Notes to Condensed Consolidated Financial Statements

(unaudited)

(1) Summary of Significant Accounting Policies

Basis of Presentation

The accompanying unaudited condensed consolidated financial statements include the accounts of Saia, Inc. and its wholly-owned regional transportation subsidiary, Saia Motor Freight Line, LLC (together, the Company or Saia). All significant intercompany accounts and transactions have been eliminated in the condensed consolidated financial statements.

The condensed consolidated financial statements have been prepared by the Company without audit by the independent registered public accounting firm. In the opinion of management, all normal recurring adjustments necessary for a fair presentation of the condensed consolidated balance sheets, results of operations and cash flows for the interim periods included herein have been made. These interim condensed consolidated financial statements of the Company have been prepared in accordance with U.S. generally accepted accounting principles for interim financial information, the instructions to Quarterly Report on Form 10-Q and Rule 10-01 of Regulation S-X. Certain information and note disclosures normally included in financial statements prepared in accordance with U.S. generally accepted accounting principles have been condensed or omitted from these statements. The accompanying condensed consolidated financial statements should be read in conjunction with the Company s Annual Report on Form 10-K for the year ended December 31, 2011. Operating results for the quarter ended March 31, 2012 are not necessarily indicative of the results of operations that may be expected for the year ended December 31, 2012.

Business

The Company provides regional and interregional less-than-truckload (LTL) services, selected national LTL and time-definite services across the United States through its wholly-owned subsidiary, Saia Motor Freight Line, LLC (Saia Motor Freight).

New Accounting Pronouncements

There are no new accounting pronouncements pending adoption as of March 31, 2012 that the Company believes would have a significant impact on its condensed consolidated financial statements.

(2) Computation of Earnings (Loss) Per Share

The calculation of basic earnings (loss) per common share and diluted earnings (loss) per common share was as follows (in thousands, except per share amounts):

6

	First Q 2012	Quarter 2011
Numerator:		
Net income	\$ 5,535	\$ 713
Denominator:		
Denominator for basic earnings per share weighted average common shares	15,833	15,768
Effect of dilutive stock options	72	45
Effect of other common stock equivalents	453	306
Denominator for diluted earnings per share adjusted weighted average		
common shares	16,358	16,119
Basic Earnings Per Share	\$ 0.35	\$ 0.05
Diluted Earnings Per Share	\$ 0.34	\$ 0.04

For the quarters ended March 31, 2012 and 2011, respectively, options to purchase 394,759 and 234,820 shares of common stock of the Company were excluded from the calculation of diluted earnings per share because their effect was anti-dilutive.

(3) Commitments and Contingencies

The Company is subject to legal proceedings that arise in the ordinary course of its business. In the opinion of management, the aggregate liability, if any, with respect to these actions will not have a material adverse effect on our consolidated financial position but could have a material adverse effect on the results of operations in a quarter or annual period.

(4) Fair Value of Financial Instruments

The carrying amounts of financial instruments including cash and cash equivalents, accounts receivable, accounts payable and short-term debt approximated fair value as of March 31, 2012 and December 31, 2011 because of the relatively short maturity of these instruments. Based on the borrowing rates currently available to the Company for debt with similar items and remaining maturities the estimated fair value of total debt at March 31, 2012 and December 31, 2011 was \$90.1 million and \$76.5 million, respectively, based upon level two in the fair value hierarchy. The carrying value of the debt was \$86.5 million and \$72.9 million at March 31, 2012 and December 31, 2011.

Item 2. Management s Discussion and Analysis of Financial Condition and Results of Operations

This Management s Discussion and Analysis should be read in conjunction with the accompanying unaudited condensed consolidated financial statements and our 2011 audited consolidated financial statements included in the Company s Annual Report on Form 10-K for the year ended December 31, 2011. Those consolidated financial statements include additional information about our significant accounting policies, practices and the transactions that underlie our financial results.

