ASIAINFO-LINKAGE, INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (unaudited)

(In thousands, except share and per share amounts)

1. BASIS OF PREPARATION

On July 1, 2010, AsiaInfo Holdings, Inc. (AsiaInfo) completed its combination with internet technology (IT) software and solutions provider Linkage Technologies International Holdings Limited through the acquisition of 100% of the outstanding share capital of its wholly-owned subsidiary, Linkage Technologies Investment Limited (Linkage Technologies), and was renamed AsiaInfo-Linkage, Inc. (AsiaInfo-Linkage). Starting in the third quarter of 2010, AsiaInfo-Linkage s financial statements consolidated the operating results and financial position of Linkage Technologies and its consolidated subsidiaries.

(a) The accompanying unaudited condensed consolidated financial statements include the accounts of AsiaInfo-Linkage, its subsidiaries, and its consolidated variable interest entities (the VIEs) (collectively, the Company). All significant intercompany balances and transactions have been eliminated in consolidation.

The accompanying unaudited condensed consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America (US GAAP) for interim financial information and with the instructions to Form 10-Q and Regulation S-X, as promulgated by the Securities and Exchange Commission. Accordingly, they do not include all of the information and notes required by US GAAP for completing annual financial statements. However, management believes that the disclosures are adequate to ensure the information presented is not misleading. US GAAP requires management to make estimates and assumptions that affect the reported amounts of assets, liabilities, contingencies and results of operations. While management has based its assumptions and estimates on the facts and circumstances existing as of June 30, 2012, final amounts may differ from these estimates.

In the opinion of the management of the Company, the accompanying unaudited condensed consolidated financial statements reflect all adjustments, consisting only of normal recurring adjustments, which are necessary for a fair presentation of the results for the interim periods presented. These financial statements should be read in conjunction with the audited financial statements and notes thereto included in the Company s audited financial statements included in its Form 10-K for the fiscal year ended December 31, 2011. The results of operations for the interim periods presented are not indicative of the operating results to be expected for any subsequent interim period or for the Company s fiscal year ending December 31, 2012.

AsiaInfo-Linkage uses the United States (U.S.) dollar as its reporting currency and functional currency. The financial records of the Company s People s Republic of China (PRC) subsidiaries and VIEs are maintained in Renminbi (RMB), their functional currency and the currency of the PRC. The financial records of the Company s subsidiaries and VIEs established in Southeast Asian countries are maintained in their local currencies. Their balance sheets are translated into U.S. dollars based on the exchange rate as of the balance sheet date. Their statements of operations are translated using an average exchange rate for the period. Translation adjustments are reflected in accumulated other comprehensive income in equity.

The RMB is not freely convertible into U.S. dollars or other currencies. All foreign exchange transactions involving RMB must take place through the People s Bank of China or other institutions authorized to buy and sell foreign currencies. The exchange rates adopted for foreign exchange transactions involving RMB are the rates of exchange quoted by the People s Bank of China.

No assets of the Company s consolidated VIEs are collateral for such VIEs obligations. There are no restrictions on the use of the VIEs assets to settle the Company s obligations. As of June 30, 2012 and December 31, 2011, respectively, there were \$3,097 and \$2,640 of liabilities of the Company s consolidated VIEs for which creditors (or beneficial interest holders) did not have recourse to the general credit of AsiaInfo-Linkage or its subsidiaries.

Table of Contents

(b) The accompanying unaudited condensed consolidated financial statements have been prepared using the same accounting policies as used in the preparation of the Company's consolidated financial statements on Form 10-K for the fiscal year ended December 31, 2011.

Accounting Pronouncements

Newly adopted accounting pronouncements

In May 2011, the Financial Accounting Standard Board, or FASB, issued an authoritative pronouncement on fair value measurement. The guidance is the result of joint efforts by the FASB and International Accounting Standards Board to develop a single, converged fair value framework. The guidance is largely consistent with existing fair value measurement principles in US GAAP. The guidance expands the existing disclosure requirements for fair value measurements and makes other amendments, mainly including:

Highest-and-best-use and valuation-premise concepts for nonfinancial assets the guidance indicates that the highest-and-best-use and valuation-premise concepts only apply to measuring the fair value of nonfinancial assets.

Application to financial assets and financial liabilities with offsetting positions in market risks or counterparty credit risk the guidance permits an exception to fair value measurement principles for financial assets and financial liabilities (and derivatives) with offsetting positions in market risks or counterparty credit risk when several criteria are met. When the criteria are met, an entity can measure the fair value of the net risk position.

Premiums or discounts in fair value measure the guidance provides that premiums or discounts that reflect size as a characteristic of the reporting entity's holding (specifically, a blockage factor that adjusts the quoted price of an asset or a liability because the market's normal daily trading volume is not sufficient to absorb the quantity held by the entity) rather than as a characteristic of the asset or liability (for example, a control premium when measuring the fair value of a controlling interest) are not permitted in a fair value measurement.

Fair value of an instrument classified in a reporting entity's stockholders' equity the guidance prescribes a model for measuring the fair value of an instrument classified in stockholders' equity; this model is consistent with the guidance on measuring the fair value of liabilities.

Disclosures about fair value measurements the guidance expands disclosure requirements, particularly for Level 3 inputs. Required disclosures include:

- (i) For fair value measurements categorized in Level 3 of the fair value hierarchy: (1) a quantitative disclosure of the unobservable inputs and assumptions used in the measurement, (2) a description of the valuation process in place (e.g., how the entity decides its valuation policies and procedures, as well as changes in its analyses of fair value measurements, from period to period), and (3) a narrative description of the sensitivity of the fair value to changes in unobservable inputs and interrelationships between those inputs.
- (ii) The level in the fair value hierarchy of items that are not measured at fair value in the statement of financial position but whose fair value must be disclosed.

The guidance was applied prospectively and was effective for interim and annual periods beginning after December 15, 2011, for public entities. Early application by public entities is not permitted. The adoption of this guidance did not have a significant effect on the Company's consolidated financial statements.

Table of Contents

In June 2011, the FASB issued an authoritative pronouncement to require an entity to present the total of comprehensive income, the components of net income, and the components of other comprehensive income either in a single continuous statement of comprehensive income or in two separate but consecutive statements. In both choices, an entity is required to present each component of net income along with total net income, each component of other comprehensive income along with a total for other comprehensive income, and a total amount for comprehensive income. The guidance eliminates the option to present the components of other comprehensive income as part of the statement of changes in stockholders' equity. The guidance does not change the items that must be reported in other comprehensive income or when an item of other comprehensive income must be reclassified to net income. The guidance should be applied retrospectively. For public entities, the guidance was effective for fiscal years and interim periods within those years, beginning after December 15, 2011. Early adoption is permitted. In December 2011, the FASB issued an authoritative pronouncement related to deferral of the effective date for amendments to the presentation of reclassifications of items out of accumulated other comprehensive income. This guidance allows the FASB to redeliberate whether to present on the face of the financial statements the effects of reclassifications out of accumulated other comprehensive income on the components of net income and other comprehensive income for all periods presented. While the FASB is considering the operational concerns about the presentation requirements for reclassification adjustments and the needs of financial statement users for additional information about reclassification adjustments, entities should continue to report reclassifications out of accumulated other comprehensive income consistent with the presentation requirements in effect before update the pronouncement issued in June 2011. The adoption of this guidance did not have a significant effect on the Company's consolidated financial statements.

In September 2011, the FASB issued an authoritative pronouncement related to testing goodwill for impairment. The guidance is intended to simplify how entities, both public and nonpublic, test goodwill for impairment. The guidance permits an entity to first assess qualitative factors to determine whether it is more likely than not that the fair value of a reporting unit is less than its carrying amount as a basis for determining whether it is necessary to perform the two-step goodwill impairment test. The guidance was effective for annual and interim goodwill impairment tests performed for fiscal years beginning after December 15, 2011. Early adoption is permitted, including for annual and interim goodwill impairment tests performed as of a date before September 15, 2011, if a public entity's financial statements for the most recent annual or interim period have not yet been issued. The adoption of this guidance did not have a significant effect on the Company's consolidated financial statements.

Recent accounting pronouncements not yet adopted

In December 2011, the FASB issued an authoritative pronouncement related to disclosures about offsetting assets and liabilities. The guidance requires an entity to disclose information about offsetting and related arrangements to enable users of its financial statements to understand the effect of those arrangements on its financial position. An entity is required to apply the amendments for annual reporting periods beginning on or after January 1, 2013, and interim periods within those annual periods. An entity should provide the disclosures required by those amendments retrospectively for all comparative periods presented. The Company is in the process of evaluating the effect of adoption of this guidance on the Company's consolidated financial statements.

In July 2012, the FASB issued an authoritative pronouncement related to testing indefinite-lived intangible assets, other than goodwill, for impairment. Under the guidance, an entity testing an indefinite-lived intangible asset for impairment has the option of performing a qualitative assessment before calculating the fair value of the asset. If the entity determines, on the basis of qualitative factors, that the fair value of the indefinite-lived intangible asset is not more likely than not (*i.e.*, a likelihood of more than 50 percent) impaired, the entity would not need to calculate the fair value of the asset. The guidance does not revise the requirement to test indefinite-lived intangible assets annually for impairment. In addition, the guidance does not amend the requirement to test these assets for impairment between annual tests if there is a change in events or circumstances; however, it does revise the examples of events and circumstances that an entity should consider in interim periods. The guidance is effective for annual and interim impairment tests performed for fiscal years beginning after September 15, 2012. Early adoption is permitted. The Company is in the process of evaluating the effect of adoption of this guidance on the Company's consolidated financial statements.

Table of Contents**2. FINANCIAL INSTRUMENTS**

Financial instruments consist of cash and cash equivalents, restricted cash, short-term investments, accounts receivable, other receivables, accounts payable, accrued expenses, other payables, short-term bank loans, income taxes payable, other taxes payable and long-term investments.

Short-term investments are classified as available-for-sale securities, as discussed in Note 4. Certain long-term investments have been written down to their fair value, as discussed in Note 7. Fair value of other long-term investments is not disclosed because the fair value of the investments is not readily determinable.

The carrying values of other financial instruments approximate their fair values due to the short-term nature of these instruments. The Company does not use derivative instruments to manage risks.

3. CASH AND CASH EQUIVALENTS

Cash and cash equivalents consist of cash on hand, demand deposits and highly liquid investments, which are unrestricted as to withdrawal or use, and which have remaining maturities of three months or less when purchased. The following table provides additional information concerning the breakdown of the Company's cash and cash equivalents:

	June 30, 2012	December 31, 2011
Cash	\$ 76,115	\$ 97,733
Cash equivalents:		
Money market funds	143,727	149,161
Others	10,453	25,544
Total cash and cash equivalents	\$ 230,295	\$ 272,438

4. SHORT-TERM INVESTMENTS AVAILABLE-FOR-SALE SECURITIES

Short-term investments consist of available-for-sale securities.

The following table provides additional information, as of the dates indicated, concerning the Company's available-for-sale securities, which consist principally of bond funds, balance funds, stock funds and corporate stocks issued by major financial institutions.

	June 30, 2012				December 31, 2011			
	Cost	Gross unrealized gains	Gross unrealized losses	Fair value	Cost	Gross unrealized gains	Gross unrealized losses	Fair value
Bond funds	\$ 24,346	\$ 1,921	\$ 0	\$ 26,267	\$ 14,712	\$ 2,165	\$ 0	\$ 16,877
Balance funds	0	0	0	0	648	0	(47)	601
Stock funds	0	0	0	0	7,888	2,087	0	9,975
Corporate stocks	498	11	0	509	457	0	(1)	456
Total	\$ 24,844	\$ 1,932	\$ 0	\$ 26,776	\$ 23,705	\$ 4,252	\$ (48)	\$ 27,909

The following table provides additional information on the realized gains of the Company during the three-month and six-month periods ended June 30, 2012 and 2011, respectively. For purposes of determining gross realized gains, the cost of securities sold is based on specific identification.

Table of Contents

	Three Months Ended June 30,					
	Proceeds	2012 Costs	Gains	Proceeds	2011 Costs	Gains
Available-for-sale securities	\$ 7,362	\$ 6,117	\$ 1,245	\$ 0	\$ 0	\$ 0
Total	\$ 7,362	\$ 6,117	\$ 1,245	\$ 0	\$ 0	\$ 0

	Six Months Ended June 30,					
	Proceeds	2012 Costs	Gains	Proceeds	2011 Costs	Gains
Available-for-sale securities	\$ 17,936	\$ 14,664	\$ 3,272	\$ 1,721	\$ 1,522	\$ 199
Total	\$ 17,936	\$ 14,664	\$ 3,272	\$ 1,721	\$ 1,522	\$ 199

The Company reported no impairment loss for its available-for-sale securities for the three-month and six-month periods ended June 30, 2012 or 2011.

5. ACCOUNTS RECEIVABLE

Accounts receivable balances included both billed and unbilled amounts. Revenue recognized in excess of billings is recorded as unbilled receivables. All billed and unbilled amounts are expected to be collected within one year. Accounts receivable balances included bank acceptance drafts receivable and commercial acceptance drafts receivable. These bank acceptance drafts and commercial acceptance drafts were non-interest bearing and were due within six months of issuance.

