NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

(In thousands except per share amounts)

(unaudited)

Note 1: Summary of Significant Accounting Policies

Nature of Operations

Founded in 1999, HouseValues, Inc. provides consumers and real estate professionals with the information and tools they need for success throughout the home buying and selling process. Our flagship consumer products include HomePages.com, an Internet web site that combines aerial maps, in-depth neighborhood information and nationwide home listings in one integrated web site; HouseValues.com, a service that provides home sellers with market valuations of their current home; and JustListed.com, a service that alerts home buyers as soon as new homes that meet their criteria hit the market. These consumer sites are integrated with Market Leader, our real estate customer relationship management application that helps real estate agents structure and automate much of their online lead follow-up process. We derive the majority of our revenues from sales to real estate professionals that include media services, software tools and training that they need to be successful in serving internet-enabled consumers.

Basis of Presentation

The condensed consolidated financial statements are unaudited and include the financial statements of HouseValues, Inc. and its subsidiaries. All significant intercompany balances and transactions have been eliminated in consolidation.

Effective for the quarter ended March 31, 2007, we have segregated the results of operations related to the mortgage business and presented them as discontinued operations (see note 2). For consistent presentation, we also have restated amounts from the prior year for discontinued operations. As a further result of our exit from the mortgage business, HouseValues now operates as a single segment representing revenues from our real estate agent customers.

The accompanying unaudited condensed consolidated financial statements should be read in conjunction with the financial statements included in our 2006 Annual Report on Form 10-K. All adjustments necessary for the fair presentation of our results of operations, financial position and cash flows have been included and are of a normal, recurring nature. Operating results for the quarter ended March 31, 2007 are not necessarily indicative of results to be expected for a full year.

Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires us to make estimates and assumptions that affect the amounts reported and disclosed in the financial statements and the accompanying notes. Actual results could differ materially from these estimates.

Reclassifications

Prior period financial statement amounts have been reclassified to conform with current period presentation. In 2007, we reclassified our credit card fees to sales and marketing from general and administrative, as management believes this to be a more appropriate classification of these costs.

Income Taxes

Income taxes are accounted for under the asset and liability method. Deferred tax assets and liabilities are recognized for the future tax consequences attributable to the difference between the financial statement carrying amount of existing assets and liabilities and their respective tax bases and operating loss and tax credit carryforwards. In determining tax bases and evaluating tax positions taken in our filings, we determine that a tax position will more likely than not be sustained upon examination by taxing authorities before any benefit is recognized in our financial statements. To the extent that we do not meet this standard, benefit recognition is reduced accordingly and any related interest and

Edgar Filing: HouseValues, Inc. - Form 10-Q

penalties also are included in income tax expense.

Deferred tax assets and liabilities are measured using enacted rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in income in the period that includes the enactment date. A valuation allowance is recorded when it is more likely than not that deferred tax assets will not be realized.

Table of Contents

Recent Accounting Pronouncements

In January 2007, we adopted the Financial Accounting Standards Board Interpretation No. 48, *Accounting for Uncertainty in Income Taxes*. An Interpretation of FASB Statement No. 109 (FIN 48). This Interpretation clarifies the accounting for uncertainty in income taxes recognized in a company's financial statements. FIN 48 requires companies to determine whether it is more likely than not that a tax position will be sustained upon examination by the appropriate taxing authorities before any part of the benefit can be recorded in the financial statements. It also provides guidance on the recognition, measurement and classification of income tax uncertainties, along with any related interest and penalties. We did not recognize any adjustments to our financial statements as a result of our implementation of FIN 48.

In September 2006, the FASB issued SFAS No. 157, *Fair Value Measurements* (SFAS 157), which provides guidance on how to measure assets and liabilities that use fair value. SFAS 157 will apply whenever another U.S. GAAP standard requires assets or liabilities to be measured at fair value but does not expand the use of fair value to any new circumstances. This standard also will require additional disclosures in both annual and quarterly reports. We will adopt SFAS 157 when required, currently January 1, 2008. We are currently evaluating the potential impact this standard may have on our financial position and results of operations, but do not believe the impact of the adoption will be material.

