Agrium remains committed and will consider all options, including nominating a slate of directors to the CF board and litigation, if a resounding majority tender to our offer and CF refuses to act

Summary of Key Arguments

CF should support its stockholders receiving a premium vs. pursuing a transaction that is dilutive to value

Agrium's offer represents a 101% premium to CF's Jan 15 share price and a 71% premium to CF's Feb 24 share price

Fertilizer peers are up only 45% and 35% since Jan 15 and Feb 24, respectively

CF stockholders stand to lose substantial value if CF acquires Terra

CF stockholders have far greater upside potential with Agrium offer

CF disregarding stockholder interests

Clear stockholder mandate: CF told RiskMetrics they would engage, but haven't

Evolution of Terra offer has been repeatedly designed to circumvent a CF stockholder vote

CF board should exercise good corporate governance and allow its stockholders a voice on Agrium's offer

CF stockholders must send a clear message to the CF board and tender into this offer at this price

Agrium has made an unambiguous offer to preclude misinterpretation by CF

Nitrogen and phosphate prices have declined approximately 14% and 13%, respectively

(1)

, since the day before our offer (February 24)

CF is experiencing reduced Forward Pricing Program (FPP) sales (many such FPP sales booked in 2008) which, along with \$85 million in gas hedging gains, inflated CF 's year-to-date results

CF 's customers recognize the economic shift occurring in the market and are no longer willing to buy under CF 's FPP

CF conference call: We continue to offer products through the FPP at prices that reflect our future expectation for nitrogen prices and margins, but we haven't found much recent customer interest in committing at those prices.

CF's Own Analysis Highlights Risk of

(1)

At

this

a

for
Terra

A \$29 stock price implies an equity value of \$2.9 billion and enterprise value of \$2.4 billion for Terra on a standalone basis

Using CF's estimate of \$525 million consolidated 2010E EBITDA (based on median equity research analyst estimates), Terra would be trading at 4.5x EV / 2010E Consolidated EBITDA on a standalone, unaffected basis

This is consistent with Terra's 12 month average forward multiple to Jan 15

Remember that CF has consistently traded at a discount to Terra on an unaffected basis

Merger

CF's

Terra's

Giving full credit for estimated synergies of \$120 million (mid-point of CF's estimate \$105 million to \$135 million, without risk adjustment), represents \$0.5 billion, capitalized at Terra's forward trading multiple of 4.5x

CF's Own Analysis Highlights Risk of Reducing Stockholder Value

The premium CF is proposing to pay for Terra is significantly greater than the value of capitalized synergies, thereby diluting implied trading price

(2)

In our April 12 analysis, we concluded that there were at least some question regarding the seriousness of the Agrium offer, and that the then-prevailing offer value was not sufficiently compelling, and as such the burden did not shift to the CF board to justify rejection of Agrium's offer. Two months later, we conclude that Agrium has adequately proven its bona fides as a serious bidder and that the deal value is within the range of reasonableness such that the burden now shifts to the CF board to justify