The Company generated service revenues by acting as a sales agent for International Business Machines Corporation (IBM) or its distributors, and for a few other hardware companies, for certain products sold to the customers of the Company (each, an IBM-Type Arrangement). The components of the Company's accounts receivable as of June 30, 2012 and December 31, 2011, including amounts attributable to the IBM-Type Arrangements, were as follows:

	June 30, 2012			December 31, 2011		
	IBM-Type Arrangement	Non-IBM-Type Arrangement	Total	IBM-Type Arrangement	Non-IBM-Type Arrangement	Total
Billed accounts receivable	\$ 45,361	\$ 85,804	\$ 131,165	\$ 30,727	\$ 68,561	\$ 99,288
Unbilled accounts receivable	42,149	133,025	175,174	49,230	127,006	176,236
Bank acceptance drafts	0	0	0	0	2,239	2,239
Commercial acceptance drafts	0	5,280	5,280	13	6,693	6,706
Less: allowance for doubtful accounts	(401)	(3,957)	(4,358)	(221)	(2,684)	(2,905)
Total accounts receivable, net	\$ 87,109	\$ 220,152	\$ 307,261	\$ 79,749	\$ 201,815	\$ 281,564

6. INVENTORIES, NET

The components of inventories, net as of June 30, 2012 and December 31, 2011 were as follows:

	June 30, 2012	December 31, 2011
Deferred costs	\$ 8,147	\$ 5,526
Finished goods	12,119	9,783
Total	\$ 20,266	\$ 15,309

Edgar Filing: ASIAINFO-LINKAGE, INC - Form 10-Q

Deferred costs represent the costs incurred for the implementation phases of the projects outside of China, which provide multiple services and products (software, hardware, implementation, maintenance and managed services) to customers and include around 1-2 years system implementation periods. The deferred costs were expected to be reimbursed after the successful launch of the system, and were capitalized as inventories and expected to be transferred to cost of revenues upon revenue recognition.

Table of Contents**7. LONG-TERM INVESTMENTS**

(a) In October 2005, the Company acquired five percent of the outstanding equity interests of Hinge. The investment is accounted for using the cost method as the Company does not have a significant influence over the business and operations of Hinge. Due to the effects of the global financial crisis in 2008, Hinge's business dropped significantly during 2008 causing a significant decline in fair value of Hinge. The Company determined that its investment in Hinge became worthless as of December 31, 2008 and that the decline in the fair value was other-than-temporary. Consequently, the Company recognized an impairment loss of \$2,042, which is equal to the carrying amount of the investment after foreign exchange adjustment from the initial investment cost.

(b) On September 12, 2008, the Company acquired 2,170,000 redeemable convertible Series B Preferred Shares of C-Platform Corporation (C-Platform), for a total cash consideration of \$4,696, including \$52 transaction costs. The total consideration had been paid as of September 30, 2008. Following the transaction, the Company owned approximately 19.9% of C-Platform's issued and outstanding share capital, or 17% of C-Platform's share capital on a fully-diluted basis. In August 2009 and March 2011, the Company paid for and acquired \$167 and \$409 of convertible promissory notes from C-Platform, respectively. Such convertible promissory notes were accounted for as a short-term investment, available-for-sale securities. In March 2011, the Company converted \$167 of the convertible promissory notes into 78,023 of C-Platform's Series B Preferred Shares, which were accounted for as a long-term investment, and obtained the share certificate in July 2011, while \$409 of convertible promissory notes remained unconverted. Following the transaction, the Company owned approximately 19.61% of C-Platform's issued and outstanding share capital. In February 2012, the Company converted the remaining \$409 of convertible promissory notes into 191,008 of C-Platform's Series B Preferred Shares, which were accounted for as a long-term investment, and obtained the share certificate in April 2012. Following the transaction, the Company owned approximately 18.63% of C-Platform's issued and outstanding share capital. Because the Company does not have the ability to exercise significant influence over the operating or financial policies of C-Platform, the Company uses the cost method of accounting to record its investment in C-Platform.

C-Platform is a Cayman Islands company, which, through its subsidiaries in China, provides data operating services, a form of value-added telecommunication services, to telecommunications carriers in China. The Company believes that the transaction furthers its ongoing strategy of expanding its market leading telecommunications software solutions business in China.

(c) On November 30, 2010, the Company acquired 3,562,500 Series A-1 Preferred Shares of Santen Corporation (Santen), for a total cash consideration of \$950 for 9.5% of Santen's issued and outstanding voting share capital. Since the Company does not have the ability to exercise significant influence over the operating and financial policies of Santen, the Company uses the cost method of accounting to record its investment in Santen.

Santen is a Cayman Islands company, which, through its subsidiaries in China, provides a form of value-added telecommunication services, to telecommunications carriers in China. In 2011, the Company performed an assessment of the financial condition of Santen and determined there was an other-than-temporary decline of fair value. Based on the assessment, the Company provided for an impairment loss of \$950, which is equal to the carrying amount of the investment.

8. GOODWILL

The changes in the carrying amount of goodwill during the six months ended June 30, 2012 were as follows:

	Amount
Gross amount:	
Beginning balance at January 1, 2012:	\$ 460,024
Exchange differences	(8)
Ending balance at June 30, 2012:	460,016
Accumulated impairment loss:	
Beginning balance at January 1, 2012:	(26,499)
Exchange differences	(22)
Ending balance at June 30, 2012:	(26,521)

Goodwill, net at June 30, 2012	\$ 433,495
---------------------------------------	-------------------

Table of Contents**9. OTHER ACQUIRED INTANGIBLE ASSETS, NET**

The carrying amounts of the components of other acquired intangible assets, net as of June 30, 2012 and December 31, 2011 were as follows:

	June 30, 2012			December 31, 2011			Net carrying amount
	Gross carrying amount	Accumulated amortization	Foreign exchange difference	Gross carrying amount	Accumulated amortization	Foreign exchange difference	
Core technologies	\$ 45,931	\$ (16,864)	\$ 0	\$ 29,067	\$ 45,931	\$ (13,231)	\$ 32,700
Trade names and trademarks	21,037	(2,515)	0	18,522	21,037	(1,970)	19,067
Contract backlogs	12,474	(12,383)	12	103	12,474	(12,286)	200
Customer lists	131	(143)	12	0	131	(143)	0
Customer relationships	117,755	(37,600)	312	80,467	117,755	(27,910)	90,158
Distribution networks	870	(870)	0	0	870	(870)	0
Software	1,721	(1,884)	163	0	1,721	(1,884)	0
Non-compete agreements	1,249	(703)	25	571	1,249	(593)	681
Corporate business agency agreements	2,037	(1,436)	5	606	2,037	(1,176)	866
Existing technology	38,500	(25,560)	0	12,940	38,500	(19,144)	19,356
	\$ 241,705	\$ (99,958)	\$ 529	\$ 142,276	\$ 241,705	\$ (79,207)	\$ 163,028

The future amortization expenses for the net carrying amount of intangible assets with definite lives as of June 30, 2012 are expected to be as follows:

Six-month period ended December 31, 2012	\$ 20,747
2013	32,628
2014	23,445
2015	21,110
2016 and thereafter	44,346
	\$ 142,276

10. LAND USE RIGHT, NET

From 2009, the Company completed the process to obtain land use rights for a piece of land in Beijing, on which the Company plans to construct a building for use as its new corporate headquarters. In October 2009, the Company entered into an agreement with Zhongguancun Software Park Development Co., Ltd. (ZSPD), pursuant to which ZSPD agreed to develop the land in preparation for construction of the building, for an aggregate consideration of approximately \$10,777, of which \$10,000 was paid in years 2009 and 2010 and \$777 was paid in 2011.

Table of Contents

In connection with the agreement with ZSPD, the Company became eligible to enter into a land transfer agreement with relevant PRC government authorities in order to obtain land use rights with respect to such land. In May 2011, the Company entered into a land use right transfer agreement with the Beijing Municipal Bureau of Land and Resources pursuant to which the Company would acquire land use rights with a 50-year term, for a consideration of approximately \$2,870, plus related local levy of \$111, paid in June 2011 and August 2011, respectively.

In respect of these agreements, the Company has recorded the aggregate amount of the consideration paid, amounting to \$14,543 after an exchange rate effect of \$785, as a payment for land use right on its consolidated balance sheets as of December 31, 2011. In November 2011, the Company obtained the National Land Use Right Certificate, issued by the Beijing Municipal Bureau of Land and Resources, and accordingly the Company records the payment for land use right at cost less accumulated amortization and amortizes the cost of the land use right on a straight-line basis over the 50-year term of the land use right certificate. As of June 30, 2012, the land use rights amounted to \$14,341, which was the carrying value less the amortization cost of \$147 and an exchange rate loss of \$55.

11. ACCOUNTS PAYABLE

Accounts payable included bank acceptance drafts payable of \$1,804 and \$4,300 as of June 30, 2012 and December 31, 2011, respectively. These bank acceptance drafts were non-interest bearing and were due within six months of issuance.

As of June 30, 2012 and December 31, 2011, the Company's accounts payable balance related to the IBM-Type Arrangements was approximately \$83,922 and \$78,930, respectively, under which the Company is contractually obligated to pay its vendor only when its customers pay the Company.

12. SHORT-TERM BANK LOANS

In May 2012, the Company obtained a total line of credit of \$20,000 through a series of financing agreements. The line of credit is secured by a pledge of an equivalent amount of RMB deposits and the bank loans under the credit line bear interest annually at a variable rate equivalent to the 3-month LIBOR plus 2.25 percent. As of June 30, 2012, the Company had short-term bank loans totaling \$5,500 from using such line of credit with \$14,500 remaining unused under the line of credit.

13. CREDIT FACILITIES

As of June 30, 2012, the Company had credit facilities for working capital purposes totaling \$147,539 expiring on various dates up to September 2013, which were secured by bank deposits of \$33,297. As of June 30, 2012, unused credit facilities were \$114,742 and used credit facilities totaled \$32,797. The credit facilities were used to cover issuance of standby letters of credit for customers, borrowing of short-term bank loans and issuance of bank acceptance drafts payable to hardware suppliers.

As of December 31, 2011, the Company had total credit facilities totaling \$99,803, which will expire on various dates up to September 2013 and were secured by bank deposits of \$13,065.

In addition to the bank deposits pledged for the above credit facilities, the Company also collateralized bank deposits of \$5,740 and \$8,161 for the issuance of certain standby letters of credit and bank acceptance drafts as of June 30, 2012 and December 31, 2011, respectively. Therefore, total bank deposits of \$39,037 and \$21,226 were presented as restricted cash in the consolidated balance sheets as of June 30, 2012 and December 31, 2011, respectively.

14. VALUE-ADDED TAXES REBATE

Revenue from software products and solutions included the benefit of the rebate of value-added taxes on sales of software and services as part of the PRC government's policy of encouraging software development in the PRC. The rebate totaled \$4,065 and \$4,435 for the six months ended June 30, 2012 and 2011, respectively.

15. INCOME TAXES

The Company is subject to U.S. federal and state income taxes and the Company's subsidiaries and VIEs incorporated in the PRC are subject to PRC income taxes.

Table of Contents

Reconciliation between the provision for income taxes computed by applying the U.S. federal tax rate to income before income taxes and the actual provision for income taxes is as follows:

	Six Months Ended June 30,	
	2012	2011
U.S. federal rate	35%	35%
Difference between statutory rate and foreign effective tax rate	(29)	(20)
Subpart F income inclusion and other dividend income	6	0
Share-based compensation	5	0
Tax effect due to reduced rate granted for 2010	0	(13)
Discrete effect of change in tax rate of Linkage Nanjing	0	(57)
Others	(1)	1
	16%	(54)%

The tax rate for the six months ended June 30, 2012 was higher than that of the same period in 2011 mainly because Linkage-AsiaInfo Technologies (Nanjing), Inc. (Linkage Nanjing) received a preliminary confirmation of its High-and-New Technology Enterprise (HNTE) status during the second quarter of 2011. As a result, the Company believed that Linkage Nanjing would obtain its HNTE certificate and renew the status going forward and, accordingly, re-calculated the balance of deferred tax relating to acquired intangible assets amortization and the social welfare accruals by applying a 15% rate instead of a 25% rate. Additionally, the Company recognized the tax benefit of 2010 Key Software Enterprise (KSE) upon receiving the Chinese government's approval in the first quarter of 2011. Pursuant to the relevant rules, a company with KSE status could apply a reduced income tax rate of 10%. Two of the Company's subsidiaries, AsiaInfo-Linkage Technologies (China), Inc. (AIBJ) and Linkage Nanjing, applied for this status for 2010 and received approvals in the first quarter of 2011 and thus tax benefit was reflected in the six months ended June 30, 2011. However, as the application requirements for the 2011 KSE status have not been released by relevant government authorities, for the six months ended June 30, 2012, both AIBJ and Linkage Nanjing have not applied for 2011 KSE status. AIBJ and Linkage Nanjing plan to apply for 2011 KSE status upon the release of the application requirements but there is uncertainty as to whether they will meet eligibility requirements for or receive such status. In addition, the Company also had higher Subpart F income which resulted in additional U.S. taxes.

