AUBURN NATIONAL BANCORPORATION, INC. AND SUBSIDIARIES

Notes to Condensed Consolidated Financial Statements

NOTE 1: SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

General

Auburn National Bancorporation, Inc. (the Company) provides a full range of banking services to individual and corporate customers in Lee County, Alabama and surrounding counties through its subsidiary, AuburnBank (the Bank). The Company does not have any segments other than banking that are considered material.

Basis of Presentation and Use of Estimates

The unaudited condensed consolidated financial statements in this report have been prepared in accordance with U.S. generally accepted accounting principles for interim financial information. Accordingly, these financial statements do not include all of the information and footnotes required by U.S. generally accepted accounting principles for complete financial statements. The unaudited condensed consolidated financial statements include, in the opinion of management, all adjustments necessary to present a fair statement of the financial position and the results of operations for all periods presented. All such adjustments are of a normal recurring nature. The results of operations as of and for the quarter ended March 31, 2009, are not necessarily indicative of the results of operations that the Company and its subsidiaries may achieve for future interim periods or the entire year. For further information, refer to the consolidated financial statements and footnotes included in the Company's annual report on Form 10-K for the year ended December 31, 2008.

Reclassifications

Certain amounts reported in prior periods have been reclassified to conform to the current-period presentation. These reclassifications had no effect on the Company's previously reported net earnings or total stockholders' equity.

Current Accounting Developments

In the first quarter of 2009, the Company adopted the following new accounting pronouncements:

SFAS No. 141R (revised 2007), Business Combinations ;
SFAS No. 160, Noncontrolling Interests in Consolidated Financial Statements – an amendment of ARB No. 51 ;
Statement of Financial Accounting Standards (SFAS) No. 161, Disclosures about Derivative Instruments and Hedging Activities – an amendment of FASB Statement No. 133 ;
FASB Staff Position (FSP) FSP FAS 157-4, Determining Fair Value When the Volume and Level of Activity for the Asset or Liability Have Significantly Decreased and Identifying Transactions That Are Not Orderly ; and
FSP FAS 115-2 and FAS 124-2, Recognition and Presentation of Other-Than-Temporary Impairments ;

Table of Contents

SFAS No. 141R clarifies the definitions of both a business combination and a business. All business combinations will be accounted for under the acquisition method (previously referred to as the purchase method). This standard defines the acquisition date as the only relevant date for recognition and measurement of the fair value of consideration paid. SFAS No. 141R requires the acquirer to expense all acquisition related costs. SFAS No. 141R will also require acquired loans to be recorded net of the allowance for loan losses on the date of acquisition. SFAS No. 141R defines the measurement period as the time after the acquisition date during which the acquirer may make adjustments to the provisional amounts recognized at the acquisition date. This period cannot exceed one year, and any subsequent adjustments made to provisional amounts are done retrospectively and restate prior period data. The provisions of this statement are effective for business combinations during fiscal years beginning after December 15, 2008. Adoption of SFAS No. 141R did not have a significant impact on the consolidated financial statements of the Company.

SFAS No. 160 requires noncontrolling interests to be treated as a separate component of equity, not as a liability or other item outside of equity. Disclosure requirements include net income and comprehensive income to be displayed for both the controlling and noncontrolling interests and a separate schedule that shows the effects of any transactions with the noncontrolling interests on the equity attributable to the controlling interest. The provisions of this statement are effective for fiscal years beginning after December 15, 2008. Adoption of SFAS No. 160 did not have a significant impact on the consolidated financial statements of the Company.

SFAS No. 161, which amends FASB Statement No. 133, *Accounting for Derivative Instruments and Hedging Activities*, requires companies with derivative instruments to disclose information about how and why a company uses derivative instruments, how derivative instruments and related hedge items are accounted for under Statement 133, and how derivative instruments and related hedged items affect a company's financial position, financial performance, and cash flows. The required disclosures include the fair value of the derivative instruments and their gains or losses in tabular format, information about credit-risk-related contingent features in derivative agreements, counterparty credit risk, and the company's strategies and objectives for using derivative instruments. The Statement expands the current disclosure framework in SFAS No. 133. SFAS No. 161 is effective prospectively for periods beginning on or after November 15, 2008. Adoption of SFAS No. 161 impacted disclosures only and did not have a significant impact on the consolidated financial statements of the Company.

FSP FAS 157-4 provides factors that an entity should consider when determining whether a market for an asset is not active. If after evaluating the relevant factors, the evidence indicates that a market is not active, FSP FAS 157-4 provides an additional list of factors that an entity must consider when determining whether events and circumstances indicate that a transaction which occurred in such inactive market is orderly. FSP FAS 157-4 requires that entities place more weight on observable transactions determined to be orderly and less weight on transactions for which there is insufficient information to determine whether the transaction is orderly when determining the fair value of an asset or liability under Statement of Financial Accounting Standards No. 157, *Fair Value Measurements* (SFAS No. 157). FSP FAS 157-4 requires enhanced disclosures, including disclosure of a change in valuation technique which results from its application and disclosure of fair value measurements for debt and equity securities by major security types. The provisions of this FSP are effective in second quarter 2009; however, as permitted under the pronouncement, we early adopted in first quarter 2009. The Company applied the guidance of FSP FAS 157-4 in its fair value measurements as of March 31, 2009 and the effects of adoption were not significant.

FSP FAS 115-2 replaces the *intent and ability to hold to recovery* indicator of other-than-temporary impairment in FASB Staff Position No. FAS 115-1 and 124-1, *The Meaning of Other-Than-Temporary Impairment and Its Application to Certain Investments* (FSP FAS 115-1) for debt securities. FSP FAS 115-2 specifies that for a debt security not to be considered other-than-temporarily impaired, an entity's management must assert that it does not intend to sell the security and that it is not more-likely-than-not that the entity will have to sell the security prior to recovery of its cost basis. FSP FAS 115-2 requires that for impaired held-to-maturity and available-for-sale debt securities that an entity does not intend to sell and that it is not more-likely-than-not

Table of Contents

that it will have to sell prior to recovery but for which credit losses exist, the other-than-temporary impairment should be separated between the total impairment related to credit losses, which should be recognized in current earnings, and the amount of impairment related to all other factors, which should be recognized in other comprehensive income. FSP FAS 115-2 discusses the proper interaction of its guidance with other authoritative guidance, including FSP FAS 115-1, which provide additional factors that must be considered in an other-than-temporary impairment analysis. FSP FAS 115-2 also provides that in periods in which other-than-temporary impairments are recognized, the total impairment must be presented in the investor's income statement with an offset for the amount of total impairment that is recognized in other comprehensive income. FSP FAS 115-2 requires additional disclosures including a rollforward of amounts recognized in earnings for debt securities for which an other-than-temporary impairment has been recognized and the noncredit portion of the other-than-temporary impairment that has been recognized in other comprehensive income. The provisions of this FSP are effective in second quarter 2009; however, as permitted under the pronouncement, we early adopted on January 1, 2009. No adjustment was made to the beginning balance of retained earnings. The Company applied the guidance of FSP FAS 115-2 when assessing debt securities for other-than-temporary impairment as of March 31, 2009. For more information on the effects of adoption, refer to Footnote 4 of the Condensed Consolidated Financial statements.

NOTE 2: BASIC AND DILUTED EARNINGS PER SHARE

Basic net earnings per share is computed by dividing net earnings by the weighted average common shares outstanding for the quarters ended March 31, 2009 and 2008, respectively. Diluted net earnings per share reflect the potential dilution that could occur if the Company's potential common stock was issued. At March 31, 2009 and 2008, respectively, the Company had no options issued or outstanding.

A reconciliation of the numerator and denominator of the basic earnings per share computation to the diluted earnings per share computation for the quarters ended March 31, 2009 and 2008, respectively, is presented below.

