**NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS**

**For the Three and Nine Month Periods Ended June 30, 2010**

**(Unaudited)**

*Unless the context otherwise requires, we , us , our , RockTenn and the Company refer to the business of Rock-Tenn Company, its wholly-owned subsidiaries and its partially-owned consolidated subsidiaries. Our references to the business of Rock-Tenn Company do not include entities that we do not consolidate.*

We are primarily a manufacturer of packaging products, recycled paperboard, containerboard, bleached paperboard and merchandising displays.

**Note 1. Interim Financial Statements**

Our independent public accounting firm has not audited our accompanying interim financial statements. We derived the Condensed Consolidated Balance Sheet at September 30, 2009 from the audited Consolidated Financial Statements included in our Annual Report on Form 10-K for the fiscal year ended September 30, 2009 (the **Fiscal 2009 Form 10-K** ). In the opinion of our management, the Condensed Consolidated Financial Statements reflect all adjustments, which are of a normal recurring nature, necessary for a fair presentation of our results of operations for the three and nine months ended June 30, 2010 and 2009, our financial position at June 30, 2010 and September 30, 2009, and our cash flows for the nine months ended June 30, 2010 and 2009.

We have condensed or omitted certain notes and other information from the interim financial statements presented in this Quarterly Report on Form 10-Q. Therefore, these interim statements should be read in conjunction with our Fiscal 2009 Form 10-K.

The results for the three and nine months ended June 30, 2010 are not necessarily indicative of results that may be expected for the full year.

**Note 2. New Accounting Standards**

*Recently Adopted Standards*

In June 2008, the Financial Accounting Standards Board ( **FASB** ) issued certain provisions of Accounting Standards Codification ( **ASC** ) 260, *Earnings per Share* , which state that unvested share-based payment awards that contain nonforfeitable rights to dividends or dividend equivalents (whether paid or unpaid) are participating securities and are to be included in the computation of earnings per share under the two-class method as described in ASC 260. These provisions were effective for fiscal years beginning after December 15, 2008 (October 1, 2009 for us) with early adoption prohibited. These provisions required all prior-period earnings per share data presented herein to be adjusted. We adopted ASC 260, as of October 1, 2009. See **Note 4. Earnings per Share** to our Condensed Consolidated Financial Statements.

In December 2007, the FASB issued ASC 805, *Business Combinations* . ASC 805 expands the definition of a business combination and requires the fair value of the purchase price of an acquisition, including the issuance of equity securities, to be determined on the acquisition date. ASC 805 also requires that all assets, liabilities, contingent considerations, and, under certain circumstances, contingencies of an acquired business be recorded at fair value at the acquisition date. In addition, ASC 805 requires that acquisition costs generally be expensed as incurred, restructuring costs generally be expensed in periods subsequent to the acquisition date, and changes in deferred tax asset valuation allowances and acquired income tax uncertainties after the measurement period impact income tax expense. ASC 805 was effective for fiscal years beginning after December 15, 2008 (October 1, 2009 for us) with early adoption prohibited. We adopted ASC 805 as of October 1, 2009. The effect the implementation of ASC 805 will have on our consolidated financial statements will depend upon the facts and circumstances of future acquisitions.

**Table of Contents****Notes to Condensed Consolidated Financial Statements (Unaudited) (Continued)**

In December 2007, the FASB issued certain provisions of ASC 810, *Consolidation*, which change the accounting and reporting for minority interests such that minority interests generally are recharacterized as noncontrolling interests and are required to be reported as a component of equity, unless such interests are subject to redemption outside the control of Rock-Tenn Company. Additionally, ASC 810 requires that purchases or sales of subsidiaries' equity interests that do not result in a change in control be accounted for as equity transactions and, upon a loss of control, requires the interest sold, as well as any interest retained, to be recorded at fair value with any gain or loss recognized in earnings. These provisions were effective for fiscal years beginning on or after December 15, 2008 (October 1, 2009 for us) with early adoption prohibited. We adopted these provisions of ASC 810 as of October 1, 2009 and have revised our Condensed Consolidated Financial Statements and related Notes accordingly.

In February 2008, the FASB amended certain provisions of ASC 820, *Fair Value Measurements and Disclosures* that deferred the effective date of ASC 820 for all non-financial assets and non-financial liabilities, except those that are recognized or disclosed at fair value in the financial statements on a recurring basis (that is, at least annually), until fiscal years beginning after November 15, 2008 (October 1, 2009 for us). We adopted the specific provisions related to nonrecurring non-financial assets and non-financial liabilities as of October 1, 2009. The adoption of these provisions did not have a material effect on our consolidated financial statements.

**Recently Issued Standards**

In June 2009, the FASB issued certain provisions of ASC 860 *Transfers and Servicing*. These provisions require additional disclosures about the transfer and derecognition of financial assets and eliminate the concept of qualifying special-purpose entities. These provisions are effective for fiscal years beginning after November 15, 2009 (October 1, 2010 for us). We are currently evaluating the effect of adopting these provisions of ASC 860 on our consolidated financial statements.

In June 2009, the FASB issued certain provisions of ASC 810 which revise the approach to determining the primary beneficiary of a variable interest entity to be more qualitative in nature and require companies to more frequently reassess whether they must consolidate a variable interest entity. These provisions are effective for fiscal years beginning after November 15, 2009 (October 1, 2010 for us), for interim periods within that first annual reporting period and for interim and annual reporting periods thereafter. We are currently evaluating the effect of these provisions of ASC 810 on our consolidated financial statements.

Comprehensive income attributable to Rock-Tenn Company shareholders	\$ 39.8	\$ 102.0	\$ 149.0	\$ 134.3

## Edgar Filing: Rock-Tenn CO - Form 10-Q

The net of tax components of comprehensive income were determined using effective tax rates of approximately 39% for the three and nine month periods ended June 30, 2010 and 2009. The change in other comprehensive income due to foreign currency translation was primarily due to the change in the Canadian/U.S. dollar exchange rates.

**Table of Contents****Notes to Condensed Consolidated Financial Statements (Unaudited) (Continued)****Equity**

(1) Excludes amounts related to contingently redeemable noncontrolling interests which are separately classified outside of permanent equity in the mezzanine section of the Condensed Consolidated Balance Sheets.

**Note 4. Earnings per Share**

Effective October 1, 2009, we adopted certain provisions of ASC 260 which clarify that share-based payment awards that entitle their holders to receive nonforfeitable dividends or dividend equivalents before vesting should be considered participating securities. Certain of our restricted stock awards granted are considered participating securities as they receive non-forfeitable rights to dividends at the same rate as common stock. As participating securities, we include these instruments in the earnings allocation in computing earnings per share ( **EPS** ) under the two-class method described in ASC 260. Prior to adoption of these provisions, restricted stock was included in our diluted EPS calculation using the treasury stock method. The dilutive effect of participating securities is now reflected in diluted EPS by application of the more dilutive of the treasury stock method or the two-class method. Pursuant to ASC 260, all prior period EPS data were adjusted retrospectively. The impact of adopting ASC 260 for the three and nine month periods ended June 30, 2009 decreased previously reported basic EPS by \$0.02 and \$0.05, respectively, and decreased previously reported diluted EPS by \$0.01 and \$0.03, respectively.

**Table of Contents****Notes to Condensed Consolidated Financial Statements (Unaudited) (Continued)**

The following table sets forth the computation of basic and diluted earnings per share under the two-class method (in millions, except per share data):

Options to purchase 0.1 million common shares were not included in computing diluted earnings per share in the three and nine months ended June 30, 2010 and options to purchase 0.3 million and 0.4 million common shares were not included in computing diluted earnings per share in the three and nine months ended June 30, 2009 because the effect would have been antidilutive.

**Note 5. Alternative Fuel Tax Credit**

In April 2009, we received notification from the Internal Revenue Service ( **IRS** ) that our registration as an alternative fuel mixer had been approved. As a result, we were eligible for a tax credit equal to \$0.50 per gallon of alternative fuel used at our Demopolis, Alabama bleached paperboard mill from January 22, 2009 through the December 31, 2009 expiration of the tax credit. The alternative fuel eligible for the tax credit is liquid fuel derived from biomass. We recognized \$20.9 million of alternative fuel tax credit ( **AFTC** ), which is not taxable for federal or state income tax purposes, and reduced cost of goods sold in our Consumer Packaging segment by \$20.7 million, net of expenses, in the three months ended December 31, 2009. During the second quarter of fiscal 2010, the IRS released a memorandum which clarified that the entire volume of

## Edgar Filing: Rock-Tenn CO - Form 10-Q

black liquor, without reduction for inorganic solids, chip water or process water, was eligible for the alternative fuel mixture credit. As a result, we reversed reserves of \$8.1 million during the second quarter of fiscal 2010 and reduced cost of goods sold in our Consumer Packaging segment by \$8.1 million. In the three and nine months ended June 30, 2009 we recognized alternative fuel tax credit of \$33.9 million and reduced cost of goods sold in our Consumer Packaging segment by \$32.7 million, net of expenses.

