TRANSDIGM GROUP INCORPORATED

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

TWENTY-SIX WEEK PERIODS ENDED MARCH 28, 2015 AND MARCH 29, 2014

(UNAUDITED)

1. DESCRIPTION OF THE BUSINESS

Description of the Business
TransDigm Group Incorporated (TD Group), through its wholly-owned subsidiary, TransDigm Inc., is a leading global designer, producer and supplier of highly engineered aircraft components for use on nearly all commercial and military aircraft in service today. TransDigm Inc. along with TransDigm Inc. s direct and indirect wholly-owned operating subsidiaries (collectively, with TD Group, the Company or TransDigm), offers a broad range of proprietary aerospace components. TD Group has no significant assets or operations other than its 100% ownership of TransDigm Inc. TD Group s common stock is listed on The New York Stock Exchange, or the NYSE, under the trading symbol TDG.

Major product offerings, substantially all of which are ultimately provided to end-users in the aerospace industry, include mechanical/electro-mechanical actuators and controls, ignition systems and engine technology, specialized pumps and valves, power conditioning devices, specialized AC/DC electric motors and generators, NiCad batteries and chargers, engineered latching and locking devices, rods and locking devices, engineered connectors and elastomers, cockpit security components and systems, specialized cockpit displays, aircraft audio systems, specialized lavatory components, seatbelts and safety restraints, engineered interior surfaces, lighting and control technology and military personnel parachutes and cargo loading, handling and delivery systems.

2. UNAUDITED INTERIM FINANCIAL INFORMATION

The financial information included herein is unaudited; however, the information reflects all adjustments (consisting solely of normal recurring adjustments) that are, in the opinion of management, necessary for a fair presentation of the Company's financial position and results of operations and cash flows for the interim periods presented. These financial statements and notes should be read in conjunction with the financial statements and related notes for the year ended September 30, 2014 included in TD Group's Form 10-K dated November 14, 2014. As disclosed therein, the Company's annual consolidated financial statements were prepared in conformity with generally accepted accounting principles in the United States (GAAP). The September 30, 2014 condensed consolidated balance sheet was derived from TD Group's audited financial statements. The results of operations for the twenty-six week period ended March 28, 2015 are not necessarily indicative of the results to be expected for the full year.

3. ACQUISITIONS

During the twenty-six week periods ended March 28, 2015 and March 29, 2014, the Company completed the acquisitions of the Telair Cargo Group (Telair), Elektro-Metall Export GmbH, and Airborne Global Inc. The Company accounted for the acquisitions using the acquisition method and included the results of operations of the acquisitions in its consolidated financial statements from the effective date of each acquisition. The Company is in the process of obtaining a third-party valuation of certain tangible and intangible assets of Telair; therefore, the values attributed to those acquired assets in the condensed consolidated financial statements are subject to adjustment. Pro forma net sales and results of operations for the acquisitions had they occurred at the beginning of the applicable twenty-six week periods ended March 28, 2015 or March 29, 2014 are not significant and, accordingly, are not provided.

The acquisitions strengthen and expand the Company s position to design, produce and supply highly-engineered proprietary aerospace components in niche markets with significant aftermarket content and provide opportunities to create value through the application of our three core value-driven operating strategies (obtaining profitable new business, improving our cost structure, and providing highly engineered value-added products to customers). The purchase price paid for each acquisition reflects the current earnings before interest, taxes, depreciation and amortization (EBITDA) and cash flows, as well as, the future EBITDA and cash flows expected to be generated by the business, which are

driven in most cases by the recurring aftermarket consumption over the life of a particular aircraft, estimated to be approximately 25-30 years.

-6-

Telair Cargo Group On March 26, 2015, TransDigm Inc. acquired Telair for a total purchase price of approximately \$730.9 million in cash, subject to purchase price adjustments. TransDigm Inc. financed the acquisition of Telair through a combination of existing cash on hand and borrowing of \$75 million under its existing revolving credit facility. Telair is a global leader in aerospace on-board cargo loading and handling, restraint systems and unit load devices for a variety of commercial and military platforms with positions on a wide range of new and existing aircraft. The business consists of three major operating units: Telair International GmbH, Nordisk Aviation Products and Telair US LLC. These products fit well with TransDigm s overall business direction. Telair International GmbH and Telair US LLC are included in TransDigm s Power & Control segment and Nordisk Aviation Products is included in TransDigm s Airframe segment.

The total purchase price was allocated to the underlying assets acquired and liabilities assumed based upon management s estimated fair values at the date of acquisition. To the extent the purchase price exceeded the estimated fair value of the net identifiable tangible and intangible assets acquired, such excess was allocated to goodwill. The following table summarizes the purchase price allocation of the estimated fair values of the assets acquired and liabilities assumed at the transaction date (in thousands).

Assets acquired:	
Current assets, excluding cash acquired	\$ 143,417
Property, plant, and equipment	16,426
Intangible assets	290,000
Goodwill	439,946
Other	1,445
Total assets acquired	\$ 891,234
T 1 1 1 1 2 2 3 3 3 3 3 3 3 3 3 3 3 3 3 3	
Liabilities assumed:	
Current liabilities	\$ 46,708
Other noncurrent liabilities	121,326
Total liabilities assumed	\$ 168,034
Net assets acquired	\$ 723,200

The Company expects that the approximately \$439.9 million of goodwill recognized for the acquisition will not be deductible for tax purposes.

(5,486)

(3,365)

Elektro-Metall Export GmbH On March 6, 2014, TransDigm Germany GmbH, a newly formed subsidiary of TransDigm Inc., acquired Elektro-Metall Export GmbH (EME) for approximately \$49.6 million, which comprises \$40.4 million in cash plus the assumption of approximately \$9.2 million of net indebtedness. EME manufactures proprietary, highly engineered aerospace electromechanical actuators, electrical and electromechanical components and assemblies for commercial aircraft, helicopters and other specialty applications. These products fit well with TransDigm's overall business direction. EME is included in TransDigm's Airframe segment. The Company expects that the approximately \$20.3 million of goodwill recognized for the acquisition will not be deductible for tax purposes.

Airborne Global Inc. On December 19, 2013, TransDigm Inc. acquired all of the outstanding stock of Airborne Global Inc. (Airborne) for approximately \$264.2 million in cash, which includes a purchase price adjustment of \$0.3 million paid in the second quarter of fiscal 2014. Airborne is the industry leading designer and manufacturer of personnel parachutes, cargo aerial delivery systems, emergency escape systems, naval decoys and other related products. These products fit well with TransDigm s overall business direction. Airborne is included in TransDigm s Airframe segment. The Company expects that the approximately \$155.9 million of goodwill recognized for the acquisition will not be deductible for tax purposes.

4. RECENT ACCOUNTING PRONOUNCEMENTS

In May 2014, the Financial Accounting Standards Board (FASB) issued Accounting Standards Update (ASU) 2014-09 which creates a new topic in the Accounting Standards Codification (ASC) Topic 606, *Revenue From Contracts With Customers*. In addition to superseding and replacing nearly all existing U.S. GAAP revenue recognition guidance, including industry-specific guidance, ASC 606 establishes a new control-based revenue recognition model; changes the basis for deciding when revenue is recognized over time or at a point in time; provides new and more detailed guidance on specific topics; and expands and improves disclosures about revenue. In addition, ASU 2014-09 adds a new Subtopic to the Codification, ASC 340-40, *Other Assets and Deferred Costs: Contracts with Customers*, to provide guidance on costs related to obtaining a contract with a customer and costs incurred in fulfilling a contract with a customer that are not in the scope of another ASC Topic. The guidance is effective for the Company for annual reporting periods, including interim periods therein, for the year ending September 30, 2018. Early application is not permitted. The Company is currently evaluating the impact that the update will have on its financial position, results of operations, cash flows and financial statement disclosures.

5. EARNINGS PER SHARE (TWO-CLASS METHOD)

The following table sets forth the computation of basic and diluted earnings per share (in thousands, except per share data):

\$ 110,894 \$ 84,869 \$ 203,062 Our debt agreements contain restrictions that limit our flexibility in operating our business.

Our senior secured credit agreement and the indentures governing our senior notes due 2013, the exchange notes and senior subordinated notes due 2015 contain various covenants that limit our ability to engage in specified types of transactions. Thes covenants limit our ability to, among other things:

incur additional indebtedness or issue certain preferred shares;

pay dividends on, repurchase or make distributions in respect of our capital stock or make other restricted payments make certain investments;

sell certain assets;

create liens;

consolidate, merge, sell or otherwise dispose of all or substantially all of our assets; and

enter into certain transactions with our affiliates.

In addition, under the senior secured credit agreement, we are required to satisfy and maintain specified financial ratios and of financial condition tests. Our ability to meet those financial ratios and tests can be affected by events beyond our control, and may not be able to meet those ratios and tests. A breach of any of these covenants could result in a default under the senior secured credit agreement. Upon an event of default under the senior secured credit agreement, the lenders could elect to decla all amounts outstanding to be immediately due and payable and terminate all commitments to extend further credit.

If we were unable to repay those amounts, the lenders under the senior secured credit agreement could proceed against the collateral granted to them to secure that indebtedness. We have pledged a significant portion of our assets as collateral under t senior secured credit agreement and the senior secured notes, to the extent required by the indenture governing these notes. If lenders under the senior secured credit agreement accelerate the repayment of borrowings, we may not have sufficient assets t repay the senior secured credit facilities and the senior secured notes, as well as our unsecured indebtedness.

Risks Related to Our Business

Our business depends largely on the economy and financial markets, and a slowdown or downturn in the economy or financial markets could adversely affect our business and results of operations.

When there is a slowdown or downturn in the economy, a drop in stock market levels or trading volumes, or an event that disrupts the financial markets, our business and financial results may suffer for a number of reasons. Customers may react to worsening conditions by reducing their capital expenditures in general or by specifically reducing their IT spending. In addition customers may curtail or discontinue trading operations, delay or cancel IT projects, or seek to lower their costs by renegotiativendor contracts. Also, customers with excess IT

20

resources may choose to take their availability solutions in-house rather than obtain those solutions from us. Moreover, competitors may respond to market conditions by lowering prices and attempting to lure away our customers to lower cost solutions. If any of these circumstances remain in effect for an extended period of time, there could be a material adverse effe on our financial results. Because our financial performance tends to lag behind fluctuations in the economy, our recovery from any particular downturn in the economy may not occur until after economic conditions have generally improved.

Our business depends largely on the financial services industry, and a weakening of the financial services industry could adversely affect our business and results of operations.

Because our customer base is concentrated in the financial services industry, our business is largely dependent on the health of that industry. When there is a general downturn in the financial services industry, or if our customers in that industry experient financial or business problems, our business and financial results may suffer. If financial services firms continue to consolidate there could be a material adverse effect on our business and financial results. When a customer merges with a firm using its of solution or another vendor is solution, they could decide to consolidate on a non-SunGard system, which could have an advertigation of the solution of

Our acquisition program is an important element of our strategy but, because of the uncertainties involved, this program n not be successful and we may not be able to successfully integrate and manage acquired businesses.

Part of our growth strategy is to pursue additional acquisitions in the future. There can be no assurance that our acquisition program will continue to be successful. In addition, we may finance any future acquisition with debt, which would increase or interest costs. If we are unable to successfully integrate and manage acquired businesses, including GL TRADE, then our business and financial results may suffer. It is possible that the businesses we have acquired and businesses that we acquire in future may perform worse than expected, be subject to an adverse litigation outcome or prove to be more difficult to integrate manage than expected. If that happens, there may be a material adverse effect on our business and financial results for a numb of reasons, including:

we may have to devote unanticipated financial and management resources to acquired businesses;

we may not be able to realize expected operating efficiencies or product integration benefits from our acquisitions;

we may have to write-off goodwill or other intangible assets; and

we may incur unforeseen obligations or liabilities (including assumed liabilities not fully indemnified by the seller) connection with acquisitions.

If we are unable to identify suitable acquisition candidates and successfully complete acquisitions, our growth and our financial results may be adversely affected.

Our growth has depended in part on our ability to acquire similar or complementary businesses on favorable terms. This grow strategy is subject to a number of risks that could adversely affect our business and financial results, including:

we may not be able to find suitable businesses to acquire at affordable valuations or on other acceptable terms;

we may face competition for acquisitions from other potential acquirers, some of whom may have greater resources than us or may be less highly leveraged, or from the possibility of an acquisition target pursuing an initial public offering of its stock;

we may have to incur additional debt to finance future acquisitions as we have done in the past and no assurance ca given as to whether, and on what terms, such additional debt will be available; and

21

we may find it more difficult or costly to complete acquisitions due to changes in accounting, tax, securities or othe regulations.

Catastrophic events may disrupt or otherwise adversely affect the markets in which we operate, our business and our profitability.

Our business may be adversely affected by a war, terrorist attack, natural disaster or other catastrophe. A catastrophic event content and direct negative impact on us or an indirect impact on us by, for example, affecting our customers, the financial markets the overall economy. The potential for a direct impact is due primarily to our significant investment in our infrastructure. Although we maintain redundant facilities and have contingency plans in place to protect against both man-made and natural threats, it is impossible to fully anticipate and protect against all potential catastrophes. Despite our preparations, a security breach, criminal act, military action, power or communication failure, flood, severe storm or the like could lead to service interruptions and data losses for customers, disruptions to our operations, or damage to our important facilities. The same disasters or circumstances that may lead to our customers requiring access to our availability services may negatively impact own ability to provide such services. Our three largest availability services facilities are particularly important, and a major disruption at one or more of those facilities could disrupt or otherwise impair our ability to provide services to our availability services customers. If any of these events happen, we may be exposed to unexpected liability, our customers may leave, our reputation may be tarnished, and there could be a material adverse effect on our business and financial results.

Our application service provider systems may be subject to disruptions that could adversely affect our reputation and our business.

Our application service provider systems maintain and process confidential data on behalf of our customers, some of which is critical to their business operations. For example, our trading, treasury and risk management systems maintain account and trading information for our customers and their clients, and our benefit administration and insurance systems maintain investor account information for retirement plans, insurance policies and mutual funds. There is no guarantee that the systems and procedures that we maintain to protect against unauthorized access to such information are adequate to protect against all seculoreaches. If our application service provider systems are disrupted or fail for any reason, or if our systems or facilities are infiltrated or damaged by unauthorized persons, our customers could experience data loss, financial loss, harm to reputation a significant business interruption. If that happens, we may be exposed to unexpected liability, our customers may leave, our reputation may be tarnished, and there could be a material adverse effect on our business and financial results.

Because the sales cycle for our software is typically lengthy and unpredictable, our results may fluctuate from period to period.

Our operating results may fluctuate from period to period and be difficult to predict in a particular period due to the timing an magnitude of software sales. We offer a number of our software solutions on a license basis, which means that the customer he right to run the software on its own computers. The customer usually makes a significant up-front payment to license software, which we generally recognize as revenue when the license contract is signed and the software is delivered. The size the up-front payment often depends on a number of factors that are different for each customer, such as the number of custom locations, users or accounts. As a result, the sales cycle for a software license may be lengthy and take unexpected turns. Thus is difficult to predict when software sales will occur or how much revenue they will generate. Since there are few incremental costs associated with software sales, our operating results may fluctuate from quarter to quarter and year to year due to the time and magnitude of software sales.

Rapid changes in technology and our customers businesses could adversely affect our business and financial results.

Our business may suffer if we do not successfully adapt our products and services to changes in technology and changes in or customers businesses. These changes can occur rapidly and at unpredictable intervals and we may not be able to respond adequately. If we do not successfully update and integrate our products and services to adapt to these changes, or if we do not successfully develop new products and services needed by our customers to keep pace with these changes, then our business a financial results may suffer. Our ability to keep up with technology and business changes is subject to a number of risks, including:

we may find it difficult or costly to update our products and services and to develop new products fast enough to m our customers needs;

we may find it difficult or costly to make some features of our products and services work effectively and securely the Internet;

we may find it difficult or costly to integrate more of our FS solutions;

we may find it difficult or costly to update our products and services to keep pace with business, regulatory and oth developments in the financial services industry, where many of our customers operate; and

we may find it difficult or costly to update our services to keep pace with advancements in hardware, software and telecommunications technology.

Some technological changes, such as advancements that have facilitated the ability of our AS customers to develop their own internal solutions, may render some of our products and services less valuable or eventually obsolete. In addition, because of ongoing, rapid technological changes, the useful lives of some technology assets have become shorter and customers are there replacing these assets more often. As a result, our customers are increasingly expressing a preference for contracts with shorter terms, which could make our revenue less predictable in the future.

Customers taking their availability solutions in-house may continue to create pressure on our organic revenue growth rate

Our AS solutions allow customers to leverage our significant infrastructure and take advantage of our experience, technology expertise, resource management capabilities and vendor neutrality. Technological advances in recent years have significantly reduced the cost and the complexity of developing in-house solutions. Some customers, especially among the very largest has significant IT resources, prefer to develop and maintain their own in-house availability solutions, which can result in a loss of revenue from those customers. If this trend continues or worsens, there will be continued pressure on our organic revenue grounds.

The trend toward information availability solutions utilizing more single customer dedicated resources likely will lower out overall operating margin rate over time.

In the information availability services industry, especially among our more sophisticated customers, there is an increasing preference for solutions that utilize some level of dedicated resources, such as blended advanced recovery services and managements. The primary reason for this trend is that adding dedicated resources, although more costly, provides greater control, reduces data loss and facilitates quicker responses to business interruptions. Advanced recovery services often result in greate use of dedicated resources with a modest decrease in operating margin rate. Managed services require significant dedicated resources and, therefore, have an appropriately lower operating margin rate.

Our brokerage operations are highly regulated and are riskier than our other businesses.

Organizations like the Securities and Exchange Commission, Financial Services Authority and Financial Industry Regulatory Authority can, among other things, fine, censure, issue cease-and-desist orders and suspend

23

or expel a broker/dealer or any of its officers or employees for failures to comply with the many laws and regulations that gov brokerage operations. Our ability to comply with these laws and regulations is largely dependent on our establishment, maintenance and enforcement of an effective brokerage compliance program. Our failure to establish, maintain and enforce proper brokerage compliance procedures, even if unintentional, could subject us to significant losses, lead to disciplinary or o actions, and tarnish our reputation. Regulations affecting the brokerage industry, in particular with respect to active traders, m change, which could adversely affect our financial results.

We are exposed to certain risks relating to the execution and clearance services provided by our brokerage operations to retail customers, institutional clients (including hedge funds and other broker-dealers), and proprietary traders. These risks include, are not limited to, customers failing to pay for securities commitments in the marketplace, trading errors, the inability or failur settle trades, and trade execution or clearance systems failures. In our other businesses, we generally can disclaim liability for trading losses that may be caused by our software, but in our brokerage operations, we cannot limit our liability for trading los even when we are not at fault. As a result we may suffer losses that are disproportionate to the relatively modest profit contributions of this business.

We could lose revenue due to fiscal funding or termination for convenience clauses in certain customer contracts, especially in our HE and PS businesses.

Certain of our customer contracts, particularly those with governments, institutions of higher education and school districts, not be partly or completely terminated by the customer due to budget cuts or sometimes for any reason at all. These types of clauser often called fiscal funding or termination for convenience clauses. If a customer exercises one of these clauses, the convenience clauses are often called fiscal funding or termination for convenience clauses. If a customer exercises one of these clauses, the convenience clauses are not been materially affected by exercises of these clauses in the past, we may be in the future. If customers that collectively represent a substantial portion of our revenue were to invoke the fiscal funding or termination for convenience clauses of their contracts, our future business and results of operations could be adversely affected.

If we fail to comply with government regulations in connection with our business or providing technology services to certa financial institutions, our business and results of operations may be adversely affected.

Because we act as a third-party service provider to financial institutions and provide mission-critical applications for many financial institutions that are regulated by one or more member agencies of the Federal Financial Institutions Examination Council (FFIEC), we are subject to examination by the member agencies of the FFIEC. More specifically, we are a Multi-Regional Data Processing Servicer of the FFIEC because we provide mission critical applications for financial institution from several data centers located in different geographic regions. As a result, the FFIEC conducts periodic reviews of certain our operations in order to identify existing or potential risks associated with our operations that could adversely affect the financial institutions to whom we provide services, evaluate our risk management systems and controls, and determine our compliance with applicable laws that affect the services we provide to financial institutions. In addition to examining areas su as our management of technology, data integrity, information confidentiality and service availability, the reviews also assess of financial stability. Our incurrence of significant debt in connection with the Transaction increases the risk of an FFIEC agency review determining that our financial stability has been weakened. A sufficiently unfavorable review from the FFIEC could refine our financial institution customers not being allowed to use our technology services, which could have a material adverse effect on our business and financial condition.

If we fail to comply with any regulations applicable to our business, we may be exposed to unexpected liability and/or governmental proceedings, our customers may leave, our reputation may be tarnished, and there could be a material adverse effect on our business and financial results. In addition, the future enactment of more restrictive laws or rules on the federal or state level, or, with respect to our international operations, in foreign

24

jurisdictions on the national, provincial, state or other level, could have an adverse impact on business and financial results.

If we are unable to retain or attract customers, our business and financial results will be adversely affected.

If we are unable to keep existing customers satisfied, sell additional products and services to existing customers or attract new customers, then our business and financial results may suffer. A variety of factors could affect our ability to successfully retain and attract customers, including the level of demand for our products and services, the level of customer spending for informate technology, the level of competition from customers that develop their own solutions internally and from other vendors, the quality of our customer service, our ability to update our products and develop new products and services needed by customer and our ability to integrate and manage acquired businesses. Our services revenue, which has been largely recurring in nature, comes from the sale of our products and services under fixed-term contracts. We do not have a unilateral right to extend these contracts when they expire. Revenue from our broker/dealer businesses is not subject to minimum or ongoing contractual commitments on the part of brokerage customers. If customers cancel or refuse to renew their contracts, or if customers reduct the usage levels or asset values under their contracts, there could be a material adverse effect on our business and financial results.

If we fail to retain key employees, our business may be harmed.

Our success depends on the skill, experience and dedication of our employees. If we are unable to retain and attract sufficient experienced and capable personnel, especially in product development, sales and management, our business and financial resumay suffer. For example, if we are unable to retain and attract a sufficient number of skilled technical personnel, our ability to develop high quality products and provide high quality customer service may be impaired. Experienced and capable personne the technology industry remain in high demand, and there is continual competition for their talents. When talented employees leave, we may have difficulty replacing them, and our business may suffer. There can be no assurance that we will be able to successfully retain and attract the personnel that we need.

We are subject to the risks of doing business internationally.

privileges;

During 2008, approximately 29% of our revenue was generated outside the United States. Approximately 76% of this revenue was from customers located in the United Kingdom and Continental Europe. Over the past few years we have expanded our support operations in India and acquired businesses in China and Singapore, in an effort to increase our presence throughout Pacific. Because we sell our services outside the United States, our business is subject to risks associated with doing business internationally. Accordingly, our business and financial results could be adversely affected due to a variety of factors, including

changes in a specific country s or region s political and cultural climate or economic condition;
unexpected changes in foreign laws and regulatory requirements;
difficulty of effective enforcement of contractual provisions in local jurisdictions;
inadequate intellectual property protection in foreign countries;
trade-protection measures, import or export licensing requirements such as Export Administration Regulations

promulgated by the U.S. Department of Commerce and fines, penalties or suspension or revocation of export

the effects of applicable foreign tax structures and potentially adverse tax consequences; and

significant adverse changes in foreign currency exchange rates.

25

The private equity firms that acquired the Company (Sponsors) control us and may have conflicts of interest with us.

Investment funds associated with or designated by the Sponsors indirectly own, through their ownership in our top-tier parent companies, a substantial portion of our capital stock. As a result, the Sponsors have control over our decisions to enter into an corporate transaction regardless of whether noteholders believe that any such transaction is in their own best interests. For example, the Sponsors could cause us to make acquisitions or pay dividends that increase the amount of indebtedness that is secured or that is senior to our senior subordinated notes or to sell assets.

Additionally, the Sponsors are in the business of making investments in companies and may from time to time acquire and ho interests in businesses that compete directly or indirectly with us. One or more of the Sponsors may also pursue acquisition opportunities that may be complementary to our business and, as a result, those acquisition opportunities may not be available us. So long as investment funds associated with or designated by the Sponsors continue to indirectly own a significant amoun the outstanding shares of our common stock, even if such amount is less than 50%, the Sponsors will continue to be able to strongly influence or effectively control our decisions.

If we are unable to protect our proprietary technologies and defend infringement claims, we could lose one of our competitud advantages and our business could be adversely affected.

Our success depends in part on our ability to protect our proprietary products and services and to defend against infringement claims. If we are unable to do so, our business and financial results may suffer. To protect our proprietary technology, we rely upon a combination of copyright, patent, trademark and trade secret law, confidentiality restrictions in contracts with employed customers and others, software security measures, and registered copyrights and patents. Despite our efforts to protect the proprietary technology, unauthorized persons may be able to copy, reverse engineer or otherwise use some of our technology also is possible that others will develop and market similar or better technology to compete with us. Furthermore, existing pat copyright and trade secret laws may afford only limited protection, and the laws of certain countries do not protect proprietary technology as well as United States law. For these reasons, we may have difficulty protecting our proprietary technology again unauthorized copying or use. If any of these events happens, there could be a material adverse effect on the value of our proprietary technology and on our business and financial results. In addition, litigation may be necessary to protect our proprietary technology. This type of litigation is often costly and time-consuming, with no assurance of success.

The software industry is characterized by the existence of a large number of patents and copyrights and by frequent litigation based on allegations of infringement or other violations of intellectual property rights. Some of our competitors or other third parties may have been more aggressive than us in applying for or obtaining patent protection for innovative proprietary technologies both in the United States and internationally In addition, we use a limited amount of open source software in our products and may use more open source software in the future. Because open source software is developed by numerous independent parties over whom we exercise no supervision or control, allegations of infringement for using open source softw are possible. As a result of all of these factors, there can be no assurance that in the future third parties will not assert infringement claims against us (as they have already done in the past) and preclude us from using a technology in our product require us to enter into royalty and licensing arrangements on terms that are not favorable to us, or force us to engage in costly infringement litigation, which could result in us paying monetary damages or being forced to redesign our products to avoid infringement. Additionally, our licenses and service agreements with our customers generally provide that we will defend and indemnify them for claims against them relating to our alleged infringement of the intellectual property rights of third parties respect to our products or services. We might have to defend or indemnify our customers to the extent they are subject to thes types of claims. Any of these claims may be difficult and costly to defend and may lead to unfavorable judgments or settleme which could have a material adverse effect on our reputation, business and financial results. For these reasons, we may find it difficult or costly to add or retain important features in our products and services.

26

Certain of our and our suppliers software may contain open source software. Although we monitor our use of open source software to avoid subjecting our products to conditions we do not intend, the terms of many open source licenses have not been interpreted by United States or other courts, and there is a risk that these licenses could be construed in a manner that could impose unanticipated conditions or restrictions on our ability to commercialize our products.

Defects, design errors or security flaws in our products could harm our reputation and expose us to potential liability.

Most of our products are very complex software systems that are regularly updated. No matter how careful the design and development, complex software often contains errors and defects when first introduced and when major new updates or enhancements are released. If errors or defects are discovered in our current or future products, we may not be able to correct them in a timely manner, if at all. In our development of updates and enhancements to our products, we may make a major de error that makes the product operate incorrectly or less efficiently.

In addition, certain of our products include security features that are intended to protect the privacy and integrity of customer data. Despite these security features, our products and systems, and our customers—systems may be vulnerable to break-ins a similar problems caused by third parties, such as hackers bypassing firewalls and misappropriating confidential information. Storeak-ins or other disruptions could jeopardize the security of information stored in and transmitted through our computer systems and those of our customers, subject us to liability and tarnish our reputation. We may need to expend significant capit resources in order to eliminate or work around errors, defects, design errors or security problems. Any one of these problems our products may result in the loss of or a delay in market acceptance of our products, the diversion of development resources lower rate of license renewals or upgrades and damage to our reputation, and in turn may increase service and warranty costs.

A material weakness in our internal controls could have a material adverse affect on us.

Effective internal controls are necessary for us to provide reasonable assurance with respect to our financial reports and effectively prevent fraud. If we cannot provide reasonable assurance with respect to our financial reports and effectively prevent fraud, our reputation and operating results could be harmed. Pursuant to the Sarbanes-Oxley Act of 2002, we are required to furnish a report by management on internal control over financial reporting, including management is assessment of the effectiveness of such control. Internal control over financial reporting may not prevent or detect misstatements because of its inherent limitations, including the possibility of human error, the circumvention or overriding of controls, or fraud. Therefore, even effective internal controls can provide only reasonable assurance with respect to the preparation and fair presentation of financial statements. In addition, projections of any evaluation of effectiveness of internal control over financial reporting to future periods are subject to the risk that the control may become inadequate because of changes in conditions, or that the deg of compliance with the policies or procedures may deteriorate. If we fail to maintain the adequacy of our internal controls, including any failure to implement required new or improved controls, or if we experience difficulties in their implementation we could fail to meet our reporting obligations, and there could be a material adverse effect on our business and financial results.

Risks Relating to the Exchange Notes

We may not be able to generate sufficient cash to service all of our indebtedness, including the exchange notes, and may b forced to take other actions to satisfy our obligations under our indebtedness, which may not be successful.

