Agrium remains committed and will consider all options, including nominating a slate of directors to the CF board and litigation, if a resounding majority tender to our offer and CF refuses to act Summary of Key Arguments

CF should support its stockholders receiving a premium vs. pursuing a transaction that is dilutive to value

Agrium s offer represents a 101% premium to CF s Jan 15 share price and a 71% premium to CF s Feb 24 share price

Fertilizer peers are up only 45% and 35% since Jan 15 and Feb 24, respectively

CF stockholders stand to lose substantial value if CF acquires Terra

CF stockholders have far greater upside potential with Agrium offer

CF disregarding stockholder interests

Clear stockholder mandate: CF told RiskMetrics they would engage, but haven t

Evolution of Terra offer has been repeatedly designed to circumvent a CF stockholder vote

CF board should exercise good corporate governance and allow its stockholders a voice on Agrium s offer

CF stockholders must send a clear message to the CF board and tender into this offer at this price

Agrium has made an unambiguous offer to preclude misinterpretation by CF

Fundamentals of Growth 17 CF s Own Analysis Highlights Risk of Diluting Stockholder Value

CF states that its current proposal for Terra represents a 40% premium to Terra s estimated unaffected stock price (1)

At a \$40

stock price will likely revert back to unaffected levels. If CF were successful in acquiring Terra, the value of the combined entity would be equal to the standalone value of CF and Terra plus synergies CF s offer for Terra implies an enterprise value of \$3.5 billion \$1.1 billion more than CF s estimate of Terra s standalone unaffected value Giving full credit for estimated synergies of \$120 million (mid-point of CF s estimate \$105 million to \$135 million, without risk adjustment), represents \$0.5 billion, capitalized at Terra s forward trading multiple of 4.5x Net of potential synergies, CF

has proposed to pay \$0.7 billion more than CF s estimate of what Terra is worth in the public markets more than \$11 per share of CF

Fundamentals of Growth 30 RiskMetrics Should Endorse Agrium s Offer

Agrium has made this best and final offer to provide clarity that this is a referendum on completing this deal at this price, not a referendum on engagement

Fully-financed

All Canadian regulatory issues satisfied, re-filed with FTC as required under HSR

We are prepared to immediately execute a binding merger agreement, subject to limited confirmatory due diligence (exactly the same as CF s offer for Terra)

At

the annual meeting, CF shareholders appeared to indicate that they trusted the CF board to do the right thing. We would hope that, depending on the tender offer results, the CF board would continue to deserve such trust. (RiskMetrics, June 16, 2009) In our April 12 analysis, we concluded that there were at least some question regarding the seriousness of the Agrium offer, a that the then-prevailing offer value was not sufficiently compelling, and as such the burden did not shift to the CF board to just rejection of Agrium s offer. Two months later, we conclude that Agrium has adequately proven is bona fides as a serious bidd and that the deal value is within the range of reasonableness such that the burden now shifts to the **CF** board to justify