In February 2007, the FASB issued SFAS No. 159, *The Fair Value Option for Financial Assets and Financial Liabilities* Including an amendment of FASB Statement No. 115 (SFAS 159). Under SFAS 159, entities may elect to measure eligible items at fair value on a contract-by-contract basis, with changes in fair value recognized in earnings each reporting period. The election, called the fair value option, will enable entities to achieve an offset accounting effect for changes in fair value of certain related assets and liabilities without having to apply complex hedge accounting provisions. We will adopt SFAS 159 in 2008. We are currently evaluating the potential impact this standard may have on our financial position and results of operations.

Note 2: Discontinued Operations – Mortgage Business

In 2005, we launched the JustListed Connect product and acquired The Loan Page product, both targeted at mortgage professionals. Since then, this highly competitive market has faced increasing economic and competitive challenges, especially for new market entrants like HouseValues. While we believe the underlying synergies between mortgage professionals and our real estate customers continue to exist, we decided in January 2007 to exit the mortgage business. With that announcement, we implemented a plan to eliminate headcount associated with the mortgage operation as well as an overall reduction in force.

Results of operations for the quarter ended March 31, 2007 related to the mortgage business have been segregated from continuing operations and presented separately, net of related income taxes, on the statement of operations. We also have restated the comparative period from the prior year for discontinued operations. Included in discontinued operations are revenues of \$715 and \$3,637, including revenues from our JustListed Connect product of \$422 and \$2,482, for the three month periods ended March 31, 2007 and 2006, respectively. Continuing revenues from our JustListed Connect product are not considered significant, and there is not significant continuing involvement with the discontinued operations of the mortgage business.

During the first quarter of 2007 we paid severance costs of \$63 related to the discontinued operations.

Note 3: Earnings per Share

Basic earnings per share is computed using the weighted average number of shares outstanding during the period. Diluted earnings per share uses the weighted average common shares outstanding plus dilutive stock options.

Table of Contents

The following table sets forth the computation of basic and diluted earnings per share:

	Three months ended March 31,	
	2007	2006
Net (loss) income from continuing operations	\$ (1,168)	\$ 2,035
Net loss from discontinued operations	(36)	(265)
Net (loss) income	\$ (1,204)	\$ 1,770
Weighted average common shares outstanding	24,428	25,810
Dilutive effect of stock options		1,543
Diluted Shares	24,428	27,353
Net (loss) income per share basic:		
Continuing operations	\$ (0.05)	\$ 0.08
Discontinued operations	\$	\$ (0.01)
Net basic (loss) earnings per share	\$ (0.05)	\$ 0.07
Net (loss) income per share diluted:		
Continuing operations	\$ (0.05)	\$ 0.07
Discontinued operations	\$	\$ (0.01)
Net diluted (loss) earnings per share	\$ (0.05)	\$ 0.06
Antidilutive stock options	2,570	1,696

Note 4: Income Taxes

We adopted the provisions of FIN 48 on January 1, 2007. We did not recognize any adjustments to our financial statements as a result of our implementation of FIN 48. Both at the adoption date of January 1, 2007 and at March 31, 2007, we did not have any unrecognized tax benefits, nor did we have any interest or penalties accrued. We have concluded all U.S. federal income tax matters for years through 2003 and state and local taxes for years through 2002.

Our effective tax rate for continuing operations was 45% for the quarter ended March 31, 2007, compared to 28% for the quarter ended March 31, 2006. Our effective tax rate increased due to the increase in our tax-exempt interest income relative to operating results. The effective tax rate for discontinued operations approximates the statutory rate as those results are not impacted by investment income.

Note 5: Stock-based Compensation Plans

Stock-based compensation cost is measured at grant date, based on the fair value of the award, over the requisite service period.

