing approximately 42.1% of our total loans outstanding as of that date. The real estate consists primarily of office buildings and shopping centers and also includes apartment buildings, owner-operated properties, warehouses and other commercial properties. These types of loans are generally viewed as having more risk of default than residential real estate loans. They are also typically larger than residential real estate loans and consumer loans and depend on cash flows from the property to service the debt. Cash flows may be affected significantly by general economic conditions, and a downturn in the local economy or in occupancy rates in the local economy where the property is located could increase the likelihood of default. Because our loan portfolio contains a number of commercial real estate loans with relatively large balances, the deterioration of one or a few of these loans could cause a significant increase in our percentage of non-performing loans. An increase in non-performing loans could result in a loss of earnings from these loans, an increase in the provision for loan losses and an increase in charge-offs, all of which could have a material adverse effect on our financial condition and results of operations.

Our commercial real estate loans have grown approximately 50.0% since December 31, 2005. The banking regulators are giving commercial real estate lending greater scrutiny, and may require banks with higher levels of commercial real estate loans to implement improved underwriting, internal controls, risk management policies and portfolio stress testing, as well as possibly higher levels of allowances for possible losses and capital levels as a result of commercial real estate lending growth and exposures. See "Supervision and Regulation."

Competition in the banking industry is intense and may adversely affect our profitability.

We currently conduct our banking operations in north central Mississippi, the cities of Tuscaloosa and Hoover, Alabama, the cities of Memphis, Germantown and Nashville, Tennessee, the cities of Sarasota and Bradenton, Florida, and the cities of Blairsville and Blue Ridge, Georgia. The banking business is highly competitive and in our primary market areas, we experience competition from many other financial institutions. We compete with commercial banks, credit unions, savings and loan associations, mortgage banking firms, consumer finance companies, securities brokerage firms, insurance companies, money market funds, and other mutual funds, as well as other super-regional, national and international financial institutions that operate offices in our primary market areas and elsewhere.

We compete with these institutions both in attracting deposits and in making loans. Price competition for loans might result in us originating fewer loans, or earning less on our loans, and price competition for deposits might result in a decrease in our total deposits or higher rates on our deposits. In addition, we have to attract our customer base from other existing financial institutions and from new residents. Many of our competitors are well-established, larger financial institutions. We may face a competitive disadvantage as a result of our smaller size and inability to spread our marketing costs across a broader market. Although we compete by concentrating our marketing efforts in our primary markets with local advertisements, personal contacts, and greater flexibility and responsiveness in working with local customers, we can give no assurance that this strategy will be successful.

Our success depends on local economic conditions where we operate.

To a certain extent, our success depends on the general economic conditions of the geographic markets we serve in the states of Mississippi, Alabama, Tennessee, Florida and Georgia. The local economic conditions in these areas have a significant impact on our commercial, real estate and construction loans, the ability of borrowers to repay these loans, and the value of the collateral securing these loans. Adverse changes in the economic conditions of the Southeastern United States in general or any one or more of our local markets could negatively impact our results of operations and our profitability.

Table of Contents

If our allowance for loan losses is not sufficient to cover actual loan losses, our earnings could decrease.

Management maintains an allowance for loan and lease losses based upon, among other things, (1) historical experience, (2) an evaluation of local, regional and national economic conditions, (3) regular reviews of delinquencies and loan portfolio quality, (4) current trends regarding the volume and severity of past due and problem loans, (5) the existence and effect of concentrations of credit, and (6) results of regulatory examinations. Based on such factors, management makes various assumptions and judgments about the ultimate collectibility of the respective loan portfolios. Although we believe that the allowance for loan and lease losses is adequate, there can be no assurance that the allowance will prove sufficient to cover future losses. Future adjustments may be necessary if economic conditions differ or adverse developments arise with respect to nonperforming or performing loans. Material additions to the allowance for loan and lease losses would result in a decrease in our net income and our capital.

Our loan customers may not repay their loans according to the terms of these loans, and the collateral securing these loans may be insufficient to assure repayment. We may experience significant loan losses, which could have a material adverse effect on our operating results. We maintain an allowance for loan losses in an attempt to cover any loan losses that may occur. In determining the size of the allowance, we rely on an analysis of our loan portfolio based on the factors listed in the preceding paragraph and other pertinent information. As we expand into new markets, our determination of the size of the allowance could be inaccurate due to our lack of familiarity with market-specific factors.

If our assumptions are wrong, our current allowance may not be sufficient to cover our loan losses and adjustments may be necessary to allow for different economic conditions or adverse developments in our loan portfolio. In addition, federal regulators periodically review our allowance for loan losses and may require us to increase our provision for loan losses or recognize future loan charge-offs based on judgments different than those of our management. Material additions to our allowance would materially decrease our net income. Our allowance for loan losses was \$12.2 million, or 1.0% of loans, as of December 31, 2006.

We could suffer loan losses from a decline in credit quality.

We could sustain losses if borrowers, guarantors and related parties fail to perform in accordance with the terms of their loans. Our underwriting and credit monitoring procedures and credit policies, including the establishment and review of the allowance for loan losses, may not prevent unexpected losses that could materially adversely affect our results of operations.

The banking industry is heavily regulated and such regulation could limit or restrict our activities and adversely affect our earnings.

We operate in a highly regulated industry and are subject to examination, supervision, and comprehensive regulation by various federal and state agencies, including the Federal Reserve, the FDIC, the OCC and the state banking departments in the states in which our branches are located. Our compliance with these regulations is costly and restricts certain of our activities, including payment of dividends, mergers and acquisitions, investments, loans and interest rates charged, interest rates paid on deposits and locations of offices. We are also subject to capitalization guidelines established by our regulators, which require us to maintain adequate capital to support our growth.

The laws and regulations applicable to the banking industry could change at any time, and we cannot predict the effects of these changes on our business and profitability. Because government regulation greatly affects the business and financial results of all commercial banks and bank holding companies, our cost of compliance could adversely affect our ability to operate profitably.

In addition, the Sarbanes-Oxley Act of 2002 and the related rules and regulations promulgated by the SEC and NASDAQ that are now applicable to us have increased the scope, complexity and cost of corporate governance, reporting and disclosure practices, including the costs of completing our audit and maintaining our internal controls.

Changes in monetary policy could adversely affect our profitability.

Our results of operations are impacted by credit policies of monetary authorities, particularly the Federal Reserve Board. In light of changing conditions in the national economy and in the money markets, particularly the continuing threat of terrorist acts and the current military operations in the Middle East, no prediction can be made as to possible future changes in interest rates, deposit levels, loan demand or the business and earnings of the Corporation. Furthermore, the actions of the United States and other governments in response to terrorist threats may result in currency fluctuations, exchange controls, market disruption and other adverse effects.

Table of Contents

Changes in interest rates could have an adverse effect on our income.

Our profitability depends to a significant extent on our net interest income. Net interest income is the difference between interest income on interest-earning assets, such as loans and investments, and interest expense on interest-bearing liabilities, such as deposits and borrowings. Our net interest income will be adversely affected if market interest rates change such that the interest we pay on deposits and borrowings increases faster than the interest earned on loans and investments. Changes in interest rates could also adversely affect the income of some of our non-interest income sources. For example, if mortgage interest rates increase, the demand for residential mortgage loans will likely decrease, having an adverse effect on our mortgage loan fee income.

Liquidity needs could adversely affect our results of operations and financial condition.

We rely on dividends from Cadence as our primary source of funds. The primary sources of funds of our bank subsidiary are customer deposits and loan repayments. While scheduled loan repayments are a relatively stable source of funds, they are subject to the ability of borrowers to repay the loans. The ability of borrowers to repay loans can be adversely affected by a number of factors, including changes in economic conditions, adverse trends or events affecting business industry groups, reductions in real estate values or markets, business closings or lay-offs, inclement weather, natural disasters and international instability. Additionally, deposit levels may be affected by a number of factors, including rates paid by competitors, general interest rate levels, returns available to customers on alternative investments and general economic conditions. Accordingly, we may be required from time to time to rely on secondary sources of liquidity to meet withdrawal demands or otherwise fund operations. Such sources include Federal Home Loan Bank advances and federal funds lines of credit from correspondent banks. While we believe that these sources are currently adequate, there can be no assurance they will be sufficient to meet future liquidity demands, particularly if we continue to grow and experience increasing loan demand. We may be required to slow or discontinue loan growth, capital expenditures or other investments or liquidate assets should such sources not be adequate.

We may face risks with respect to future expansion and acquisitions or mergers.

We may engage in de novo branch expansion, acquisitions or mergers in the future. We may also consider and enter into new lines of business or offer new products or services. Acquisitions and mergers involve a number of risks, including:

the time and costs associated with identifying and evaluating potential acquisitions and merger partners;

the estimates and judgments used to evaluate credit, operations, management and market risks with respect to the target institution may not be accurate;

the time and costs of evaluating new markets, hiring experienced local management and opening new offices, and the time lags between these activities and the generation of sufficient assets and deposits to support the costs of the expansion;

our ability to finance an acquisition and possible dilution to our existing shareholders;

the diversion of our management's attention to the negotiation of a transaction, and the integration of the operations and personnel of the combining businesses;

entry into new markets where we lack experience;

the incurrence and possible impairment of goodwill associated with an acquisition and possible adverse short-term effects on our results of operations; and

the risk of loss of key employees and customers.

We may incur substantial costs to expand, and we can give no assurance that such expansion will result in the levels of profits we seek. There can be no assurance that integration efforts for any future mergers or acquisitions will be successful. Also, we may issue equity securities, including common stock and securities convertible into shares of our common stock, in connection with future acquisitions, which could cause ownership and economic dilution to our shareholders. There is no assurance that, following any future mergers or acquisition, our integration efforts will be successful or that our company, after giving effect to the acquisition, will achieve profits comparable to or better than our historical experience.

Combining acquired companies may be more difficult, costly, or time-consuming than we expect.

Our recent growth plans have included the acquisition of other financial institutions. It is possible that the integration process for these acquisitions could result in the loss of key employees or disruption of each company's ongoing business or inconsistencies in standards, procedures and policies that would adversely affect our ability to maintain relationships with clients and employees or to achieve the anticipated benefits of the merger. If we have difficulties with the integration process, we might not achieve the economic benefits expected to result from the acquisition. As with any merger of banking institutions, there also may be business disruptions that cause us to lose customers or cause customers to remove their deposits or loans from our bank and move their business to competing financial institutions.

Table of Contents

Our ability to pay dividends is limited and we may be unable to pay future dividends.

Our ability to pay dividends is limited by regulatory restrictions and the need to maintain sufficient consolidated capital. The ability of our bank subsidiary to pay dividends to us is limited by its obligations to maintain sufficient capital and by other general restrictions on dividends that are applicable to national banks that are regulated by the OCC. If we do not satisfy these regulatory requirements, we will be unable to pay dividends on our common stock.

Departures of our key personnel may harm our ability to operate successfully.

Our success has been and continues to be largely dependent upon the services of Lewis F. Mallory, Jr., our Chairman and Chief Executive Officer, and other members of our senior management team. Our continued success will depend, to a significant extent, on the continued service of these key personnel. The unavailability or the unexpected loss of any of them could have an adverse effect on our financial condition and results of operations. We cannot be assured of the continued service of our senior management team with us or our ability to find suitable replacements for any members of our management team.

ITEM 1B - UNRESOLVED STAFF COMMENTS

Not applicable.

ITEM 2 - PROPERTIES

At December 31, 2006, Cadence's properties consisted of 37 full-service bank branches (including the main office in Starkville, Mississippi), of which 31 are owned premises. Cadence also owns two operations centers in Starkville, Mississippi and Memphis, Tennessee. GCM operates from five separate locations, three of which are leased. The Corporation, Service, Insurance and CNIC did not own or lease any properties at December 31, 2006.

In the opinion of management, all properties are in good condition and are adequate to meet the needs of the communities they serve.

ITEM 3 - LEGAL PROCEEDINGS

In the normal course of business, the Corporation and its subsidiaries from time to time are involved in legal proceedings. There are no pending proceedings to which either the Corporation or any of its subsidiaries are a party that upon resolution are expected to have a material adverse effect upon the Corporation's or its subsidiaries' financial condition or results of operations.

ITEM 4 - SUBMISSION OF MATTERS TO A VOTE OF SECURITY HOLDERS

Not applicable.

PART II

ITEM 5 - MARKET FOR REGISTRANT'S COMMON EQUITY, RELATED STOCKHOLDER MATTERS AND ISSUER PURCHASES OF EQUITY SECURITIES

(a) Reference is made to Item 7 - Management's Discussion and Analysis of Financial Condition and Results of Operations, under the caption, Market Information.

(b) At December 31, 2006, the Corporation had 2,433 security holders of record.

(c) Dividends on common stock were declared quarterly in 2006 and 2005, and totaled as follows:

**(In Thousands)
December 31,**

Edgar Filing: CADENCE FINANCIAL CORP - Form 10-K

	2006	2005
Dividends declared, \$1.00 per share	\$ 10,722	\$
Dividends declared, \$0.98 per share		8,005
	\$ 10,722	\$ 8,005

(d) Performance Graph - The Securities and Exchange Commission requires that the Corporation include in its annual report on Form 10-K a line graph presentation comparing cumulative, five-year shareholder returns on an indexed basis with a performance indicator of the overall stock market and either a nationally recognized industry standard or an index of peer

Table of Contents

companies selected by the Corporation. The broad market indexes used in the graph are the AMEX Market Index and the NASDAQ Bank Index. The Corporation has chosen to use Hemscott, Inc. Financial Information REGIONAL-SOUTHEAST BANKS as its peer group index. A list of the companies is included in the index following the graph.

The graph assumes that \$100 was invested in shares of the relevant issuers on January 1, 2002, and all dividends were immediately invested in additional shares. The value of the initial \$100 investment is shown at one-year intervals, for a five-year period ending December 31, 2006. For purposes of constructing this data, the returns of each component issuer have been weighted according to that issuer's market capitalization. The Corporation's 2006 stock performance was impacted by a 2.76 million share stock offering that was sold into the secondary market in May.

Totals	46,512	27,970	21,186	3.66	2.46	1.97
Net interest income	\$ 50,482	\$ 45,214	\$ 41,198			
Net yield on earning assets				3.46	3.55	3.37

Edgar Filing: CADENCE FINANCIAL CORP - Form 10-K

- (1) Interest and yields on tax-exempt obligations are not on a fully taxable equivalent basis.
- (2) For the purpose of these computations, nonaccruing loans are included in the average loan balances outstanding.
- (3) Interest income on loans includes related fees.

Table of Contents

C. Increase (Decrease) in Interest Income and Interest Expense

The following table analyzes the changes in both the rate and volume components of net interest income:

	(In Thousands) 2006 Over 2005 Change Due To:			(In Thousands) 2005 Over 2004 Change Due To:		
	Total	Rate	Volume	Total	Rate	Volume
EARNING ASSETS						
Loans	\$ 21,147	\$ 9,357	\$ 11,790	\$ 9,793	\$ 6,642	\$ 3,151
Federal funds sold and other interest-bearing assets	643	415	228	323	383	(60)
Securities:						
Taxable	2,208	1,169	1,039	766	730	36
Tax-exempt	(188)	114	(302)	(82)	(284)	202
Totals	\$ 23,810	\$ 11,055	\$ 12,755	\$ 10,800	\$ 7,471	\$ 3,329
INTEREST-BEARING LIABILITIES						
Interest-bearing deposits	\$ 15,665	\$ 12,707	\$ 2,958	\$ 6,067	\$ 5,079	\$ 988
Interest on borrowed funds, federal funds purchased and securities sold under agreements to repurchase	2,877	1,766	1,111	717	1,146	(429)
Totals	\$ 18,542	\$ 14,473	\$ 4,069	\$ 6,784	\$ 6,225	\$ 559

- (1) Change in volume is the change in volume times the previous year's rate.
- (2) Change in rate is the change in rate times the previous year's balance.
- (3) The change in interest due to both rate and volume has been allocated to volume and rate changes in proportion to the relationship of the absolute dollar amounts of change to each.

II. INVESTMENT PORTFOLIO

A. The following tables present the book values of securities as of the dates indicated:

	(In Thousands)		
	2006	2005	2004

U. S. Government agencies and mortgage-backed securities	326,555	307,193	315,152
States and political subdivisions	108,833	109,131	121,784
Other	12,892	25,820	28,537
Total book value	\$ 448,580	\$ 442,440	\$ 465,770

Table of Contents

- B. The following table sets forth the maturities of investment and mortgage-backed securities (carrying values) at December 31, 2006, and the weighted-average yield of such securities:

	(\$ In Thousands)					
	Weighted-Average Yield					
	0 - 1		1 - 5		5-10	
Year	Yield (%)	Years	Yield (%)	Years	Yield (%)	
Securities:						
U. S. Treasury	\$ 99	4.03%	\$ 201	4.97%	\$	
U. S. Government agencies	11,056	3.30%	59,695	5.00%	7,515	4.94%
Nontaxable municipals	1,845	7.35%	5,724	5.33%	35,433	5.04%
Taxable municipals	1,054	6.36%	146	4.19%	740	5.07%
Other			810	5.46%	306	4.40%
Total	\$ 14,054		\$ 66,576		\$ 43,994	

	10+	
	Years	Yield (%)
U. S. Government agencies	\$ 97	5.13%
Nontaxable municipals	63,891	6.51%
Taxable municipals		
Other	11,776	4.73%
Total	\$ 75,764	

	Book Value	Yield (%)
Mortgage-backed securities	\$ 248,192	4.74%

NOTE: Interest and yields on tax-exempt obligations are on a taxable equivalent basis, at the statutory rate of 38.25%.

Average yield on floating rate securities was determined using the current yield.

Table includes securities classified as available-for-sale and held-to-maturity at carrying values.

The majority of mortgage-backed securities are backed by U. S. Government agencies.

- C. Investment securities in excess of 10% of stockholders equity.
 At December 31, 2006, there were no securities from any issuers in excess of 10% of stockholders equity that were not securities of the U. S. Government or U. S. Government agencies or corporations.

Table of Contents**III. LOAN PORTFOLIO**

A. Type of loans

The amount of loans outstanding by type at the indicated dates are shown in the following table:

Type	(In Thousands)				
	December 31,				
	2006	2005	2004	2003	2002
Commercial, financial and agricultural	\$ 257,661	\$ 209,017	\$ 155,858	\$ 97,974	\$ 103,327
Real estate - construction	347,568	143,729	119,637	38,140	30,028
Real estate - mortgage	559,604	457,453	478,792	386,607	356,493
Installment loans to individuals	38,833	40,825	57,599	56,800	77,692
Other	19,280	9,620	16,677	9,593	8,785
Total loans	\$ 1,222,946	\$ 860,644	\$ 828,563	\$ 589,114	\$ 576,325

B. Maturities and sensitivities of loans to changes in interest rates

The following table sets forth as of December 31, 2006, the amount of loans due in the periods indicated:

Type	(In Thousands)			
	Due Within 1 Year	Due After 1 Year Through 5 Years	Due After 5 Years	Total
Commercial, financial and agricultural	\$ 178,713	\$ 75,872	\$ 3,076	\$ 257,661
Real estate - construction	285,508	54,507	7,553	347,568
	\$ 464,221	\$ 130,379	\$ 10,629	\$ 605,229

Type	(In Thousands)			
	Due Within 1 Year	Due After 1 Year Through 5 Years	Due After 5 Years	Total
Loans with:				
Predetermined interest rates	\$ 66,859	\$ 119,385	\$ 7,642	\$ 193,886
Floating interest rates	397,362	10,994	2,987	411,343
	\$ 464,221	\$ 130,379	\$ 10,629	\$ 605,229

C. Non-performing loans

Edgar Filing: CADENCE FINANCIAL CORP - Form 10-K

1. The following table states the aggregate amount of loans that were non-performing on the dates indicated:

(In Thousands)

Type	December 31,				
	2006	2005	2004	2003	2002
Loans accounted for on a non-accrual basis	\$ 1,435	\$ 498	\$ 1,918	\$ 766	\$ 1,274
Accruing loans past due 90 days or more	1,146	2,043	1,094	1,998	2,700
Renegotiated troubled debt	151	73	1,502	489	304

2. There were no loan concentrations in excess of 10% of total loans at December 31, 2006. However, lending activities are affected by the economic trends within the areas served by the Corporation and its

Table of Contents

subsidiaries. These economic trends, in turn, can be influenced by the areas' larger employers and industries, such as Mississippi State University, Bryan Foods, and Columbus Air Force Base in Mississippi; University of Alabama and Mercedes-Benz Automotive Plant in Alabama; Federal Express and Auto Zone in Tennessee; and the tourism industry in Florida.