Our ability to make scheduled payments or to refinance our debt obligations depends on our financial and operating performa which is subject to prevailing economic and competitive conditions and to certain financial, business and other factors beyond control. We may not be able to maintain a level of cash flows

27

from operating activities sufficient to permit us to pay the principal, premium, if any, and interest on our indebtedness. See Management s Discussion and Analysis of Financial Condition and Results of Operations Liquidity and Capital Resources

If our cash flows and capital resources are insufficient to fund our debt service obligations, we may be forced to reduce or del capital expenditures, seek additional capital or seek to restructure or refinance our indebtedness, including the exchange notes. These alternative measures may not be successful and may not permit us to meet our scheduled debt service obligations. In the absence of such operating results and resources, we could face substantial liquidity problems and might be required to sell material assets or operations to attempt to meet our debt service and other obligations. The senior secured credit facilities, the indentures relating to the senior notes due 2013 and senior subordinated notes due 2015 and, the indenture under which the exchange notes will be issued restrict our ability to use the proceeds from asset sales. We may not be able to consummate those asset sales to raise capital or sell assets at prices that we believe are fair and proceeds that we do receive may not be adequate meet any debt service obligations then due. See Description of Other Indebtedness Senior Credit Facilities, and Descript Senior Notes.

Your right to receive payments on the exchange notes is effectively junior to those lenders who have a security interest in o assets.

Our obligations under the exchange notes and our guarantors obligations under their guarantees of the exchange notes are unsecured, but our obligations under our senior secured credit facilities and senior secured notes and each guarantor is obligated under their respective guarantees of the senior secured credit facilities and senior secured notes are secured by a security interin substantially all of our domestic tangible and, in the case of the senior secured credit facilities, intangible assets, including a stock of most of our wholly owned U.S. subsidiaries, and the assets and a portion of the stock of certain of our non-U.S. subsidiaries. If we are declared bankrupt or insolvent, or if we default under our senior secured credit agreement, the lenders could declare all of the funds borrowed thereunder, together with accrued interest, immediately due and payable. If we were unable to repay such indebtedness, the lenders could foreclose on the pledged assets to the exclusion of holders of the exchange notes, even if an event of default exists under the indenture governing the exchange notes offered hereby at such time. Furthermore, if the lenders foreclose and sell the pledged equity interests in any subsidiary guarantor under the exchange note then that guarantor will be released from its guarantee of the notes automatically and immediately upon such sale. In any such event, because the exchange notes will not be secured by any of our assets or the equity interests in subsidiary guarantors, it is possible that there would be no assets remaining from which your claims could be satisfied or, if any assets remained, they make the insufficient to satisfy your claims fully. See Description of Other Indebtedness.

As of June 30, 2009, we had \$5,065 million of senior secured indebtedness (including \$250 million face amount of our senior secured notes that are recorded at \$232 million), all of which was indebtedness under our senior secured credit facilities and senior secured notes and which does not include availability of \$734 million under our revolving credit facility after giving ef to certain outstanding letters of credit. The indenture governing the exchange notes offered hereby permits us and our restricts subsidiaries to incur substantial additional indebtedness in the future, including senior secured indebtedness.

Claims of noteholders will be structurally subordinate to claims of creditors of all of our non-U.S. subsidiaries and some of our U.S. subsidiaries because they will not guarantee the exchange notes.

The exchange notes will not be guaranteed by any of our non-U.S. subsidiaries, our less than wholly owned U.S. subsidiaries, receivables subsidiaries or certain other U.S. subsidiaries. Accordingly, claims of holders of the exchange notes will be structurally subordinate to the claims of creditors of these non-guarantor subsidiaries, including trade creditors. All obligation our non-guarantor subsidiaries will have to be satisfied before any of the assets of such subsidiaries would be available for distribution, upon a liquidation or otherwise, to us or a guarantor of the exchange notes.

28

Our non-guarantor subsidiaries accounted for approximately \$1,059 million, or 39%, of our total revenue, and approximately \$122 million, or 19%, of our total EBITDA, for the six months ended June 30, 2009, and approximately \$4.22 billion, or 28% our total assets, and approximately \$1.72 billion, or 14%, of our total liabilities, as of June 30, 2009.

If we default on our obligations to pay our indebtedness, we may not be able to make payments on the exchange notes.

Any default under the agreements governing our indebtedness, including a default under the senior secured credit agreement, is not waived by the required lenders, and the remedies sought by the holders of such indebtedness, could prevent us from pay principal, premium, if any, and interest on the exchange notes and substantially decrease the market value of the exchange no If we are unable to generate sufficient cash flow and are otherwise unable to obtain funds necessary to meet required payment principal, premium, if any, and interest on our indebtedness, or if we otherwise fail to comply with the various covenants, including financial and operating covenants, in the instruments governing our indebtedness (including covenants in our senior secured credit facilities and the indentures governing the senior notes due 2013, senior subordinated notes due 2015 and the indenture governing the exchange notes offered hereby), we could be in default under the terms of the agreements governing indebtedness, including our senior secured credit agreement and the indentures governing the senior notes due 2013, senior subordinated notes due 2015 and the indenture governing the exchange notes offered hereby. In the event of such default, the holders of such indebtedness could elect to declare all the funds borrowed thereunder to be due and payable, together with accrued and unpaid interest, the lenders under our senior secured credit facilities could elect to terminate their commitments thereunder, cease making further loans and institute foreclosure proceedings against our assets, and we could be forced into bankruptcy or liquidation. If our operating performance declines, we may in the future need to obtain waivers from the requir lenders under our senior secured credit facilities to avoid being in default. If we breach our covenants under our senior secure credit facilities and seek a waiver, we may not be able to obtain a waiver from the required lenders. If this occurs, we would be default under our senior secured credit agreement, the lenders could exercise their rights, as described above, and we could be forced into bankruptcy or liquidation.

We may not be able to repurchase the exchange notes upon a change of control.

Upon the occurrence of specific kinds of change of control events, we will be required to offer to repurchase all outstanding exchange notes at 101% of their principal amount plus accrued and unpaid interest. The source of funds for any such purchase the exchange notes will be our available cash or cash generated from our subsidiaries—operations or other sources, including borrowings, sales of assets or sales of equity. We may not be able to repurchase the exchange notes upon a change of control because we may not have sufficient financial resources to purchase all of the exchange notes that are tendered upon a change control. Further, we will be contractually restricted under the terms of our senior secured credit agreement from repurchasing of the exchange notes tendered by holders upon a change of control. Accordingly, we may not be able to satisfy our obligation purchase the exchange notes unless we are able to refinance or obtain waivers under our senior secured credit agreement. Our failure to repurchase the exchange notes upon a change of control would cause a default under the indentures governing the 20 senior secured notes, exchange notes offered hereby and a cross-default under the senior secured credit agreement and the indentures governing the senior notes due 2013 and the senior subordinated notes due 2015. The senior secured credit agreement also provides that a change of control will be a default that permits lenders to accelerate the maturity of borrowings thereunde Any of our future debt agreements may contain similar provisions.

The lenders under the senior secured credit facilities will have the discretion to release the guarantors under the senior secured credit agreement in a variety of circumstances, which will cause those guarantors to be released from their guaran of the exchange notes.

While any obligations under the senior secured credit facilities remain outstanding, any guarantee of the exchange notes may released without action by, or consent of, any holder of the exchange notes or the trustee under the indenture governing the exchange notes offered hereby, at the discretion of lenders under the senior

29

secured credit facilities, if the related guarantor is no longer a guarantor of obligations under the senior secured credit facilitie any other indebtedness. See Description of Senior Notes. The lenders under the senior secured credit facilities will have the discretion to release the guarantees under the senior secured credit facilities in a variety of circumstances. You will not have a claim as a creditor against any subsidiary that is no longer a guarantor of the exchange notes, and the indebtedness and other liabilities, including trade payables, whether secured or unsecured, of those subsidiaries will effectively be senior to claims of noteholders.

Federal and state fraudulent transfer laws may permit a court to void the exchange notes and the related guarantees of the exchange notes, and, if that occurs, you may not receive any payments on the exchange notes.

Federal and state fraudulent transfer and conveyance statutes may apply to the issuance of the exchange notes and the incurred of the related guarantees. Under federal bankruptcy law and comparable provisions of state fraudulent transfer or conveyance laws, which may vary from state to state, the exchange notes or related guarantees could be voided as a fraudulent transfer or conveyance if (1) we or any of the guarantors, as applicable, issued the exchange notes or incurred the related guarantees with intent of hindering, delaying or defrauding creditors or (2) we or any of the guarantors, as applicable, received less than reasonably equivalent value or fair consideration in return for either issuing the exchange notes or incurring the related guarantand, in the case of (2) only, one of the following is also true at the time thereof:

we or any of the guarantors, as applicable, were insolvent or rendered insolvent by reason of the issuance of the exchange notes or the incurrence of the related guarantees;

the issuance of the exchange notes or the incurrence of the related guarantees left us or any of the guarantors, as applicable, with an unreasonably small amount of capital to carry on the business;

we or any of the guarantors intended to, or believed that we or such guarantor would, incur debts beyond our or suc guarantor s ability to pay as they mature; or

we or any of the guarantors was a defendant in an action for money damages, or had a judgment for money damage docketed against us or such guarantor if, in either case, after final judgment, the judgment is unsatisfied.

If a court were to find that the issuance of the exchange notes or the incurrence of the related guarantees was a fraudulent tran or conveyance, the court could void the payment obligations under the exchange notes or such related guarantees or further subordinate the notes or such related guarantees to presently existing and future indebtedness of ours or of the related guarante or require the holders of the notes to repay any amounts received with respect to such related guarantees. In the event of a find that a fraudulent transfer or conveyance occurred, you may not receive any repayment on the exchange notes. Further, the voidance of the exchange notes could result in an event of default with respect to our and our subsidiaries other debt that coursell in acceleration of such debt.

As a general matter, value is given for a transfer or an obligation if, in exchange for the transfer or obligation, property is transferred or an antecedent debt is secured or satisfied. A debtor will generally not be considered to have received value in connection with a debt offering if the debtor uses the proceeds of that offering to make a dividend payment or otherwise retire redeem equity securities issued by the debtor.

We cannot be certain as to the standards a court would use to determine whether or not we or the guarantors were solvent at the relevant time or, regardless of the standard that a court uses, that the issuance of the related guarantees would not be further subordinated to our or any of our guarantors other debt. Generally, however, an entity would be considered solvent if, at the it incurred indebtedness:

the sum of its debts, including contingent liabilities, was greater than the fair saleable value of all its assets; or

30

the present fair saleable value of its assets was less than the amount that would be required to pay its probable liability on its existing debts, including contingent liabilities, as they become absolute and mature; or

it could not pay its debts as they become due.

Your ability to transfer the exchange notes may be limited by the absence of an active trading market, and there is no assurance that any active trading market will develop for the exchange notes.

We are offering the exchange notes to the holders of the outstanding notes. The outstanding notes were offered and sold in September 2008 to institutional investors and are eligible for trading in the PORTAL market.

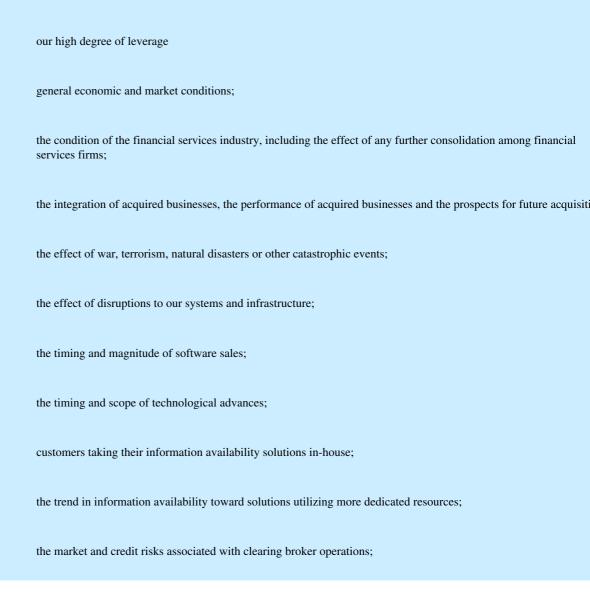

We do not intend to apply for a listing of the exchange notes on a securities exchange or on any automated dealer quotation system. There is currently no established market for the exchange notes and we cannot assure you as to the liquidity of market that may develop for the exchange notes, your ability to sell the exchange notes or the price at which you would be able to sel exchange notes. If such markets were to exist, the exchange notes could trade at prices that may be lower than their principal amount or purchase price depending on many factors, including prevailing interest rates, the market for similar notes, our financial and operating performance and other factors. The initial purchasers in the private offering of the outstanding notes hadvised us that they currently intend to make a market with respect to the exchange notes. However, these initial purchasers a not obligated to do so, and any market making with respect to the exchange notes may be discontinued at any time without not Therefore, we cannot assure you that an active market for the exchange notes will develop or, if developed, that it will continued the transfer of the exchange notes will develop or, if developed, that it will continued the market for non-investment grade debt has been subject to disruptions that have caused substantial volatility is prices of securities similar to the exchange notes. The market, if any, for the exchange notes may experience similar disruption and any such disruptions may adversely affect the prices at which you may sell your exchange notes.

We derive most of our forward-looking statements from our operating budgets and forecasts, which are based upon many detailed assumptions. While we believe that our assumptions are reasonab we caution that it is very difficult to predict the impact of known factors, and, of course, it is impossible for us to anticipate al factors that could affect our actual results. Important factors that could cause actual results to differ materially from our expectations (cautionary statements) are disclosed under Risk Factors and elsewhere in this prospectus, including, without limitation, in conjunction with the forward-looking statements included in this prospectus. All subsequent written and oral forward-looking statements attributable to us, or persons acting on our behalf, are expressly qualified in their entirety by the cautionary statements. Some of the factors that we believe could affect our results include:

the ability to retain and attract customers and key personnel;

risks relating to the foreign countries where we transact business;

the ability to obtain patent protection and avoid patent-related liabilities in the context of a rapidly developing legal framework for software and business-method patents;

a material weakness in our internal controls; and

the other factors set forth under Risk Factors.

We caution you that the foregoing list of important factors may not contain all of the material factors that are important to you addition, in light of these risks and uncertainties, the matters referred to in the forward-looking statements contained in this prospectus may not in fact occur. We undertake no obligation to publicly update any written or oral forward-looking statement made by us or on our behalf as a result of new information, future events or otherwise, except as otherwise required by law.

EBITDA, a measure used by management to measure operating performance, is defined as net income plus interest, taxes, depreciation and amortization and goodwill impairment. EBITDA is not a recognized term under GAAP and does not purport be an alternative to net income as a measure of operating performance or to cash flows from operating activities as a measure liquidity. Additionally, EBITDA is not intended to be a measure of free cash flow available for management s discretionary tas it does not consider certain cash requirements such as interest payments, tax payments and debt service requirements. Management believes EBITDA is helpful in highlighting trends because EBITDA can differ significantly from company to company depending on long-term strategic decisions regarding capital structure, the tax jurisdictions in which companies ope and capital investments. In addition, EBITDA provides more comparability between the historical results of SunGard and results reflect purchase accounting and the new capital structure. Management compensates for the limitations of using non-GAA financial measures by using them to supplement GAAP results to provide a more complete understanding of the factors and trends affecting the business than GAAP results alone. Because not all companies use identical calculations, these presentation of EBITDA may not be comparable to other similarly titled measures of other companies.

- (4) Capital expenditures represent net cash paid for property and equipment as well as software and other assets.
- (5) For purposes of calculating the ratio of earnings to fixed charges, earnings consist of income before income taxes plus fir charges. Fixed charges include: interest expense, whether expensed or capitalized; amortization of debt issuance cost; an the portion of rental expense representative of the interest factor. Earnings for the period August 11 to December 31, 200 for 2006, 2007 and 2008 and for the six month periods ended June 30, 2008 and 2009 were inadequate to cover fixed charges by \$62 million, \$139 million, \$63 million, \$204 million, \$38 million and \$50 million, respectively.

MANAGEMENT S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION

AND RESULTS OF OPERATIONS

Overview

We are one of the world's leading software and IT services companies. We provide software and processing solutions to institutions throughout the financial services industry, higher education, and the public sector; and we help enterprises of all to maintain the continuity of their business through information availability services. We support more than 25,000 customers in over 70 countries. We operate our business in four segments: Financial Systems (FS), Higher Education (HE), Public Stand Availability Services (AS). Our FS segment primarily serves financial services companies, corporate and government treasury departments and energy companies. Our HE segment primarily serves higher education institutions. Our PS segment primarily serves state and local governments and not-for-profit organizations. Our AS segment serves IT-dependent companies across virtually all industries.

SunGard Data Systems Inc. (SunGard) was acquired on August 11, 2005 by a consortium of private equity investment fundassociated with Bain Capital Partners, The Blackstone Group, Goldman Sachs & Co., Kohlberg Kravis Roberts & Co., Providence Equity Partners, Silver Lake and TPG (the Transaction).

SunGard is a wholly owned subsidiary of SunGard Holdco LLC, which is wholly owned by SunGard Holding Corp., which is wholly owned by SunGard Capital Corp. II, which is a subsidiary of SunGard Capital Corp. SunGard Capital Corp. II and SunGard Capital Corp. are collectively referred to as the Parent Companies. All of these companies were formed for the purpose of facilitating the Transaction and are collectively referred to as the Holding Companies.

In FS, we primarily serve financial services companies through a broad range of complementary software solutions that proce their investment and trading transactions. The principal purpose of most of these systems is to automate the business processe associated with trading securities, managing portfolios and accounting for investment assets.

In HE, we primarily provide software, strategic and systems integration consulting, and technology management services to higher education organizations around the world, including colleges, universities, campuses, foundations and state systems. H solutions include administration, advancement, IT management, performance analytics, enrollment management, academic performance and strategic planning.

In PS, we primarily provide software and processing solutions designed to meet the specialized needs of central, federal, state local governments, public safety and justice agencies, public schools, utilities, non-profits, and other public sector institutions Our PS solutions support a range of specialized enterprise resource planning and administrative solutions.

In AS, we help our customers maintain access to the information and computer systems they need to run their businesses by providing them with cost-effective resources to keep their mission-critical IT systems reliable and secure. We offer a complet range of availability services, including recovery services, managed services, consulting services and business continuity management software.

Global Economic Conditions

Current instability in the worldwide financial markets, including volatility in and disruption of the credit markets, has resulted uncertain economic conditions. Late in 2008, a global financial crisis triggered unprecedented market volatility and depressed economic growth.

SunGard s results of operations are typically a trailing indicator of current economic activity, largely due to the multi-year contracts that generate the majority of our revenue. While our 2008 results show some effect of

the current crisis, we believe that 2009 will be more challenging. As we have always done, our businesses have right-sized the expense base in line with their expected revenue opportunities, but the lack of visibility in the current economic environment limits our ability to estimate the impact of the crisis.

The following discussion includes historical and certain forward-looking information that should be read together with the accompanying Consolidated Financial Statements and related footnotes and the discussion above of certain risks and uncertai (see Risk Factors) that could cause future operating results to differ materially from historical results or the expected result indicated by forward-looking statements.

Use of Estimates and Critical Accounting Policies

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires us to make many estimates and judgments that affect the reported amounts of assets, liabilities, revenue and expenses. Those estimates and judgments are based on historical experience, future expectations and other factors and assumptions we believe to be reasonable under the circumstances. We review our estimates and judgments on an ongoing bas and revise them when necessary. Actual results may differ from the original or revised estimates. A summary of our significant accounting policies is contained in Note 1 of Notes to Consolidated Financial Statements. A description of the most critical policies and those areas where estimates have a relatively greater effect in the financial statements follows. Our management discussed the critical accounting policies described below with our audit committee.

Intangible Assets and Purchase Accounting

Purchase accounting requires that all assets and liabilities be recorded at fair value on the acquisition date, including identifial intangible assets separate from goodwill. Identifiable intangible assets include customer base (which includes customer contra and relationships), software and trade name. Goodwill represents the excess of cost over the fair value of net assets acquired.

The estimated fair values and useful lives of identified intangible assets are based on many factors, including estimates and assumptions of future operating performance and cash flows of the acquired business, the nature of the business acquired, the specific characteristics of the identified intangible assets, and our historical experience and that of the acquired business. The estimates and assumptions used to determine the fair values and useful lives of identified intangible assets could change due to numerous factors, including product demand, market conditions, technological developments, economic conditions and competition. In connection with our determination of fair values for the Transaction and for other significant acquisitions, we engage independent appraisal firms to assist us with the valuation of intangible (and certain tangible) assets acquired and certa assumed obligations. The carrying values and useful lives for amortization of identified intangible assets are reviewed on an ongoing basis, and any resulting changes in estimates could have a material adverse effect on our financial results.

At least annually, we compare the carrying value of our reporting units to their estimated fair value. If the carrying value is greater than the respective estimated fair value, we then determine if the goodwill is impaired, and whether some or all of the goodwill should be written off as a charge to operations, which could have a material adverse effect on our financial results. T estimate of fair value requires various assumptions including the use of projections of future cash flows and discount rates that reflect the risks associated with achieving the future cash flows. Changes in the underlying business could affect these estimates which in turn could affect the fair value of the reporting unit.

In connection with certain acquisitions, we have accrued the estimated costs of closing certain facilities. Historically, the estimated cost of closing our existing facilities was included in merger costs and the estimated cost of closing acquired facilities was included in goodwill. Effective for acquisitions after January 1, 2009, the estimated cost of closing acquired facilities wil also be recorded in merger costs.

38

Revenue Recognition

We generate services revenue from availability services, processing services, software maintenance and rentals, professional services and broker/dealer fees. All services revenue is recorded as the services are provided based on the fair value of each element. Fair value is determined based on the sales price of each element when sold separately. Most AS services revenue consists of fixed monthly fees based upon the specific computer configuration or business process for which the service is bei provided, and the related costs are incurred ratably over the contract period. When recovering from an interruption, customers generally are contractually obligated to pay additional fees, which typically cover our incremental costs of supporting customs during recoveries. FS services revenue includes monthly fees, which may include a fixed minimum fee and/or variable fees be on a measure of volume or activity, such as the number of accounts, trades or transactions, users or the number of hours of service.

For fixed-fee professional services contracts, services revenue is recorded based upon the estimated percentage of completion measured by the actual number of hours incurred divided by the total estimated number of hours for the project. When contractinclude both professional services and software and require a significant amount of program modification or customization, installation, systems integration or related services, the professional services and license revenue is recorded based upon the estimated percentage of completion, measured in the manner described above. Changes in the estimated costs or hours to complete the contract and losses, if any, are reflected in the period during which the change or loss becomes known.

License fees result from contracts that permit the customer to use our software products at its site. Generally, these contracts a multiple-element arrangements since they usually provide for professional services and ongoing software maintenance. In the instances, license fees are recognized upon the signing of the contract and delivery of the software if the license fee is fixed, collection is probable, and there is sufficient evidence of the fair value of each undelivered element. Revenue is recorded whe billed when customer payments are extended beyond normal billing terms, or when there is significant acceptance, technology service risk. Revenue also is recorded over the contract period in those instances where the software is bundled together with computer equipment or other post-delivery services, and there is not sufficient evidence of the fair value of each undelivered element.

We believe that our revenue recognition practices comply with the complex and evolving rules governing revenue recognition Future interpretations of existing accounting standards, new standards or changes in our business practices could result in chain our revenue recognition accounting policies that could have a material effect on our financial results.

Accounting for Income Taxes

The objectives of accounting for income taxes are to recognize the amount of taxes payable or refundable for the current year deferred tax liabilities and assets for the future tax consequences of events that have been recognized in an entity s financial statements or tax returns. Valuation allowances are recorded to reduce deferred tax assets when it is more likely than not that tax benefit will not be realized. Deferred tax assets for which no valuation allowance is recorded may not be realized upon changes in facts and circumstances. Tax benefits related to uncertain tax positions taken or expected to be taken on a tax retur are recorded when such benefits meet a more likely than not threshold. Otherwise, these tax benefits are recorded when a tax position has been effectively settled, which means that the appropriate taxing authority has completed their examination even though the statute of limitations remains open, or the statute of limitation expires. Considerable judgment is required in assess and estimating these amounts and differences between the actual outcome of these future tax consequences and our estimates could have a material effect on our financial results.

Accounting for Stock-Based Compensation

Stock-based compensation cost is measured at the grant date based on the value of the award and is recognized as expense ov the appropriate service period. Determining the fair value of stock-based awards

39

requires considerable judgment, including estimating the expected term of stock options, expected volatility of our stock price and the number of awards expected to be forfeited. In addition, for stock-based awards where vesting is dependent upon achieving certain operating performance goals, we estimate the likelihood of achieving the performance goals. Differences between actual results and these estimates could have a material effect on our financial results. A deferred income tax asset is recorded over the vesting period as stock compensation expense is recorded. Our ability to use the deferred tax asset is ultima based on the actual value of the stock-based award upon exercise. If the actual value is lower than the fair value determined o the date of grant, then there could be an income tax expense for the portion of the deferred tax asset that cannot be used, whic could have a material effect on our financial results.

Results of Operations

We evaluate performance of our segments based on operating results before interest, income taxes, amortization of acquisition-related intangible assets, goodwill impairment charges, stock compensation and certain other costs (see Note 10 o Notes to Consolidated Financial Statements for the fiscal year ended December 31, 2008 and Note 7 of Notes to Consolidated Financial Statement for the quarterly period ended June 30, 2009 included elsewhere herein).

⁽¹⁾ Percent of revenue is calculated as a percent of revenue from FS, HE, PS, Software and Processing Solutions, and AS, respectively.

⁽²⁾ Other items include certain purchase accounting adjustments and management fees paid to the Sponsors, partially offset by capitalized software development costs.

The following table sets forth, for the periods indicated, certain supplemental revenue data, the relative percentage that those amounts represent to total revenue and the percentage change in those amounts from period to period.

Three Months Ended June 30, 2009 Compared to Three Months Ended June 30, 2008

Income from Operations:

Our total operating margin was 10% for the three months ended June 30, 2009, compared to 11% for the three months ended June 30, 2008 primarily due to a \$25 million decrease in license fees and the decline in the AS operating margin.

41

Financial Systems:

The FS operating margin was 18% for each of the three months ended June 30, 2009 and 2008. The \$9 million increase in inc from operations is primarily due to the impact of acquired businesses, cost reductions, primarily employee and consultant-rela and the impact of the increase in revenue at one of our trading systems businesses, partially offset by an \$18 million decrease software license fees and the impact from the decrease in professional services revenue.

Higher Education:

The HE operating margin was 27% and 25% for the three months ended June 30, 2009 and 2008, respectively, primarily due cost reductions, mainly employee and consultant-related and professional services expenses and a customer conference held i the second quarter of 2008 that was held in the first quarter of 2009, partially offset by a \$4 million decrease in software licentees.

Public Sector:

The PS operating margin was 20% and 19% for the three months ended June 30, 2009 and 2008, respectively, due primarily timprovement in the U.K. business.

Availability Services:

The AS operating margin was 26% and 29% for the three months ended June 30, 2009 and 2008, respectively. The operating margin decline and the decrease of \$12 million are primarily due to facility expansions in Europe and North America, which increased the fixed cost base in advance of anticipated revenue growth.

Revenue:

Total revenue increased \$12 million or 1% for the three months ended June 30, 2009 compared to the second quarter of 2008. a constant currency basis, organic revenue decreased 0.5% in the second quarter of 2009 compared to the prior year period, primarily because of a decline in professional service revenue across all of our segments except AS and a decrease in softward license fees. Organic revenue is defined as revenue for businesses owned for at least one year and further adjusted for the effe of businesses sold in the previous twelve months. Approximately 6% of organic revenue growth in the quarter was attributed one of our broker/dealer businesses. While we have seen some improvement in the tone from the first quarter of 2009, spendir remains cautious and the environment continues to be subject to pricing pressure. We expect a challenging second half in 200 and some difficulty in achieving positive organic growth in part due to comparatively strong third and fourth quarters in 2008 when organic revenue growth on a constant currency basis was 11% and 8%, respectively.

Financial Systems:

FS revenue increased \$56 million or 8% in the second quarter of 2009 from the prior year period. On a constant currency basis organic revenue grew 2% in the quarter. Approximately 12% of organic revenue growth was attributed to one of our broker/dealer businesses. The broker/dealer revenue has remained uncharacteristically high and is a function of market volatily and customer mix; while this revenue increased year over year, sequentially it was unchanged after declining from the fourth quarter of 2008. We expect this revenue to decline at some point but are unable to predict the timing. Depending on the nature timing and extent of the future decline, there could be a triggering event requiring an interim goodwill impairment test in addit to the annual impairment test performed each year as of July 1st and some or all of the approximately \$385 million in goodwill our trading systems reporting unit could be impaired. Professional services revenue decreased \$38 million or 23%. Revenue f license and resale fees included software license revenue of \$33 million and \$52 million in the three months ended June 30, 2 and 2008, respectively.

42

Higher Education:

HE revenue decreased \$14 million or 10% for the three months ended June 30, 2009 compared to the corresponding period in 2008 due entirely to a decrease in organic revenue. HE services revenue decreased \$6 million, primarily due to revenue associated with a customer conference held in the first quarter of 2009 that was held in the second quarter of 2008 and a decrease in professional services. Revenue from license and resale fees included software license revenue of \$5 million in the three mo ended June 30, 2009, a decrease of \$4 million from the prior year period.

Public Sector:

PS revenue decreased \$17 million or 15% for the three months ended June 30, 2009 compared to the corresponding period in 2008. On a constant currency basis, organic revenue decreased 7%. Revenue from license and resale fees included software license revenue of \$7 million in each of the three months ended June 30, 2009 and 2008.

Availability Services:

AS revenue decreased \$13 million or 3% in the second quarter of 2009 from the prior year period. On a constant currency bas organic revenue grew 2% in the quarter. In North America, revenue grew 1% overall, but remained flat organically where decreases in basic and advanced recovery services offset growth in managed services and professional fees. Revenue in Europe decreased 18%, but grew 7% on a constant currency basis.