Aggregate undistributed earnings of approximately \$245,774 on June 30, 2012 of the Company's PRC subsidiaries and VIEs that are available for distribution to the Company are considered to be indefinitely reinvested under US GAAP and, accordingly, no provision has been made for the Chinese withholding taxes on dividends that would be payable upon the distribution of those amounts to AsiaInfo-Linkage. Additionally, the Chinese tax authorities have clarified that distributions to be made out of retained earnings from prior to January 1, 2008 would not be subject to the Chinese withholding tax. Determination of the amount of any unrecognized deferred income tax liabilities on those earnings is not practicable.

The Company is subject to taxation in the U.S. and various states and foreign jurisdictions. There is no ongoing examination by any tax authority at this time. The Company did not change its position of recognizing uncertain tax benefit in the six months ended June 30, 2012 and does not foresee any material change to the amount of uncertain tax benefit. The Company's various tax years from 2002 to 2011 remain open in these taxing jurisdictions.

16. SHARE-BASED COMPENSATION**2002 Stock Option Plan and the Prior Plans**

Under the Company's 2002 Stock Option Plan (the 2002 Plan), the Company was authorized to grant options for the purchase of up to 4,500,000 shares of common stock to employees, directors and consultants at prices not less than the fair market value on the date of grant for incentive stock options and nonqualified options. Shares as to which an option was granted under the 2002 Plan but remained unexercised at the expiration, forfeiture or other termination of such option may be the subject of the grant of further options. Prior to adopting the 2002 Stock Option Plan, the Company adopted annual stock option plans for each of 1995, 1996, 1997, 1998, 1999 and 2000 (such plans, together with the 2002 Stock Option Plan, are referred to hereinafter as the Option Plans).

Table of Contents

The vesting periods of the options under the Option Plans were determined based on the individual stock option agreements. Options granted prior to 1998 generally vested and became exercisable over three years at an equal annual rate. Exercise terms of options granted in 1998, 1999, 2000 and 2002 were substantially similar to those of options granted prior to 1998 except that the vesting and exercise periods were generally over four years at an annual rate of 20%, 20%, 30% and 30% for the 1999 plan, and were generally over four years at an annual rate of 25% for the 2000 plan, and were generally no more than four years at an annual rate of 25% for the 2002 Plan.

Stock options as of June 30, 2012 and changes during the six months ended June 30, 2012 were as follows:

	Number of shares	Weighted average exercise price per share	Aggregate intrinsic value
Outstanding, January 1, 2012	371,523	\$ 4.84	
Forfeited	(1,119)	14.40	
Exercised	(4,000)	4.44	
Outstanding, March 31, 2012	366,404	\$ 4.82	\$ 2,851
Forfeited	0	0	
Exercised	(2,800)	4.70	
Outstanding, June 30, 2012	363,604	\$ 4.82	\$ 2,534
Vested and expected to vest, June 30, 2012	363,604	0	
Exercisable, June 30, 2012	363,604	\$ 0	

The aggregate intrinsic value is calculated as the difference between the exercise price per share of the underlying awards and the closing stock price of \$11.79 per share of the Company's common stock on the last trading day in the Company's second fiscal quarter of 2012 (June 29, 2012).

The total intrinsic value of options exercised for each of the three months ended June 30, 2012 and 2011 was \$20 and \$86, respectively.

As of June 30, 2012, there was no unrecognized share-based compensation cost relating to options under the Option Plans. The weighted average remaining contractual term was 1.17 years as of June 30, 2012.

2005 Stock Incentive Plan – restricted stock units (RSUs)

Under the Company's 2005 Stock Incentive Plan (the "2005 Plan"), the Company was authorized to grant participants restricted stock awards, stock options, or other types of equity incentives. The number of shares authorized for issuance was (a) 600,000 shares plus (b) any authorized shares of the Company's common stock that, as of April 21, 2005, were available for issuance under the 2002 Plan, or that thereafter became available for issuance under the 2002 Plan in accordance with its terms.

A restricted stock unit (RSU) is an agreement to issue stock at the time when the award vests. The Company's RSUs under its 2005 Plan vested on an annual basis equally over four years, 25% on each anniversary of the grant date. The fair value of each RSU is measured on the grant date based on the market price of the stock on the grant date. The Company also has the right, in its sole discretion, to pay cash in lieu of the issuance of vested shares of common stock. No such cash payment right was exercised by the Company.

Table of Contents

RSUs as of June 30, 2012 and changes during the six months ended June 30, 2012 were as follows:

	Number of shares	Weighted average grant date fair value per share
Restricted stock units unvested at January 1, 2012	84,950	\$ 22.48
Vested	(25,250)	25.09
Forfeited	(2,100)	29.22
Restricted stock units unvested at March 31, 2012	57,600	\$ 21.09
Vested	(2,500)	18.80
Restricted stock units unvested at June 30, 2012	55,100	\$ 21.20

The total intrinsic value of RSUs vested for each of the three months ended June 30, 2012 and 2011 was \$32 and \$35, respectively.

As of June 30, 2012, there was \$875 of unrecognized share-based compensation cost related to RSUs, which is expected to be recognized in the Company's consolidated statements of operations over a weighted-average vesting period of 1.06 years. To the extent the actual forfeiture rate is different from the original estimate, the actual share-based compensation related to these awards may be different from the expectation.

2008 Stock Incentive Plan

On February 25, 2008, the Board of Directors of the Company authorized the 2008 Stock Incentive Plan, as amended (the "2008 Plan"). The 2008 Plan was subsequently approved by the Company's stockholders at the 2008 annual meeting of stockholders. Under the 2008 Plan, the Company was authorized to grant participants restricted stock awards, stock options, or other types of equity incentives. The number of shares authorized for issuance was (a) 2,000,000 shares plus (b) any authorized shares of the Company's common stock that, as of February 25, 2008, were available for issuance under the Company's 2005 Plan, or that thereafter became available for issuance under the 2005 Plan in accordance with its terms.

As of December 31, 2011, an aggregate of 1,689,400 PSUs granted under the 2008 Plan had fully vested based on certain performance criteria or been forfeited.

2011 Stock Incentive Plan

In February 2011, the Board of Directors of the Company authorized the 2011 Stock Incentive Plan (the "2011 Plan"). The 2011 Plan was subsequently approved by the Company's stockholders on April 21, 2011 at the 2011 annual meeting of stockholders. Under the 2011 Plan, the Company is authorized to grant participants restricted stock awards, stock options, or other types of equity incentives. The number of shares authorized for issuance was (a) 7,501,752 shares plus (b) any authorized shares of the Company's common stock that, as of April 21, 2011, were available for issuance under the 2008 Plan, or that thereafter become available for issuance under the 2008 Plan in accordance with its terms.

Unless otherwise specified in the RSU award agreement, the Company's RSUs under its 2011 Plan vest on an annual basis equally over four years, 25% on each anniversary of the grant date. The fair value of each RSU is measured on the grant date based on the market price of the stock on the grant date. The Company also has the right, in its sole discretion, to pay cash in lieu of the issuance of vested shares of common stock.

RSUs as of June 30, 2012 and changes during the six months ended June 30, 2012 were as follows:

Number of shares	Weighted average grant date fair value per share
------------------	--

Edgar Filing: ASIAINFO-LINKAGE, INC - Form 10-Q

Restricted stock units unvested at January 1, 2012	132,609	\$	13.67
Granted	2,000		12.89
Vested	(41,304)		11.06
Restricted stock units unvested at March 31, 2012	93,305	\$	14.80
Granted	4,500		11.22
Vested	(8,500)		19.81
Restricted stock units unvested at June 30, 2012	89,305	\$	14.15

Table of Contents

The total intrinsic value of RSUs vested for each of the three months ended June 30, 2012 and 2011 was \$101 and nil respectively.

As of June 30, 2012, there was \$820 of unrecognized share-based compensation cost related to RSUs, which is expected to be recognized in the Company's consolidated statements of operations over a weighted-average vesting period of 1.03 years. To the extent the actual forfeiture rate is different from the original estimate, the actual share-based compensation related to these awards may be different from the expectation.

In December 2011, the Compensation Committee of the Board of Directors of the Company, pursuant to the 2011 Plan, approved grants of stock options to the Company's executive officers and employees.

Stock options as of June 30, 2012 and changes during the six months ended June 30, 2012 were as follows:

	Number of shares	Weighted average exercise price per share	Aggregate intrinsic value
Outstanding, January 1, 2012	6,429,100	\$ 8.73	
Granted	65,000	13.35	
Forfeited	(54,000)	8.73	
Outstanding, March 31, 2012	6,440,100	\$ 8.78	\$ 24,672
Granted	90,000	11.51	
Forfeited	(67,400)	8.73	
Outstanding, June 30, 2012	6,462,700	\$ 8.82	\$ 19,327
Vested and expected to vest, June 30, 2012	6,462,700		19,327
Exercisable, June 30, 2012	0	\$ 0	

The aggregate intrinsic value is calculated as the difference between the exercise price per share of the underlying awards and the closing stock price of \$11.79 per share of the Company's common stock on the last trading day in the Company's second fiscal quarter of 2012 (June 29, 2012).

Total intrinsic value of options exercised for the three months ended June 30, 2012 was nil.

As of June 30, 2012, there was \$31,002 of unrecognized share-based compensation cost relating to the 2011 Plan, which is expected to be exercised over a weighted-average vesting period of 9.45 years. To the extent the actual forfeiture rate is different from original estimates, actual share-based compensation related to these awards may be different from these expectations.

The amounts of share-based compensation attributable to cost of revenues, sales and marketing, general and administrative, and research and development are included in those line items on the face of the Company's consolidated statements of operations. For the three months and six months ended June 30, 2012 and 2011, share-based compensation expenses related to stock options, RSUs and PSUs were allocated as follows:

	Three Months Ended		Six Months Ended	
	June 30, 2012	June 30, 2011	June 30, 2012	June 30, 2011
Cost of revenues	\$ 816	\$ 470	\$ 1,667	\$ 949
Sales and marketing	612	405	1,202	835
General and administrative	727	739	1,411	1,453
Research and development	299	280	599	554
Total share-based compensation expenses	\$ 2,454	\$ 1,894	\$ 4,879	\$ 3,791

Table of Contents**17. FAIR VALUE MEASUREMENTS***Measured on recurring basis*

The Company measured the cash equivalents and the short-term investments available-for-sale securities at fair value on a recurring basis as of June 30, 2012 and December 31, 2011.

Cash equivalents are classified within Level 1 of the fair value hierarchy because they are valued based on the quoted market price in an active market.

The Company uses quoted prices in active markets for identical assets (Level 1 investments) to determine the fair value of available-for-sale securities. If quoted prices in active markets for identical assets are not available to determine fair value, then the Company uses quoted prices for similar assets or inputs other than the quoted prices that are observable either directly or indirectly, which are included in Level 2 investments. The Company did not have Level 2 investments as of June 30, 2012 and December 31, 2011. The Company's Level 3 investments primarily include investments in certain funds without readily available prices as of the balance sheet date. The Company values its Level 3 investments using the counter party's estimated price as of the most recent priced day prior to the balance sheet date because the Company believes the fair value of the investments would not have materially changed between the pricing date and the balance sheet date.

The available-for-sale securities measured and recorded at fair value as of June 30, 2012 and December 31, 2011 were as follows:

	June 30, 2012				December 31, 2011			
	Fair Value Measurements at the Reporting Date Using				Fair Value Measurements at the Reporting Date Using			
	Quoted Prices in			Total Balance	Quoted Prices in			Total Balance
	Active Markets for Identical Instruments (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)		Active Markets for Identical Instruments (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)	
Bond funds	\$ 26,267	\$ 0	\$ 0	\$ 26,267	\$ 16,877	\$ 0	\$ 0	\$ 16,877
Balance funds	0	0	0	0	0	0	601	601
Stock funds	0	0	0	0	0	0	9,975	9,975
Corporate stocks	59	0	450	509	47	0	409	456
Total	\$ 26,326	\$ 0	\$ 450	\$ 26,776	\$ 16,924	\$ 0	\$ 10,985	\$ 27,909

The following table presents changes in Level 3 investments measured on a recurring basis for the six-month periods ended June 30, 2012 and 2011:

	Six Months Ended June 30,	
	2012	2011
Beginning balance	\$ 10,985	\$ 11,265
Purchases	450	2,285
Redemption	(8,956)	(1,522)
Realized gain	(2,027)	(199)
Unrealized loss	0	(368)
Exchange difference	(2)	180
Ending balance	\$ 450	\$ 11,641

Table of Contents**Measured on non-recurring basis**

The Company's financial assets and liabilities measured at fair value on a non-recurring basis include acquired assets and liabilities at initial recognition based on Level 3 inputs in connection with business acquisitions.

The Company measured the fair value of the purchased intangible using the cost, income approach-excess earnings or with & without valuation methods. These purchased intangible assets are considered Level 3 assets because the Company used unobservable inputs, such as forecasted financial performance of the acquired business and discount rates, to determine the fair value of these purchased assets.