In April 2010, we filed an application with the IRS to be registered as a producer of cellulosic biofuel as described in Internal Revenue Code Section 40(b)(6). On July 9, 2010, the IRS Office of Chief Counsel issued Chief Counsel Advice Memorandum AM 2010-002 dated June 28, 2010, which concluded that black liquor sold or used during calendar year 2009, qualifies for the cellulosic biofuel producer credit ( **CBPC** ). Each gallon of black liquor produced by any taxpayer operating a pulp and paper mill and used as a fuel in that taxpayer's trade or

**Table of Contents**

**Notes to Condensed Consolidated Financial Statements (Unaudited) (Continued)**

business during calendar year 2009 will qualify for a pre-tax non-refundable CBPC credit of \$1.01 per gallon. We can utilize either the AFTC or the CBPC. The CBPC credit is approximately \$0.65 per gallon, net of tax, and therefore of greater value to us than the \$0.50 per gallon non-taxable alternative fuel tax credit we previously claimed. We expect confirmation of our registration in the fourth quarter of fiscal 2010 at which time we expect the IRS will also provide a process which will allow taxpayers to convert from the alternative fuel mixture credit to the CBPC, including the procedures for the amendment of prior year federal tax returns. We are currently evaluating various alternatives afforded us, including amending tax returns. We currently expect to realize approximately \$37 million, net of tax, in additional credits from the CBPC. We expect to monetize the majority of these credits in fiscal 2011, primarily through reduced estimated tax payments.

**Table of Contents****Notes to Condensed Consolidated Financial Statements (Unaudited) (Continued)****Note 6. Restructuring and Other Costs, Net****Summary of Restructuring and Other Initiatives**

We recorded pre-tax restructuring and other costs, net, of \$(0.2) million and \$1.1 million for the three months ended June 30, 2010 and 2009, respectively, and recorded pre-tax restructuring and other costs, net, of \$4.1 million and \$10.8 million for the nine months ended June 30, 2010 and 2009, respectively. These amounts are not comparable since the timing and scope of the individual actions associated with a restructuring can vary. We discuss these charges in more detail below.

The following table presents a summary of restructuring and other charges, net, related to active restructuring initiatives incurred during the three and nine months ended June 30, 2010 and 2009, the cumulative recorded amount since we announced each initiative, and the total we expect to incur (in millions):

- <sup>(1)</sup> For this Note 6, we have defined the term **Net property, plant and equipment** as: property, plant and equipment impairment losses, subsequent adjustments to fair value for assets classified as held for sale, and subsequent (gains) or losses on sales of property, plant and equipment and related parts and supplies.

**Table of Contents****Notes to Condensed Consolidated Financial Statements (Unaudited) (Continued)**

When we close a facility, if necessary, we recognize an impairment charge primarily to reduce the carrying value of equipment or other property to their estimated fair value less cost to sell, and record charges for severance and other employee related costs. Any subsequent change in fair value, less cost to sell, prior to disposition is recognized as identified; however, no gain is recognized in excess of the cumulative loss previously recorded. At the time of each announced closure, we generally expect to record future charges for equipment relocation, facility carrying costs, costs to terminate a lease or contract before the end of its term and other employee related costs. Expected future charges are reflected in the table above in the Expected Total lines until incurred.

- (a) The Consumer Packaging segment charges primarily reflect the following folding carton plant closures recorded: Baltimore, Maryland (announced in fiscal 2008 and closed in fiscal 2009), Chicopee, Massachusetts (announced and closed in fiscal 2008) and Stone Mountain, Georgia (announced and closed in fiscal 2007). Although specific circumstances vary, our strategy has generally been to consolidate our business into large well-equipped plants that operate at high utilization rates and take advantage of available capacity created by operational excellence initiatives. Therefore, we transferred a substantial portion of each plant's assets and production to our other folding carton plants. We believe these actions have allowed us to more effectively manage our business. The expenses in the Other Costs column in the prior year year-to-date, cumulative and expected cost rows primarily reflect the estimated fair value of the liability for future lease payments at our closed leased facilities.
- (b) The Corrugated Packaging segment charges primarily reflect the closure of our Greenville, South Carolina sheet plant (announced in fiscal 2008 and closed in fiscal 2009) and the fiscal 2009 impairment of certain assets at one of our corrugated graphics subsidiaries, including a \$1.0 million charge included in Other Costs column in the cumulative row for a customer relationship intangible. We have transferred a substantial portion of the Greenville plant's production to our other corrugated plants.
- (c) The Specialty Paperboard Products segment charges primarily reflect the closure of our Columbus, Indiana laminated paperboard converting operation (announced and closed in fiscal 2010), Macon, Georgia drum manufacturing operation (announced and closed in fiscal 2010) and closure of our Drums, Pennsylvania and Litchfield, Illinois interior packaging plants (announced and closed in fiscal 2010 and 2009, respectively).
- (d) The expenses in the Other Costs column primarily reflect integration and deferred compensation expenses. The nine months ended June 30, 2009 reflect \$3.3 million of Southern Container integration expenses and \$3.5 million of deferred compensation and retention bonus expense for key Southern Container employees. The deferred compensation and retention bonus expense was funded through a purchase price reduction from Southern Container's stockholders. Nearly all of these funds were escrowed and were disbursed in March 2009 following the one year anniversary of the acquisition. The expenses in the cumulative and expected cost rows in the Other Costs column primarily reflect integration and deferred compensation expenses.

The following table represents a summary of the changes in the restructuring accrual, which is primarily composed of accrued severance and other employee costs, and a reconciliation of the restructuring accrual to the line item **Restructuring and other costs, net** on our Condensed Consolidated Statements of Income for the nine months ended June 30, 2010 and 2009 (in millions):

**Note 7. Tax Provision**

We recorded income tax expense of \$27.0 million and \$60.7 million in the three and nine months ended June 30, 2010, respectively, compared to \$27.4 million and \$66.0 million in the three and nine months ended June 30, 2009, respectively. The effective tax rates for the three and nine months ended June 30, 2010 were approximately 36.5% and 30.5%, respectively. The effective tax rates for the three and nine months ended June 30, 2009 were approximately 23.7% and 29.6%, respectively. The effective tax rates for the nine months ended June 30, 2010 and the three and nine months ended June 30, 2009, were primarily impacted by the exclusion of the alternative fuel tax credit from taxable income and the three and nine months ended June 30, 2009 were also impacted by a \$1.2 million tax benefit related to adjustments to various accruals and deferred tax balances.

As of June 30, 2010, the gross amount of unrecognized tax benefits was approximately \$13.5 million, exclusive of interest and penalties. Of this balance, if we were to prevail on all unrecognized tax benefits recorded, approximately \$5.7 million would benefit the effective tax rate. We regularly evaluate, assess and adjust the related liabilities in light of changing facts and circumstances, which could cause the effective tax rate to fluctuate from period to period.

We recognize interest and penalties related to unrecognized tax benefits in income tax expense in the Condensed Consolidated Statements of Income, which is consistent with the recognition of these items in prior reporting periods. As of June 30, 2010, we had a recorded liability of \$2.8 million for the payment of interest and penalties related to the liability for unrecognized tax benefits.

We file federal, state and local income tax returns in the U.S. and various foreign jurisdictions. With few exceptions, we are no longer subject to U.S. federal, state and local, or non-U.S. income tax examinations by tax authorities for years prior to fiscal 2007.

**Note 8. Inventories**

We value substantially all of our U.S. inventories at the lower of cost or market, with cost determined on the last-in first-out ( **LIFO** ) inventory valuation method, which we believe generally results in a better matching of current costs and revenues than under the first-in first-out ( **FIFO** ) inventory valuation method. In periods of increasing costs, the LIFO method generally results in higher cost of goods sold than under the FIFO method. In periods of decreasing costs, the results are generally the opposite. Because LIFO is designed for annual determinations, it is possible to make an actual valuation of inventory under the LIFO method only at the end of each fiscal year based on the inventory levels and costs at that time. Accordingly, we base interim LIFO estimates on management's projection of expected year-end inventory levels and costs. We value all other inventories at the lower of cost or market, with cost determined using methods which approximate cost computed on a FIFO basis. These other inventories represent primarily foreign inventories and spare parts inventories. Inventories were as follows (in millions):

	June 30, 2010	September 30, 2009
Finished goods and work in process	\$ 149.3	\$ 154.2

Edgar Filing: Rock-Tenn CO - Form 10-Q

Raw materials	109.5	107.4
Supplies and spare parts	49.2	49.0
Inventories at FIFO cost	308.0	310.6
LIFO reserve	(48.1)	(35.5)
Net inventories	\$ 259.9	\$ 275.1

**Table of Contents****Notes to Condensed Consolidated Financial Statements (Unaudited) (Continued)****Note 9. Debt**

With the exception of certain items noted below, there were no significant changes in our debt agreements during the nine months ended June 30, 2010. For more information regarding certain of our debt characteristics, see *Note 11. Debt* of the Notes to Consolidated Financial Statements section of the Fiscal 2009 Form 10-K.

## Edgar Filing: Rock-Tenn CO - Form 10-Q

- (a) During the quarter ended December 31, 2009, we repurchased \$19.5 million of our 5.625% notes due March 2013 ( **March 2013 Notes** ) at an average price of approximately 98% of par and recorded an aggregate gain on extinguishment of debt of approximately \$0.5 million. Interest on our 8.20% notes due August 2011 Notes ( **August 2011 Notes** ) is payable in arrears each February and August. Interest on our March 2013 Notes and our 9.25% senior notes due March 2016 ( **March 2016 Notes** ) is payable in arrears each March and September.
  
- (b) On March 5, 2008 we entered into an Amended and Restated Credit Agreement (the **Credit Facility** ) with an original maximum principal amount of \$1.2 billion. The Credit Facility originally included a \$450 million revolving credit facility, a \$550 million term loan A facility and a \$200 million term loan B facility. The Credit Facility is pre-payable at any time. Scheduled term loan payments or other term loan payments reduce the facility size. On February 3, 2010 we amended our Credit Facility to among other things adjust

**Table of Contents****Notes to Condensed Consolidated Financial Statements (Unaudited) (Continued)**

our ability to borrow unsecured debt subject to certain conditions outlined in the amendment, including a maximum Leverage Ratio, calculated on a pro forma basis, not to exceed 3.50 to 1.00, if such indebtedness is incurred through and including June 30, 2011, and 3.25 to 1.00 if such indebtedness is incurred at any time thereafter. On February 8, 2010, we repaid the \$120.0 million outstanding term loan B balance with proceeds from our revolving credit facility and recorded a loss on extinguishment of debt of approximately \$3.3 million primarily for the write off of unamortized deferred financing costs and original issuance discount.