3. There were no outstanding foreign loans at December 31, 2006.
4. Loans classified for regulatory purposes or for internal credit review purposes that have not been disclosed in the table above do not represent or result from trends or uncertainties that management expects will materially impact the financial condition of the Corporation or its subsidiary bank, or their future operating results, liquidity or capital resources.
5. If all nonaccrual loans had been current throughout their terms, interest income would have not been significantly different for the year ended December 31, 2006.
6. Management stringently monitors loans that are classified as non-performing. Non-performing loans include nonaccrual loans, loans past due 90 days or more, and loans renegotiated or restructured because of a debtor's financial difficulties. Loans are generally placed on non-accrual status if any of the following events occur: (a) the classification of a loan as non-accrual internally or by regulatory examiners, (b) delinquency on principal for 90 days or more unless management is in the process of collection, (c) a balance remains after repossession of collateral, (d) notification of bankruptcy, or (e) management judges that non-accrual status is appropriate.
7. At December 31, 2006, the recorded investment in loans identified as impaired totaled approximately \$13.6 million. The allowance for loan losses related to these loans approximated \$2.1 million. The average recorded investment in impaired loans during the year ended December 31, 2006, was \$10.3 million. Total interest recognized on impaired loans and the amounts recognized on a cash basis were not significant.

D. Other interest-bearing assets

There were no other interest-bearing non-performing assets at December 31, 2006.

Table of Contents**IV. SUMMARY OF LOAN LOSS EXPERIENCE**

A. The following table shows changes in the Corporation's allowance for loan losses for the periods indicated:

	(\$ In Thousands)				
	Years Ended December 31,				
	2006	2005	2004	2003	2002
Beginning balance	\$ 9,312	\$ 10,914	\$ 6,181	\$ 6,029	\$ 6,753
Allowance of acquired entity	3,116		4,547		
	12,428	10,914	10,728	6,029	6,753
Charge-offs:					
Domestic:					
Commercial, financial and agricultural	(749)	(1,320)	(732)	(473)	(708)
Real estate	(526)	(1,373)	(2,070)	(1,105)	(1,240)
Installment loans and other	(1,358)	(1,927)	(1,308)	(1,559)	(2,226)
Total charge-offs	(2,633)	(4,620)	(4,110)	(3,137)	(4,174)
Recoveries:					
Domestic:					
Commercial, financial and agricultural	259	52	133	71	39
Real estate	119	348	185	68	64
Installment loans and other	407	490	456	477	557
Total recoveries	785	890	774	616	660
Net charge-offs	(1,848)	(3,730)	(3,336)	(2,521)	(3,514)
Allowance applicable to Finance Company loans sold				(97)	
Provision charged to operations	1,656	2,128	3,522	2,770	2,790
Ending balance	\$ 12,236	\$ 9,312	\$ 10,914	\$ 6,181	\$ 6,029
Ratio of net charge-offs to average loans outstanding	0.19	0.46	0.44	0.44	0.59
Estimated charge-offs in 2007 are as follows: commercial, financial and agricultural - \$1.0 million; real estate - \$1.5 million; and installment loans and other - \$1.0 million.					

The following table indicates the ratio of allowance for loan losses to loans outstanding at year-end:

	December 31,				
	2006	2005	2004	2003	2002
Ratio of allowance for loan losses to loans outstanding at year end	1.00	1.08	1.32	1.05	1.05

B. Determination of Allowance for Loan Losses

The determination of the allowance for loan losses requires significant judgment. The balance of the allowance for loan losses reflects management's best estimate of probable loan losses related to specifically identified loans, as well as probable incurred loan losses in the remaining portfolio. Reference should be made to Note A.6. in the Notes to Consolidated Financial Statements and to Item 7 - Management's Discussion and Analysis of Financial Condition and Results of Operations.

Table of Contents

The following schedule sets forth the components of the allowance for loan losses at December 31, 2006 and 2005. This allocation is based upon the consistent, quarterly evaluation of the adequacy of the allowance for loan losses. The entire allowance for loan losses is available to absorb loan losses in any category.

<i>(In thousands)</i>	2006		2005	
	Loan Balance	Allowance for Loan Losses	Loan Balance	Allowance for Loan Losses
Allocated component:				
Impaired loans	\$ 13,577	\$ 2,113	\$ 10,544	\$ 1,293
Graded loans	557,122	1,745	19,978	812
Homogeneous pools	105,114	524	120,315	855
Other loans	547,133	5,334	709,807	4,768
Unallocated component		2,520		1,584
	\$ 1,222,946	\$ 12,236	\$ 860,644	\$ 9,312

The allowance allocated to impaired loans for the periods indicated was based upon the estimated fair value of the underlying collateral. Graded loans are those loans that exhibit some form of weakness. Allocations to this group are based upon the historical loan loss experience of the grades assigned and upon specific allocations to specific loans. An allowance is allocated to the various pools of loans considered to be homogenous based upon the historical loan losses of each pool. Other loans consist of those loans not graded or impaired or considered homogenous.

These loans are grouped by risk assignments, which are based upon consideration of collateral values, borrower financial condition and performance, debt service capacity, cash flows, market share and other indicators. Allocations of the allowance to these loans are based upon historical loan loss experience of the risk assignment.

C. Loans and Risk Descriptions

Real Estate Loans

The Bank originates loans secured by commercial real estate, one-to-four family residential properties, and multi-family dwelling units (5 or more units). At December 31, 2006, these loans totaled \$907 million or approximately 74% of the loan portfolio.

The Bank originates commercial real estate loans of up to 80% of the appraised value. Currently, it is the Corporation's policy to originate these loans only to carefully selected borrowers and on properties in the market area. Of primary concern in commercial real estate lending are the borrower's credit worthiness and the feasibility and cash flow potential of the project. To monitor cash flows of borrowers, annual financial statements are obtained from the borrower and loan guarantors, if any. Although many banks have had significant losses in commercial real estate lending, Cadence has historically sustained few losses, and those losses were not significant relative to the size of the entire commercial real estate loan portfolio at the time.

The Bank originates loans secured by first and junior liens on one-to-four family residences in its lending areas. Typically, such loans are single-family homes that serve as the primary residence of the borrower. Generally, these loans are originated in amounts up to 80% of the appraised value or selling price of the property. See Note D in the Notes to Consolidated Financial Statements for additional information related to these loans.

Loans for multi-family (5 or more units) residential properties are generally secured by apartment buildings. Loans secured by income generating properties are generally larger and involve greater risk than residential loans because payments are often dependent on the successful operation or management of the properties. As a result, these types of loans may be more sensitive to adverse conditions in the real estate market or the economy. Cash flow and financial statements are obtained from the borrowers and any guarantors. Also, rent rolls are often obtained.

Consumer and Other Loans

Edgar Filing: CADENCE FINANCIAL CORP - Form 10-K

Cadence offers consumer loans in the form of home improvement loans, mobile home loans, automobile loans and unsecured personal loans. These loans totaled \$39 million, or 3% of total loans, at December 31, 2006. Consumer loans are originated in order to provide a wide range of financial services to customers and because the terms and normally higher interest rates on such loans help maintain a profitable spread between the average loan yield and the cost of funds.

Table of Contents

In connection with consumer loan applications, the borrower's income statement and credit bureau report are reviewed. In addition, the relationship of the loan to the value of the collateral is considered. All automobile loan applications are reviewed, as well as the value of the collateral securing the loan. Cadence intends to continue to emphasize the origination of consumer loans. Management believes that its loan loss experience in connection with its consumer loan portfolio is favorable in comparison to industry averages.

The Bank makes commercial business loans on both a secured and unsecured basis with terms generally not exceeding five years. Non-real estate commercial loans primarily consist of short-term loans for working capital purposes, inventories, seasonal loans, lines of credit and equipment loans. A personal guaranty of payment by the principals of any borrowing entity is often required and the financial statements and income tax returns of the entity and its guarantors are reviewed. At December 31, 2006, commercial business loans represented \$258 million, or approximately 21%, of the Corporation's total loan portfolio.

V. DEPOSITS

	2006		2005		2004	
	Amount	Rate	Amount	Rate	Amount	Rate
A. Average deposits:						
Domestic:						
Noninterest - bearing	\$ 165,939		\$ 152,683		\$ 102,391	
Interest - bearing demand (1)	414,137	2.51%	381,007	1.40%	379,266	0.90%
Savings	42,218	0.46%	44,149	0.24%	44,186	0.30%
Time	604,895	4.20%	513,254	2.90%	456,851	2.40%

Total	\$ 1,227,189		\$ 1,091,093		\$ 982,694	

(1) Includes Money Market accounts

B. Other categories - None

C. Foreign deposits - Not material

D. Time certificates of deposit of \$100,000 or more and maturities at December 31, 2006:

	(In Thousands)				
	Total	3 Months or Less	3 Months Through 6 Months	6 Months Through 12 Months	Over 12 Months
Time certificates of deposit of \$100,000 or more	\$ 400,620	\$ 174,081	\$ 89,469	\$ 75,462	\$ 61,608

E. Foreign office time deposits of \$100,000 or more - Not applicable

Table of Contents**VI. RETURN ON EQUITY AND ASSETS**

The following financial ratios are presented for analytical purposes:

	December 31,		
	2006	2005	2004
Return on assets (net income divided by total average assets)	0.9	1.0	1.0
Return on equity (net income divided by average equity)	9.0	11.8	11.0
Dividend payout ratio (dividends per share divided by basic net income per share)	73.0	58.3	63.6
Equity to asset ratio (average equity divided by average total assets)	9.6	8.2	8.7

VII. SHORT-TERM BORROWINGS

	(\$ In Thousands)		
	2006	2005	2004
Balance at year end	\$ 80,838	\$ 58,571	\$ 26,799
Weighted average interest rate at year end	4.45%	3.19%	1.27%
Maximum amount outstanding at any month end for the year	\$ 80,838	\$ 58,571	\$ 44,281
Average amount outstanding during the year	63,830	33,574	30,490
Weighted average interest rate during the year	4.17%	2.35%	0.92%

Note: Short term borrowings include federal funds purchased and securities sold under agreements to repurchase.

ITEM 7 - MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following provides a narrative discussion and analysis of significant changes in our results of operations and financial condition. You should read this discussion in conjunction with the consolidated financial statements, including the notes thereto, and the supplemental financial data included elsewhere in this report, including the five-year summary of Selected Financial Data and management's letter to shareholders at the beginning of our Annual Report to shareholders that accompanies the proxy statement for our 2007 annual meeting of shareholders.

INTRODUCTION AND MANAGEMENT OVERVIEW

Cadence Financial Corporation, formerly NBC Capital Corporation, is a financial holding company that owns Cadence Bank, N.A. (Cadence or the Bank), which operates in Mississippi, Alabama, Tennessee, Florida and Georgia. We provide full financial services, including banking, trust services, mortgage services, insurance and investment products. Our stock is traded on The NASDAQ Global Select Market (NASDAQ) under the ticker symbol of CADE.

For purposes of the following discussion, the words the Corporation, we, us and our refer to the combined entities of Cadence Financial Corporation and its wholly owned subsidiary, Cadence, unless the context suggests otherwise.

We accomplished a number of strategic objectives in 2006:

First, at the annual shareholders meeting held in June, our shareholders voted to change our corporate name to Cadence Financial Corporation. The change aligns our corporate name with that of the Bank and further leverages the brand recognition being created in our markets. The new Cadence brand is part of an overall marketing and business strategy that we expect to create marketing efficiencies by having one uniform marketing effort and brand.

Our strategic growth plan for 2006 included opening new branches in some of our higher growth markets, adding a de novo bank in another high growth market, and evaluating potential acquisition candidates to increase our share in existing markets and to expand our footprint into new markets. During 2006, we opened a Cadence de

Table of Contents

novo branch in Brentwood, Tennessee (Nashville MSA), as well as two new branches in the Memphis market. We also began planning the construction of a full-service branch in Hoover, Alabama (Birmingham MSA). On August 17, 2006, we completed our acquisition of SunCoast Bancorp, Inc. (SunCoast), the holding company for SunCoast Bank, a commercial bank operating in Sarasota and Manatee Counties, Florida. Additionally, on November 14, 2006, we completed our acquisition of Seasons Bancshares, Inc. (Seasons), the holding company for Seasons Bank, a commercial bank headquartered in Blairsville, Georgia. See Note B of the Notes to Consolidated Financial Statements for details relating to the Seasons and SunCoast acquisitions. These acquisitions will allow us to expand further into the rapidly growing markets of Tampa, Sarasota and Naples, Florida and the north Atlanta area of Georgia.

Finally, we issued additional equity in 2006 to support our growth objectives. On May 12, 2006, we closed on a secondary public offering of our common stock, where we sold 2.76 million shares at a price of \$19.50 per share, resulting in net proceeds of approximately \$50.2 million. We used a portion of these proceeds to fund the SunCoast and Seasons acquisitions and will use the remainder for other general corporate purposes.

During 2006, five major factors significantly impacted our operating results, as follows:

- 1) The 2.76 million share stock offering and the issuance of 922,000 shares in the SunCoast acquisition significantly impacted our earnings per share for 2006. Our average primary shares outstanding increased from 8,166,211 in 2005 to 10,322,821 in 2006.
- 2) Second, the Federal Reserve continued to raise short-term interest rates for the first half of 2006. The increase in rates impacted our net interest income, as yields on earning assets and cost of funds increased.
- 3) Third, the overall economy in the Mississippi market remained somewhat flat; however, the Tennessee and Alabama markets provided good loan growth for the year (\$137.7 million growth in Tennessee and \$61.5 million growth in Alabama). The increased loan growth positively impacted our net interest income for 2006.
- 4) Fourth, the acquisitions of SunCoast and Seasons directly impacted our net interest income by increasing our average earning assets. The acquisitions also increased our other expenses, primarily due to salaries and occupancy costs.
- 5) Lastly, the overall credit quality of the Bank's loan portfolio improved during 2006, which allowed us to reduce the provision for loan losses during the year below the levels that were budgeted.

For 2006, our net interest margin was 3.46%, compared to 3.55% for 2005. Increasing interest rates during the first half of 2006 improved the yields on loans, as the loan portfolio, which is composed of approximately 61% variable rate loans and 39% fixed rate loans, repriced upward. To a lesser extent, the improved rate environment also had a positive impact on the return on our investment portfolio, as the yields on the investment portfolio increased by 30 basis points over 2005. However, our overall cost of funds increased by a greater percentage during 2006, as the rising rate environment in the first half of the year and our need to fund the loan growth put pressure on deposit and other borrowing rates.

We maintained our underwriting standards during 2006, and therefore, as of December 31, 2006, management regarded the overall credit quality of the loan portfolio as good, evidenced by the lower provision for loan losses during the year, which is discussed more fully below.

During 2006, noninterest income, including gains on securities and impairment loss on securities, increased slightly, from \$19.9 million to \$20.0 million. The growth of noninterest income has been and continues to be one of our major strategic goals. The components and reasons for the increase in this category are discussed more fully below. Noninterest income accounted for 17.1% of income in 2006 and 21.4% of income in 2005. This change was impacted more by the growth in total interest income in 2006 (approximately 32.5%), than by the slight increase in noninterest income.

Another goal of management in 2006 was to continue to control the level of noninterest expenses. During 2006, total noninterest expenses increased by \$4.9 million, or 11.0%. Approximately \$3.7 million of this increase is due to expenses relating to the de novo branches in Hoover and Brentwood, the new branches in Memphis, and the former SunCoast and Seasons branches.

Edgar Filing: CADENCE FINANCIAL CORP - Form 10-K

During 2006, we reported net income of \$14.2 million, or \$1.37 per fully diluted share, compared to \$13.8 million, or \$1.68 per fully diluted share, for 2005.

In 2007, management's focus will turn from the external growth objectives of 2006, which included both de novo locations and acquisitions, to effectively and efficiently managing the footprint that has been established. We will continue to focus on growth; however, during 2007, we expect it to come from organic growth in our existing footprint.

Table of Contents

We are continuing our efforts to grow loans and improve our margin. With potential improvement in the Mississippi market, the continued strong growth in Tennessee and Alabama and the addition of the Florida and Georgia markets, management believes that we will be able to achieve solid loan growth in 2007. The expansion or even maintenance of the margin, however, will be a more difficult objective to attain in the current interest rate environment. The inverted yield curve, an environment in which short-term rates are higher than long-term rates, presents a significant obstacle. Additionally, our need for funding has increased as our loan demand has increased, requiring us to pay higher rates to grow deposits.

Currently, management expects, based on available information, that interest rates will be flat to slightly down in 2007. We expect strong growth to continue in the Memphis and Tuscaloosa markets and anticipate that our recent entries into the Birmingham and Nashville MSAs and Florida will continue to provide us with additional strong growth markets. We based our 2007 projections, budgets and goals on these expectations. If these trends move differently than expected in either direction or speed, they could have a material impact on our financial condition and results of operations. The areas of our operations most directly impacted would be the net interest margin, loan and deposit growth and the provision for loan losses.

We continue to look for ways to grow noninterest income. The continued growth in the Memphis market, the expansion into the Birmingham and Nashville MSAs and the acquisitions of SunCoast and Seasons should provide new customer bases for our other banking products and services.

In the areas of noninterest income, our primary objective for 2007 is to expand our mortgage origination efforts into our new markets in Alabama, Tennessee, Florida and Georgia. This process began in late 2006, with the reorganization of our mortgage division to take advantage of these opportunities. We also continue our efforts to control noninterest expenses. In the area of noninterest expenses, our efforts will be focused on controlling these expense categories as we continue our efforts to achieve maximum efficiencies within our new expanded footprint. Reducing our efficiency ratio remains a key objective.

Our primary objective for 2007 is to grow net income. The previously mentioned growth in assets, expansion of noninterest income, and control of noninterest expenses will all contribute to this net income growth. Other areas of focus to accomplish this goal will be controlling the cost of funding that will be needed to both support our current asset levels and our expected growth and maintaining our level of credit quality. Funding is a challenging issue, due to the inverted yield curve. This situation makes it very difficult to obtain the desired spread between loan yields and cost of funds. Also, there is increased competition for core deposits as all banks struggle to maintain this very important component of their funding. If the economy slows or the real estate market continues to soften, credit quality will become an issue. Currently our credit quality is good, and we will continue our policy of not lowering our credit underwriting standards to obtain loan growth.