18. EARNINGS PER SHARE

The following is a reconciliation of the numerators and denominators of the basic and diluted net income per share computations:

	Three Months Ended June 30,		Six Months Ended June 30,	
	2012	2011	2012	2011
Net income attributable to AsiaInfo-Linkage, Inc. common stockholders (numerator)	\$ 6,225	\$ 32,949	\$ 12,587	\$ 50,789
Shares (denominator):				
Weighted average common stock outstanding				
Basic	72,508,556	73,318,324	72,491,005	74,150,914
Dilutive effect of employee stock options and restricted stock units	255,323	643,237	253,711	616,049
Diluted	72,763,879	73,961,561	72,744,716	74,766,963
Earnings per share				
Net income attributable to AsiaInfo-Linkage, Inc. common stockholders				
Basic	\$ 0.09	\$ 0.45	\$ 0.17	\$ 0.68
Diluted	\$ 0.09	\$ 0.45	\$ 0.17	\$ 0.68

As of June 30, 2012 and 2011, the Company excluded outstanding options to acquire 6,317,155 and 0 shares of common stock, respectively, from the computation of diluted earnings per share (EPS), as their exercise prices exceeded the average market values in those periods. These options could potentially have a dilutive effect on the Company's EPS in the future. The Company also excluded 85,600 and 75,820 RSUs from the computation of diluted EPS as of June 30, 2012 and 2011, respectively, as their effect was anti-dilutive.

19. GOVERNMENT SUBSIDIES

Government subsidies include amounts granted by government authorities to encourage research and development for high-technology companies. Subsidies are recognized in the Company's financial statements once the approvals are obtained from the relevant government authorities and the Company has the right to receive the subsidies.

If the subsidy is granted in connection with a specific project, it would be recorded as a reduction to cost of revenues. Otherwise, the subsidy is recorded as other operating income. For the three-month periods ended June 30, 2012 and 2011, the Company recognized no government subsidies as a reduction to costs of revenues and government subsidies in other operating income of \$0 and \$2,125, respectively. For the six-month periods ended June 30, 2012 and 2011, the Company recognized government subsidies as a reduction to costs of revenues of \$1,891 and \$0, respectively, and government subsidies in other operating income of \$0 and \$2,125, respectively.

Table of Contents

20. SEGMENT INFORMATION

The Company's operations are currently organized into five business units by three telecommunication carriers in China, multiple Cable Television providers in China, and telecommunication carriers internationally. In accordance with FASB guidance, each of these five business units represents an operating segment, of which discrete financial information is available and is evaluated regularly by the chief operating decision maker, or decision making group, in deciding how to allocate resources and in assessing performance. The five operating segments are aggregated into one reportable segment because they meet the aggregation criteria of FASB and have the same economic characteristics.

The Company's chief operating decision maker is the Company's Business Committee, comprising the Company's Chief Executive Officer, Chief Financial Officer and senior management team.

The Company primarily operates in the PRC and substantially all of the Company's long-lived assets are located in the PRC.

21. COMMITMENTS AND CONTINGENCIES

Commitments

In May 2011, the Company entered into a land use right transfer agreement with the Beijing Municipal Bureau of Land and Resources, under which the Company acquired land use rights for a 50-year term. Pursuant to the agreement, the Company has committed a minimum of \$27,153 for capital expenditures to the building construction project, which commenced in April 2012, and to complete construction by April 30, 2014.

As of June 30, 2012, the Company was committed to purchase software from IBM amounting to \$3,162, which is expected to be paid from 2012 to 2014.

Litigation

The Company received a letter dated July 30, 2007 from a putative stockholder demanding that the Company investigate and prosecute a claim for alleged short-swing trading in violation of Section 16(b) of the Securities Exchange Act of 1934, as amended (the "Exchange Act"), by the underwriters of the Company's initial public offering ("IPO") and certain of the Company's unidentified directors, officers and stockholders. In October 2007, the putative stockholder commenced a civil lawsuit in the U.S. District Court for the Western District of Washington against Morgan Stanley and Deutsche Bank, two of the lead underwriters of the Company's IPO, alleging violations of Section 16(b) of the Exchange Act. The complaint alleged that the combined number of shares of the Company's common stock beneficially owned by the lead underwriters and certain unnamed officers, directors and principal stockholders exceeded ten percent of the Company's outstanding common stock from the date of the Company's IPO in March 2000 for at least one year. It further alleged that those entities and individuals were thus subject to the reporting requirements of Section 16(a) and the short-swing trading prohibition of Section 16(b), and failed to comply with those provisions. The complaint sought to recover from the lead underwriters any short-swing profits obtained by them in violation of Section 16(b). None of the Company's directors, officers or stockholders were named as defendants in this action, although the Company was named as a nominal defendant. In March 2009, pursuant to a joint motion the Company brought with several other issuer defendants, the court dismissed the complaint without prejudice on the ground that the plaintiff failed to make an adequate demand to the Company and the other issuer defendants prior to filing the complaint. The plaintiff subsequently appealed to the Court of Appeals for the Ninth Circuit, and the underwriter defendants filed certain cross-appeals.

Table of Contents

In December 2010, the Ninth Circuit affirmed the decision to dismiss the complaint against the issuer defendants and further ordered that the dismissals be made with prejudice. The Ninth Circuit, however, reversed and remanded certain claims relating to the underwriters, finding that plaintiff's claims were not time-barred under the applicable statute of limitations. In January 2011, the Ninth Circuit denied certain petitions for rehearing and ordered that no further petitions for rehearing may be filed, but stayed the effect of its decision pending appeal to the U.S. Supreme Court. In June 2011, the U.S. Supreme Court denied plaintiff's request for review of the Ninth Circuit's decision that the demand was inadequate and granted the underwriter defendants' request for review of the statute of limitations issue. In March 2012, the U.S. Supreme Court vacated the Ninth Circuit's holding that petitioner's claims were not time-barred, and remanded the cases to the District Court for proceedings consistent with the Supreme Court's opinion. In June 2012, the mandate of the Ninth Circuit was formally entered. In the same month, the plaintiff voluntarily dismissed the case with prejudice as to the adequacy of the pre-suit demand issue, and without prejudice as to all other issues.

22. STOCK REPURCHASE PROGRAM

On January 30, 2011, the Company announced the authorization of a stock repurchase program, under which the Company could, from time to time for a period of twelve months, depending on market conditions, share price and other factors, make one or more purchases, on the open market or in privately negotiated transactions, of up to \$60,000 in aggregate value of the Company's outstanding common stock. As of June 30, 2011, the Company repurchased 3,166,500 shares of its common stock at a total cost of \$59,997 pursuant to this repurchase program. The Company determined that it completed the repurchases pursuant to the program. No stock was repurchased by the Company during the second quarter of 2012.

All common stock repurchased by the Company has become part of its treasury stock.

23. NONCONTROLLING INTEREST

(a) On September 25, 2008, the Company established a new subsidiary, Shanghai Xinjia Science & Technology Co., Ltd (AISH) in Shanghai, with a total capital contribution of \$732. The Company and Ms. Yao Yuan, the other shareholder of AISH, hold 90% and 10% of AISH's share capital, respectively. AISH mainly provides software and services to telecommunication carriers in Shanghai. The 10% of AISH's share capital held by Ms. Yao Yuan was recorded as noncontrolling interest.

(b) In October 2009, the Company acquired 60% of the share capital of SmartCall Holding Limited and the remaining 40% of the share capital was recorded as noncontrolling interest.

(c) In September 2011, the Company's VIE Beijing Star VATS Technologies, Inc. (Beijing Star VATS) acquired 60% of the share capital of Chengdu Yalian Zhixing Technology Ltd. The remaining 40% of the share capital was recorded as noncontrolling interest.

24. REDEEMABLE NONCONTROLLING INTEREST

(a) In October 2009, the Company formed AsiaInfo International Pte Ltd (AIP) with Alpha Growth International Pte Ltd, a company incorporated under the laws of Singapore (AGI), in Singapore. AIP has total issued and paid-up share capital of \$4,000. The Company contributed \$2,800 to AIP in cash, which represents 70% of AIP's share capital. AGI contributed \$1,200 to AIP in cash, which represents 30% of AIP's share capital. AIP serves as an exclusive agent to market and distribute the Company's telecommunications software and service solutions in certain regions in Southeast Asia until December 2014 or such other date as the Company and AGI may mutually agree. The Company has consolidated AIP since its incorporation.

Pursuant to the agreement with AGI, the Company granted a put option to AGI to sell, while the Company received a call option from AGI to purchase, the 30% equity interest held by AGI. The options are exercisable within a 30 day-period from the date of issuing the audit report of AIP's 2013 financial statements. The exercise prices for the call and the put options of the 30% equity interest held by AGI are the same and are determined by a formula based on the performance of AIP for years 2012 and 2013.

(b) In May 2010, the Company, through a subsidiary of the Company, acquired an 80% equity interest in Hangzhou Zhongbo for an aggregate purchase price of \$7,068 in cash. Hangzhou Zhongbo provides IT solutions to broadcasting operators in China.

Table of Contents

Pursuant to the agreement with the other shareholder of Hangzhou Zhongbo, the Company granted a put option to such shareholder of Hangzhou Zhongbo to sell, while the Company received a call option from such shareholder of Hangzhou Zhongbo to purchase, the 20% equity interest held by such shareholder in Hangzhou Zhongbo. The options are exercisable after December 31, 2011. The exercise prices for the call and the put options of the 20% equity interest held in Hangzhou Zhongbo are the same and are determined by a formula based on the performance of Hangzhou Zhongbo for years 2010 and 2011.

These noncontrolling interests were recorded outside of the permanent equity on the consolidated balance sheets initially at the fair value of the noncontrolling interests as of the date of incorporation or the date of acquisition of these subsidiaries. Subsequently, each noncontrolling interest was carried at the higher of (1) the initial carrying amount, increased or decreased for the noncontrolling interest's share of net income or loss or (2) the accreted amount to the expected redemption value. The change of the carrying amounts of the redeemable noncontrolling interest is recognized as net income attributable to noncontrolling interest in the consolidated statements of operations. For the first and second quarter of year 2012, the amount charged to net income attributable to noncontrolling interests was \$684 and \$759, respectively, which represents the noncontrolling interests' share of net loss of these subsidiaries.

In June 2012, the Company exercised the call option and purchased the remaining 20% equity interest in Hangzhou Zhongbo for a consideration of \$1,034. As a result of the exercise of call option, the Company holds 100% equity interest in Hangzhou Zhongbo.

	Redeemable Noncontrolling Interest	
Balance at December 31, 2011	\$	385
Net loss		(684)
Adjustment to redemption value		0
Balance at March 31, 2012	\$	(299)
Net loss		(759)
Adjustment to redemption value		0
Noncontrolling interest redeemed by parent company		(1,259)
Balance at June 30, 2012	\$	(2,317)

25. SUBSEQUENT EVENTS

On June 20, 2012, the Company's subsidiary Beijing Star VATS entered into an investment agreement with Beijing Naomi Technology Limited (Naomi), which provides personalized internet-based product recommendations based on customers' on-line purchasing patterns. Pursuant to the investment agreement, Beijing Star VATS agreed to invest \$1,880 (RMB11,900) in Naomi in two equal tranches. The first tranche was paid to Naomi in July 2012. The second tranche may be paid to Naomi upon its achievement of certain operational targets, if Beijing Star VATS then elects to invest, in its sole discretion.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Except for historical information, the statements contained in this quarterly report on Form 10-Q are forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, or the Securities Act, and Section 21E of the Securities Exchange Act of 1934, as amended, or the Exchange Act. The Private Securities Litigation Reform Act of 1995, or the Reform Act, contains certain safe harbors regarding forward-looking statements. Certain of the forward-looking statements include management's expectations, intentions and beliefs with respect to our growth, our operating results, the nature of the industry in which we are engaged, our business strategies and plans for future operations, our needs for capital expenditures, capital resources and liquidity, and similar expressions concerning matters that are not historical facts. Such forward-looking statements are subject to risks and uncertainties that could cause actual results to differ materially from those expressed in the statements. All forward-looking statements included in this report are based on information available to us on the date hereof, and we assume no obligation to update any such forward-looking statements. These cautionary statements are being made pursuant to the provisions of the Reform Act with the intention of obtaining the benefits of the safe harbor provisions of the Reform Act. The factors that could cause actual results to differ materially include, but are not limited to, the factors discussed under the heading "Risk Factors" in our Form 10-K for the year ended December 31, 2011 and in the reports we file with the U.S. Securities and Exchange Commission, or the SEC, from time to time.

In this report, the Company, we, us and our refer to AsiaInfo-Linkage, Inc. and its subsidiaries and consolidated variable interest entities, or VIEs, Linkage refers to Linkage Technologies International Holdings Limited, and AsiaInfo refers to the Company prior to its combination with Linkage.

Overview

We are the leading provider of high-quality telecommunications software solutions and information technology, or IT, products and services in China. Our software and services enable our customers to build, maintain, operate, manage and improve their communications infrastructure. Our largest customers are the major telecommunications carriers in China and their provincial subsidiaries, including China Mobile Communications Corporation, or China Mobile, China United Telecommunications Corporation, or China Unicom, and China Telecommunications Corporation, or China Telecom.

We have penetrated into China's cable television business supporting system market through our Hangzhou Zhongbo subsidiary, which provides IT solutions, including business support systems such as billing and customer relationship management software and services. We won several critical contracts to provide modernized business support system for consolidated provincial-level cable operational entities, such as Jiangsu province and Zhejiang province, as well as entities in Chongqing and Beijing. We believe the successful implementation of these projects has brought additional value to our customers and positions us well for future cable industry consolidation of multiple regional operators, which we expect to accelerate in the coming years.