	Quarter ended March 31	
	2009	2008
<i>(Dollars in thousands, except share and per share data)</i>		
Basic:		
Net earnings	\$ 246	\$ 1,851
Average common shares outstanding	3,646,827	3,681,809
Earnings per share	\$ 0.07	\$ 0.50
Diluted:		
Net earnings	\$ 246	\$ 1,851
Average common shares outstanding	3,646,827	3,681,809
Dilutive effect of options issued		
Average diluted shares outstanding	3,646,827	3,681,809
Earnings per share	\$ 0.07	\$ 0.50

NOTE 3: COMPREHENSIVE INCOME

Comprehensive income is defined as the change in equity from all transactions other than those with stockholders, and it includes net earnings and other comprehensive income (loss). Comprehensive income for the quarters ended March 31, 2009 and 2008 is presented below.

Table of Contents

<i>(In thousands)</i>	Quarter ended March 31	
	2009	2008
Comprehensive income:		
Net earnings	\$ 246	\$ 1,851
Other comprehensive income:		
Change in net unrealized gain (loss) on securities available-for-sale	(1,458)	2,104
Total comprehensive (loss) income	\$ (1,212)	\$ 3,955

NOTE 4: SECURITIES

At March 31, 2009 and December 31, 2008, all securities within the scope of Statement of Financial Accounting Standards (SFAS) No. 115,

Accounting for Certain Investments in Debt and Equity Securities were classified as available-for-sale. The fair value and amortized cost for securities available-for-sale at March 31, 2009 and December 31, 2008 are presented below. In addition, the total carrying value for investments in equity securities carried at cost included in other assets at March 31, 2009 and December 31, 2008, are presented below.

<i>(Dollars in thousands)</i>	Fair Value	March 31, 2009 Gross Unrealized		Amortized cost
		Gains	Losses	
Available-for-sale:				
Agency obligations (a)	\$ 103,599	530	548	103,617
Agency ABS (a)	3,805		47	3,852
Agency RMBS (a)	172,214	4,957	23	167,280
Private label RMBS	5,532	17	49	5,564
State and political subdivisions	67,879	642	2,113	69,350
Trust preferred securities:				
Pooled	845		2,130	2,975
Individual issuer	1,273		2,365	3,638
Corporate debt	3,278		226	3,504
Total available-for-sale	\$ 358,425	6,146	7,501	359,780
Equity securities, at cost (b)	\$ 6,686			6,686

(a) Includes securities issued by government sponsored entities.

(b) Includes FHLB stock, Federal Reserve Bank stock, and cost-method investments. Unless the Company was required to estimate fair value for purposes of evaluating other-than-temporary impairment, historical cost is considered approximate to fair value.

Table of Contents

	Fair Value	December 31, 2008		Amortized cost
		Gross Unrealized Gains	Losses	
<i>(Dollars in thousands)</i>				
Available-for-sale:				
Agency obligations (a)	\$ 68,001	1,140		66,861
Agency RMBS (a)	155,079	4,228	80	150,931
Private label RMBS	5,579		152	5,731
State and political subdivisions	65,292	685	1,766	66,373
Trust preferred securities:				
Pooled	1,715		1,260	2,975
Individual issuer	3,559		1,766	5,325
Corporate bonds	3,431		72	3,503
Total available-for-sale	\$ 302,656	6,053	5,096	301,699
Equity securities, at cost (b)	\$ 7,894			7,894

(a) Includes securities issued by government sponsored entities.

(b) Includes FHLB stock, Federal Reserve Bank stock, and cost-method investments. Unless the Company was required to estimate fair value for purposes of evaluating other-than-temporary impairment, historical cost is considered approximate to fair value.

Securities with an aggregate fair value of \$246.8 million and \$204.1 million at March 31, 2009 and December 31, 2008, respectively, were pledged to secure public deposits, securities sold under agreements to repurchase, Federal Home Loan Bank (FHLB) advances, and for other purposes required or permitted by law.

Gross Unrealized Losses and Fair Value

The fair values and gross unrealized losses on securities at March 31, 2009 and December 31, 2008, respectively, segregated by those securities that have been in an unrealized loss position for less than twelve months and twelve months or more are presented below.

Table of Contents

	Less than 12 months		12 months or longer		Total	
	Fair	Unrealized	Fair	Unrealized	Fair	Unrealized

The applicable date for determining when securities are in an unrealized loss position is March 31, 2009. As such, it is possible that a security had a market value that exceeded its amortized cost on other days during the past twelve-month period.

The unrealized losses associated with state and municipal debt securities are primarily driven by changes in interest rates and are not due to the credit quality of the securities. These securities will continue to be monitored as part of our on-going impairment analysis, but are expected to perform even if the rating agencies reduce the credit rating of the bond insurers.

The unrealized losses associated with trust preferred securities are primarily driven by illiquidity stemming from the effects of the mortgage and credit crises. Due to this illiquidity, it is unlikely the Company would be able to recover its investment in these securities if it sold them at this time. Pooled trust preferred securities primarily consist of securities issued by banks and are generally secured by over-collateralized or default protection provided by subordinated tranches. Pooled trust preferred securities were not other-than-temporarily impaired at March 31, 2009, if management concluded the Company had sufficient protection from subordinated tranches when compared with its estimate of credit losses for the individual security. For individual issuers, management evaluates the financial performance of the issuer on a quarterly basis to determine if it is probable that the issuer can make all contractual principal and interest payments.

Because the Company does not intend to sell these securities and it is not more likely than not that the Company will be required to sell the securities before recovery of their amortized cost bases, which may be maturity, the Company does not consider these securities to be other-than-temporarily impaired at March 31, 2009.

The carrying values of the Company's investment securities could decline in the future if the underlying performance of the collateral for pooled trust preferred securities, the financial condition of individual issuers of trust preferred securities, or other securities deteriorate and management

determines it is probable that the Company will not recover the entire amortized cost bases of the securities. As a result, there is a risk that other-than-temporary impairment charges may occur in the future given the current economic environment.

Table of Contents**Other-Than-Temporarily Impaired Securities**

On a quarterly basis, management makes an assessment to determine whether there have been events or economic circumstances to indicate that a security on which there is an unrealized loss is other-than-temporarily impaired. For equity securities with an unrealized loss, the Company considers many factors including the severity and duration of the impairment; the intent and ability of the Company to hold the security for a period of time sufficient for a recovery in value; and recent events specific to the issuer or industry. Equity securities on which there is an unrealized loss that is deemed to be other-than-temporary are written down to fair value with the write-down recorded as a realized loss in securities gains (losses).

For debt securities with an unrealized loss, an other-than-temporary impairment write-down is triggered when (1) the Company has the intent to sell a debt security, (2) it is more likely than not that the entity will be required to sell the debt security before recovery of its amortized cost basis, or (3) the entity does not expect to recover the entire amortized cost basis of the debt security. If the Company has the intent to sell a debt security or if it is more likely than not that it will be required to sell the debt security before recovery, the other-than-temporary write-down is equal to the entire difference between the debt security's amortized cost and its fair value. If the Company does not intend to sell the security or it is not more likely than not that it will be required to sell the security before recovery, the other-than-temporary impairment write-down is separated into the amount that is credit related (credit loss component) and the amount due to all other factors. The credit loss component is recognized in earnings, as a realized loss in securities gains (losses), and is the difference between the security's amortized cost basis and the present value of its expected future cash flows. The remaining difference between the security's fair value and the present value of future expected cash flows is due to factors that are not credit related and is recognized in other comprehensive income, net of applicable taxes.

Due to the rapid deterioration in the financial condition of the issuers, management determined that credit losses for individual issuer trust preferred securities deemed other-than-temporarily impaired as of March 31, 2009 were equal to the difference between the amortized cost basis and the fair value of the investments. As a result, no credit losses were recorded in which a portion of the other-than-temporary impairment was recorded in other comprehensive income.

The Company may from time to time dispose of an impaired security in response to asset/liability management decisions, future market movements, business plan changes, or if the net proceeds could be reinvested at a rate of return that is expected to recover the loss within a reasonable period of time.

Realized Gains and Losses

The following table presents the gross realized gains and losses on the sales of securities available-for-sale, including equity investments carried at cost. Of the first quarter 2009 write-downs related to other-than-temporary impairment, approximately \$1.7 million related to investments in individual issuer trust preferred securities and \$1.3 million related to a cost-method investment.