Even though we believe that we will have net income growth in 2007, it will not translate into growth in earnings per share. The reason for this is that in 2007, we will have the full effect of the shares issued in the additional equity offering and for the SunCoast acquisition for an entire year. The average outstanding shares for 2006 were 10,323,000. In 2007, we estimate that average outstanding shares will be at least 11,889,000, an increase of 1,566,000, or 15.2%.

In summary, our primary objectives in 2007 are to (1) increase net income; (2) improve our net interest margin; (3) expand our mortgage activities into our new markets; (4) gain efficiencies in our operations as we continue to assimilate the new markets; (5) maintain our credit quality; and (6) finalize our plans for additional branch expansion to begin in 2008.

RECENTLY ISSUED ACCOUNTING STANDARDS AND CRITICAL ACCOUNTING POLICIES

Our accounting and financial reporting policies conform to United States generally accepted accounting principles and to general practices within the banking industry. Note A of the Notes to Consolidated Financial Statements contains a summary of our accounting policies. Management is of the opinion that Note A, read in conjunction with all other information in our annual report, including management's letter to shareholders and this Management's Discussion and Analysis, is sufficient to provide the reader with the information needed to understand our financial condition and results of operations.

Critical Accounting Policies

It is management's opinion that the areas of the financial statements that require the most difficult, subjective and complex judgments, and therefore contain the most critical accounting estimates, are the provision for loan losses and the resulting allowance for loan losses; the liability and expense relating to our pension and other postretirement benefit plans; issues relating to other-than-temporary impairment losses in the securities portfolio; and goodwill and other intangible assets.

Table of Contents

Provision/Allowance for Loan Losses

Our provision for loan losses is utilized to replenish the allowance for loan losses on the balance sheet. The allowance is maintained at a level deemed adequate by management and the Board of Directors after their evaluation of the risk exposure contained in our loan portfolio. The senior credit officers and the loan review staff perform the methodology used to make this determination of risk exposure on a quarterly basis. As a part of this evaluation, certain loans are individually reviewed to determine if there is an impairment of our ability to collect the loans and the related interest. This determination is generally made based on collateral value. If the senior credit officers and loan review staff determine that impairments exist, specific portions of the allowance are allocated to these individual loans. We group all other loans into homogeneous pools and determine risk exposure by considering the following list of factors (this list is not all-inclusive and the factors reviewed may change as circumstances change): historical loss experiences; trends in delinquencies and non-accruals; and national, regional and local economic conditions. (These economic conditions would include, but not be limited to, general real estate conditions, the current interest rate environment and trends, unemployment levels and other information, as deemed appropriate.) Additionally, management looks at specific external credit risk factors that bring additional risk into the portfolio. For the period ended December 31, 2006, we identified the following five external risk factors: (1) stagnant to negative employment reports for the northeast Mississippi area; (2) the current higher rate environment resulting in higher borrowing costs and lower debt service coverages; (3) increased risk associated with commercial real estate credits; (4) slowdown trend in the real estate market; and (5) lack of familiarity with the north Georgia market. These external risk factors will be re-evaluated on a quarterly basis. Management makes its estimates of the credit risk in the portfolio and the amount of provision needed to keep the allowance for loan losses at an appropriate level using what management believes are the best and most current sources of information available at the time of the estimates; however, many of these factors can change quickly and with no advance warning. If management significantly misses its estimates in any period, it can have a material impact on the results of operations for that period and for subsequent periods.

Pension and Other Postretirement Benefit Plans

Another area that requires subjective and complex judgments is the liability and expense relating to our pension and other postretirement benefit plans. We maintain several benefit plans for our employees. They include a defined benefit pension plan, a defined contribution pension plan, a 401(k) plan and a deferred compensation plan. We make all contributions to these plans when due.

The defined benefit pension plan is the only plan that requires multiple assumptions to determine the liability under the plan. This plan has been frozen to new participants for several years. Management evaluates, reviews with the plan actuaries, and updates as appropriate the assumptions used in the determination of pension liability, including the discount rate, the expected rate of return on plan assets, and increases in future compensation. Actual experience that differs from the assumptions could have a significant impact on our financial position and results of operations. The discount rate and the expected rate of return on the plan assets have a significant impact on the actuarially computed present value of future benefits that is recorded on the financial statements as a liability and the corresponding pension expense.

In selecting the expected rate of return, management, in consultation with the plan trustees, selected a rate based on assumptions compared to recent returns and economic forecasts. We consider the current allocation of the portfolio and the probable rates of return of each investment type. In selecting the discount rate, prior to 2006, management, in consultation with actuarial consultants, selected rates based on rates of return on long-term, high-quality bonds having maturity dates corresponding as closely as possible to the expected retirement dates of the employees and the subsequent payout periods of the respective plans. Beginning in 2006, management, with the assistance of actuarial consultants, selects the appropriate discount rate by performing an analysis of the plan's projected benefit cash flows against discount rates from a national Pension Discount Curve (a yield curve used to measure pension liabilities). To reflect the appropriate rate, based on this analysis, management reduced the discount rate from 6.00% in 2004 to 5.75% in 2005 and 2006. We used an expected rate of return of 7.5% for 2004, 2005 and 2006. From a historical perspective, the rates of return on the plan were 10.0% for 2004, 5.4% for 2005 and 9.5% for 2006. Additionally, our philosophy has been to fund the plan annually to the maximum amount deductible under the Internal Revenue Service rules. As a result, as of December 31, 2006, the plan has a prepaid benefit cost of \$3.1 million. At December 31, 2006, we had a current accumulated benefit obligation of approximately \$9.3 million and plan assets with a fair value of approximately \$11.6 million.

FASB Statement No. 158, *Employers' Accounting for Defined Benefit Pension and Other Postretirement Plans*, requires us to recognize the funded status of the plan (defined as the difference between the fair value of plan assets and the projected benefit obligation) on the balance sheet and to recognize in other comprehensive income any gains or losses and prior service costs or benefits not included as components of periodic benefit cost. Detailed information on our pension plan and the related impacts of these changes on the amounts recorded in our financial statements can be found in Note M of the Notes to Consolidated Financial Statements.

Table of Contents

Other-Than-Temporary Impairment of Investment Securities

A third area that requires subjective and complex judgments on the part of management is the review of the investments in the securities portfolio for other-than-temporary impairments. EITF Issue 03-01 and FASB FSP FAS 115-1 and FAS 124-1, *The Meaning of Other-Than-Temporary Impairment and Its Application to Certain Investments*, require us to review our investment portfolio and determine if it has impairment losses that are other-than-temporary. In making its determination, management considers the following items: (1) the length of time and extent to which the current market value is less than cost; (2) evidence of a forecasted recovery; (3) financial condition and the industry environment of the issuer; (4) downgrades of the securities by rating agencies; (5) whether there has been a reduction or elimination of dividends or interest payments; (6) whether we have the intent or ability to hold the securities for a period of time sufficient to allow for anticipated recovery of fair value; and (7) interest rate trends that may impact recovery and realization. During the third quarter of 2006, we recognized a \$2.0 million other-than-temporary impairment charge relating to certain Fannie Mae and Freddie Mac preferred stock.

As of December 31, 2006, our securities portfolio included a significant number of securities that were impaired, by definition. We reviewed each of these securities to determine if any of the impairments were other-than-temporary. Using the criteria listed above, management made the determination that as of December 31, 2006, none of the impairments were other-than-temporary.

Goodwill and Other Intangible Assets

FASB Statement No. 142, *Goodwill and Other Intangible Assets*, eliminated the requirement to amortize goodwill; however, it does require periodic testing for impairment. We completed our impairment test in accordance with Statement No. 142 in October 2006 and concluded that no impairment writedown was warranted. At December 31, 2006, we had approximately \$67.1 million of goodwill on our balance sheet, which will remain at that level unless it becomes impaired under the definition of impairment in Statement No. 142.

Other Accounting/Regulatory Issues

In the normal course of business, our wholly owned subsidiary bank, Cadence, makes loans to related parties, including our directors and executive officers and their relatives and affiliates. We make these loans on substantially the same terms, including interest rates and collateral, as those prevailing at the time for comparable transactions with other parties. Also, the loans are consistent with sound banking practices and within applicable regulatory and lending limitations. Please see Note O in the Notes to Consolidated Financial Statements and our proxy statement for additional details concerning related party transactions.

Section 402 of the Sarbanes-Oxley Act of 2002 generally prohibits loans to executive officers. However, the rule does not apply to any loan made or maintained by an insured depository institution if the loan is subject to the insider lending restrictions of section 22(h) of the Federal Reserve Act. All loans that the Bank makes to executive officers are subject to the above referenced section of the Federal Reserve Act.

We own NBC Capital Corporation (MS) Statutory Trust I and Enterprise (TN) Statutory Trust I, both organized under the laws of the State of Connecticut for the purpose of issuing trust preferred securities. In accordance with FASB Interpretation No. 46 (revised December 2003), the trusts, which are considered variable interest entities, are not consolidated into our financial statements because the only activity of the variable interest entities is the issuance of the trust preferred securities.

RESULTS OF OPERATIONS

Net income for 2006 was \$14.2 million, or \$1.37 per diluted share, an increase from \$13.8 million, or \$1.68 per diluted share, in 2005 and \$12.3 million, or \$1.50 per diluted share, in 2004. Return on average equity was 9.0% in 2006, 11.8% in 2005, and 11.0% in 2004. Return on average assets was 0.9% in 2006 and 1.0% in 2005 and 2004.

Net interest income (NII), the primary source of our earnings, represents income generated from earning assets, less the interest expense of funding those assets. NII increased by 11.7% in 2006 and 9.7% in 2005. Changes in NII may be divided into two components; first, the change in average earning assets (volume component) and second, the change in the net interest spread (rate component). Net interest spread represents the difference between yields on earning assets and rates paid on interest-bearing liabilities.

In 2006, NII increased by \$5.3 million, from \$45.2 million in 2005 to \$50.5 million. Average earning assets increased from \$1.27 billion in 2005 to \$1.46 billion in 2006, an increase of \$185.5 million, or 14.6%. During this period, the net interest margin declined to 3.46%, compared to 3.55% for 2005. (Net interest margin is net interest income divided by average earning assets.)

Table of Contents

In analyzing the rate component of NII, from 2005 to 2006, we gained 90 basis points of yield on our earning assets. However, during this period, the cost of funds increased by 120 basis points. As the Federal Reserve raised interest rates during the first half of 2006, our loan portfolio, which is comprised of approximately 61% variable rate loans, was positively impacted. From 2005 to 2006, the yield on loans increased from 6.56% to 7.62%. The increase in interest rates also had a positive impact on other earning assets, as the yield on federal funds sold increased from 3.33% to 5.07% and the yield on the investment securities portfolio increased from 4.38% to 4.68%. The increase in rates had a negative impact on our cost of funds, as our cost of deposits increased from 2.17% to 3.39% and our cost of other borrowings increased from 4.17% to 5.06%. Also, the increase in rates resulted in an inverted yield curve. As a result, we were not able to increase our loan yields as much as the cost of deposits increased.

The increase in average earning assets from 2005 to 2006 is composed of the following: average loans increased by \$164.7 million; average federal funds sold and other interest-bearing assets increased by \$5.8 million; and average investment securities increased by \$15.1 million. From 2005 to 2006, the average balance of interest-bearing deposits increased by \$122.8 million, and the average balance of other borrowings increased by \$24.6 million.

From 2004 to 2005, NII increased by \$4.0 million, from \$41.2 million to \$45.2 million. The inclusion of Enterprise National Bank (Enterprise), acquired in 2004, for the full year of 2005 versus only nine months of 2004 accounted for \$2.4 million of the 2005 increase. During 2005, the net interest margin was 3.55%, compared to 3.37% for 2004, an increase of 18 basis points.

The following table shows, for the periods indicated, an analysis of NII, including the average amount of earning assets and interest-bearing liabilities outstanding during the period, the interest earned or paid on such amounts, the average yields/rates paid and the net yield on earning assets on both a book and tax equivalent basis:

	(\$ in Thousands)

Net yield on earning assets			3.64	3.76

We utilize the provision for loan losses to replenish the allowance for loan losses on the balance sheet. Based on an evaluation of the risk exposure contained in the loan portfolio, management and the Board of Directors believe that the level of the allowance is adequate. This is an ongoing process, and we review and determine the amount of the provision quarterly, using a methodology that over the years has proven to be sound. The provision for loan losses decreased from \$3,522,000 in 2004 to \$2,128,000 in 2005 and to \$1,656,000 in 2006. The decrease in the provisions for 2005 and 2006 resulted from an overall improvement in the credit quality in the portfolio. The details of these improvements are shown in the following section, entitled *Financial Condition*, under the discussion of the allowance for loan losses. Management expects significant loan growth in 2007 as our newer markets in Brentwood, Hoover, Sarasota, and Memphis continue to expand. Considering this expected growth and unknown external factors, management intends to increase the provision for loan losses in 2007. At this time, management expects the level of the provision to protect us from any unforeseen deterioration in the quality of the loan portfolio. However, if during the year, any or all of these factors change in direction or speed, we will make the necessary adjustments in the provision to reflect these changes.

Noninterest income includes various service charges, fees and commissions we collected, including insurance commissions earned by Galloway-Chandler-McKinney Insurance Agency, Inc., a wholly owned subsidiary of Cadence. It has been, and continues to be, one of our strategic focuses to diversify our other income sources so that we can be less dependent on net interest income. Other income increased slightly from \$19.9 million in 2005 to \$20.0 million in 2006. The changes in the major categories between 2006 and 2005 are as follows:

<i>(In thousands)</i>	2006	2005	Change
Service charges on deposit accounts	\$ 8,878	\$ 7,952	\$ 926
Insurance commissions, fees, and premiums	4,441	4,578	(137)
Other service charges and fees	2,933	2,481	452
Trust Department income	2,341	2,219	122
Mortgage loan fees	876	838	38
Securities gains (losses), net	66	159	(93)
Bank owned life insurance income	641	641	

Edgar Filing: CADENCE FINANCIAL CORP - Form 10-K

Impairment loss on securities	(2,025)		(2,025)
Other	1,842	1,067	775
Total other income	\$ 19,993	\$ 19,935	\$ 58

Table of Contents

Service charges on deposit accounts increased by 11.6% in 2006, mostly due to improved management and oversight of our noninterest-bearing accounts. Other service charges and fees increased by 18.2%, primarily due to increases in official check income, checkcard income, and retail investment income. Other noninterest income increased by 72.6% in 2006. This increase is mostly due to a \$488,000 gain on the sale of our credit card portfolio, a \$215,000 increase in earnings from our investment in a low income housing partnership, and \$842,000 in gains on the early extinguishment of approximately \$13.0 million of Federal Home Loan Bank (FHLB) borrowings assumed in the 2004 acquisition of Enterprise. Also, 2005 includes a \$837,000 gain related to our interest in the Pulse card-clearing network, which was sold during the first quarter. Changes in other accounts were not individually material.

We recognized \$66,000 in securities gains during 2006, compared with gains of \$159,000 in 2005. In addition, during the third quarter of 2006, we recognized a \$2.0 million other-than-temporary impairment charge relating to certain Fannie Mae and Freddie Mac preferred stock. Those securities were sold in the fourth quarter of 2006 for amounts approximating their fair values.

Other income declined slightly from \$20.1 million in 2004 to \$19.9 million in 2005. The changes in the major categories between 2005 and 2004 are as follows:

<i>(In thousands)</i>	2005	2004	Change
Service charges on deposit accounts	\$ 7,952	\$ 8,581	\$ (629)
Insurance commissions, fees, and premiums	4,578	4,367	211
Other service charges and fees	2,481	2,426	55
Trust Department income	2,219	2,061	158
Mortgage loan fees	838	1,202	(364)
Securities gains (losses), net	159	223	(64)
Bank owned life insurance income	641	748	(107)
Other	1,067	499	568
Total other income	\$ 19,935	\$ 20,107	\$ (172)

The \$172,000 decline in other income resulted mainly from a \$629,000, or 7.3%, decline in service charges on deposit accounts; a \$364,000, or 30.3%, decline in mortgage loan fees; and a \$107,000, or 14.3%, decline in bank owned life insurance income. The decrease in service charges on deposit accounts largely resulted from an increase in the number of free checking accounts and an overall reduction in the amount of non-sufficient funds (NSF) fees that were generated from our noninterest-bearing deposit accounts. Mortgage fee income continued its decline during 2005. We experienced continued strong demand for new home loans; however, that demand was not enough to offset a decline in the demand to refinance existing mortgage loans. Bank owned life insurance income declined as the insurance companies continued to lower their crediting rates as the yields on their general account portfolios continued to decline as older, higher yield assets matured and were replaced by securities with lower yields.

These decreases were partially offset by increases in other categories of noninterest income. Income from fiduciary activities increased by \$158,000, or 7.7%; insurance commissions and fee income increased by \$211,000, or 4.8%; other noninterest income increased by \$568,000, or 113.8%; and other service charges and fees increased by \$55,000, or 2.3%. The increase in income from fiduciary activities resulted from the amount of assets under management and the overall improvement in the equity markets over the past year. The increase in insurance commissions and fee income resulted from an improvement in both sales volume and the level of profit sharing received from the insurance carriers based on loss experience. The increase in other service charges and fees and other noninterest income was due to a one-time gain of \$837,000 related to our interest in the Pulse card-clearing network, which was sold during the first quarter of 2005, an increase of \$192,000 in checkcard income and a \$91,000 settlement from the State of Mississippi on a road construction project affecting a branch bank. The increase in checkcard income resulted from increased usage, as more transactions were processed electronically. This gain was partially offset by a \$222,000 decline in income from retail investments and a decline of \$147,000 in gain on sale of repossessed assets. All other changes in the other accounts were not material in amount.

We recognized \$159,000 in securities gains during 2005, compared to gains of \$223,000 during 2004.

Table of Contents

Noninterest expense represents ordinary overhead expenses. These expenses increased from \$44.7 million in 2005 to \$49.7 million in 2006. The following table shows the detailed changes in the major categories of noninterest expense between 2005 and 2006:

<i>(In thousands)</i>	2006	2005	Change
Salaries	\$ 23,010	\$ 20,294	\$ 2,716
Employee benefits	5,756	4,640	1,116
Net occupancy	3,314	2,958	356
Furniture and equipment	3,501	3,214	287
Communications	1,128	981	147
Data processing	1,676	1,520	156
Advertising	969	728	241
Professional fees	1,476	1,286	190
Intangible amortization	1,144	1,275	(131)
Other	7,708	7,849	(141)
Total other expense	\$ 49,682	\$ 44,745	\$ 4,937

Noninterest expense increased by 11.0% in 2006, primarily due to the following: a \$2.7 million, or 13.4%, increase in salaries; a \$1.1 million, or 24.1% increase in employee benefits; a \$356,000, or 12.0%, increase in net occupancy expense; a \$287,000, or 8.9%, increase in furniture and equipment expense; and a \$241,000, or 33.1%, increase in advertising expense.