Costs and Expenses:

Cost of sales and direct operating expenses as a percentage of total revenue was 51% and 48% in the three-month periods end June 30, 2009 and 2008, respectively, largely the result of the higher volumes of the broker/dealer business previously mentic Also impacting the period were increased costs from acquired businesses, net of a business sold in 2008, partially offset by lo FS and PS employee-related and consultant expenses.

Sales, marketing and administration expenses as a percentage of total revenue was 19% and 22% in the three-month periods ended June 30, 2009 and 2008, respectively. Decreases in sales, marketing and administration expenses, were primarily due to decreases in FS employment-related expenses.

Because AS product development costs are insignificant, it is more meaningful to measure product development expenses as percentage of revenue from software and processing solutions. For the three months ended June 30, 2009 and 2008, product development costs were 7% and 8% of revenue from software and processing solutions, respectively.

Depreciation and amortization as a percentage of total revenue was 5% in each of the three-month periods ended June 30, 200 and 2008

Amortization of acquisition-related intangible assets as a percentage of total revenue was 9% in each of the three-month perio ended June 30, 2009 and 2008. The \$12 million increase in 2009 was due to acquisitions made in 2008 and from shortening the remaining useful lives of certain intangible assets.

Interest expense was \$155 million and \$143 million for the three months ended June 30, 2009 and 2008, respectively. The increase in interest expense was due primarily to increased borrowings from the issuance of \$500 million senior notes due 20 \$500 million increase in the term loan, borrowings under our receivables facility and additional borrowings under our revolvi credit facility, partially offset by interest rate decreases.

Other income was \$14 million for the three months ended June 30, 2009 compared to other expense of \$4 million for the three months ended June 30, 2008. The change is primarily attributable to \$14 million of foreign currency translation gains related our Euro denominated term loan in the three months ended June 30, 2009 compared to a \$1 million translation gain and \$4 million of losses on sales of receivables related to our terminated off-balance sheet receivables facility in the same period in 2

Six Months Ended June 30, 2009 Compared to Six Months Ended June 30, 2008

Income from Operations:

Our total operating margin was 9% for the six months ended June 30, 2009, compared to 10% for the six months ended June 2008 primarily due to a \$33 million decrease in license fees and the decline in the AS operating margin.

Financial Systems:

The FS operating margin was 17% and 18% for the six months ended June 30, 2009 and 2008, respectively. The \$7 million increase is primarily related to the impact of acquired businesses, cost reductions, primarily employee and consultant-related, the impact of the increase in revenue at one of our trading systems businesses, partially offset by a \$28 million decrease in software license fees and the impact from the decrease in professional services revenue.

Higher Education:

The HE operating margin was 23% and 22% for the six months ended June 30, 2009 and 2008, respectively. The operating margin increase is due primarily to the impact of cost savings in the year, partially offset by a \$3 million decrease in software license fees.

Public Sector:

The PS operating margin was 19% and 18% for the six months ended June 30, 2009 and 2008, respectively, due primarily to improvement in the U.K. business.

Availability Services:

The AS operating margin was 25% and 27% for the six months ended June 30, 2009 and 2008, respectively. The operating margin decline and the decrease of \$24 million are primarily due to facility expansions in Europe and North America, which increased the fixed cost base in advance of anticipated revenue growth.

Revenue:

Total revenue increased \$45 million or 2% for the six months ended June 30, 2009 compared to the same period in 2008. On constant currency basis, organic revenue growth was 1% in the first six months of 2009 compared to the prior year period, primarily because of a decline in professional services revenue across all of our segments except AS and a decrease in softwa license fees. Approximately 5% of organic revenue growth in the quarter was attributed to one of our broker/dealer businesse.

Financial Systems:

FS revenue increased \$111 million or 8% in the first six months of 2009 from the prior year period. On a constant currency be organic revenue grew 3% in the six-month period. Approximately 11% of organic revenue growth was attributed to one of our broker/dealer businesses. The broker/dealer revenue has remained uncharacteristically high and is a function of market volatily and customer mix; while this revenue increased year over year, sequentially it was unchanged after declining from the fourth quarter of 2008. Professional services revenue decreased \$72 million or 23%. Revenue f license and resale fees included software license revenue of \$54 million and \$82 million in the six months ended June 30, 200 and 2008, respectively.

Higher Education:

HE revenue decreased \$8 million or 3% for the six months ended June 30, 2009 compared to the corresponding period in 200 due entirely to organic revenue growth. HE services revenue decreased \$2 million, primarily due to a decrease in professional services, partially offset by an increase in processing and support revenue. Revenue from license and resale fees included software license revenue of \$10 million in the six months ended June 30, 2009, a decrease of \$3 million from the prior year period.

Public Sector:

PS revenue decreased \$27 million or 13% for the six months ended June 30, 2009 compared to the corresponding period in 20 On a constant currency basis, organic revenue decreased 3%. Revenue from license and resale fees included software license revenue of \$12 million in each of the six months ended June 30, 2009 and 2008.

Availability Services:

AS revenue decreased \$31 million or 4% for the six months ended June 30, 2009 compared to the prior year period. On a con currency basis, organic revenue grew 1% in the first six months of 2009. In North America, revenue grew 1% overall, but decreased 1% organically where decreases in basic and advanced recovery services exceeded growth in managed services and professional services revenue. Revenue in Europe decreased 20%, but grew 7% on a constant currency basis.

Costs and Expenses:

Cost of sales and direct operating expenses as a percentage of total revenue was 52% and 49% in the six-month periods ended June 30, 2009 and 2008, respectively, largely the result of the higher volumes of the broker/dealer business previously mention. Year Ended December 31, 2008 Compared to Year Ended December 31, 2007

Income from Operations:

Our total operating margin decreased from 13% in 2007 to 8% in 2008 primarily due to a \$128 million goodwill impairment charge in PS, intangible asset write-offs of \$67 million and the decline in operating margins at each of our operating segments

Financial Systems:

The FS operating margin was 20% for the year ended December 31, 2008, compared to 21% for the prior year period. The operating margin decline reflects the impact of the increase in revenue at one of our trading systems businesses which has an inherently lower margin, an increase in restructuring charges and an \$11 million decrease in software license revenue.

The most important factors affecting the FS operating margin are:

the level of trading volumes,

the level of IT spending and its impact on the overall demand for professional services and software license sales,

the rate and value of contract renewals, new contract signings and contract terminations,

the extent and degree of price negotiation by our customers,

the overall condition of the financial services industry and the effect of any further consolidation among financial services firms, and

the operating margins of recently acquired businesses, which tend to be lower at the outset and improve over a num of years.

Higher Education:

The HE operating margin was 24% for the year ended December 31, 2008 compared to 26% for the year ended December 31 2007. The operating margin decline is due to a \$15 million decrease in software license fees.

The most important factors affecting the HE operating margin are:

the rate and value of contract renewals, new contract signings and contract terminations,

the level of IT spending and its impact on the overall demand for professional services and software license sales, a

the extent and degree of price negotiation by our customers.

Public Sector:

Edgar Filing: TransDigm Group INC - Form 10-Q

The PS operating margin was 19% for the year ended December 31, 2008 compared to 20% for the year ended December 31, 2007. The operating margin decline is due primarily to the impact of significantly lower margins in the U.K. business and a \$\frac{1}{2}\$ million decrease in software license fees.

The most important factors affecting the PS operating margin are:

the rate and value of contract renewals, new contract signings and contract terminations,

the level of IT spending and its impact on the overall demand for professional services and software license sales, a

the extent and degree of price negotiation by our customers.

48

Availability Services:

The AS operating margin was 28% for the year ended December 31, 2008 compared to 30% for the year ended December 31, 2007, primarily due to facility expansions in both North America and Europe, which increased the fixed cost base in advance anticipated revenue growth.

The most important factors affecting the AS operating margin are:

the rate and value of contract renewals, new contract signings and contract terminations,

the timing and magnitude of equipment and facilities expenditures, and

the trend toward availability solutions utilizing more dedicated resources.

The margin rate of the AS European business is inherently lower than the margin rate of the North American business due primarily to lower economies of scale in the distinct geographic markets served. However, the differential in the margins has narrowed over the past several years because of operational improvements in Europe and the growing proportion of managed services in North America.

Revenue:

Total revenue was \$5.60 billion for the year ended December 31, 2008 compared to \$4.90 billion for the year ended December 31, 2007. The increase in total revenue in 2008 is due primarily to organic revenue growth of approximately 10%, trading volumes of one of our trading systems businesses adding \$335 million or six percentage points to the growth rate. The broker/dealer revenue has remained uncharacteristically high and is a function of market volatility and customer mix. We exp this revenue to decline at some point but are unable to predict the timing. Organic revenue is defined as revenue from busines owned for at least one year and further adjusted for the effects of businesses sold in the previous twelve months. When assess our financial results, we focus on growth in organic revenue because overall revenue growth is affected by the timing and magnitude of acquisitions, dispositions and by purchase accounting adjustments.

Services revenue, which is largely recurring in nature, includes revenue from availability services, processing services, softwa support and rentals, professional services, broker/dealer fees and hardware rentals. Services revenue increased to \$5.08 billion from \$4.36 billion, representing approximately 91% of total revenue in 2008 compared to 89% in 2007. The revenue increase \$719 million in 2008 was due primarily to organic revenue growth of \$529 million, mostly in FS with \$333 million coming for the broker/dealer mentioned above, and the impact of acquired revenue in FS and AS.

Professional services revenue was \$961 million and \$886 million in 2008 and 2007, respectively. The \$75 million increase we due primarily to FS acquired and organic revenue.

Revenue from license and resale fees was \$369 million and \$396 million for the years ended December 31, 2008 and 2007, respectively, and includes software license revenue of \$266 million and \$293 million, respectively.

Financial Systems:

FS revenue was \$3.08 billion for the year ended December 31, 2008 compared to \$2.50 billion for the year ended December 32007. Organic revenue growth was approximately 18% in 2008, with trading volumes of one of our trading systems businessed adding \$335 million or 13 percentage points to the growth rate. The broker/dealer revenue has remained uncharacteristically land is a function of market volatility and customer mix. We expect this revenue to decline at some point but are unable to prethe timing.

Professional services revenue increased \$63 million or 11%. Revenue from license and resale fees included software license revenue of \$204 million and \$214 million, respectively, in 2008 and 2007.

49

Higher Education:

HE revenue was \$540 million for the year ended December 31, 2008 compared to \$543 million for the year ended December 2007. Services revenue increased \$18 million, primarily from increases in software support revenue. Professional services revenue was \$146 million in 2008, an increase of \$7 million. In 2008, longer sales cycles caused software license fees and res fees to decline by \$15 million and \$6 million, respectively. HE organic revenue decreased 1% in 2008.

Public Sector:

PS revenue was \$411 million for the year ended December 31, 2008 compared to \$410 million for the year ended December 2007. Excluding the impact of currency exchange rates, organic revenue increased approximately 2%. Increases in software support revenue and processing revenue were offset by a decrease in professional services. Software license fees were \$25 million in 2008, a decrease of \$4 million.

Availability Services:

AS revenue was \$1.57 billion for the year ended December 31, 2008 compared to \$1.45 billion for the year ended December 2007, an 8% increase. AS organic revenue increased approximately 3% in 2008. In North America, revenue grew 10% overal and 3% organically as strong growth in managed services was offset in part by a decrease in basic and advanced recovery services. Revenue from license and resale fees included software license revenue of \$6 million, an increase of \$3 million from prior year. Revenue in Europe grew 4% overall and 9% excluding the impact of currency exchange rates.

Costs and Expenses:

Cost of sales and direct operating expenses as a percentage of total revenue was 49% and 46% for the years ended December 2008 and 2007, respectively, largely the result of the higher volumes of the trading systems business previously mentioned. A impacting the period were increased costs resulting from acquired businesses, an increase in FS and HE employee-related expenses supporting increased services revenue and an increase in AS facilities costs.

The increase in sales, marketing and administration expenses of \$109 million was due primarily to increased costs resulting fr acquired businesses, AS employee-related expenses and an insurance settlement in 2007, partially offset by decreases in HE a FS employee-related expenses and an unfavorable arbitration award in 2007 related to a customer dispute.

Because AS product development costs are insignificant, it is more meaningful to measure product development expense as a percentage of revenue from software and processing solutions. For the years ended December 31, 2008 and 2007, software development expenses were unchanged at 8% of revenue from software and processing solutions.

Depreciation and amortization as a percentage of total revenue was 5% for each of the years ended December 31, 2008 and 20 The \$27 million increase in 2008 was due primarily to capital expenditures supporting FS and AS and from the AS business acquired in the third quarter of 2007.

Amortization of acquisition-related intangible assets was 9% of total revenue for each of the years ended December 31, 2008 2007. Amortization of acquisition-related intangible assets increased \$77 million in 2008 due primarily to the impact of recen acquisitions made by the Company and a \$57 million increase in impairment charges.

As a result of the change in the economic environment in the second half of 2008 and completion of the annual budgeting process, we completed an assessment of the recoverability of our goodwill in December 2008.

50

In completing this review, we considered a number of factors, including a comparison of the budgeted revenue and profitabili for 2009 to that included in the annual impairment test conducted as of July 1, 2008, and the amount by which the fair value of each reporting unit exceeded its carrying value in the 2008 impairment analysis, as well as qualitative factors such as the over economy is effect on each reporting unit. Based on that review, we concluded that the entire enterprise did not experience a triggering event that would require an impairment analysis of all of our reporting units, but that some reporting units required further impairment analysis. Based on this further analysis, we concluded that the decline in expected future cash flows in one our PS reporting units was sufficient to result in an impairment of goodwill of \$128 million.

Interest expense was \$599 million for the year ended December 31, 2008 compared to \$645 million for the year ended December 31, 2007. The decrease is primarily due to interest rate decreases and the redemption of the senior floating rate note 2007, partially offset by the issuance of \$500 million senior notes due 2015, a \$500 million increase in the term loan and additional borrowings under our revolving credit facility.

Other expense increased \$25 million in the year ended December 31, 2008 due primarily to increased foreign currency translators primarily related to our Euro denominated term loan and losses on Euros purchased in advance of and fees associated vunused alternative financing commitments for the acquisition of GL TRADE S.A. (GL TRADE), partially offset by \$28 m of expense in 2007 associated with the early retirement of the \$400 million of senior floating rate notes due 2013, of which \$100 million represented the retirement premium paid to noteholders.

We believe that our overall effective income tax rate is typically between 38% and 40%. The effective income tax rates for 20 and 2007 were -19% and 5%, respectively. The rate in 2008 reflects a nondeductible goodwill impairment charge as well as a increase to our income tax reserve for tax matters for open years, some of which are currently under audit. The rate in 2007 reflects a change in the mix of taxable income in various jurisdictions and limitations on our ability to utilize certain foreign to credits.

Year Ended December 31, 2007 Compared to Year Ended December 31, 2006

Income from Operations:

Our total operating margin increased from 12% in 2006 to 13% in 2007 because of improved performance within FS and HE.

Financial Systems:

The FS operating margin was 21% for the year ended December 31, 2007 compared to 20% for the prior year period. The \$32 million increase in software license fees, improvement in the operating contribution from the growth in professional services revenue and operating leverage from other services revenue were partially offset by the impact of recently acquired businesse

Higher Education:

The HE operating margin was 26% for the year ended December 31, 2007 compared to 24% for the year ended December 31 2006. Income from operations increased \$25 million in 2007 primarily due to a \$15 million increase in resale fees, improved operating profit contribution from services revenue, and a \$4 million increase in software license fees.

Public Sector:

The PS operating margin was 20% for the year ended December 31, 2007, unchanged from the prior year period. Income from operations increased \$5 million in 2007 primarily due to a \$3 million increase in software license fees.

51

Availability Services:

The AS operating margin was 30% for the year ended December 31, 2007, unchanged from the prior year period. Income from operations increased \$16 million in 2007 primarily due to improved operating profit contribution.

Revenue:

Total revenue was \$4.90 billion for the year ended December 31, 2007 compared to \$4.32 billion for the year ended December 31, 2006. The increase in total revenue in 2007 is due primarily to organic revenue growth of approximately 11%, trading volumes of one of our trading systems businesses adding three percentage points to the growth rate and changes in currency exchange rates adding approximately two percentage points overall. Excluding these items, organic growth would h been 6%.

Services revenue increased to \$4.36 billion from \$3.87 billion, representing approximately 89% of total revenue in 2007 compared to 90% in 2006. The revenue increase of \$494 million in 2007 was due to organic revenue growth of \$391 million across all segments and the impact of acquired revenue in FS.

Professional services revenue was \$886 million and \$767 million in 2007 and 2006, respectively. The \$119 million increase value primarily to FS organic and acquired revenue.

Revenue from license and resale fees was \$396 million and \$342 million for the years ended December 31, 2007 and 2006, respectively, and includes software license revenue of \$293 million and \$255 million, respectively.

Financial Systems:

FS revenue was \$2.50 billion for the year ended December 31, 2007 compared to \$2.07 billion for the year ended December 32006. Organic revenue growth was approximately 17% in 2007, with trading volumes of one of our trading systems business adding \$121 million or five percentage points to the growth rate, which exceeded our expectations for the year and the future. Excluding this business, organic revenue growth was approximately 12% in 2007.

Professional services had the most significant contribution to overall FS growth, having increased \$133 million or 29%. Reve from license and resale fees included software license revenue of \$214 million and \$182 million, respectively, in 2007 and 20

Higher Education:

HE revenue was \$543 million for the year ended December 31, 2007 compared to \$498 million for the year ended December 2006. Services revenue increased \$26 million. In 2007, resale fees were \$51 million, an increase of \$15 million, and software license fees were \$47 million, an increase of \$4 million. HE organic revenue growth was approximately 9% in 2007.

Public Sector:

PS revenue was \$410 million for the year ended December 31, 2007 compared to \$395 million for the year ended December 2006, an increase of 4%, with changes in currency exchange rates adding approximately five percentage points. Organic revel declined approximately 2%. Software license fees were \$28 million in 2007, an increase of \$3 million.

Availability Services:

AS revenue was \$1.45 billion for the year ended December 31, 2007 compared to \$1.36 billion for the year ended December 2006, a 7% increase. AS organic revenue increased approximately 4% in 2007. In North

America revenue grew 4% overall and 1% organically as strong growth in managed services was offset by a net decrease in b and advanced recovery services. Revenue in Europe grew 17%, 8% excluding the impact of currency exchange rates.

Costs and Expenses:

Cost of sales and direct operating expenses as a percentage of total revenue remained unchanged at 46% for each of the years ended December 31, 2007 and 2006. The increase of \$288 million was due primarily to an increase in FS employee-related at consultant expenses supporting increased services revenue and increased costs related to the higher volumes in one of our tracestory businesses.

Sales, marketing and administration expenses remained unchanged as a percentage of total revenue at 21% for each of the year ended December 31, 2007 and 2006. The increase of \$127 million was due primarily to FS businesses acquired in the last twe months and an unfavorable arbitration award related to a customer dispute, partially offset by reduced stock compensation expense and an insurance settlement.

Because AS product development costs are insignificant, it is more meaningful to measure product development expense as a percentage of revenue from software and processing solutions. For the years ended December 31, 2007 and 2006, software development expenses were 8% and 9% of revenue from software and processing solutions, respectively.

Depreciation and amortization as a percentage of total revenue was 5% and 6% for the years ended December 31, 2007 and 2 respectively. The \$13 million increase in 2007 was due primarily to capital expenditures supporting AS.

Amortization of acquisition-related intangible assets was 9% of total revenue for each of the years ended December 31, 2007 2006. Amortization of acquisition-related intangible assets increased \$39 million in 2007 due primarily to the impact of recen acquisitions made by the Company and an impairment charge of \$10 million.

Interest expense was \$645 million for the year ended December 31, 2007 compared to \$656 million for the year ended December 31, 2006. The decrease is primarily due to a lower effective interest cost due to the refinancing of our term loan fact in February 2007, partially offset by the additional borrowing on our Term loan prior to the early retirement of the senior float rate notes and an increase in average borrowings under the revolving credit facility.

Other expense increased \$39 million in the year ended December 31, 2007 due primarily to \$28 million of expense associated with the early retirement of the \$400 million of senior floating rate notes due 2013, of which \$19 million represented the retirement premium paid to noteholders.

We believe that our overall effective income tax rate is typically between 38% and 40%. The effective income tax rates for 20 and 2006 were 5% and 15%, respectively. The lower rates in 2007 and 2006 reflect the combination of our overall net loss in each year, limitations on our ability to utilize foreign tax credits resulting from the large amount of interest expense and, in 20 changes in enacted tax rates in certain state and foreign jurisdictions. The result is a lower income tax benefit in each of 2007 2006 than would otherwise be expected.

Liquidity And Capital Resources

At June 30, 2009, cash and equivalents were \$508 million, a decrease of \$467 million from December 31, 2008. Cash flow provided by operations was \$163 million in the six months ended June 30, 2009 compared to \$247 million in the six months ended June 30, 2008. The decrease in cash flow from operations is due primarily to a \$67 million increase in working capital requirements including deferred revenue and higher requirements for the clearing broker/dealer.

53

Net cash used in investing activities was \$176 million in the six months ended June 30, 2009, comprised of cash paid for propand equipment and other assets, one business acquired in each of our FS and PS segments and payment of a contingent purchability.

Net cash used in financing activities was \$459 million for the six months ended June 30, 2009, primarily related to repayment maturity of the \$250 million senior secured notes and repayment of \$425 million of borrowings under the revolving credit facility, partially offset by cash received from the new receivables facility (net of associated fees). At June 30, 2009, there was \$75 million outstanding under the revolving credit facility and \$317 million outstanding under the receivables facility. In early 2009, we entered into interest rate swap agreements, with an aggregate notional amount of \$1.2 billion, which expire in Febru 2012 under which we pay fixed interest payments (at 1.78%) for the term of the swaps and, in turn, receive variable interest payments based on LIBOR.

businesses could total \$58 million, of which \$46 million could be due in the next 12 months. We also have outstanding letters credit and bid bonds that total approximately \$27 million.

At June 30, 2009, contingent purchase price obligations that depend upon the operating performance of certain acquired

At June 30, 2009, we have outstanding \$8.49 billion in aggregate indebtedness, with additional borrowing capacity of \$734 million under the revolving credit facility (after giving effect to outstanding letters of credit).

On June 9, 2009, SunGard entered into an amendment to the Credit Agreement (Amended Credit Agreement) which, amore other things, (a) extends the maturity date of \$2.5 billion of its dollar-denominated term loans, £40 million of pound sterling-denominated term loans, and 120 million of Euro-denominated term loans from February 2014 to February 28, 2016 (b) reduces existing revolving credit commitments to \$829 million and extends the termination date of \$580 million of revolv credit commitments to May 11, 2013, and (c) amends certain other provisions of the Credit Agreement, including provisions relating to negative covenants and financial covenants.

As of June 30, 2009, the interest rate for the extended term loans, after adjusting for interest rate swaps, and revolving credit loans was 4.41% and 5.5%, respectively, and for the unextended term loans, after adjusting for interest rate swaps, and revolv credit loans was 2.51% and 4.25%, respectively. The commitment fee on the daily unused portion of the 2013 and 2011 revol credit commitments was 0.75% and 0.50%, respectively. The amended credit agreement increased our interest payments obligation in the table below by \$44 million in 2009, \$87 million for 2010-2011, \$86 million for 2012-2013 and \$289 million thereafter.

We expect our cash flows from operations, combined with availability under the revolving credit facility and receivables facil to provide sufficient liquidity to fund our current obligations, projected working capital requirements and capital spending for period that includes the next 12 months.

At December 31, 2008, cash and cash equivalents were \$975 million, an increase of \$548 million from December 31, 2007, wavailability under our revolving credit facility decreased \$458 million to \$483 million. Early in 2009, \$250 million was used to repay the senior notes.

Cash flow from operations was \$385 million in the year ended December 31, 2008 compared to cash flow from operations of \$701 million in the year ended December 31, 2007. The decrease in cash flow from operations is due primarily to increased working capital needed to replace the liquidity provided by the terminated accounts receivable securitization program, higher income tax payments and higher incentive compensation payments, partially offset by lower interest payments and improvem in earnings before interest, taxes, depreciation and amortization and goodwill impairment (EBITDA as defined and calculated below).

Net cash used in investing activities was \$1.1 billion in 2008 and \$564 million in 2007. We spent \$721 million for six acquisitions during 2008, including \$546 million for the acquisition of GL TRADE in our FS business, and \$265 million for eleven acquisitions during 2007, including \$161 million for the acquisition of Vericenter in our AS business. Capital expendit were \$392 million in 2008 and \$307 million in 2007.

Net cash provided by financing activities was \$1.3 billion in 2008, the proceeds of which were used to fund the acquisition of TRADE, replace the liquidity provided by the terminated accounts receivable securitization facility and repay \$250 million of senior notes due in January 2009.

In September 2008 the Credit Agreement was amended to increase the amount of our term loan borrowings under the Credit Agreement by \$500 million (Incremental Term Loan), and we issued at a \$6 million discount \$500 million aggregate princ amount of 10.625% Senior Notes due 2015.

We use interest rate swap agreements to manage the amount of our floating rate debt in order to reduce our exposure to variable rate interest payments associated with the senior secured credit facilities. We pay a stream of fixed interest payments for the to of the swap, and in turn, receive variable interest payments based on LIBOR (2.39% at December 31, 2008). The net receipt of payment from the interest rate swap agreements is included in interest expense. A summary of our interest rate swaps at December 31, 2008 follows:

	Notional							
		A	mount	Interest rate	Interest rate			
Inception	Maturity	(in	millions)	paid	received			
November 2005	February 2009	\$	800	4.85%	LIBOR			
February 2006	February 2011	\$	800	5.00%	LIBOR			
January 2008	February 2011	\$	750	3.17%	LIBOR			
February 2008	February 2010	\$	750	2.71%	LIBOR			
Total/Weighted average interest rate		\$	3,100	3.96%				

In early 2009, we entered into 3-year interest rate swaps that expire in February 2012 for an aggregate notional amount of \$1.5 billion under which we pay fixed interest payments (at 1.78%) for the term of the swaps, and in turn, receive variable interest payments based on LIBOR.

At December 31, 2008, contingent purchase price obligations that depend upon the operating performance of certain acquired businesses could total \$71 million, \$20 million of which could be due in the next 12 months. We also have outstanding letters credit and bid bonds that total approximately \$25 million.

We are highly leveraged and our debt service requirements are significant. At December 31, 2008, our total indebtedness was \$8.87 billion and we had \$483 million available for borrowing under the revolving credit facility, after giving effect to certain outstanding letters of credit. In addition, at December 31, 2008, we had outstanding \$77 million under our \$450 million off-balance sheet accounts receivable securitization program that was terminated in December 2008. We funded the \$77 million outstanding during January 2009 with collections of receivables previously sold into the facility and repaid the \$250 million senior notes that matured in January 2009.

At December 31, 2008, our contractual obligations follow (in millions):

	Total	2009	2010 2011	2012 2013	20 and <i>i</i>
Short-term and long-term debt ⁽¹⁾	\$ 8,901	\$ 322	\$ 625	\$ 5,730	\$ 2

- (2) Interest payments consist of interest on both fixed-rate and variable-rate debt. Variable-rate debt consists primarily of the unhedged portion of the US\$ term loan facility (\$849 million at 3.58% at December 31, 2008), the euro denominated portion of the term loan facility (\$181 million at 4.71% at December 31, 2008) and pound sterling denominated portion of the telloan facility (\$119 million at 4.52% at December 31, 2008), the revolving credit facility (\$500 million at 3.1%) and the Incremental Term Loan (\$499 million at 6.75%). See Note 5 to Notes to Consolidated Financial Statements. The swap agreements put in place in early 2009 will increase the amount of interest payments in the table above by \$2 million in 2 and \$5 million in 2010-2011.
- (3) Purchase obligations include our estimate of the minimum outstanding obligations under noncancelable commitments to purchase goods or services.

We expect our cash on hand, cash flows from operations and availability under our revolving credit facility to provide sufficient liquidity to fund our current obligations, projected working capital requirements and capital spending for a period that include the next 12 months.

Depending on market conditions, the Company, its Sponsors and their affiliates, may from time to time repurchase debt secur issued by the Company, in privately negotiated or open market transactions, by tender offer or otherwise.

Receivables Facility

Overview

On March 27, 2009, SunGard AR Financing LLC, a newly-formed wholly-owned, bankruptcy-remote, special purpose finance subsidiary (Financing) of SunGard entered into a syndicated receivables facility with each of the financial institutions signs thereto from time to time, as the Lenders and General Electric Capital Corporation, as a Lender, as the Swing Line Lender and administrative agent (the Receivables Facility). The initial maximum commitment under the Receivables Facility is \$250 m of which approximately \$107 million is on a revolving basis and the balance is a term loan. The Receivables Facility has a term of three years.

Subject to obtaining the commitment of additional lenders, and the satisfaction of other customary conditions, the Receivable Facility may be increased up to a maximum amount of \$500 million.

In May 2009, the Company increased the size of its receivables facility by \$66.5 million.

The full amount of the initial availability under the Receivables Facility was borrowed as of June 30, 2009. Subsidiaries of SunGard that participate in the Receivables Facility (Sellers) transfer their receivables as a true sale to Financing pursuant Receivables Sale Agreement dated as of March 27, 2009 (the Receivables Sale Agreement) and without recourse except for recourse for breaches of customary representations and warranties related to the receivables. Additional subsidiaries of SunGarmay become parties to the Receivables Facility, subject to the satisfaction of specified conditions. Upon becoming parties, receivables originated by these subsidiaries will be included in the receivables balance eligible for funding under the Receivables Facility and will be included in the calculation of available funding thereunder.