The revolving credit facility and term loan A facility are scheduled to mature on the earlier to occur of (a) March 5, 2013 or (b) if our March 2013 Notes have not been paid in full or refinanced by September 15, 2012, then September 15, 2012. The Credit Facility provides for up to \$100.0 million in Canadian or U.S. Dollar loans to a Canadian subsidiary. At June 30, 2010 and September 30, 2009, the amount committed under the Credit Facility for loans to a Canadian subsidiary was \$45.0 million. At June 30, 2010, there were \$2.0 million in borrowings by the Canadian subsidiary. At June 30, 2010, available borrowings under the revolving credit portion of the Credit Facility, reduced by outstanding letters of credit not drawn upon of approximately \$30.6 million, were approximately \$398.3 million.

The applicable margin on LIBOR based term loan A and revolving credit loans is dependent upon our Leverage Ratio. For the three months ended June 30, 2010 the applicable margin was 1.25%, and for the three months ended September 30, 2009 the applicable margin was 1.50%. The variable rate, including the applicable margin, on our term loan A facility, before the effect of interest rate swaps, was 1.61% and 1.77% at June 30, 2010 and September 30, 2009, respectively. The variable rate, including the applicable margin, on our term loan B facility, before the effect of interest rate swaps, was 5.75% at September 30, 2009. Interest rates on our revolving credit facility for borrowings both in the U.S. and Canada ranged from 1.60% to 3.50% at June 30, 2010 and from 1.76% to 3.75% at September 30, 2009. Our obligations under the Credit Facility and under certain related hedging agreements are guaranteed by substantially all of our U.S. subsidiaries, and partially by our Canadian subsidiaries. Obligations under the Credit Facility are secured by a substantial portion of our assets. Certain restrictive covenants govern our maximum availability under this facility, including Minimum Consolidated Interest Ratio Coverage; Maximum Leverage Ratio; and Minimum Consolidated Net Worth, as discussed in our Debt Footnote in our Fiscal 2009 Form 10-K. We test and report our compliance with these covenants each quarter. We are in compliance with all of our covenants.

- (c) In fiscal 2009, we amended our existing receivables-backed financing facility (the **Receivables Facility**) to, among other things, extend the maturity to set it to expire on July 13, 2012 and increase the facility size to \$135.0 million. Accordingly, such borrowings are classified as long-term at June 30, 2010 and September 30, 2009. The borrowing rate, which consists of the market rate for asset-backed commercial paper plus a utilization fee, was 2.17% and 2.53% as of June 30, 2010 and September 30, 2009, respectively. Borrowing availability under this facility is based on the eligible underlying accounts receivable and certain covenants. At June 30, 2010 and September 30, 2009, maximum available borrowings, excluding amounts outstanding, under this facility were approximately \$135.0 million and \$114.6 million, respectively. The carrying amount of accounts receivable collateralizing the maximum available borrowings at June 30, 2010 was approximately \$247 million. We test and report our compliance with these covenants monthly. We are in compliance with all of our covenants.
- (d) The industrial development revenue bonds (**IDBs**) are issued by various municipalities in which we maintain facilities. Each series of bonds is secured by a direct pay letter of credit, or collateralized by a mortgage interest and collateral interest in specific property or a combination thereof. As of June 30, 2010, the outstanding amount of direct pay letters of credit supporting all IDBs was \$17.7 million. The letters of credit are renewable at our request so long as no default or event of default has occurred under the Credit Facility.

**Note 10. Derivatives**

We are exposed to interest rate risk, commodity price risk and foreign currency exchange risk. To manage these risks, from time-to-time and to varying degrees, we enter into a variety of financial derivative transactions and certain physical commodity transactions that are determined to be derivatives. Interest rate swaps may be entered into to manage the interest rate risk associated with a portion of our outstanding debt. Interest rate swaps are either designated as cash flow hedges of floating rate debt or fair value hedges of fixed rate debt, or we may elect not to treat them as accounting hedges. Forward contracts on certain commodities may be entered into to manage the price

**Table of Contents****Notes to Condensed Consolidated Financial Statements (Unaudited) (Continued)**

risk associated with forecasted purchases or sales of those commodities. In addition, certain commodity derivative contracts and physical commodity contracts that are determined to be derivatives are not designated as accounting hedges because either they do not meet the criteria for treatment as accounting hedges under ASC 815, *Derivatives and Hedging*, or we elect not to treat them as accounting hedges under ASC 815. We may also enter into forward contracts to manage our exposure to fluctuations in Canadian foreign currency rates with respect to transactions denominated in Canadian dollars.

Outstanding financial derivative instruments expose us to credit loss in the event of nonperformance by the counterparties to the agreements. Our credit exposure related to these financial instruments is represented by the fair value of contracts reported as assets. We manage our exposure to counterparty credit risk through minimum credit standards, diversification of counterparties and procedures to monitor concentrations of credit risk.

**Cash Flow Hedges**

For derivative instruments that are designated as a cash flow hedge, the effective portion of the gain or loss on the derivative instrument is reported as a component of other comprehensive income and reclassified into earnings in the same line item associated with the forecasted transaction, and in the same period or periods during which the forecasted transaction affects earnings. Gains and losses on the derivative representing either hedge ineffectiveness or hedge components excluded from the assessment of effectiveness are recognized in current earnings.

We have entered into interest rate swap agreements that effectively modify our exposure to interest rate risk by converting a portion of our floating rate debt to a fixed rate basis, thus reducing the impact of interest rate changes on future interest expense. These agreements involve the receipt of floating rate amounts in exchange for fixed interest rate payments over the life of the agreements without an exchange of the underlying principal amount. We have designated these swaps as cash flow hedges of the interest rate exposure on an equivalent amount of certain variable rate debt. As of June 30, 2010, these interest rate swap agreements, which terminate in April 2012, require that we pay fixed rates of approximately 4.00% and receive the one-month LIBOR rate on the notional amounts. As of June 30, 2010, the aggregate notional amount of outstanding debt related to these interest rate swaps was \$341 million, declining at periodic intervals to an aggregate notional amount of \$132 million prior to expiration.

As of June 30, 2010 and September 30, 2009, we had the following outstanding commodity derivatives that were designated as cash flow hedges of forecasted sales transactions:

Commodity	June 30, 2010		September 30, 2009	
	Notional Amount	Unit	Notional Amount	Unit
Paperboard, net	0	Tons	33,000	Tons

**Fair Value Hedges**

For derivative instruments that are designated and qualify as a fair value hedge, the gain or loss on the derivative instrument as well as the offsetting loss or gain on the hedged item attributable to the hedged risk are recognized in the same line item associated with the hedged item in current earnings. Prior to June 2005, we had a series of interest rate swaps that effectively converted our fixed rate debt to floating rates, thus hedging the fair value of the related fixed rate debt from changes in market interest rates. These interest rate swaps were terminated prior to maturity. The value at termination of these swaps is being amortized to interest expense over the remaining life of the related debt using the effective interest method. During the three months ended June 30, 2010 and 2009, \$0.4 million and \$0.5 million, respectively, were amortized to earnings as a reduction of interest expense. During the nine months ended June 30, 2010 and 2009, \$1.2 million and \$1.5 million, respectively, were amortized to earnings as a reduction of interest expense.

**Table of Contents****Notes to Condensed Consolidated Financial Statements (Unaudited) (Continued)****Derivatives not Designated as Accounting Hedges**

We have entered into certain pay-fixed, receive-floating interest rate swap agreements with an aggregate notional amount of \$16.6 million. The weighted average fixed rate of interest paid on these interest rate swaps is 3.89% and the floating interest rate received is the three-month LIBOR rate. These interest rate swap agreements have a forward-starting date of December 15, 2011 and a ten-year term. However, both agreements have a mandatory early termination date of December 15, 2011, at which time we will either receive a lump-sum from or pay a lump-sum to our counterparty to terminate the swaps. These interest rate swaps have not been designated as accounting cash flow hedges, and accordingly, the gain or loss is recognized in current earnings.

We have various commodity derivative instruments and physical commodity contracts that are determined to be derivatives. The gain or loss on these derivatives is recognized in the same line item associated with the economically hedged item in current earnings.

As of June 30, 2010 and September 30, 2009, we had the following outstanding commodity derivatives related to forecasted transactions that were not designated as accounting hedges:

Commodity	June 30, 2010		September 30, 2009	
	Notional Amount	Unit	Notional Amount	Unit
Paperboard sales, net	6,000	Tons	0	Tons
Fiber purchases, net	33,000	Tons	2,100	Tons

As of June 30, 2010, based on implied forward interest rates associated with our outstanding interest rate derivative cash flow hedges and the remaining amounts in accumulated other comprehensive income related to

**Table of Contents****Notes to Condensed Consolidated Financial Statements (Unaudited) (Continued)**

terminated interest rate swaps, we expect to reclassify net pre-tax deferred losses of approximately \$6.7 million from accumulated other comprehensive income into earnings as an increase to interest expense within the next twelve months as the probable hedged interest payments occur. We believe amounts in accumulated other comprehensive income related to interest rate derivatives and commodity derivatives are appropriately included as a component of accumulated other comprehensive income because the forecasted transactions related to those amounts are probable of occurring.