The 13.4% increase in salaries and the 24.1% increase in employee benefits can be attributed to three primary factors: 1) salaries and employee benefits related to the new de novo branches in Hoover, Alabama and Brentwood, Tennessee; 2) additional salaries and employee benefits related to the former SunCoast and Seasons branches; and 3) pension costs associated with certain scheduled retirements. Salaries and employee benefits expense for the de novo branches totaled \$1,180,000 for 2006, salaries and employee benefits related to the former SunCoast and Seasons branches totaled \$786,000 for 2006, and pension expense increased by \$606,000 as a result of the scheduled retirements. Exclusive of these items, our overall salaries and employee benefits expense increased by approximately 5.1%, due mostly to normal raises and the addition of certain key staff positions.

The 12.0% increase in net occupancy expense and the 8.9% increase in furniture and equipment expense are mostly due to increased depreciation, facility rental, and equipment rental expenses associated with the de novo branches, the new branches opened in Memphis and the former SunCoast and Seasons branches. These added branches accounted for \$504,000 of the \$639,000 increase in expense from 2005 to 2006.

The 33.1% increase in advertising expense is due to our market expansions in 2006, as well as additional system-wide campaigns run during the year that included the promotion of the new Cadence Bank name.

None of the changes in the other expense categories were considered to be individually material.

Noninterest expenses increased from \$41.7 million in 2004 to \$44.7 million in 2005, an increase of \$3.0 million, or 7.2%. The following table shows the detailed changes in the category. Expenses from Enterprise are included for nine months in 2004 and all of 2005; however, Enterprise was merged into Cadence in November 2005. As a result, separate numbers for Enterprise for 2005 are not available.

<i>(In thousands)</i>	2005	2004	Change
Salaries	\$ 20,294	\$ 18,893	\$ 1,401
Employee benefits	4,640	4,522	118
Net occupancy	2,958	2,699	259
Furniture and equipment	3,214	3,162	52
Communications	981	1,102	(121)
Data processing	1,520	1,170	350
Advertising	728	774	(46)
Professional fees	1,286	1,494	(208)
Intangible amortization	1,275	1,154	121

Edgar Filing: CADENCE FINANCIAL CORP - Form 10-K

Other	7,849	6,757	1,092
Total other expense	\$ 44,745	\$ 41,727	\$ 3,018

Salaries increased \$1,401,000, or 7.4%, from 2004 to 2005. Our executive and senior management bonus program is based upon our reaching predetermined profit goals for the year. We reached these goals for 2005. As a result, we accrued approximately \$1,004,000 for anticipated bonuses. Without this bonus accrual, this expense category would have increased

Table of Contents

only by \$397,000, or 2.1%. The predetermined profit goals were not reached in 2004; therefore, no significant bonuses were accrued in that year. During 2005, employee benefits increased by \$118,000, or 2.6%. Approximately 60% of this increase came from the accrued payroll taxes and 401(k) contribution matches related to the 2005 bonuses and year-end incentives.

Net occupancy expense increased \$259,000, or 9.6%. This increase came primarily from three sources. First, 2005 included a full year of Enterprise expense while 2004 included only nine months. This accounted for approximately 53% of the increase. Second, 2005 was the first full year of the data center expansion depreciation. Third, we incurred rental increases on some of the properties in Memphis and rental expenses associated with the opening of the Hoover, Alabama de novo branch in October 2005.

Data processing expenses increased by \$350,000, or 30.0%. Virtually all of these increased expenses were associated with the conversion of our core operating system from an IBM environment to a Sun Micro Systems environment. Professional fees decreased by \$208,000, or 14.0%. This expense reduction came from the elimination of one-time direct expense to comply with Section 404 of the Sarbanes-Oxley Act. Other noninterest expenses increased by \$1,092,000, or 16.2%. This increase resulted primarily from expenses associated with the merger of Enterprise and Cadence, as well as expenses related to the Bank's name change. Also during 2005, we incurred approximately \$193,000 in losses as a result of Enterprise repurchasing loans sold in 2001. In 2004, other noninterest expenses included approximately \$181,000 in expenses associated with the closing of four under-performing branches in the Mississippi market. None of the changes in the other expense categories were individually considered to be material.

Changes in our income tax expense have generally paralleled changes in pre-tax income. Our effective tax rates were 23.4% in 2004, 24.7% in 2005, and 26.0% in 2006. These changes in both years resulted primarily from the mix of income from tax-exempt investments and the percentage relationship of tax-exempt income to total pre-tax income. The alternative minimum tax provision, the market supply of acceptable municipal securities, the level of tax-exempt yields and our normal liquidity and balance sheet structure requirements limit our ability to reduce income tax expense by acquiring additional tax-free investments.

In summary, net income increased from \$12.3 million, or \$1.50 per diluted share, in 2004, to \$13.8 million, or \$1.68 per diluted share, in 2005, and to \$14.2 million, or \$1.37 per diluted share, in 2006.

The reduction in earnings per share in 2006 was caused by the additional shares issued with the stock offering in May and the shares issued in the acquisition of SunCoast in August. If 2006 fully diluted earnings per share had been computed using the same number of shares used in the 2005 computation, they would have been \$1.73 per diluted share. Additionally, the fully diluted earnings per share for 2006 were impacted by the one-time impairment charge of \$2,025,000 (\$1,250,000 after taxes), or 12 cents per share. The impact of this charge was partially offset by the gain on early extinguishment of debt of \$842,000 and the gain on the sale of our credit card loan portfolio of \$488,000. These two items equated to \$1,330,000 (\$821,000 after taxes), or eight cents per share.

In 2005, fully diluted earnings per share were reduced by approximately nine cents per share because of the cost associated with the Bank's name change and the merger of Cadence and Enterprise. This was partially offset by approximately six cents per share from the gain on the sale of the Pulse card-clearing network and the settlement with the State of Mississippi on the impact of a road construction project affecting a branch bank. These items netted to a three cent per share reduction in 2005.

FINANCIAL CONDITION

During 2006, our balance sheet showed an increase in total assets from \$1.45 billion at December 31, 2005, to \$1.90 billion at December 31, 2006. This was an increase of approximately \$453.8 million, or 31.4%.

During the year, cash and cash equivalents increased from \$43.1 million to \$83.5 million, an increase of \$40.4 million, or 93.6%. This increase is due to several factors, including the \$25.0 million structured repurchase transaction we initiated in December 2006, which is reflected in federal funds sold at year-end. In addition, we invested a portion of the proceeds from our stock offering in an interest-bearing account at the FHLB. During 2006, the investment securities portfolio increased slightly from \$442.4 million to \$448.6 million, an increase of \$6.1 million, or 1.4%.

The loan portfolio grew from \$860.6 million at the end of 2005 to \$1.2 billion at December 31, 2006. The increase during the year was \$362.3 million, or 42.1%. Of this increase, \$201.0 million came from our new markets in Florida and Georgia. Our de novo branch in Brentwood, Tennessee (Nashville MSA opened in February 2006) contributed \$76.5 million of the increase, and our de novo branch in Hoover, Alabama (Birmingham MSA opened in October 2005) contributed \$50.3 million of the increase. The remaining growth came from our Memphis, Tennessee and Tuscaloosa, Alabama markets. Our Mississippi market continues to produce little loan growth.

Table of Contents

During 2006, the allowance for loan losses increased by \$2.9 million, or 31.4%, from \$9.3 million to \$12.2 million. The SunCoast and Seasons acquisitions added \$3.1 million to our allowance for loan losses. Even though there has been increased competition for good quality credits in our markets, we did not reduce our underwriting standards, and as a result, the quality of the portfolio remains strong. See Note D in the Notes to Consolidated Financial Statements for additional information concerning the transactions in the allowance for loan losses for the three-year period ended December 31, 2006.

The following table reflects some of the statistics we use to evaluate the quality and potential exposure within our loan portfolio:

	Year Ended 12/31/06	Year Ended 12/31/05
Net charge-offs as a percentage of average net loans outstanding	0.19%	0.46%
Non-performing loans as a percentage of total loans	0.22%	0.30%
Classified assets as a percentage of average capital	16.67%	17.73%
Allowance for loan losses as a percentage of total loans	1.00%	1.08%

Based on the evaluations described earlier and the information above, the allowances for loan losses at the end of 2006 and 2005 were deemed adequate to cover exposure in our loan portfolio. The methodology used to determine the adequacy of the allowance for loan losses was tested during 2006, as loans were charged-off, and no additional special provision was needed. All of these loans had previously been identified and properly reserved against.

The liability side of the balance sheet increased from \$1.33 billion at December 31, 2005 to \$1.71 billion at December 31, 2006, an increase of \$379.6 million, or 28.6%.

During 2006, deposits increased by \$338.8 million, or 30.2%, to \$1.46 billion. The increase resulted from a \$327.8 million, or 34.3%, increase in interest-bearing deposits, and a \$11.0 million, or 6.6%, increase in non-interest bearing deposits. The acquisition of SunCoast contributed \$89.9 million to this increase, and the acquisition of Seasons contributed \$68.6 million. Of the remaining \$180.3 million growth in deposits, approximately \$108 million came from our core Mississippi markets. These markets provide a lower cost of deposits than our metro markets. The remaining growth was spread over our remaining markets, with Tuscaloosa contributing \$31.4 million and Memphis contributing \$17.3 million. During the year, we actively sought to increase deposits, in order to fund increases in loan demand.

Federal funds purchased and securities sold under agreements to repurchase increased by \$22.3 million, or 38.0%, from \$58.6 million to \$80.8 million. Also during 2006, FHLB advances increased by \$15.2 million, or 15.9%. This growth in wholesale funding also resulted from the strong loan growth in 2006 and our need to fund this growth. Our objective is to fund loan growth with the proper mix of retail and wholesale funding that will maximize net interest income and yet maintain our core deposits at the appropriate level.

As loan demand increases with the continued growth of our Memphis, Nashville, Tuscaloosa and Birmingham markets and the establishment of the Cadence brand in our new Florida and Georgia markets and in keeping with our funding objectives, we will aggressively seek deposits and will continue to look to the wholesale market for appropriate additions to funding.

CAPITAL RESOURCES AND SHAREHOLDERS EQUITY

Shareholders' equity increased from \$117.0 million at the end of 2005 to \$191.3 million at the end of 2006.

In May 2006, we completed a public offering of 2.76 million shares of our common stock resulting in net proceeds of approximately \$50.2 million. Our treasury stock shares were reissued as part of this offering. We used a portion of the proceeds from the offering to fund the SunCoast and Seasons acquisitions and intend to use the remainder of the proceeds for other general corporate purposes. In August 2006, we completed our acquisition of SunCoast. The acquisition was valued at approximately \$35.9 million, of which 45% was paid in cash and 55% was paid in shares of our common stock. We issued approximately 922,000 shares in connection with the SunCoast acquisition. In November 2006, we completed our acquisition of Seasons. The acquisition was an all-cash transaction valued at approximately \$17.6 million.

During 2006, we generated net income of \$14.2 million, from which we declared approximately \$10.7 million in dividends. Also during the year, accumulated other comprehensive income improved from an unrealized loss of \$8.2 million

Table of Contents

to an unrealized loss of \$6.7 million. Included in the change in accumulated other comprehensive income are a \$3.7 million increase in the market value of the available-for-sale portion of our investment securities portfolio (which includes a \$2.0 million other-than-temporary impairment charge recognized on certain Fannie Mae and Freddie Mac preferred stock), a \$2.3 million adjustment to our pension liability, in accordance with FASB Statement No. 158, and a \$41,000 unrealized loss on interest rate swaps during 2006.

The capital to asset ratio increased from 8.1% at December 31, 2005 to 10.1% at December 31, 2006. Peer organizations are traditionally in the 8.0% to 8.5% range.

Current regulatory requirements call for a basic leverage ratio of 5.0% for an institution to be considered well-capitalized. At the end of 2006, we maintained a 9.2% leverage ratio, significantly exceeding the ratio required for a well-capitalized institution.

Regulatory authorities also evaluate a financial institution's capital under certain risk-weighted formulas (high-risk assets would require a higher capital allotment, lower risk assets a lower capital allotment). In this context, a well-capitalized financial institution is required to have a Tier 1 risk-based capital ratio (excludes allowance for loan losses) of 6.0% and a total risk-based capital ratio (includes allowance for loan losses) of 10.0%. At the end of 2006, we had a Tier 1 risk-based capital ratio of 11.7% and a total risk-based capital ratio of 12.5%.

LIQUIDITY, INFLATION AND ASSET/LIABILITY MANAGEMENT

Liquidity may be defined as our ability to meet cash flow requirements created by decreases in deposits and/or other sources of funds or increases in loan demand. We have not experienced any problems with liquidity during 2006 and anticipate that all liquidity requirements will be met in the future. Our traditional sources of funds from deposit growth, maturing loans and investments and earnings have generally allowed us to consistently generate sufficient funds to meet our daily operational liquidity needs. As the result of a \$362.3 million increase in loans and a \$338.8 million increase in deposits, our loan/deposit ratio increased from 76.7% in 2005 to 83.7% in 2006. Our total funding sources include not only deposits, but also federal funds purchased, securities sold under agreements to repurchase and FHLB borrowings. When we include these sources of funding with deposits, our loans to total funding ratio increased in 2006 from 67.3% to 73.9%. Management's target loans to deposits ratio is in the range of 85-90%, and our goal is to limit wholesale funding to no more than 20% of total assets.

In May 2006, we completed a public offering of 2.76 million shares of our common stock resulting in net proceeds of approximately \$50.2 million. We used a portion of the proceeds from the offering to fund the SunCoast and Seasons acquisitions and intend to use the remainder of the proceeds for other general corporate purposes.

We offer retail repurchase agreements to accommodate excess funds of some of our larger depositors. Management believes that these repurchase agreements stabilize traditional deposit sources as opposed to risking the potential loss of these funds to alternative investment arrangements. Retail repurchase agreements, which we view as a source of funds, totaled \$30.8 million and \$28.5 million at December 31, 2006 and 2005, respectively. The level of retail repurchase agreement activity is limited by the availability of investment portfolio securities to be pledged against the accounts and our asset/liability funding policy. Because of the limited amount of retail repurchase agreements and the fact that the underlying securities remain under our control, we do not consider the exposure for this service material.

In December 2006, we entered into a \$25.0 million structured repurchase transaction. This transaction was a standard repurchase transaction with a fixed rate of 4.49% and a three-year term. The transaction has a quarterly call option after one year.

We believe that normal earnings and other traditional sources of cash flow, along with additional FHLB borrowings, if necessary, will provide the cash to allow us to meet our obligations with no adverse effect on liquidity. At December 31, 2006, we had the ability to borrow approximately \$238.5 million from the FHLB under the blanket line and had other unused short-term borrowing lines (federal funds purchased lines) of approximately \$110.5 million from upstream correspondent banks. As of December 31, 2006, we had \$110.7 million in outstanding FHLB borrowings.

In December 2005, we entered into a secured line of credit with an upstream correspondent that provides us access to borrow up to \$30.0 million. These borrowings may be used to finance acquisitions and for other general corporate purposes, provided that the borrowings used for purposes other than acquisitions do not exceed \$15.0 million. The term of the line of credit is two years. Interest on each borrowing will be paid at the lender's base rate or at LIBOR, plus 1.25% annually. We also pay a commitment fee, accruing at the annual rate of 0.10%, on the daily amount of the unused commitment. Borrowings are contingent on our ability to maintain various operational and financial covenants. We have pledged 605,000 shares of our stock as collateral for these borrowings and have covenanted to pledge shares with a minimum book value of \$75.0 million. As of December 31, 2006, we had no outstanding borrowings under this line of credit.

Table of Contents

We have no plans for the refinancing or redemption of any liabilities other than normal maturities and payments relating to the FHLB borrowings. We do not have plans at this time for any discretionary spending that would have a material impact on liquidity. Our stock repurchase plan gives management the authority, at its discretion, to purchase 298,783 additional shares of our common stock. If purchased at the year-end closing price of \$21.67, this purchase would require approximately \$6.5 million. Any purchases under this program will be made over an unknown period of time, and the necessary funds will be provided from internal sources. Under regulations controlling financial holding companies and national banks, the Bank is limited in the amount it can lend to our holding company, and such loans are required to be on a fully secured basis. At December 31, 2006, there were no loans between the Bank and the holding company.

The majority of assets and liabilities of a financial institution are monetary in nature; therefore, a financial institution differs greatly from most commercial and industrial companies, which have significant investments in fixed assets or inventories. Fluctuations in interest rate and actions of the Federal Reserve Board to regulate the national money supply in order to mitigate recessionary and inflationary pressures have a greater effect on a financial institution's profitability than do the higher costs for goods and services.

We believe the most significant impact of inflation on financial results is our ability to react to changes in interest rates. We maintained a consistent and disciplined asset/liability management policy during 2006 focusing on interest rate risk and sensitivity.

The primary objective of rate sensitivity management is to maintain net interest income growth while reducing exposure to adverse fluctuations in rates. We utilize an Asset/Liability Management Committee to evaluate and analyze our pricing, asset/liability maturities and growth, and balance sheet mix strategies in an effort to make informed decisions that will increase income and limit interest rate risk. The Committee uses simulation modeling as a guide for decision-making and to forecast changes in net income and the economic value of equity under assumed fluctuations in interest rate levels.

Due to the potential volatility of interest rates, our goal is to stabilize the net interest margin by maintaining a neutral rate sensitive position. At year-end 2006, our balance sheet reflected approximately \$97.1 million less in rate sensitive assets than liabilities that were scheduled to reprice within one year. This represents 10.0% of total assets and would indicate that we are slightly liability sensitive. This computation results from a static gap analysis that weights assets and liabilities equally. Management believes that interest rates will be flat to slightly down during 2007 and that our current position places us in the correct interest rate risk posture for this rate environment. Management does not believe that it is in our best interest to speculate on changes in interest rate levels. Although earnings could be enhanced if predictions were correct, they could also be put at significant risk if interest rates move against predictions.

OFF-BALANCE SHEET ARRANGEMENTS AND CONTRACTUAL OBLIGATIONS

During 2006, we hedged a portion of our floating rate prime based lending portfolio using floating to fixed interest rate swaps. As of December 31, 2006, we had five outstanding swaps with a total notional amount of \$50.0 million. Original maturities on these swaps range from twelve to twenty-four months, and rates range from 7.68% to 8.02%. These transactions were initiated to protect us from future downward fluctuations in the prime rate and to help ensure a more consistent cash flow from interest earned by our prime based lending portfolio.

These transactions are cash flow hedges as defined by FASB Statement No. 133, Accounting for Derivative Instruments and Hedging Activities, and were accounted for in accordance with the provisions of that Statement. As required by Statement No. 133, we measured the effectiveness of these transactions as of December 31, 2006 and determined that they remained highly effective, as defined by the Statement.

In September 2005, we entered into a \$25.0 million structured repurchase transaction in the secondary market. This term repurchase transaction has a 4% embedded floor and a three-year term. It was priced at three-month LIBOR plus 24 basis points and reprices every three months. This transaction is in line with our asset/liability strategy and was entered into to help protect us against an unexpected downturn in short-term interest rates. This derivative instrument was accounted for as an embedded derivative under FASB Statement No. 133.