We are also expanding our footprint in the international telecommunications software and services market by leveraging the valuable experience gained from our Chinese telecommunications carriers. In 2011, we won new contracts from customers in Southeast Asia, including Malaysia, Nepal and others, after an detailed selection process against other industry leading vendors, which is a significant achievement given the long selling cycle of business support software. In June 2012, we opened our first European based sales office in Cambridge, United Kingdom as part of our ongoing initiative to expand operations across Europe, Middle East and Africa (EMEA) markets.

We commenced our operations in the United States, or the U.S., in 1993 and moved our major operations from the U.S. to China in 1995. We began generating significant network solutions revenues in 1996 and significant software revenues in 1998. We conduct the bulk of our business through our operating subsidiaries, most of which are Chinese companies. On July 1, 2010, we completed the combination with Linkage and, in connection with the closing, changed our corporate name to AsiaInfo-Linkage, Inc.

Table of Contents

We have derived, and believe that we will continue to derive, a significant portion of our revenues from a limited number of large telecommunications customers, such as China Mobile, China Unicom and China Telecom and their respective provincial subsidiaries. The following table shows our revenues and percentage of total revenues derived from those three customers (and their respective provincial subsidiaries) for the three months ended June 30, 2012 and 2011.

	Three Months Ended June 30,			
	2012		2011	
	Revenues (in thousands)	Percentage of Total Revenues	Revenues (in thousands)	Percentage of Total Revenues
China Mobile	\$ 67,103	53%	\$ 59,406	51%
China Telecom	22,266	18%	21,623	19%
China Unicom	33,059	26%	33,353	29%
Total	\$ 122,428	97%	\$ 114,382	99%

As a result of our reliance on our key customers in the telecommunications industry, our operating results are influenced by governmental spending policies in that sector. Historically, there have been a number of state-mandated restructurings in China's telecommunications sector. Some of these restructurings have led to cancellation or delays in telecommunications-related capital expenditures that have negatively impacted our operating results in certain periods. Other restructurings have caused our revenues to increase as carriers have increased spending on software and IT infrastructure designed to increase their competitiveness. Any future restructurings affecting our major telecommunications customers could have an adverse impact on our business.

For financial reporting purposes, we present our revenues as follows:

Software products and solutions;

Services; and

Third-party hardware.

Recent Developments

On January 20, 2012, we announced the receipt of a non-binding proposal letter from Power Joy (Cayman) Limited, or Power Joy, a wholly owned subsidiary of CITIC Capital China Partners II, L.P., pursuant to which Power Joy proposed to acquire all of our outstanding shares of common stock in cash at a price that represents a premium over the stock price. A special committee of the board of directors, or the Special Committee, was formed to consider the proposal and any potential alternative transactions. The Special Committee retained Shearman & Sterling LLP as its legal counsel and Goldman Sachs (Asia) L.L.C. as its financial advisor to assist it in consideration of such matters. On March 26, 2012, we announced that the Special Committee would solicit interest from, and engage in discussions with, other potential qualified interested parties regarding a potential transaction involving us, and to evaluate any proposals it receives. There can be no assurance that any definitive offer will be made, that any agreement will be executed or that any transaction will be approved of or consummated.

In June 2012, we opened an office in Cambridge, United Kingdom as part of our ongoing initiative to expand international operations, particularly in the European, Middle Eastern and African (EMEA) markets.

Revenues

In accordance with authoritative accounting guidance, we recognize revenue when persuasive evidence of an arrangement exists, delivery has occurred, the fee is fixed or determinable, collectability is probable, and conditions set forth in other applicable revenue recognition guidance and interpretations are satisfied.

Table of Contents

Our revenue is derived from three primary sources: (i) software licenses and related services, including implementation, customization and integration, post-contract customer support, or PCS, training and consulting; (ii) professional services for systems design, planning, consulting, and system integration; and (iii) the procurement of hardware on behalf of customers.

Our multiple-element arrangements relate to our software licenses and related services, including implementation, customization and integration, PCS, training, consulting and third party hardware procurement.

Software products and solutions revenue. Revenues of software licenses and related services, including implementation, customization and integration, PCS, training and consulting, are recognized using the percentage of completion method over the service period based on the relationship of costs already incurred to the total estimated costs to be incurred because such customer orders require significant production, modifications, or customization of the software. We consider total project costs (labor costs and other related costs) in calculating the percentage of completion and recognize cost of sales on an actual basis with no deferral of project costs, including pre-contract costs. Software arrangements with significant production, modifications, or customization are sold with bundled third-party hardware and PCS services. Because PCS services have never been sold separately in these arrangements, they do not have stand-alone fair value or vendor-specific objective evidence of fair value. The percentage of completion method of revenue recognition is therefore applied to the period from the start of the significant production, modifications, or customization through the last element delivered, which is typically the end of the bundled PCS services period. Revisions in estimated contract costs are made in the period in which the circumstances requiring the revision become known. Provisions, if any, are made currently for anticipated losses on uncompleted contracts. In addition, we provide multiple services and products (software, hardware, implementation, maintenance and managed services) to certain customers for projects outside of China. Revenue is deferred during the implementation phases and recognized ratably over the managed service periods upon the completion of implementation phases.

Service revenue. Revenues of professional services for systems design, planning, consulting, and system integration are recognized when the services are performed.

In addition, we generate service revenues by acting as a sales agent for International Business Machines Corporation, or IBM, or its distributors, and a few other hardware vendors, for certain products sold to our customers, which we refer to as our IBM-Type Arrangements. The service fee under the IBM-Type Arrangements is determined as a percentage of the gross contract amount. We have evaluated the criteria outlined in guidance issued by the Financial Accounting Standards Board, or the FASB, regarding reporting revenue gross as principal versus net as an agent, in determining whether to record as revenues the gross amount billed to our customers and related costs or the net amount earned after deducting hardware costs paid to the vendor, even though we bear inventory risks after the vendor ships the products to us and we bill gross amounts to our customers. We record the net amount earned after deducting hardware costs as agency service revenue because (1) the vendor is the primary obligor in these transactions, (2) we have no latitude in establishing the prices, (3) we are not involved in the determination of the product specifications, (4) we do not bear credit risk because we are contractually obligated to pay the vendor only when the customers pay us, and (5) we do not have the right to select suppliers.

Third-party hardware revenue. Revenues of the procurement of hardware on behalf of customers, if not bundled with other arrangements, are recognized when shipped and customer acceptance obtained, if all other revenue recognition criteria are met. Costs associated with revenues are recognized when incurred. If bundled with other arrangements, we generally bifurcate the third-party hardware from the development services and recognize the hardware revenue upon customer acceptance using estimated prices based on cost plus a margin, which we believe to be the fair value of the selling price.

Net revenue. Although we report our revenue on a gross basis, inclusive of hardware acquisition costs, we manage our business internally based on revenues net of hardware costs, or net revenues, a non-GAAP measure. We believe this approach is consistent with our strategy of providing our customers with high value IT professional services and, where efficient, outsourcing lower-end services such as hardware acquisition and installation. This strategy may result in lower growth rates for total revenue as against prior periods, but will not adversely impact revenue net of hardware costs. The following table shows our revenue breakdown on this basis and reconciles our net revenues to total revenues:

	Three Months Ended June 30,	
	2012	2011
Revenues net of hardware costs:		
Software products and solutions revenue	\$ 116,772	\$ 102,849
Service revenue	7,553	7,140
Third-party hardware revenue net of hardware costs	98	310

Edgar Filing: ASIAINFO-LINKAGE, INC - Form 10-Q

Total revenues net of hardware costs	124,423	110,299
Total hardware costs	1,848	5,887
Total revenues	\$ 126,271	\$ 116,186

Table of Contents

	Six Months Ended June 30,	
	2012	2011
Revenues net of hardware costs:		
Software products and solutions revenue	\$ 230,834	\$ 204,233
Service revenue	14,507	14,017
Third-party hardware revenue net of hardware costs	232	621
Total revenues net of hardware costs	245,573	218,871
Total hardware costs	4,395	11,796
Total revenues	\$ 249,968	\$ 230,667

We believe total revenues net of hardware costs more accurately reflects our core business, which is the provision of software solutions and services, and provides transparency to our investors. We believe this measure provides transparency to our investors because it is the measure used by our management to evaluate the competitiveness and performance of our business. In addition, third-party hardware revenue tends to fluctuate from period to period depending on the requirements of our customers. As a result, a presentation that excludes hardware costs allows investors to better evaluate the performance of our core business.

Cost of Revenues

Software products and solutions costs. Software products and solutions costs consist primarily of three components:

packaging and written manual expenses for our proprietary software products and solutions;

compensation and travel expenses for the professionals involved in modifying, customizing or installing our software products and solutions and in providing consultation, training and support services; and

software license fees paid to third-party software providers for the right to sublicense their products to our customers as part of our solutions offerings.

The costs associated with designing and modifying our proprietary software are classified as research and development expenses as incurred.

The costs incurred for the implementation phases of projects outside of China, which provide multiple services and products (software, hardware, implementation, maintenance and managed services), are deferred and capitalized as inventories during the system implementation phase, and transferred to cost of sales upon revenue recognition.

Service costs. Service costs consist primarily of compensation and travel expenses for the professionals involved in designing and implementing IT services, management consulting and network solutions projects.

Table of Contents

Third-party hardware costs. We generally recognize hardware costs in full upon delivery of the hardware to our customers. In order to minimize our working capital requirements, we generally obtain from our hardware vendors payment terms that are timed to permit us to receive payment from our customers for the hardware before our payments to hardware vendors are due. However, in large projects we sometimes obtain less favorable payment terms from our customers, thereby increasing our working capital requirements.

Amortization of intangible assets, depreciation of properties and equipment, and rental expenses are also included in cost of revenue.

Operating Expenses

Operating expenses consist of sales and marketing expenses, general and administrative expenses and research and development expenses. Amortization of acquired intangible asset expenses consistently comprise a significant portion of our total operating expenses.

Sales and marketing expenses include compensation expenses for employees in our sales and marketing departments, third-party advertising expenses, sales commissions and sales consulting fees, as well as the depreciation and amortization expenses allocated to our sales and marketing departments.

Research and development expenses relate to the development of new software and the modification of existing software. We expense such costs as they are incurred.

General and administrative expenses include compensation expenses for employees in our general and administrative departments, consulting fees, as well as the depreciation expenses allocated to our general and administrative departments.

Government subsidies include amounts granted by government authorities to encourage research and development for high-technology companies.

Taxes

Except for certain hardware procurement and resale transactions, we conduct substantially all of our business through our Chinese subsidiaries and VIEs. To a smaller degree, our operations in Southeast Asia are conducted through our joint venture in Singapore and its subsidiaries. Prior to the enactment of China's current Enterprise Income Tax Law, or the EIT Law, which became effective on January 1, 2008, foreign-invested enterprises, or FIEs, were generally subject to a 30% state enterprise income tax plus a 3% local income tax. However, most of our operating subsidiaries in China, as FIEs, were entitled to tax holidays or certain preferential tax treatments, which thus reduced their effective rate of income tax to 15% or lower in some cases. Since the EIT Law became effective, all Chinese resident enterprises have been subject to a flat 25% income tax rate, unless they are eligible for certain preferential tax treatments.

Pursuant to implementation and transition rules related to the EIT Law, certain of our subsidiaries in China may enjoy a 15% preferential tax rate if they are qualified as High-and-New Technology Enterprises, or HNTE, while other of our subsidiaries and VIEs became subject to the 25% income tax rate. HNTE status is valid for three years. At the conclusion of the three-year period, the qualifying enterprise has the option to renew its HNTE status for an additional three years through a simplified application process if such enterprise's business operations continue to qualify for HNTE status. After the first six years, the enterprise would be subject to a new application process in order to renew its HNTE status. We received HNTE certification for AsiaInfo-Linkage Technologies (China), Inc., or AIBJ, AsiaInfo-Linkage Technologies (Chengdu), Inc., or AICD, and Linkage-AsiaInfo Technologies (Nanjing), Inc., or Linkage Nanjing, at the end of 2011 and the beginning of 2012, respectively, which allows those companies to compute tax at a reduced 15% tax rate from January 1, 2011 until December 31, 2013. As such, we computed tax at a reduced 15% tax rate for AIBJ, AICD and Linkage Nanjing for the year of 2011 and for the estimated annual effective tax rate of 2012.

AIBJ and Linkage Nanjing were approved as Key Software Enterprises, or KSEs, and were eligible for a further reduction in their tax rate to 10% for 2008, 2009, and 2010. As of the date of this report, government authorities in charge of the approval of KSE status have not released the application requirements for 2011 KSE status. AIBJ and Linkage Nanjing plan to apply for 2011 KSE status, but there is uncertainty as to whether they will meet eligibility requirements for or receive such status. As such, we have computed our current quarterly taxes based on the tax rate of 15% for both AIBJ and Linkage Nanjing.