	Quarter ended March 31	
	2009	2008
<i>(Dollars in thousands)</i>		
Gross realized gains	\$ 880	\$ 43
Gross realized losses	(3,003)	
Net realized gains (losses)	\$ (2,123)	\$ 43

NOTE 5: INCOME TAXES

As of March 31, 2009 and December 31, 2008, the Company had no unrecognized tax benefits related to federal or state income tax matters.

Table of Contents

As of March 31, 2009 and December 31, 2008, the Company has accrued no interest and no penalties related to uncertain tax positions. It is the Company's policy to recognize interest and penalties related to income tax matters in income tax expense.

The Company and its subsidiaries file consolidated U.S. federal and State of Alabama income tax returns. The Company is currently open to audit under the statute of limitations by the Internal Revenue Service for the years ended December 31, 2005 through 2008. The Company is currently open to audit by the state of Alabama for the years ended December 31, 2005 through 2008, although certain matters have been closed.

NOTE 6: FAIR VALUE DISCLOSURES

The Company adopted the provisions of SFAS No. 157, "Fair Value Measurements", effective January 1, 2008. Under this standard, fair value is defined as the price that would be received to sell an asset or paid to transfer a liability (i.e., the "exit price") in an orderly transaction between market participants at the measurement date. SFAS No. 157 establishes a hierarchy for inputs used in measuring fair value that maximizes the use of observable inputs and minimizes the use of unobservable inputs by requiring that most observable inputs be used when available. Observable inputs are inputs that market participants would use in pricing the asset or liability developed based on market data obtained from sources independent of the Company. Unobservable inputs are inputs that reflect the Company's assumptions about the assumptions market participants would use in pricing the asset or liability developed based on the best information available in the circumstances. The hierarchy is broken down into three levels based on the reliability of inputs as follows:

Level 1 inputs to the valuation methodology are quoted prices (unadjusted) for identical assets or liabilities in active markets.

Level 2 inputs to the valuation methodology include quoted prices for similar assets and liabilities in active markets, and inputs that are observable for the asset or liability, either directly or indirectly, for substantially the full term of the financial instrument.

Level 3 inputs to the valuation methodology are unobservable and significant to the fair value measurement.

The Company's assets and liabilities recorded at fair value have been categorized based upon a fair value hierarchy in accordance with SFAS No. 157.

Securities where quoted prices are available in an active market, securities are classified within level 1 of the hierarchy. Level 1 securities include highly liquid government securities such as U.S. Treasuries and exchange-traded equity securities. When instruments are traded in secondary markets and quoted market prices are not available, the Company generally relies on prices obtained from independent vendors. Vendors compile prices from various sources and often apply matrix pricing for similar securities when no price is observable. Securities measured with these valuation techniques are generally classified within Level 2 of the hierarchy and often involve using quoted market prices for similar securities, pricing models or discounted cash flow analyses using inputs observable in the market where available. Examples include U.S. government agency securities and residential mortgage-backed securities.

In certain cases where there is limited activity or less transparency around inputs to the valuation, securities are classified within Level 3 of the valuation hierarchy. Level 3 models are utilized when quoted prices are not available for certain securities or in markets where trading activity has slowed or ceased. When quoted prices are not available and are not provided by third party pricing services, management judgment is necessary to determine fair value. As such, fair value is determined using discounted cash flow analysis models, incorporating default rates, estimation of prepayment characteristics and implied volatilities. During the year ended December 31, 2008, the Company determined that Level 3 pricing models should be utilized for

Table of Contents

valuing its investments in pooled and single issue trust preferred securities. Management determined that an orderly and active market for these securities did not exist based on a significant reduction in trading volume and widening spreads during the year ended December 31, 2008.

Other assets the Company has certain financial assets carried at fair value, including interest rate swap agreements. The carrying amount of interest rate swap agreements is based on information obtained from a third party bank. These swaps qualify as derivatives, but are not designated as hedging instruments. The Company had no derivative contracts to assist in managing interest rate sensitivity at March 31, 2009 and December 31, 2008, respectively. The Company reflects these assets within Level 2 of the valuation hierarchy.

Also included in other assets are certain investments in equity securities carried at cost (cost-method investments). In accordance with FSP 115-1 and 124-1, *The Meaning of Other-Than-Temporary Impairment and Its Application to Certain Investments*, the Company is required to estimate the fair value of a cost-method investment when an event or change in circumstances has occurred during the period that may have a significant adverse effect on the fair value of the investment. At March 31, 2009, the Company estimated the fair value for one of its cost-method investments. The Company reflects this financial asset within Level 3 of the valuation hierarchy because unobservable inputs were significant in developing the estimated fair value. The availability of observable inputs is limited because the investment is not traded on a quoted exchange and the issuer's bylaws restrict investment ownership to banks and bank holding companies.

Other liabilities the Company has certain financial liabilities carried at fair value, including interest rate swap agreements. The carrying amount of interest rate swap agreements is based on information obtained from a third party bank. These swaps qualify as derivatives, but are not designated as hedging instruments. The Company had no derivative contracts to assist in managing interest rate sensitivity at March 31, 2009 and December 31, 2008, respectively. The Company reflects these assets within Level 2 of the valuation hierarchy.

The following table presents the financial instruments carried at fair value as of March 31, 2009 and December 31, 2008, respectively, by caption, on the consolidated balance sheets and by SFAS No. 157 valuation hierarchy (as described above):

Table of Contents**Assets and liabilities measured at fair value on a recurring basis**

		Quoted Prices in Active Markets for Identical Assets	Significant Other Observable Inputs	Significant Unobservable Inputs
	Amount	(Level 1)	(Level 2)	(Level 3)

Included in other comprehensive income		(1,621)
Purchases, issuances and settlements		
Transfers in and/or (out) of Level 3		(2,613)
Ending balance	\$	2,783

NOTE 7: DERIVATIVE INSTRUMENTS

Financial derivatives are reported at fair value in other assets or other liabilities. The accounting for changes in the fair value of a derivative depends on whether it has been designated and qualifies as part of a hedging relationship. For derivatives not designated as hedges, the gain or loss is recognized in current earnings. From time to time, the Company may enter into interest rate swaps (swaps) to facilitate customer transactions and meet their financing needs. Upon entering into these instruments to meet customer needs, the Company enters into offsetting positions in order to minimize the risk to the Company. These swaps qualify as derivatives, but are not designated as hedging instruments. At March 31, 2009 the Company had no derivative contracts to assist in managing interest rate sensitivity.

Interest rate swap contracts involve the risk of dealing with counterparties and their ability to meet contractual terms. When the fair value of a derivative instrument contract is positive, this generally indicates that the counter party or customer owes the Company, and results in credit risk to the Company. When the fair value of a derivative instrument contract is negative, the Company owes the customer or counterparty and therefore, has no credit risk.

A summary of the Company s interest rate swaps as of March 31, 2009 is presented below.

Table of Contents

		Other Assets Estimated	Other Liabilities Estimated	Other noninterest income Gains
<i>(Dollars in thousands)</i>	Notional	Fair Value	Fair Value	(Losses)
Interest rate swap agreements:				
Pay fixed / receive variable	\$ 6,679	\$ 1,450	\$ 1,450	\$ 130
Pay variable / receive fixed	6,679	1,450		(130)
Total interest rate swap agreements	\$ 13,358	\$ 1,450	\$ 1,450	\$

NOTE 8: SUBSEQUENT EVENTS

At March 31, 2009, the carrying value of the Company's investment in common stock issued by Silverton Financial Services, Inc. (Silverton) and trust preferred securities issued by trust subsidiaries of Silverton, which are guaranteed by Silverton, was approximately \$0.8 million. Subsequent to the end of the first quarter, on May 1, 2009, the Comptroller of the Currency (OCC) appointed the Federal Deposit Insurance Corporation (FDIC) as receiver for Silverton's bank subsidiary, Silverton Bank N.A. (Silverton Bank). The OCC acted after finding that Silverton Bank had experienced substantial dissipation of assets and earnings due to unsafe and unsound practices. The OCC also found that Silverton Bank had incurred losses that depleted most of its capital, and there was no reasonable prospect that Silverton Bank would become adequately capitalized without Federal assistance. As a result of the actions taken by the OCC and the FDIC on May 1, 2009, the Company does not anticipate that it will recover any of the Company's investment in the common stock or trust preferred securities issued by Silverton or its affiliated trusts. As a result, the Company's results of operations for the second quarter ending June 30, 2009 will include a pre-tax impairment charge of approximately \$0.8 million related to the remaining balance of the investments.