We enter into derivative contracts that may contain credit-risk-related contingent features which could result in a counterparty requesting immediate payment or demand immediate and ongoing full overnight collateralization on derivative instruments in net liability positions. Certain of our interest rate swap derivative contracts contain a provision whereby if we default on the Credit Facility, we may also be deemed in default of the interest rate swap obligation. The aggregate fair value of interest rate swaps under these agreements that are in a liability position on June 30, 2010, is approximately \$14.0 million. These interest rate swaps share the same collateral as that of our Credit Facility and no other collateral has been posted by us against these interest rate swap obligations. If we were to default on these agreements, we may be required to settle our obligations at their termination value of approximately \$14.1 million. Certain of our commodity derivative contracts contain contingent provisions that require us to provide the counterparty with collateral if the credit rating on our debt, as provided by major credit rating agencies, falls below certain specified minimums, or if the fair value of our obligation exceeds specified threshold amounts. The aggregate fair value of all commodity derivative instruments with these contingent features that are in a liability position on June 30, 2010 is approximately \$1 million. If the contingent features underlying these commodity derivative agreements were triggered, we may be required to post collateral or settle our obligations under the agreements at their termination value, which was approximately \$1 million at June 30, 2010.

**Note 11. Fair Value****Assets and Liabilities Measured at Fair Value**

ASC 820 provides a framework for measuring fair value and expands disclosures required about fair value measurements. Specifically, ASC 820 sets forth a definition of fair value and a hierarchy prioritizing the inputs to valuation techniques. ASC 820 defines levels within the hierarchy as follows:

Level 1 Unadjusted quoted prices for identical assets and liabilities in active markets;

Level 2 Quoted prices for similar instruments in active markets, quoted prices for identical or similar instruments in inactive markets, and model-based valuation techniques for which all significant assumptions are observable in the market or can be corroborated by observable market data for substantially the full term of the assets or liabilities; and

Level 3 Valuations derived from valuation techniques in which one or more significant inputs or significant value drivers are unobservable. Such inputs typically reflect management's estimates of assumptions that market participants would use in pricing the asset or liability.

We have rabbi trusts which hold assets of our supplemental retirement savings plans (the **Supplemental Plans**) that are nonqualified deferred compensation plans. The assets of our Supplemental Plans are invested primarily in mutual funds and are reported at fair value based on quoted prices in active markets. The fair value of our Supplemental Plans is designated as Level 1.

We value our interest rate derivatives using a widely accepted valuation technique based on discounted cash flow analysis, which reflects the terms of the derivatives and, for all significant assumptions, uses observable market-based inputs, including LIBOR forward interest rate curves. The fair value of our interest rate derivatives is designated as Level 2.

We value our commodity derivatives based on discounted cash flow analysis using forward price curves derived from market price quotations with internal and external fundamental data inputs. Market price quotations are obtained from independent derivatives brokers and from direct communication with market participants. As our commodity derivatives trade in less liquid markets or may have limited observable forward

## Edgar Filing: Rock-Tenn CO - Form 10-Q

prices, we have designated the fair value of our commodity derivatives as Level 3.

We incorporate credit valuation adjustments to reflect both our own nonperformance risk and the respective counterparty's nonperformance risk in our fair value measurements.

**Table of Contents****Notes to Condensed Consolidated Financial Statements (Unaudited) (Continued)**

As of June 30, 2010, the fair value of our financial assets and liabilities that are measured at fair value on a recurring basis, for each hierarchy level, is summarized in the following table (in millions):

	Level 1	Level 2	Level 3	Total
<b>Assets:</b>				
Supplemental Plans	\$ 3.7	\$ 0.0	\$ 0.0	\$ 3.7
Interest rate derivatives	\$ 0.0	\$ 0.0	\$ 0.0	\$ 0.0

Ending asset balance, net	\$ 0.3	\$ 0.3

The following table provides a summary of unrealized net gains and losses during the nine months ended June 30, 2010 and 2009 that are attributable to changes in unrealized gains and losses of Level 3 derivatives assets and liabilities still held at June 30, 2010 and 2009 (in millions):

Unrealized net gain recorded in net sales	\$ 0.4	\$ 0.2

**Financial Instruments not Recognized at Fair Value**

Financial instruments not recognized at fair value on a recurring or nonrecurring basis include cash and cash equivalents, accounts receivable, certain other current assets, short-term debt, accounts payable, certain other current liabilities, and long-term debt. With the exception of long-term debt, the carrying amounts of these financial instruments approximate their fair values due to their short maturities.

The following table summarizes the carrying amount and estimated fair value of our long-term debt (in millions):

<sup>(1)</sup> Fair value is based on the quoted market prices for the same or similar issues.

<sup>(2)</sup> Fair value is estimated based on the discounted value of future cash flows using current market interest rates offered for debt of similar credit risk and maturity.

<sup>(3)</sup> Fair value approximates the carrying amount as the variable interest rates reprice frequently at current market rates.

**Table of Contents****Notes to Condensed Consolidated Financial Statements (Unaudited) (Continued)**

In the absence of quoted prices in active markets, considerable judgment is required in developing estimates of fair value. Estimates are not necessarily indicative of the amounts we could realize in a current market transaction.

**Note 12. Retirement Plans**

We have five qualified defined benefit pension plans ( **U.S Qualified Plans** ). In addition, under several labor contracts, we make payments based on hours worked into multi-employer pension plan trusts established for the benefit of certain collective bargaining employees in facilities both inside and outside the United States. We also have a Supplemental Executive Retirement Plan ( **SERP** ) that provides unfunded supplemental retirement benefits to certain of our executives.

The following table represents a summary of the components of net pension cost (in millions):

	Three Months Ended June 30,		Nine Months Ended June 30,

Net pension cost	\$ 8.3	\$ 4.5	\$ 24.8	\$ 14.7

During the three and nine months ended June 30, 2010, we contributed an aggregate of \$17.2 million and \$20.2 million, respectively, to our U.S. Qualified Plans. Based on our current assumptions, we do not anticipate making additional contributions in fiscal 2010 to the U.S. Qualified Plans. However, it is possible that our assumptions may change, actual market performance may vary or we may decide to contribute additional amounts. During the three and nine months ended June 30, 2009, we contributed an aggregate of \$17.9 million and \$24.1 million, respectively, to our U.S. Qualified Plans.

**Note 13. Stock Based Compensation****Stock Options**

During the second quarter of fiscal 2010, we granted options to purchase 143,700 shares of our common stock to certain employees. These options vest three years from the grant date. These grants were valued at \$16.81 per share using the Black-Scholes option pricing model. The significant assumptions used were: an expected term of 4.98 years, an expected volatility of 48.23%, expected dividends of 1.44% and a risk free rate of 2.34%. We amortize these costs using the accelerated attribution method.

The aggregate intrinsic value of options exercised during the three months ended June 30, 2010 and 2009 was \$1.3 million and \$1.0 million, respectively, and during the nine months ended June 30, 2010 and 2009 was \$4.9 million and \$3.8 million, respectively.

The table below summarizes the changes in all stock options during the nine months ended June 30, 2010:

**Table of Contents****Notes to Condensed Consolidated Financial Statements (Unaudited) (Continued)****Restricted Stock**

During the second quarter of fiscal 2010, we granted 22,000 shares of restricted stock, which vest over one year, to our non-employee directors and target awards of 254,450 shares of restricted stock with a service and a performance condition which vest over three years, to certain employees pursuant to our 2004 Incentive Stock Plan, as amended.

The aggregate fair value of restricted stock vested during the three months ended June 30, 2010 and 2009 was \$7.4 million and \$6.2 million, respectively, and during the nine months ended June 30, 2010 and 2009 it was \$16.9 million and \$7.3 million, respectively.

The table below summarizes the changes in unvested restricted stock awards during the nine months ended June 30, 2010:

	Shares	Weighted Average Grant Date Fair Value
Unvested at September 30, 2009	1,050,584	\$ 25.53
Granted <sup>(1)</sup>	326,850	42.06

Forfeited	(33,126)	26.98
Unvested at June 30, 2010 <sup>(2)</sup>	982,756	\$ 30.32

<sup>(1)</sup> Fiscal 2010 target awards of 254,450 shares, of which 5,150 shares have been subsequently forfeited, may be increased to 150% of the target or decreased to zero, subject to the level of performance attained. The awards are reflected in the table at the target award. During the second quarter of fiscal 2010, certain restricted shares granted in the second quarter of fiscal 2007 achieved the respective performance condition based on the Annual Average Return over Capital Costs (as defined in the applicable grant letter) and certain restricted shares granted in the second quarter of 2007 achieved the respective market condition based on Total Shareholder Return (as defined in the applicable grant letter) each at 150% of target. These achievements resulted in the issuance and vesting of an additional 50,400 shares in the second quarter of fiscal 2010.

<sup>(2)</sup> Target awards, net of subsequent forfeitures and performance condition achievement, granted in fiscal 2009 and fiscal 2008 in the amount of 275,125 shares and 70,925 shares, respectively, may be increased by up to 150% or decreased to zero, subject to the level of performance attained. The awards are reflected in the table at the target award amount of 100%.

For additional information about our share-based payment awards, refer to **Note 17. Shareholders Equity** of the Notes to Consolidated Financial Statements section of the Fiscal 2009 Form 10-K.

**Note 14. Commitments and Contingencies****Environmental and Other Matters**

We are subject to various federal, state, local and foreign environmental laws and regulations, including, among others, the Comprehensive Environmental Response, Compensation, and Liability Act, the Clean Air Act (as amended in 1990), the Clean Water Act, the Resource Conservation and Recovery Act and the Toxic Substances Control Act. These environmental regulatory programs are primarily administered by the U.S. Environmental Protection Agency. In addition, some states in which we operate have adopted equivalent or more stringent environmental laws and regulations or have enacted their own parallel environmental programs, which are enforced through various state

administrative agencies.