Forward-Looking Statements

The Securities and Exchange Commission (the SEC) encourages companies to disclose forward-looking information so that investors can better understand the future prospects of a company and make informed investment decisions. This Quarterly Report on Form 10-Q, including Management s Discussion and Analysis of Financial Condition and Results of Operations, contains these types of statements, which are forward-looking within the meaning of the Private Securities Litigation Reform Act of 1995. Words such as anticipate, estimate, expect, may, plan, predict, believe, should and similar words or expressions are intended to identify forward-looking statements. Investor not place undue reliance on forward-looking statements, and the Company undertakes no obligation to publicly update or revise any forward-looking statements. All forward-looking statements reflect the present expectation of future events of our management as of the date of this Quarterly Report on Form 10-Q and are subject to a number of important factors, risks, uncertainties and assumptions that could cause actual results to differ materially from those described in any forward-looking statements. These factors, risks, assumptions and uncertainties include, but are not limited to, general economic conditions including downturns in the business cycle; the creditworthiness of our customers and their ability to pay for services; competitive initiatives and pricing pressures, including in connection with fuel surcharge; the Company s need for capital and uncertainty of the current credit markets; the possibility of defaults under the Company s debt agreements (including violation of financial covenants); possible issuance of equity which would dilute stock ownership; indemnification obligations associated with the 2006 sale of Jevic Transportation, Inc.; the effect of litigation including class action lawsuits; cost and availability of qualified drivers, fuel, purchased transportation, real property, revenue equipment and other assets; governmental regulations, including but not limited to Hours of Service, engine emissions, the Compliance, Safety, Accountability (CSA) initiative, compliance with legislation requiring companies to evaluate their internal control over financial reporting, changes in interpretation of accounting principles and Homeland Security; dependence on key employees; inclement weather; labor relations, including the adverse impact should a portion of the Company s workforce become unionized; effectiveness of Company-specific performance improvement initiatives; terrorism risks; self-insurance claims and other expense volatility; increased costs as a result of recently-enacted healthcare reform legislation and other financial, operational and legal risks and uncertainties detailed from time to time in the Company s SEC filings. These factors and risks are described in Item 1A. Risk Factors of the Company s Annual Report on Form 10-K for the year ended December 31, 2011, as updated by Item 1A. of this Quarterly Report on Form 10-Q.

As a result of these and other factors, no assurance can be given as to our future results and achievements. Accordingly, a forward-looking statement is neither a prediction nor a guarantee of future events or circumstances and those future events or circumstances may not occur. You should not place undue reliance on the forward-looking statements, which speak only as of the date of this Form 10-Q. We are under no obligation, and we expressly disclaim any obligation, to update or alter any forward-looking statements, whether as a result of new information, future events or otherwise.

Executive Overview

The Company s business is highly correlated to non-service sectors of the general economy. The Company s strategy is to improve profitability by increasing yield while also increasing volumes to build density in existing geography to increase profits. The Company s business is labor intensive, capital intensive and service sensitive. The Company looks for opportunities to improve cost effectiveness, safety and asset utilization (primarily tractors and trailers). The pricing initiatives that were implemented in 2010 and continued through 2011 and the first quarter of 2012 have had a positive impact on yield and profitability. The Company continues to execute targeted sales and marketing programs along with initiatives to align costs with volumes and improve customer satisfaction. Technology continues to be an important investment that is contributing to our Company image and building on operational efficiencies.

8

The Company s operating revenue increased by 10.6 percent in first quarter of 2012 compared to the same period in 2011. The increase resulted primarily from improved yield from pricing actions and higher fuel surcharge along with improved tonnage.

Consolidated operating income was \$11.0 million for the first quarter of 2012 compared to consolidated operating income of \$4.1 million in the first quarter of 2011. In the first quarter of 2012, less-than-truckload (LTL) tonnage per workday was up 2.6 percent versus the prior year quarter while LTL yield improved 7.9 percent. Diluted earnings per share was \$0.34 in the first quarter of 2012, compared to earnings per share of \$0.04 in the prior year quarter. The operating ratio (operating expenses divided by operating revenue) was 95.9 percent in the first quarter of 2012. This compares to 98.3 percent in the first quarter of 2011.

The Company had \$24.0 million in cash provided by operating activities through the first three months of 2012 compared with cash used in the amount of \$1.0 million in the prior-year period. The Company had net cash used in investing activities of \$39.2 million during the first three months of 2012 for the purchase of property and equipment compared to \$6.0 million in the first three months of 2011. The Company s cash provided by financing activities was \$13.9 million through the first three months of 2012 compared to zero in the prior year period. The Company had \$13.6 million in net borrowings under its revolving credit agreement, outstanding letters of credit of \$49.7 million and cash and cash equivalents balance of \$60.0 thousand at March 31, 2012. The Company was in compliance with the debt covenants under its debt agreements at March 31, 2012.

General

The following Management s Discussion and Analysis of Financial Condition and Results of Operations describes the principal factors affecting the results of operations, liquidity and capital resources, as well as the critical accounting policies of Saia, Inc. and its wholly-owned subsidiary, Saia Motor Freight, LLC (also referred to as Saia or the Company).