Table of Contents

The following table shows our contractual obligations as of December 31, 2006:

<i>(In thousands)</i>	Total	Due in less than 1 year	Due in 1-3 years	Due in 3-5 years	Due after 5 years
Long-term debt	\$ 147,780	\$ 86,948	\$ 18,215	\$ 4,970	\$ 37,647
Operating leases	10,755	1,199	2,127	1,394	6,035
Federal funds purchased and securities sold under agreements to repurchase	80,838	30,838	50,000		
Other borrowings	1,998	1,998			
Total contractual obligations	\$ 241,371	\$ 120,983	\$ 70,342	\$ 6,364	\$ 43,682

The following table shows our other commercial commitments as of December 31, 2006:

<i>(In thousands)</i>	Total	Expires in less than 1 year	Expires in 1-3 years	Expires in 3-5 years	Expires after 5 years
Lines of credit (unfunded commitments)	\$ 359,271	\$ 203,196	\$ 66,452	\$ 28,267	\$ 61,356
Standby letters of credit	18,183	16,824	296	1,063	
Total commercial commitments	\$ 377,454	\$ 220,020	\$ 66,748	\$ 29,330	\$ 61,356

MARKET INFORMATION

Effective December 28, 2006, our stock is listed on the NASDAQ and is traded under the symbol CADE. Prior to that date, our stock was listed on the American Stock Exchange (AMEX) and was traded under the symbol NBY. Computershare Shareholder Services, Inc. acts as our transfer agent. The following table sets forth, for the periods indicated, the range of sales prices of our common stock as reported on NASDAQ and AMEX for 2005 and 2006 and the dividends declared for each period.

YEAR	QUARTER	HIGH	LOW	CASH DIVIDEND DECLARED PER QUARTER
2005	First	\$ 26.08	\$ 22.82	\$ 0.24
	Second	25.05	23.01	0.24
	Third	25.42	23.06	0.25
	Fourth	25.73	23.01	0.25
2006	First	\$ 24.97	\$ 22.89	\$ 0.25
	Second	23.33	20.04	0.25
	Third	22.00	20.02	0.25
	Fourth	22.29	20.15	0.25

We have paid cash dividends on our common stock since our inception and have increased dividends per share for each of the past thirty-one years. We currently estimate that dividends in 2007 will approximate \$1.02 per share.

ITEM 7A - QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

The Corporation is exposed only to U.S. dollar interest rate changes and, accordingly, we manage exposure by considering the possible changes in the net interest margin. We do not have any trading instruments nor do we classify any portion of the investment portfolio as held for trading. In 2006, we entered into five floating to fixed interest rate swaps to hedge a portion of its floating rate prime based lending portfolio. The transactions are cash flow hedges as defined by Statement No. 133 and are accounted for under the provisions of the Statement. These transactions are in line with our asset/liability strategy and were entered into to help protect the Corporation against an unexpected downturn in

Edgar Filing: CADENCE FINANCIAL CORP - Form 10-K

short-term interest rates. As we continue to enhance our asset/liability management, we will continue to look for opportunities to protect the Corporation from unexpected changes in interest rates. Finally, we have no exposure to foreign currency exchange rate risk, commodity price risk, and other market risks.

The following table reflects the year-end position of our interest-earning assets and interest-bearing liabilities, which can either reprice or mature within the designated time period. The interest rate sensitivity gaps can vary from day-to-day and

Table of Contents

are not necessarily a reflection of the future. In addition, certain assets and liabilities within the same designated time period may nonetheless reprice at different times and at different levels.

(\$ In Thousands)

December 31, 2006

	Interest Sensitive Within (Cumulative)			Total
	Three Months	Twelve Months	Five Years	
Interest-earning assets:				
Loans	\$ 680,498	\$ 867,067	\$ 1,188,721	\$ 1,222,946
Investment and mortgage-backed securities	23,834	67,719	320,128	448,580
Federal funds sold and other	24,804	42,359	42,359	42,359
	\$ 729,136	\$ 977,145	\$ 1,551,208	\$ 1,713,885
Interest-bearing liabilities:				
Deposits	\$ 579,897	\$ 916,406	\$ 1,370,506	\$ 1,460,523
Borrowed funds	133,167	157,844	230,147	230,616
	\$ 713,064	\$ 1,074,250	\$ 1,600,653	\$ 1,691,139
Sensitivity gap:				
Dollar amount	\$ 16,072	\$ (97,105)	\$ (49,445)	\$ 22,746
Percent of total interest-earning assets	2.20%	-9.94%	-3.19%	1.33%

The matching of assets and liabilities may be analyzed by examining the extent to which such assets and liabilities are interest rate sensitive and by monitoring an institution's interest rate sensitivity gap. An asset or liability is said to be interest rate sensitive within a specific time period if it will mature or reprice within that time period. The interest rate sensitivity gap is defined as the difference between the amounts of interest-earning assets and interest-bearing liabilities anticipated, based upon certain assumptions, to mature or reprice within that time period. A gap is considered positive when the amount of interest rate sensitive assets maturing within a specific time frame exceeds the amount of interest rate sensitive liabilities maturing within that same time frame. During a period of falling interest rates, a negative gap would tend to result in an increase in net interest income while a positive gap would tend to adversely affect net interest income. In a rising interest rate environment, an institution with a positive gap would generally be expected, absent the effects of other factors, to experience a greater increase in the yield of its assets relative to the costs of its liabilities and thus an increase in the institution's net interest income would result.

At December 31, 2006, total interest-earning assets maturing or repricing within one year were less than interest-bearing liabilities maturing or repricing within the same time period by approximately \$97.1 million (cumulative), representing a negative cumulative one-year gap of 10.0% of earning assets. Management believes this position to be acceptable in the current interest rate environment.

Banking regulators have issued advisories concerning the management of interest rate risk (IRR). The regulators consider effective interest rate management an essential component of safe and sound banking practices. To monitor our IRR, our risk management practices include (a) risk management, (b) risk monitoring and (c) risk control. Risk management consists of a system in which a measurement is taken of the amount of earnings at risk when interest rates change. We first prepare a base strategy, which is the position of the Bank and its forecasted earnings based upon the current interest rate environment or most likely interest rate environment. The IRR is then measured based upon hypothetical changes in interest rates by measuring the impact such a change will have on the base strategy.

Risk monitoring consists of evaluating the base strategy and the assumptions used in its development based upon the current interest rate environment. This evaluation is performed quarterly by management or more often in a rapidly changing interest rate situation and monitored by an Asset/Liability Management Committee.

Interest rate risk is managed based upon our tolerance for interest rate exposure and the resulting effect on net interest income and the economic value of equity. A balance sheet and income statement simulation model is prepared monthly, using current month end data. A base case simulation is prepared monthly using current month growth trends, projected forward and a flat rate forecast. Two additional interest rate shock simulations are prepared, one showing rates rising 200 basis points and one showing a 200 basis point decline in rates. Our policy is that a 200

Edgar Filing: CADENCE FINANCIAL CORP - Form 10-K

basis point shock in rates should not cause the projection of net interest income to change by more than 15% and cause the economic value of equity to change by more than +25% and -20%. The December 2006 model reflects net interest income under this scenario increasing by 0.55% with a 200 basis point upward shock of rates and decreasing 2.55% if rates are shocked down 200 basis points. At December 31, 2006, a 200 basis point immediate increase in interest rates would have resulted in a 1.37% decline in market

Table of Contents

value of equity, and a 200 basis point instant decrease would have resulted in a 6.76% decrease in market value of equity. At December 31, 2006, we are within policy on both of these tests, and management believed that changes in net interest income and market value of equity, as reflected in our models, were acceptable.

ITEM 8 - FINANCIAL STATEMENTS AND SUPPLEMENTARY DATA

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Audit Committee of the

Board of Directors and Shareholders

Cadence Financial Corporation

We have audited the accompanying consolidated balance sheets of Cadence Financial Corporation and subsidiaries as of December 31, 2006 and 2005, and the related consolidated statements of income, changes in shareholders' equity and cash flows for each of the three years in the period ended December 31, 2006. These financial statements are the responsibility of the Corporation's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the consolidated financial position of Cadence Financial Corporation and subsidiaries as of December 31, 2006 and 2005, and the consolidated results of their operations and their cash flows for each of the three years in the period ended December 31, 2006, in conformity with accounting principles generally accepted in the United States of America.

As discussed in Note M to the consolidated financial statements, the Company changed its method of accounting in 2006 for its defined benefit pension plan as a result of adopting Statement of Financial Accounting Standards No. 158, Employers' Accounting for Defined Benefit Pension and Other Postretirement Plans.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the effectiveness of Cadence Financial Corporation's internal control over financial reporting as of December 31, 2006, based on criteria established in Internal Control - Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission and our report dated March 13, 2007, expressed an unqualified opinion thereon.

CADENCE FINANCIAL CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

NOTE A SUMMARY OF ACCOUNTING POLICIES

Cadence Financial Corporation (the Corporation) and its subsidiaries follow accounting principles generally accepted in the United States of America, including, where applicable, general practices within the banking industry.

1. Basis of Presentation

The consolidated financial statements include the accounts of the Corporation and Cadence Bank, N.A. (Cadence or the Bank), a wholly-owned subsidiary of the Corporation, Enterprise Bancshares, Inc. (Enterprise), a wholly-owned subsidiary of the Corporation, Galloway-Chandler-McKinney Insurance Agency, Inc. (GCM), a wholly-owned subsidiary of Cadence, NBC Insurance Services of Alabama, Inc., a wholly-owned subsidiary of Cadence, NBC Service Corporation, a wholly-owned subsidiary of Cadence, and Commerce National Insurance Company (CNIC), a wholly-owned subsidiary of NBC Service Corporation.

Significant intercompany accounts and transactions have been eliminated.

2. Nature of Operations

The Corporation is a financial holding company. Its primary asset is its investment in Cadence, its subsidiary bank. Cadence operates under a national bank charter and is subject to regulation by the Office of the Comptroller of the Currency. Cadence provides full banking services in five southeastern states as follows: the north central region of Mississippi; the Tuscaloosa and Hoover (Birmingham MSA), Alabama market areas; the Memphis, Tennessee market area; the Brentwood (Nashville MSA), Tennessee market area; the Sarasota (Sarasota-Bradenton-Venice MSA), Florida market area; and the cities of Blairsville and Blue Ridge in northeast Georgia.

The Corporation acquired SunCoast Bancorp, Inc. (SunCoast), the parent company of SunCoast Bank, in August 2006. Also, the Corporation acquired Seasons Bancshares, Inc. (Seasons), the parent company of Seasons Bank, in November 2006. Both SunCoast and Seasons were merged into the Corporation, and SunCoast Bank and Seasons Bank were merged into Cadence.

Enterprise is an inactive subsidiary of the Corporation. GCM operates insurance agencies in Cadence's Mississippi market area. NBC Insurance Services of Alabama, Inc., sells annuity contracts in Alabama. The primary asset of NBC Service Corporation is its investment in CNIC, a wholly-owned life insurance company.

3. Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

4. Securities

Securities are accounted for as follows:

Securities Available-for-Sale

Securities classified as available-for-sale are those securities that are intended to be held for an indefinite period of time, but not necessarily to maturity. Any decision to sell a security classified as available-for-sale would be based on various factors, including movements in interest rates, liquidity needs, security risk assessments, changes in the mix of assets and liabilities and other similar factors. These securities are carried at their estimated fair value, and the net unrealized gain or loss is reported as accumulated other comprehensive income, net of tax, until realized. Premiums and discounts are recognized in interest income using the interest method.

Gains and losses on the sale of securities available-for-sale are determined using the adjusted cost of the specific security sold.

Table of Contents

Securities Held-to-Maturity

Securities classified as held-to-maturity are those securities for which there is a positive intent and ability to hold to maturity. These securities are carried at cost adjusted for amortization of premium and accretion of discount, computed by the interest method.

Trading Account Securities

Trading account securities are securities that are held for the purpose of selling them at a profit. There were no trading account securities on hand at December 31, 2006 and 2005.

Other Securities

Other securities are carried at cost and are restricted in marketability. Other securities consist of required investments in the Federal Home Loan Bank and Federal Reserve Bank.

Derivative Instruments

Derivative instruments are accounted for under the requirements of Financial Accounting Standards Board (FASB) Statement No. 133, Accounting for Derivative Instruments and Hedging Activities. During 2005, the Corporation entered into a structured repurchase transaction with an embedded floor. This derivative instrument was accounted for as an embedded derivative.

In 2006, the Corporation entered into five floating to fixed interest rate swaps with a total notional amount of \$50.0 million to hedge a portion of its floating rate prime based lending portfolio. Original maturities on these swaps range from twelve to twenty-four months, and rates range from 7.68% to 8.02%. The transactions are cash flow hedges as defined by Statement No. 133 and are accounted for under the provisions of the Statement. The effectiveness of these transactions was tested as of December 31, 2006, in accordance with Statement No. 133, and management determined as of that date, the transactions remained highly effective, as defined by the Statement. For the year ended December 31, 2006, (\$41,000) was recorded as an adjustment to accumulated other comprehensive income for the change in fair value of these transactions.

5. Loans

Loans are carried at the principal amount outstanding adjusted for the allowance for loan losses, net deferred origination fees, and unamortized discounts and premiums. Interest income on loans is recognized based on the principal balance outstanding and the stated rate of the loan.

A loan is considered to be impaired when it appears probable that the entire amount contractually due will not be collected. Factors considered in determining impairment include payment status, collateral values, and the probability of collecting scheduled payments of principal and interest when due. Generally, impairment is measured on a loan-by-loan basis using the fair value of the supporting collateral.

Loans are generally placed on a nonaccrual status when principal or interest is past due ninety days or when specifically determined to be impaired. When a loan is placed on nonaccrual status, interest accrued but not received is generally reversed against interest income. If collectibility is in doubt, cash receipts on nonaccrual loans are used to reduce principal rather than recorded as interest income. Past due status is determined based upon contractual terms.

Loan origination fees and certain direct origination costs are capitalized and recognized as an adjustment of the yield on the related loan. Premiums and discounts on purchased loans are recognized as an adjustment of yield over the contractual life of the loan.

6. Allowance for Loan Losses

The allowance for loan losses is maintained at a level believed adequate to absorb probable losses inherent in the loan portfolio and is based on the size and current risk characteristics of the loan portfolio, an assessment of individual problem loans, actual and anticipated loss experience, current economic events, internal and regulatory loan reviews, and other pertinent factors, including regulatory guidance and general economic conditions. Determination of the allowance is inherently subjective, as it requires significant estimates, including the evaluation of collateral supporting impaired loans, estimated losses on pools of homogeneous loans based on historical loss experience, and consideration of current economic trends, all of which may be susceptible to significant change. When management believes the collectibility of a loan is unlikely, the loss is charged off against the allowance, while any recovery of an amount previously charged off is credited to the allowance. A provision for loan losses is charged to operations based on management's periodic evaluation of the factors previously mentioned.

Table of Contents

The allowance for loan losses consists of an allocated component and an unallocated component. The components of the allowance for loan losses represent an estimation made pursuant to either FASB Statement No. 5, *Accounting for Contingencies*, or FASB Statement No. 114, *Accounting by Creditors for Impairment of a Loan*. The allocated component of the allowance for loan losses reflects expected losses resulting from an analysis developed through specific credit allocations for individual loans and historical loss experience for each loan category. The specific allocations are based on a regular review of all loans over a fixed-dollar amount and where the internal credit rating is at or below a predetermined classification. The historical loan loss element is determined statistically using loss experience and the related internal gradings of loans charged off. The analysis is performed quarterly and loss factors are updated regularly based on actual experience. The allocated component of the allowance for loan losses also includes consideration of the amounts necessary for any concentrations and changes in portfolio mix and volume.

The unallocated portion of the allowance reflects management's estimate of probable inherent but undetected losses within the portfolio due to external credit risk factors, such as uncertainties in economic conditions, changes in certain market segments, changes in collateral values, and unfavorable information about a borrower's financial condition.

7. Premises and Equipment

Premises and equipment are stated at cost, less accumulated depreciation and amortization. Depreciation and amortization are determined using the straight-line method at rates calculated to depreciate or amortize the cost of assets over their estimated useful lives.

Maintenance and repairs of property and equipment are charged to operations, and major improvements are capitalized. Upon retirement, sale, or other disposition of property and equipment, the cost and accumulated depreciation are eliminated from the accounts, and any gains or losses are included in operations.

8. Other Real Estate

Other real estate consists of properties acquired through foreclosure and, as held for sale property, is recorded at the lower of the outstanding loan balance or current appraisal less estimated costs to sell. Any write-down to fair value required at the time of foreclosure is charged to the allowance for loan losses. Subsequent gains or losses on other real estate are reported in other operating income or expenses.

9. Goodwill and Other Intangible Assets

Goodwill represents the cost of acquired institutions in excess of the fair value of the net assets acquired. In accordance with FASB Statement No. 142, *Goodwill and Other Intangible Assets*, the Corporation does not amortize goodwill but performs periodic testing of goodwill for impairment. If impaired, the asset is written down to its estimated fair value.

Other identifiable intangible assets consist primarily of the core deposit premium arising from acquisitions. The core deposit premium was established using the discounted cash flow approach and is being amortized using an accelerated method over the estimated remaining life of the acquired core deposits.

10. Income Taxes

Income taxes are provided for the tax effects of the transactions reported in the financial statements and consist of taxes currently payable plus deferred taxes related primarily to differences between the bases of assets and liabilities as measured by income tax laws and their bases as reported in the financial statements. The deferred tax assets and liabilities represent the future tax consequences of those differences, which will either be taxable or deductible when the assets and liabilities are recovered or settled. Tax credits are recognized as a reduction of the current tax provision in the period they may be utilized.

The Corporation and its subsidiaries file consolidated income tax returns. The subsidiaries provide for income taxes on a separate return basis and remit to the Corporation amounts determined to be payable.

11. Trust Assets

Except for amounts included in deposits, assets of the Trust Department are not included in the accompanying balance sheets.

12. Advertising Costs

Advertising costs are expensed in the period in which they are incurred.

Table of Contents

13. Employee Benefits

Employees hired prior to January 1, 2001, participate in a noncontributory defined benefit pension plan. The plan calls for benefits to be paid to eligible employees at retirement based primarily upon years of service and compensation. Contributions to the plan reflect benefits attributed to employees' services to date, as well as services expected to be earned in the future. The annual pension cost charged to expense is actuarially determined in accordance with the provisions of FASB Statement No. 87, *Employers' Accounting for Pensions*. The plan was amended effective January 1, 2001, to close participation in the plan. Employees hired subsequent to December 31, 2000, are not eligible to participate. Current participants continue to accrue benefits, but benefits accrued are offset by contributions to the profit sharing plan.

On January 1, 2001, the Corporation and its subsidiaries adopted a defined contribution profit sharing plan. Employer contributions are made annually equal to 3% of each participant's base pay. Participant accounts are 100% vested upon completion of five years of service.

The Corporation and its subsidiaries provide a deferred compensation arrangement (401(k)) plan whereby employees contribute a percentage of their compensation. The plan provides for matching contributions of fifty percent of employee contributions of six percent or less for employees with less than twenty years of service. For employees with service of twenty years or more, the matching contribution is seventy-five percent of employee contributions of six percent or less.

Employees participate in a nonleveraged Employee Stock Ownership Plan (ESOP) through which common stock of the Corporation is purchased at its market price for the benefit of employees. Effective January 1, 2001, the ESOP plan was amended to freeze the plan and to allow no new entrants into the ESOP. All participants at December 31, 2000, became 100% vested in their accounts. The ESOP is accounted for in accordance with Statement of Position 93-6, *Employers' Accounting for Employee Stock Ownership Plans*.

The Corporation has a supplemental retirement plan that originated from an acquired bank for certain directors and officers of that acquired bank. Life insurance contracts have been purchased which may be used to fund payments under the plans. The annual cost charged to expense and the estimated present value of the projected payments are actuarially determined in accordance with the provisions of FASB Statement No. 87, *Employers' Accounting for Pensions*.