In addition, approximately \$4.3 million of the \$4.5 million in the Company's total nonaccrual loans at March 31, 2009, related to a participation interest purchased from Silverton Bank. The collateral securing the loan was in the process of foreclosure or similar action at March 31, 2009. Subsequent to the end of the first quarter, we understand that the collateral had been seized, and, as a result, the Company transferred its interest in the loan participation to other real estate owned. We understand that the foreclosed property that had secured this loan and our participation interest is being held by the FDIC, as receiver of Silverton Bank. We currently cannot predict the effect of the receivership upon our interest in this foreclosed collateral and any proceeds that we may receive.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following discussion and analysis is designed to provide a better understanding of various factors related to the results of operations and financial condition of the Auburn National Bancorporation, Inc. (the Company) and its wholly-owned subsidiary, AuburnBank (the Bank). This discussion is intended to supplement and highlight information contained in the accompanying unaudited consolidated financial statements for the quarter ended March 31, 2009 and 2008, respectively.

Certain of the statements made herein under the caption MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS, and elsewhere, including information incorporated herein by reference to other documents, are forward-looking statements within the meaning of, and subject to, the protections of Section 27A of the Securities Act of 1933, as amended, (the Securities Act) and Section 21E of the Securities Exchange Act of 1934, as amended (the Exchange Act).

Forward-looking statements include statements with respect to our beliefs, plans, objectives, goals, expectations, anticipations, assumptions, estimates, intentions, and future performance, and involve known and unknown risks, uncertainties and other factors, which may be beyond our control, and which may cause our actual results, performance or achievements to be materially different from future results, performance or achievements expressed or implied by such forward-looking statements.

All statements other than statements of historical fact are statements that could be forward-looking statements. You can identify these forward-looking statements through our use of words such as may, will, anticipate, assume, should, desired, indicate, would, believe, contemplate, expect, seek, estimate, evaluate, continue, plan, point to, project, predict, could, intend, target, potential, and expressions of the future. These forward-looking statements may not be realized due to a variety of factors, including, without limitation:

- future economic, business and market conditions; domestic and foreign;
- government monetary and fiscal policies;
- legislative and regulatory changes, including changes in banking, securities and tax laws and regulations, and their application by governmental authorities;
- changes in accounting policies, rules and practices;
- the risks of changes in interest rates on the levels, composition and costs of deposits, loan demand, and the values and liquidity of loan collateral, securities and interest sensitive assets and liabilities;
- credit risks of borrowers;
- changes in the prices, values, sales volumes and liquidity of residential and commercial real estate, as well as securities;
- the failure of assumptions underlying the establishment of reserves for possible loan losses and other estimates;
- the effects of competition from a wide variety of local, regional, national and other providers of financial, investment, and insurance services;
- the risks of mergers, acquisitions and divestitures, including, without limitation, the related time and costs of effecting such transactions, integrating operations as part of these transactions and possible failures to achieve expected gains, revenue growth and/or expense savings from such transactions;
- changes in the availability and cost of credit and capital in the financial markets;
- changes in technology or products may be more difficult or costly, or less effective, than anticipated;
- the effects of war or other conflicts, acts of terrorism or other events that may affect general economic conditions and economic confidence; and
- other factors and information in this report and other filings that we make with the SEC under the Exchange Act, including our annual report on Form 10-K for the year ended December 31, 2008 and subsequent quarterly and current reports. See Part II, Item 1A, RISK FACTORS.

Table of Contents

All written or oral forward-looking statements that are made by or attributable to us are expressly qualified in their entirety by this cautionary notice. We have no obligation and do not undertake to update, revise or correct any of the forward-looking statements after the date of this report, or after the respective dates on which such statements otherwise are made.

Business

Auburn National Bancorporation, Inc. (the *Company*) is a one-bank holding company established in 1984, and incorporated under the laws of the State of Delaware. AuburnBank (the *Bank*), the *Company*'s principal subsidiary, is an Alabama state-chartered bank that is a member of the Federal Reserve System and has operated continuously since 1907. Both the *Company* and the *Bank* are headquartered in Auburn, Alabama. The *Bank* conducts its business in East Alabama, including Lee County and surrounding areas. The *Bank* operates full-service branches in Auburn, Opelika, Hurtsboro and Notasulga, Alabama. In-store branches are located in the Auburn and Opelika Kroger stores, as well as Wal-Mart SuperCenter stores in Auburn, Opelika and Phenix City, Alabama. Mortgage loan offices are located in Phenix City, Valley, and Mountain Brook, Alabama.

Summary of Results of Operations

<i>(In thousands, except per share amounts)</i>	Three Months Ended March 31	
	2009	2008
Net interest income (a)	\$ 4,884	\$ 4,642
Less: tax-equivalent adjustment	359	321
Net interest income (GAAP)	4,525	4,321
Noninterest income (loss)	(89)	1,373
Total revenue	4,436	5,694
Provision for loan losses	550	60
Noninterest expense	3,553	3,149
Income tax expense	87	634
Net earnings	246	1,851
Basic and diluted earnings per share	\$ 0.07	\$ 0.50

(a) Tax-equivalent. See Table 1 - Explanation of Non-GAAP Financial Measures .

Financial Summary

The *Company*'s net earnings were approximately \$246 thousand, or \$0.07 per share, for the first quarter of 2009, compared to \$1.9 million, or \$0.50 per share, for the first quarter of 2008.

Excluding the effects of non-operating items such as securities gains and other-than-temporary impairment charges, first quarter 2009 operating net earnings were approximately \$1.8 million, or \$0.51 per share, compared to first quarter 2008 operating net earnings of approximately \$1.8 million, or \$0.50 per share.

Net interest income (tax-equivalent) was approximately \$4.9 million for the first quarter of 2009, an increase of 5% from the first quarter of 2008 reflecting balance sheet growth. Average loans were up to \$372.7 million in the first quarter of 2009, an increase of \$42.9 million, or 13%, from the first quarter of 2008. Average deposits were up to \$580.9 million in the first quarter of 2009, an increase of 14% from the first quarter of 2008.

Edgar Filing: AUBURN NATIONAL BANCORPORATION INC - Form 10-Q

Although the Company's annualized net charge-off ratio increased to 0.45% in the first quarter of 2009 from 0.11% in the first quarter of 2008, the Company's credit quality continues to compare favorably to industry peers. Nonperforming assets declined on a linked-quarter basis. Nonperforming assets were 1.24% of total loans and foreclosed properties at March 31, 2009, compared to 1.29% at December 31, 2008. Approximately \$4.3 million of the \$4.7 million in nonperforming assets at March 31, 2009 is related to one purchased loan participation. Excluding the effects of this loan participation, nonperforming assets were only 0.09% of total

Table of Contents

loans and foreclosed properties. The provision for loan losses increased to \$550 thousand in the first quarter of 2009 compared with \$60 thousand in the first quarter of 2008. The increase in provision for loan losses reflects the credit risk associated with loan portfolio growth and an increase in net charge-offs.

Operating noninterest income (which excludes non-operating items mentioned below) was approximately \$2.0 million in the first quarter of 2009, an increase of \$0.7 million or 53% from the first quarter of 2008. This increase is largely due to an increase in mortgage lending income. Mortgage lending income was approximately \$1.3 million in the first quarter of 2009, an increase of approximately \$0.9 million from the first quarter of 2008.

Total noninterest income (loss) was a loss of \$89 thousand in the first quarter of 2009, compared to approximately \$1.4 million from the first quarter of 2008. Non-operating noninterest income in the first quarter of 2009 included a \$2.1 million net loss on securities. The net loss on securities was attributable to a non-cash other-than-temporary impairment charge of \$3.0 million, offset by a \$0.9 million gross gain on the sale of securities.