The Company is an asset-based transportation company based in Johns Creek, Georgia providing regional, interregional and long haul LTL services, along with guaranteed, expedited and limited TL service solutions to a broad base of customers across the United States through, Saia Motor Freight Line, LLC (Saia Motor Freight).

Our business is highly correlated to non-service sectors of the general economy. It also is impacted by a number of other factors discussed under Forward-Looking Statements and Item 1A. Risk Factors section of this Form 10-Q. The key factors that affect our operating results are the volumes of shipments transported through our network, as measured by our average daily shipments and tonnage; the prices we obtain for our services, as measured by revenue per hundredweight (a measure of yield) and average revenue per shipment; our ability to manage our cost structure for capital expenditures and operating expenses such as salaries, wages and benefits; purchased transportation; claims and insurance expense; fuel and maintenance; and our ability to match operating costs to shifting volume levels. Fuel surcharges have remained in effect for several years and are a significant component of revenue and pricing. Fuel surcharges are an integral part of annual customer contract renewals which blur the distinction between base price increases and recoveries under the fuel surcharge program.

9

Total Revenue per hundredweight	\$ 12.19	\$ 11.28	8.1

Quarter ended March 31, 2012 vs. Quarter ended March 31, 2011

Revenue and volume

Consolidated revenue increased 10.6 percent to \$268.7 million as a result of increased yield due to measured pricing actions and higher fuel surcharges along with increased tonnage. Improvements in the economic environment during 2010 and 2011 permitted the Company to implement measured pricing actions to improve yield. These pricing initiatives were initially implemented in 2010 and continued to have an increasingly positive impact on yield and profitability through 2011 and into the first quarter of 2012.

Saia s LTL revenue per hundredweight (a measure of yield) increased 7.9 percent to \$13.45 per hundredweight for the first quarter of 2012 as a result of increased rates and the impact of higher fuel surcharge. Saia s LTL tonnage increased 2.6 percent to 0.9 million tons, with some of the increase due to the benefit of milder winter weather in 2012. LTL shipments decreased 0.6 percent to 1.6 million shipments. Approximately 70 percent of Saia s operating revenue is subject to specific customer price adjustment negotiations that occur throughout the year. The remaining 30 percent of operating revenue is subject to an annual general rate increase. On August 22, 2011, Saia implemented a 6.9 percent general rate increase for customers comprising this 30 percent of operating revenue. Competitive factors, customer turnover and mix changes, among other things, impact the extent to which customer rate increases are retained over time.

Edgar Filing: SAIA INC - Form 10-Q

10

Operating expenses and operating income (loss)

Consolidated operating income was \$11.0 million in the first quarter of 2012 compared to operating income of \$4.1 million in the prior year quarter. Overall, the operations were favorably impacted by higher yield combined with continued cost optimization initiatives throughout our network and milder winter weather in 2012. Salaries, wages and benefits increased \$9.0 million over the first quarter of 2011 largely due to increased tonnage and headcount, a 2.5 percent wage increase in December 2011 and increased healthcare costs. The first quarter 2012 operating ratio (operating expenses divided by operating revenue) was 95.9 compared to 98.3 for the same period in 2011. Higher fuel prices and fuel volumes resulted in \$5.3 million of the increase in fuel, operating expenses and supplies. Additionally, an increase in fleet maintenance costs contributed to the increase in fuel, operating expenses and supplies. During the first quarter of 2012, accident expense was \$1.4 million lower than the previous year quarter due to decreased accident severity. The Company can experience volatility in accident expense as a result of its self-insurance structure and \$2.0 million retention limits per occurrence. Depreciation expense increased \$2.8 million in the first quarter of 2012 compared to the first quarter of 2011 largely due to revenue equipment and technology investments in 2011 and the first quarter of 2012.

Other

Substantially all non-operating expenses represent interest expense. The interest expense in first quarter 2012 was lower due to lower borrowings and a lower interest rate in 2012. The effective tax rate was 39.7 percent for the quarter ended March 31, 2012 and March 31, 2011 reflecting improved results virtually offset by the expiration of tax credits.

Net income was \$5.5 million or \$0.34 per diluted share in the first quarter of 2012 compared to a net income of \$0.7 million, or \$0.04 per share, in the first quarter of 2011.