Determining Fair Value Assumptions

The value of each employee option granted during the quarters ended March 31, 2007 and 2006 was estimated on the date of grant using the Black-Scholes option-pricing model with the following weighted average assumptions:

Three months ended March 31,
2007 **2006**

Edgar Filing: HouseValues, Inc. - Form 10-Q

Expected life (in years)	3.0	3.0
Weighted average expected volatility	80%	90%
Weighted average risk-free interest rate	4.83%	4.55%
Expected dividend yield	0%	0%
Weighted average fair value	\$ 2.82	\$ 8.51

Stock-based Compensation under FAS 123R

The following table summarizes stock-based compensation expense related to stock-based awards:

	Three months ended	
	March 31, 2007	
Total cost of share-based payment plans	\$	1,274
Amounts capitalized in internally developed software		(21)
Amounts charged against income, before income tax benefit	\$	1,253
Amount of related income tax benefit recognized in income	\$	430
Amounts recognized in income for amounts previously capitalized in fixed assets	\$	5

As of March 31, 2007, we had \$8,852 of unrecognized compensation cost related to non-vested stock-based awards granted under all equity compensation plans. We expect to recognize this cost over a weighted average period of 1.54 years.

Table of Contents**Stock Option Activity**

As of March 31, 2007, we had reserved 1.7 million shares for future issuance under our stock option plans. We issue new shares for option exercises.

Options granted, exercised, canceled and expired under all of our stock option plans are summarized as follows:

	Options	Weighted Average Exercise Price	Weighted Average Remaining Contractual Life	Aggregate Intrinsic Value
Outstanding at December 31, 2006	4,037,756	\$ 6.63		
Options granted	426,100	5.16		
Options exercised	(64,518)	2.20		
Options canceled	(343,795)	9.68		
Options expired	(9,323)	14.51		
Outstanding at March 31, 2007	4,046,220	\$ 6.27	8.0 years	\$ 4,298
Exercisable at March 31, 2007	1,884,155	\$ 5.52	6.6 years	\$ 4,026

The total intrinsic value of options exercised and the total fair value of options that vested and were forfeited are included in the following table.

	Three months ended	
	March 31, 2007	March 31, 2006
Intrinsic value of options exercised	\$ 185	\$ 632
Fair value of options vested	\$ 1,745	\$ 864
Fair value of options forfeited	\$ 2,318	\$ 1,239

Note 6: Supplemental Disclosure of Cash Flow Information

	Three months ended	
	March 31, 2007	March 31, 2006
Cash paid during the period for income taxes	\$ 311	\$ 708
Income tax refunds received during the period	\$ 1,949	
Non-cash investing and financing activities:		
Accrued earn-out payments in connection with acquisitions		\$ 681
Change in payables for property and equipment	\$ 97	\$ 1,977

Table of Contents**Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations**

You should read the following discussion and analysis by our management of our financial condition and results of operations in conjunction with our unaudited condensed consolidated financial statements and the accompanying notes included elsewhere in this Quarterly Report on Form 10-Q. This discussion and other parts of this Quarterly Report on Form 10-Q contain forward looking statements relating to the Company's anticipated plans, products, services, and financial performance. The words believe, expect, anticipate, intend and similar expressions identify forward-looking statements, but their absence does not mean the statement is not forward looking. These statements are not guarantees of future performance and are subject to certain risks, uncertainties and assumptions that could cause actual results to differ materially from those anticipated in the forward looking statements. Factors that could affect the Company's actual results include, but are not limited to, those discussed under the heading Risk Factors in our Annual Report on our Form 10-K for the period ended December 31, 2006 and in our other Securities and Exchange Commission filings. Given these risks and uncertainties, you should not place undue reliance on our forward looking statements. The forward looking statements are made as of the date of this report and the Company assumes no obligation to update any such statements to reflect events or circumstances after the date hereof.

Overview

Results for the quarter ended March 31, 2007 continued to reflect broader real estate market conditions. Revenue from continuing operations for the first quarter was \$17.8 million, down 23% from the comparative period last year driven by lower average revenue per customer and a decline in the customer base. In the first quarter of 2007, the National Association of Realtors reported that seasonally adjusted U.S. existing home sales were 5% lower than in the first quarter of the prior year. We believe this is creating financial pressure on real estate agents that is reflected in our key operating metrics. We have responded to the changing economic conditions by reducing our cost structure while continuing to improve our existing product offerings and to develop new product offerings that are intended to drive success for our real estate agent customers.