Availability of funding under the Receivables Facility depends primarily upon the outstanding trade accounts receivable balar of the Sellers. Aggregate availability is determined by using a formula that reduces the gross receivables balance by factors that take into account historical default and dilution rates, excessive concentrations and average days outstanding and the costs of facility.

Interest Rates and Fees

Under the Receivables Facility, Financing is generally required to pay interest on the amount of each advance at the one mont LIBOR rate, adjusted for statutory reserves, plus 4.50% per annum. Financing is required to pay a fee on the unused portion of the Receivables Facility of 1.00% per annum, payable monthly in

56

arrears. In addition, SunGard, acting as the initial receivables servicer, services, administers and collects receivables transferred pursuant to the Receivables Facility. Under the Receivables Facility, SunGard receives a monthly servicing fee of 1.00% per annum of the daily average outstanding balance of the receivables under such facility, payable monthly in arrears by Financin

The Receivables Facility may be terminated for material breaches of representations and warranties, bankruptcies of any Sellet the collection agent or Financing, a default by any Seller or Financing in the performance of any payment required to be made under the transaction documents, a merger or similar transaction involving Financing, cross acceleration under our other facility a change of control affecting SunGard, and a failure to maintain a minimum fixed charge coverage ratio, among other reasons

Guaranty and Security

SunGard unconditionally guarantees the performance of the Sellers obligations under the Receivables Sale Agreement. All obligations under the Receivables Facility are secured by the receivables purchased by Financing under the Receivables Sale Agreement.

The Transaction

As a result of the Transaction (August 11, 2005), we are highly leveraged and our debt service requirements are significant. Below is a summary of our debt instruments.

Senior Secured Credit Facilities

Borrowings under the senior secured credit facilities bear interest at a rate equal to an applicable margin plus, at our option, ei (a) a base rate that is the higher of (1) the prime rate of JPMorgan Chase Bank, N.A. and (2) the federal funds rate plus 1/2 of or (b) LIBOR based on the costs of funds for deposits in the currency of such borrowing for either 30, 60, 90 or 180 days. The applicable margin for borrowings under the revolving credit facility and the term loan facility may change subject to attaining certain leverage ratios. In addition to paying interest on outstanding principal under the senior secured credit facilities, we pay commitment fee to the lenders under the revolving credit facility in respect of the unutilized commitments.

All obligations under the senior secured credit facilities are fully and unconditionally guaranteed by SunGard Holdco LLC an substantially all domestic, 100% wholly owned subsidiaries.

We are required to repay installments on the loans under the term loan facilities in quarterly principal amounts of 0.25% of the funded total principal amount through March 2013, with the remaining amount payable in May 2013, provided, however, that such date will automatically become February 2014 if all the Senior Notes due 2013 are extended, renewed or refinanced on oprior to May 15, 2013.

The senior secured credit facilities also require us to prepay outstanding term loans, subject to certain exceptions, with excess cash flow and proceeds from certain asset sales, casualty and condemnation events, other borrowings and certain financings u our accounts receivable securitization program (terminated in December 2008). Any required payments would be applied pro to the term loan lenders and to installments of the term loan facilities in direct order of maturity.

Principal amounts outstanding under the revolving credit facility are due and payable in full at maturity in August 2011. As o June 30, 2009, we have \$734 million available under the revolving credit facility, after giving effect to certain letters of credit

The second amendment to the Credit Agreement in September 2008 changed certain terms applicable to the Incremental Term Loan. Borrowings can be at either a Base Rate or a Eurocurrency Rate. Base Rate borrowings reset daily and bear interest at a minimum of 4.0% plus a spread of 2.75%. Eurocurrency borrowings can be made for periods of 30, 60, 90 or 180 days and be interest at a minimum of 3.0% plus a spread of 3.75%. The interest rate at June 30, 2009 was 6.75%.

57

The senior secured credit facilities contain a number of covenants that, among other things, restrict, subject to certain exceptiour (and most or all of our subsidiaries) ability to incur additional debt or issue preferred stock, pay dividends and distribution or repurchase capital stock, create liens on assets, enter into sale and leaseback transactions, repay subordinated indebted make investments, loans or advances, make capital expenditures, engage in certain transactions with affiliates, amend certain material agreements, change our lines of business, sell assets and engage in mergers or consolidations. In addition, under the senior secured credit facilities, we are required to satisfy certain total leverage and interest coverage ratios. We were in compliance with all covenants at June 30, 2009.

2009 Amendment to the Senior Secured Credit Agreement

On June 9, 2009, we entered into an amendment to the Credit Agreement (Amended Credit Agreement) which, among other things, (a) extends the maturity date of \$2.5 billion of its dollar-denominated term loans, £40 million of pound sterling-denominated term loans, and 120 million of euro-denominated term loans to February 28, 2016, (b) reduces existing revolving credit commitments to \$829 million and extends the termination date of \$580 million of revolving credit commitment to May 11, 2013, and (c) amends certain other provisions of the Credit Agreement, including provisions relating to negative covenants and financial covenants.

Interest rate spreads with respect to the extended term loans and interest rate spreads (and letter of credit fees) with respect to 2013 revolving credit facility will be the applicable rate as set forth in the Amended Credit Agreement and may change subject attaining certain leverage ratios. All other interest rate spreads and fees remain unchanged.

Based on the leverage ratio for the period ended June 30, 2009, the current interest spread for extended LIBOR based loans is 3.625% and for 2013 revolving credit loans is 3.25%. The commitment fee on the daily unused portion of the 2013 revolving credit commitments is 0.75%.

Senior Notes due 2009 and 2014

On January 15, 2004, we issued \$500 million of senior unsecured notes, of which \$250 million 3.75% notes were due and pai full in January 2009 and \$250 million are 4.875% notes due 2014, which are subject to certain standard covenants. As a result the Transaction, these senior notes became collateralized on an equal and ratable basis with loans under the senior secured crefacilities and are guaranteed by all subsidiaries that guarantee the senior notes due 2013 and 2015 and senior subordinated not due 2015. The senior notes due 2014 are recorded at \$232 million as of June 30, 2009, reflecting the remaining unamortized discount caused by the Transaction. The \$18 million discount will be amortized and included in interest expense.

Senior Notes due 2013 and 2015 and Senior Subordinated Notes due 2015

The senior notes due 2013 and 2015 are senior unsecured obligations that rank senior in right of payment to future debt and of obligations that are, by their terms, expressly subordinated in right of payment to the senior notes, including the senior subordinated notes. The senior notes (i) rank equally in right of payment to all existing and future senior debt and other obligations that are not, by their terms, expressly subordinated in right of payment to the senior notes, (ii) are effectively subordinated in right of payment to all existing and future secured debt to the extent of the value of the assets securing such deand (iii) are structurally subordinated to all obligations of each subsidiary that is not a guarantor of the senior notes. All obligations under the senior notes are fully and unconditionally guaranteed, subject to certain exceptions, by substantially all domestic, 100% wholly owned subsidiaries of the Company.

The senior subordinated notes due 2015 are unsecured senior subordinated obligations that are subordinated in right of paymen to the existing and future senior debt, including the senior secured credit facilities, the senior notes due 2014 and the senior notes due 2013 and 2015. The senior subordinated notes (i) rank equally in right of payment to all future senior subordinated debt, (ii) are effectively subordinated in right of payment to all existing and future secured debt to the extent of the value of the assessecuring such debt, (iii) are structurally

58

subordinated to all obligations of each subsidiary that is not a guarantor of the senior subordinated notes, and (iv) rank senior right of payment to all future debt and other obligations that are, by their terms, expressly subordinated in right of payment to senior subordinated notes.

The senior notes due 2013 and 2015 and senior subordinated notes due 2015 are redeemable in whole or in part, at our option any time at varying redemption prices that generally include premiums, which are defined in the applicable indentures. In addition, upon a change of control, we are required to make an offer to redeem all of the senior notes and senior subordinated notes at a redemption price equal to 101% of the aggregate principal amount thereof plus accrued and unpaid interest.

The indentures governing the senior notes due 2013 and 2015 and senior subordinated notes due 2015 contain a number of covenants that restrict, subject to certain exceptions, our ability and the ability of our restricted subsidiaries to incur additiona indebtedness or issue certain preferred shares, pay dividends on or make other distributions in respect of its capital stock or mother restricted payments, make certain investments, enter into certain types of transactions with affiliates, create liens securing certain debt without securing the senior notes due 2013 and 2015 or senior subordinated notes due 2015, as applicable, sell certain assets, consolidate, merge, sell or otherwise dispose of all or substantially all of our assets and designate our subsidiar as unrestricted subsidiaries.

The senior notes due 2015 contain registration rights by which the Company has agreed to use its reasonable efforts to registe with the U.S. Securities & Exchange Commission notes having substantially identical terms. The Company will use its reasonable best efforts to cause the exchange offer to be completed or, if required, to have one or more shelf registration statements declared effective, within 360 days after the issue date of the senior notes due 2015.

If the Company fails to meet this target (a registration default) with respect to the senior notes due 2015, the annual interest on the senior notes due 2015 will increase by 0.25% for each subsequent 90-day period during which the registration default continues, up to a maximum additional interest rate of 1.0% per year over the applicable interest rate. If the registration default corrected or, if it is not corrected, upon the two year anniversary of the issue date of the senior notes due 2015, the applicable interest rate on such senior notes due 2015 will revert to the original level.

Off-Balance Sheet Debt Accounts Receivable Securitization Program

In December 2008, we terminated our accounts receivable securitization program. Under the accounts receivable facility, elig receivables were sold to third-party conduits through a wholly owned, bankruptcy remote special purpose entity that is not consolidated for financial reporting purposes. We serviced the receivables and charged a monthly servicing fee at market rate The third-party conduits were sponsored by certain lenders under our senior secured credit facilities.

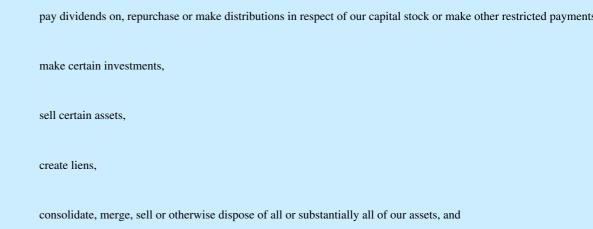

Sales of receivables under the facility qualified as sales under applicable accounting pronouncements. Accordingly, receivable totaling \$363 million net of applicable allowances, and the corresponding borrowings, totaling \$77 million, are excluded from consolidated balance sheet as of December 31, 2008. Our retained interest in these receivables is \$285 million as of December 2008. Expenses associated with the receivables facilities totaled \$25 million for 2008, which related to the loss on sale of the receivables and the discount on retained interest, and is recorded in other income (expense) in our consolidated statements of operations. The loss on sale of receivables was determined at the date of transfer based upon the fair value of the assets sold at the interests retained based on the present value of expected cash flows.

Covenant Compliance

Our senior secured credit facilities and the indentures governing our senior notes due 2013 and 2015 and our senior subordina notes due 2015 contain various covenants that limit our ability to engage in specified types of transactions. These covenants lour ability to, among other things:

incur additional indebtedness or issue certain preferred shares,

59

enter into certain transactions with our affiliates.

In addition, pursuant to the Principal Investor Agreement by and among our Holding Companies and the Sponsors, we are required to obtain approval from certain Sponsors prior to the declaration or payment of any dividend by us or any of our subsidiaries (other than dividends payable to us or any of our wholly owned subsidiaries).

Under the senior secured credit facilities, we are required to satisfy and maintain specified financial ratios and other financial condition tests. As of June 30, 2009, we are in compliance with the financial and nonfinancial covenants. While we believe the we will remain in compliance, our continued ability to meet those financial ratios and tests can be affected by events beyond control, and there is no assurance that we will meet those ratios and tests. A breach of any of these covenants could result in a default under the senior secured credit facilities. Upon the occurrence of an event of default under the senior secured credit facilities, the lenders could elect to declare all amounts outstanding under the senior secured credit facilities to be immediately due and payable and terminate all commitments to extend further credit.

Adjusted earnings before interest, taxes, depreciation and amortization and goodwill impairment (EBITDA) is a non-GAA measure used to determine our compliance with certain covenants contained in the indentures governing the senior notes due 2013 and 2015 and senior subordinated notes due 2015 and in our senior secured credit facilities. Adjusted EBITDA is define EBITDA further adjusted to exclude unusual items and other adjustments permitted in calculating covenant compliance under indentures and our senior secured credit facilities. We believe that including supplementary information concerning Adjusted EBITDA is appropriate to provide additional information to investors to demonstrate compliance with our financing covenant

The breach of covenants in our senior secured credit facilities that are tied to ratios based on Adjusted EBITDA could result i default and the lenders could elect to declare all amounts borrowed due and payable. Any such acceleration would also result default under our indentures. Additionally, under our debt agreements, our ability to engage in activities such as incurring additional indebtedness, making investments and paying dividends is also tied to ratios based on Adjusted EBITDA.

Adjusted EBITDA does not represent net income (loss) or cash flow from operations as those terms are defined by GAAP and does not necessarily indicate whether cash flows will be sufficient to fund cash needs. While Adjusted EBITDA and similar measures are frequently used as measures of operations and the ability to meet debt service requirements, these terms are not necessarily comparable to other similarly titled captions of other companies due to the potential inconsistencies in the method calculation. Adjusted EBITDA does not reflect the impact of earnings or charges resulting from matters that we may consider to be indicative of our ongoing operations. In particular, the definition of Adjusted EBITDA in the indentures allows us to add back certain non-cash, extraordinary, unusual or non-recurring charges that are deducted in calculating net income (loss). However, these are expenses that may recur, vary greatly and are difficult to predict. Further, our debt instruments require that Adjusted EBITDA be calculated for the most recent four fiscal quarters. As a result, the measure can be disproportionately affected by a particularly strong or weak quarter. Further, it may not be comparable to the measure for any subsequent four-quarter period or any complete fiscal year.

60

The following is a reconciliation of net loss, which is a GAAP measure of our operating results, to Adjusted EBITDA as defin in our debt agreements. The terms and related calculations are defined in the indentures.

Our covenant requirements and actual ratios for the twelve months ended June 30, 2009 are as follows:

	Covenant Requirements	Actual Rati
Senior secured credit facilities ⁽¹⁾		
Minimum Adjusted EBITDA to consolidated interest expense ratio	1.65x	2.
Maximum total debt to Adjusted EBITDA	6.75x	5.
Senior Notes due 2013 and Senior Subordinated Notes due 2015 ⁽²⁾ Minimum Adjusted EBITDA to fixed charges ratio required to incur additional		
debt pursuant to ratio provisions	2.00x	2.

- (1) Our senior secured credit facilities require us to maintain an Adjusted EBITDA to consolidated interest expense ratio at a minimum of 1.65x for the four-quarter period ended December 31, 2008 and increasing over time to 1.70x by the end of 2009, to 1.80x by the end of 2010 and 2.20x by the end of 2013. Consolidated interest expense is defined in the senior secured credit facilities as consolidated cash interest expense less cash interest income further adjusted for certain non-cast or nonrecurring interest expense and the elimination of interest expense and fees associated with our receivables facility. Beginning with the four-quarter period ending December 31, 2008, we are required to maintain a consolidated total debt Adjusted EBITDA ratio of 6.75x and decreasing over time to 6.25x by the end of 2009 and to 4.75x by the end of 2013. Consolidated total debt is defined in the senior secured credit facilities as total debt less certain indebtedness and further adjusted for cash and cash equivalents on our balance sheet in excess of \$50 million. Failure to satisfy these ratio requirements would constitute a default under the senior secured credit facilities. If our lenders failed to waive any such default, our repayment obligations under the senior secured credit facilities could be accelerated, which would also constitute a default under our indentures.
- (2) Our ability to incur additional debt and make certain restricted payments under our indentures, subject to specified exceptions, is tied to an Adjusted EBITDA to fixed charges ratio of at least 2.0x, except that we may incur certain debt a make certain restricted payments and certain permitted investments without regard to the ratio, such as our ability to incur up to an aggregate principal amount of \$5.75 billion under credit facilities (inclusive of amounts outstanding under our senior credit facilities from time to time; as of June 30, 2009, we had \$4.74 billion outstanding under our term loan facil and available commitments of \$734 million under our revolving credit facility), to acquire persons engaged in a similar business that become restricted subsidiaries and to make other investments equal to 6% of our consolidated assets. Fixed charges is defined in the indentures governing the Senior Notes due 2013 and 2015 and the Senior Subordinated Notes due 2015 as consolidated interest expense less interest income, adjusted for acquisitions, and further adjusted for non-cash interest and the elimination of interest expense and fees associated with our accounts receivable securitization program.

Effect of Recent Accounting Pronouncements:

In April 2009, the Financial Accounting Standards Board issued FSP FAS 107-1, *Interim Disclosures about Fair Value of Financial Instruments* (FSP 107-1). FSP 107-1 increase the frequency of fair value disclosures from annual only to quarter an effort to provide financial statement users with more timely and transparent information about the effects of current market conditions on financial instruments. FSP 107-1 is effective as of April 1, 2009. FSP 107-1 did not have a material impact on the consolidated financial statements.

In December 2007, the FASB issued Statement of Financial Accounting Standards (SFAS) No. 141R, Business Combinati (SFAS 141R), which changes accounting principles for business acquisitions. SFAS No. 141R requires the recognition of a assets acquired and liabilities assumed in the transaction based on the acquisition-date fair value. Certain provisions of this standard will, among other things, impact the determination

62

of consideration paid or payable in a business combination and change accounting practices for transaction costs, acquired contingencies, acquisition-related restructuring costs, in-process research and development, indemnification assets, and tax benefits. SFAS No. 141R is effective for business combinations and adjustments to all acquisition-related deferred tax asset a liability balances occurring after December 31, 2008. This standard has not had but could in the future have a significant impron our consolidated financial statements.

In December 2007, the FASB also issued SFAS No. 160, Noncontrolling Interests in Consolidated Financial Statements, an amendment of ARB No. 51 (SFAS 160). The objective of SFAS 160 is to improve the relevance, comparability and transp of the financial information that a reporting entity provides in its consolidated financial statements by establishing accounting reporting standards for the noncontrolling interest in a subsidiary and for the deconsolidation of a subsidiary. SFAS 160 is effective January 1, 2009. SFAS 160 did not have a material impact on the consolidated financial statements.

In March 2008, the FASB issued SFAS No. 161, Disclosures about Derivative Instruments and Hedging Activities (SFAS 1 SFAS 161 is intended to help investors better understand how derivative instruments and hedging activities affect an entity s financial position, financial performance and cash flows through enhanced disclosure requirements. SFAS 161 is effective as January 1, 2009. SFAS 161 did not have a material impact on the consolidated financial statements.

In April 2008, the FASB issued FASB Staff Position (FSP) No. FAS 142-3, Determination of the Useful Life of Intangible Assets. FSP 142-3 amends the factors that should be considered in developing renewal or extension assumptions used to determine the useful life of a recognized intangible asset under SFAS No. 142, Goodwill and Other Intangible Assets (SFAS 142). FSP 142-3 is intended to improve the consistency between the useful life of an intangible asset determined under SFAS and the period of expected cash flows used to measure the fair value of the asset under SFAS 141R and other GAAP. FSP 142-1 is effective as of January 1, 2009. FSP 142-3 did not have a material impact on the consolidated financial statements.

In November 2008, the Emerging Issues Task Force (EITF) issued Issue No. 08-7, Accounting for Defensive Intangible A (EITF 08-7). EITF 08-7 applies to all acquired intangible assets in which the acquirer does not intend to actively use the as intends to hold (lock up) the asset to prevent its competitors from obtaining access to the asset (a defensive asset), assets that acquirer will never actually use, as well as assets that will be used by the acquirer during a transition period when the intentio the acquirer is to discontinue the use of those assets. EITF 08-7 is effective as of January 1, 2009. EITF 08-7 did not have a material impact on the consolidated financial statements.

Quantitative and Qualitative Disclosures about Market Risk:

We do not use derivative financial instruments for trading or speculative purposes. We have invested our available cash in short-term, highly liquid financial instruments, with a substantial portion having initial maturities of three months or less. Wh necessary, we have borrowed to fund acquisitions.

At June 30, 2009, we had total debt of \$8.49 billion, including \$5.13 billion of variable rate debt. We have entered into interest rate swap agreements which fixed the interest rates for \$3.5 billion of our variable rate debt. Swap agreements with a notional value of \$800 million effectively fix our interest rates at 5.00% and expire in February 2011. Swap agreements expiring in February 2010 and 2011 each have a notional value of \$750 million and, effectively, fix our interest rates at 2.71% and 3.17% respectively. Swap agreements expiring in February 2012 have a notional value of \$1.2 billion and effectively fix our interest rates at 1.78%. Our remaining variable rate debt of \$1.63 billion is subject to changes in underlying interest rates, and, accordingly, our interest payments will fluctuate. During the period when all of our interest rate swap agreements are effective 1% change in interest rates would result in a change in interest of approximately \$16 million per year. Upon the expiration of each interest rate swap agreement in February 2010, February 2011 and February 2012, a 1%

63

change in interest rates would result in a change in interest of approximately \$24 million, \$39 million and \$51 million per year respectively.

At December 31, 2008, we had total debt of \$8.87 billion, including \$5.25 billion of variable rate debt. We entered into four interest rate swap agreements which fixed the interest rates for \$3.1 billion of our variable rate debt. Our four swap agreement each have notional values of \$800 million or \$750 million (see table above), and effectively fix our interest rates at a weighted average rate of 3.96%, and expire in February 2009, 2010 or 2011. In early 2009, we entered into additional three-year interest rate swap agreements for a notional amount of \$1.2 billion, under which we are required to pay a stream of fixed rate interest payments of 1.78%, and in turn, receive variable interest payments based on LIBOR. After the early 2009 activity, our remain variable rate debt of \$1.75 billion is subject to changes in underlying interest rates and our interest payments will also change result of market changes. During the period when our interest rate swap agreements are effective, a 1% change in interest rate would result in a change in interest of approximately \$17 million per year. Upon the expiration of interest rate swap agreement in February 2010, 2011 and 2012, a 1% change in interest rates would result in a change in interest of approximately \$25 mill \$40 million and \$52 million per year, respectively. See Note 5 to Consolidated Financial Statements.

In addition, at December 31, 2008, one of our U.K. subsidiaries, whose functional currency is the pound sterling, has \$181 million of debt which is denominated in euros. A 10% change in the euro-pound sterling exchange rate would result in a chargor credit in the statement of operations of approximately \$19 million.

During 2008, approximately 29% of our revenue was from customers outside the United States with approximately 76% of the revenue coming from customers located in the United Kingdom and Continental Europe. Only a portion of the revenue from customers outside the United States is denominated in other currencies, the majority being pounds sterling and euros. Revenue and expenses of our foreign operations are generally denominated in their respective local currencies. We continue to monitor exposure to currency exchange rates.

BUSINESS

Our Company

We are one of the world s leading software and IT services companies. We provide software and processing solutions to institutions throughout the financial services industry, higher education, and the public sector. We also provide disaster recovervices, managed services, information availability consulting services and business continuity management software. We operate our business in four segments:

Financial Systems (FS) serves financial services companies, corporate and government treasury departments and energy companies;

Higher Education (HE) serves higher education institutions;

Public Sector (PS) serves state and local governments, public safety and justice agencies, and not-for-profit organizations

Availability Services (AS) serves IT-dependent companies across virtually all industries.

We serve more than 25,000 customers in more than 70 countries. We seek to establish long-term customer relationships by negotiating multi-year contracts and by emphasizing customer support and product quality and integration. We believe that w are one of the most efficient operators of mission-critical IT solutions as a result of the economies of scale we derive from ser multiple customers on shared platforms. Our revenue is highly diversified by customer and product, with no single customer accounting for more than 8% of our total revenue during any of the past three fiscal years. We estimate that approximately 90 of our revenue for the past three fiscal years was recurring in nature.

We were acquired on August 11, 2005 by a consortium of private equity investment funds associated with Bain Capital Partner. The Blackstone Group, Goldman Sachs & Co., Kohlberg Kravis Roberts & Co., Providence Equity Partners, Silver Lake and TPG (the Transaction).

Our Strengths

Leading franchise in attractive industries. Built over many years, our business has leading positions and strong customer relationships in industries with attractive growth dynamics.

Leading industry positions. We believe that the majority of businesses within our FS segment are leaders in the sectors in which they participate within the highly fragmented global market for financial services IT software and services. We believe that HE and PS are both leading providers of software and services to higher education institutions and the public sector, respectively. AS is the pioneer and leading provider in the availability services industry.

Attractive industry dynamics. While the current economic crisis has presented some challenges in the near term, believe that, over the long term, the sectors in which we participate will continue to have favorable growth dynamic. We believe that the sectors in which we participate have favorable growth dynamics. We believe that FS will beneft from several key industry dynamics: the shift from internal to external IT spending, the shift from infrastructure to application software spending, and the general increase in IT spending associated with rising compliance and regulatory requirements and real-time information needs. We anticipate that HE and PS will benefit from favorable growth dynamics in higher education and public justice and safety IT spending. We believe that AS will continue to benefit from favorable organic growth in the small and medium business sector. We believe that our strong relationships with our customers in the relatively fragmented software and processing sectors that we serve and our extensive experience and the significant total capital that we have invested in AS help us to maintain leading position. We believe that these factors provide us with competitive advantages and enhance our growth potential.

65

Highly attractive business model. Our portfolio of businesses has substantial recurring revenue, a diversified customer base significant operating cash flow generation.

Extensive portfolio of businesses with substantial recurring revenue. With a large portfolio of services and prodin each of our four business segments, we have a diversified and stable business. We estimate that approximately 90 of our revenue for the past three fiscal years was recurring in nature. Because our FS customers generally pay us monthly fees that are based on metrics such as number of accounts, trades or transactions, users or number of hours service, we believe that our FS revenue is more insulated from trading and transaction volumes than the financial services industry at large. Our portfolio of businesses and the largely recurring nature of our revenue across all four our segments have reduced volatility in our revenue and income from operations.

Diversified and stable customer base. Our base of more than 25,000 customers includes many of the world s lar financial services firms, a variety of other financial services firms, corporate and government treasury departments, energy companies, higher education institutions, school districts, local governments and not-for-profit organization. Our AS business serves customers across virtually all industries. Business Strategy

We are focused on expanding our position not only as a leading provider of integrated software and processing solutions, but as the provider of choice for a wide range of availability services for IT-dependent companies. Our operating and financial strategy emphasizes fiscal discipline, profitable revenue growth and significant operating cash flow generation. In pursuit of to objectives, we have implemented the following strategies:

Expand our industry-leading franchise. We are constantly enhancing our product and service offerings across our portfolio businesses, further building and leveraging our customer relationships, and looking to acquire complementary businesses at attractive valuations.

Enhance our product and service offerings. We continually support, upgrade and enhance our systems to incorporate new technology and meet the needs of our customers for increased operational efficiency and resilience. Our strong base of recurring revenue allows us to consistently reinvest in our products and services. We continue to introduce innovative products and services in all four of our business segments. We believe that our focus on product enhancement and innovation will help us to increase our penetration of existing and new customers.

Extend our strong customer relationships. We focus on developing trusted, well-managed, long-term relationship with our customers. We look to maximize cross-selling opportunities, increase our share of our customers total IT spending and maintain a high level of customer satisfaction. Our global account management program allows us to present a single face to our larger FS customers as well as better target potential cross-selling opportunities.

Acquire and integrate complementary businesses. We seek opportunistically to acquire, at attractive valuations, businesses that broaden our existing product and service offerings, expand our customer base and strengthen our leadership positions, especially within the fragmented FS, HE and PS markets. Before committing to an acquisition, we devote significant resources to due diligence and to developing a post-acquisition integration plan, including the identification and quantification of potential cost savings and synergies. Our ongoing acquisition program has contributed significantly to our long-term growth and success.

Optimize our attractive business model. We continue to focus on maintaining our attractive business model and, in particul increasing our recurring revenue base and implementing incremental operational improvements.

Increase our recurring revenue base. We strive to generate a high level of recurring revenue and stable cash flow from operations. We prefer to charge customers monthly subscription fees under multi-year contracts, and we contito prefer such contracts because they offer high levels of revenue stability and visibility. Moreover, we believe that high quality services and customized solutions help increase the level of integration and efficiency for our custome and reduce customer defections to other vendors or to in-house solutions.

Implement incremental operational improvements. We have identified opportunities to further increase revenue reduce costs and improve cash flow from operations. These include the global account management program within FS, which stimulates cross-selling opportunities and account penetration for our largest customers; centralization of certain product management functions and expansion of certain software development capacity in lower-cost region the selective integration of certain FS, HE and PS business units and back-office operations; and the increased focus generating revenue from ancillary services such as customer training and education as well as consulting.

Enhance our performance-based culture. We have an experienced management team that is focused on enhancing our performance-based culture. We continue to evaluate and implement programs to improve our current management structure through competitive compensation plans and continue to design effective human resources initiatives to retain key individuals acquired businesses. Our compensation program, consistent with past practices, is highly performance-based.

Financial Systems

FS provides mission-critical software and IT services to institutions in virtually every segment of the financial services indust. The primary purpose of these systems is to automate the many detailed processes associated with trading, managing investme portfolios and accounting for investment assets. These solutions address the processing requirements of a broad range of users within financial services, including asset managers, traders, custodians, compliance officers, treasurers, insurers, risk manager hedge fund managers, plan administrators and clearing agents. In addition, we also provide professional services that focus or application implementation and integration of these solutions and on custom software development. Since our inception, we have consistently enhanced our FS solutions to add new features, process new types of financial instruments, meet new regulatory requirements, incorporate new technologies and meet evolving customer demands.