Working capital/capital expenditures

Working capital at March 31, 2012 was \$6.2 million which decreased from working capital at March 31, 2011 of \$54.3 million. Current assets decreased by \$13.3 million and includes decreases in cash and cash equivalents partially offset by increases in accounts receivable. The decrease in cash and cash equivalents over the last year reflects the significant amount of capital expenditures during that time. The decrease in current assets was more than offset by an increase in current liabilities of \$34.7 million and included an increase in accounts payable, current portion of long-term debt and other liabilities. Cash flows provided by operating activities for continuing operations were \$24.0 million for the three months ended March 31, 2012 versus \$1.0 million used in operating activities for the three months ended March 31, 2011. For the three months ended March 31, 2012, cash used in investing activities was \$39.2 million versus \$6.0 million in the prior year period due to higher property and equipment purchases, primarily revenue equipment. For the three months ended March 31, 2012, net cash provided by financing activities was \$13.9 million compared to zero in the prior year period.

Outlook

Our business remains highly correlated to the general economy and competitive pricing pressures, as well as the success of Company-specific improvement initiatives. While improved through 2011 and into the first quarter of 2012, there remains uncertainty as to the timing and strength of economic recovery through 2012. We are continuing initiatives to increase yield, to reduce costs and improve productivity. We focus on providing top quality service and improving safety performance. If significant competitors were to cease operations and their capacity leave the market, current industry excess capacity conditions could improve. However, there can be no assurance that any industry consolidation will indeed happen or if such consolidation occurs that it will materially improve the excess industry capacity.

The Company continues to pursue revenue and cost initiatives to improve profitability. Planned revenue initiatives include, but are not limited to, building density in our current geography, targeted marketing initiatives to grow revenue in more profitable segments, as well as pricing and yield management. On August 22, 2011, Saia implemented a 6.9 percent general rate increase for customers comprising approximately 30 percent of Saia s operating revenue. The extent of success of these revenue initiatives is impacted by what proves to be the underlying economic trends, competitor initiatives and other factors discussed under Forward-Looking Statements and Item 1A. Risk Factors.

Planned cost management initiatives include, but are not limited to, seeking gains in productivity and asset utilization that collectively are designed to offset anticipated inflationary unit cost increases in healthcare, workers—compensation and all the other expense categories. Specific cost initiatives include linehaul routing optimization, reduction of utilization of purchased transportation, and utilization of in-cab technology to improve miles per gallon.

The following cost reductions taken in 2009 are subject to reinstatement in the future: the suspension of the Company s 401(k) match, one-half of which was reinstated effective April 1, 2011; effective reduction in compensation equal to ten percent of salary for the Company s leadership team and a five percent wage and salary reduction for hourly, linehaul and salaried employees in operations, maintenance and administration; and the ten percent reduction in the annual retainer and meeting fees paid to the non-employee members of the Company s Board of Directors. The Company implemented a two and one-half percent wage and salary increase for hourly, linehaul and salaried employees in operations, maintenance, administration and management which was effective December 1, 2011. In April 2012, the Company announced its plan to implement a salary and wage increase for all its employees of approximately three percent effective July 1, 2012. Based on the continued improvement in the Company s operating results, management took this step to attract and retain employees needed for the Company to continue to deliver best-in-class service to customers. The Company is committed to a market-based wage program. The impact of this salary and wage increase is expected to be approximately \$13 million annually. The Company anticipates the impact of this salary and wage increase to be partially offset by further productivity and efficiency gains.

If the Company builds market share, there are numerous operating leverage cost benefits. Conversely, should the economy soften from present levels, the Company plans to attempt to match resources and capacity to shifting volume levels to lessen unfavorable operating leverage. The success of cost improvement initiatives is also impacted by the cost and availability of drivers and purchased transportation, fuel, insurance claims, regulatory changes, successful implementation of profit improvement initiatives and other factors discussed under Forward-Looking Statements and Part II, Item 1A. Risk Factors.

See Forward-Looking Statements and Item 1A. Risk Factors for a more complete discussion of potential risks and uncertainties that could materially affect our future performance.

New Accounting Pronouncements

There are no new accounting pronouncements pending adoption as of March 31, 2012 that the Company believes would have a significant impact on its consolidated financial position or results of operations.

Financial Condition

The Company s liquidity needs arise primarily from capital investment in new equipment, land and structures, information technology and letters of credit required under insurance programs, as well as funding working capital requirements.