In January 2007, we announced our exit from the mortgage lead generation business and our intention to scale back or eliminate initiatives that are not critical to our real estate agent customers. These reductions resulted in an overall reduction of our workforce by about 12% or 60 employees. We plan to work with strategic and advertising partners to monetize organic mortgage demand originating on our web sites and will continue to facilitate cooperation between real estate agents and their mortgage partners. As a result of our decision to exit the mortgage business, we have presented results of operations related to the mortgage business as discontinued operations, including prior periods. In connection with the discontinuation of our mortgage operations and the reduction in workforce, discontinued operations incurred cash severance costs of \$0.1 million, while continuing operations incurred cash severance costs of \$0.3 million and additional stock compensation expense of \$0.5 million. In the fourth quarter of 2006, we recorded a \$6.2 million impairment charge for goodwill and intangible assets related to the mortgage business.

Results of Operations

Our discussion of operating results addresses results from continuing operations, our real estate business. Our former mortgage business has been presented in our financial statements as discontinued operations.

Revenues

	Three months ended March 31,	
	2007	2006
Revenues	\$ 17,838	\$ 23,234

Real estate revenues for the first quarter of 2007 decreased 23% over the same quarter in 2006 due to a 16% decline in our average real estate revenue per customer and a 9% decline in average core real estate customer base. We believe that slower existing home sales are creating financial pressure on real estate agents that are reflected in the lower average revenue per customer and decreased customer base.

Revenue in the first quarter of 2007 decreased 7% over the fourth quarter of 2006. On a sequential quarter basis, we experienced a 9% decrease in average real estate core customer count, partially offset by a 2% increase in average real estate revenue per customer during the first quarter. More information about the sequential change in real estate revenue and customers is included in the Key Operational Metrics Real Estate Products section of Management's Discussion and Analysis.

Table of Contents*Sales and Marketing*

	2007	Three months ended March 31, % of Revenue	2006	% of Revenue
Sales and marketing expense before stock-based compensation	\$ 12,157	68%	\$ 13,523	58%
Stock-based compensation	230	1%	318	2%
Total sales and marketing expense	\$ 12,387	69%	\$ 13,841	60%

Sales and marketing expense in the first quarter of 2007 increased as a percentage of revenue driven primarily by comparable advertising costs on lower revenue. In total, expenses decreased from the same quarter in 2006 primarily due to reduced payroll and related expenses as we have scaled back headcount during 2006 and reduced our workforce in January 2007.

Technology and Product Development

	2007	Three months ended March 31, % of Revenue	2006	% of Revenue
Technology and product development expense before stock-based compensation	\$ 2,675	15%	\$ 2,695	11%
Stock-based compensation	115	1%	141	1%
Total technology and product development expense	\$ 2,790	16%	\$ 2,836	12%

Technology and product development expense decreased slightly in total dollars, but increased as a percentage of revenue for the quarter ended March 31, 2007 as compared to the same period in 2006, primarily due to lower revenues. The reduction in payroll and related expenses resulting from the reduction in workforce in January 2007, as well as reduced contractor expense were partially offset by severance costs related to the reduction in force.

General and Administrative

	2007	Three months ended March 31, % of Revenue	2006	% of Revenue
General and administrative expense before stock-based compensation	\$ 2,663	15%	\$ 2,600	11%
Stock-based compensation	889	5%	502	2%
Total general and administrative expense	\$ 3,552	20%	\$ 3,102	13%

General and administrative expenses increased in total dollars and as a percentage of revenues for the quarter ended March 31, 2007 when compared to the same period last year, primarily due to severance costs resulting from our reduction in workforce in January 2007. General and administrative expense included severance of approximately \$0.2 million in cash compensation and \$0.5 million of stock-based compensation resulting from the acceleration of stock options. These increases were mostly offset by reduced salaries and related expenses, including stock-based compensation aside from the impact of stock option acceleration related to severance packages, as well as reduced state taxes.

Depreciation and Amortization of Property and Equipment

Depreciation and amortization of property and equipment increased year-over-year primarily due to additional depreciation expense on capitalized software development, workstations and equipment. Additionally, in the first quarter of 2007 we recognized the remaining \$0.1 million of accelerated depreciation on a technology investment in HomePages that was retired upon the launch of the next major release of the product at the end of the first quarter of 2007.