The Corporation has entered into agreements with certain senior officers to establish an indexed retirement plan. Benefit amounts are based on additional earnings from bank owned life insurance (BOLI) policies compared to the yield on treasury securities. Benefit payments are not guaranteed because there may not be a positive spread between BOLI earnings and the yield on selected treasury securities. However, life insurance assets have historically generated more net earnings than treasury securities. The annual cost charged to expense and the estimated present value of the projected payments are determined in accordance with the provisions of Accounting Principles Board (APB) No. 12 relating to deferred compensation contracts.

The Corporation provides a voluntary deferred compensation plan for certain of its executive and senior officers. Under this plan, the participants may defer up to 25% of their annual compensation. The Corporation may, but is not obligated to contribute to the plan. Amounts contributed to this plan are credited to a separate account for each participant and are subject to a risk of loss in the event of the Corporation's insolvency. The Corporation made no contributions to this plan in 2004, 2005 or 2006.

The Corporation provides an employee phantom stock plan whereby 11,245 units or phantom shares of the Corporation's stock have been assigned for the benefit of certain key employees. Under the terms of the plan, retirement or similar payments will be equal to the fair market value of the stock plus all cash dividends paid since the adoption of the agreement. An expense was recorded at the establishment date based on the market value of the stock. Any increase or decrease in the value of the stock is recorded as an adjustment to employee benefits expense.

14. Other Assets

Financing costs related to the issuance of junior subordinated debentures and the origination cost of the Corporation's revolving line of credit have been capitalized and are being amortized over the life of the respective instruments and are included in other assets.

The Corporation has invested in a low income housing partnership as a 99% limited partner. The partnership has qualified to receive annual low income housing federal tax credits that are recognized as a reduction of current tax expense. The investment is accounted for using the equity method.

Table of Contents

The Corporation invests in BOLI, which involves the purchasing of life insurance on a chosen number of employees. The Corporation is the owner of the policies and, accordingly, the cash surrender value of the policies is included in other assets, and increases in cash surrender values are reported as income.

15. Stock Options/Performance Share Grants

Effective January 1, 2006, the Corporation adopted FASB Statement No. 123(R), Share-Based Payment. This Statement requires that the fair value of equity instruments exchanged for employee service (as determined on the grant date of the award) be recognized as compensation cost over the period during which an employee is required to provide service in exchange for the award the requisite service period (usually the vesting period). Changes in fair value during the requisite service period are recognized as compensation cost over that period. The Statement's provisions are applied to new awards and to awards modified, repurchased, or cancelled after the required effective date. Additionally, compensation cost for the portion of awards for which the requisite service has not been rendered that are outstanding as of the required effective date is recognized as the requisite service is rendered on or after the required effective date. The adoption of Statement No. 123(R) did not significantly impact the Corporation's financial statements for the year ended December 31, 2006.

Prior to 2006, the Corporation's stock option plans were accounted for under the recognition and measurement provisions of Accounting Principles Board (APB) Opinion No. 25, Accounting for Stock Issued to Employees, as permitted by FASB Statement No. 123, Accounting for Stock-Based Compensation. As such, the Corporation did not recognize any compensation expense for stock options granted, since all stock options were priced at the fair market value of the Corporation's common stock on the date of grant.

The following table illustrates the effect on net income and earnings per share if the Corporation had applied the fair value recognition provisions to options granted under the Corporation's stock option plans for the years ended December 31, 2005 and 2004:

<i>(In thousands, except per share data)</i>	Year Ended December 31,	
	2005	2004
Net income as reported	\$ 13,754	\$ 12,299
Deduct stock-based compensation expense determined under fair value based method	369	261
Pro forma net income	\$ 13,385	\$ 12,038
Basic net income per share as reported	\$ 1.68	\$ 1.51
Pro forma basic net income per share	1.64	1.47
Diluted net income per share as reported	1.68	1.50
Pro forma diluted net income per share	1.64	1.47

The estimated fair value of the options granted under the stock option plan during the years ended December 31, 2005 and 2004 was computed using the Black-Scholes option-pricing model using the following assumptions: dividend yield of 3.75% for both years, expected volatility of 31% for 2005 and 32% for 2004, risk-free interest rate of 4.48% for both years, and expected life of 8 years for 2005 and 7.56 years for 2004.

As of December 31, 2005, all outstanding options had been vested. See Note L for additional information concerning the current status of the Corporation's stock options.

During 2006, the shareholders of the Corporation adopted a new Long-Term Incentive Compensation Plan. This plan gave the Compensation Committee of the Board of Directors additional alternatives for using share-based compensation. During 2006, the Committee granted performance shares to certain officers. These shares are being accounted for under Statement No. 123(R) and compensation expense is being recognized over the requisite service period based upon the fair market value of the shares at grant date. See Note L for additional information concerning performance shares.

16. Cash Flows

For purposes of reporting cash flows, cash and cash equivalents include cash on hand and amounts due from banks, interest-bearing deposits with banks, and federal funds sold. Generally, federal funds are sold for one to seven day periods.

Table of Contents**17. Net Income Per Share**

Basic net income per share computations are based upon the weighted average number of common shares outstanding during the periods. Diluted net income per share computations are based upon the weighted average number of common shares outstanding during the periods plus the dilutive effect of outstanding stock options.

Performance shares outstanding are included in the average diluted shares outstanding until the performance targets have been achieved. Once the performance has been attained and the shares are vesting over a time period, they are included in average primary shares outstanding. At December 31, 2006, the performance targets of all performance shares have been achieved, and all shares are included in average primary shares outstanding.

Presented below is a summary of the components used to calculate basic and diluted net income per share for the years ended December 31, 2006, 2005, and 2004:

<i>(In thousands, except per share data)</i>	Years Ended December 31,		
	2006	2005	2004
Basic Net Income Per Share			
Weighted average common shares outstanding	10,323	8,166	8,162
Net income	\$ 14,153	\$ 13,754	\$ 12,299
Basic net income per share	\$ 1.37	\$ 1.68	\$ 1.51

18. Off-Balance Sheet Financial Instruments

In the ordinary course of business, the Corporation enters into off-balance sheet financial instruments consisting of commitments to extend credit, credit card lines, standby letters of credit and commitments to purchase securities. Such financial instruments are recorded in the financial statements when they are exercised.

19. Business Segments

FASB Statement No. 131, *Disclosures About Segments of an Enterprise and Related Information*, requires public companies to report (i) certain financial and descriptive information about their reportable operating segments (as defined) and (ii) certain enterprise-wide financial information about products and services, geographic areas, and major customers. Management believes the Corporation's principal activity is commercial banking and that other activities are not considered significant segments.

20. Recent Accounting Pronouncements

In February 2006, the FASB issued Statement No. 155, *Accounting for Certain Hybrid Financial Instruments*. This Statement amends Statement No. 133, *Accounting for Derivative Instruments and Hedging Activities*, to clarify the treatment of interest-only and principal-only strips on debt instruments under the Statement. It permits fair value measurement for hybrid financial instruments with embedded derivatives that would otherwise require bifurcation. Statement No. 155 also amends Statement No. 140, *Accounting for Transfers and Servicing of Financial Assets and Extinguishments of Liabilities*, to allow a qualifying special-purpose entity to hold additional types of derivative instruments. The Statement

Edgar Filing: CADENCE FINANCIAL CORP - Form 10-K

is effective for all financial instruments acquired or issued after the beginning of the first fiscal year beginning after September 15, 2006. The Corporation holds certain mortgage-backed securities that would fall under the provisions of Statement No. 155, as they contain an embedded derivative related to prepayment options. However, the FASB has agreed to exclude those securities from the provisions of Statement No. 155 if prepayment is the only embedded derivative. Thus, under the Corporation's current investment

Table of Contents

policy, none of the securities it may acquire in the future will fall under the provisions of Statement No. 155, and the Statement will not impact the Corporation's consolidated financial statements.

In March 2006, the FASB issued Statement No. 156, Accounting for Servicing of Financial Assets. This Statement simplifies the accounting for servicing assets and liabilities, such as those associated with mortgage securitization activities. The Statement is effective for all separately recognized servicing assets and liabilities acquired or issued after the beginning of a company's fiscal year beginning after September 15, 2006. As the Corporation does not conduct any servicing activities associated with mortgage securitization, Statement No. 156 will not impact the Corporation's consolidated financial statements.

In September 2006, the FASB issued Statement No. 157, Fair Value Measurements. This Statement does not require any new fair value measurements or establish valuation standards; however, it clarifies existing guidance for implementing fair value measurements and in some cases increases the level of disclosure required for fair value measurements. The Statement is effective for fiscal years beginning after November 15, 2007. The Corporation will review its disclosures related to fair value measurements to ensure they are in compliance with the provisions of Statement No. 157, but the Statement will not impact the Corporation's consolidated financial statements.

In 2006, the FASB ratified Emerging Issues Task Force (EITF) Issue No. 06-4, Accounting for Deferred Compensation and Postretirement Benefit Aspects of Endorsement Split-Dollar Life Insurance Arrangements. This Issue requires companies with endorsement split-dollar life insurance (policies that are owned and controlled by the company instead of the employee) to recognize a liability for future benefits, based on the substantive agreement with the employee. This Issue is effective for fiscal years beginning after December 15, 2007. The Corporation's endorsement split-dollar life insurance arrangements provide for the Corporation to share a portion of the death benefits of the underlying life insurance policy with the participant. Thus, the Statement will require the Corporation to accrue, over the employee's required service period, a liability for the postretirement cost of the insurance policy. At this time, the Corporation has not determined the impact of EITF Issue No. 06-4 on its consolidated financial statements.

NOTE B - ACQUISITIONS

On November 14, 2006, the Corporation completed the acquisition of Seasons Bancshares, Inc. (Seasons), and its subsidiary bank, Seasons Bank, located in Blairsville, Georgia. The acquisition will allow the Corporation to expand its business into the rapidly growing north Atlanta, Georgia market. The acquisition was an all-cash transaction valued at approximately \$17.6 million. As part of this total, option and warrant holders received the difference between the cash price and the exercise price of the options or warrants. Seasons' assets and liabilities were recorded on the balance sheet at their respective market values as of the closing date.

The following table summarizes the preliminary allocation of the purchase price to the assets and liabilities acquired on November 14, 2006. The Corporation is in the process of obtaining income tax basis information on certain assets; thus, the allocation of the purchase price is subject to refinement.

<i>(In thousands)</i>	
Cash and cash equivalents	\$ 2,712

Other assets	1,836
Total assets acquired	100,685
Deposits	82,089
Other liabilities	1,024

Edgar Filing: CADENCE FINANCIAL CORP - Form 10-K

Total liabilities assumed	83,113
Net assets acquired	\$ 17,572

On August 17, 2006, the Corporation completed the acquisition of SunCoast Bancorp, Inc. (SunCoast), and its subsidiary bank, SunCoast Bank, located in Sarasota and Manatee Counties, Florida. The acquisition will allow the Corporation to expand further into the rapidly growing markets of Tampa, Sarasota, and Naples, Florida. The acquisition was valued at approximately \$35.9 million, of which 45% was paid in cash and 55% was paid in shares of the Corporation s common

Table of Contents

stock. Option holders received the difference between the cash election price and the option price of their options, or an aggregate of approximately \$1.0 million. SunCoast's assets and liabilities were recorded on the balance sheet at their respective market values as of the closing date.

The following table summarizes the preliminary allocation of the purchase price to the assets and liabilities acquired on August 17, 2006. The Corporation is in the process of obtaining income tax basis information on certain assets; thus, the allocation of the purchase price is subject to refinement.

<i>(In thousands)</i>	
Cash and cash equivalents	\$ 3,563
Securities	9,217
Loans	125,584
Less allowance for loan losses	(1,382)
Net loans	124,202
Premises and equipment	4,278
Goodwill	20,303
Core deposit intangible	1,631
Other assets	1,240
Total assets acquired	164,434
Deposits	128,085
Other liabilities	413
Total liabilities assumed	128,498
Net assets acquired	\$ 35,936

The Corporation's financial statements include the results of operations for Seasons and SunCoast from their respective merger dates. The pro forma impact of these acquisitions on the Corporation's results of operations was immaterial. Goodwill resulting from these acquisitions is not deductible for income tax reporting purposes.

Following the close of business on March 31, 2004, the Corporation acquired Enterprise, the parent company of Enterprise National Bank (ENB), in a business combination accounted for under the purchase method of accounting. ENB was a national bank that operated three banking offices in Memphis, Tennessee. The acquisition allowed the Corporation to expand its business into the rapidly growing east Memphis, Germantown and Collierville, Tennessee and Desoto County, Mississippi markets. The acquisition was valued at \$55.2 million. Each shareholder of Enterprise stock received \$48 per share, for total cash of \$47.7 million. Additionally, the Corporation purchased most of the outstanding options for common stock of Enterprise for the difference between the grant price of the options and \$48 for each share subject to the option. This amounted to an additional \$5.2 million.

Three of the option holders converted their options into options to purchase approximately 39,000 shares of the Corporation's common stock, with an intrinsic value of \$354,000. The acquisition price also included direct costs totaling approximately \$2.0 million, that consisted of investment banking fees, legal fees, severance arrangements and other professional costs.

The assets and liabilities of Enterprise were recorded on the balance sheet at their respective fair market values as of the closing date. The results of Enterprise's operations are included in the Corporation's consolidated statements of income from April 1, 2004. Goodwill resulting from the acquisition is not deductible for income tax reporting purposes.

Table of Contents

The Corporation's unaudited pro forma summarized results of operations for the year ended December 31, 2004, assuming Enterprise had been acquired as of January 1, 2004, are as follows:

<i>(In thousands)</i>	Year Ended December 31, 2004
Interest income	\$ 66,068
Interest expense	22,451
Net interest income	43,617
Provision for loan losses	4,812
Noninterest income	20,498
Noninterest expense	44,814
Income before income taxes	14,489
Provision for income taxes	3,125
Net income before extraordinary items	11,364
Loss from discontinued operations	232
Income tax benefit from discontinued operations	(89)
Net income from continuing operations	\$ 11,221
Earnings per share:	
Basic:	
Income from continuing operations	\$ 1.39
Discontinued operations	(0.02)
Net income	\$ 1.37
Diluted:	
Income from continuing operations	\$ 1.39
Discontinued operations	(0.02)
Net income	\$ 1.37

The unaudited pro forma statement of income presented is not necessarily indicative of the results of operations that would have resulted had the merger been consummated at the beginning of the period indicated, nor is it necessarily indicative of the results of operations anticipated in future periods. For the purpose of preparing the pro forma statement of income, the Corporation has not taken into account any adjustments on a pro rata basis or otherwise to reflect anticipated cost savings, revenue enhancements or operating synergies. There have been, however, pro forma adjustments to interest expense to reflect the borrowings incurred to fund the purchase of Enterprise as well as pro-rata amortization related to the purchase accounting adjustments to investment securities, fixed assets and borrowings to fair market value following the close of business on March 31, 2004. There is also a pro rata adjustment reflected to show a proportionate share of amortization on the core deposit intangible. The core deposit intangible of \$5.5 million is being amortized using an accelerated method of amortization over a ten-year life. These results also include certain costs incurred by Enterprise totaling \$1.3 million, net of taxes, in the three months ended March 31, 2004, which related to the Corporation's acquisition of Enterprise.

Table of Contents**NOTE C - SECURITIES**

A summary of amortized cost and estimated fair value of securities available-for-sale and securities held-to-maturity at December 31, 2006 and 2005, follows:

<i>(In thousands)</i>	Amortized Cost	December 31, 2006		Estimated Fair Value

	\$ 420,946	\$ 413,812	\$ 23,478	\$ 25,057

Table of Contents

Gross gains of \$71,000, \$179,000, and \$223,000, and gross losses of \$6,000, \$20,000, and \$163,000 were realized on securities available-for-sale in 2006, 2005, and 2004, respectively.

During the third quarter of 2006, the Corporation recognized a \$2.0 million other-than-temporary impairment charge relating to certain Fannie Mae and Freddie Mac preferred stock. Those securities were sold in the fourth quarter of 2006 for amounts approximating their fair values.

In 2004, the Corporation sold securities classified as held-to-maturity that were pre-refunded and were within one year of maturity. The carrying value of the securities sold totaled \$7.7 million and the realized gain was \$163,000.

Securities with a carrying value of \$302.9 million and \$315.2 million at December 31, 2006 and 2005, respectively, were pledged to secure public and trust deposits, FHLB borrowings, repurchase agreements and for other purposes as required or permitted by law.

The details concerning securities classified as available-for-sale with unrealized losses as of December 31, 2006 and 2005, were as follows:

(In thousands)	Losses < 12 Months		Losses 12 Months or >		Total	
	Fair Value	Gross Unrealized Losses	Fair Value	Gross Unrealized Losses	Fair Value	Gross Unrealized Losses
2006						
Obligations of other U.S. government agencies	\$ 14,809	\$ 8	\$ 37,421	\$ 355	\$ 52,230	\$ 363
Obligations of states and municipal subdivisions	6,561	24	60,624	817	67,185	841
Mortgage-backed securities	1,234	1	221,990	6,465	223,224	6,466
Other securities	94	3			94	3
	\$ 22,698	\$ 36	\$ 320,035	\$ 7,637	\$ 342,733	\$ 7,673
2005						
U. S. Treasury securities	\$	\$	\$ 199	\$ 3	\$ 199	\$ 3
Obligations of other U.S. government agencies	41,770	534			41,770	534
Obligations of states and municipal subdivisions	40,801	717	28,529	898	69,330	1,615
Mortgage-backed securities	132,031	3,250	117,555	5,353	249,586	8,603
Equity securities			12,105	2,895	12,105	2,895
	\$ 214,602	\$ 4,501	\$ 158,388	\$ 9,149	\$ 372,990	\$ 13,650

There were no securities classified as held-to-maturity with unrealized losses as of December 31, 2006 or 2005.

As of December 31, 2006, approximately 61% of the number of securities in the investment portfolio reflected an unrealized loss. Management does not believe any individual security with an unrealized loss as of December 31, 2006 is other-than-temporarily impaired, as discussed in more detail below:

Obligations of Other U.S. Government Agencies The unrealized losses on the Corporation's investments in obligations of other U.S. government agencies were caused by interest rate increases. The contractual terms of these investments do not permit the issuer to settle the securities at a price less than the amortized cost of the investment. Because the Corporation has the ability and intent to hold these investments until a recovery of fair value, which may be maturity, the Corporation does not consider these investments to be other-than-temporarily impaired as of December 31, 2006.

Obligations of States and Municipal Subdivisions The unrealized losses on the Corporation's investments in obligations of states and municipal subdivisions were caused by interest rate increases. Because none of these investments have been downgraded by rating agencies and the Corporation has the ability and intent to hold these investments until a recovery of fair value, which may be maturity, the Corporation does not consider these investments to be other-than-temporarily impaired as of December 31, 2006.

Table of Contents

Mortgage-Backed Securities The unrealized losses on the Corporation's mortgage-backed securities were caused by interest rate increases. The Corporation purchased these investments at a discount relative to their face amount, and the contractual cash flows of these investments are guaranteed by an agency of the U.S. government. Accordingly, it is expected that the securities would not be settled at a price less than the amortized cost of the Corporation's investment. Because the decline in market value is attributable to changes in interest rates and not credit quality, and because the Corporation has the ability and intent to hold these investments until a recovery of fair value, which may be maturity, the Corporation does not consider these investments to be other-than-temporarily impaired as of December 31, 2006.