Table of Contents

Sales of hardware procured in China are subject to a 17% value added tax, or VAT. Most of our sales of hardware procured outside of China are made through our U.S. parent company, AsiaInfo-Linkage, Inc., or one of its subsidiaries, Hong Kong AsiaInfo-Linkage Technologies Ltd., and thus are not subject to the VAT. We effectively pass VAT on hardware sales through to our customers and do not include them in revenue reported in our financial statements. Companies that develop their own software and register the software with relevant authorities in China are generally entitled to a VAT refund. If the net amount of the VAT payable exceeds 3% of software sales and software-related services, the excess portion of the VAT is refundable immediately. The policy was extended by a new tax circular issued in January 2011. The benefit of the VAT rebate is included in software revenue. Historically, the VAT refund received is not taxable for income tax purposes as long as the refund is used for research and development activities. However, according to a tax circular issued by the PRC State Administration of Taxation in January 2009, although the VAT refund would remain non-taxable when the refund is used for purchases of or expenses associated with fixed assets, the expenses and depreciation associated with such fixed assets are not tax deductible for income tax purposes. This circular also stipulates that any VAT refund not spent within the five-year period following its receipt must be added back to taxable income in the sixth year. It is unclear how this new rule will be implemented and in the absence of specific guidance we are treating the VAT refund received as a non-taxable item for income tax purposes till the five-year period ends.

Our PRC subsidiaries and VIEs are subject to business tax at the rate of 3% or 5%, respectively, on certain types of service revenues, which are presented in our statements of operations net of business tax incurred. Effective from December 1, 2010, our PRC subsidiaries and VIEs are also subject to Urban Maintenance and Construction Tax as well as Education Fee Surcharge at the rate of 7% and 3% of VAT and business taxes paid, respectively. Business taxes deducted from revenues during the six-month periods ended June 30, 2012 and 2011 were \$4.4 million and \$5.3 million, respectively.

In January 2011, the State Council issued a circular providing an exemption from business tax for eligible software companies on software development and testing, system integration, consulting and maintenance services. The circular also retains various policies granted by previous circulars, including the VAT rebate on sales of software. The implementation guidance of this new circular has not been issued as of the date of this report, although implementation guidance for value-added tax rebates on sales of software was issued in October 2011.

We are also subject to U.S. income taxes on revenues generated in the U.S., including revenues from our limited hardware procurement activities through our U.S. parent company, AsiaInfo-Linkage, Inc., and interest income earned in the U.S.

Foreign Exchange

A majority of our revenues and expenses relating to the hardware, sales and software and service components of our business are denominated in Renminbi, or RMB. The value of our shares will be affected by the foreign exchange rate between U.S. dollars and RMB because the value of our business is effectively denominated in RMB, while our shares are traded in U.S. dollars. In addition, as we pursue our global strategy, we have entered into agreements denominated in various currencies of Southeast Asian countries, expect to continue to do so in future, and expect that such activities may create similar foreign exchange risk associated with the currencies of these jurisdictions. Depreciation of the value of the U.S. dollar will also reduce the value of the cash we hold in U.S. dollars, which we may use for purposes of future acquisitions or other business expansion. We actively monitor our exposure to these risks and may adjust our cash position in the RMB and the U.S. dollar when we believe such adjustments will reduce our foreign exchange risks and are otherwise appropriate. We did not engage in any significant foreign exchange transactions during the six-month period ended June 30, 2012.

As of June 30, 2012, approximately 90.7%, or \$244.4 million, of our cash, cash equivalents and restricted cash were RMB-denominated and approximately 8.8%, or \$23.6 million, were U.S. dollar-denominated. Pursuant to the rate of exchange quoted by People's Bank of China as of June 30, 2012, the exchange rate between the U.S. dollar and the RMB was US\$1.00 = RMB6.3249, compared to the rate of US\$1.00=RMB6.4716 as of June 30, 2011.

Table of Contents

Critical Accounting Policies

We prepare our consolidated financial statements in accordance with accounting principles generally accepted in the United States, or US GAAP. The preparation of these financial statements requires us to make estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosure of contingent assets and liabilities at the date of the financial statements, as well as the reported amount of revenues and expenses during the reporting period. On an ongoing basis, we evaluate our estimates and judgments, including those related to revenues and cost of revenues under customer contracts, bad debts, inventories, short-term investments, long-term investments, income taxes, goodwill and other intangible assets, stock options, and litigation. We base our estimates and judgments on historical experience and on various other factors that we believe are reasonable. Actual results may differ from these estimates under different assumptions or conditions. We believe the following critical accounting policies involve the more significant judgments and estimates used in the preparation of our consolidated financial statements.

Revenue recognition. Our revenue is derived from three primary sources: (i) software licenses and related services, including implementation, customization and integration, post-contract customer support, or PCS, training and consulting; (ii) professional services for systems design, planning, consulting, and system integration; and (iii) the procurement of hardware on behalf of customers.

Our multiple-element arrangements relate to our software licenses and related services, including implementation, customization and integration, PCS, training, consulting and third party hardware procurement.

Revenues of software licenses and related services, including implementation, customization and integration, PCS, training and consulting, are recognized using the percentage of completion method over the service period based on the relationship of costs already incurred to the total estimated costs to be incurred because such customer orders require significant production, modifications, or customization of the software. We consider total project costs (labor costs and other related costs) in calculating the percentage of completion and recognize cost of sales on an actual basis with no deferral of project costs, including pre-contract costs. Software arrangements with significant production, modifications, or customization are sold with bundled third-party hardware and PCS services. Because PCS services have never been sold separately in these arrangements, they do not have stand-alone fair value or vendor-specific objective evidence of fair value. The percentage of completion method of revenue recognition is therefore applied to the period from the start of the significant production, modifications, or customization through the last element delivered, which is typically the end of the bundled PCS services period. Revisions in estimated contract costs are made in the period in which the circumstances requiring the revision become known. Provisions, if any, are made currently for anticipated losses on uncompleted contracts. Consistent with our strategy to grow our business in markets outside of China, we agreed to provide certain of our international customers multiple services and products (software, hardware, implementation, maintenance and managed services). For these international contracts, revenue is deferred during the implementation phases and recognized ratably over the managed service periods upon the completion of implementation phases, and project costs are deferred.

Revenues of professional services for systems design, planning, consulting, and system integration are recognized when the services are performed.

In addition, we generated service revenues by acting as a sales agent pursuant to the IBM-Type Arrangements. The service fee under our IBM-Type Arrangements is determined as a percentage of the gross contract amount. We have evaluated the criteria outlined in guidance issued by FASB regarding reporting revenue gross as principal versus net as agent, when determining whether we would record as revenues the gross amount billed to our customers and related costs or the net amount earned after deducting hardware costs paid to the vendor, even though we bear inventory risks after the vendor ships the products to us and we bill gross amounts to our customers. We record the net amount earned after deducting hardware costs as agency service revenue because (1) the vendor is the primary obligor in these transactions, (2) we have no latitude in establishing the prices, (3) we are not involved in the determination of the product specifications, (4) we do not bear credit risk because we are contractually obligated to pay the vendor only when the customers pay us, and (5) we do not have the right to select suppliers.

Revenues of the procurement of hardware on behalf of customers, if not bundled with other arrangements, are recognized when shipped and customer acceptance obtained, if all other revenue recognition criteria are met. Costs associated with revenues are recognized when incurred. If bundled with other arrangements, we generally bifurcate the third-party hardware from the development services and recognize the hardware revenue upon customer acceptance using estimated prices based on cost plus a margin, which we believe to be the fair value of the selling price.

Table of Contents

Revenue recognized in excess of billings is recorded as unbilled receivables and is included in accounts receivable. Amounts billed but not yet collected are recorded as billed receivables and are included in accounts receivable. All billed and unbilled amounts are expected to be collected within one year. Billings for installation and customization services are rendered based on agreed upon milestones specified in customer contracts. Billings in excess of revenues recognized are recorded as deferred revenue.

Income taxes. Deferred income taxes are provided using the asset and liability method. Under this method, deferred income taxes are recognized for tax credits and net operating losses available for carry-forwards and significant temporary differences. Deferred tax assets and liabilities are classified as current or non-current based upon the classification of the related asset or liability in the financial statements or the expected timing of their reversal if they do not relate to a specific asset or liability.

We record a valuation allowance to reduce our deferred tax assets to the amount that we believe is more likely than not to be realized. In the event we were to determine that we would be able to realize our deferred tax assets in the future in excess of their recorded amount, an adjustment to the deferred tax asset would increase income in the period such determination was made. Likewise, should we determine that we would not be able to realize all or part of our net deferred tax assets in the future, an adjustment to the valuation allowance would be charged to income in the period such change occurred.

The impact of an uncertain income tax position on the income tax return must be recognized at the largest amount that is more-likely-than not to be sustained upon audit by the relevant tax authority. An uncertain income tax position will not be recognized if it has less than a 50% likelihood of being sustained. Interest and penalties on income taxes will be classified as a component of the provisions for income taxes.

The HNTTE certificates of AIBJ, AICD and Linkage Nanjing were renewed at the end of 2011 and the beginning of 2012, respectively, which allows those companies to continue to enjoy a 15% preferential tax rate from January 1, 2011 until December 31, 2013.

AIBJ and Linkage Nanjing were KSEs eligible for a 10% tax rate for 2008, 2009, and 2010. As of the date of this report, government authorities in charge of the approval of KSE status have not released the application requirements for 2011 KSE status. AIBJ and Linkage Nanjing plan to apply for 2011 KSE status when the application requirements are released. There is uncertainty as to whether they will meet eligibility requirements for or receive such status, so we have computed our current quarterly taxes based on the tax rate of 15% for both AIBJ and Linkage Nanjing.

Under the EIT Law, a resident enterprise, which may include an enterprise established outside of the PRC with management located in the PRC, will be subject to PRC income tax. We believe we and our subsidiaries established outside the PRC are not resident enterprises under the EIT law.

Intangible assets and goodwill. Intangible assets consist of certain identifiable intangible assets resulting from business acquisitions and primarily comprise customer relationships, trade names and trademarks, core technologies and existing technology. We amortize these intangible assets over their respective estimated useful lives, which range from 0.5 to 19 years. Intangible assets are reviewed for impairment when events or changes in circumstances indicate that their carrying amounts may not be recoverable based upon the estimated undiscounted cash flows.

The excess of the purchase price over the fair value of net assets acquired is recorded on the consolidated balance sheets as goodwill. Goodwill is not amortized but is tested for impairment annually or more frequently if events or changes in circumstances indicate that it might be impaired.

Goodwill is tested for impairment at the reporting unit level (operating segment or one level below an operating segment) on an annual basis (October 1 for us) and between annual tests if an event occurs or circumstances change that would more likely than not reduce the fair value of a reporting unit below its carrying value. These events or circumstances could include a significant change in stock prices, business climate, legal factors, operating performance indicators, competition, or sale or disposition of a significant portion of a reporting unit.

Table of Contents

Application of the goodwill impairment test requires judgment, including the identification of reporting units, assignment of assets and liabilities to reporting units, assignment of goodwill to reporting units, and determination of the fair value of each reporting unit. The fair value of each reporting unit is estimated using a discounted cash flow methodology. This analysis requires significant judgments, including estimation of future cash flows, which is dependent on internal forecasts, estimation of the long-term rate of growth for our business, estimation of the useful life over which cash flows will occur, and determination of our weighted average cost of capital. The estimates used to calculate the fair value of a reporting unit change from year to year based on operating results and market conditions. Changes in these estimates and assumptions could materially affect the determination of fair value and goodwill impairment for the reporting unit.

In September 2011, the FASB issued an authoritative pronouncement related to testing goodwill for impairment. The guidance permits us to first assess qualitative factors to determine whether it is more likely than not that the fair value of a reporting unit is less than its carrying amount as a basis for determining whether it is necessary to perform the two-step goodwill impairment test. We adopted this pronouncement as of the first quarter of 2012. If it is more likely than not that the fair value of a reporting unit is less than its carrying amount, goodwill is then tested following a two-step process. The first step compares the fair value of each reporting unit to its carrying amount, including goodwill. If the fair value of each reporting unit exceeds its carrying amount, goodwill is not considered to be impaired and the second step will not be required. If the carrying amount of a reporting unit exceeds its fair value, the second step compares the implied fair value of goodwill to the carrying value of a reporting unit's goodwill. The implied fair value of goodwill is determined in a manner similar to accounting for a business combination with the allocation of the assessed fair value determined in the first step to the assets and liabilities of the reporting unit. The excess of the fair value of the reporting unit over the amounts assigned to the assets and liabilities is the implied fair value of goodwill. An impairment loss is recognized for any excess in the carrying value of goodwill over the implied fair value of goodwill.

As of June 30, 2012, the estimated fair value of the reporting unit exceeded the carrying value by 11%, and we recognized no impairment loss on goodwill in the second quarter of 2012.

Impairment of long-term and short-term investments. We review our long-term and short-term investments for other-than-temporary impairment in accordance with relevant accounting literature, based on the specific identification method. We consider available quantitative and qualitative evidence in evaluating potential impairment of our investments. If the cost of an investment exceeds the investment's fair value, we consider, among other factors, general market conditions, government economic plans, the duration and the extent to which the fair value of the investment is less than the cost, and our intent and ability to hold the investment. In view of the declines of fair value below the carrying cost of certain short-term and long-term investments, we performed an evaluation to determine whether any of them were other-than-temporary in accordance with ASC 320 and SEC Staff Accounting Bulletin Topic 5M. We recognized no impairment losses on long-term investments and short-term investments in the second quarter of 2012 or 2011.

Consolidated Results of Operations

Revenues. Total revenues were \$126.3 million for the three-month period ended June 30, 2012, representing an 8.7% increase over the same period in 2011 and a 2.1% increase sequentially. The year-over-year increase was primarily the result of continued investment in IT software from China's telecom carriers and the sequential increase was mainly due to \$2.3 million from the on-time delivery of China Mobile's previously signed projects and \$0.5 million from the delivery of international projects during the three-month period ended June 30, 2012.