The Company is party to a revolving credit agreement (the Restated Credit Agreement) with a group of banks to fund capital investments, letters of credit and working capital needs. The facility provides up to \$150 million in availability, subject to a borrowing base and expires in November 2016. The Company is also party to a long-term note agreement (the Restated Master Shelf Agreement). In November 2011, the Company entered into amendments to the Restated Credit Agreement and Master Shelf Agreement, as discussed below. The Company entered into amendments in June and December 2009 to both agreements obtaining financial covenant relief through March 31, 2011. Pursuant to those amendments, the Company agreed to increases in interest rates, letter of credit fees and certain other fees and pledged certain real estate and facilities, tractors and trailers, accounts receivable and other assets to secure indebtedness under both agreements.

Restated Credit Agreement

In November 2011, the Restated Credit Agreement was amended to increase the revolving credit facility from \$120 million to \$150 million, which resulted in amendment fees of \$1.0 million in the fourth quarter of 2011. The amendment added an accordion feature that allows for an additional \$40 million, subject to lender approval, to the total commitments under the Restated Credit Agreement. Additionally, the maturity has been extended to November 2016. The November 2011 amendment (effective as of November 30, 2011) provides for a LIBOR rate margin range from 200 basis points to 300 basis points, base rate margins from zero to 75 basis points, letter of credit fee range from 212.5 basis points to 312.5 basis points and an unused portion fee from 25 basis points to 35 basis points.

The December 2009 amendment to the Restated Credit Agreement reduced the revolving credit facility from \$160 million to \$120 million and resulted in debt issuance cost expense of \$0.5 million in the fourth quarter of 2009. The Company also agreed as part of that amendment to prepay approximately \$2.0 million in letter of credit fees otherwise payable in 2010.

Under the Restated Credit Agreement, interest rate margins on revolving credit loans, fees on letters of credit fees and on the unused portion of the revolving credit loans increased from the interest rate margins and fees in place prior to the 2009 amendments, but continue to be based on the Company s leverage ratio. Prior to the June 2009 amendment, the LIBOR rate margin and letter of credit fee ranged from 62.5 basis points to 162.5 basis points, the base rate margin ranged from minus 100 basis points to zero basis points and the unused portion fee ranged from 15 basis points to 25 basis points. As a result of the June 2009 amendment (effective as of June 26, 2009), the LIBOR rate margin and letter of credit fee ranged from 275 basis points to 400 basis points, the base rate margin ranged from 50 basis points to 175 basis points and the unused portion fee ranged from 40 basis points to 50 basis points. The Restated Credit Agreement, as amended by the December 2009 amendment, provided relief from certain financial covenants through March 31, 2011 after which time the financial covenants returned to the pre-relief levels. Under the Restated Credit Agreement, the Company must maintain certain financial covenants including a minimum fixed charge coverage ratio, a leverage ratio and a minimum amount of tangible net worth, among others. The Restated Credit Agreement also provides for a pledge by the Company of certain land and structures, certain tractors, trailers and other personal property and accounts receivable, as defined in the Restated Credit Agreement. Total bank commitments under the Restated Credit Agreement are \$150 million subject to a borrowing base calculated utilizing certain pledged property, equipment and accounts receivable as defined in the Restated Credit Agreement.

At March 31, 2012, the Company had borrowings of \$13.6 million and \$49.7 million in letters of credit outstanding under the Restated Credit Agreement. At March 31, 2011, the Company had no borrowings and \$49.7 million in letters of credit outstanding under the Restated Credit Agreement. The available portion of the Restated Credit Agreement may be used for general corporate purposes, including future capital expenditures, working capital and letter of credit requirements as needed.

Restated Master Shelf Agreement

In November 2011, the Company amended the Restated Master Shelf Agreement to remove adjusted leverage ratio from the financial covenants. The Note maturities remain the same.

On September 20, 2002, the Company issued \$100 million in Senior Notes under a \$125 million (amended to \$150 million in April 2005) Master Shelf Agreement with Prudential Investment Management, Inc. and certain of its affiliates. The Company issued another \$25 million in Senior Notes on November 30, 2007 and \$25 million in Senior Notes on January 31, 2008 under the same Master Shelf Agreement.

The initial \$100 million Senior Notes have a fixed interest rate of 7.38 percent. Payments due under the \$100 million Senior Notes were interest only until June 30, 2006 and at that time semi-annual principal payments began with the final payment due December 2013. The November 2007 issuance of \$25 million Senior Notes has a fixed interest rate of 6.14 percent. The January 2008 issuance of \$25 million Senior Notes has a fixed interest rate of 6.17 percent. Payments due for both \$25 million issuances were interest only until June 30, 2011 and at that time semi-annual principal payments began with the final payments due January 1, 2018. Under the terms of the Senior Notes, the Company must maintain certain financial covenants including a minimum fixed charge coverage ratio, a leverage ratio and a minimum tangible net worth, among others.