Other Securities The unrealized losses on the Corporation's investments in other securities relate to various mutual funds held in deferred compensation accounts. The amount of these securities and the related unrealized losses are not material and the Corporation has the ability and intent to hold the investments until a recovery of fair value; thus, the Corporation does not consider these investments to be other-than-temporarily impaired as of December 31, 2006.

NOTE D - LOANS

Loans outstanding include the following types:

<i>(In thousands)</i>	December 31,	
	2006	2005
Commercial, financial and agricultural	\$ 257,661	\$ 209,017
Real estate - construction	347,568	143,729
Real estate - mortgage	559,604	457,453
Installment loans to individuals	38,833	40,825
Lease financing receivables	651	2,129
Overdrafts	2,739	743
Net deferred costs and fees, premiums and discounts	211	712
Other	15,679	6,036
	1,222,946	860,644
Allowance for loan losses	(12,236)	(9,312)
	\$ 1,210,710	\$ 851,332

Transactions in the allowance for loan losses are summarized as follows:

<i>(In thousands)</i>	Years Ended December 31,		
	2006	2005	2004
Balance at beginning of year	\$ 9,312	\$ 10,914	\$ 6,181
Allowance of acquired entities	3,116		4,547
	12,428	10,914	10,728
Additions:			
Provision for loan losses charged to operating expense	1,656	2,128	3,522
Recoveries of loans previously charged off	785	890	774
	2,441	3,018	4,296
Deductions:			
Loans charged off	2,633	4,620	4,110
	2,633	4,620	4,110

Balance at end of year	\$ 12,236	\$ 9,312	\$ 10,914
------------------------	-----------	----------	-----------

At December 31, 2006 and 2005, the recorded investment in loans considered to be impaired (as defined in FASB Statement No. 114, Accounting by Creditors for Impairment of a Loan) totaled approximately \$13.6 million and \$10.5 million, respectively. The allowance for loan losses related to these loans approximated \$2.1 million and \$1.3 million at December 31, 2006 and 2005, respectively. The average recorded investment in impaired loans during the years ended December 31, 2006 and 2005 was approximately \$10.3 million and \$5.8 million, respectively. For the years ended December 31, 2006 and 2005, the amount of income recognized on impaired loans was immaterial. At December 31, 2006 and 2005, nonaccrual

Table of Contents

loans amounted to approximately \$1.5 million and \$0.5 million, respectively, and loans past due ninety days or more and still accruing interest amounted to approximately \$1.3 million and \$2.1 million, respectively.

Generally, mortgage loans are originated in amounts up to 80% of the appraised value or selling price of the property. However, certain loans may allow the borrower to borrow more than 80% of the appraised value, often without buying private mortgage insurance, therefore subjecting the Corporation to greater credit risk. The amount of residential mortgage loans with loan-to-value ratios greater than 80% as of December 31, 2006 and 2005, was approximately \$3.2 million and \$4.4 million, respectively.

NOTE E - PREMISES AND EQUIPMENT

Premises and equipment are stated at cost, less accumulated depreciation and amortization as follows:

<i>(In thousands)</i>	Estimated Useful Lives In Years	December 31,	
		2006	2005
Premises:			
Land		\$ 7,620	\$ 4,391
Buildings, construction and improvements	10 - 50	30,251	20,542
		37,871	24,933
Equipment	3 - 10	14,291	11,824
		52,162	36,757
Less accumulated depreciation and amortization		(19,627)	(17,514)
		\$ 32,535	\$ 19,243

The amount charged to operating expenses for depreciation was \$2,410,000 for 2006, \$2,259,000 for 2005, and \$2,127,000 for 2004.

NOTE F - DEPOSITS

The aggregate amount of time deposits in denominations of \$100,000 or more as of December 31, 2006 and 2005, was \$400,620,000 and \$250,100,000, respectively.

At December 31, 2006, the scheduled maturities of time deposits included in interest-bearing deposits are as follows:

Year	Amount <i>(In thousands)</i>
2007	\$ 663,747
2008	55,282
2009	15,754
2010	20,527
2011	6,592
Thereafter	1,653

NOTE G - BORROWED FUNDS

Federal funds purchased and securities sold under agreements to repurchase, excluding the term repurchase transaction discussed in the following paragraph, generally mature within one to seven days from the transaction date. Securities underlying the repurchase agreements remain under the control of the Corporation.

Edgar Filing: CADENCE FINANCIAL CORP - Form 10-K

On December 13, 2006, the Corporation entered into a \$25.0 million structured repurchase transaction. This transaction was a standard repurchase transaction with a fixed rate of 4.49% and a three-year term. The transaction has a quarterly call option after one year.

Table of Contents

On September 26, 2005, the Corporation entered into a \$25.0 million structured repurchase transaction. This transaction was a standard repurchase transaction with a 4% embedded floor and a three-year term. The transaction was priced at three month LIBOR plus 24 basis points and reprices every three months. This derivative instrument was accounted for as an embedded derivative under FASB Statement No. 133.

Information concerning federal funds purchased and securities sold under agreements to repurchase is summarized as follows:

<i>(\$ In thousands)</i>	2006	2005
Balance at year end	\$ 80,838	\$ 58,571
Average balance during the year	63,830	33,574
Average interest rate during the year	4.17%	2.35%
Maximum month-end balance during the year	\$ 80,838	\$ 58,571

Repurchase agreements are treated as collateralized financing obligations and are reflected as a liability in the consolidated financial statements.

On December 30, 2003, the Corporation issued \$30.9 million of floating rate junior subordinated deferrable interest debentures to the NBC Capital Corporation (MS) Statutory Trust I (Trust), a Connecticut business trust, in which the Corporation owns all of the common equity. The debentures are the sole asset of the Trust. The net proceeds received by the Corporation from the issuance of the debentures were used for the Enterprise acquisition. The Trust issued \$30.0 million of Trust Preferred Securities (TPSs) to investors. The Corporation's obligations under the debentures and related documents, taken together, constitute a full and unconditional guarantee by the Corporation of the Trust's obligations under the TPSs. The TPSs are redeemable at the Corporation's option on December 30, 2008, or earlier in the event the deduction of related interest for federal income taxes is prohibited, treatment as Tier I capital is no longer permitted, or certain other contingencies arise. Thereafter, the TPSs may be redeemed in whole or in part on any interest payment date. The TPSs must be redeemed upon maturity of the debentures in 2033. Interest on the debentures and TPSs is the three month London Interbank Offer Rate (LIBOR) plus 2.85% and is payable quarterly.

With the acquisition of Enterprise, the Corporation assumed the liability for an additional \$6.2 million in subordinated debentures issued to support TPSs. As a result, the Corporation became the sole shareholder of Enterprise (TN) Statutory Trust I, a Connecticut business trust. The original issue date on these TPSs and subordinated debentures was December 19, 2002 and the maturity date is December 19, 2032. These securities can also be redeemed in whole or in part at any interest payment date after December 19, 2007. The interest rate on these debentures and TPSs is three-month LIBOR plus 325 basis points, and adjusts quarterly. Interest is payable on a quarterly basis.

In accordance with FASB Interpretation No. 46R, neither of the above-referenced trusts are consolidated into the financial statements of the Corporation.

Other borrowed funds consisted of the following at December 31:

<i>(In thousands)</i>	2006	2005
FHLB advances	\$ 110,666	\$ 95,481
Treasury tax and loan note	1,998	2,341
	\$ 112,664	\$ 97,822

Advances due to the FHLB consist of both monthly amortized and term borrowings with maturity dates ranging from January 2007 through August 2012. Interest is payable monthly at rates ranging from 2.85% to 5.74%. Advances due to the FHLB are collateralized by FHLB stock and a blanket lien on first mortgage loans in the amount of the outstanding borrowings. FHLB advances available and unused at December 31, 2006, totaled \$238.5 million. The treasury tax and loan note generally matures within one to sixty days from the transaction date. Interest is paid at an adjustable rate as set by the U. S. Government.

Table of Contents

Annual principal repayment requirements on FHLB borrowings at December 31, 2006, are as follows:

Year	Amount (In thousands)
2007	\$ 86,948
2008	10,361
2009	7,854
2010	3,662
2011	1,308
Thereafter	533

On December 16, 2005, the Corporation entered into a revolving credit agreement (the Agreement) that provides the Corporation with access to borrow up to \$30.0 million. These borrowings may be used to finance acquisitions and for other general corporate purposes, provided that the borrowings used for purposes other than acquisitions do not exceed \$15.0 million. Interest on each borrowing will be paid at the lender's base rate or at LIBOR, plus 1.25% annually. The Corporation will also pay a commitment fee, accruing at the annual rate of 0.10%, on the daily amount of the unused commitment. Borrowings are contingent on the Corporation's ability to maintain various operational and financial covenants. The Agreement expires on December 16, 2007. The Corporation has pledged 605,000 shares of Cadence stock as collateral for these borrowings and has covenanted to pledge shares with a minimum book value of \$75.0 million. The Corporation had no outstanding borrowings under the Agreement as of December 31, 2006.

NOTE H - OTHER ASSETS AND OTHER LIABILITIES

Other assets and other liabilities at December 31, 2006 and 2005, consisted of the following:

<i>(In thousands)</i>	December 31,	
	2006	2005
Other assets:		
Cash surrender value of life insurance	\$ 21,793	\$ 20,920
Deferred income tax benefits	7,169	6,235
Prepaid pension		3,699
Other real estate	4,561	5,131
Prepaid expenses and other	7,409	5,576
	\$ 40,932	\$ 41,561
Other liabilities:		
Dividends payable	\$	\$ 2,043
Accrued expenses	7,610	6,111
Other	3,054	3,350
	\$ 10,664	\$ 11,504

Table of Contents**NOTE I - COMPREHENSIVE INCOME**

In the calculation of comprehensive income, certain reclassification adjustments are made to avoid double counting amounts that are displayed as part of net income for a period that also had been displayed as part of other comprehensive income. The disclosures of the reclassification amounts are as follows:

<i>(In thousands)</i>	Years Ended December 31,		
	2006	2005	2004
Net change in unrealized gains (losses) on securities:			
Net unrealized gains (losses) on securities available-for-sale	\$ 4,141	\$ (5,972)	\$ (4,590)
Reclassification adjustment for (gains) losses on securities available-for-sale	1,959	(159)	(70)
Net change in unrealized gains (losses) on securities available-for-sale before tax	6,100	(6,131)	(4,660)
Income tax:			
Net unrealized gains (losses) on securities available-for-sale	(1,584)	2,284	1,756
Reclassification adjustment for (gains) losses on securities available-for-sale	(749)	61	26
Total income tax	(2,333)	2,345	1,782
Net change in unrealized gains (losses) on securities	\$ 3,767	\$ (3,786)	\$ (2,878)

NOTE J - INCOME TAXES

The provision for income taxes including the tax effects of securities transactions (2006 \$749,000; 2005 \$61,000; 2004 \$85,000) is as follows:

<i>(In thousands)</i>	Years Ended December 31,		
	2006	2005	2004
Current:			
Federal	\$ 5,472	\$ 3,873	\$ 2,530
State	862	812	710
Deferred (credits)	(1,350)	(163)	517
	\$ 4,984	\$ 4,522	\$ 3,757

The difference between the total expected tax expense at the federal tax rate and the reported income tax expense is as follows:

<i>(In thousands)</i>	Years Ended December 31,		
	2006	2005	2004
Tax on income before income taxes	\$ 6,698	\$ 6,397	\$ 5,459
Increase (decrease) resulting from:			
Tax-exempt income	(1,943)	(2,100)	(1,937)
Nondeductible expenses	188	335	271
State income taxes, net of federal benefit	560	528	468
Tax credits	(432)	(678)	(172)
Other, net	(87)	40	(332)
	\$ 4,984	\$ 4,522	\$ 3,757

Table of Contents

The components of the net deferred tax included in the consolidated balance sheets are as follows:

<i>(In thousands)</i>	December 31,	
	2006	2005
Deferred tax assets:		
Allowance for loan losses	\$ 4,680	\$ 3,585
Unrealized loss on securities available-for-sale	2,733	5,161
Deferred compensation	1,304	1,249
Pension	198	
Other	2,189	1,878
Total deferred tax assets	11,104	11,873
Deferred tax liabilities:		
Premises and equipment	(145)	(625)
FHLB stock	(659)	(851)
Core deposit intangible premium	(1,899)	(1,193)
Pension		(1,418)
Other	(1,232)	(1,551)
Total deferred tax liabilities	(3,935)	(5,638)
Net deferred tax asset	\$ 7,169	\$ 6,235

NOTE K - GOODWILL AND OTHER INTANGIBLE ASSETS

The following table summarizes goodwill and intangible assets at December 31:

<i>(In thousands)</i>	2006	2005
Core deposit intangible, net of accumulated amortization	\$ 4,092	\$ 3,098
Trademarks, net of accumulated amortization	24	20
Noncompete agreements, net of accumulated amortization	104	187
Total intangible assets	4,220	3,305
Goodwill	67,122	36,349
Total goodwill and intangible assets	\$ 71,342	\$ 39,654

The acquisitions of SunCoast and Seasons added approximately \$30.8 million to the Corporation's goodwill in 2006.

The amortization expense relating to intangible assets was \$1,144,000, \$1,275,000 and \$1,153,000 for 2006, 2005 and 2004, respectively.

Estimated intangible assets amortization expense for the next five years and thereafter is:

Year	Amount <i>(In thousands)</i>
2007	\$ 1,327

Edgar Filing: CADENCE FINANCIAL CORP - Form 10-K

2008	890
2009	619
2010	450
2011	333
Thereafter	577

NOTE L - STOCK OPTIONS

The Corporation has one active Long Term Incentive Compensation Plan (the "LTIP"), administered by the Compensation Committee of the Board of Directors. Under the LTIP, 750,000 shares of common stock have been reserved for issuance to the Corporation's employees and consultants, as well as the directors and employees of certain of the Corporation's affiliates. The form of share awards that may be awarded under the LTIP include the following: (i) incentive stock options under Section 422 of the Internal Revenue Code, as amended (the

Table of Contents

Code); (ii) non-statutory stock options not covered by Section 422 of the Code; (iii) stock appreciation rights, granting the recipient the right to receive an excess in the fair market value of shares of common stock over a specified exercise price; (iv) restricted stock, which will be non-transferable until it vests over time; (v) qualified performance-based incentives to employees who qualify as covered employees within the meaning of Section 162(m) of the Code; and (vi) performance shares, consisting of common stock, cash, or a combination of common stock and cash.

In October 2006, under the provisions of the LTIP, the Compensation Committee awarded a total of 18,750 performance shares of stock to certain officers. The shares vest in equal amounts over a four-year period. Compensation expense related to these shares was \$16,000 for 2006.

Prior to 2006, the Corporation had certain nonqualified stock option plans administered by the Compensation Committee of the Board of Directors. Employees eligible to receive incentives under these plans were those designated, individually or by groups or categories, by the Committee. The following grants were issued under these plans:

Grant Date	Number of Shares	Option Price
June 2001	112,000	\$ 20.75
June 2002	117,868	\$ 24.11
April 2004	139,187	\$ 25.18
January 2005	16,300	\$ 25.28

Initially under these plans, the options were to vest in equal amounts over a four-year period. However, during the third quarter of 2005, the Compensation Committee reviewed the Corporation's stock option plans and the options outstanding. At the time of the review, all outstanding options that were not vested were out-of-the-money. This situation had existed for much of 2005. In the opinion of the Committee, the options were not achieving their intended purposes of incentive compensation and employee retention. As a result, the Committee recommended to the Board of Directors that all outstanding options be vested to avoid recognizing future expense for options that were not achieving their intended results, and the Board of Directors voted to vest all outstanding options, effective August 31, 2005.

On April 1, 2004, the Corporation acquired Enterprise Bancshares, Inc. At the time of the acquisition, Enterprise had outstanding stock options. At the closing of the transaction, the Corporation gave each holder of Enterprise options the choice of selling their options at the difference between the per share transaction price and the exercise price of the options or exchanging the Enterprise options for options to acquire shares of common stock of the Corporation at the appropriate exchange ratio. As a result of this offer, the Corporation issued 16,731 options at an exercise price of \$16.14 per share and 22,308 options at an exercise price of \$17.21 per share. All options issued by Enterprise became fully vested at the change of control. As a result, all the options issued to the holders of Enterprise options were fully vested and expire between 2010 and 2013. At December 31, 2006, 11,154 of the \$16.14 options and 14,872 of the \$17.21 options were outstanding and exercisable.

FASB 123(R) requires that compensation cost related to share-based payment transactions, including stock options, be recognized in the financial statements; however, since all options were fully vested as of the effective date of this pronouncement, no expense is recognized in the income statement in 2006.

A summary of the status of the Corporation's stock option plans for the three years ended December 31, 2006, follows:

	2006		2005		2004	
	Number of Options	Weighted Average Exercise Price	Number of Options	Weighted Average Exercise Price	Number of Options	Weighted Average Exercise Price
Options outstanding, beginning of year	374,263	\$ 22.91	389,568	\$ 22.83	224,534	\$ 22.47
Options granted			16,300	25.28	178,217	23.33
Options exercised	(14,513)	17.16	(11,200)	21.23	(4,500)	20.75
Options cancelled	(20,464)	24.33	(20,405)	24.18	(8,683)	25.18
Options outstanding, end of year	339,286	23.07	374,263	22.91	389,568	22.83
Options exercisable at end of year	339,286	23.07	374,263	22.91	174,129	20.96

17.21	7,436	5.0	7,436
17.21	7,436	6.0	7,436
16.14	7,436	7.0	7,436
25.28	16,300	8.1	16,300

NOTE M - EMPLOYEE BENEFITS

In September 2006, the FASB issued Statement No. 158, *Employers' Accounting for Defined Benefit Pension and Other Postretirement Plans*. This Statement requires companies to recognize the funded status of a defined benefit plan (measured as the difference between the fair value of plan assets and the projected benefit obligation) on the balance sheet and to recognize in other comprehensive income any gains or losses and prior service costs or benefits not included as components of periodic benefit cost. The recognition provisions of Statement No. 158 are to be applied prospectively. For public companies, the recognition and disclosure provisions of Statement No. 158 are effective for fiscal years ending after December 15, 2006. Statement No. 158 also requires companies to use their fiscal year-end as their plan measurement date. Although this requirement is not effective until fiscal years ending after December 15, 2008, this requirement will not impact the Corporation, as the measurement date currently used is the balance sheet date.

The following table reflects the incremental effect of applying Statement No. 158 on individual line items in the Corporation's balance sheet as of December 31, 2006:

(In thousands)	Before Application of Statement No. 158	Adjustments	After Application of Statement No. 158
Prepaid pension (asset)/liability	\$ (3,142)	\$ 3,659	\$ 517
Deferred income tax benefits	5,770	1,399	7,169
Total assets	1,901,691	(1,743)	1,899,948
Total liabilities	1,708,166	517	1,708,683
Accumulated other comprehensive income	(4,434)	(2,259)	(6,693)
Total shareholders' equity	193,524	(2,259)	191,265

Table of Contents

The following table sets forth the defined benefit plan's funded status and amounts recognized in the Corporation's consolidated financial statements at December 31, 2006 and 2005:

<i>(\$ in thousands)</i>	December 31,	
	2006	2005
Change in benefit obligation:		
Benefit obligation at beginning of year	\$ 13,092	\$ 12,773

	(3,659)		
Tax effect	(1,400)		
Net	\$ (2,259)		

The amounts in accumulated other comprehensive income that are expected to be recognized as components of net periodic benefit cost in 2007 are as follows:

	Amount (In thousands)
Amortization of net actuarial loss	\$ 270
Amortization of prior service cost	(126)
Total	\$ 144

The accumulated benefit obligation for the defined benefit pension plan was \$9.3 million and \$10.1 million at December 31, 2006 and 2005, respectively.