Software products and solutions revenue was \$116.8 million for the three-month period ended June 30, 2012, representing an increase of 13.5% over the comparable period in 2011 and a 2.4% sequential increase. The year-over-year increase was primarily attributable to a 16.8% increase in revenue from China Mobile and a 14.2% increase in revenue from China Telecom. The sequential increase was primarily attributable to a 2.8% increase in revenue from China Mobile and a 1.4% increase in revenue from China Telecom.

Service revenue was \$7.6 million for the three-month period ended June 30, 2012, representing an increase of 5.8% over the comparable period in 2011 and an 8.6% sequential increase. The year-over-year increase was primarily attributable to a 7.2% increase in revenue from China Mobile. The sequential increase was primarily attributable to an 8.5% increase in revenue from China Mobile and a 33.1% increase in revenue from China Unicom.

Table of Contents

Third-party hardware revenue was \$1.9 million for the three-month period ended June 30, 2012, representing a year-over-year decrease of 68.6% and a sequential decrease of 27.4%. Third-party hardware revenue, which represented 1.5% of our total revenues in the three-month period ended June 30, 2012, is not our business focus and is dependent on the changing demands of our Chinese telecom carriers on a contract-by-contract basis.

During the second quarter of 2012, sales to our top three customers, China Mobile, China Unicom and China Telecom (and their respective provincial subsidiaries), accounted for approximately 97.0% of our total revenue, with China Mobile, China Unicom, and China Telecom representing 53.2%, 26.2% and 17.6%, respectively.

Cost of revenues. Our cost of revenues was \$77.6 million for the three-month period ended June 30, 2012, representing an increase of 15.7% over the comparable period in 2011. Cost of revenues for the three-month period ended June 30, 2012 increased 3.2% compared to the preceding quarter. The year-over-year increase in cost of revenues was primarily attributable to an increase in employee headcount of implementation engineers of 1,290, or 18%, in the second quarter of 2012, compared to 2011 and an increase in overall compensation due to wage inflation in the China macro environment. The increase also reflected increased share-based compensation expense of \$347, or 74.0%, to \$816 in the second quarter of 2012.

Gross profit margin. Our gross profit margin for the three-month period ended June 30, 2012 was 38.5%, compared to 42.2% in the comparable period in 2011 and 39.2% in the preceding quarter. The year-over-year decrease in gross margin was primarily attributable to an increase in employee compensation expense, which was mainly due to the increased headcount of implementation engineers and increased share-based compensation expense. The slight sequential decrease was primarily due to the increase in implementation costs incurred in the second quarter after the end of the Chinese Lunar New Year in the first quarter.

Operating expenses. Our operating expenses were \$46.7 million for the three-month period ended June 30, 2012, representing an increase of 35.0% over the comparable period in 2011 and 1.6% sequentially. The year-over-year increase was primarily attributable to our research and development, or R&D, expenses relating to product development for current and anticipated contract opportunities, product standardization initiatives, and delivery improvement initiatives. The sequential increase in operating expenses was primarily attributable to increased R&D expenses which was offset by a decrease in sales and marketing expenses.

Sales and marketing expenses were \$18.4 million for three-month period ended June 30, 2012, representing a decrease of 4.0% over the comparable period in 2011 and 9.4% sequentially. The year-over-year decrease in sales and marketing expenses was driven by the full amortization of certain intangible assets related to the Linkage acquisition as of June 30, 2011, which saw a decrease of sales and marketing expense of \$2.5 million, and the sequential decrease was mainly due to decreased sales and marketing activities in the period.

General and administrative expenses were \$7.8 million for the three-month period ended June 30, 2012, representing an increase of 39.1% over the comparable period in 2011 and a sequential increase of 4.7%. The year-over-year increase was mainly attributable to an additional accrual of allowance for doubtful account of \$0.6 million, general wage inflation in China and an increase in headcount by 36 professionals in the second quarter of 2012, which increased overall compensation. The sequential increase was mainly the result of an additional accrual of allowance for doubtful accounts of \$0.3 million.

Research and development expenses were \$20.4 million for the three-month period ended June 30, 2012, representing an increase of 72.0% over the comparable period in 2011 and a 12.7% sequential increase. The year-over-year increase in R&D expenses reflected an increase in compensation, which was a result of an overall rise in wage inflation in China and the addition of 321 R&D engineers compared to the second quarter of 2011. The sequential increase in R&D expenses was primarily due to an increase in overtime and travel-related expenses of \$0.7 million, which increased in the second quarter after the end of the Chinese Lunar New Year holiday in the first quarter.

Other income, net. Other income, including interest income, dividend income, gain from sales of short-term investments, net of other expenses, was \$4.0 million for the three-month period ended June 30, 2012, representing an increase of 231.8% over the comparable period in 2011 and a decrease of 5.7% sequentially. The year-over-year increase was primarily due to improved returns from our bank deposits and a \$1.2 million gain from sales of short-term investment in the second quarter of 2012.

Table of Contents

Net income. Net income was \$5.3 million for the three-month period ended June 30, 2012, representing a decrease of 83.5% over the comparable period in 2011 and 1.8% sequentially.

Net income attributable to AsiaInfo-Linkage, Inc. Net income attributable to AsiaInfo-Linkage, Inc. for the three-month period ended June 30, 2012 was \$6.2 million, or \$0.09 per basic share, compared to \$32.9 million, or \$0.45 per basic share, for the comparable period in 2011, and \$6.4 million, or \$0.09 per basic share, for the previous quarter.

Liquidity and Capital Resources

Our liquidity and capital resources are provided mainly from cash collection from customers resulting from our core operating activities. Our capital requirements are primarily working capital requirements related to hardware sales and costs associated with the expansion of our business, such as research and development and sales and marketing expenses. We recognize hardware costs in full upon delivery of the hardware to our customers. In order to minimize our working capital requirements, we generally obtain from our hardware vendors payment terms that are timed to permit us to receive payment from our customers for the hardware before our payments to hardware vendors are due. With respect to our billing cycle, we generally require our customers to pay 80% to 90% of the invoice value of the hardware upon delivery. We typically place orders for hardware against back-to-back orders from customers and seek favorable payment terms from hardware vendors. However, we sometimes obtain less favorable payment terms from our customers, thereby increasing our working capital requirements. In addition to this careful management of our billing cycle, we have also historically financed working capital and other capital requirements through private placements of equity securities, our initial public offering in 2000 and, to a limited extent, bank loans.

On December 4, 2009, we executed the Business Combination Agreement to combine our business with the business of Linkage through our acquisition of 100% of the outstanding share capital of Linkage Technologies, and we completed the combination with Linkage on July 1, 2010.

For the first half of 2012, we had net cash used in operating activities of \$21.4 million. We had cash and cash equivalents, restricted cash and short-term investment totaling \$296.1 million as of June 30, 2012 as compared to \$321.6 million as of December 31, 2011. The decrease was mainly a result of our negative operating cash flow during the second quarter of 2012. Our negative operating cash flow was due to in part by a \$25.7 million increase in accounts receivable during this period. Our \$307.3 million accounts receivable balance as of June 30, 2012 consisted of \$132.9 million in billed receivables, which are recorded based on agreed upon milestones in customer contracts, and \$174.4 million in unbilled receivables, which reflect revenues we have recognized under the percentage of completion method but for which we have not yet billed the customer. Our accounts receivable balance as of June 30, 2012 related to the IBM-Type Arrangements was approximately \$87.1 million.

Our net cash used in operating activities for the six-month period ended June 30, 2012 was \$21.4 million, which reflected our net income of \$10.7 million adjusted by net non-cash related expenses, such as amortization, depreciation and share based compensation expenses, totaling of \$25.7 million and a net decrease in the components of our working capital of \$57.8 million. Accounts receivable as of June 30, 2012 was \$307.3 million, consisting of \$132.9 million in billed receivables and \$174.4 million in unbilled receivables. Our billed receivables are recorded based on agreed-upon milestones included in our customer contracts. Our days of sales outstanding, or DSO, as of June 30, 2012 was 154 days, which was a slight decrease from 155 days as of March 31, 2012 and an increase from 147 days as of December 31, 2011. When calculating our DSO, we have adjusted for the net effect of the IBM-Type Arrangements. The increase in DSO from December 31, 2011 to June 30, 2012 was primarily attributable to a \$25.7 million increase in accounts receivables compared to December 31, 2011, which mainly reflects the business trend of our customers paying amounts due at the end of the year. In addition, we enhanced our receivables collection in the second quarter of 2012, which led to the decrease of DSO compared to the first quarter of 2012.

Table of Contents

Accrued employee benefit as of June 30, 2012 was \$53.4 million, which decreased by \$25.6 million as compared with the balances of December 31, 2011. The decrease was primarily attributable to 2011 bonus payments made during the quarter.

Income tax payables as of June 30, 2012 was \$5.0 million, which decreased by \$7.6 million as compared to the balances at December 31, 2011. The decrease was primarily due to income tax payments aggregating to \$9.0 million, including 2011 tax filings, in the second quarter of 2012.

Our net cash used in investing activities for the six-month period ended June 30, 2012 was \$25.2 million. This was primarily due to the purchase of short-term investments for \$16.2 million, a \$17.8 million increase in restricted cash, a \$9.1 million purchase of property, plant and equipment, which was partially offset by the \$17.9 million in proceeds from our sales of short-term investments.

Our net cash provided by financing activities for the six-month period ended June 30, 2012 was \$5.5 million. This was primarily due to a new short-term bank loan of \$5.5 million received during the period.

As of June 30, 2012, we had total credit facilities of \$147.5 million for working capital purposes, expiring in September 2013, which were secured by bank deposits of \$33.3 million. As of June 30, 2012, unused credit facilities were \$114.7 million and used facilities totaled \$32.8 million. The used facilities were pledged as security for issuing standby letters of credit, borrowing of short-term bank loans and accounts payable to hardware suppliers and customers. Additional bank deposits of \$5.7 million were used for issuing standby letters of credit and bank acceptance drafts as of June 30, 2012. Total bank deposits pledged as security for credit facilities, standby letters of credit, accounts payable, short-term bank loans and bank acceptance drafts totaled \$39.0 million as of June 30, 2012 and were presented as restricted cash in our consolidated balance sheets. During the three-month period ended June 30, 2012, the largest aggregate amount that we had used of our credit facilities was \$32.8 million.

In May 2011, we entered into a land use right transfer agreement with the Beijing Municipal Bureau of Land and Resources pursuant to which we would acquire land use rights with a 50-year term, for a consideration of approximately \$3.0 million, which was paid in June 2011 and August 2011. Pursuant to the agreement, we have committed a minimum of \$27.2 million for capital expenditures to the building construction project, which commenced in April 2012, and to complete construction by April 30, 2014.

We anticipate that our available funds and cash flows generated from operations will be sufficient to meet our anticipated needs for working capital, capital expenditures and business expansion through 2012. We may need to raise additional funds in the future, however, in order to fund acquisitions, develop new or enhanced services or products, respond to competitive pressures to compete successfully for larger projects involving higher levels of hardware purchases, or if our business otherwise grows more rapidly than we currently predict. We anticipate that we would raise additional funds, if necessary, through new issuances of shares of our equity securities in one or more public offerings or private placements, or through credit facilities extended by lending institutions.

Under PRC laws and regulations, our PRC subsidiaries and VIEs are subject to certain restrictions with respect to paying dividends or otherwise transferring a portion of their net assets to us. The amounts restricted include the paid-in capital and the statutory reserve of our PRC subsidiaries and VIEs. The aggregate amounts of capital and statutory reserves restricted and not available for distribution was \$88.6 million and \$89.8 million as of June 30, 2012 and December 31, 2011, respectively.

Furthermore, cash transfers from our PRC subsidiaries to our subsidiaries outside of China are subject to PRC government control of currency conversion. Shortages in the availability of foreign currency may restrict the ability of our PRC subsidiaries and VIEs to remit sufficient foreign currency to pay dividends or other payments to us, or otherwise satisfy their foreign currency denominated obligations.

Off-Balance Sheet Arrangements

We have not entered into any transactions, agreements or other contractual arrangements to which an entity unconsolidated with us is a party and under which we have (i) any obligation under a guarantee, (ii) any retained or contingent interest in assets transferred to an unconsolidated entity that serves as credit, liquidity or market risk support to such entity, (iii) any obligation under derivative instruments that are indexed to our shares and classified as equity in our consolidated balance sheets, or (iv) any obligation arising out of a variable interest in any unconsolidated entity that provides financing, liquidity, market risk or credit support to us or engages in leasing, hedging or research and development services with us.

Table of Contents

As of June 30, 2012, we had credit facilities for working capital purposes totaling \$147.5 million, expiring in September 2013, of which \$32.8 million had been used as security for issuing standby letters of credit, borrowing of short-term bank loans, and accounts payable to hardware suppliers and customers. Unused credit facilities were \$114.7 million. Total bank deposits pledged as security for credit facilities, standby letters of credit, accounts payable, short-term bank loans and bank acceptance drafts totaled \$39.0 million as of June 30, 2012 and were presented as restricted cash in the consolidated balance sheets.