We deliver many of our FS solutions as an application service provider, primarily from our data centers located in North Ame and Europe that customers access through the Internet or virtual private networks. We also deliver some of our FS solutions b licensing the software to customers for use on their own computers.

68

Our FS businesses are grouped internally into two divisions. The main distinction between the two divisions is that one division serves customers whose business is primarily in North America while the other division serves customers whose business is primarily international. The grouping of FS businesses in two divisions also takes into account the balance of management workload.

Americas Division: The Americas division includes our Brokerage & Clearance, Corporations, Insurance, Trading and Wea Management businesses as well as our US-based Consulting Services. It offers software solutions and strategic IT consulting broad range of users, including insurers and reinsurers, traders, custodians, plan administrators and compliance officers. These solutions help automate and manage the trading and processing requirements of banks, broker/dealers, insurance companies, pension companies, fiduciary trusts and other financial services firms primarily in North America.

International Division: The International division includes our Alternative Investments, Banks, Capital Markets & Investments, Global Trading and Institutional Asset Management businesses, as well as our European-based Consulting Services, also includes our FS international distribution organization which conducts business with customers in China, Japan, and the of Asia-Pacific, Central and Eastern Europe, Africa and the Middle East. The International division offers software solutions strategic IT consulting to a broad range of users including asset managers, fund administrators, traders, compliance officers, market makers, chief financial officers and treasurers. These solutions help connect every stage of the investment lifecycle, from portfolio analysis to regulatory compliance to investor accounting and reporting. They also help mitigate risk and deliver straight-through processing.

Our HE solutions help institutions worldwide strengthen institutional performance by improving constituent servincreasing accountability and enhancing the education experience. Our Unified Digital Campus Solutions unite people, proceand technology in an environment that addresses the needs of higher education institutions and the people they serve with spe components tailored to the unique needs of each institution. HE solutions include administration and enterprise resource plant advancement, IT management and outsourcing, portal and communication tools, performance management, enrollment management, academic performance and strategic planning.

Public Sector

In PS, we provide software and processing solutions designed to meet the specialized needs of local, state, federal and central governments, public safety and justice agencies, public schools, utilities, non-profits, and other public sector institutions. Our systems and services help institutions improve the efficiency of their operations and utilize the Web and wireless technologies serving their constituents. Our PS products support a range of specialized enterprise resource planning and administrative solutions for functions such as accounting, human resources, payroll, utility billing, land management, public safety and crim justice, and grant and project management.

Availability Services

In AS, we help our customers improve the uptime and resilience of their information and computer systems by providing then with cost-effective IT infrastructure and services to help them keep their mission-critical business systems reliable and secure Since we pioneered commercial disaster recovery in the 1970s, we believe that our specialization in information availability solutions, together with our experience, technology expertise, resource management capabilities, vendor neutrality and diverse service offerings, have uniquely positioned us to meet customers—varied needs in an environment where businesses are critic dependent on availability of IT. Over three decades, we have developed a comprehensive portfolio of business continuity and information availability services that extend from always ready standby services to advanced recovery services and always on production and managed services. We also provide business continuity management software and consulting services to help customers design, implement and maintain plans to protect their central business systems. To serve our 10,000 AS customers, utilize 4,000,000 square feet of operations space at over 60 locations in nine countries and a global network of approximately 25,000 miles. Since our inception, we have had a 100% success rate helping our customers recover from unplanned interruption resulting from major disasters including the Gulf Coast hurricanes in 2008, widespread flooding in the U.K. in 2007, hurrican Katrina and Gulf Coast hurricanes in 2005, Florida hurricanes in 2004, the Northeast U.S. blackout in 2003 and the terrorist attacks of September 11, 2001.

We provide the following four categories of services: recovery services, managed services, consulting services and business continuity management software. They can be purchased independently or collectively, depending on the level of information availability required by customers as well as their other business continuity and IT infrastructure services needs. Although recovery services remain our principal revenue generating services, managed services, consulting and business continuity management software increasingly accounts for a greater percentage of our new sales. Because these services are often unique individual customers and utilize a greater proportion of dedicated vs. shared resources, they typically require modestly more capital expenditures and command a somewhat lower operating margin rate than recovery services. The combination of all of these services provides our customers with a total, end-to-end business continuity solution.

71

Recovery Services

AS helps customers maintain access to the information and computer systems they need to run their businesses by providing cost-effective solutions to keep IT systems operational and secure in the event of an unplanned business disruption. These business disruptions can range from man-made events (e.g. power outages, telecommunications disruptions and acts of terrori to natural disasters (e.g. floods, hurricanes and earthquakes). AS offers a complete range of recovery services, depending on the length of time deemed acceptable by customers for IT systems outage—ranging from minutes (for mission-critical application several hours or several days (for non-mission-critical applications). We deliver these services using processors, servers, storal devices, networks and other resources and infrastructure that are subscribed to by multiple customers, which results in econom of scale for us and cost-effectiveness for our customers. These shared services range from basic standby disaster recovery services to blended services labeled as advanced recovery or high availability solutions that combine the basic standby with dedicated workgroup recovery and data storage resources that allow customers to continuously replicate data to one of or sites, helping customers to minimize data loss and reduce recovery times.

Managed Services

AS increasingly provides IT infrastructure and production services that customers use to run their businesses on a day-to-day basis. These services range from co-located IT infrastructure (e.g., where AS provides data center space, power, cooling and network connectivity) to fully-managed infrastructure services (e.g., where AS fully manages the daily operation of a custome IT infrastructure). Managed services typically require more dedicated processors, servers, storage devices, networks and other resources, which are either obtained by the customer or provided by us for the customer s exclusive use. Managed services at designed in a flexible manner allowing customers to choose the services they need from a menu of options. Therefore, the combination of selected managed services is unique to each customer, with solutions crafted to meet that customer s specific needs. Managed services help customers augment their IT resources and skills without having to hire full-time internal IT staff

Consulting and Professional Services

AS offers consulting services to help customers solve critical business continuity and IT infrastructure problems including business continuity, data storage and management, information security, and numerous categories of IT infrastructure operation addition, we also provide professional services that help customers design, implement and maintain other services provided AS.

Business Continuity Management Software

AS offers software solutions that help customers operate a comprehensive and professional business continuity plan across the enterprise. AS software solutions include business risk assessment, business continuity plan development, emergency notification in the event of a business disruption and virtual command center functionality. These solutions help enable ongoing business operations and management when business teams cannot be physically together because of an unplanned business disruption.

72

Acquisitions

To complement organic growth, we have a highly disciplined due diligence program to evaluate, execute and integrate acquisitions. Generally, we seek to acquire businesses that broaden our existing product lines and service offerings by adding complementary products and service offerings and by expanding our geographic reach. During 2008, we spent approximately \$721 million in cash to acquire six businesses.

The following table lists the businesses we acquired in 2008:

Acquired Company/Business Advanced Portfolio Technologies, Inc.	Date Acquired 02/29/08	Description Portfolio optimization and risk management software.
Corporate Payments Division of Payformance Corporation	02/29/08	Integrated electronic and outsourced payment solutions.
Strohl Systems Group, Inc.	05/21/08	Business continuity planning software.
Delphi Technologies Ltd.	07/01/08	Consulting and IT professional services to banks and insurance companies in Ireland.
GL TRADE SA	10/01/08	Global provider of multi-asset front to back solutions, connectivity and information services.
Assets of a disaster recovery business based in Paris, France	10/07/08	Disaster recovery business based in Paris, France.

We continually support, upgrade and enhance our systems and develop new products to meet the needs of our customers for operational efficiency and resilience and to leverage advances in technology. FS is transforming some of the key functionality its core systems into components to form a new software development and on-demand delivery environment called Infinity. Infinity enables financial institutions to develop and deploy custom applications, integrating SunGard components with their opportion or third party components. Infinity uses SunGard s Common Services Architecture (CSA), a service-oriented architecture (SOA) development framework, offering business process management (BPM) and a virtualized, software-as-a-service (SaaS) infrastructure.

Our expenditures for software development during the years ended December 31, 2006, 2007 and 2008, including amounts th were capitalized, totaled approximately \$276 million, \$297 million and \$325 million, respectively. These amounts do not incl routine software support costs that are included in cost of sales, nor do they include costs incurred in performing certain customer-funded development projects in the ordinary course of business.

Marketing

Product Development

Most of our FS solutions are marketed throughout North America and Western Europe and many are marketed world wide, including Asia-Pacific, Central and Eastern Europe, the Middle East and Africa, with the principal focus being on selling additional products and services to existing customers. Our AS, HE and PS solutions are marketed primarily in North America and Europe, with a focus on both new accounts and existing accounts. Our revenue from sales outside the United States durin the years ended December 31, 2006, 2007 and 2008 totaled approximately \$1.23 billion, \$1.48 billion and \$1.64 billion, respectively.

73

Competition

Since most of our computer services and software solutions are specialized and technical in nature, most of the market niches which we compete have a relatively small number of significant competitors. Some of our existing competitors and some potential competitors have substantially greater financial, technological and marketing resources than we have (see Risk Fac

Financial Systems. In our FS business, we compete with numerous other data processing and software vendors that may be broadly categorized into two groups. The first group is comprised of specialized financial systems companies that are much smaller than us. The second group is comprised of large computer services companies whose principal businesses are not in the financial systems area, some of which are also active acquirors. We also face competition from the internal processing and IT departments of our customers and prospects. The key competitive factors in marketing financial systems are the accuracy and timeliness of processed information provided to customers, features and adaptability of the software, level and quality of customer support, degree of responsiveness, level of software development expertise, total cost of ownership and return on investment. We believe that we compete effectively with respect to each of these factors and that our leadership, reputation are experience in this business are important competitive advantages.

Higher Education and Public Sector. In our HE and PS businesses, we compete with a variety of other vendors depending upon customer characteristics such as size, type, location, computing environment and functional requirements. For example, there may be different competitors for different sizes or types of educational institutions or government agencies, or in differe states or geographic regions. Competitors in this business range from larger providers of generic enterprise resource planning systems to smaller providers of specialized applications and technologies. We also compete with outsourcers and systems integrators, as well as the internal processing and information technology departments of our customers and prospective customers. The key competitive factors in marketing higher education and public sector systems are the accuracy and timeline of processed information provided to customers, features and adaptability of the software, level and quality of customer support degree of responsiveness, level of software development expertise and overall net cost. We believe that we compete effectivel to each of these factors and that our leadership, reputation and experience in these businesses are important competitive advantages.

Availability Services. In our AS business, our greatest source of competition for recovery and advanced recovery services is in-house dedicated solutions, which are solutions that our customers or prospective customers develop and maintain internally instead of purchasing from a vendor such as us. Historically, our single largest commercial competitor in the AS business for recovery and advanced recovery services has been IBM Corporation, which we believe is the only company other than ours the currently provides the full continuum of availability services. We also face competition from specialized vendors, including hardware manufacturers, data-replication and virtualization software companies, outsourcers, managed hosting companies, IT services companies and telecommunications companies. Competition among managed or data center service providers is fragmented with various competitor types, such as major telecommunication providers, carrier neutral managed services providers, real estate investment trusts, IT outsourcers and regional colocation providers. We believe that we compete effecti with respect to the key competitive dimensions in information availability, namely economies of scale, quality of infrastructure scope and quality of services, including breadth of hardware platforms and network capacity, level and quality of customer support, level of technical expertise, vendor neutrality and price. We also believe that our experience and reputation as an innovator in information availability solutions, our proven track record, our financial stability and our ability to provide the enportfolio of availability services as a single vendor solution are important competitive advantages.

Employees

On June 30, 2009, we had approximately 20,000 employees. We believe that our success depends partly on our continuing ab to retain and attract skilled technical, sales and management personnel. While skilled

74

personnel are in high demand and competition exists for their talents, we believe that we have been able to retain and attract highly qualified personnel (see Risk Factors). We believe that our employee relations are excellent.

Proprietary Protection

We own registered marks for the SUNGARD name and own or have applied for trademark registrations for many of our servi and software products.

To protect our proprietary services and software, we rely upon a combination of copyright, patent, trademark and trade secret confidentiality restrictions in contracts with employees, customers and others, software security measures, and registered copyrights and patents. We also have established policies requiring our personnel and representatives to maintain the confidentiality of our proprietary property. We have a few registrations of our copyrights and a number of patents and patent applications pending. We will continue to apply for software and business method patents on a case-by-case basis and will continue to monitor ongoing developments in the evolving software and business method patent field (see Risk Factors).

Sustainable Development

We have a strong commitment to sustainability. The customers, communities and environment we do business with and in are increasingly influenced by sustainability issues. Our employees identify strongly with global issues such as climate change, at most of our businesses already have established practices for recycling, conservation and disposal of hazardous materials. We believe in accountability, doing business ethically and doing the right thing. During 2008, we adopted a company-wide sustainability policy and supplier code of conduct, began a process to measure our carbon footprint and continued our employ engagement and communications programs. We also continued our partnerships with the World Business Council on Sustaina Development, The Green Grid and the Corporate Eco-Forum as part of our objective to work with companies across industrie implement best practices. We remain dedicated to establishing a corporate culture of sustainable development to help ensure to SunGard can continue to take pride in what we do and the way we do it.

Properties and Facilities

We lease space, primarily for availability services facilities, data centers, sales offices, customer support offices and administrative offices, in many locations worldwide. We also own some of our computer and office facilities. Our principal facilities include our leased availability services facilities in Philadelphia, Pennsylvania (640,000 square feet), Carlstadt, New Jersey (578,600 square feet), and Hounslow, England (195,000 square feet) and include our financial systems application serv provider centers in Voorhees, New Jersey, Birmingham, Alabama, Burlington, Massachusetts, Hopkins, Minnesota and Ridgefield, New Jersey. We believe that our leased and owned facilities are adequate for our present operations.

Legal Proceedings

We are presently a party to certain lawsuits arising in the ordinary course of our business. We believe that none of our current legal proceedings will be material to our business, financial condition or results of operations.

Executive Compensation Compensation Discussion and Analysis

This section discusses the principles underlying our executive compensation policies and decisions. It provides qualitative information regarding the manner in which compensation is earned by our executive officers and places in context the data presented in the tables that follow. In addition, in this section, we address the compensation paid or awarded during fiscal yea 2008 to our chief executive officer (principal executive officer), chief financial officer (principal financial officer) and three of executive officers who were the most highly compensated executive officers in fiscal year 2008. We refer to these five executive officers as our Named Executive Officers.

Our executive compensation program is overseen and administered by the Compensation Committee. The Compensation Committee operates under a written charter adopted by our Board and has responsibility for discharging the responsibilities or Board of Directors relating to the compensation of the Company s executive officers and related duties. Management, includ our chief executive officer, or CEO, evaluates a number of factors in developing cash and equity compensation recommendate to the Compensation Committee for its consideration and approval. Following this in-depth review and in consultation with management, our CEO makes compensation recommendations for our corporate executive officers and our Named Executive Officers, including the CEO, to the Compensation Committee based on his evaluation of each officer s performance, expectation for the coming year and market compensation data, and our CEO also provides an overview of compensation for other execution officers. The Compensation Committee reviews these proposals and makes all final compensation decisions for corporate executive officers and Named Executive Officers by exercising its discretion in accepting, modifying or rejecting any management recommendations, including any recommendations from our CEO.

Objectives of Our Compensation Program

Our executive compensation program is intended to meet three principal objectives:

to provide competitive compensation packages to attract and retain superior executive talent;

to reward successful performance by the executive and the Company by linking a significant portion of compensati to future financial and business results; and

to further align the interests of executive officers with those of our ultimate parent company stockholders by providlong-term equity compensation and meaningful equity ownership.

To meet these objectives, our compensation program balances short-term and long-term performance goals and mixes fixed a at-risk compensation that is directly related to stockholder value and overall performance.

Our compensation program for senior executives, including the Named Executive Officers, is designed to reward Company performance. The compensation program is intended to reinforce the importance of performance and accountability at various operational levels, and therefore a significant portion of total compensation is in both cash and stock-based compensation incentives that reward performance as measured against established goals, i.e., pay for performance. Each element of our compensation program is reviewed individually and considered collectively with the other elements of our compensation program that it is consistent with the goals and objectives of both that particular element of compensation and our overall compensation program. For each Named Executive Officer, we look at each individual s contributions to our overall results, operating and financial performance compared with the targeted goals, and our size and complexity compared with companie our compensation peer group.

Elements of Our Executive Compensation Program

In 2008, the principal elements of compensation for Named Executive Officers were:

Edgar Filing: TransDigm Group INC - Form 10-Q

annual cash compensation consisting of base salary and performance-based incentive bonuses;

long-term equity incentive compensation;

benefits and perquisites; and

severance compensation and change of control protection.

Annual Cash Compensation

Management, including our CEO, develops recommendations for annual executive cash compensation plans by using compensation survey data for a broad set of organizations of comparable business, size and complexity, and then compares th survey results to publicly available compensation data for a group of companies we consider to be our peer group. We believe that the compensation practices of these companies provide us with appropriate benchmarks because they also provide technology products and services to a variety of customers and compete with us for executives and other employees.

The survey data comes from three sources: Radford Executive Benchmark Survey, which focuses on technology companies; Towers Perrin Compensation Data Bank, which focuses on a broader array of organizations including professional services, high-tech and manufacturing companies; and CHiPS, which has a technology industry focus. For purposes of establishing compensation recommendations, we use a blend of the Radford, Towers Perrin and CHiPS survey data to reflect our size and industry. From the Radford survey data, we assessed compensation from 220 public and private companies with annual reven above \$1 billion, from the Towers Perrin survey data we assessed compensation of 80 companies with annual revenues in the range of \$3 billion to \$6 billion, and from the CHiPS survey data we assessed compensation from 66 companies with annual revenues between \$1 billion to \$10 billion.

The companies we consider within our peer group are financial services and software companies of similar industry and rever as the Company, and some of which various businesses within the Company compete against for business and for talent. Peer group compensation data is limited to publicly available information and therefore generally does not provide precise comparisons by position as offered by the more comprehensive survey data from Radford, Towers Perrin and CHiPS. As a rest the peer group data provides limited guidance and does not dictate the setting of executive officers compensation. The follow companies comprised our peer group in 2008:

Automatic Data Processing, Inc.

MasterCard Incorporated

DST Systems, Inc.

BMC Software, Inc.

Paychex, Inc.

Fidelity National Information

Broadridge Financial Solutions, Inc. Services, Inc. SEI Investments Company

Computer Sciences Corporation Fisery, Inc. The Thomson Corporation

Convergys Corporation Iron Mountain Incorporated The Western Union Company Our annual cash compensation packages for executive officers include base salary and a performance-based executive incentic compensation (EIC) bonus. We generally target total cash compensation at approximately 85% of the blended survey data.

Because we pay for performance, we weight the cash compensation more heavily toward the performance incentives and less toward the base salary.

Base Salary. For base salary, we generally target the 60th percentile of the blended survey data to provide a fixed compensation competitive market practice that is not subject to performance risk while also considering other factors, such as individual and company performance. We review the base salaries for each Named Executive Officer annually as well as at the time of any promotion or significant change in job responsibilities. Base salaries are determined for each Named Executive Officer based on his or her position and responsibility by using survey data. In 2008, we provided salary increases for the Nar Executive Officers of 2.0% to 5.6% to more closely align base salaries with the targeted 60th percentile of market data for each position. Salary for each Named Executive Officer for calendar year 2008 is reported in Table 1 Summary Compensation Tableow.

Performance-Based Incentive Compensation. The annual EIC bonus for executive officers is designed to reward our execution for the achievement of annual financial goals related to the business for which they have responsibility. A minimum incentive may be earned at threshold EIC goals, which are set generally at levels that reflect an improvement over prior year results, and payment is awarded if the threshold goal is not achieved.

81

On-target EIC goals are set generally at levels that reflect budgeted performance. Consistent with our focus on pay for performance, additional amounts can be earned when actual performance exceeds on-target performance. Additional mid-rang goals between threshold and target with corresponding incentive amounts are also established. The Company may revise or cancel an executive s EIC at any time as a result of a significant change in circumstances or the occurrence of an unusual ever that was not anticipated when the performance plan was approved. Internal EBITA targets are adjusted to take into account acquisitions and/or dispositions which were not included in the budgeted EIC targets.

The financial measures used for the 2008 EIC bonuses for the Named Executive Officers, or NEOs, were one or both of the following: (i) Internal EBITA, which represents actual earnings before interest, taxes and amortization, noncash stock compensation expense, management fees paid to the Sponsors and certain other unusual items and (ii) budgeted revenue grow of the Company s business segments. These metrics were selected as the most appropriate measures upon which to base the EIC bonuses for the Named Executive Officers because they are important metrics that management and the Sponsors use to evaluate the performance of the Company. While we have established threshold, mid-range, and on-target Internal EBITA go as set forth in the table below, EIC bonuses may be increased if the applicable Internal EBITA goal is exceeded. As a result, to NEO may be entitled to receive an increase in bonus equal to a small percentage of the amount by which the applicable Internal EBITA goal is exceeded. We refer to any such increase in the bonus as an override adjustment. For Messrs. Ashton and Fig EIC bonuses earned on the achievement of Internal EBITA goals were also subject to a multiplier that, depending upon the achievement of year-over-year revenue growth goals of the Financial Systems segment, could result in a further increase or decrease of any bonus earned based on the achievement of Internal EBITA goals. As set forth in the table below, the multiplier ranged from 0 to 1.5, meaning that revenue growth results could reduce or increase amounts earned by the NEO based on the achievement of Internal EBITA goals.

The following table provides the 2008 threshold, mid-range, and on-target Internal EBITA goals for the Named Executive Officers and the EIC bonuses paid to them based on actual results from 2008:

	I	Actual 200		
N	m 1 11	Mark	0. T	EIC Bonus

(2) Represents the EIC bonus earned as a result of the Financial Systems Segment exceeding the on-target 2008 Internal EB goal. Thus, the bonus amount earned reflects the on-target EIC amount plus the override adjustment. The revenue multipapplicable to the 2008 EBITA incentive amounts earned was 1 in 2008,

82

therefore, it did not increase or decrease the incentive payment earned based on the achievement of the on-target Internal EBITA goal.

The following table provides the low, target and maximum multiplier applicable to the 2008 Internal EBITA incentive amoun earned by Messrs. Ashton and Finders, which is based on the percentage increase or decrease in revenue of the Financial Syst segment as compared to the prior year.

Name James E. Ashton III	0 Multiplier Low	1 Multiplier Target	1.5 Multiplier Max	Actual Multip
Financial Systems Segment Revenue Growth (% increase/(decrease) over prior year) Harold C. Finders	(1.0%)	5.2-7.4%	14.0%	1
Financial Systems Segment Revenue Growth (% increase/(decrease) over prior year) Long-Term Equity Compensation	(1.0%)	5.2-7.4%	14.0%	1

We intend for our equity program to be the primary vehicle for offering long-term incentives and rewarding our executive officers, managers and key employees. Because of the direct relationship between the value of an option or restricted stock un (RSU) award and the value of our stock, we believe that granting options and RSUs is the best method of motivating our executive officers to manage our Company in a manner that is consistent with the interests of our Company and our stockhold. We also regard our equity program as a key retention tool. Retention is an important factor in our determination of the type of award to grant and the number of underlying Units to grant.

In 2005 in connection with the Transaction, executive officers and other managers and key employees were granted a combination of time-based and performance-based options to purchase equity in the Parent Companies. The size of these initi option grants were commensurate with the executive s position, performance and tenure with the Company and were agreed connection with the Transaction. These grants were intended to cover the period between the grant date and December 31, 20 absent promotions or other unusual circumstances. Accordingly, no Named Executive Officers has received equity grants since 2005 other than Mr. Finders, who received a 2007 option grant due to his promotion to Division Chief Executive Officer, Financial Systems. Additional information on all outstanding grants to the Named Executive Officers is shown in Table 3 Outstanding Equity Awards at 2008 Fiscal Year-End below.

Performance-based options granted to the Named Executive Officers vest upon the attainment of certain annual or cumulative earnings goals based on Internal EBITA targets for the Company during a specified performance period, generally five or six years. Based upon actual year-end 2008 results, 3.86% of each 2005 performance-based option award vested out of a maximum of 16.67% available to vest each of six years in the performance period, and 4.63% of each 2007 performance-based option avested out of a maximum of 20% available to vest each of five years in the performance period. The annual vesting goals for performance-based options were agreed to by the Sponsors and senior management in 2005 in connection with the Transaction and require sustained and superior company-wide performance in each of the years in the performance period but allow for additional vesting for over performance.

Benefits and Perquisites

We offer a variety of health and welfare programs to all eligible employees, including the Named Executive Officers. The Na Executive Officers are eligible for the same benefit programs on the same basis as the rest of the Company s employees in the particular country in which the Named Executive Officer resides, including medical and dental care coverage, life insurance coverage, short-and long-term disability and a 401(k) or defined contribution pension plan.

The Company limits the use of perquisites as a method of compensation and provides executive officers with only those perquisites that we believe are reasonable and consistent with our overall compensation program to better enable the Compan attract and retain superior employees for key positions. The perquisites provided to the Named Executive Officers include lea automobiles and related tax gross-ups and are quantified in Table 1 Summary Compensation Table below.

Employment Agreements, Severance Compensation & Change of Control Protection

In connection with the Transaction, the Company entered into definitive employment agreements with certain senior manager including the Named Executive Officers. The executives with such agreements are eligible for payments if employment terminates or if there is a change of control, as described under Potential Payments on Termination or Change of Control be The agreements were designed to retain executives and provide continuity of management in the event of an actual or threater change of control.

The agreements include the following terms:

A term through December 31, 2010, with one-year automatic renewals unless terminated on one year sadvance notice.

The same base salary as that payable by the Company prior to the Transaction, subject to annual adjustments, if any made by the board of directors or the compensation committee of the board, in consultation with the chief executive officer. See Base Salary above for a description of the determination of base salary for the Company is senior management.

The opportunity to earn an annual cash bonus provided that the aggregate bonus opportunity for the senior manager as a group will be consistent with that provided by the Company to executives as a group prior to the Transaction, although the board of directors may re-align the performance metrics and other terms in consultation with the chief executive officer. See Performance-Based Incentive Compensation above for a description of the determination bonuses for the Company s senior management.

Employee benefits consistent with those provided by the Company to executives prior to the Transaction, including right to participate in all employee benefit plans and programs.

Participation in the equity plan of SunGard Capital Corp. and SunGard Capital Corp. II.

The right to receive certain severance payments, including upon a termination without cause, a resignation for reason or a change of control, consistent with the severance payments provided for under the change of control agreement with the Company in effect prior to the Transaction. See Potential Payments Upon Termination or Cha of Control below.

Certain restrictive covenants (noncompetition, confidentiality and nonsolicitation) that continue for applicable post-termination periods.

The right to receive a tax gross-up payment should any payment provided under the agreement be subject to the exc tax under section 4999 of the Internal Revenue Code of 1986, as amended.

Edgar Filing: TransDigm Group INC - Form 10-Q

In addition, under the terms of the option awards made to executives, acceleration of vesting of options occurs if a change of control takes place or due to certain other termination events. These arrangements and potential post-employment termination compensation payments are described in more detail in the section entitled Potential Payments Upon Termination or Change Control below.

Accounting and Tax Implications

The accounting and tax treatment of particular forms of compensation do not materially affect the Compensation Committee compensation decisions. However, we evaluate the effect of such accounting and tax treatment on an ongoing basis and will reappropriate modifications to compensation policies where appropriate.

84

Stock Ownership

The Company does not have a formal policy requiring stock ownership by management. Our senior managers, including the Named Executive Officers, however, have committed significant personal capital to our Company in connection with the Transaction. See Beneficial Ownership below.

2009 Compensation Update

Our normal schedule would have called for approval of salary and bonus adjustments during the February 2009 Compensation Committee meeting. However, because the economic outlook for 2009 remains uncertain and in order to help best position ou Company to emerge from this economic crisis stronger, we determined that there will be no increases of salary or EIC performance bonus for the Named Executive Officers and other senior executives in 2009.

(1) No option awards were granted in 2008 or 2006 to any of the Named Executive Officers. The amounts in this column retained the dollar amount recorded for financial statement reporting purposes for the fiscal year ended December 31, 2008, 2007 2006, as applicable, in accordance with FAS 123(R), of awards granted pursuant to the SunGard 2005 Management Incentive Plan. The amounts for all of the Named Executive Officers thus include amounts from awards granted on August 12, 2005 at an exercise price of \$18.00 per Unit and for Mr. Finders additional amounts from awards granted on September 21, 2007 at an exercise price of \$20.72 per Unit. Assumptions used in the calculation of this amount are includin Note 7 of the Notes to the Company s Consolidated Financial Statements for the fiscal year ended December 31, 200 included in this Annual Report on Form 10-K. Because these amounts represent expense for financial reporting purposes they are not representative of the actual value that the Named Executive Officer would receive upon exercise of these options.

85

- (2) The amounts in this column reflect the cash awards payable under performance-based incentive compensation, which is discussed in further detail above in the Compensation Discussion and Analysis.
- (3) For Mr. Conde, amount includes health and welfare benefits, matching 401(k) savings plan contributions, car lease payments, and automobile tax gross-ups (\$12,341 in each of 2008 and 2007 and \$10,770 in 2006).

For Mr. Ruane, amount includes health and welfare benefits, matching 401(k) savings plan contributions, car lease payn and related maintenance expenses, and automobile tax gross-ups (\$10,844 in 2008 and \$11,066 in both 2007 and 2006).

For Mr. Ashton, amount includes health and welfare benefits, matching 401(k) savings plan contributions, car lease payments, reimbursement of fuel and maintenance expenses in 2007 and 2006, and automobile tax gross-ups (\$11,524 in 2008, \$10,104 in 2007 and \$9,364 in 2006).