Noninterest expense was approximately \$3.6 million in the first quarter of 2009, an increase of approximately \$0.4 million, or 13%, from the first quarter of 2008. The increase was primarily related to increases in salaries and benefits expense and other noninterest expense.

In the first quarter of 2009, the Company paid cash dividends of \$693 thousand, or \$ 0.19 per share. The Company's balance sheet remains strong and well capitalized under regulatory guidelines with a Tier 1 risk-based capital ratio of 13.76% and a Tier 1 leverage ratio of 8.10% at March 31, 2009.

CRITICAL ACCOUNTING POLICIES

The accounting and financial reporting policies of the Company conform with U.S. generally accepted accounting principles and general practices within the banking industry. In connection with the application of those principles, we have made judgments and estimates which, in the case of the determination of our allowance for loan losses and fair value measurements, were critical to the determination of our financial position and results of operations. Critical accounting policies are defined as policies which are important to the portrayal of the Company's financial condition and results of operations, and that require management's most difficult, subjective or complex judgments. These estimates and judgments involve significant uncertainties, and are susceptible to change. If different conditions exist or occur - depending upon the magnitude of the changes; then our actual financial condition and financial results could differ significantly. For a more detailed discussion on these critical accounting policies, see **CRITICAL ACCOUNTING POLICIES** on pages 30-31 of the Company's annual report on Form 10-K for the year ended December 31, 2008.

Table of Contents**Average Balance Sheet and Interest Rates**

	Quarter ended March 31			
	2009		2008	
	Average	Yield/	Average	Yield/
<i>(Dollars in thousands)</i>	Balance	Rate	Balance	Rate
Loans and loans held for sale	\$ 377,560	5.74%	\$ 332,741	7.01%

NOW	86,417	0.98%	65,478	2.46%
Savings and money market	88,960	1.24%	127,208	2.29%
Certificates of deposits less than \$100,000	143,143	3.23%	90,937	5.34%
Certificates of deposits and other time deposits of \$100,000 or more	188,047	4.11%	157,737	4.43%
Total interest-bearing deposits	506,567	2.82%	441,360	3.71%
Short-term borrowings	12,799	0.51%	13,541	2.85%
Long-term debt	123,365	3.98%	116,581	4.32%
Total interest-bearing liabilities	642,731	3.00%	571,482	3.81%
Net interest income and margin	\$ 4,884	2.72%	\$ 4,642	2.85%

RESULTS OF OPERATIONS**Net Interest Income and Margin**

Tax-equivalent net interest income increased 5% in the first quarter of 2009 from the first quarter of 2008 as a result of balance sheet growth. Net interest margin decreased 13 basis points to 2.72%.

The tax-equivalent yield on total interest earning assets decreased 81 basis points in the first quarter of 2009 from the first quarter of 2008, to 5.37%. This decrease was driven by a 127 basis point decrease in the yield on loans and loans held for sale to 5.74% and a 22 basis point decrease in the tax-equivalent yield on total securities to 5.13%.

The cost of total interest-bearing liabilities decreased 81 basis points in the first quarter of 2009 from the first quarter of 2008, to 3.00%. This decrease was driven by an 89 basis point decrease in the cost of total interest-bearing deposits to 2.82%, a 234 basis point decrease in the cost of short-term borrowings to 0.51% and a 34 basis point decrease in the cost of long-term debt to 3.98%. The average federal funds rate during the first quarter of 2009 was 300 basis points lower than the average for the same period in 2008.

Noninterest Income (Loss)

Mortgage lending	1,330	470
Bank-owned life insurance	98	122
Securities (losses) gains, net	(2,123)	43
Other	303	427
Total noninterest income (loss)	\$ (89)	\$ 1,373

Table of Contents

The major components of noninterest income are service charges on deposit accounts, mortgage lending income, income from bank-owned life insurance, securities gains (losses), net, and other noninterest income.

Noninterest income decreased by approximately \$1.5 million in the first quarter of 2009 compared to the same period in 2008. The primary reason for the decrease was a net securities loss of \$2.1 million, offset by an increase in mortgage lending income of \$0.9 million. The net loss on securities was attributable to a non-cash other-than-temporary impairment charge of \$3.0 million, offset by a \$0.9 million gross gain on the sale of securities. Mortgage lending income typically fluctuates as mortgage interest rates change and is primarily attributable to increased volume in the origination and sale of new mortgage loans.

Noninterest Expense

<i>(In thousands)</i>	Quarter ended March 31	
	2009	2008
Salaries and benefits	\$ 2,049	\$ 1,853
Net occupancy and equipment	344	306
Professional fees	161	158
Other	999	832
Total noninterest expense	\$ 3,553	\$ 3,149

The major components of noninterest expense are salaries and benefits, net occupancy and equipment, professional fees, and other noninterest expense.

Noninterest expense increased 13%, or \$0.4 million in the first quarter of 2009 from the first quarter of 2008. The increase was primarily related to increases in salaries and benefits expense and other noninterest expense. Salaries and benefits expense increased primarily due to commissions paid to our mortgage originators as a result of increased origination volume. Other noninterest expense increased due to various factors, including an increase in FDIC insurance premiums, despite being assessed at the FDIC's lowest rate.

Income Tax Expense

The Company recognized income tax expense of \$87 thousand in the first quarter of 2009, compared to income tax expense of \$634 thousand in the first quarter of 2008. The decrease in income tax expense is largely due to a decrease in pre-tax earnings during the first quarter of 2009. The Company's effective tax rate for the first quarter of 2009 was 26.13%, compared to an effective tax rate of 25.51% for the first quarter of 2008. Despite an increase in tax-exempt interest income recognized as a percentage of pre-tax earnings during the first quarter of 2009, the Company's overall effective tax rate increased in the first quarter of 2009 due to the recognition of a valuation allowance related to a capital loss for income tax purposes on an investment in the common stock of Silverton Financial Services, Inc. The valuation allowance reduced the deferred tax asset created by the first quarter 2009 other-than-temporary impairment charge to an amount management believes will more-likely-than-not be realized.

BALANCE SHEET ANALYSIS**Securities**

Securities available-for-sale were \$358.4 million and \$302.7 million as of March 31, 2009 and December 31, 2008, respectively. The net unrealized loss on securities available-for-sale was \$1.4 million at March 31, 2009 compared to an unrealized net gain of \$1.0 million at December 31, 2008. Decreases in the fair value of securities available-for-sale during the first quarter of 2009 were primarily driven by changes in the values of trust preferred securities.

The average yield earned on total securities was 5.13% in the first quarter of 2009 and 5.35% in the first quarter of 2008.

Table of Contents**Loans**

	2009		2008		
	First	Fourth	Third	Second	First

<i>(In thousands)</i>					
Commercial, financial and agricultural	\$ 64,126	63,338	60,387	60,418	66,272
Leases - commercial	316	341	374	431	459
Real estate - construction:					
Commercial	3,088	3,019	4,056	7,549	8,706
Residential	9,634	10,151	14,194	12,891	9,574
Real estate - mortgage:					
Commercial	216,469	210,353	194,659	183,415	165,402
Residential	69,931	69,736	68,888	67,408	68,643
Consumer installment	10,871	12,481	12,649	13,480	12,317
Total loans	374,435	369,419	355,207	345,592	331,373
Less: unearned income	(250)	(257)	(299)	(284)	(290)
Loans, net of unearned income	\$ 374,185	369,162	354,908	345,308	331,083

Total loans, net of unearned income, were \$374.2 million as of March 31, 2009, an increase of \$5.0 million, or 1%, from \$369.2 million at December 31, 2008. Growth in commercial real estate mortgage loans was the primary driver of the increase. As of March 31, 2009, commercial real estate mortgage loans increased \$6.1 million from December 31, 2008.

Three loan categories represented the majority of the loan portfolio as of March 31, 2009. Commercial real estate mortgage loans represented 58%, residential real estate mortgage loans represented 19% and commercial, financial and agricultural loans represented 17% of the Bank's total loans at March 31, 2009.

The average yield earned on loans and loans held for sale was 5.74% in the first quarter of 2009 and 7.01% in the first quarter of 2008.