Edgar Filing: HouseValues, Inc. - Form 10-Q

Amortization of Intangible Assets

Amortization of intangible assets increased for the quarter ended March 31, 2007 when compared to the same period in 2006 primarily due to \$0.3 million acceleration of the remaining amortization on a technology investment in HomePages that was retired upon the launch of the next major release of the product at the end of the first quarter of 2007.

Interest Income

Interest income for the first quarter of 2007 was consistent with the first quarter of 2006. At March 31, 2007, we held \$75.4 million in cash, cash equivalents and short-term investments, compared to \$84.8 million at March 31, 2006. Overall lower cash and investment balances were largely offset by increased market rates.

Table of Contents*Income Taxes*

We recognized an income tax benefit for the first quarter of 2007 as a result of our pre-tax loss from continuing operations. Our first quarter 2007 effective tax rate for continuing operations was 45% compared to an effective tax rate from continuing operations of 28% for the first quarter of 2006 due to the increase in our tax-exempt interest income relative to operating results.

Because tax-exempt interest income represents a significant contribution to operating results, changes to forecasted operating income could have a significant impact on our effective tax rate and the related tax expense for the remainder of 2007.

Critical Accounting Policies and Estimates

Our financial statements are prepared in accordance with accounting principles generally accepted in the United States of America. The preparation of these financial statements requires us to make estimates and assumptions that affect the reported amounts of assets, liabilities, revenues, costs and expenses and related disclosures. On an ongoing basis, we evaluate our estimates and assumptions. Accordingly, our actual results may differ from these estimates under different assumptions or conditions.

In the first quarter of 2007, we announced our exit from the mortgage lead generation business. As a result of our decision to exit the mortgage business, we have presented results of operations related to the mortgage business as discontinued operations, including prior periods. Significant judgment and analysis was used to determine support costs classified as continuing operations and discontinued operations. Other critical accounting policies that involve significant judgments and estimates used in the preparation of our consolidated financial statements are disclosed in our 2006 Annual Report on Form 10-K.

Quarterly Consolidated Statements of Income and Operational Data

The following tables present unaudited operational data pertaining to both our continuing operations and our discontinued operations for the five quarters ended March 31, 2007. This quarterly information has been prepared on the same basis as our audited consolidated financial statements and, in the opinion of our management, reflects all adjustments necessary for a fair representation of the information for the periods presented. This data should be read in conjunction with our audited consolidated financial statements and the related notes included in our 2006 Annual Report on Form 10-K. Operating results for any quarter apply to that quarter only and are not necessarily indicative of results for any future period.

	Mar. 31,	Dec. 31,	Sept. 30,	June 30,	Mar. 31,

Key Operational Metrics

The following table presents operational data related to our real estate products for the five quarters ended March 31, 2007:

	Mar. 31,	Dec. 31,	Sept. 30,	June 30,	Mar. 31,
	2007	2006	2006	2006	2006
Operational Data:					
Components of revenue (in thousands):					
Real estate core revenue (1)	\$ 17,514	\$ 18,735	\$ 20,623	\$ 21,953	\$ 22,747
Other real estate revenue (2)	324	413	468	398	487
Net real estate revenue (3)	\$ 17,838	\$ 19,148	\$ 21,091	\$ 22,351	\$ 23,234
Core real estate customers, end of period	13,508	14,596	16,184	15,993	15,825
Average monthly churn rate (4)	10.4%	9.3%	7.6%	7.4%	6.6%
Average core real estate customers in the quarter (5)	14,052	15,390	16,089	15,909	15,398
Average monthly revenue per core real estate customer (6)	\$ 415	\$ 406	\$ 427	\$ 460	\$ 492