For Mr. Finders, amount includes health and welfare benefits, company defined contribution pension plan contributions, car lease payments and reimbursement of fuel and maintenance expenses.

For Mr. Muratore, amount includes health and welfare benefits, matching 401(k) savings plan contributions, car lease payments, reimbursement of fuel and maintenance expenses, and automobile tax gross-ups (\$8,842 in 2008, \$10,610 in 2 and \$13,639 in 2006).

- (4) For Mr. Ashton, the 2007 salary represents a blended rate of \$374,000 from January 1 to March 31, 2007 and \$500,000 april 1 to December 31, 2007. In April 2007, Mr. Ashton received a promotion and a salary increase commensurate with new responsibilities.
- (5) Mr. Finders compensation was paid in Swiss Francs (CHF). All 2008 amounts have been converted into U.S. dollars at currency exchange rate of 0.832260, which rate was used for purposes of the Company s 2008 operating budget and for purposes of establishing 2008 compensation, and all 2007 amounts have been converted into U.S. dollars at the 2007 average annual currency exchange rate of 0.83424. For Mr. Finders, the 2007 salary represents a blended rate of \$410,00 from January 1 to March 31, 2007 and \$500,000 from April 1 to December 31, 2007. In April 2007, Mr. Finders receive promotion and a salary increase commensurate with his new responsibilities. Compensation information for fiscal year 2 is not provided for Mr. Finders because he was not a Named Executive Officer in that year.
- (6) Mr. Muratore retired on February 2, 2009. Mr. Muratore had been Executive Vice President since 2002 and most recently serving as acting Group Chief Executive Officer, SunGard Higher Education from September 2008 until his retirement. was Senior Vice President from 1998 to 2002, Chief Executive Officer of the SunGard Financial Systems Group from 1908 and Chief Executive Officer of the SunGard Computer Services Group from 1990 to 1995. From 1985 to 1990, Mr. Muratore held various senior executive positions with us.

Grants of Plan-Based Awards in Fiscal Year 2008

To provide long-term equity incentives following the Transaction, the SunGard 2005 Management Incentive Plan (Plan) we established. The Plan authorizes the issuance of equity subject to awards made under the Plan for up to 60 million shares of Class A common stock and 7 million shares of Class L common stock of SunGard Capital Corp. and 2.5 million shares of preferred stock of SunGard Capital Corp. II.

Under the Plan, awards of time-based and performance-based options have been granted to purchase Units in the Parent Companies. Each Unit consists of 1.3 shares of Class A common stock and 0.1444 shares of Class L common stock of Sun

Edgar Filing: TransDigm Group INC - Form 10-Q

Capital Corp. and 0.05 shares of preferred stock of SunGard Capital Corp. II. The shares comprising a Unit are in the same proportion as the shares issued to all stockholders of the Parent Companies. The options are exercisable only for whole Units cannot be separately exercised for the individual classes of stock. Beginning in 2007, hybrid equity awards generally were granted under the Plan, which awards are composed of restricted stock units (RSUs) for Units in the Parent Companies and options to purchase Class A common stock in SunGard Capital Corp. All awards under the Plan are granted at fair market valon the date of grant.

Time-based options vest over five years as follows: 25% one year after date of grant, and 1/48th of the remaining balance each month thereafter for 48 months. Time-based RSUs vest over five years as follows: 10% one year after date of grant, and 1/48th the remaining balance each month thereafter for 48 months. Performance-based options and RSUs vest upon the attainment of certain annual or cumulative earnings goals based on Internal EBITA targets for the Company during a specified performance period, generally five or six years. Time-based and performance-based options can partly or fully vest upon a change of control and certain other termination events, subject to certain conditions, and expire ten years from the date of grant. Once vested, time-based and performance-based RSUs become payable in shares upon the first to occur of a change of control, separation for service without cause, or the date that is five years after the date of grant.

Option Exercises and Stock Vested

None of the Named Executive Officers exercised any stock options during the fiscal year ended December 31, 2008.

Pension Benefits

None of the Named Executive Officers receive benefits under any defined benefit or actuarial pension plan.

Employment and Change of Control Agreements

As discussed above, the Company entered into a definitive employment agreement with each of the Named Executive Officer The terms of these agreements are described above under Compensation Discussion and Analysis.

Potential Payments Upon Termination or Change of Control

Pursuant to the terms of the executive employment agreements and option agreements, set forth below is a description of the potential payments the Named Executive Officers would receive if their employment was terminated on December 31, 2008.

The terms cause, good reason, change of control and sale of business are defined in the executive employment agreements. For of these agreements have been filed as exhibits to the Company s Quarterly Report on Form 10-Q for the quarter ended September 30, 2005.

Termination without Cause or Resignation for Good Reason; Certain Change in Control or Sale of Business Transactions. Named Executive Officer s employment is terminated by the Company without cause, or a Named Executive Officer terminates this employment in certain circumstances which constitute good reason, including certain change of control and sale of busine transactions, then:

the Company will pay the Named Executive Officer the following:

a lump sum cash severance amount equal to the applicable multiplier multiplied by the sum of 2008 base sale and target incentive bonus;

a lump sum cash payment of all accrued compensation (as defined in the agreement) as of December 31, 200

a lump sum cash payment in an amount equal to the applicable multiplier multiplied by the Company s cost the Named Executive Officer s medical, dental and vision coverage in effect on December 31, 2008, as incr by a tax gross-up payment equal to the income and FICA tax imposed on such payment;

a lump sum cash payment in an amount equal to the applicable multiplier multiplied by \$17,500, in lieu of retirement, life insurance and long term disability coverage, as increased by a tax gross-up payment equal to the income and FICA tax imposed on such payment;

an amount equal to any excise tax charged to the Named Executive Officer as a result of the receipt of any change of control payments;

89

performance-based options vest on a pro rata basis through the termination date, time-based options immediately st vesting and all unvested time-based options are forfeited;

if a change of control occurs and employment is not offered, then all unvested performance-based options vest on a return-on-equity basis and all unvested time-based options become fully vested;

if a sale of the business occurs and the employment agreement is not assumed, then performance-based options ves a pro rata basis through the termination date, all unvested time-based options become fully vested and all unvested performance-based options are forfeited.

Resignation without Good Reason; Voluntary Retirement and Certain Change in Control Transactions. If a Named Executi Officer terminates his employment voluntarily without good reason, including certain change of control transactions and retirements, then:

with the exception of certain voluntary retirements, the Company will pay the Named Executive Officer only a lump sum cash payment of all accrued compensation with the exception of his 2008 pro rated target incentive bonus. Under the terms of Mr. Conde s employment agreement, if a change of control occurs and Mr. Conde is offered employment but he resigns, his resignation is considered for good reason;

if the Named Executive Officer voluntarily retires after August 11, 2008, provided he is at least 62 years of age, the Company will pay the Named Executive Officer a lump sum cash payment of all accrued compensation and upon satisfying certain conditions, \$10,000 per month for twelve months from the date of termination;

all performance-based options stop vesting as of the beginning of the year of termination, all time-based options immediately stop vesting, and all unvested time-based and performance-based options are forfeited;

if a change of control occurs and employment is offered but the Named Executive Officer resigns, then all unvested performance-based options vest on a return-on-equity basis and all unvested time-based options become fully veste and

if the Named Executive retires after August 11, 2008, provided he is at least 62 years of age, then all performance-based options stop vesting as of the beginning of the year of termination, all time-based options continuous to vest throughout the consulting period and all unvested performance-based options are forfeited.

Termination for Cause. If the Company terminates a Named Executive Officer s employment for cause, then:

the Company will pay the Named Executive Officer only a lump sum cash payment of all accrued compensation with exception of his 2008 pro rated target incentive bonus;

all vested and unvested time and performance options are forfeited.

Disability or Death. If a Named Executive Officer s employment is terminated due to his disability or death, then:

the Company will pay the Named Executive Officer (or his beneficiary in the event of death) a lump sum cash payr of all accrued compensation;

in the event of disability, if the Named Executive Officer elected to participate, he shall receive payments under an insurance policy offered through the Company until he reaches retirement age as defined by the 1983 Amended Soc Security Normal Retirement Age;

in the event of death, the Named Executive Officer s beneficiary shall receive payments under an insurance policy offered through the Company; and

performance-based options vest on a pro rata basis through the termination date; all time-based options immediately stop vesting and all unvested time-based options are forfeited.

90

In order to receive any of the above described severance benefits, the Named Executive Officer is required to execute a releas all claims against the Company. In order to exercise stock options, the Named Executive Officer must execute a certificate of compliance with the restrictive covenants contained in his employment agreement and all other agreements.

With the exception of Mr. Muratore, the tables below reflect the amount of compensation payable to each of the Named Executive Officers in the event of termination of such executive s employment. The amounts shown assume that such termin was effective as of December 31, 2008, and thus includes amounts earned through such time and are estimates of the amounts which would be paid out to the Named Executive Officers upon their termination. The actual amounts to be paid, if any, can be determined at the time of such executive s separation from the Company. Effective as of February 2, 2009, Mr. Muratore retired from his position as an executive officer of the Company. The table for Mr. Muratore reflects the actual amount of compensation he received from the Company in connection with his retirement.

Director Compensation

None of our directors except Mr. Mann receive compensation for serving as directors. Mr. Mann receives annual director equivalent awards; he does not receive any cash director fees. On November 13, 2008, Mr. Mann was granted a time-based hybrid equity grant for 1,868 Units, consisting of an RSU grant of 1,868 Units and an option for 4,704 shares of Class A common stock at a exercise price of \$1.41 per share. The RSU vests over five years as follows: 10% one year after date of grant, and 1/48th of th remaining balance each month thereafter for 48 months. Once vested, the RSUs become payable in shares upon the first to oc of a change of control, removal or resignation as a director, or the date that is five years after the date of grant. The option expeten years from the date of grant and vests over five years as follows: 25% one year after date of grant and 1/48th of the remain balance each month thereafter for 48 months. The following table contains for Mr. Mann compensation received during the year ended December 31, 2008 for serving as a director of the Company and its holding companies.

- (1) The amount in this column reflects the dollar amount recorded for financial statement reporting purposes for the fiscal year ended December 31, 2008, in accordance with FAS 123(R), of Mr. Mann s equity awards granted pursuant to the Plan. Assumptions used in the calculation of this amount are included in Note 6 of the Notes to the Company s Consolidated Financial Statements for the fiscal year ended December 31, 2008 included in this Annual Report on Form 10-K.
- (2) In addition to serving as a director, Mr. Mann is currently an employee of the Company and received in 2008 a base sala of \$300,000 and health and welfare benefits, a matching 401(k) savings plan contribution, automobile benefits including reimbursement of fuel and maintenance expenses and an automobile tax gross-up (\$4,158).

Compensation Committee Interlocks and Insider Participation

Our Compensation Committee is currently comprised of Messrs. Connaughton, Greene and Marren, who were each appointed the Compensation Committee in 2005 in connection with the Transaction, and Ms. Richardson, who was appointed to the Compensation Committee in March 2008. None of these individuals has been at any time an officer or employee of our Company. During 2008, we had no compensation committee interlocks meaning that it was not the case that an executive of ours served as a director or member of the compensation committee of another entity and an executive officer of the other entity served as a director or member of our Compensation Committee.

CERTAIN RELATIONSHIPS AND RELATED PARTY TRANSACTIONS

Pursuant to our Global Business Conduct and Compliance Program, all employees and directors (including our NEOs) who have the consumption of whose immediate family members have, any financial interests in other entities where such involvement is or may appear to cause a conflict of interest situation are required to report to us the conflict. If the conflict involves a director or executive office or is considered material, the situation will be reviewed by the Compliance Committee. The Compliance Committee will then consult with the Audit Committee and determine whether a conflict exists or will exist, and if so, what action should be taken resolve the conflict or potential conflict. In other cases, conflicts are reviewed and resolved by the Compliance Committee. Additionally, in connection with the Transaction, the Company s four parent companies and the Sponsors entered into a princinvestor agreement which requires affiliated party transactions involving the Sponsors to be approved by the majority of Spon not involved in the affiliated party transaction.

Other than as described under this heading, the Company has not adopted any formal policies or procedures for the review, approval or ratification of certain related-party transactions that may be required to be reported under the SEC disclosure rules. Such transactions, if and when they are proposed or have occurred, have traditionally been (and will continue to be) reviewed the Audit Committee (other than the committee members involved, if any) on a case-by-case basis.

On August 11, 2005, upon completion of the Transaction, the Company and its four parent companies entered into a management agreement with affiliates of each of the Sponsors pursuant to which such entities or their affiliates will provide management consultant services, including financial, managerial and operational advice and implementation of strategies for improving the operating, marketing and financial performance of the Company and its subsidiaries. Under the management agreement, affili of the Sponsors receive quarterly annual management fees equal to 1% of the Company s quarterly EBITDA, as defined in Indenture dated August 11, 2005 governing the senior notes due 2013 (but assuming the management fee had not been paid for purposes of such calculation), and reimbursement for out-of-pocket expenses incurred by them or their affiliates in connection with the provision of management consulting services pursuant to the agreement. During the years ended December 31, 2006, 2007 and 2008, the Company recorded \$14 million, \$17 million and \$23.3 million respectively relating to management fees.

In the event that the management agreement is terminated, the Sponsors will receive a lump sum payment equal to the present value of the annual management fees that would have been payable for the remainder of the term of the management agreement. The initial term of the management agreement is ten years, and it extends annually for one year unless the Sponsors or the Company and its parent companies provide notice to the other. Finally, the management agreement provides that affiliates of Sponsors will be entitled to receive a fee equal to 1% of the gross transaction value in connection with certain subsequent financing, acquisition, disposition and change of control transactions in excess of a threshold amount.

In addition to serving as a director, Mr. Mann is currently an employee of the Company and accordingly in 2008 received sala and benefits. See note 2 to the table under Director Compensation.

Our Sponsors and/or their respective affiliates have from time to time entered into, and may continue to enter into, arrangeme with us to use our products and services in the ordinary course of their business, which often result in revenues to SunGard in excess of \$120,000 annually.

Two of our Sponsors, Goldman Sachs & Co. and Kohlberg Kravis Roberts & Co., and/or their respective affiliates served as co-managers in connection with both our recent debt offering of \$500,000,000 10.625% Senior Notes due 2015 and Incremen Term Loan. In connection with serving in such capacity, Goldman Sachs & Co. and Kohlberg Kravis Roberts & Co. received customary fees and expenses in amounts of \$25.9 million and \$4.3 million, respectively.

DESCRIPTION OF OTHER INDEBTEDNESS

Senior Secured Credit Facilities

Overview

In connection with the Transaction, we entered into a senior secured credit agreement with J.P. Morgan Securities Inc., as join lead arranger and joint bookrunner, Citigroup Global Markets Inc., as joint lead arranger, joint bookrunner and co-syndication agent, Deutsche Bank Securities Inc., as joint bookrunner and co-syndication agent, and JPMorgan Chase Bank, N.A. as administrative agent and collateral agent.

The senior secured credit facilities entered into in connection with the Transaction provided senior secured financing of \$5,000 million, consisting of:

\$4,000 million-equivalent in term loan facilities, comprised of a \$3,685 million facility and \$315 million-equivalen facilities, \$165 million of which is denominated in euros and \$150 million of which is denominated in pounds sterl and

a \$1,000 million revolving credit facility.

In February 2007, we entered into an amendment to, among other things, increase the amount of term loan facilities by \$400 million. After giving effect to the amendment, the aggregate amount of the U.S. dollar denominated portion of the term loan facilities was approximately \$4,030 million.

In September 2008, we entered into a second amendment to, among other things, increase the amount of term loan facilities b \$500 million. After giving effect to the second amendment, the aggregate amount of the U.S. dollar denominated portion of the term loan facilities was approximately \$4,459 million.

In June 2009, we entered into an amendment and restatement to, among other things, (a) extend the maturity date of \$2.5 billi of dollar-denominated term loans, £40 million of pound sterling-denominated term loans, and 120 million of euro-denominaterm loans to February 28, 2016, (b) reduce existing revolving credit commitments to \$829 million and extend the termination date of \$580 million of revolving credit commitments to May 11, 2013, and (c) amend certain other provisions, including provisions relating to negative covenants and financial covenants.

SunGard is the primary borrower under the senior secured credit facilities, except that a U.K. subsidiary, organized under the laws of the United Kingdom, is the borrower under the sterling and euro term loan facilities. We also have the ability to desig one or more of our other U.K. subsidiaries as borrowers under the revolving credit facility. The revolving credit facility include borrowing capacity available for letters of credit and for borrowings on same-day notice referred to as the swingline loans and available in U.S. dollars, euros and pound sterling.

Interest Rate and Fees

Borrowings under the senior secured credit facilities bear interest at a rate equal to an applicable margin plus, at our option, etc. (a) a base rate determined by reference to the higher of (1) the prime rate of JPMorgan Chase Bank, N.A. and (2) the federal funds rate plus ¹/2 of 1% or (b) a LIBOR rate determined by reference to the costs of funds for deposits in the currency of such borrowing for either 30, 60, 90 or 180 days. The initial applicable margin for borrowings was, under the revolving credit facil 1.50% with respect to base rate borrowings and 2.50% with respect to LIBOR borrowings.

In February 2007, we entered into an amendment to, among other things, reduce the interest rate margin on all outstanding ter loans under the senior secured credit agreement with respect to both base rate borrowings and LIBOR borrowings, subject to attaining certain leverage ratios.

103

The second amendment in September 2008 changed certain terms applicable to the incremental term loan. Borrowings can eit be at a base rate or a eurocurrency rate. Base rate borrowings reset daily and bear interest at a minimum of 4.0% plus a spread 2.75%. Eurocurrency borrowings can be made for periods of 30, 60, 90 or 180 days and bear interest at a minimum of 3.0% p a spread of 3.75%. The interest rate at June 30, 2009 was 6.75%.

Pursuant to the June 2009 amendment and restatement, interest rate spreads with respect to the extended term loans and intererate spreads (and letter of credit fees) with respect to the extended portion of the revolving credit facility will be the applicable rate as set forth in the amended and restated agreement. All other interest rate spreads and fees remain unchanged, however, the 30 day borrowing option is not available for the extended term loans. Based on the leverage ratio for the period ended June 30 2009, the current interest spread for extended LIBOR based term loans is 3.625% and for extended revolving credit loans is 3.25%. The applicable margin for borrowings under the revolving credit facility and under the term loan facilities may be redissiblect to our attaining certain leverage ratios.

In addition to paying interest on outstanding principal under the senior secured credit facilities, we are required to pay a commitment fee to the lenders under the revolving credit facility in respect of the unutilized commitments thereunder. Based the leverage ratio for the period ended June 30, 2009, the commitment fee rate is 0.50% per annum on the daily unused portion the unextended revolving credit commitments and 0.75% per annum on the daily unused portion of the extended revolving credit commitments. The commitment fee rate may be increased or reduced subject to our attaining certain leverage ratios. We must also pay customary letter of credit fees.

Prepayments

The senior secured credit agreement requires us to prepay outstanding term loans, subject to certain exceptions, with:

50% (which percentage is reduced to 0% if our total leverage ratio is less than 5.00 to 1.00) of our annual excess ca flow:

100% of the net cash proceeds of all nonordinary course asset sales or other dispositions of property by SunGard Holdco LLC and its subsidiaries (including insurance and condemnation proceeds), other than the sale of receivables in connection with the receivables facility, if we do not commit to reinvest those proceeds in assets to be used in our business or to make certain other permitted investments within 15 months as long as such reinvestment is completed within 180 days;

100% of the net cash proceeds of any incurrence of debt, other than proceeds from the receivables facility and othe debt permitted under the senior secured credit agreement; and

100% of the net cash proceeds of financings under the receivables facility in excess of \$750 million, including increases in the amount of the receivables facility.

The foregoing mandatory prepayments are applied pro rata to the term loan facilities and to installments of the term loan facilities.

We may voluntarily repay outstanding loans under the senior secured credit facilities at any time without premium or penalty other than customary breakage costs with respect to LIBOR loans.

Amortization

We are required to repay installments on the loans under the term loan facilities in quarterly principal amounts of 0.25% of the funded total principal amount through their respective maturity dates with the remaining amount payable on their respective maturity dates. Maturity dates for all our term loan facilities will automatically become May 15, 2013 if all the senior notes are not extended, renewed or refinanced on or prior to May 15, 2013 and the

104

maturity dates for our extended term loan facilities will automatically become May 15, 2015 if all the senior subordinated not are not extended, renewed or refinanced on or prior to May 15, 2015.

Principal amounts outstanding under the revolving credit facility are due and payable in full at maturity on August 11, 2011 for the unextended portion of the revolving credit facility and on May 11, 2013 for the extended portion.

Guarantee and Security

All obligations under the senior secured credit agreement are unconditionally guaranteed by SunGard Holdco LLC and, subjectation exceptions, each of our existing and future domestic wholly owned subsidiaries, referred to, collectively, as U.S. Guarantors. In addition, if our U.K. subsidiary borrowers borrow under the revolving credit facility, those borrowings are required to be unconditionally guaranteed by certain of our wholly owned U.K. subsidiaries.

All obligations under the senior secured credit facilities, and the guarantees of those obligations, are secured by substantially at the following assets of SunGard Holdco LLC, us and each U.S. Guarantor, subject to certain exceptions:

a pledge of 100% of the capital stock of SunGard Data Systems Inc., 100% of the capital stock of each U.S. Guarantor and 65% of the capital stock of each of our wholly owned foreign subsidiaries that are directly owned by us or one of the U.S. Guarantors; and

a security interest in, and mortgages on, substantially all tangible and intangible assets of SunGard Holdco LLC, SunGard Data Systems Inc. and each U.S. Guarantor.

In addition, any obligations of U.K. borrowers under the revolving credit facility, and any U.K. guarantees of such obligations are required to be secured by the following (subject to certain exceptions and only to the extent that the granting of such securinterests does not give rise to the requirement that the senior secured notes described under

Senior Secured Notes below be equally and ratably secured by such assets):

a pledge of the capital stock of each U.K. borrower and each U.K. guarantor; and

a lien on substantially all tangible and intangible assets of each U.K. borrower and each U.K. guarantor. *Certain Covenants and Events of Default*

The senior secured credit agreement contains a number of covenants that, among other things, restrict, subject to certain exceptions, our ability to:

incur additional indebtedness or issue preferred stock;

create liens on assets;

enter into sale and leaseback transactions;

engage in mergers or consolidations;

sell assets;
pay dividends and distributions or repurchase our capital stock;
make investments, loans or advances;
make capital expenditures;
repay subordinated indebtedness (including the senior subordinated notes)
105

make certain acquisitions;

engage in certain transactions with affiliates;

amend material agreements governing our subordinated indebtedness (including the senior subordinated notes);

change our lines of business; and

change the status of SunGard Holdco LLC as a passive holding company.

In addition, the senior secured credit agreement requires us to maintain the following financial covenants:

a maximum total leverage ratio; and

a minimum interest coverage ratio.

The senior secured credit agreement also contains certain customary affirmative covenants and events of default.

Receivables Facility

In connection with the Transaction, certain of our domestic subsidiaries entered into a receivables facility that provided, in the aggregate, up to \$375 million in funding for a period of six years following the closing of the Transaction. In December 2005 agreements governing the principal receivables facility were amended to, among other things, increase the aggregate availabil from \$375 million to a maximum amount of \$450 million and change certain other terms thereof, and the company terminated transitional receivables facility (which had provided an amount of funding up to a maximum of \$375 million less that amount funding under the principal receivables facility). In December 2008, we terminated our accounts receivable securitization program. Under the accounts receivable facility, eligible receivables were sold to third-party conduits through a wholly owned bankruptcy remote special purpose entity that is not consolidated for financial reporting purposes. We serviced the receivable and charged a monthly servicing fee at market rates. The third-party conduits were sponsored by certain lenders under our sensecured credit facilities.

On March 27, 2009, SunGard AR Financing LLC, a newly-formed wholly-owned, bankruptcy-remote, special purpose financ subsidiary (Financing) of the company entered into a syndicated receivables facility. The initial maximum commitment un receivables facility is \$250 million of which approximately \$107 million is on a revolving basis and the balance is a term loar. The receivables facility has a term of three years.

Subject to obtaining the commitment of additional lenders, and the satisfaction of other customary conditions, the receivables facility may be increased up to a maximum amount of \$500 million.

In May 2009, the company increased the size of its receivables facility by \$66.5 million.

The full amount of the initial availability under the receivables facility was borrowed as of June 30, 2009. Subsidiaries of the company that participate in the receivables facility (Sellers) transfer their receivables as a true sale to Financing pursuant to Receivables Sale Agreement dated as of March 27, 2009 (the Receivables Sale Agreement) and without recourse except for recourse for breaches of customary representations and warranties related to the receivables. Additional subsidiaries of the company may become parties to the receivables facility, subject to the satisfaction of specified conditions. Upon becoming parties, receivables originated by these subsidiaries will be included in the receivables balance eligible for funding under the receivables facility and will be included in the calculation of available funding thereunder.

Availability of funding under the receivables facility depends primarily upon the outstanding trade accounts receivable balance the Sellers. Aggregate availability is determined by using a formula that reduces the gross receivables balance by factors that into account historical default and dilution rates, excessive concentrations and average days outstanding and the costs of the facility.

106

Interest Rates and Fees

Under the receivables facility, Financing is generally required to pay interest on the amount of each advance at the one month LIBOR rate, adjusted for statutory reserves, plus 4.50% per annum. Financing is required to pay a fee on the unused portion of the receivables facility of 1.00% per annum, payable monthly in arrears. In addition, the company, acting as the initial receivables revicer, services, administers and collects receivables transferred pursuant to the receivables facility. Under the receivables facility, the company receives a monthly servicing fee of 1.00% per annum of the daily average outstanding balance of the receivables under such facility, payable monthly in arrears by Financing.

The receivables facility may be terminated for material breaches of representations and warranties, bankruptcies of any Seller collection agent or Financing, a default by any Seller or Financing in the performance of any payment required to be made un the transaction documents, a merger or similar transaction involving Financing, cross acceleration under our other facilities, a change of control affecting the company, and a failure to maintain a minimum fixed charge coverage ratio, among other reasons.

Guaranty and Security

The company unconditionally guarantees the performance of the Sellers obligations under the Receivables Sale Agreement. obligations under the receivables facility are secured by the receivables purchased by Financing under the Receivables Sale Agreement.

Senior Secured Notes

In January 2004, SunGard issued \$250 million aggregate principal amount of 3.750% senior notes due 2009 and \$250 million aggregate principal amount of 4.875% senior notes due 2014 under a single indenture. Upon consummation of the Transaction the senior secured notes became secured on an equal and ratable basis with loans under the senior secured credit facilities to the extent required by the indenture governing the senior secured notes and are guaranteed by all our subsidiaries that guarantee the notes. The terms of the indenture governing the senior secured notes provide that, in addition to customary events of default, a payment default or other default resulting in acceleration of payment obligations under any other indebtedness of SunGard or subsidiaries aggregating more than \$75 million, including the notes, constitute an event of default under the indenture governing the senior secured notes.

In January 2009, SunGard repaid the 3.750% senior notes due 2009 in full at maturity.

Senior Notes due 2013 and Senior Subordinated Notes due 2015

The senior notes due 2013 are senior unsecured obligations that rank senior in right of payment to future debt and other obligations that are, by their terms, expressly subordinated in right of payment to the senior notes, including the senior subordinated notes. The senior notes (i) rank equally in right of payment to all existing and future senior debt and other obligations that are not, by their terms, expressly subordinated in right of payment to the senior notes, (ii) are effectively subordinated in right of payment to all existing and future secured debt to the extent of the value of the assets securing such d and (iii) are structurally subordinated to all obligations of each subsidiary that is not a guarantor of the senior notes. All obligations under the senior notes are fully and unconditionally guaranteed, subject to certain exceptions, by substantially all our domestic, 100% wholly owned subsidiaries.

The senior subordinated notes due 2015 are unsecured senior subordinated obligations that are subordinated in right of paymet to the existing and future senior debt, including the senior secured credit facilities, the senior secured notes due 2014 and the senior notes due 2013. The senior subordinated notes (i) rank equally in right of payment to all future senior subordinated debt (ii) are effectively subordinated in right of payment to all existing

THE EXCHANGE OFFER

Purpose and Effect of the Exchange Offer

SunGard and the guarantors of the notes have entered into a registration rights agreement with the initial purchasers of the outstanding notes in which they agreed, under certain circumstances, to use their reasonable best efforts to file a registration statement relating to offer to exchange the outstanding notes for exchange notes and thereafter cause the registration statemen become effective under the Securities Act no later than 360 days following the closing date of the issuance of the outstanding notes. The exchange notes will have terms identical in all material respects to the outstanding notes, except that the exchange notes will not contain terms with respect to transfer restrictions, registration rights and additional interest for failure to observe certain obligations in the registration rights agreement. The outstanding notes were issued on September 29, 2008.

Under the circumstances set forth below, SunGard and the guarantors will use their reasonable best efforts to cause the SEC to declare effective a shelf registration statement with respect to the resale of the outstanding notes within the time periods speci in the registration rights agreement and keep the statement effective for up to two years after the effective date of the shelf registration statement. These circumstances include:

if any changes in law, SEC rules or regulations or applicable interpretations thereof by the SEC do not permit us to effect the exchange offer as contemplated by the registration rights agreement;

if the exchange offer is not consummated within 360 days after the date of issuance of the outstanding notes;

if any initial purchaser so requests with respect to the outstanding notes not eligible to be exchanged for the exchan notes and held by it within 30 days after the consummation of the exchange offer; or

if any holder that participates in the exchange offer does not receive freely transferable exchange notes in exchange tendered outstanding notes.

