The exact stock prices and effective dates may not be set forth in the applicable table, in which case:

- if the stock price is between two stock prices in the table above or the effective date is between two effective dates in the table above, the make-whole shares issued upon conversion of the Series D debentures will be determined by straight-line interpolation between the number of make-whole shares set forth for the higher and lower stock prices and/or the earlier and later effective dates, as applicable, based on a 365-day year;
- if the stock price is in excess of \$60.00 per share of common stock (subject to adjustment in the same manner as the stock prices set forth in the table above), no make-whole shares will be issued upon conversion of the Series D debentures; and
- if the stock price is less than \$30.47 per share of common stock (subject to adjustment in the same manner as the stock prices set forth in the table above), no make-whole shares will be issued upon conversion of the Series D debentures.

The conversion rate of the Series D debentures shall not exceed 0.8205 per \$25.00 principal amount of such Series D debentures, subject to adjustment in the same manner as the conversion rate.