Allowance for Loan Losses

The Company maintains the allowance for loan losses at a level that management deems appropriate to adequately cover the probable losses in the loan portfolio. As of March 31, 2009 and December 31, 2008, respectively, the allowance for loan losses was \$4.5 million and \$4.4 million, which management deemed to be adequate at each of the respective dates. The judgments and estimates associated with the determination of the allowance for loan losses are described under **CRITICAL ACCOUNTING POLICIES** on pages 30-31 of the Company's annual report on Form 10-K for the year ended December 31, 2008.

A summary of the changes in the allowance for loan losses during the first quarter of 2009 and the previous four quarters are presented below.

	2009		2008

Ending balance	\$	4,532	4,398	4,226	4,049	4,074

Table of Contents

As noted in our critical accounting policies, management assesses the adequacy of the allowance prior to the end of each calendar quarter. This assessment includes procedures to estimate the allowance and test the adequacy and appropriateness of the resulting balance. The level of the allowance is based upon management's evaluation of the loan portfolios, past loan loss experience, known and inherent risks in the portfolio, adverse situations that may affect the borrower's ability to repay (including the timing of future payment), the estimated value of any underlying collateral, composition of the loan portfolio, economic conditions, industry and peer bank loan quality indications and other pertinent factors. This evaluation is inherently subjective as it requires various material estimates including the amounts and timing of future cash flows expected to be received on impaired loans that may be susceptible to significant change. The ratio of our allowance for loan losses to total loans outstanding was 1.21% at March 31, 2009, compared to 1.19% at December 31, 2008. In the future, the allowance to total loans outstanding ratio will increase or decrease to the extent the factors that influence our quarterly allowance assessment in their entirety either improve or weaken.

Provision for Loan Losses

The provision for loan losses represents a charge to earnings necessary to establish an allowance for loan losses that, in management's evaluation, should be adequate to provide coverage for the probable losses on outstanding loans. The provision for loan losses amounted to \$550 thousand and \$60 thousand for the quarter ended March 31, 2009 and 2008.

Based upon its evaluation of the loan portfolio, management believes the allowance for loan losses to be adequate to absorb our estimate of probable losses existing in the loan portfolio at March 31, 2009. An increase in net charge-offs and the credit risk associated with loan portfolio growth in the first quarter of 2009 compared to the first quarter of 2008 was the primary reason for the increased provision expense.

Based upon its assessment of the loan portfolio, management adjusts the allowance for loan losses to an amount it believes should be appropriate to adequately cover probable losses in the loan portfolio. While our policies and procedures used to estimate the allowance for loan losses, as well as the resultant provision for loan losses charged to operations, are considered adequate by management and are reviewed from time to time by our regulators, they are necessarily approximate. There exist factors beyond our control, such as general economic conditions both locally and nationally, which may negatively impact, materially, the adequacy of our allowance for loan losses and, thus, the resulting provision for loan losses.

Nonperforming Assets

The specific economic and credit risks associated with our loan portfolio include, but are not limited to, a general downturn in the economy which could affect employment rates in our market areas, general real estate market conditions, including values, nondistressed sales volumes, availability and costs of credit in the markets, generally, interest rate fluctuations, deteriorated or non-existent collateral, title defects, inaccurate appraisals, financial deterioration of borrowers, fraud, and possible violations of laws and regulations.

The Company discontinues the accrual of interest income when (1) there is a significant deterioration in the financial condition of the borrower and full repayment of principal and interest is not expected or (2) the principal or interest is more than 90 days past due, unless the loan is both well-secured and in the process of collection. At March 31, 2009, the Company had \$4.5 million in loans on nonaccrual, compared to \$4.4 million at December 31, 2008. This included approximately \$4.3 million in participation interests purchased from Silverton Bank.

The Company owned \$113 thousand in residential real estate as other real estate owned, which we had acquired from borrowers at March 31, 2009, compared to \$324 thousand at December 31, 2008.

The Company had \$56 thousand in loans 90 days past due and still accruing interest at March 31, 2009 compared to \$104 thousand at December 31, 2008. At March 31, 2009 and at December 31, 2008, no loans were deemed to be restructured loans.

Table of Contents

The table below provides information concerning nonperforming assets and certain asset quality ratios.

<i>(In thousands)</i>	2009		2008		
	First Quarter	Fourth Quarter	Third Quarter	Second Quarter	First Quarter
Nonperforming assets:					
Nonaccrual loans	\$ 4,537	4,431	4,721	4,926	4,631
Other nonperforming assets (primarily other real estate owned)	113	324	594	422	421
Total nonperforming assets	\$ 4,650	4,755	5,315	5,348	5,052
as a % of loans and foreclosed properties	1.24%	1.29	1.50	1.55	1.52
as a % of total assets	0.58%	0.64	0.72	0.73	0.69
Nonaccrual loans as a % of loans	1.21%	1.20	1.33	1.43	1.40
Accruing loans 90 days or more past due	\$ 56	104			

Potential problem assets, which are not included in nonperforming assets, amounted to \$5.3 million, or 1.4% of total loans outstanding, net of unearned income at March 31, 2009, compared to \$3.9 million, or 1.1% of total loans outstanding, net of unearned income at December 31, 2008. Potential problem assets represent those assets with a well-defined weakness and where information about possible credit problems of borrowers has caused management to have serious doubts about the borrower's ability to comply with present repayment terms.

Deposits

Total deposits were \$609.2 million and \$550.8 million at March 31, 2009 and December 31, 2008, respectively. The increase of \$58.4 million in total deposits from December 31, 2008 was largely due to increases in money market accounts and CDs and other time deposits. Money market accounts increased \$7.6 million, or 11%, CDs and other time deposits less than \$100,000 increased \$7.9 million or 8%, and CDs and other time deposits of \$100,000 or more increased \$39.0 million or 19%, respectively, from December 31, 2008. These changes reflect decreases in interest rates, and related shifts as depositors sought more yield in a low interest rate environment.

The average rate paid on total interest-bearing deposits was 2.82% in the first quarter of 2009 and 3.71% in the first quarter of 2008.

Noninterest bearing deposits were 13% and 14% of total deposits as of March 31, 2009 and December 31, 2008, respectively.

Other Borrowings

Other borrowings consist of short-term borrowings and long-term debt. Short-term borrowings consist of federal funds purchased, securities sold under agreements to repurchase, and other short-term borrowings. The Bank had available federal funds lines totaling \$46.0 million with none outstanding at March 31, 2009, compared to \$44.0 million with none outstanding at December 31, 2008. Securities sold under agreements to repurchase totaled \$11.4 million at March 31, 2009, compared to \$10.9 million at December 31, 2008.

The average rate paid on short-term borrowings was 0.51% in the first quarter of 2009 and 2.85% in the first quarter of 2008.

Long-term debt included FHLB advances with an original maturity greater than one year, securities sold under agreements to repurchase with an original maturity greater than one year, and subordinated debentures related to trust preferred securities. The Bank had \$91.2 million in long-term FHLB advances at

Table of Contents

March 31, 2009 and December 31, 2008, respectively. The Bank had \$25.0 million in securities sold under agreements to repurchase with an original maturity greater than one year, and the Company had \$7.2 million in junior subordinated debentures related to trust preferred securities outstanding at March 31, 2009 and December 31, 2008, respectively.

The average rate paid on long-term debt was 3.98% in the first quarter of 2009 and 4.32% in the first quarter of 2008.

CAPITAL ADEQUACY

The Company's consolidated stockholders' equity was \$55.2 million and \$57.1 million as of March 31, 2009 and December 31, 2008, respectively. The decrease from December 31, 2008 is primarily driven by an other comprehensive loss due to the change in unrealized gains (losses) on securities available-for-sale of \$1.5 million and cash dividends paid of approximately \$0.7 million.

The Company's Tier 1 leverage ratio was 8.10%, Tier 1 risk-based capital ratio was 13.76% and Total risk-based capital ratio was 14.74% at March 31, 2009. These ratios exceed the minimum regulatory capital percentages of 4.0% for Tier 1 leverage ratio, 4.0% for Tier 1 risk-based capital ratio and 8.0% for Total risk-based capital ratio. Based on current regulatory standards, the Company is classified as well capitalized.