Under the registration rights agreement, if SunGard fails to complete the exchange offer (other than in the event we file a shell registration statement) or the shelf registration statement, if required thereby, is not declared effective, in either case on or price 360 days after the issue date (the target registration date), the interest rate on the outstanding notes will be increased by (x) 0.25% per annum for the first 90-day period immediately following the target registration date and (y) an additional 0.25% per annum with respect to each subsequent 90-day period, in each case, until the exchange offer is completed or the sh registration statement, if required, is declared effective by the SEC or the outstanding notes cease to constitute transfer restrict notes, up to a maximum of 1.00% per annum of additional interest.

If you wish to exchange your outstanding notes for exchange notes in the exchange offer, you will be required to make the following written representations:

you are not our affiliate or an affiliate of any guarantor within the meaning of Rule 405 of the Securities Act;

you have no arrangement or understanding with any person to participate in a distribution (within the meaning of the Securities Act) of the exchange notes in violation of the provisions of the Securities Act;

you are not engaged in, and do not intend to engage in, a distribution of the exchange notes; and

you are acquiring the exchange notes in the ordinary course of your business.

Each broker-dealer that receives exchange notes for its own account in exchange for outstanding notes, where the broker-deal acquired the outstanding notes as a result of market-making activities or other trading activities, must acknowledge that it will deliver a prospectus in connection with any resale of such exchange notes. Please see Plan of Distribution.

109

Fees and Expenses

The registration rights agreement provides that we will bear all expenses in connection with the performance of our obligation relating to the registration of the exchange notes and the conduct of the exchange offer. These expenses include registration at filing fees, accounting and legal fees and printing costs, among others. We will pay the exchange agent reasonable and custom fees for its services and reasonable out-of-pocket expenses. We will also reimburse brokerage houses and other custodians, nominees and fiduciaries for customary mailing and handling expenses incurred by them in forwarding this prospectus and related documents to their clients that are holders of outstanding notes and for handling or tendering for such clients.

We have not retained any dealer-manager in connection with the exchange offer and will not pay any fee or commission to an broker, dealer, nominee or other person, other than the exchange agent, for soliciting tenders of outstanding notes pursuant to exchange offer.

Transfer Taxes

We will pay all transfer taxes, if any, applicable to the exchanges of outstanding notes under the exchange offer. The tenderin holder, however, will be required to pay any transfer taxes, whether imposed on the registered holder or any other person, if:

certificates representing outstanding notes for principal amounts not tendered or accepted for exchange are to be delivered to, or are to be issued in the name of, any person other than the registered holder of outstanding notes tendered;

Edgar Filing: TransDigm Group INC - Form 10-Q

tendered outstanding notes are registered in the name of any person other than the person signing the letter of transmittal; or

a transfer tax is imposed for any reason other than the exchange of outstanding notes under the exchange offer. If satisfactory evidence of payment of such taxes is not submitted with the letter of transmittal, the amount of such transfer tax will be billed to that tendering holder.

117

Holders who tender their outstanding notes for exchange will not be required to pay any transfer taxes. However, holders who instruct us to register exchange notes in the name of, or request that outstanding notes not tendered or not accepted in the exchange offer be returned to, a person other than the registered tendering holder will be required to pay any applicable transf tax.

Consequences of Failure to Exchange

If you do not exchange your outstanding notes for exchange notes under the exchange offer, your outstanding notes will rema subject to the restrictions on transfer of such outstanding notes:

as set forth in the legend printed on the outstanding notes as a consequence of the issuance of the outstanding notes pursuant to the exemptions from, or in transactions not subject to, the registration requirements of the Securities Ac and applicable state securities laws; and

as otherwise set forth in the offering circular distributed in connection with the private offerings of the outstanding notes.

In general, you may not offer or sell your outstanding notes unless they are registered under the Securities Act or if the offer of sale is exempt from registration under the Securities Act and applicable state securities laws. Except as required by the registration rights agreement, we do not intend to register resales of the outstanding notes under the Securities Act.

Other

Participating in the exchange offer is voluntary, and you should carefully consider whether to accept. You are urged to consul your financial and tax advisors in making your own decision on what action to take.

We may in the future seek to acquire untendered outstanding notes in open market or privately negotiated transactions, throug subsequent exchange offers or otherwise. We have no present plans to acquire any outstanding notes that are not tendered in t exchange offer or to file a registration statement to permit resales of any untendered outstanding notes.

DESCRIPTION OF SENIOR NOTES

General

Certain terms used in this description are defined under the subheading Certain Definitions. In this description, (i) the term our and us each refer to SunGard Data Systems Inc. (SunGard) and its consolidated Subsidiaries and (ii) the term In only to SunGard and not any of its Subsidiaries.

The Issuer expects to issue up to \$500,000,000 aggregate principal amount of 10.625% senior notes due 2015 (the Senior Notes under an indenture dated as of September 29, 2008 (the Indenture) among the Issuer, the Guarantors and The Bank of New Mellon, as trustee (the Trustee) in exchange for up to \$500,000,000 aggregate principal amount of the currently outstandin 10.625% senior notes due 2015 issued on September 29, 2008. The currently outstanding 10.625% senior notes due 2015 wer issued in a private transaction that was not subject to the registration requirements of the Securities Act. Except as set forth herein, the terms of the Senior Notes will be substantially identical and include those stated in the Indenture and those made p of the Indenture by reference to the Trust Indenture Act.

The following description is only a summary of the material provisions of the Indenture, does not purport to be complete and qualified in its entirety by reference to the provisions of that agreement, including the definitions therein of certain terms used below. We urge you to read the Indenture because it, not this description, define your rights as Holders of the Senior Notes. You may request copies of the Indenture or the escrow agreement at our address set forth under the heading Offering Circular Summary.

Brief Description of Senior Notes

The Senior Notes are:

unsecured senior obligations of the Issuer;

pari passu in right of payment with all existing and future Senior Indebtedness (including the Senior Credit Faciliti and Existing Senior Notes) of the Issuer;

effectively subordinated to all secured Indebtedness of the Issuer (including the Senior Credit Facilities and the Existing Senior Secured Notes);

senior in right of payment to any future Subordinated Indebtedness (as defined with respect to the Senior Notes) (including the Existing Senior Subordinated Notes) of the Issuer;

initially guaranteed on a senior unsecured basis by each Restricted Subsidiary that guarantees the Senior Credit Facilities;

deposited in the escrow account until we consummate the acquisition of the GL Trade Block if, on the closing date this offering, we do not expect the closing of the acquisition of the GL Trade Block to occur within two business date of the closing of this offering; and

subject to registration with the SEC pursuant to the Registration Rights Agreement.

Guarantees

Edgar Filing: TransDigm Group INC - Form 10-Q

The Guarantors, as primary obligors and not merely as sureties, jointly and severally irrevocably and unconditionally guaranto on an unsecured senior basis, the performance and full and punctual payment when due, whether at maturity, by acceleration otherwise, of all obligations of the Issuer under the Indenture and the Senior Notes, whether for payment of principal of or interest on or Additional Interest in respect of the Senior Notes, expenses, indemnification or otherwise, on the terms set forth the Indenture by executing the Indenture.

The Restricted Subsidiaries (other than as detailed below) guarantee the Senior Notes. Each of the Guarantees of the Senior Notes a general unsecured senior obligation of each Guarantor and is *pari passu* in

119

right of payment with all existing and future Senior Indebtedness of each such entity, is effectively subordinated to all secured Indebtedness of each such entity and is senior in right of payment to all existing and future Subordinated Indebtedness (include the Existing Senior Subordinated Notes) of each such entity. The Senior Notes are structurally subordinated to Indebtedness of Subsidiaries of the Issuer that do not Guarantee the Senior Notes.

Not all of the Issuer s Subsidiaries guarantee the Senior Notes. In the event of a bankruptcy, liquidation or reorganization of a these non-guarantor Subsidiaries, the non-guarantor Subsidiaries will pay the holders of their debt and their trade creditors betthey will be able to distribute any of their assets to the Issuer. None of our Foreign Subsidiaries, broker-dealer subsidiaries, non-Wholly Owned Subsidiaries (subject to certain limited exceptions) or any Receivables Subsidiary guarantee the Senior Notes. For the six months ended June 30, 2009, the non-guarantor Subsidiaries generated 39% and 19% of our total revenue a EBITDA, respectively. In addition, as of June 30, 2009, the non-guarantor Subsidiaries held 28% of our consolidated assets.

The obligations of each Guarantor under its Guarantees are limited as necessary to prevent the Guarantees from constituting a fraudulent conveyance under applicable law.

Any entity that makes a payment under its Guarantee is entitled upon payment in full of all guaranteed obligations under the Indenture to a contribution from each other Guarantor in an amount equal to such other Guarantor s pro rata portion of such payment based on the respective net assets of all the Guarantors at the time of such payment determined in accordance with GAAP.

If a Guarantee was rendered voidable, it could be subordinated by a court to all other indebtedness (including guarantees and other contingent liabilities) of the Guarantor, and, depending on the amount of such indebtedness, a Guarantor s liability on i Guarantee could be reduced to zero. See Risk Factors Risks Related to the Notes Federal and state fraudulent transfer laws permit a court to void the guarantees, and, if that occurs, you may not receive any payment on the notes.

A Guarantee by a Guarantor provides by its terms that it shall be automatically and unconditionally released and discharged u

Senior Secured Indebtedness Versus the Senior Notes

The payment of the principal of, premium, if any, and interest on the Senior Notes and the payment of any Guarantee rank *pa passu* in right of payment to all Senior Indebtedness of the Issuer or the relevant Guarantor, as the case may be, including the obligations of the Issuer and such Guarantor under the Senior Credit Facilities and the Existing Senior Notes.

The Senior Notes are effectively subordinated in right of payment to all of the Issuer s and the Guarantors existing and futu secured Indebtedness to the extent of the value of the assets securing such Indebtedness. As of June 30, 2009, SunGard had \$5,065 million of secured Indebtedness, consisting entirely of secured Indebtedness under the Senior Credit Facilities and the Existing Senior Secured Notes (which have a face amount of \$250 million, but are recorded at \$232 million). As of June 30, 2009, \$317 million was outstanding under our Receivables Facility.

Although the Indenture will contain limitations on the amount of additional Indebtedness that the Issuer and the Guarantors mincur, under certain circumstances the amount of such Indebtedness could be substantial and, in any case, such Indebtedness representation of Indebtedness. See Certain Covenants Limitation on Incurrence of Indebtedness and Issuance of Disqualified Stock.

Paying Agent and Registrar for the Senior Notes

The Issuer maintains one or more paying agents for the Senior Notes in the Borough of Manhattan, City of New York. The in paying agent for the Senior Notes is the Trustee.

The Issuer also maintains a registrar with offices in the Borough of Manhattan, City of New York. The initial registrar is the Trustee. The registrar maintains a register reflecting ownership of the Senior Notes outstanding from time to time and makes payments on and facilitate transfer of Senior Notes on behalf of the Issuer.

The Issuer may change the paying agents or the registrars without prior notice to the Holders. The Issuer or any of its Subsidia may act as a paying agent or registrar.

Transfer and Exchange

A Holder may transfer or exchange Senior Notes in accordance with the Indenture. The registrar and the Trustee may require Holder to furnish appropriate endorsements and transfer documents in connection with a transfer of Senior Notes. Certain Covenants. Limitation on Incurrence of Indebtedne Issuance of Disqualified Stock and Preferred Stock, the Issuer may issue additional Senior Notes from time to time after this offering under the Indenture (*Additional Senior Notes*). The Senior Notes offered by the Issuer and any Additional Senior Issuesquently issued under the Indenture are treated as a single class for all purposes under the Indenture, including waivers, amendments, redemptions and offers to purchase. Unless the context requires otherwise, references to Senior Notes for all purposes of the Indenture and this. Description of Notes.

121

Interest on the Senior Notes accrues at the rate of 10.625% *per annum* and is payable semi-annually in arrears on April 1 and October 1, commencing on April 1, 2009, to Holders of record on the immediately preceding March 15 and September 15. Interest on the Senior Notes accrues from the most recent date to which interest has been paid or, if no interest has been paid, from and including the Issue Date. Interest on the Senior Notes is computed on the basis of a 360-day year comprised of twelv 30-day months.

Additional Interest

Additional Interest may accrue on the Senior Notes in certain circumstances pursuant to the Registration Rights Agreement. A references in the Indenture and this Description of Notes, in any context, to any interest or other amount payable on or with respect to the Senior Notes shall be deemed to include any Additional Interest pursuant to the Registration Rights Agreement. Principal of, premium, if any, and interest on the Senior Notes will be payable at the office or agency of the Issuer maintained such purpose within the City and State of New York or, at the option of the Issuer, payment of interest may be made by check mailed to the Holders of the Senior Notes at their respective addresses set forth in the register of Holders; *provided* that all payments of principal, premium, if any, and interest with respect to the Senior Notes represented by one or more global notes registered in the name of or held by DTC or its nominee will be made by wire transfer of immediately available funds to the accounts specified by the Holder or Holders thereof. Until otherwise designated by the Issuer, the Issuer s office or agency in York will be the office of the Trustee maintained for such purpose.

Mandatory Redemption; Offers to Purchase; Open Market Purchases

The Issuer is not required to make any mandatory redemption or sinking fund payments with respect to the Senior Notes. However, under certain circumstances, the Issuer may be required to offer to purchase Senior Notes as described under the caption Repurchase at the Option of Holders. We may at any time and from time to time purchase Senior Notes in the open market or otherwise.

Optional Redemption

Except as set forth below, the Issuer is not entitled to redeem the Senior Notes at its option prior to April 1, 2012.

At any time prior to April 1, 2012, the Issuer may redeem all or a part of the Senior Notes, upon not less than 30 nor more tha 60 days prior notice mailed by first-class mail to the registered address of each Holder of Senior Notes, at a redemption pric equal to 100% of the principal amount of the Senior Notes redeemed plus the Applicable Premium as of, and accrued and unpinterest and Additional Interest, if any, to the date of redemption (the *Redemption Date*), subject to the rights of Holders of Notes on the relevant record date to receive interest due on the relevant interest payment date.

On and after April 1, 2012, the Issuer may redeem the Senior Notes, in whole or in part, upon notice as described under the heading Repurchase at the Option of Holders Selection and Notice, at the redemption prices (expressed as percentages of amount of the Senior Notes to be redeemed) set forth below, plus accrued and unpaid interest thereon and Additional Interest, any, to the applicable Redemption Date, subject to the right of Holders of Senior Notes of record on the relevant record date to receive interest due on the relevant interest payment date, if redeemed during the twelve-month period beginning on April 1, of each of the years indicated below:

Change of Control

The Senior Notes provide that if a Change of Control occurs, unless the Issuer has previously or concurrently mailed a redemption notice with respect to all the outstanding Senior Notes as described under Optional Redemption, the Issuer wil an offer to purchase all of the Senior Notes pursuant to the offer described below (the Change of Control Offer) at a price is (the Change of Control Payment) equal to 101% of the aggregate principal amount thereof plus accrued and unpaid interest Additional Interest, if any, to the date of purchase, subject to the right of Holders of the Senior Notes of record on the relevant record date to receive interest due on the relevant interest payment date. Within 30 days following any Change of Control, the Issuer will send notice of such Change of Control Offer by first-class mail, with a copy to the Trustee, to each Holder of Senior Notes to the address of such Holder appearing in the security register with a copy to the Trustee, with the following informati

- (1) that a Change of Control Offer is being made pursuant to the covenant entitled Change of Control, and that all Senior N properly tendered pursuant to such Change of Control Offer will be accepted for payment by the Issuer;
- (2) the purchase price and the purchase date, which will be no earlier than 30 days nor later than 60 days from the date such notice is mailed (the *Change of Control Payment Date*);
- (3) that any Senior Note not properly tendered will remain outstanding and continue to accrue interest;
- (4) that unless the Issuer defaults in the payment of the Change of Control Payment, all Senior Notes accepted for payment pursuant to the Change of Control Offer will cease to accrue interest on the Change of Control Payment Date;
- (5) that Holders electing to have any Senior Notes purchased pursuant to a Change of Control Offer will be required to surren such Senior Notes, with the form entitled Option of Holder to Elect Purchase on the reverse of such Senior Notes complete the paying agent specified in the notice at the address specified in the notice prior to the close of business on the third Business Day preceding the Change of Control Payment Date;
- (6) that Holders will be entitled to withdraw their tendered Senior Notes and their election to require the Issuer to purchase su Senior Notes, *provided* that the paying agent receives, not later than the close of business on the 30th day following the date of the Change of Control notice, a telegram, telex, facsimile transmission or letter setting forth the name of the Holder of the Sen Notes, the principal amount of

123

Senior Notes tendered for purchase, and a statement that such Holder is withdrawing its tendered Senior Notes and its election have such Senior Notes purchased;

- (7) that if the Issuer is redeeming less than all of the Senior Notes, the Holders of the remaining Senior Notes will be issued n Senior Notes and such new Senior Notes will be equal in principal amount to the unpurchased portion of the Senior Notes surrendered. The unpurchased portion of the Senior Notes must be equal to \$2,000 or an integral multiple thereof; and
- (8) the other instructions, as determined by us, consistent with the covenant described hereunder, that a Holder must follow.

The Issuer will comply with the requirements of Rule 14e-1 under the Exchange Act and any other securities laws and regular thereunder to the extent such laws or regulations are applicable in connection with the repurchase of Senior Notes pursuant to Change of Control Offer. To the extent that the provisions of any securities laws or regulations conflict with the provisions of Indenture, the Issuer will comply with the applicable securities laws and regulations and shall not be deemed to have breached obligations described in the Indenture by virtue thereof.

On the Change of Control Payment Date, the Issuer will, to the extent permitted by law,

- (1) accept for payment all Senior Notes issued by it or portions thereof properly tendered pursuant to the Change of Control Offer.
- (2) deposit with the paying agent an amount equal to the aggregate Change of Control Payment in respect of all Senior Notes portions thereof so tendered, and
- (3) deliver, or cause to be delivered, to the Trustee for cancellation the Senior Notes so accepted together with an Officer s Certificate to the Trustee stating that such Senior Notes or portions thereof have been tendered to and purchased by the Issuer

The Senior Credit Facilities and future Credit Facilities or other agreements relating to Senior Indebtedness to which the Issue becomes a party may, provide that certain change of control events with respect to the Issuer would constitute a default thereunder (including a Change of Control under the Indenture). If we experience a change of control that triggers a default under Senior Credit Facilities, we could seek a waiver of such default or seek to refinance our Senior Credit Facilities. In the event we do not obtain such a waiver or refinance the Senior Credit Facilities, such default could result in amounts outstanding under our Senior Credit Facilities being declared due and payable and cause a Receivables Facility to be wound-down.

Our ability to pay cash to the Holders of Senior Notes following the occurrence of a Change of Control may be limited by our then-existing financial resources. Therefore, sufficient funds may not be available when necessary to make any required repurchases.

The Change of Control purchase feature of the Senior Notes may in certain circumstances make more difficult or discourage as ale or takeover of us and, thus, the removal of incumbent management. The Change of Control purchase feature is a result of negotiations between the Initial Purchasers and us. After the Issue Date, we have no present intention to engage in a transaction involving a Change of Control, although it is possible that we could decide to do so in the future. Subject to the limitations discussed below, we could, in the future, enter into certain transactions, including acquisitions, refinancings or other recapitalizations, that would not constitute a Change of Control under the Indenture, but that could increase the amount of indebtedness outstanding at such time or otherwise affect our capital structure or credit ratings. Restrictions on our ability to i additional Indebtedness are contained in the covenants described under Certain Covenants Limitation on Incurrence of Indebtedness and Issuance of Disqualified Stock and Preferred Stock and Certain Covenants Liens. Such restrictions in Indenture can be waived only with the consent of the Holders of a majority in principal amount of the Senior Notes then outstanding. Except for the limitations contained in such covenants, however, the

124

Indenture will not contain any covenants or provisions that may afford Holders of the Senior Notes protection in the event of highly leveraged transaction.

We will not be required to make a Change of Control Offer following a Change of Control if a third party makes the Change of Control Offer in the manner, at the times and otherwise in compliance with the requirements set forth in the Indenture applica to a Change of Control Offer made by us and purchases all Senior Notes validly tendered and not withdrawn under such Change of Control Offer. Notwithstanding anything to the contrary herein, a Change of Control Offer may be made in advance of a Change of Control, conditional upon such Change of Control, if a definitive agreement is in place for the Change of Control at the time of making of the Change of Control Offer.

The definition of Change of Control includes a disposition of all or substantially all of the assets of the Issuer to any Person Although there is a limited body of case law interpreting the phrase substantially all, there is no precise established definiti the phrase under applicable law. Accordingly, in certain circumstances there may be a degree of uncertainty as to whether a particular transaction would involve a disposition of all or substantially all of the assets of the Issuer. As a result, it may be unclear as to whether a Change of Control has occurred and whether a Holder of Senior Notes may require the Issuer to make offer to repurchase the Senior Notes as described above.

The provisions under the Indenture relative to the Issuer s obligation to make an offer to repurchase the Senior Notes as a res a Change of Control may be waived or modified with the written consent of the Holders of a majority in principal amount of t Senior Notes.

Asset Sales

The Indenture provides that the Issuer will not, and will not permit any of its Restricted Subsidiaries to, cause, make or suffer exist an Asset Sale, unless:

- (1) the Issuer or such Restricted Subsidiary, as the case may be, receives consideration at the time of such Asset Sale at least equal to the fair market value (as determined in good faith by the Issuer) of the assets sold or otherwise disposed of; and
- (2) except in the case of a Permitted Asset Swap, at least 75% of the consideration therefor received by the Issuer or such Restricted Subsidiary, as the case may be, is in the form of cash or Cash Equivalents; *provided* that the amount of:
- (a) any liabilities (as shown on the Issuer s or such Restricted Subsidiary s most recent balance sheet or in the footnotes ther the Issuer or such Restricted Subsidiary, other than liabilities that are by their terms subordinated to the Senior Notes, that are assumed by the transferee of any such assets and for which the Issuer and all of its Restricted Subsidiaries have been validly released by all creditors in writing,
- (b) any securities received by the Issuer or such Restricted Subsidiary from such transferee that are converted by the Issuer or such Restricted Subsidiary into cash (to the extent of the cash received) within 180 days following the closing of such Asset S and
- (c) any Designated Non-cash Consideration received by the Issuer or such Restricted Subsidiary in such Asset Sale having an aggregate fair market value, taken together with all other Designated Non-cash Consideration received pursuant to this clause that is at that time outstanding, not to exceed 2.5% of Total Assets at the time of the receipt of such Designated Non-cash Consideration, with the fair market value of each item of Designated Non-cash Consideration being measured at the time receipt and without giving effect to subsequent changes in value,

shall be deemed to be cash for purposes of this provision and for no other purpose.

125

Within 450 days after the receipt of any Net Proceeds of any Asset Sale, the Issuer or such Restricted Subsidiary, at its option may apply the Net Proceeds from such Asset Sale,

- (1) to permanently reduce:
- (a) Obligations under the Senior Credit Facilities, and to correspondingly reduce commitments with respect thereto;
- (b) Obligations under Senior Indebtedness that is secured by a Lien, which Lien is permitted by the Indenture, and to correspondingly reduce commitments with respect thereto;
- (c) Obligations under other Senior Indebtedness (and to correspondingly reduce commitments with respect thereto), *provided* the Issuer shall equally and ratably reduce Obligations under the Senior Notes as provided under Optional Redemption, the open-market purchases (to the extent such purchases are at or above 100% of the principal amount thereof) or by making an of (in accordance with the procedures set forth below for an Asset Sale Offer) to all Holders to purchase their Senior Notes at 10 of the principal amount thereof, plus the amount of accrued but unpaid interest, if any, on the amount of Senior Notes that we otherwise be prepaid; or
- (d) Indebtedness of a Restricted Subsidiary that is not a Guarantor, other than Indebtedness owed to the Issuer or another Restricted Subsidiary;
- (2) to make (a) an Investment in any one or more businesses, *provided* that such Investment in any business is in the form of acquisition of Capital Stock and results in the Issuer or another of its Restricted Subsidiaries, as the case may be, owning an amount of the Capital Stock of such business such that it constitutes a Restricted Subsidiary, (b) capital expenditures or (c) acquisitions of other assets, in each of (a), (b) and (c), used or useful in a Similar Business, or
- (3) to make an investment in (a) any one or more businesses, *provided* that such Investment in any business is in the form of t acquisition of Capital Stock and results in the Issuer or another of its Restricted Subsidiaries, as the case may be, owning an amount of the Capital Stock of such business such that it constitutes a Restricted Subsidiary, (b) properties or (c) acquisitions other assets that, in each of (a), (b) and (c), replace the businesses, properties and/or assets that are the subject of such Asset S

provided that, in the case of clauses (2) and (3) above, a binding commitment shall be treated as a permitted application of the Proceeds from the date of such commitment so long as the Issuer, or such other Restricted Subsidiary enters into such commitment with the good faith expectation that such Net Proceeds will be applied to satisfy such commitment within 180 day of such commitment (an *Acceptable Commitment*) and, in the event any Acceptable Commitment is later cancelled or term for any reason before the Net Proceeds are applied in connection therewith, the Issuer or such Restricted Subsidiary enters into another Acceptable Commitment (a *Second Commitment*) within 180 days of such cancellation or termination; provided fut that if any Second Commitment is later cancelled or terminated for any reason before such Net Proceeds are applied, then suc Net Proceeds shall constitute Excess Proceeds.

Any Net Proceeds from an Asset Sale that are not invested or applied as provided and within the time period set forth in the first sentence of the preceding paragraph will be deemed to constitute *Excess Proceeds*. When the aggregate amount of Excess Proceeds exceeds \$100.0 million, the Issuer shall make an offer to all Holders of the Senior Notes and, if required by the term any Indebtedness that is *pari passu* with the Senior Notes (*Pari Passu Indebtedness*), to the holders of such Pari Passu Indebtedness (an *Asset Sale Offer*), to purchase the maximum aggregate principal amount of the Senior Notes and such Par Indebtedness that is an integral multiple of \$2,000 that may be purchased out of the Excess Proceeds at an offer price in cash an amount equal to 100% of the principal amount thereof, plus accrued and unpaid interest and Additional Interest, if any, to date fixed for the closing of such offer, in accordance with the procedures set forth in the Indenture. The Issuer will commence Asset Sale Offer with respect to Excess Proceeds within ten Business Days after the date that Excess Proceeds exceed \$100.0 million by mailing the notice required pursuant to the terms of the Indenture, with a copy to the Trustee.

126

To the extent that the aggregate amount of Senior Notes and such Pari Passu Indebtedness tendered pursuant to an Asset Sale Offer is less than the Excess Proceeds, the Issuer may use any remaining Excess Proceeds for general corporate purposes, subto other covenants contained in the Indenture. If the aggregate principal amount of Senior Notes or the Pari Passu Indebtedness surrendered by such holders thereof exceeds the amount of Excess Proceeds, the Trustee shall select the Senior Notes and such Pari Passu Indebtedness to be purchased on a pro rata basis based on the accreted value or principal amount of the Senior Not or such Pari Passu Indebtedness tendered. Upon completion of any such Asset Sale Offer, the amount of Excess Proceeds shall reset at zero.

Pending the final application of any Net Proceeds pursuant to this covenant, the holder of such Net Proceeds may apply such Proceeds temporarily to reduce Indebtedness outstanding under a revolving credit facility or otherwise invest such Net Proceed in any manner not prohibited by the Indenture.

The Issuer will comply with the requirements of Rule 14e-1 under the Exchange Act and any other securities laws and regulat thereunder to the extent such laws or regulations are applicable in connection with the repurchase of the Senior Notes pursuan an Asset Sale Offer. To the extent that the provisions of any securities laws or regulations conflict with the provisions of the Indenture, the Issuer will comply with the applicable securities laws and regulations and shall not be deemed to have breached obligations described in the Indenture by virtue thereof.

Selection and Notice

If the Issuer is redeeming less than all of the Senior Notes issued by it at any time, the Trustee will select the Senior Notes to redeemed (a) if the Senior Notes are listed on any national securities exchange, in compliance with the requirements of the principal national securities exchange on which the Senior Notes are listed or (b) on a pro rata basis to the extent practicable.

Notices of purchase or redemption shall be mailed by first-class mail, postage prepaid, at least 30 but not more than 60 days before the purchase or redemption date to each Holder of Senior Notes at such Holder s registered address, except that (a) redemption notices may be mailed more than 60 days prior to a redemption date if the notice is issued in connection with a defeasance of the Senior Notes or a satisfaction and discharge of the Indenture and (b) redemption notices need not be mailed more than one Business Day before the redemption date if the notice is issued in connection with a special mandatory redemption. If any Senior Note is to be purchased or redeemed in part only, any notice of purchase or redemption that relates such Senior Note shall state the portion of the principal amount thereof that has been or is to be purchased or redeemed.

The Issuer will issue a new Senior Note in a principal amount equal to the unredeemed portion of the original Senior Note in a name of the Holder upon cancellation of the original Senior Note. Senior Notes called for redemption become due on the date fixed for redemption. On and after the redemption date, interest ceases to accrue on Senior Notes or portions of them called for redemption.

For purposes of determining compliance with this covenant:

- (1) in the event that an item of Indebtedness, Disqualified Stock or Preferred Stock (or any portion thereof) meets the criteria more than one of the categories of permitted Indebtedness, Disqualified Stock or Preferred Stock described in clauses (1) thro (21) above or is entitled to be incurred pursuant to the first paragraph of this covenant, the Issuer, in its sole discretion, will classify or reclassify such item of Indebtedness, Disqualified Stock or Preferred Stock (or any portion thereof) and will only be required to include the amount and type of such Indebtedness, Disqualified Stock or Preferred Stock in one of the above clause provided that all Indebtedness outstanding under the Credit Facilities on the Issue Date will be treated as incurred on the Issue Date under clause (1) of the preceding paragraph; and
- (2) at the time of incurrence, the Issuer will be entitled to divide and classify an item of Indebtedness in more than one of the types of Indebtedness described in the first and second paragraphs above.