- (1) Real estate core revenue consists of revenue for our primary real estate service offerings, HouseValues, JustListed, and agent advertising products. The customers from these primary service offerings are referred to as core real estate customers.
- (2) Other real estate revenue includes revenue related to ancillary services, such as sales of surplus leads to brokers with no minimum commitment, monthly fees for use of our tools, the sales of branded marketing collateral, seminar attendance fees, and advertising.
- (3) Real estate core and other revenues have been revised from amounts previously reported by immaterial amounts.
- (4) Average monthly customer churn is calculated by dividing the number of core real estate customers who canceled during the quarter by the average core customers in the quarter, divided by the number of months in the quarter. Core real estate customers are customers from whom we collect fees for our core revenues. One minus our average monthly churn rate equates to our average monthly retention rate. Our annualized customer retention rate is calculated as average monthly retention raised to the power of 12. Other companies may calculate churn and retention differently, and their churn and retention data may not be directly comparable to ours.
- (5) Average core real estate customers in the quarter are calculated as the average of core real estate customers at the beginning and at the end of the quarter.
- (6) Average revenue per core real estate customer is calculated as core real estate revenue for the quarter divided by the average number of core real estate customers in the quarter.

Our core real estate customer count decreased by 1,088 customers during the first quarter of 2007, compared to a net decrease of 1,588 customers in the fourth quarter of 2006. Ending core real estate customers at March 31, 2007 had decreased 15% compared to March 31, 2006.

Average monthly churn for our real estate business was 10.4% for the first quarter of 2007, up from 9.3% in the fourth quarter of 2006. Monthly churn of 10.4% equates to 89.6% monthly retention which represents a 27% annualized retention rate. Churn increased as a result of a higher number of cancellations which was partially offset by seasonally stronger new customer acquisition. We believe that the high rate of cancellations partially reflects new customers acquired in prior periods consistent with a peak in cancellations that has been historically seen twelve to fourteen months into the customer lifecycle.

Table of Contents

Additionally, we believe that slower existing home sales continued to contribute to the high number of cancellations in the first quarter of 2007. While we expect to experience fluctuations in our churn rate from quarter to quarter, we believe that both of these factors may continue to drive high cancellation levels in the near term.

Average monthly revenue per real estate customer for the first quarter of 2007 increased 2% compared to the fourth quarter of 2006. Average revenue per customer will fluctuate from quarter to quarter based on the number of customers, the mix of sales for products priced differently across lower and higher priced geographies, the demand for existing services and the acceptance of new offerings.

Liquidity and Capital Resources

The following table presents summary cash flow data:

	Three months Ended March 31,	
	2007	2006
	(dollars in thousands)	
Cash (used in) provided by operating activities	\$ (1,927)	\$ 4,094
Cash used in investing activities	(7,496)	(9,330)
Cash provided by financing activities	171	260

Cash equivalents and short-term investments consist of money market funds and highly liquid, short-term, adjustable-rate insured municipal notes. These municipal notes are classified as short-term investments available for sale and are reported at fair value, which approximates cost.

Our principal sources of liquidity are our cash, cash equivalents and short-term investments, \$75.4 million at March 31, 2007, as well as the cash flow that we may generate from our operations.

Operating Activities

Net cash from operating activities primarily consists of our net operating results adjusted for certain non-cash items, including depreciation, amortization, stock-based compensation, deferred income taxes and the effect of changes in working capital. Cash flow used in operations for the first quarter of 2007 was \$1.9 million, a decline of \$6.0 million from the same period in 2006 primarily due to a \$4.4 million reduction in our current liabilities, as well as lower operating profits.

Investing Activities

Cash used in investing activities for the first quarter of 2007 decreased by \$1.8 million compared to the same period last year. During the first three months of 2007 lower capital expenditures were partially offset by the net increase in short-term investments. Our capital expenditures in 2007 were generally investments in our customer-facing infrastructure and the development costs related to new products and features.

Financing Activities

Cash provided by financing activities remained relatively consistent.

Recent Accounting Pronouncements

In January 2007, we adopted the Financial Accounting Standards Board Interpretation No. 48, Accounting for Uncertainty in Income Taxes An Interpretation of FASB Statement No. 109 (FIN 48). This Interpretation clarifies the accounting for uncertainty in income taxes recognized in a company's financial statements. FIN 48 requires companies to determine whether it is more likely than not that a tax position will be sustained upon examination by the appropriate taxing authorities before any part of the benefit can be recorded in the financial statements. It also provides guidance on the recognition, measurement and classification of income tax uncertainties, along with any related interest and penalties. The adoption of this Interpretation did not have a material impact on our financial position and results of operations.