We believe that future compliance with these environmental laws and regulations will not have a material adverse effect on our results of operations, financial condition or cash flows. However, our compliance and remediation costs could increase materially. In addition, we cannot currently assess with certainty the impact that the future emissions standards and enforcement practices associated with changes to regulations promulgated under the Clean Air Act or potential climate change legislation will have on our operations or capital expenditure requirements.

---

**Table of Contents**

**Notes to Condensed Consolidated Financial Statements (Unaudited) (Continued)**

However, we believe that any impact or capital expenditures will not have a material adverse effect on our results of operations, financial condition or cash flows.

We have been identified as a potentially responsible party ( **PRP** ) at six active superfund sites pursuant to Superfund legislation. Based upon currently available information and the opinions of our environmental compliance managers and general counsel, although there can be no assurance, we have preliminarily determined that, while we may be associated with the site and while it is probable that we have incurred a liability with respect to the site, one of the following conclusions was applicable:

With respect to each of two sites, we determined, while it was not estimable, the potential liability was reasonably likely to be immaterial.

With respect to four sites, we have preliminarily determined the potential liability was best reflected by a range of reasonably possible liabilities, all of which we expect to be immaterial.

In addition to the above mentioned sites, four of our current or former locations are being investigated under various state regulations. These investigations may lead to remediation costs; however, we believe such costs, if any, would be immaterial.

Additional information on these four sites follows:

Contamination was discovered at the time of the acquisition of certain assets and operations of the former Gulf States Paper Corporation in June 2005 at two sites we acquired. We did not assume any environmental liabilities as part of the acquisition, but have limited indemnification rights with respect to this contamination. We would expect to assert various defenses under applicable laws with respect to this contamination.

Another site is one of our former locations that is involved in an investigation under the state program. It is expected that any potential issues will be handled through administrative controls, such as a deed restriction, rather than remediation.

It is believed that the contamination discovered at another site was due to an oil release by a previous owner. The previous owner is obligated to indemnify us for any contamination caused by the oil release.

Except as stated above, we can make no assessment of our potential liability, if any, with respect to any site. Further, there can be no assurance that we will not be required to conduct some remediation in the future at any of these sites and that the remediation will not have a material adverse effect on our results of operations, financial condition or cash flows. We believe that we can assert claims for indemnification pursuant to existing rights we have under settlement and purchase agreements in connection with certain of these sites. There can be no assurance that we will be successful with respect to any claim regarding these indemnification rights or that, if we are successful, any amounts paid pursuant to the indemnification rights will be sufficient to cover all costs and expenses.

***Guarantees***

We have made the following guarantees as of June 30, 2010:

We have a 49% ownership interest in Seven Hills Paperboard, LLC ( ***Seven Hills*** ). The joint venture partners guarantee funding of net losses in proportion to their share of ownership.

## Edgar Filing: Rock-Tenn CO - Form 10-Q

As part of the Southern Container acquisition we acquired two unconsolidated entities for which we guarantee less than \$4 million in debt. We also have certain guarantees, primarily for bank loans, in proportion to our share of ownership in another unconsolidated entity in an amount less than \$2 million.

We lease certain manufacturing and warehousing facilities and equipment under various operating leases. A substantial number of these leases require us to indemnify the lessor in the event that additional taxes are assessed due to a change in the tax law. We are unable to estimate our maximum exposure under these leases because it is dependent on changes in the tax law.

**Table of Contents**

**Notes to Condensed Consolidated Financial Statements (Unaudited) (Continued)**

We have disposed of assets and/or subsidiaries and have assumed liabilities pursuant to asset and stock purchase and sale agreements. These agreements contain various representations and warranties relating to matters such as title to assets; accuracy of financial statements; legal proceedings; contracts; employee benefit plans; compliance with environmental laws; patent and trademark infringement; taxes; and products, as well as various covenants. These agreements may also provide specific indemnities for breaches of representations, warranties or covenants and may contain specific indemnification provisions. These indemnification provisions address a variety of potential losses, including, among others, losses related to liabilities other than those assumed by the buyer and liabilities under environmental laws. These indemnification provisions may be affected by various conditions and external factors. Many of the indemnification provisions have expired either by operation of law or as a result of the terms of the agreement. Our specified maximum aggregate potential liability (on an undiscounted basis) is approximately \$8 million, other than with respect to certain specified liabilities, including liabilities relating to title, taxes and certain environmental matters, with respect to which there may be no limitation. We estimate the fair value of our aggregate liability for outstanding indemnities, including the indemnities described above with respect to which there are no limitations, to be immaterial.

***Note Receivable***

We had a note payable to and a note receivable from an obligor who had filed for bankruptcy protection. We had offset these notes on our Condensed Consolidated Balance Sheets for the periods ending March 31, 2010 and September 30, 2009. During the third quarter of fiscal 2010 we agreed to pay \$0.2 million to settle the matter and released the remaining \$0.3 million previously reserved.

***Seven Hills Option***

Seven Hills commenced operations on March 29, 2001. Our partner in the Seven Hills joint venture has the option to require us to purchase its interest in Seven Hills, at a formula price, effective on the sixth or any subsequent anniversary of the commencement date by providing us notice two years prior to any such anniversary. The earliest date on which we could be required to purchase our partner's interest is March 29, 2013. We have not recorded any liability for this unexercised option. We currently project this contingent obligation to purchase our partner's interest (based on the formula) to be approximately \$12 million at June 30, 2010, which would result in a purchase price of approximately 50% of our partner's net equity reflected on Seven Hills' June 30, 2010 balance sheet.

We do not allocate certain of our income and expenses to our segments and, thus, the information that management uses to make operating decisions and assess performance does not reflect such amounts. **Table of Contents****Item 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS**

The following discussion should be read in conjunction with the Condensed Consolidated Financial Statements and Notes thereto included herein and our audited Consolidated Financial Statements and Notes thereto for the fiscal year ended September 30, 2009, as well as the information under the heading *Management's Discussion and Analysis of Financial Condition and Results of Operations*, that are part of our Fiscal 2009 Form 10-K, which we filed with the Securities and Exchange Commission (SEC) on November 18, 2009. The table in *Note 15. Segment Information* of the Notes to Condensed Consolidated Financial Statements included herein shows certain operating data for our segments.

**Overview**

Excluding the \$32.7 million included in the third quarter of fiscal 2009 in the Consumer Packaging segment related to the alternative fuel tax credit, net of related expenses, segment income in the third quarter of fiscal 2010 decreased \$15.9 million to \$101.4 million compared to the third quarter of fiscal 2009. The decrease was primarily due to lower earnings in our Corrugated Packaging segment. We discuss the alternative fuel tax credit in more detail in *Note 5. Alternative Fuel Tax Credit* of the Notes to Condensed Consolidated Financial Statements.

Net income attributable to Rock-Tenn Company shareholders, excluding the impact of the alternative fuel tax credit, decreased \$8.8 million to \$45.1 million in the third quarter of fiscal 2010 as compared to the third quarter of fiscal 2009 primarily due to increased recycled fiber and virgin fiber costs which were partially offset by generally higher volumes and selling prices, and comparatively lower chemical costs in fiscal 2010.

Net sales in the third quarter of fiscal 2010 increased \$68.0 million compared to the third quarter of fiscal 2009 primarily due to generally higher volumes and selling prices. Net sales in the nine months ended June 30, 2010 increased \$111.3 million compared to the nine months ended June 30, 2009 primarily due to generally higher volumes and recycled fiber selling prices which were partially offset by lower selling prices primarily for recycled paperboard, containerboard and corrugated packaging.

Cost of goods sold as a percentage of net sales increased in the third quarter of fiscal 2010 compared to the prior year third quarter primarily as a result of the \$32.7 million alternative fuel tax credit, net of related expenses recorded in the third quarter of fiscal 2009 and increased recycled fiber and virgin fiber costs, which were partially offset by reduced chemical costs. Recycled fiber costs and virgin fiber costs increased \$86 per ton and \$51 per ton, respectively, and chemical costs decreased \$2 per ton. Additionally, freight expense increased \$6.3 million due in part to higher volumes, and pension expense increased \$2.9 million.

Cost of goods sold as a percentage of net sales increased in the nine months ended June 30, 2010 compared to the nine months ended June 30, 2009 primarily as a result of increased recycled fiber and virgin fiber costs and a \$3.9 million decrease in alternative fuel tax credit in the current nine months compared to the prior year period which were partially offset by and reduced energy and chemical costs. Recycled fiber costs and

virgin fiber costs increased

\$63 per ton and \$30 per ton, respectively. Energy and chemical costs each decreased \$4 per ton. Additionally, freight expense increased \$12.3 million due in part to higher volumes, pension expense increased \$7.8 million and expense related to foreign currency transactions increased \$1.2 million.

Selling, general and administrative ( **SG&A** ) expenses increased \$3.5 million and declined as a percentage of net sales in the third quarter of fiscal 2010 compared to the third quarter of fiscal 2009. We recorded increased interest rate swap expense of \$2.2 million and increased professional fees and consulting expense for various initiatives of \$1.2 million which were partially offset by reduced depreciation and amortization of \$1.5 million.

SG&A expenses increased \$5.7 million and declined as a percentage of net sales in the nine months ended June 30, 2010 compared to the nine months ended June 30, 2009. We recorded increased compensation costs aggregating \$4.7 million, increased professional fees and consulting expense for various initiatives of \$3.0 million, increased pension costs of \$2.4 million and increased interest rate swap expense of \$1.5 million which were partially offset by reduced depreciation and amortization of \$4.3 million and reduced bad debt expense of \$2.3 million.