Retiree benefit payments, which reflect expected future service, are anticipated to be paid as follows:

Year	Amount (In thousands)
2007	\$ 613
2008	1,933
2009	580
2010	971
2011	1,315
2012-2016	5,535
Total	\$ 10,947

Edgar Filing: CADENCE FINANCIAL CORP - Form 10-K

In determining the expected return on plan assets, the Corporation considers the relative weighting of plan assets, the historical performance of total plan assets, individual asset classes, and economic and other indicators of future performance. In addition, the Corporation may consult with and consider the opinions of financial and other professionals in developing appropriate return benchmarks.

Table of Contents

The Corporation's pension plan weighted-average asset allocations at December 31, 2006 and 2005, by asset category are as follows:

<i>Asset Category</i>	Plan Assets at December 31,	
	2006	2005
Equity securities	54%	61%
Debt securities	31%	31%
Cash and cash equivalents	15%	8%
Total	100%	100%

The primary investment objective of the Corporation's defined benefit pension plan is to maximize total return while accepting and managing a moderate to average degree of risk. The assets are invested in moderate growth asset allocation model, which seeks to provide long-term growth of capital with a moderate level of current income and a somewhat higher level of principal volatility. The assets are allocated in a target mix of 32% fixed income, 65% equity and 3% money market. The fixed income class is divided between a short-term government bond fund, a core fixed income bond fund, a high-yield bond fund and an international bond fund. The equity class is diversified among large, mid and small cap growth and value stock funds with an emphasis being placed on large cap. There is also an exposure in the international equity market. This diversification among all of the equity sectors is an effort to reduce risk and attempt to generate higher returns. As a result of market conditions and cash contributions by the Corporation, the target percentages may not be achieved at any one point in time. The asset category percentages shown for 2006 reflect a cash contribution made by the Corporation in mid-December in the amount of \$1.0 million. This contribution was placed in an interest-bearing money market fund inside the plan's trust and was invested according to the plan's objective in January 2007.

The Employee Benefit Committee of the Corporation reviews annually the investments of the plan made throughout the year and approves and ratifies the investment model used for the upcoming year. The investments are managed by the Trust Division of the Corporation within the guidelines established by the Committee. It is the intent of management and the Committee to give the investment managers flexibility within the overall parameters designated in the investment model selected by the Committee for the plan.

Equity securities do not include common stock of the Corporation.

The Corporation has until September 15, 2008, to make any necessary cash contributions to the plan for 2007. There is no requirement to make a contribution by December 31, 2007. However, to maximize funding levels and to take advantage of certain tax benefits, the Corporation expects to deposit to the plan an amount ranging from the calculated minimum required contribution to the maximum deductible contribution by December 31, 2007. This amount is estimated to be approximately \$1.0 million.

No contributions were made to the Corporation's nonleveraged ESOP in each of the three years ended December 31, 2006. At December 31, 2006, the plan held 361,779 shares of the Corporation's common stock. Contributions to the 401(k) plan amounted to \$527,000 in 2006, \$472,000 in 2005 and \$468,000 in 2004. Expense for the defined contribution plan totaled \$430,000 in 2006, \$443,000 in 2005 and \$467,000 in 2004.

The accrued liability for the supplemental retirement plan, accounted for under FASB Statement No. 87, approximates the projected benefit obligation; therefore, the adoption of FASB Statement No. 158 had no impact on this plan. The accrued liability for this plan was \$1,770,000 and \$1,801,000 at December 31, 2006 and 2005, respectively. The amounts recognized in compensation expense were \$144,000, \$164,000 and \$465,000 for the years ended December 31, 2006, 2005 and 2004, respectively.

Table of Contents

Projected benefit payments under the supplemental retirement plan are anticipated to be paid as follows:

Year	Amount (In thousands)
2007	\$ 191
2008	191
2009	191
2010	191
2011	189
2012-2016	482
Total	\$ 1,435

The accrued liability for the index retirement and deferred compensation plans was \$2,988,000 and \$2,577,000 at December 31, 2006 and 2005, respectively. The amounts recognized in compensation expense were \$170,000, \$40,000 and \$76,000 for the years ended December 31, 2006, 2005 and 2004, respectively.

NOTE N - TREASURY STOCK

The Corporation had no shares held in treasury at December 31, 2006. At December 31, 2005, the Corporation had 1,442,095 shares held in treasury. Of these shares, 13,013 were issued in 2006 upon the exercise of stock options, and the remaining shares were issued as part of the public stock offering completed in May 2006. Upon the exercise of stock options, 11,200 and 4,500 treasury shares were issued in 2005 and 2004, respectively.

In January 2006, the Corporation's Board of Directors renewed the previously authorized stock repurchase plan that had expired. Under the renewed plan, the Corporation can repurchase up to 298,783 shares of its common stock in the secondary market. The Corporation did not repurchase any shares of its common stock in 2006 or 2005.

NOTE O - RELATED PARTY TRANSACTIONS

In the normal course of business, loans are made to directors and executive officers and to companies in which they have a significant ownership interest. In the opinion of management, these loans are made on substantially the same terms, including interest rates and collateral, as those prevailing at the time for comparable transactions with other parties, are consistent with sound banking practices, and are within applicable regulatory and lending limitations. The activity in loans to current directors, executive officers, and their affiliates during 2006 and 2005 is summarized as follows:

(In thousands)	December 31,	
	2006	2005
Loans outstanding at beginning of year	\$ 14,196	\$ 33,235
New loans	8,967	17,284
Repayments	(9,577)	(36,323)
Loans outstanding at end of year	\$ 13,586	\$ 14,196

Also, in the normal course of business, the Corporation and its subsidiaries enter into transactions for services with companies and firms whose principals are directors and shareholders.

NOTE P - REGULATORY MATTERS

Any dividends paid by the Corporation are provided from dividends received from its subsidiary bank. Under regulations controlling national banks, the payment of any dividends by a bank without prior approval of the Comptroller of the Currency is limited to the current year's net

Edgar Filing: CADENCE FINANCIAL CORP - Form 10-K

profits (as defined by the Comptroller of the Currency) and retained net profits of the two preceding years.

The Corporation and its subsidiary bank are subject to regulatory capital requirements administered by federal banking agencies. Failure to meet minimum capital requirements can initiate certain mandatory and possibly additional discretionary actions by regulators that, if undertaken, could have a direct material effect on the Corporation's consolidated financial statements. Under capital adequacy guidelines and the regulatory framework for prompt corrective action, the Corporation and its subsidiary bank must meet specific capital guidelines that involve quantitative measures of assets, liabilities and certain off-balance sheet items as calculated under regulatory accounting practices. Capital amounts and classifications are also subject to qualitative judgment by regulators about components, risk weightings, and other related factors.

To ensure capital adequacy, quantitative measures have been established by regulators that require the Corporation and its bank subsidiary to maintain minimum amounts and ratios (set forth in the table below) of total and Tier 1 capital (as defined)

Table of Contents

to risk-weighted assets (as defined), and of Tier 1 capital to adjusted average total assets (leverage). Management believes, as of December 31, 2006, that the Corporation and its subsidiary bank exceed all capital adequacy requirements.

For 2005 and 2006, Cadence was categorized by regulators as well-capitalized under the regulatory framework for prompt corrective action. A financial institution is considered to be well-capitalized if it has a total risk-based capital ratio of 10% or more, has a Tier 1 risk-based capital ratio of 6% or more, and has a Tier 1 leverage capital ratio of 5% or more. There are no conditions or anticipated events that, in the opinion of management, would change the categorization.

The actual capital amounts and ratios are presented in the following table. No amount was deducted from capital for interest-rate risk exposure.

(\$ In thousands)	Cadence Financial Corporation (Consolidated)		Cadence	
	Amount	Ratio	Amount	Ratio
December 31, 2006:				
Total risk-based	\$ 172,612	12.5%	\$ 152,744	11.1%
Tier 1 risk-based	160,357	11.7%	140,508	10.3%
Tier 1 leverage	160,357	9.2%	140,508	8.1%
December 31, 2005:				
Total risk-based	\$ 128,890	13.4%	\$ 124,832	13.0%
Tier 1 risk-based	119,578	12.5%	115,520	12.0%
Tier 1 leverage	119,578	8.7%	115,520	8.4%

The minimum amounts of capital and ratios as established by banking regulators are as follows:

December 31, 2006:				
Total risk-based	\$ 110,115	8.0%	\$ 109,663	8.0%
Tier 1 risk-based	55,058	4.0%	54,832	4.0%
Tier 1 leverage	69,897	4.0%	69,080	4.0%
December 31, 2005:				
Total risk-based	\$ 76,868	8.0%	\$ 76,765	8.0%
Tier 1 risk-based	38,434	4.0%	38,383	4.0%
Tier 1 leverage	55,152	4.0%	55,263	4.0%

The Corporation is required to maintain average reserve balances in the form of cash or deposits with the Federal Reserve Bank. The reserve balance varies depending upon the types and amounts of deposits. At December 31, 2006 and 2005, the required reserve balance on deposit with the Federal Reserve Bank was approximately \$600,000 and \$2,060,000, respectively.

NOTE Q - COMMITMENTS AND CONTINGENT LIABILITIES

The consolidated financial statements do not reflect various commitments and contingent liabilities which arise in the normal course of banking business and which involve elements of credit risk, interest rate risk, and liquidity risk. The commitments and contingent liabilities are commitments to extend credit, credit card lines, and standby letters of credit. Such financial instruments are recorded when they are funded. A summary of commitments and contingent liabilities at December 31, 2006 and 2005, is as follows:

(In thousands)	Contractual Amount	
	December 31, 2006	December 31, 2005
Commitments to extend credit	\$ 359,271	\$ 202,771
Standby letters of credit	18,183	10,701

Commitments to extend credit and letters of credit include some exposure to credit loss in the event of nonperformance of the customer.

Commitments to extend credit are agreements to lend to a customer as long as there is no violation of any condition established in the contract.

Standby letters of credit are conditional commitments issued to guarantee the

Table of Contents

performance of a customer to a third party. The credit policies and procedures for such commitments are the same as those used for lending activities. Because these instruments have fixed maturity dates and because a number expire without being drawn upon, they generally do not present any significant liquidity risk. No significant losses on commitments were incurred during the three years ended December 31, 2006, nor are any significant losses as a result of these transactions anticipated.

The Corporation leases various premises and equipment under operating leases. At December 31, 2006, future minimum rental commitments are as follows:

Year	Amount (In thousands)
2007	\$ 1,199
2008	1,092
2009	1,035
2010	716
2011	678
Thereafter	6,035

Rental expense for premises and equipment for the years ended December 31, 2006, 2005, and 2004, was \$1,069,000, \$818,000, and \$691,000, respectively.

The Corporation is a defendant in various pending and threatened legal actions arising in the normal course of business. In the opinion of management, based upon the advice of legal counsel, the ultimate disposition of these matters will not have a material effect on the Corporation's consolidated financial statements.

NOTE R - CONCENTRATIONS OF CREDIT

Most of the loans, commitments and letters of credit have been granted to customers in the Corporation's market areas. Generally, such customers are also depositors. Investments in state and municipal securities also involve governmental entities within the Corporation's market areas. The concentrations of credit by type of loan are set forth in Note D. The distribution of commitments to extend credit approximates the distribution of loans outstanding. Letters of credit were granted primarily to commercial borrowers.

NOTE S - SUPPLEMENTAL CASH FLOW INFORMATION

(In thousands)	Years Ended December 31,		
	2006	2005	2004
Cash paid during the year for:			
Interest	\$ 42,070	\$ 27,425	\$ 21,071
Income taxes, net of refunds	6,890	1,555	3,586
Non-cash activities:			
Transfers of loans to other real estate	1,079	637	2,764
Stock issued for acquisition	18,862		

NOTE T - DISCLOSURE ABOUT FAIR VALUES OF FINANCIAL INSTRUMENTS

The following disclosure of the estimated fair value of financial instruments is made in accordance with FASB Statement No. 107, Disclosures About Fair Value of Financial Instruments. The estimated fair value amounts have been determined using available market information and appropriate valuation methodologies. However, considerable judgment is necessarily required to interpret market data to develop the estimates of fair value. Accordingly, the estimates presented herein are not necessarily indicative of the amounts that could be realized in a current market exchange. The use of different market assumptions and/or estimation methodologies may have a material effect on the estimated fair value amounts.

The following methods and assumptions were used to estimate the fair value of each class of financial instruments for which it is practicable to estimate that value:

Edgar Filing: CADENCE FINANCIAL CORP - Form 10-K

Cash and Cash Equivalents For such short-term instruments, the carrying amount is a reasonable estimate of fair value.

Securities For securities held as investments, fair value equals market price, if available. If a quoted market price is not available, fair value is estimated using quoted market prices for similar securities. The fair value of other securities, which consist of FHLB stock and Federal Reserve Bank stock, is estimated to be the carrying value, which is par.

Table of Contents

Loans The fair value of loans is estimated by discounting the future cash flows using the current rates at which similar loans would be made to borrowers with similar credit ratings and for the same remaining maturities.

Deposits The fair values of demand deposits are, as required by Statement No. 107, equal to the carrying value of such deposits. Demand deposits include noninterest-bearing demand deposits, savings accounts, NOW accounts, and money market demand accounts. The fair value of variable rate term deposits, those repricing within six months or less, approximates the carrying value of these deposits. Discounted cash flows have been used to value fixed rate term deposits and variable rate term deposits repricing after six months. The discount rate used is based on interest rates currently being offered on comparable deposits as to amount and term.

Short-Term Borrowings The fair value of any federal funds purchased, securities sold under agreements to repurchase and other short-term borrowings generally approximates their carrying value.

FHLB and Other Borrowings The fair value of the fixed rate borrowings is estimated using discounted cash flows, based on current incremental borrowing rates for similar types of borrowing arrangements. The carrying amount of any variable rate borrowings approximates their fair values.

Subordinated Debentures The subordinated debentures bear interest at a variable rate and the carrying value approximates the fair value.

Off-Balance Sheet Instruments Fair values of off-balance sheet financial instruments are based on fees charged to enter into similar agreements. However, commitments to extend credit do not represent a significant value until such commitments are funded or closed. Management has determined that these instruments do not have a distinguishable fair value and no fair value has been assigned.

NOTE W EQUITY OFFERING

On May 12, 2006, the Corporation closed on a public offering of its common stock. As a result of this offering, 2.76 million shares were sold at a price of \$19.50 per share, with net proceeds of approximately \$50.2 million. Some of these proceeds were used to fund the SunCoast and Seasons acquisitions, and the remainder will be used for other general corporate purposes.

Not applicable.

Table of Contents

ITEM 9A - CONTROLS AND PROCEDURES

Disclosure Controls and Procedures

As required by Rules 13a-15 and 15d-15 of the Exchange Act, the Corporation has evaluated, with the participation of management, including the Chief Executive Officer and the Chief Financial Officer, as of the end of the period covered by this report, the effectiveness of the design and operation of its disclosure controls and procedures. Based on such evaluation, the Chief Executive Officer and Chief Financial Officer have concluded that, as of the end of the period covered by this report, such disclosure controls and procedures are effective in ensuring that information required to be disclosed by the Corporation, including its consolidated subsidiaries, is recorded, processed, summarized and reported, including being made known to the certifying officers by others within the Corporation and its consolidated subsidiaries as appropriate to allow timely decisions regarding disclosure, within the time periods specified in the SEC's rules and forms. From time to time, the Corporation reviews the disclosure controls and procedures, and may from time to time make changes aimed at enhancing their effectiveness and to ensure that the Corporation's system evolves with its business.

Changes in Internal Controls over Financial Reporting

There was no change in the Corporation's internal control over financial reporting during the quarter ended December 31, 2006 that has materially affected, or is likely to materially affect, the Corporation's internal control over financial reporting.

Management's Report on Internal Control Over Financial Reporting

Management of Cadence Financial Corporation (the Corporation) is responsible for establishing and maintaining adequate internal control over financial reporting as defined in Rules 13a-15(f) of the Securities and Exchange Act of 1934. The Corporation's internal control over financial reporting is designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles.

Management has in place an internal accounting control system designed to safeguard corporate assets from material loss or misuse. The internal control system includes an organizational structure that provides appropriate delegation of authority and segregation of duties, establishes policies and procedures, and comprehensive internal audit and loan review programs. Management believes that this system provides assurance that assets are adequately safeguarded and that the accounting records, which are the basis for the preparation of the financial statements, are reliable.

Any system of internal control, no matter how well designed, has inherent limitations, including the possibility that a control can be circumvented, or overridden or misstatements due to error or fraud may occur and not be detected. Also, because of changes in conditions, internal control effectiveness may vary over time. Accordingly, an effective system of control will provide only reasonable assurance with respect to the financial statement preparation.

The Board of Directors, primarily through its audit committee, oversees the adequacy of the Corporation's internal control structure. The audit committee, consisting entirely of independent directors, meets regularly with management, internal auditors and the independent registered public accounting firm, and reviews audit plans and results as well as management's actions taken in discharging responsibilities for accounting, financial reporting and internal control. Both the independent registered public accounting firm and the internal auditors have direct confidential access to the audit committee at all times to discuss the results of their examinations.

Management conducted an evaluation of the effectiveness of the Corporation's internal controls over financial reporting as of December 31, 2006. This evaluation was based on criteria for effective internal control over financial reporting described in "Internal Control-Integrated Framework" issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). Based upon that evaluation, management concluded that the Corporation maintained effective internal control over financial reporting as of December 31, 2006.

Management's assessment of the effectiveness of the Corporation's internal control over financial reporting as of December 31, 2006, has been audited by the Corporation's independent registered accounting firm, whose report follows this report.

Report of Independent Registered Public Accounting Firm

To the Audit Committee of the Board of Directors and Shareholders of Cadence Financial Corporation

Edgar Filing: CADENCE FINANCIAL CORP - Form 10-K

We have audited management's assessment, included in the accompanying Report of Management on Internal Control Over Financial Reporting, that Cadence Financial Corporation maintained effective internal control over financial reporting as of December 31, 2006, based on criteria established in Internal Control - Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). Cadence Financial Corporation's

Table of Contents

management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting. Our responsibility is to express an opinion on management's assessment and an opinion on the effectiveness of the Corporation's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, evaluating management's assessment, testing and evaluating the design and operating effectiveness of internal control, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, management's assessment that Cadence Financial Corporation maintained effective internal control over financial reporting as of December 31, 2006, is fairly stated, in all material respects, based on criteria established in Internal Control - Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). Also in our opinion, Cadence Financial Corporation maintained, in all material respects, effective internal control over financial reporting as of December 31, 2006, based on criteria established in Internal Control - Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO).

We have also audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheets of Cadence Financial Corporation and subsidiaries as of December 31, 2006 and 2005, and the related consolidated statements of income, changes in shareholders' equity, and cash flows for each of the three years in the period ended December 31, 2006, and our report dated March 13, 2007, expressed an unqualified opinion thereon.