MARKET AND LIQUIDITY RISK MANAGEMENT

Management's objective is to manage assets and liabilities to provide a satisfactory, consistent level of profitability within the framework of established liquidity, loan, investment, borrowing, and capital policies. The Bank's Asset Liability Management Committee (ALCO) is charged with the responsibility of monitoring these policies, which are designed to ensure acceptable composition of asset/liability mix. Two critical areas of focus for ALCO are interest rate sensitivity and liquidity risk management.

Interest Rate Sensitivity Management

In the normal course of business, the Company is exposed to market risk arising from fluctuations in interest rates. ALCO measures and evaluates interest rate risk so that the Bank can meet customer demands for various types of loans and deposits. Measurements used to help manage interest rate sensitivity include an earnings simulation model and an economic value of equity model.

Management believes that interest rate risk is best estimated by our earnings simulation modeling. Forecasted levels of earning assets, interest-bearing liabilities, and off-balance sheet financial instruments are combined with ALCO forecasts of market interest rates for the next 12 months and are combined with other factors in order to produce various earnings simulations and estimates. To limit interest rate risk, we have guidelines for earnings at risk which seek to limit the variance of net interest income to less than a 10 percent decline for a 200 basis point change up or down in rates from management's flat interest rate forecast over the next twelve months. The results of our current simulation model would indicate that we are in compliance with our current guidelines at March 31, 2009.

Economic value of equity measures the extent that estimated economic values of our assets, liabilities and off-balance sheet items will change as a result of interest rate changes. Economic values are estimated by discounting expected cash flows from assets, liabilities and off-balance sheet items, which establishes a base case economic value of equity. To help limit interest rate risk, we have a guideline stating that for a 200 basis point instantaneous change in interest rates up or down, the economic value of equity should not decrease by more than 30 percent. The results of our current economic value of equity model would indicate that we are in compliance with our current guidelines at March 31, 2009.

Each of the above analyses may not, on its own, be an accurate indicator of how our net interest income will be affected by changes in interest rates. Income associated with interest-earning assets and costs associated

Table of Contents

with interest-bearing liabilities may not be affected uniformly by changes in interest rates. In addition, the magnitude and duration of changes in interest rates may have a significant impact on net interest income. For example, although certain assets and liabilities may have similar maturities or periods of repricing, they may react in different degrees to changes in market interest rates, and other economic and market factors. Interest rates on certain types of assets and liabilities fluctuate in advance of changes in general market rates, while interest rates on other types may lag behind changes in general market rates. In addition, certain assets, such as adjustable rate mortgage loans, have features (generally referred to as interest rate caps and floors) which limit changes in interest rates. Prepayment and early withdrawal levels also could deviate significantly from those assumed in calculating the maturity of certain instruments. The ability of many borrowers to service their debts also may decrease during periods of rising interest rates or economic stress, which may differ across industries and economic sectors. ALCO reviews each of the above interest rate sensitivity analyses along with several different interest rate scenarios in seeking satisfactory, consistent levels of profitability within the framework of the Company's established liquidity, loan, investment, borrowing, and capital policies.

The Company may also use derivative financial instruments to improve the balance between interest-sensitive assets and interest-sensitive liabilities and as one tool to manage interest rate sensitivity while continuing to meet the credit and deposit needs of our customers. From time to time, the Company may enter into interest rate swaps (swaps) to facilitate customer transactions and meet their financing needs. These swaps qualify as derivatives, but are not designated as hedging instruments. At March 31, 2009 and December 31, 2008, the Company had no derivative contracts to assist in managing interest rate sensitivity.

Liquidity Risk Management

Liquidity is the Company's ability to convert assets into cash equivalents in order to meet daily cash flow requirements, primarily for deposit withdrawals, loan demand and maturing obligations. Without proper management of its liquidity, the Company could experience higher costs of obtaining funds due to insufficient liquidity, while excessive liquidity can lead to a decline in earnings due to the cost of foregoing alternative higher-yielding investment opportunities.

Liquidity is managed at two levels. The first is the liquidity of the Company. The second is the liquidity of the Bank. The management of liquidity at both levels is essential, because the Company and the Bank have different funding needs and sources, and each are subject to regulatory guidelines and requirements.

The primary source of funding and the primary source of liquidity for the Company includes dividends received from the Bank, and secondarily proceeds from the issuance of common stock or other securities. Primary uses of funds for the Company include dividends paid to shareholders, stock repurchases, and interest payments on junior subordinated debentures issued by the Company in connection with trust preferred securities. The junior subordinated debentures are presented as long-term debt in the Consolidated Balance Sheets and the related trust preferred securities are includible in Tier 1 Capital for regulatory capital purposes.

Primary sources of funding for the Bank include customer deposits, other borrowings, repayment and maturity of securities, sales of securities, and sale and repayment of loans. The Bank has access to federal funds lines from various banks and borrowings from the Federal Reserve discount window. In addition to these sources, the Bank has participated in the FHLB's advance program to obtain funding for its growth. Advances include both fixed and variable terms and are taken out with varying maturities. As of March 31, 2009, the Bank had an available line of credit with the FHLB totaling \$240.1 million with \$91.2 million outstanding. As of March 31, 2009, the Bank also had \$46.0 million of federal funds lines with none outstanding. Primary uses of funds include repayment of maturing obligations and growing the loan portfolio.

Management believes that the Company and the Bank have adequate sources of liquidity to meet all known contractual obligations and unfunded commitments, including loan commitments and reasonable borrower, depositor, and creditor requirements over the next twelve months.

Table of Contents

Off-Balance Sheet Arrangements

At March 31, 2009, the Bank had outstanding standby letters of credit of \$8.1 million and unfunded loan commitments outstanding of \$42.1 million. Because these commitments generally have fixed expiration dates and many will expire without being drawn upon, the total commitment level does not necessarily represent future cash requirements. If needed to fund these outstanding commitments, the Bank has the ability to liquidate federal funds sold or securities available-for-sale, or draw on its available credit facilities.

Effects of Inflation and Changing Prices

Virtually all of the assets and liabilities of the Company are monetary in nature. As a result, interest rates have a more significant effect on the Company's performance than the effects of general levels of inflation. Interest rates do not necessarily move in the same direction or with the same magnitude as the price of goods and services because such prices are affected by inflation. In the current interest rate environment, liquidity and the maturity structure of the Company's assets and liabilities are critical to the maintenance of desired performance levels.

RECENT ACCOUNTING PRONOUNCEMENTS

In December 2007, the FASB issued SFAS No. 141R, *Business Combinations*. SFAS No. 141R clarifies the definitions of both a business combination and a business. All business combinations will be accounted for under the acquisition method (previously referred to as the purchase method). This standard defines the acquisition date as the only relevant date for recognition and measurement of the fair value of consideration paid. SFAS No. 141R requires the acquirer to expense all acquisition related costs. SFAS No. 141R will also require acquired loans to be recorded net of the allowance for loan losses on the date of acquisition. SFAS No. 141R defines the measurement period as the time after the acquisition date during which the acquirer may make adjustments to the provisional amounts recognized at the acquisition date. This period cannot exceed one year, and any subsequent adjustments made to provisional amounts are done retrospectively and restate prior period data. The provisions of this statement are effective for business combinations during fiscal years beginning after December 15, 2008. Adoption of SFAS No. 141R did not have a significant impact on the consolidated financial statements of the Company.

In December 2007, the FASB issued SFAS No. 160, *Noncontrolling Interests in Consolidated Financial Statements - An Amendment of ARB No. 51*. SFAS No. 160 requires noncontrolling interests to be treated as a separate component of equity, not as a liability or other item outside of equity. Disclosure requirements include net income and comprehensive income to be displayed for both the controlling and noncontrolling interests and a separate schedule that shows the effects of any transactions with the noncontrolling interests on the equity attributable to the controlling interest. The provisions of this statement are effective for fiscal years beginning after December 15, 2008. Adoption of SFAS No. 160 did not have a significant impact on the consolidated financial statements of the Company.