**Restructuring and Other Costs, Net**

We recorded aggregate pre-tax restructuring and other costs of \$(0.2) million and \$1.1 million in the third quarter of fiscal 2010 and 2009, respectively. We recorded aggregate pre-tax restructuring and other costs of \$4.1 million and \$10.8 million in the nine months ended June 30, 2010 and 2009, respectively. We discuss these charges in more detail in **Note 6. Restructuring and Other Costs, Net** of the Notes to Condensed Consolidated Financial Statements included herein.

**Equity in Income (Loss) of Unconsolidated Entities**

Equity in income (loss) of unconsolidated entities in the third quarter of fiscal 2010 was income of \$0.3 million compared to income of \$0.3 million in the third quarter of fiscal 2009. Equity in income (loss) of unconsolidated entities in the nine months ended June 30, 2010 was income of \$0.2 million compared to a loss of \$0.3 million in the nine months ended June 30, 2009.

**Interest Expense**

Interest expense for the third quarter of fiscal 2010 decreased to \$17.8 million from \$23.2 million for the same quarter last year and included non-cash deferred financing cost amortization of \$1.5 million and \$1.6 million, respectively. The decrease in our average outstanding borrowings decreased interest expense by approximately \$4.4 million, and lower interest rates, net of swaps, decreased interest expense by approximately \$0.8 million, and deferred financing cost amortization decreased \$0.2 million.

Interest expense for the nine months ended June 30, 2010 decreased to \$58.5 million from \$74.2 million for the nine months ended June 30, 2009 and included non-cash deferred financing cost amortization of \$4.6 million and \$5.1 million, respectively. The decrease in our average outstanding borrowings decreased interest expense by approximately \$14.6 million, and lower interest rates, net of swaps, decreased interest expense by approximately \$0.6 million, and deferred financing cost amortization decreased \$0.5 million.

**Loss on Extinguishment of Debt**

Loss on extinguishment of debt for the three months ended June 30, 2009 of \$1.9 million represents amounts expensed in connection with the tender offer for up to \$100 million of our August 2011 Notes.

---

**Table of Contents**

Loss on extinguishment of debt for the nine months ended June 30, 2010 was \$2.8 million and primarily includes \$0.5 million of gain recognized in the first quarter of fiscal 2010 in connection with the repurchase of \$19.5 million of our March 2013 Notes at an average price of approximately 98% of par and a \$3.3 million charge in connection with the write off of unamortized deferred financing costs and original issuance discount in connection with the repayment of \$120.0 million of the outstanding term loan B balance using proceeds from our revolving credit facility. Loss on extinguishment of debt for the nine months ended June 30, 2009 was \$4.3 million, and included \$2.4 million in the first quarter of fiscal 2009 to retire the Solvay IDBs we assumed as part of the Southern Container acquisition, at 102% of par. The \$2.4 million was funded by the former Southern Container stockholders.

**Interest Income and Other Income (Expense), net**

Interest income and other income (expense), net, for the three months ended June 30, 2010 was income of \$0.1 million. Interest income and other income (expense), net, for the nine months ended June 30, 2010 and 2009 was income of \$0.4 million and expense of \$0.1 million, respectively.

**Provision for Income Taxes**

We recorded income tax expense of \$27.0 million and \$60.7 million in the three and nine months ended June 30, 2010, respectively, compared to \$27.4 million and \$66.0 million in the three and nine months ended June 30, 2009, respectively. The effective tax rates for the three and nine months ended June 30, 2010 were approximately 36.5% and 30.5%, respectively. The effective tax rates for the three and nine months ended June 30, 2009 were approximately 23.7% and 29.6%, respectively. The effective tax rates for the nine months ended June 30, 2010 and the three and nine months ended June 30, 2009, were primarily impacted by the exclusion of the alternative fuel tax credit from taxable income and the three and nine months ended June 30, 2009 was also impacted by a \$1.2 million tax benefit related to adjustments to various accruals and deferred tax balances. In fiscal 2010, we expect our effective tax rate, excluding the impact of alternative fuel tax credit and cellulosic biofuel producer credit, to be approximately 36% and our marginal effective income tax rate to be approximately 36.5%. We discuss the alternative fuel tax credit and cellulosic biofuel producer credit and the provision for income taxes in more detail in *Note 5. Alternative Fuel Tax Credit* and *Note 7. Tax Provision* of the Notes to Condensed Consolidated Financial Statements included herein.

**Net Income Attributable to Noncontrolling Interests**

The reduction for net income attributable to noncontrolling interests for the third quarter of fiscal 2010 increased to \$1.9 million from \$1.4 million in the third quarter of fiscal 2009 due primarily to increased earnings at our graphic packaging subsidiary. The reduction for net income attributable to noncontrolling interests for the nine months ended June 30, 2010 increased to \$4.1 million from \$2.3 million in the comparable prior year period due primarily to increased earnings at our solid fiber interior packaging subsidiary and graphic packaging subsidiary.

*Net Sales (Consumer Packaging Segment)*

The 5.6% increase in net sales for the Consumer Packaging segment for the third quarter of fiscal 2010 compared to the prior year third quarter was primarily due to higher paperboard volumes and selling prices and higher folding carton volumes. Coated recycled paperboard and bleached paperboard tons shipped increased 2.9% and 12.0%, respectively. Market pulp tons shipped decreased 0.4%.

The 5.0% increase in net sales for the Consumer Packaging segment for the nine months ended June 30, 2010 compared to the nine months ended June 30, 2009 was primarily due to higher paperboard volumes, higher bleached paperboard and market pulp selling prices and folding carton volumes and selling prices. Coated recycled paperboard, bleached paperboard and market pulp tons shipped increased 6.1%, 6.5% and 15.7%, respectively. These increases were partially offset by lower recycled paperboard selling prices.

**Table of Contents***Segment Income (Consumer Packaging Segment)*

Excluding the \$32.7 million included in the third quarter of fiscal 2009 related to the alternative fuel tax credit, net of related expenses, segment income of the Consumer Packaging segment for the quarter ended June 30, 2010 decreased \$1.2 million. The decrease was primarily due to increased recycled fiber and virgin fiber costs, which were largely offset by higher paperboard volumes and selling prices and higher folding carton volumes, decreased chemical costs and continued operational improvements. At our mills, chemical costs decreased approximately \$2.3 million, or \$9 per ton. Recycled fiber and virgin fiber costs increased approximately \$10.2 million, or \$69 per ton, and \$5.6 million, or \$51 per ton, respectively, over the prior year quarter. Freight expense increased \$3.4 million due in part to higher volumes and pension expense increased \$2.2 million over the third quarter of fiscal 2009.

Segment income of the Consumer Packaging segment for the nine months ended June 30, 2010 increased primarily due to higher paperboard volumes and higher folding carton selling prices and volumes, decreased energy and chemical costs, continued operational improvements and the impact of the first quarter of fiscal 2009 Demopolis maintenance outage on the prior year period, which were partially offset by increased recycled fiber and virgin fiber costs, lower recycled paperboard selling prices and a \$3.9 million decrease in alternative fuel tax credit in the current nine months compared to the prior year period. Chemical and energy costs decreased approximately \$11.2 million, or \$14 per ton, and \$2.9 million, or \$4 per ton, respectively, and bad debt expense decreased \$1.6 million compared to the prior year period. Recycled fiber and virgin fiber costs increased approximately \$21.0 million, or \$48 per ton, and \$9.7 million, or \$30 per ton, respectively, over the prior year period. Pension expense increased \$6.0 million, freight expense increased \$5.2 million, in part due to higher paperboard volumes, group insurance expense increased \$1.2 million and commissions expense increased \$1.0 million compared to the nine months ended June 30, 2010.

Net sales of the Corrugated Packaging segment increased \$24.0 million in the third quarter of fiscal 2010 compared to the prior year third quarter due to higher volumes and generally higher selling prices. Containerboard tons shipped increased 20.7%.

Net sales of the Corrugated Packaging segment increased \$15.4 million in the nine months ended June 30, 2010 compared to the prior year period due to higher volumes which were partially offset by lower selling prices. Containerboard tons shipped increased 15.9%.

*Segment Income (Corrugated Packaging Segment)*

## Edgar Filing: Rock-Tenn CO - Form 10-Q

Segment income attributable to the Corrugated Packaging segment for the third quarter of fiscal 2010 decreased \$13.7 million compared to the prior year third quarter due primarily to higher recycled fiber and chemical costs, which were partially offset by higher volumes and higher containerboard selling prices. At our containerboard mills, recycled fiber and chemical costs increased approximately \$23.7 million, or \$97 per ton, and approximately \$1.1 million, or \$4 per ton, respectively, over the prior year quarter, and freight expenses increased \$2.1 million due in part to higher volumes.

**Table of Contents**

Segment income attributable to the Corrugated Packaging segment for the nine months ended June 30, 2010 decreased \$50.3 million compared to the prior year period due primarily to higher recycled fiber and chemical costs and decreased selling prices, which were partially offset by higher volumes and lower energy costs. At our containerboard mills, recycled fiber and chemical costs increased approximately \$52.5 million, or \$74 per ton, and approximately \$4.1 million, or \$6 per ton, respectively, over the prior year period. Additionally, freight expense increased \$4.7 million due in part to higher volumes. Partially offsetting these increases in expense, energy costs decreased approximately \$2.0 million, or \$3 per ton, over the prior year period.

*Net Sales (Merchandising Displays Segment)*

Net sales for the Merchandising Displays segment increased \$8.2 million in the third quarter of fiscal 2010 compared to the prior year third quarter primarily due to higher demand for promotional displays. Net sales for the Merchandising Displays segment decreased \$5.6 million in the nine months ended June 30, 2010 compared to the prior year period.

