Key Objectives: Occam Networks Customers

The BLC6000 has substantial footprint and a loyal customer base. Our intent is to integrate the B-Series (BLC6000) into the Unified Access portfolio, and continue to invest in the platform in the following ways:

Plan to integrate the B-Series into the Unified Access portfolio, allowing it to reside on the same Ethernet ring with C- and E-Series platforms

Plan to combine our respective ONT portfolios to make what we believe to be the industry's broadest portfolio of ONTs, and support that portfolio across all three Calix platforms—the B-Series, the C-Series, and the E-Series

Plan to integrate the B-Series into the Calix Management System, or CMS, providing a single, broad, and mature management system across the expanded Unified Access portfolio, and complement CMS with valuable new tools from the Occam Networks inventory

Plan to enhance the Unified Access portfolio to support a broader set of voice protocols, including SIP, H.248, MGCP, as well as legacy TDM protocols

We believe that the net result of these initiatives will accelerate opportunities for our expanded customer base and substantially broaden the Calix Unified Access portfolio.