In March 2008, the FASB issued SFAS No. 161, *Disclosures about Derivative Instruments and Hedging Activities*. SFAS No. 161, which amends FASB Statement No. 133, *Accounting for Derivative Instruments and Hedging Activities*, requires companies with derivative instruments to disclose information about how and why a company uses derivative instruments, how derivative instruments and related hedge items are accounted for under Statement 133, and how derivative instruments and related hedged items affect a company's financial position, financial performance, and cash flows. The required disclosures include the fair value of the derivative instruments and their gains or losses in tabular format, information about credit-risk-related contingent features in derivative agreements, counterparty credit risk, and the company's strategies and objectives for using derivative instruments. The Statement expands the current disclosure framework in SFAS No. 133. SFAS No. 161 is effective prospectively for periods beginning on or after November 15, 2008. SFAS No. 161 will impact disclosures only and will not have a significant impact on the consolidated financial statements of the Company.

Table of Contents

In April 2009, the FASB issued FSP FAS 115-2 which replaces the intent and ability to hold to recovery indicator of other-than-temporary impairment in FASB Staff Position No. FAS 115-1 and 124-1, *The Meaning of Other-Than-Temporary Impairment and Its Application to Certain Investments* (FSP FAS 115-1) for debt securities. FSP FAS 115-2 specifies that for a debt security not to be considered other-than-temporarily impaired, an entity's management must assert that it does not intend to sell the security and that it is not more-likely-than-not that the entity will have to sell the security prior to recovery of its cost basis. FSP FAS 115-2 requires that for impaired held-to-maturity and available-for-sale debt securities that an entity does not intend to sell and that it is not more-likely-than-not that it will have to sell prior to recovery but for which credit losses exist, the other-than-temporary impairment should be separated between the total impairment related to credit losses, which should be recognized in current earnings, and the amount of impairment related to all other factors, which should be recognized in other comprehensive income. FSP FAS 115-2 discusses the proper interaction of its guidance with other authoritative guidance, including FSP FAS 115-1, which provide additional factors that must be considered in an other-than-temporary impairment analysis. FSP FAS 115-2 also provides that in periods in which other-than-temporary impairments are recognized, the total impairment must be presented in the investor's income statement with an offset for the amount of total impairment that is recognized in other comprehensive income. FSP FAS 115-2 requires additional disclosures including a rollforward of amounts recognized in earnings for debt securities for which an other-than-temporary impairment has been recognized and the noncredit portion of the other-than-temporary impairment that has been recognized in other comprehensive income. The provisions of this FSP are effective in second quarter 2009; however, as permitted under the pronouncement, we early adopted on January 1, 2009. No adjustment was made to the beginning balance of retained earnings. The Company applied the guidance of FSP FAS 115-2 when assessing debt securities for other-than-temporary impairment as of March 31, 2009. For more information on the effects of adoption, refer to Footnote 4 of the Condensed Consolidated Financial statements.

In April 2009, the FASB issued FSP FAS 157-4 which provides factors that an entity should consider when determining whether a market for an asset is not active. If after evaluating the relevant factors, the evidence indicates that a market is not active, FSP FAS 157-4 provides an additional list of factors that an entity must consider when determining whether events and circumstances indicate that a transaction which occurred in such inactive market is orderly. FSP FAS 157-4 requires that entities place more weight on observable transactions determined to be orderly and less weight on transactions for which there is insufficient information to determine whether the transaction is orderly when determining the fair value of an asset or liability under Statement of Financial Accounting Standards No. 157, *Fair Value Measurements* (SFAS No. 157). FSP FAS 157-4 requires enhanced disclosures, including disclosure of a change in valuation technique which results from its application and disclosure of fair value measurements for debt and equity securities by major security types. The provisions of this FSP are effective in second quarter 2009; however, as permitted under the pronouncement, we early adopted in first quarter 2009. The Company applied the guidance of FSP FAS 157-4 in its fair value measurements as of March 31, 2009 and the effects of adoption were not significant.

In April 2009, the FASB issued FASB Staff Position No. FAS 107-1 and APB 28-1, *Interim Disclosures about Fair Value of Financial Instruments* (FSP FAS 107-1). FSP FAS 107-1 amends Statement of Financial Accounting Standards No. 107, *Disclosures about Fair Value of Financial Instruments* (SFAS No. 107) to require disclosures about fair value of financial instruments in interim financial statements. FSP FAS 107-1 requires that disclosures be included in both interim and annual financial statements of the methods and significant assumptions used to estimate the fair value of financial instruments. FSP FAS 107-1 is effective for periods ending after June 15, 2009, with comparative disclosures required only for periods ending subsequent to initial adoption. The Company is currently assessing the effects of adopting FSP FAS 107-1.

Table of Contents**Table 1 Explanation of Non-GAAP Financial Measures**

This quarterly report on Form 10-Q contains financial information determined by methods other than Generally Accepted Accounting Principles (GAAP). The table below provides reconciliations between GAAP net earnings and operating net earnings, which exclude gains or losses on items deemed not to reflect core operations. Management uses these non-GAAP financial measures in its analysis of the Company's performance and believes presentations of operating financial measures provide useful supplemental information, a clearer understanding of the Company's performance, and better reflect the Company's core operating activities. Management utilizes non-GAAP measures in the calculation of certain of the Company's ratios, in particular, to analyze on a consistent basis over time the performance of what it considers to be its core operations.

The Company believes the non-GAAP measures enhance investors' understanding of the Company's business and performance. These measures are also useful in understanding performance trends and facilitate comparisons with the performance of other financial institutions. The limitations associated with operating measures are the risk that persons might disagree as to the appropriateness of items comprising these measures and that different companies might calculate these measures differently. Management compensates for these limitations by providing detailed reconciliations between GAAP and operating measures. These disclosures should not be considered an alternative to GAAP.

Reconciliation of GAAP to non-GAAP Measures (unaudited):

	2009 First Quarter	Fourth Quarter	2008 Third Quarter	2008 Second Quarter	2008 First Quarter
<i>(Dollars in thousands, except per share amounts)</i>

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

The information called for by ITEM 3 is set forth in ITEM 2 under the caption MARKET AND LIQUIDITY RISK MANAGEMENT and is incorporated herein by reference.

ITEM 4T. CONTROLS AND PROCEDURES

As of March 31, 2009, an evaluation was performed under the supervision and with the participation of the Company's management, including the Chief Executive Officer and the Principal Financial and Accounting Officer, of the effectiveness of the Company's disclosure controls and procedures. In making this assessment, management has assessed the effectiveness of the Company's internal control over financial reporting as of March 31, 2009 in accordance with the criteria established in Internal Control - Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). Based on that evaluation, the Company's management, including the Chief Executive Officer and Principal Financial and Accounting Officer, concluded that the Company's disclosure controls and procedures were effective, in all material respects, to provide reasonable assurance that information required to be disclosed in the Company's reports under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and regulations, and that such information is accumulated and communicated to the Company's management, including the Chief Executive Officer and the Principal Financial and Accounting Officer, as appropriate, to allow timely decisions regarding disclosure.

During the period covered by this report, there has not been any change in the Company's internal controls over financial reporting that has materially affected, or is reasonably likely to materially affect, the Company's internal controls over financial reporting.

Table of Contents**PART II. OTHER INFORMATION****ITEM 1. LEGAL PROCEEDINGS**

In the normal course of business, the Company and the Bank from time to time are involved in legal proceedings. The Company and Bank management believe there are no pending or threatened legal, governmental, or regulatory proceedings that upon resolution are expected to have a material adverse effect upon the Company's or the Bank's financial condition or results of operations. See also, Part I, Item 3 of the Company's annual report on Form 10-K for the year ended December 31, 2008.

ITEM 1A. RISK FACTORS

In addition to the other information set forth in this report, you should carefully consider the factors discussed in Part I Item 1A. Risk Factors in our Annual Report on Form 10-K for the year ended December 31, 2008, which could materially affect our business, financial condition or future results. The risks described in our annual report on Form 10-K are not only the risks facing our Company. Additional risks and uncertainties not currently known to us or that we currently deem to be immaterial also may materially adversely affect our business, financial condition and/or operating results in the future.