Accounting Pronouncements

Newly adopted accounting pronouncements

In May 2011, the FASB issued an authoritative pronouncement on fair value measurement. The guidance is the result of joint efforts by the FASB and International Accounting Standards Board to develop a single, converged fair value framework. The guidance is largely consistent with existing fair value measurement principles in US GAAP. The guidance expands the existing disclosure requirements for fair value measurements and makes other amendments, mainly including:

Highest-and-best-use and valuation-premise concepts for nonfinancial assets the guidance indicates that the highest-and-best-use and valuation-premise concepts only apply to measuring the fair value of nonfinancial assets.

Application to financial assets and financial liabilities with offsetting positions in market risks or counterparty credit risk the guidance permits an exception to fair value measurement principles for financial assets and financial liabilities (and derivatives) with offsetting positions in market risks or counterparty credit risk when several criteria are met. When the criteria are met, an entity can measure the fair value of the net risk position.

Premiums or discounts in fair value measure the guidance provides that premiums or discounts that reflect size as a characteristic of the reporting entity's holding (specifically, a blockage factor that adjusts the quoted price of an asset or a liability because the market's normal daily trading volume is not sufficient to absorb the quantity held by the entity) rather than as a characteristic of the asset or liability (for example, a control premium when measuring the fair value of a controlling interest) are not permitted in a fair value measurement.

Fair value of an instrument classified in a reporting entity's stockholders' equity the guidance prescribes a model for measuring the fair value of an instrument classified in stockholders' equity; this model is consistent with the guidance on measuring the fair value of liabilities.

Disclosures about fair value measurements the guidance expands disclosure requirements, particularly for Level 3 inputs. Required disclosures include:

- (i) For fair value measurements categorized in Level 3 of the fair value hierarchy: (1) a quantitative disclosure of the unobservable inputs and assumptions used in the measurement, (2) a description of the valuation process in place (e.g., how the entity decides its valuation policies and procedures, as well as changes in its analyses of fair value measurements, from period to period), and (3) a narrative description of the sensitivity of the fair value to changes in unobservable inputs and interrelationships between those inputs.
- (ii) The level in the fair value hierarchy of items that are not measured at fair value in the statement of financial position but whose fair value must be disclosed.

The guidance was applied prospectively and was effective for interim and annual periods beginning after December 15, 2011, for public entities. Early application by public entities is not permitted. The adoption of this guidance did not have a significant effect on our consolidated financial

statements.

Table of Contents

In June 2011, the FASB issued an authoritative pronouncement to require an entity to present the total of comprehensive income, the components of net income, and the components of other comprehensive income either in a single continuous statement of comprehensive income or in two separate but consecutive statements. In both choices, an entity is required to present each component of net income along with total net income, each component of other comprehensive income along with a total for other comprehensive income, and a total amount for comprehensive income. The guidance eliminates the option to present the components of other comprehensive income as part of the statement of changes in stockholders' equity. The guidance does not change the items that must be reported in other comprehensive income or when an item of other comprehensive income must be reclassified to net income. The guidance should be applied retrospectively. For public entities, the guidance was effective for fiscal years and interim periods within those years, beginning after December 15, 2011. Early adoption is permitted. In December 2011, the FASB issued an authoritative pronouncement related to deferral of the effective date for amendments to the presentation of reclassifications of items out of accumulated other comprehensive income. This guidance allows the FASB to redeliberate whether to present on the face of the financial statements the effects of reclassifications out of accumulated other comprehensive income on the components of net income and other comprehensive income for all periods presented. While the FASB is considering the operational concerns about the presentation requirements for reclassification adjustments and the needs of financial statement users for additional information about reclassification adjustments, entities should continue to report reclassifications out of accumulated other comprehensive income consistent with the presentation requirements in effect before update the pronouncement issued in June 2011. The adoption of this guidance did not have a significant effect on our consolidated financial statements.

In September 2011, the FASB issued an authoritative pronouncement related to testing goodwill for impairment. The guidance is intended to simplify how entities, both public and nonpublic, test goodwill for impairment. The guidance permits an entity to first assess qualitative factors to determine whether it is more likely than not that the fair value of a reporting unit is less than its carrying amount as a basis for determining whether it is necessary to perform the two-step goodwill impairment test. The guidance was effective for annual and interim goodwill impairment tests performed for fiscal years beginning after December 15, 2011. Early adoption is permitted, including for annual and interim goodwill impairment tests performed as of a date before September 15, 2011, if a public entity's financial statements for the most recent annual or interim period have not yet been issued. The adoption of this guidance did not have a significant effect on our consolidated financial statements.

Recent accounting pronouncements not yet adopted

In December 2011, the FASB issued an authoritative pronouncement related to disclosures about offsetting assets and liabilities. The guidance requires an entity to disclose information about offsetting and related arrangements to enable users of its financial statements to understand the effect of those arrangements on its financial position. An entity is required to apply the amendments for annual reporting periods beginning on or after January 1, 2013, and interim periods within those annual periods. An entity should provide the disclosures required by those amendments retrospectively for all comparative periods presented. We are in the process of evaluating the effect of adoption of this guidance on our consolidated financial statements.

In July 2012, the FASB issued an authoritative pronouncement related to testing indefinite-lived intangible assets, other than goodwill, for impairment. Under the guidance, an entity testing an indefinite-lived intangible asset for impairment has the option of performing a qualitative assessment before calculating the fair value of the asset. If the entity determines, on the basis of qualitative factors, that the fair value of the indefinite-lived intangible asset is not more likely than not (i.e., a likelihood of more than 50 percent) impaired, the entity would not need to calculate the fair value of the asset. The guidance does not revise the requirement to test indefinite-lived intangible assets annually for impairment. In addition, the guidance does not amend the requirement to test these assets for impairment between annual tests if there is a change in events or circumstances; however, it does revise the examples of events and circumstances that an entity should consider in interim periods. The guidance is effective for annual and interim impairment tests performed for fiscal years beginning after September 15, 2012. Early adoption is permitted. We are in the process of evaluating the effect of adoption of this guidance on our consolidated financial statements.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

We are exposed to interest rate risk primarily associated with our cash and short-term investments. To date, we have not entered into any types of derivatives to hedge against interest rate changes. There have been no significant changes in our exposure to changes in interest rates for the quarter ended June 30, 2012. Our exposure to interest rate changes is limited as we do not have any material borrowings.

Table of Contents

We are exposed to exchange rate risk in connection with the relative value of the U.S. dollar and the RMB. A majority of our revenues and expenses relating to hardware sales and the service and software components of our business are denominated in RMB. As of June 30, 2012, approximately 90.7%, or \$244.4 million, of our cash, cash equivalents and restricted cash were RMB-denominated and approximately 8.8%, or \$23.6 million, were U.S. dollar-denominated, and approximately 0.2%, or \$0.5 million, were Hong Kong dollar-denominated. As of that date, the rate of exchange quoted by the People's Bank of China was US\$1.00 = RMB6.3249. If the exchange rate were to increase by 10% to US\$1.00 = RMB6.9574, our net assets would potentially decrease by \$46.6 million. If the exchange rate were to decrease by 10% to US\$1.00 = RMB5.6924, our net assets would potentially increase by \$56.9 million.

The value of our shares may be affected by the foreign exchange rate between U.S. dollars and RMB because the value of our business is effectively denominated in RMB, while our shares are traded in U.S. dollars. Furthermore, an increase in the value of the RMB may require us to exchange more U.S. dollars into RMB to meet the working capital requirements of our subsidiaries and VIEs in China. In addition, as we pursue our global strategy, we have entered into agreements denominated in various currencies of Southeast Asian countries, expect to continue to do so in future, and expect that such activities may create similar foreign exchange risk associated with the currencies of these jurisdictions. Depreciation of the value of the U.S. dollar will also reduce the value of the cash we hold in U.S. dollars, which we may use for purposes of future acquisitions or business expansion. We actively monitor our exposure to these risks and may adjust our cash position in the RMB and the U.S. dollar when we believe such adjustments will reduce our foreign exchange risk. We did not engage in any significant foreign exchange transactions during the six-month period ended June 30, 2012.

As in any other business, we are subject to the risk of macroeconomic changes such as recessions and inflation.

ITEM 4. CONTROLS AND PROCEDURES

Evaluation of Disclosure Controls and Procedures

Under the supervision and with the participation of our management, including our Chief Executive Officer and Chief Financial Officer, we evaluated the effectiveness of the design and operation of our disclosure controls and procedures pursuant to Rule 13a-15 under the Exchange Act, as of the end of the period covered by this report. Based on that evaluation, our Chief Executive Officer and Chief Financial Officer have concluded that our disclosure controls and procedures are effective.

Changes in Internal Control over Financial Reporting

There have not been any changes in our internal control over financial reporting (as such term is defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act) during the quarter ended June 30, 2012 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

Table of Contents**PART II. OTHER INFORMATION****ITEM 1. LEGAL PROCEEDINGS**

In June 2007 we received a letter from a putative stockholder demanding that we investigate and prosecute a claim for alleged short-swing trading in violation of Section 16(b) of the Exchange Act by the underwriters of our IPO and certain of our unidentified directors, officers and stockholders. In October 2007, the putative stockholder commenced a civil lawsuit in the U.S. District Court for the Western District of Washington against Morgan Stanley and Deutsche Bank, two of the lead underwriters of our initial public offering, or IPO, alleging violations of Section 16(b) of the Exchange Act. The complaint alleged that the combined number of shares of our common stock beneficially owned by the lead underwriters and certain unnamed officers, directors and principal stockholders exceeded ten percent of our outstanding common stock from the date of our IPO in March 2000 for at least one year. It further alleged that those entities and individuals were thus subject to the reporting requirements of Section 16(a) and the short-swing trading prohibition of Section 16(b), and failed to comply with those provisions. The complaint sought to recover from the lead underwriters any short-swing profits obtained by them in violation of Section 16(b). None of our directors, officers or stockholders were named as defendants in this action, although we were named as a nominal defendant. In March 2009, pursuant to a joint motion we brought with several other issuer defendants, the court dismissed the complaint without prejudice on the ground that the plaintiff failed to make an adequate demand to us and the other issuer defendants prior to filing the complaint. The plaintiff subsequently appealed to the Court of Appeals for the Ninth Circuit, and the underwriter defendants filed certain cross-appeals.

In December 2010, the Ninth Circuit affirmed the decision to dismiss the complaint against the issuer defendants and further ordered that the dismissals be made with prejudice. The Ninth Circuit, however, reversed and remanded certain claims relating to the underwriters, finding that plaintiff's claims were not time-barred under the applicable statute of limitations. In January 2011, the Ninth Circuit denied certain petitions for rehearing and ordered that no further petitions for rehearing may be filed, but stayed the effect of its decision pending appeal to the U.S. Supreme Court. In June 2011, the U.S. Supreme Court denied plaintiff's request for review of the Ninth Circuit's decision that the demand was inadequate and granted the underwriter defendants' request for review of the statute of limitations issue. In March 2012, the U.S. Supreme Court vacated the Ninth Circuit's holding that petitioner's claims were not time-barred, and remanded the cases to the District Court for proceedings consistent with the Supreme Court's opinion. In June 2012, the mandate of the Ninth Circuit was formally entered. The plaintiff voluntarily dismissed the case with prejudice as to the adequacy of the pre suit demand issue, and without prejudice as to all other issues.

During the fiscal quarter ended June 30, 2012, we did not have any other material legal proceedings brought against us.

ITEM 1A. RISK FACTORS

Set forth below are the risk factors we have revised from those appearing in Part I, Item 1A of our Annual Report on Form 10-K for the fiscal year ended December 31, 2011, filed with the SEC on February 28, 2012, or the 2011 Form 10-K. In addition to the other information set forth in this Form 10-Q, you should carefully consider the factors discussed under the heading "Risk Factors" in our 2011 Form 10-K, as well as information in our other reports filed with the SEC from time to time. Additional risks and uncertainties not currently known to us or that we currently deem to be immaterial also may materially adversely affect our business, financial position and/or operating results.

The audit report included in our annual report is prepared by auditors who are not inspected by the Public Company Accounting Oversight Board and, as such, any benefits of such inspection are not available to you.

Our independent registered public accounting firm that issues the audit reports included in our annual reports filed with the SEC, as auditors of companies that are traded publicly in the United States and a firm registered with the Public Company Accounting Oversight Board (United States), or the PCAOB, is required by the laws of the United States to undergo regular inspections by the PCAOB to assess its compliance with the laws of the United States and professional standards. Because our auditors are located in the PRC, a jurisdiction where the PCAOB is currently unable to conduct inspections without the approval of Chinese authorities, our auditors are not currently inspected by the PCAOB. Inspections of other firms that the PCAOB has conducted outside China have identified deficiencies in those firms' audit procedures and quality control procedures, which may be addressed as part of the inspection process to improve future audit quality. This lack of PCAOB inspections in China prevents the PCAOB from regularly evaluating our auditor's audits and its quality control procedures. As a result, any benefits of PCAOB inspections are not available to you.

Table of Contents

The inability of the PCAOB to conduct inspections of auditors in China makes it more difficult to evaluate the effectiveness of our auditor's audit procedures or quality control procedures as compared to auditors outside of China that are subject to PCAOB inspections. As a result, investors may lose confidence in our reported financial information and procedures and the quality of our financial statements, which may have an adverse effect on our stock price.