*Segment Income (Merchandising Displays Segment)*

Segment income attributable to the Merchandising Displays segment for the third quarter of fiscal 2010 increased \$0.4 million compared to the prior year third quarter. Bonus expense decreased \$1.4 million and freight expense increased \$1.1 million due in part to higher volumes. Segment income attributable to the Merchandising Displays segment for the nine months ended June 30, 2010 increased \$1.0 million compared to the prior year period due to decreased bonus expense of \$3.0 million and cost reduction initiatives. Partially offsetting these improvements was increased freight expense of \$1.8 million due in part to higher volumes.

*Net Sales (Specialty Paperboard Products Segment)*

Our Specialty Paperboard Products segment net sales in the third quarter of fiscal 2010 increased 25.1% compared to the third quarter of fiscal 2009 primarily due to higher paperboard and recycled fiber volumes and higher selling prices. Specialty paperboard tons shipped increased 10.6%.

Our Specialty Paperboard Products segment net sales in the nine months ended June 30, 2010 increased 22.5% compared to the nine months ended June 30, 2009 primarily due to higher paperboard volumes and increased recycled fiber volumes and selling prices, which were partially offset by lower paperboard and other selling prices and lower interior packaging volumes. Specialty paperboard tons shipped increased 9.6%.

*Segment Income (Specialty Paperboard Products Segment)*

Segment income attributable to the Specialty Paperboard Products segment for the third quarter of fiscal 2010 decreased \$1.4 million compared to the prior year third quarter. This decrease was due primarily to increased recycled fiber prices of approximately \$5.1 million, or \$79 per ton, and lower interior packaging volumes which was partially offset by higher paperboard volumes and selling prices and increased recycled fiber volumes and other selling prices.

Segment income attributable to the Specialty Paperboard Products segment for the nine months ended June 30, 2010 increased \$0.1 million compared to the prior year period. This increase was due primarily to higher paperboard volumes and increased recycled fiber volumes and selling prices, which were partially offset by increased recycled fiber prices of approximately \$10.0 million, or \$55 per ton, lower paperboard selling prices and lower interior packaging volumes. The impact of decreased energy costs was approximately \$1.9 million, or \$10 per ton, over the prior year period, and group insurance expense decreased \$1.1 million. These decreases were partially offset by increased pension expense of \$2.5 million and increased freight expense of \$1.4 million due in part to higher volumes.

**Liquidity and Capital Resources**

We fund our working capital requirements, capital expenditures and acquisitions from net cash provided by operating activities, borrowings under term notes, our receivables-backed financing facility and bank credit facilities, proceeds from the sale of discontinued assets, and proceeds received in connection with the issuance of industrial development revenue bonds as well as other debt and equity securities.

## Edgar Filing: Rock-Tenn CO - Form 10-Q

Cash and cash equivalents was \$11.4 million at June 30, 2010, and \$11.8 million at September 30, 2009. During the nine months ended June 30, 2010, Net Debt (as hereinafter defined) decreased \$233.2 million. Excluding the impact of potential changes from utilizing the cellulosic biofuel producer credit instead of the alternative fuel tax credit, we expect modest upside to our earlier estimate that our operating cash flows will enable us to fund dividends and decrease Net Debt by approximately \$285 to \$290 million in the full fiscal year. Our estimate includes a \$26 million tax refund we received in the second quarter of fiscal 2010 related primarily to the collection of the remaining alternative fuel tax credits from fiscal 2009 and reducing fiscal 2010 cash tax payments by approximately

**Table of Contents**

\$23 million utilizing our fiscal 2010 alternative fuel tax credits by the end of the third quarter of fiscal 2010. Additionally, we expect operating cash flows to benefit from deferred income tax expense in fiscal 2010 of approximately \$23 million. However, it is possible that our expected decrease in Net Debt or our expected deferred income tax expense may vary due to changes in income or other factors.

We use interest rate swap instruments from time to time to manage our exposure to changes in interest rates on portions of our outstanding debt. At the inception of the swaps we usually designate such swaps as either cash flow hedges or fair value hedges of the interest rate exposure on an equivalent amount of our floating rate or fixed rate debt, respectively. At June 30, 2010, we had certain pay-fixed, receive-floating interest rate swaps that terminate in April 2012 and cover debt with an aggregate notional amount of \$341 million, declining at periodic intervals to an aggregate notional amount of \$132 million prior to expiration. These swaps are based on the one-month LIBOR rate, and the fixed rates average 4.00%. On July 1, 2010, the aggregate notional amount of these swaps declined to \$298 million.

On March 5, 2008, we entered into a Credit Facility with an original maximum principal amount of \$1.2 billion and issued \$200.0 million aggregate principal amount of 9.25% senior notes due March 2016. The Credit Facility originally included a \$450 million revolving credit facility, a \$550 million term loan A facility and a \$200 million term loan B facility. The Credit Facility is pre-payable at any time. Scheduled term loan payments or other term loan payments reduce the facility size. On February 8, 2010, we repaid the \$120 million outstanding balance of term loan B with proceeds from our revolving credit facility and recorded a net loss on extinguishment of debt of approximately \$3.3 million primarily for the write off of unamortized deferred financing costs and original issuance discount.

The revolving credit facility and term loan A facility are scheduled to mature on the earlier to occur of (a) March 5, 2013 or (b) if our March 2013 Notes have not been paid in full or refinanced by September 15, 2012, then September 15, 2012. Certain restrictive covenants govern our maximum availability under this facility, including Minimum Consolidated Interest Ratio Coverage; Maximum Leverage Ratio; and Minimum Consolidated Net Worth (as those terms are defined in the Credit Facility). We test and report our compliance with these covenants each quarter. We are in compliance with all of our covenants. Our available borrowings under the revolving credit portion of the Credit Facility, reduced by outstanding letters of credit not drawn upon of approximately \$30.6 million, were \$398.3 million at June 30, 2010. The March 2016 Notes are guaranteed by the guarantors listed therein (comprising most of our subsidiaries which are guarantors under the Credit Facility). The senior note indenture contains financial and restrictive covenants, including limitations on restricted payments, dividend and other payments affecting restricted subsidiaries (as defined therein), incurrence of debt, asset sales, transactions with affiliates, liens, sale and leaseback transactions and the creation of unrestricted subsidiaries.

In fiscal 2009, we amended our Credit Facility to, among other things, allow us to refinance the March 2016 Notes and to redeem, repurchase, defease, purchase prior to maturity or prepay the August 2011 Notes and/or the March 2013 Notes in an aggregate amount not to exceed (i) an annual limit of \$85 million in any fiscal year plus, at the beginning of the fiscal year ending September 30, 2011, \$85 million plus the unused amount available under the annual limit for the immediately preceding fiscal year and (ii) \$170 million for all such redemptions, repurchases, defeasances, purchases or prepayments (collectively, the repurchases), subject in each case to certain conditions. Such repurchases are available to us as long as no default or event of default has occurred or would be directly or indirectly caused as a result thereof, subject to availability under the Aggregate Revolving Committed Amount (as defined in the Credit Facility, as amended) of at least \$300 million. In addition, when the Leverage Ratio does not exceed 3.00 to 1.00 after giving effect to all such repurchases on a Pro Forma Basis, as such terms are defined in the Credit Facility, as amended, we may repurchase an additional \$100 million of the August 2011 Notes and/or March 2013 Notes. On February 3, 2010, we amended our Credit Facility to, among other things, adjust our ability to borrow unsecured debt subject to certain conditions outlined in the amendment, including a maximum Leverage Ratio, calculated on a pro forma basis, not to exceed 3.50 to 1.00, if such indebtedness is incurred through and including June 30, 2011, and 3.25 to 1.00 if such indebtedness is incurred at any time thereafter. In conjunction with this amendment, we repaid the \$120.0 million outstanding term loan B balance with proceeds from our revolving credit facility.

In fiscal 2009, we amended the Receivables Facility and extended the maturity to set it to expire on July 13, 2012 and increased the facility size to \$135.0 million. Borrowing availability under this facility is based on the eligible underlying receivables and certain covenants. We test and report our compliance with these covenants monthly. We are in compliance with all of our covenants. At June 30, 2010, we had \$40.0 million outstanding under the Receivables Facility and maximum available borrowings, excluding amounts outstanding, under this facility were approximately \$135.0 million. For additional information regarding our outstanding debt, our credit facilities and

Net cash provided by operating activities during the nine months ended June 30, 2010 and 2009 was \$313.0 million and \$272.3 million, respectively. The increase was primarily due to the receipt of our \$26 million 2009 federal income tax refund during the second quarter of fiscal 2010 which was primarily due to alternative fuel tax credits and a smaller net reduction in operating assets and liabilities in the current year period compared to the prior year period.

Net cash used for investing activities was \$57.3 million during the nine months ended June 30, 2010 compared to \$41.1 million for the comparable period of the prior year. Net cash used for investing activities in the nine months ended June 30, 2010 consisted primarily of \$60.9 million of capital expenditures. Net cash used for investing activities for the nine months ended June 30, 2009 consisted primarily of \$49.3 million of capital expenditures, \$4.5 million of cash paid for the purchase of a business which was partially offset by \$8.5 million received from escrow and disbursed to employees for deferred compensation payments as required under the Southern Container acquisition. We used these capital expenditures primarily for the purchase and upgrading of machinery and equipment. We estimate that our capital expenditures will aggregate approximately \$105 million in fiscal 2010, including the current year portion of a two-year estimated \$25 million project to build a second chip mill at our Demopolis, Alabama bleached paperboard mill. However, some portion of the \$105 million may carry over into fiscal 2011. Included in our fiscal 2010 capital expenditures estimate is approximately \$5 million for capital expenditures that we expect to spend in connection with matters relating to environmental and safety compliance.