In connection with the December 2009 amendment of the Master Shelf Agreement, the Company prepaid the principal and interest on the Senior Notes in December 2009 otherwise due and payable during 2010, at the current interest rates. This resulted in no current portion due in 2010 and prepaid interest included in prepaid expenses. In addition, the interest rate increased to 9.75 percent in the first quarter of 2011. The interest rate on those notes returned to the original level on July 1, 2011 after the Company demonstrated compliance with the original financial covenants for the second quarter of 2011.

13

Other

Projected net capital expenditures for 2012 are approximately \$80.4 million. This represents an approximate \$12.5 million increase from 2011 net capital expenditures of \$67.9 million for property and equipment. Approximately \$25.3 million of the 2012 capital budget was committed as of March 31, 2012. Net capital expenditures pertain primarily to investments in revenue equipment, information technology, land and structures.

The Company has historically generated cash flows from operations that have funded its capital expenditure requirements. Cash flows from operating activities were \$59.3 million for the year ended December 31, 2011, while net cash used in investing activities was \$67.9 million. Cash flows provided by operating activities were \$24.0 million for the three months ended March 31, 2012; \$25.0 million higher than the prior year and were used to fund the replacement of tractor and trailers along with continued investment in technology. The timing of capital expenditures can largely be managed around the seasonal working capital requirements of the Company. The Company believes it has adequate sources of capital to meet short-term liquidity needs primarily through availability under the Restated Credit Agreement, subject to the Company s borrowing base and satisfaction of existing debt covenants and to a lesser extent its cash and cash equivalents of \$60 thousand at March 31, 2012. Future operating cash flows are primarily dependent upon the Company s profitability and its ability to manage its working capital requirements, primarily accounts receivable, accounts payable and wage and benefit accruals. The Company was in compliance with its debt covenants at March 31, 2012.

At March 31, 2012, YRC Worldwide Inc., formerly Yellow Corporation (Yellow), provided guarantees on behalf of Saia primarily for open workers compensation claims and casualty claims incurred prior to March 1, 2000. Under the Master Separation and Distribution Agreement entered into in connection with the 100 percent tax-free distribution of Saia shares to Yellow shareholders in 2002, Saia pays Yellow s actual cost of any collateral it provides to insurance underwriters in support of these claims at cost plus 125 basis points. At March 31, 2012, the portion of collateral allocated by Yellow to Saia in support of these claims was \$1.7 million.

In accordance with U.S. generally accepted accounting principles, our operating leases are not recorded in our consolidated balance sheet; however, the future minimum lease payments are included in the Contractual Cash Obligations table below. See the notes to our audited consolidated financial statements included in our Annual Report on Form 10-K for the year ended December 31, 2011 for additional information. In addition to the principal amounts disclosed in the tables below, the Company has interest obligations of approximately \$4.5 million for 2012 and decreasing for each year thereafter based on borrowings outstanding at March 31, 2012.

Contractual Cash Obligations

The following tables set forth a summary of our contractual cash obligations and other commercial commitments as of March 31, 2012 (in millions).

	Payments due by year						
	2012	2013	2014	2015	2016	Thereaft	er Total
Contractual cash obligations:							
Long-term debt obligations:							
Revolving line of credit	\$	\$	\$	\$	13.6	\$	\$ 13.6
Long-term debt	22.1	22.1	7.2	7.2	7.2	7.	1 72.9
Operating leases	10.0	10.8	8.2	6.8	5.4	23.	1 64.3
Purchase obligations (1)	26.9						26.9
Total contractual obligations	\$ 59.0	\$ 32.9	\$ 15.4	\$ 14.0	\$ 26.2	\$ 30.	2 \$ 177.7

(1) Includes commitments of \$25.3 million for capital expenditures.

Table of Contents 17

14

			Amount of c	commitment	expiration by	year	
	2012	2013	2014	2015	2016	Thereafter	Total
Other commercial commitments:							
Available line of credit (1)	\$	\$	\$	\$	\$ 86.7	\$	\$ 86.7
Letters of credit	51.5						51.5
Surety bonds	4.2	2.1					6.3
•							
Total commercial commitments	\$ 55.7	\$ 2.1	\$	\$	\$ 86.7	\$	\$ 144.5

(1) Subject to the satisfaction of existing debt covenants and borrowing base requirements.