In September 2006, the FASB issued SFAS No. 157, Fair Value Measurements (SFAS 157), which provides guidance on how to measure assets and liabilities that use fair value. SFAS 157 will apply whenever another U.S. GAAP standard requires assets or liabilities to be measured at fair value but does not expand the use of fair value to any new circumstances. This standard also will require additional disclosures in both annual

Edgar Filing: HouseValues, Inc. - Form 10-Q

and quarterly reports. We will adopt SFAS 157 when required, currently January 1, 2008. We are currently evaluating the potential impact this standard may have on our financial position and results of operations, but do not believe the impact of the adoption will be material.

Table of Contents

In February 2007, the FASB issued SFAS No. 159, The Fair Value Option for Financial Assets and Financial Liabilities Including an amendment of FASB Statement No. 115 (SFAS 159). Under SFAS 159, entities may elect to measure eligible items at fair value on a contract-by-contract basis, with changes in fair value recognized in earnings each reporting period. The election, called the fair value option, will enable entities to achieve an offset accounting effect for changes in fair value of certain related assets and liabilities without having to apply complex hedge accounting provisions. We will adopt SFAS 159 in 2008. We are currently evaluating the potential impact this standard may have on our financial position and results of operations.

Item 3. Quantitative and Qualitative Disclosures about Market Risk

The primary objective of our investment activities is to preserve principal and liquidity without incurring significant risk. To achieve this objective, we invest in short-term, high-quality, interest-bearing securities. Our investments in debt securities are subject to interest rate risk. To minimize our exposure to an adverse shift in interest rates, we invest in short-term securities and maintain an average maturity of one year or less.

Item 4. Controls and Procedures

(a) *Evaluation of disclosure controls and procedures.* Under the supervision and with the participation of our Company's management, including the Chief Executive Officer and Chief Financial Officer, the Company has evaluated the effectiveness of the design and operation of our disclosure controls and procedures (as such term is defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended. Based on that evaluation, the Company's management, including the Chief Executive Officer and Chief Financial Officer, concluded that the Company's disclosure controls and procedures were effective as of March 31, 2007.

(b) *Changes in internal controls.* We have made no changes in internal control over financial reporting during the first fiscal quarter of 2007 that materially affected or are reasonably likely to materially affect our internal control over financial reporting. We intend to continue to refine our internal control on an ongoing basis as we deem appropriate with a view towards continuous improvement.

PART II. OTHER INFORMATION

Item 1. Legal Proceedings

From time to time, we may become involved in litigation relating to claims arising from the ordinary course of our business, including actions relating to employment issues. We believe that there are no claims or actions pending or threatened against us, the ultimate disposition of which would have a material adverse effect on us.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

On December 9, 2004, the Securities and Exchange Commission declared effective our registration statement on Form S-1 (SEC File No. 333-118740) in connection with our initial public offering of common stock. We sold 4,166,667 shares of common stock at \$15.00 per share, for aggregate gross proceeds of \$62.5 million, and selling shareholders sold 2,083,333 shares of common stock at \$15.00 per share, for aggregate gross proceeds of \$31.2 million. We received net proceeds of approximately \$56.1 million after underwriters' discounts and commissions of approximately \$4.4 million and other expenses related to the offering of approximately \$2.0 million. None of the proceeds of the offering that we received were used as payments to our directors or officers (or their associates), or to our affiliates or 10% shareholders. All of the expenses of the offering were direct or indirect payments to others and not payments to our directors or officers (or their associates) or to our affiliates or 10% shareholders. Credit Suisse First Boston LLC and J.P. Morgan Securities Inc. acted as joint book-running managers of the offering, with Piper Jaffray & Co., Thomas Weisel Partners LLC and Pacific Crest Securities Inc. acting as co-managers of the offering.

Through March 31, 2007, we have used approximately \$24.1 million of the proceeds to purchase property and equipment, intangible assets, and to complete acquisitions. The remaining proceeds have been invested in money market funds and highly liquid, short-term, adjustable-rate insured municipal notes. Our current and planned use of the proceeds does not represent a material change from the use of proceeds described in the prospectus relating to the Registration Statement.