Net cash used for financing activities was \$256.4 million during the nine months ended June 30, 2010 compared to \$267.4 million in the same period last year. In the first nine months ended June 30, 2010 net cash used for financing activities consisted primarily of net repayments of debt aggregating \$235.0 million and cash dividends paid to shareholders of \$17.5 million. In the first nine months ended June 30, 2009 net cash used for financing activities consisted primarily of net repayments of debt aggregating \$261.0 million and cash dividends paid to shareholders of \$11.5 million, which was partially offset by the usage of restricted cash and investments of \$19.2 million.

Based on current facts and assumptions, we expect our cash tax payments to be less than income tax expense in each of fiscal 2010, 2011 and 2012.

We made contributions of \$20.2 million to our U.S. Qualified Plans during the nine months ended June 30, 2010. Based on current facts and assumptions, we do not anticipate making additional contributions in fiscal 2010 to the U.S. Qualified Plans and estimate contributions of approximately \$30 million in fiscal 2011. However, it is possible that our assumptions may change, actual market performance may vary or we may decide to contribute different amounts. Fiscal 2010 contributions are expected to be less than the aggregate of our U.S. Qualified Plans expense of approximately \$26 million, our SERP expense of approximately \$5 million and our multi-employer plans of approximately \$2 million. The SERP plan is an unfunded plan and the multi-employer plans are funded via monthly premiums.

In July 2010, our board of directors approved our August 2010 quarterly dividend of \$0.15 per share and in May 2010, February 2010 and November 2009, we paid a quarterly dividend of \$0.15 per share, indicating an annualized dividend of \$0.60 per share in fiscal 2010 on our common stock.

In connection with prior dispositions of assets and/or subsidiaries, we have made certain guarantees to third parties as of June 30, 2010. Our specified maximum aggregate potential liability (on an undiscounted basis) is approximately \$8 million, other than with respect to certain specified liabilities, including liabilities relating to title, taxes and certain environmental matters, with respect to which there may be no limitation. We estimate the fair value of our aggregate liability for outstanding indemnities, including the indemnities described above with respect to which there are no limitations, to be immaterial. For additional information regarding our guarantees, see *Note 14. Commitments and Contingencies* of the Notes to Condensed Consolidated Financial Statements included herein.

We anticipate that we will be able to fund our capital expenditures, interest payments, stock repurchases, dividends, pension payments, working capital needs, bond repurchases, and repayments of current portion of long-term debt for the foreseeable future from cash generated from operations, borrowings under our Credit Facility and Receivables Facility, proceeds from the issuance of debt or equity securities or other additional long-term debt financing, including new or amended facilities to finance acquisitions.

See *Note 2. New Accounting Standards* of the Notes to Condensed Consolidated Financial Statements included herein for a full description of recent accounting pronouncements including the respective expected dates of adoption and expected effects on results of operations and financial condition.

**Non-GAAP Measures**

We have included in the discussion under the caption *Management's Discussion and Analysis of Financial Condition and Results of Operations Liquidity and Capital Resources* above a financial measure that was not prepared in accordance with GAAP. Any analysis of non-GAAP financial measures should be used only in conjunction with results presented in accordance with GAAP. Below, we define the non-GAAP financial measure, provide a reconciliation of the non-GAAP financial measure to the most directly comparable financial measure calculated in accordance with GAAP, and discuss the reasons that we believe this information is useful to management and may be useful to investors.

**Net Debt**

We have defined the non-GAAP measure Net Debt to include the aggregate debt obligations reflected in our balance sheet, less the hedge adjustments resulting from terminated and existing fair value interest rate derivatives or swaps, the balance of our cash and cash equivalents, restricted cash (which includes the balance sheet line items restricted cash and restricted cash and marketable debt securities) and certain other investments that we consider to be readily available to satisfy such debt obligations.

Our management uses Net Debt, along with other factors, to evaluate our financial condition. We believe that Net Debt is an appropriate supplemental measure of financial condition and may be useful to investors because it provides a more complete understanding of our financial condition before the impact of our decisions regarding the appropriate use of cash and liquid investments. Net Debt is not intended to be a substitute for GAAP financial measures and should not be used as such.

Set forth below is a reconciliation of Net Debt to the most directly comparable GAAP measures, *Current Portion of Debt* and *Total Long-Term Debt* (in millions):

	June 30, 2010	September 30, 2009	March 31, 2008
Current Portion of Debt	\$ 72.3	\$ 56.3	\$ 247.7
Total Long-Term Debt	1,042.0	1,293.1	1,606.8
	1,114.3	1,349.4	1,854.5
Less: Hedge Adjustments Resulting From Terminated Fair Value Interest Rate Derivatives or Swaps	(2.3)	(3.8)	(7.6)
	1,112.0	1,345.6	1,846.9
Less: Cash and Cash Equivalents	(11.4)	(11.8)	(56.6)
Less: Restricted Cash	0.0	0.0	(19.5)
<b>Net Debt</b>	<b>\$ 1,100.6</b>	<b>\$ 1,333.8</b>	<b>\$ 1,770.8</b>

**Forward-Looking Statements**

We make statements in this report that constitute forward-looking statements within the meaning of the federal securities laws, including statements regarding, among other things, the timing and impact of alternative fuel tax credits and cellulosic biofuel producer credits, the impact of operational restructuring activities, including the cost and timing of such activities, the size and cost of employment terminations, operational consolidation, capacity utilization, cost reductions and production efficiencies, estimated fair values of assets, and returns from planned asset transactions, and the impact of such factors on earnings; potential liability for outstanding guarantees and indemnities and the potential impact of such liabilities; the impact of economic conditions, including the nature of the current market environment, raw material and energy costs and

market trends or factors that affect such trends, such as expected price increases, competitive pricing pressures and cost increases, as well as the impact and continuation of such factors; our results of operations, including operational inefficiencies, costs, sales growth or declines, the timing

and impact of customer transitioning, the impact of announced price increases and the impact of the gain and loss of customers; pension plan contributions and expense, funding requirements and earnings; environmental law liability as well as the impact of related compliance efforts, including the cost of required improvements and the availability of certain indemnification claims; capital expenditures; the cost and other effects of complying with governmental laws and regulations and the timing of such costs; income tax rates, future deferred tax expense and future cash tax payments; future debt repayment; our ability to fund capital expenditures, interest payments, stock repurchases, dividends, pension payments, working capital needs, bond repurchases and debt for the foreseeable future from available cash and the proceeds from borrowings and security issuances; our estimates and assumptions regarding our contractual obligations and the impact of our contractual obligations on our liquidity and cash flow; the impact of changes in assumptions and estimates underlying accounting policies; the expected impact of implementing new accounting standards; and the impact of changes in assumptions and estimates on which we based the design of our system of disclosure controls and procedures. Such statements are based on our current expectations and beliefs and are subject to certain risks and uncertainties that could cause actual results to differ materially from those expressed or implied in any forward-looking statement. With respect to these statements, we have made assumptions regarding, among other things, economic, competitive and market conditions; volumes and price levels of purchases by customers; competitive conditions in our businesses; possible adverse actions of our customers, our competitors and suppliers; labor costs; the amount and timing of capital expenditures, including installation costs, project development and implementation costs, severance and other shutdown costs; restructuring costs; utilization of real property that is subject to the restructurings due to realizable values from the sale of such property; credit availability; volumes and price levels of purchases by customers; raw material and energy costs; and competitive conditions in our businesses. Management believes its assumptions are reasonable; however, undue reliance should not be placed on such estimates, which are based on current expectations. These forward-looking statements are subject to certain risks including, among others, that our assumptions will prove to be inaccurate. There are many factors that impact these forward-looking statements that we cannot predict accurately. Actual results may vary materially from current expectations, in part because we manufacture most of our products against customer orders with short lead times and small backlogs. Our earnings are dependent on volume due to price levels and fixed operating costs. Further, our business is subject to a number of general risks that would affect any such forward-looking statements including, among others, decreases in demand for our products; increases in energy, raw material, shipping and capital equipment costs; reduced supplies of raw materials; fluctuations in selling prices and volumes; intense competition; our ability to identify, complete, integrate or finance acquisitions; the potential loss of certain customers; adverse changes in and the cost of complying with extensive governmental regulations; and adverse changes in general market and industry conditions. Such risks are more particularly described in our filings with the SEC, including under the caption **Business Forward-Looking Information and Risk Factors** in our Fiscal 2009 Form 10-K. Further, forward-looking statements speak only as of the date they are made, and we do not have or undertake any obligation to update any such information as future events unfold.

**Item 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK**

For a discussion of certain of the market risks to which we are exposed, see the **Quantitative and Qualitative Disclosures About Market Risk** section in our Fiscal 2009 Form 10-K.

**Item 4. CONTROLS AND PROCEDURES**

Our Chief Executive Officer and our Chief Financial Officer evaluated the effectiveness of our disclosure controls and procedures (as defined in Rule 13a-15(e)) under the Securities Exchange Act of 1934 (the **Exchange Act**) as of the end of the period covered by this quarterly report. Based on that evaluation, our Chief Executive Officer and our Chief Financial Officer concluded that our disclosure controls and procedures were effective to ensure that information required to be disclosed by us in reports we file or submit under the Exchange Act is (i) recorded, processed, summarized, and reported within the time periods specified in the SEC's rules and forms, and (ii) is accumulated and communicated to our management, including our Chief Executive Officer and our Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosures.

There has been no change in our internal control over financial reporting identified in connection with the evaluation required by paragraph (d) of Exchange Act Rules 13a-15 or 15d-15 that occurred during our last fiscal quarter that has materially affected, or is reasonably likely to materially affect, our internal controls over financial reporting.

**PART II: OTHER INFORMATION**

**Item 1.     *LEGAL PROCEEDINGS***

We are a party to litigation incidental to our business from time to time. We are not currently a party to any litigation that management believes, if determined adversely to us, would have a material adverse effect on our results of operations, financial condition or cash flows.