The Company has unrecognized tax benefits of approximately \$2.6 million and accrued interest and penalties of \$1.4 million related to the unrecognized tax benefits as of March 31, 2012. The Company cannot reasonably estimate the timing of cash settlement with respective taxing authorities beyond one year and accordingly has not included the amounts within the above contractual cash obligation and other commercial commitment tables.

The Company sold the stock of Jevic Transportation, Inc. (Jevic) on June 30, 2006 and remains a guarantor under indemnity agreements, primarily with certain insurance underwriters with respect to Jevic s self-insured retention (SIR) obligation for workers compensation, bodily injury and property damage and general liability claims against Jevic arising out of occurrences prior to the transaction date. In September 2008, the Company entered into a settlement agreement with the debtors of Jevic, which was approved by the bankruptcy court, under which the Company assumed Jevic s SIR obligation on the workers compensation, bodily injury and property damage, and general liability claims arising prior to the transaction date. In addition, the settlement agreement included a mutual release of claims, except for the Company s responsibility to Jevic for certain outstanding tax liabilities in the states of New York and New Jersey for the periods prior to the transaction date and for any potential fraudulent conveyance claims.

Critical Accounting Policies and Estimates

The Company makes estimates and assumptions in preparing the consolidated financial statements that affect reported amounts and disclosures therein. In the opinion of management, the accounting policies that generally have the most significant impact on the financial position and results of operations of the Company include:

Claims and Insurance Accruals. The Company has self-insured retention limits generally ranging from \$250,000 to \$2.0 million per claim for medical, workers—compensation, auto liability, casualty and cargo claims. The liabilities associated with the risk retained by the Company are estimated in part based on historical experience, third-party actuarial analysis with respect to workers—compensation claims, demographics, nature and severity, past experience and other assumptions. The liabilities for self-funded retention are included in claims and insurance reserves based on claims incurred with liabilities for unsettled claims and claims incurred but not yet reported being actuarially determined with respect to workers—compensation claims and with respect to all other liabilities, estimated based on management—s evaluation of the nature and severity of individual claims and historical experience. However, these estimated accruals could be significantly affected if the actual costs of the Company differ from these assumptions. A significant number of these claims typically take several years to develop and even longer to ultimately settle. These estimates tend to be reasonably accurate over time; however, assumptions regarding severity of claims, medical cost inflation, as well as specific case facts can create short-term volatility in estimates.

Revenue Recognition and Related Allowances. Revenue is recognized on a percentage-of-completion basis for shipments in transit while expenses are recognized as incurred. In addition, estimates included in the recognition of revenue and accounts receivable include estimates of shipments in transit and estimates of future adjustments to revenue and accounts receivable for billing adjustments and collectability.

Revenue is recognized in a systematic process whereby estimates of shipments in transit are based upon actual shipments picked up, scheduled day of delivery and current trend in average rates charged to customers. Since the cycle for pick up and delivery of shipments is generally 1-3 days, typically less than 5 percent of a total month s revenue is in transit at the end of any month. Estimates for credit losses and billing adjustments are based upon historical experience of credit losses, adjustments processed and trends of collections. Billing adjustments are primarily made for discounts and billing corrections. These estimates are continuously evaluated and updated; however, changes in economic conditions, pricing arrangements and other factors can significantly impact these estimates.

<u>Depreciation and Capitalization of Assets</u>. Under the Company s accounting policy for property and equipment, management establishes appropriate depreciable lives and salvage values for the Company s revenue equipment (tractors and trailers) based on their estimated useful lives and estimated fair values to be received when the equipment is sold or traded in. These estimates are routinely evaluated and updated when circumstances warrant. However, actual depreciation and salvage values could differ from these assumptions based on market conditions and other factors.

Equity-based Incentive Compensation. The Company maintains long-term incentive compensation arrangements in the form of stock options, restricted stock and stock-based awards. The criteria for the stock-based awards are total shareholder return versus a peer group of companies over a three-year performance period. The Company accounts for its stock-based awards in accordance with Financial Accounting Standards Board Accounting Standards Codification Topic 718 (FASB ASC 718) with the expense amortized over the three-year vesting period based on the Monte Carlo fair value method at the date the stock-based awards are granted. The Company accounts for stock options in accordance with FASB ASC 718 with option expense amortized over the three-year vesting period based on the Black-Scholes-Merton fair value at the date the options are granted.

