**Item 7.01. Regulation FD Disclosure.**

On December 2, 2009, American Savings Bank, F.S.B. (ASB) issued a news release, American Savings Bank Sells Securities to Reduce Risk. A copy of the news release is attached hereto as Exhibit 99 and incorporated by reference into this Item 7.01.

**Item 8.01. Other Events.**

To further improve its credit risk profile and reduce the potential volatility of future earnings by eliminating its exposure to private-issue mortgage-related securities (PMRS), and in light of the improvement in the fixed-income securities markets, ASB sold all but \$0.6 million of the PMRS held in its investment portfolio in November and December 2009. Sales of the available-for-sale PMRS with a book value of \$225 million and a weighted average yield of 5.19% (as of October 31, 2009) were made to various broker/dealers. The PMRS sold were backed by mortgages throughout the mainland U.S. The sales will result in an after-tax charge to net income of \$19 million (\$32 million pre-tax) in the fourth quarter of 2009, which amount was previously recognized as a reduction to equity as a result of mark-to-market charges to other comprehensive income in earlier periods. As of September 30, 2009, ASB had disclosed unrealized pre-tax losses of \$32 million on its PMRS portfolio.

A portion of the proceeds from the sales were used to prepay \$40 million of Advances from Federal Home Loan Bank with a weighted average rate of 2.64% and a weighted average maturity of approximately 0.8 years (as of October 31, 2009). ASB incurred an after-tax loss of \$0.4 million (\$0.7 million pre-tax) related to this early extinguishment of debt. ASB expects to use the remaining proceeds from the sale of the PMRS to pay down high costing liabilities (maturing certificates of deposit and/or wholesale borrowings), to fund loan growth and/or to reinvest in securities with low credit risk and high liquidity, such as government or agency notes and mortgage-related securities.

As of September 30, 2009, ASB's core leverage and total risk-based capital ratios were 9.1% and 13.2%, respectively, and ASB was well-capitalized. The sale of the PMRS does not affect ASB's well-capitalized status or materially affect its capital ratios.

In 2009 to date, ASB has paid dividends of \$50.1 million to HEI. As a result of the loss incurred on the sale of its PMRS in the fourth quarter, ASB does not expect to pay a dividend to HEI in the first quarter of 2010, but expects to resume its dividend payments in the second quarter of 2010. The Office of Thrift Supervision has approved ASB's payment of quarterly dividends through the quarter ended September 30, 2010 to the extent that payment of dividends would not cause ASB's leverage and total risk-based capital ratios to fall below 8% and 12%, respectively, as of the end of the applicable quarter.