These accounting policies and others are described in further detail in the notes to our audited consolidated financial statements included in the Company s Annual Report on Form 10-K for the year ended December 31, 2011.

The preparation of financial statements in accordance with U.S. generally accepted accounting principles requires management to adopt accounting policies and make significant judgments and estimates to develop amounts reflected and disclosed in the consolidated financial statements. In many cases, there are alternative policies or estimation techniques that could be used. We maintain a thorough process to review the application of our accounting policies and to evaluate the appropriateness of the many estimates that are required to prepare the consolidated financial statements. However, even under optimal circumstances, estimates routinely require adjustment based on changing circumstances and the receipt of new or better information.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

The Company is exposed to a variety of market risks including the effects of interest rates and fuel prices. The detail of the Company s debt structure is more fully described in the notes to the consolidated financial statements set forth in the Company s Annual Report on Form 10-K for the year ended December 31, 2011. To help mitigate our risk to rising fuel prices, the Company has implemented a fuel surcharge program. This program is well established within the industry and customer acceptance of fuel surcharges remains high. Since the amount of the fuel surcharge is based on average national fuel prices and is reset weekly, exposure of the Company to fuel price volatility is significantly reduced. However, the fuel surcharge may not fully offset fuel price fluctuations during periods of rapid increases or decreases in the price of fuel and is also subject to overall competitive pricing negotiations.

The following table provides information about the Company's third-party financial instruments as of March 31, 2012. The table presents principal cash flows (in millions) and related weighted average interest rates by contractual maturity dates. The fair value of the fixed rate debt (in millions) was estimated based upon the borrowing rates currently available to the Company for debt with similar terms and remaining maturities.

Item 4. Controls and Procedures

Quarterly Controls Evaluation and Related CEO and CFO Certifications

As of the end of the period covered by this Quarterly Report on Form 10-Q, the Company conducted an evaluation of the effectiveness of the design and operation of its disclosure controls and procedures (Disclosure Controls). The controls evaluation was performed under the supervision and with the participation of management, including the Company s Chief Executive Officer (CEO) and Chief Financial Officer (CFO).

Based upon the controls evaluation, the Company s CEO and CFO have concluded that, as of the end of the period covered by this Quarterly Report on Form 10-Q, the Company s Disclosure Controls are effective to ensure that information the Company is required to disclose in reports that the Company files or submits under the Securities Exchange Act of 1934, as amended (the Exchange Act), is recorded, processed, summarized and reported within the time periods specified in SEC rules and forms.

During the period covered by this Quarterly Report on Form 10-Q, there were no changes in internal control over financial reporting that materially affected, or that are reasonably likely to materially affect, the Company s internal control over financial reporting.

Attached as Exhibits 31.1 and 31.2 to this Quarterly Report on Form 10-Q are certifications of the CEO and the CFO, which are required in accordance with Rule 13a-14 of the Exchange Act. This Controls and Procedures section includes the information concerning the controls evaluation referred to in the certifications and it should be read in conjunction with the certifications.

Definition of Disclosure Controls

Disclosure Controls are controls and procedures designed to ensure that information required to be disclosed in the Company s reports filed under the Exchange Act is recorded, processed, summarized and reported timely. Disclosure Controls are also designed to ensure that such information is accumulated and communicated to the Company s management, including the CEO and CFO, as appropriate to allow timely decisions regarding required disclosure. The Company s Disclosure Controls include components of its internal control over financial reporting which consists of control processes designed to provide reasonable assurance regarding the reliability of the Company s financial reporting and the preparation of financial statements in accordance with U.S. generally accepted accounting principles.

Limitations on the Effectiveness of Controls

The Company s management, including the CEO and CFO, does not expect that its Disclosure Controls or its internal control over financial reporting will prevent all errors and all fraud. A control system, no matter how well designed and operated, can provide only reasonable, not absolute, assurance that the control system s objectives will be met. Further, the design of a control system must reflect the fact that there are resource constraints and the benefits of controls must be considered relative to their costs. Because of the inherent limitations in all control systems, no evaluation of controls can provide absolute assurance that all control issues and instances of fraud, if any, within the Company have been detected. These inherent limitations include the realities that judgments in decision-making can be faulty and that breakdowns can occur because of simple error or mistake. Controls can also be circumvented by the individual acts of some persons, by collusion of two or more people or by management override of the controls. Because of the inherent limitations in a cost-effective control system, misstatements due to error or fraud may occur and not be detected.