Accrual of interest, the accretion of accreted value and the payment of interest in the form of additional Indebtedness, Disqualified Stock or Preferred Stock will not be deemed to be an incurrence of Indebtedness, Disqualified Stock or Preferred Stock for purposes of this covenant.

For purposes of determining compliance with any U.S. dollar-denominated restriction on the incurrence of Indebtedness, the dollar-equivalent principal amount of Indebtedness denominated in a foreign currency shall be calculated based on the relevant currency exchange rate in effect on the date such Indebtedness was incurred, in the case of term debt, or first committed, in the case of revolving credit debt; *provided* that if such Indebtedness is incurred to refinance other Indebtedness denominated in a foreign currency, and such refinancing would cause the applicable U.S. dollar denominated restriction to be exceeded if calculated at the relevant currency exchange rate in effect on the date of such refinancing, such U.S. dollar-denominated restriction shall be deemed not to have been exceeded so long as the principal amount of such refinancing Indebtedness does a exceed the principal amount of such Indebtedness being refinanced.

137

The principal amount of any Indebtedness incurred to refinance other Indebtedness, if incurred in a different currency from th Indebtedness being refinanced, shall be calculated based on the currency exchange rate applicable to the currencies in which s respective Indebtedness is denominated that is in effect on the date of such refinancing.

The Indenture provides that the Issuer will not, and will not permit any Guarantor to, directly or indirectly, incur any Indebtedness (including Acquired Indebtedness) that is subordinated or junior in right of payment to any Indebtedness of the Issuer or such Guarantor, as the case may be, unless such Indebtedness is expressly subordinated in right of payment to the So Notes or such Guarantor s Guarantee to the extent and in the same manner as such Indebtedness is subordinated to other Indebtedness of the Issuer or such Guarantor, as the case may be.

The Indenture will not treat (1) unsecured Indebtedness as subordinated or junior to Secured Indebtedness merely because it is unsecured or (2) Senior Indebtedness as subordinated or junior to any other Senior Indebtedness merely because it has a junio priority with respect to the same collateral.

Liens

The Issuer will not, and will not permit any Guarantor to, directly or indirectly, create, incur, assume or suffer to exist any Lie (except Permitted Liens) that secures obligations under any Indebtedness or any related Guarantee, on any asset or property o Issuer or any Guarantor, or any income or profits therefrom, or assign or convey any right to receive income therefrom, unless

- (1) in the case of Liens securing Subordinated Indebtedness, the Senior Notes and related Guarantees are secured by a Lien or such property, assets or proceeds that is senior in priority to such Liens; or
- (2) in all other cases, the Senior Notes or the Guarantees are equally and ratably secured, except that the foregoing shall not at to (a) Liens securing the Senior Notes and the related Guarantees, (b) Liens securing Indebtedness permitted to be incurred under the Credit Facilities, including any letter of credit facility relating thereto, that was permitted by the terms of the Indenture to be incurred pursuant to clause (1) of the second paragraph under and Limitation on Incurrence of Indebtedness and Issuance of Disqualified Stock and Preferred Stock and (c) Liens incurred to secure Obligations in respect of any Indebtedness permitted be incurred pursuant to the covenant described above under above under Limitation on Incurrence of Indebtedness and Issuance of Disqualified Stock and Preferred Stock; provided that, with respect to Liens securing Obligations permitted under this subclause (c), at the time of incurrence and after giving pro forma effect thereto, the Consolidated Secured Debt Ratio would no greater than 4.0 to 1.0.

- (3) promptly from time to time after the occurrence of an event required to be therein reported, such other reports on Form 8-l or any successor or comparable form; and
- (4) any other information, documents and other reports which the Issuer would be required to file with the SEC if it were subject to Section 13 or 15(d) of the Exchange Act;

in each case, in a manner that complies in all material respects with the requirements specified in such form; *provided* that the Issuer shall not be so obligated to file such reports with the SEC if the SEC does not permit such filing, in which event the Iss will make available such information to prospective purchasers of Senior Notes, in addition to providing such information to Trustee and the Holders of the Senior Notes, in each case within 15 days after the time the Issuer would be required to file suc information with the SEC, if it were subject to Sections 13 or 15(d) of the Exchange Act. In addition, to the extent not satisfie the foregoing, the Issuer will agree that, for so long as any Senior Notes are outstanding, it will furnish to Holders and to securities analysts and prospective investors, upon their request, the information required to be delivered pursuant to Rule 144A(d)(4) under the Securities Act.

In the event that any direct or indirect parent company of the Issuer becomes a guarantor of the Senior Notes, the Indenture w permit the Issuer to satisfy its obligations in this covenant with respect to financial

information relating to the Issuer by furnishing financial information relating to such parent; *provided* that the same is accompanied by consolidating information that explains in reasonable detail the differences between the information relating such parent, on the one hand, and the information relating to the Issuer and its Restricted Subsidiaries on a standalone basis, of the other hand.

Notwithstanding the foregoing, such requirements shall be deemed satisfied prior to the commencement of the exchange offer the effectiveness of the shelf registration statement by the filing with the SEC of the exchange offer registration statement or registration statement, and any amendments thereto, with such financial information that satisfies Regulation S-X of the Securities Act.

Events of Default and Remedies

The Indenture provides that each of the following is an Event of Default:

- (1) default in payment when due and payable, upon redemption, acceleration or otherwise, of principal of, or premium, if any the Senior Notes:
- (2) default for 30 days or more in the payment when due of interest or Additional Interest on or with respect to the Senior Not
- (3) failure by the Issuer or any Guarantor for 60 days after receipt of written notice given by the Trustee or the Holders of not 30% in principal amount of the Senior Notes to comply with any of its obligations, covenants or agreements (other than a defareferred to in clauses (1) and (2) above) contained in the Indenture or the Senior Notes;
- (4) default under any mortgage, indenture or instrument under which there is issued or by which there is secured or evidenced Indebtedness for money borrowed by the Issuer or any of its Restricted Subsidiaries or the payment of which is guaranteed by Issuer or any of its Restricted Subsidiaries, other than Indebtedness owed to the Issuer or a Restricted Subsidiary, whether suc Indebtedness or guarantee now exists or is created after the issuance of the Senior Notes, if both:
- (a) such default either results from the failure to pay any principal of such Indebtedness at its stated final maturity (after giving effect to any applicable grace periods) or relates to an obligation other than the obligation to pay principal of any such Indebtedness at its stated final maturity and results in the holder or holders of such Indebtedness causing such Indebtedness to become due prior to its stated maturity; and
- (b) the principal amount of such Indebtedness, together with the principal amount of any other such Indebtedness in default for failure to pay principal at stated final maturity (after giving effect to any applicable grace periods), or the maturity of which have been so accelerated, aggregate \$100.0 million or more at any one time outstanding;
- (5) failure by the Issuer or any Significant Subsidiary to pay final judgments aggregating in excess of \$100.0 million, which f judgments remain unpaid, undischarged and unstayed for a period of more than 60 days after such judgment becomes final, at in the event such judgment is covered by insurance, an enforcement proceeding has been commenced by any creditor upon su judgment or decree which is not promptly stayed;
- (6) certain events of bankruptcy or insolvency with respect to the Issuer or any Significant Subsidiary; or
- (7) the Guarantee of any Significant Subsidiary shall for any reason cease to be in full force and effect or be declared null and void or any responsible officer of any Guarantor that is a Significant Subsidiary, as the case may be, denies that it has any fur liability under its Guarantee or gives notice to such effect, other than by reason of the termination of the Indenture or the releasof any such Guarantee in accordance with the Indenture.

144

If any Event of Default (other than of a type specified in clause (6) above) occurs and is continuing under the Indenture, the Trustee or the Holders of at least 30% in principal amount of the then total outstanding Senior Notes may declare the principal premium, if any, interest and any other monetary obligations on all the then outstanding Senior Notes to be due and payable immediately.

Upon the effectiveness of such declaration, such principal and interest will be due and payable immediately. Notwithstanding foregoing, in the case of an Event of Default arising under clause (6) of the first paragraph of this section, all outstanding Sent Notes will become due and payable without further action or notice. The Indenture provides that the Trustee may withhold from the Holders notice of any continuing Default, except a Default relating to the payment of principal, premium, if any, or interest it determines that withholding notice is in their interest. In addition, the Trustee shall have no obligation to accelerate the Sent Notes if in the best judgment of the Trustee acceleration is not in the best interest of the Holders of the Senior Notes.

The Indenture provides that the Holders of a majority in aggregate principal amount of the then outstanding Senior Notes by notice to the Trustee may on behalf of the Holders of all of the Senior Notes waive any existing Default and its consequences under the Indenture except a continuing Default in the payment of interest on, premium, if any, or the principal of any Senior Note held by a non-consenting Holder. In the event of any Event of Default specified in clause (4) above, such Event of Default and all consequences thereof (excluding any resulting payment default, other than as a result of acceleration of the Senior Not shall be annulled, waived and rescinded, automatically and without any action by the Trustee or the Holders, if within 20 days after such Event of Default arose:

- (1) the Indebtedness or guarantee that is the basis for such Event of Default has been discharged; or
- (2) holders thereof have rescinded or waived the acceleration, notice or action (as the case may be) giving rise to such Event of Default; or
- (3) the default that is the basis for such Event of Default has been cured.

Subject to the provisions of the Indenture relating to the duties of the Trustee thereunder, in case an Event of Default occurs a is continuing, the Trustee will be under no obligation to exercise any of the rights or powers under the Indenture at the reques direction of any of the Holders of the Senior Notes unless the Holders have offered to the Trustee reasonable indemnity or security against any loss, liability or expense. Except to enforce the right to receive payment of principal, premium (if any) or interest when due, no Holder of a Senior Note may pursue any remedy with respect to the Indenture or the Senior Notes unless unless the serior to the Indenture or the Senior Notes unless the serior to the Indenture or the Senior Notes unless the serior to the Indenture or the Senior Notes unless the serior to the Indenture or the Senior Notes unless the serior to the Indenture or the Senior Notes unless the serior to the Indenture or the Senior Notes unless the serior to the Indenture or the Senior Notes unless the serior to the Indenture or the Senior Notes unless the Indenture or the Indenture or the Indenture or the Inden

- (1) such Holder has previously given the Trustee notice that an Event of Default is continuing;
- (2) Holders of at least 30% in principal amount of the total outstanding Senior Notes have requested the Trustee to pursue the remedy;
- (3) Holders of the Senior Notes have offered the Trustee reasonable security or indemnity against any loss, liability or expens
- (4) the Trustee has not complied with such request within 60 days after the receipt thereof and the offer of security or indemn and
- (5) Holders of a majority in principal amount of the total outstanding Senior Notes have not given the Trustee a direction inconsistent with such request within such 60-day period.

Subject to certain restrictions, under the Indenture the Holders of a majority in principal amount of the total outstanding Senior Notes are given the right to direct the time, method and place of conducting any proceeding for any remedy available to the Trustee or of exercising any trust or power conferred on the Trustee. The Trustee, however, may refuse to follow any direction that conflicts with law or the Indenture or that the Trustee determines is unduly prejudicial to the rights of any other Holder of Senior Note or that would involve the Trustee in personal liability.

The Indenture provides that the Issuer is required to deliver to the Trustee annually a statement regarding compliance with the Indenture, and the Issuer is required, within five Business Days, upon becoming aware of any Default, to deliver to the Truste statement specifying such Default.

No Personal Liability of Directors, Officers, Employees and Stockholders

No director, officer, employee, incorporator or stockholder of the Issuer or any Guarantor or any of their parent companies sh have any liability for any obligations of the Issuer or the Guarantors under the Senior Notes, the Guarantees, the Indenture or escrow agreement or for any claim based on, in respect of, or by reason of such obligations or their creation. Each Holder by accepting Senior Notes waives and releases all such liability. The waiver and release are part of the consideration for issuance the Senior Notes. Such waiver may not be effective to waive liabilities under the federal securities laws and it is the view of the SEC that such a waiver is against public policy.

Legal Defeasance and Covenant Defeasance

The obligations of the Issuer and the Guarantors under the Indenture will terminate (other than certain obligations) and will be released upon payment in full of all of the Senior Notes. The Issuer may, at its option and at any time, elect to have all of its obligations discharged with respect to the Senior Notes and have the Issuer and each Guarantor s obligation discharged with respect to its Guarantee (*Legal Defeasance*) and cure all then existing Events of Default except for:

- (1) the rights of Holders of Senior Notes to receive payments in respect of the principal of, premium, if any, and interest on th Senior Notes when such payments are due solely out of the trust created pursuant to the Indenture;
- (2) the Issuer s obligations with respect to Senior Notes concerning issuing temporary Senior Notes, registration of such Senior Notes, mutilated, destroyed, lost or stolen Senior Notes and the maintenance of an office or agency for payment and money for security payments held in trust;
- (3) the rights, powers, trusts, duties and immunities of the Trustee, and the Issuer s obligations in connection therewith; and
- (4) the Legal Defeasance provisions of the Indenture.

In addition, the Issuer may, at its option and at any time, elect to have its obligations and those of each Guarantor released wit respect to certain covenants that are described in the Indenture (*Covenant Defeasance*) and thereafter any omission to com with such obligations shall not constitute a Default with respect to the Senior Notes. In the event Covenant Defeasance occurs certain events (not including bankruptcy, receivership, rehabilitation and insolvency events pertaining to the Issuer) described under Events of Default and Remedies will no longer constitute an Event of Default with respect to the Senior Notes.

In order to exercise either Legal Defeasance or Covenant Defeasance with respect to the Senior Notes:

- (1) the Issuer must irrevocably deposit with the Trustee, in trust, for the benefit of the Holders of the Senior Notes, cash in U. dollars, Government Securities, or a combination thereof, in such amounts as will be sufficient, in the opinion of a nationally recognized firm of independent public accountants, to pay the principal of, premium, if any, and interest due on the Senior Notes and the trusted maturity date or on the redemption date, as the case may be, of such principal, premium, if any, or interest on su Senior Notes and the Issuer must specify whether such Senior Notes are being defeased to maturity or to a particular redempt date;
- (2) in the case of Legal Defeasance, the Issuer shall have delivered to the Trustee an Opinion of Counsel reasonably acceptab the Trustee confirming that, subject to customary assumptions and exclusions,
- (a) the Issuer has received from, or there has been published by, the United States Internal Revenue Service a ruling, or

146

(b) since the issuance of the Senior Notes, there has been a change in the applicable U.S. federal income tax law,

in either case to the effect that, and based thereon such Opinion of Counsel shall confirm that, subject to customary assumption and exclusions, the Holders of the Senior Notes will not recognize income, gain or loss for U.S. federal income tax purposes, applicable, as a result of such Legal Defeasance and will be subject to U.S. federal income tax on the same amounts, in the same namer and at the same times as would have been the case if such Legal Defeasance had not occurred;

- (3) in the case of Covenant Defeasance, the Issuer shall have delivered to the Trustee an Opinion of Counsel reasonably acceptable to the Trustee confirming that, subject to customary assumptions and exclusions, the Holders of the Senior Notes was not recognize income, gain or loss for U.S. federal income tax purposes as a result of such Covenant Defeasance and will be subject to such tax on the same amounts, in the same manner and at the same times as would have been the case if such Covenant Defeasance had not occurred;
- (4) no Default (other than that resulting from borrowing funds to be applied to make such deposit and the granting of Liens in connection therewith) shall have occurred and be continuing on the date of such deposit;
- (5) such Legal Defeasance or Covenant Defeasance shall not result in a breach or violation of, or constitute a default under the Senior Credit Facilities, the Senior Subordinated Notes or the indenture pursuant to which the Senior Subordinated Notes wer issued or any other material agreement or instrument (other than the Indenture) to which, the Issuer or any Guarantor is a part by which the Issuer or any Guarantor is bound;
- (6) the Issuer shall have delivered to the Trustee an Opinion of Counsel to the effect that, as of the date of such opinion and subject to customary assumptions and exclusions following the deposit, the trust funds will not be subject to the effect of Section 547 of Title 11 of the United States Code;
- (7) the Issuer shall have delivered to the Trustee an Officer s Certificate stating that the deposit was not made by the Issuer w the intent of defeating, hindering, delaying or defrauding any creditors of the Issuer or any Guarantor or others; and
- (8) the Issuer shall have delivered to the Trustee an Officer s Certificate and an Opinion of Counsel (which Opinion of Counsemay be subject to customary assumptions and exclusions) each stating that all conditions precedent provided for or relating to Legal Defeasance or the Covenant Defeasance, as the case may be, have been complied with.

Satisfaction and Discharge

The Indenture will be discharged and will cease to be of further effect as to all Senior Notes, when either:

- (1) all Senior Notes theretofore authenticated and delivered, except lost, stolen or destroyed Senior Notes which have been replaced or paid and Senior Notes for whose payment money has theretofore been deposited in trust, have been delivered to the Trustee for cancellation; or
- (2)(a) all Senior Notes not theretofore delivered to the Trustee for cancellation have become due and payable by reason of the making of a notice of redemption or otherwise, will become due and payable within one year or are to be called for redemption within one year under arrangements satisfactory to the Trustee for the giving of notice of redemption by the Trustee in the nar and at the expense, of the Issuer and the Issuer or any Guarantor have irrevocably deposited or caused to be deposited with the Trustee as trust funds in trust solely for the benefit of the Holders of the Senior Notes, cash in U.S. dollars, Government Securities, or a combination thereof, in such amounts as will be sufficient without consideration of any reinvestment of interespay and discharge the entire indebtedness on the Senior

147

Notes not theretofore delivered to the Trustee for cancellation for principal, premium, if any, and accrued interest to the date of maturity or redemption;

- (b) no Default (other than that resulting from borrowing funds to be applied to make such deposit) with respect to the Indentu the Senior Notes shall have occurred and be continuing on the date of such deposit or shall occur as a result of such deposit as such deposit will not result in a breach or violation of, or constitute a default under the Senior Credit Facilities, Senior Subordinated Notes (or the indenture under which the Senior Subordinated Notes are issued) or any other material agreement instrument (other than the Indenture) to which the Issuer or any Guarantor is a party or by which the Issuer or any Guarantor bound;
- (c) the Issuer has paid or caused to be paid all sums payable by it under the Indenture; and
- (d) the Issuer has delivered irrevocable instructions to the Trustee to apply the deposited money toward the payment of the Se Notes at maturity or the redemption date, as the case may be.

In addition, the Issuer must deliver an Officer s Certificate and an Opinion of Counsel to the Trustee stating that all condition precedent to satisfaction and discharge have been satisfied.

Amendment, Supplement and Waiver

Except as provided in the next two succeeding paragraphs, the Indenture, any Guarantee and the Senior Notes may be amende supplemented with the consent of the Holders of at least a majority in principal amount of the Senior Notes then outstanding, including consents obtained in connection with a purchase of, or tender offer or exchange offer for, Senior Notes, and any existing Default or compliance with any provision of the Indenture or the Senior Notes issued thereunder may be waived with consent of the Holders of a majority in principal amount of the then outstanding Senior Notes, other than Senior Notes beneficially owned by the Issuer or its Affiliates (including consents obtained in connection with a purchase of or tender offer exchange offer for the Senior Notes).

The Indenture provides that, without the consent of each affected Holder of Senior Notes, an amendment or waiver may not, respect to any Senior Notes held by a non-consenting Holder:

- (1) reduce the principal amount of such Senior Notes whose Holders must consent to an amendment, supplement or waiver;
- (2) reduce the principal of or change the fixed final maturity of any such Senior Note or alter or waive the provisions with rest to the redemption of such Senior Notes (other than provisions relating to the covenants described above under the caption Repurchase at the Option of Holders);
- (3) reduce the rate of or change the time for payment of interest on any Senior Note;
- (4) waive a Default in the payment of principal of or premium, if any, or interest on the Senior Notes, except a rescission of acceleration of the Senior Notes by the Holders of at least a majority in aggregate principal amount of the Senior Notes and a waiver of the payment default that resulted from such acceleration, or in respect of a covenant or provision contained in the Indenture or any Guarantee which cannot be amended or modified without the consent of all Holders;
- (5) make any Senior Note payable in money other than that stated therein;

CERTAIN UNITED STATES FEDERAL

INCOME AND ESTATE TAX CONSEQUENCES OF THE EXCHANGE OFFER

The exchange of outstanding notes for exchange notes in the exchange offer will not constitute a taxable event to holders for United States federal income tax purposes. Consequently, no gain or loss will be recognized by a holder upon receipt of an exchange note, the holding period of the exchange note will include the holding period of the outstanding note exchanged therefor and the basis of the exchange note will be the same as the basis of the outstanding note immediately before the exchange note.

In any event, persons considering the exchange of outstanding notes for exchange notes should consult their own tax advisors concerning the United States federal income tax consequences in light of their particular situations as well as consequences arising under the laws of any other taxing jurisdiction.

171

CERTAIN ERISA CONSIDERATIONS

The following is a summary of certain considerations associated with the purchase of the notes by employee benefit plans that subject to Title I of the Employee Retirement Income Security Act of 1974, as amended (ERISA), plans, individual retirem accounts and other arrangements that are subject to Section 4975 of the Code or provisions under any federal, state, local, non-U.S. or other laws, rules or regulations that are similar to such provisions of ERISA or the Code (collectively, Similar L and entities whose underlying assets are considered to include plan assets (within the meaning of ERISA) of any such plan account or arrangement (each, a Plan).

General Fiduciary Matters

ERISA and the Code impose certain duties on persons who are fiduciaries of a Plan subject to Title I of ERISA or Section 49' of the Code (an ERISA Plan) and prohibit certain transactions involving the assets of an ERISA Plan and its fiduciaries or interested parties. Under ERISA and the Code, any person who exercises any discretionary authority or control over the administration of such an ERISA Plan or the management or disposition of the assets of such an ERISA Plan, or who renders investment advice for a fee or other compensation to such an ERISA Plan, is generally considered to be a fiduciary of the ERIPA.

In considering an investment in the notes of a portion of the assets of any Plan, a fiduciary should determine whether the investment is in accordance with the documents and instruments governing the Plan and the applicable provisions of ERISA, Code or any Similar Law relating to a fiduciary s duties to the Plan including, without limitation, the prudence, diversification delegation of control and prohibited transaction provisions of ERISA, the Code and any other applicable Similar Laws.

Prohibited Transaction Issues

Section 406 of ERISA and Section 4975 of the Code prohibit ERISA Plans from engaging in specified transactions involving plan assets with persons or entities who are parties in interest, within the meaning of ERISA, or disqualified persons, meaning of Section 4975 of the Code, unless an exemption is available. A party in interest or disqualified person who engage a non-exempt prohibited transaction may be subject to excise taxes and other penalties and liabilities under ERISA and/or the Code. In addition, the fiduciary of the ERISA Plan that engaged in such a non-exempt prohibited transaction may be subject t penalties and liabilities under ERISA and the Code. The acquisition and/or holding of notes by an ERISA Plan with respect to which we are considered a party in interest or disqualified person may constitute or result in a direct or indirect prohibited transaction under Section 406 of ERISA and/or Section 4975 of the Code, unless the investment is acquired and is held in accordance with an applicable statutory, class or individual prohibited transaction exemption. In this regard, the United States Department of Labor has issued prohibited transaction class exemptions (PTCEs) that may apply to the acquisition and hold the notes. These class exemptions include, without limitation, PTCE 84-14, respecting transactions determined by independent qualified professional asset managers, PTCE 90-1, respecting insurance company pooled separate accounts, PTCE 91-38, respecting bank collective investment funds, PTCE 95-60, respecting life insurance company general accounts and PTCE 96respecting transactions determined by in-house asset managers. In addition, Section 408(17) of ERISA and Section 4975(d)(2 of the Code provide relief from the prohibited transaction provisions of ERISA and Section 4975 of the Code for certain transactions, provided that neither the issuer of the securities nor any of its affiliates (directly or indirectly) have or exercise a discretionary authority or control or render any investment advice with respect to the assets of any ERISA Plan involved in th transaction and provided further that the ERISA Plan pays no more than adequate consideration in connection with the transaction. There can be no assurance that all of the conditions of any such exemptions will be satisfied.

Because of the foregoing, the notes should not be purchased or held by any person investing plan assets of any Plan, unless purchase and holding will not constitute a non-exempt prohibited transaction under ERISA and the Code or similar violation of any applicable Similar Laws.

172

Representation

Accordingly, by acceptance of a note, each purchaser and subsequent transferee will be deemed to have represented and warranted that either (i) no portion of the assets used by such purchaser or transferee to acquire or hold the notes constitutes assets of any Plan or (ii) the purchase and holding of the notes by such purchaser or transferee will not constitute a non-exemptonibited transaction under Section 406 of ERISA or Section 4975 of the Code or any similar violation under any applicable Similar Laws.

The foregoing discussion is general in nature and is not intended to be all-inclusive. Due to the complexity of these rules and penalties that may be imposed upon persons involved in non-exempt prohibited transactions, it is particularly important that fiduciaries or other persons considering purchasing the notes (and holding or disposing the notes) on behalf of, or with the ass of, any Plan, consult with their counsel regarding the potential applicability of ERISA, Section 4975 of the Code and any Sim Laws to such transactions and whether an exemption would be applicable to the purchase, holding and disposition of the note:

173

PLAN OF DISTRIBUTION

Each broker-dealer that receives exchange notes for its own account pursuant to the exchange offer must acknowledge that it deliver a prospectus in connection with any resale of such exchange notes. This prospectus, as it may be amended or supplemented from time to time, may be used by a broker-dealer in connection with resales of exchange notes received in exchange for outstanding notes where such outstanding notes were acquired as a result of market-making activities or other trading activities. SunGard Data Systems Inc.

Notes to Consolidated Financial Statements

1. Basis of Presentation and Summary of Significant Accounting Policies:

SunGard Data Systems Inc. (SunGard or the Company) was acquired on August 11, 2005 (the Transaction) by a conprivate equity investment funds associated with Bain Capital Partners, The Blackstone Group, Goldman Sachs & Co., Kohlbe Kravis Roberts & Co., Providence Equity Partners, Silver Lake and TPG (collectively, the Sponsors).

SunGard is a wholly owned subsidiary of SunGard Holdco LLC, which is wholly owned by SunGard Holding Corp., which is wholly owned by SunGard Capital Corp. II, which is a subsidiary of SunGard Capital Corp. SunGard Capital Corp. and SunCapital Corp. II are collectively referred to as the Parent Companies. All of these companies were formed for the purpose of facilitating the Transaction and are collectively referred to as the Holding Companies.

SunGard has four segments: Financial Systems (FS), Higher Education (HE), Public Sector (PS) and Availability Se The Company s Software & Processing Solutions business is comprised of the FS, HE and PS segments. The consolidated financial statements include the accounts of the Company and its majority-owned subsidiaries. All significant intercompany transactions and accounts have been eliminated. The consolidated financial statements exclude the accounts of the Holding Companies.

Estimates

The preparation of consolidated financial statements in conformity with accounting principles generally accepted in the Unite States of America requires management to make many estimates and judgments that affect the reported amounts of assets, liabilities, revenue and expenses. The Company evaluates its estimates and judgments on an ongoing basis and revises them we necessary. Actual results may differ from the original or revised estimates.

The Company amortizes identifiable intangible assets over periods that it believes approximate the related useful lives of thos assets based upon estimated future operating results and cash flows of the underlying business operations. The Company clos monitors estimates of those lives, which could change due to many factors, including product demand, market conditions, technological developments, economic conditions and competition.

The presentation of certain prior year amounts has been revised to conform to the current year presentation.

Revenue Recognition

The following criteria must be met in determining whether revenue may be recorded: persuasive evidence of a contract exists services have been provided; the price is known; and collection is reasonably assured.

The Company generates services revenue from availability services, processing services, software maintenance and rentals, professional services and broker/dealer fees. Services revenue is recorded as the services are provided based on the fair value each element which is based on the sales price of each element when sold separately. Most AS services revenue consists of fix monthly fees based upon the specific computer configuration or business process for which the service is being provided, and related costs are incurred ratably over the contract period. When recovering from an interruption, customers generally are contractually obligated to pay additional fees, which typically cover the incremental costs of supporting customers during recoveries. FS services revenue includes monthly fees, which may include a fixed minimum fee and/or variable fees based on measure of volume or activity, such as the number of accounts, trades or transactions, users or the number of hours of service.

F-7

For fixed-fee professional services contracts, services revenue is recorded based upon the estimated percentage of completion measured by the actual number of hours incurred divided by the total estimated number of hours for the project. When contract include both professional services and software and there are significant program modifications or customization, installation, systems integration or related services, the professional services and license revenue is combined and recorded based upon the estimated percentage of completion, measured in the manner described above. Changes in the estimated costs or hours to complete the contract and losses, if any, are reflected in the period during which the change or loss becomes known.

License fees result from contracts that permit the customer to use a SunGard software product at the customer s site. General these contracts are multiple-element arrangements since they usually provide for professional services and ongoing software maintenance. In these instances, license fees are recognized upon the signing of the contract and delivery of the software if the license fee is known, collection is probable, and there is sufficient evidence of the fair value of each undelivered element. Revenue is recorded when billed when customer payments are extended beyond normal billing terms, or at acceptance when t is significant acceptance, technology or service risk. Revenue also is recorded over the contract period in those instances when the software is bundled together with computer equipment or other post-delivery services and there is not sufficient evidence the fair value of each undelivered element.

Sufficient evidence of fair value is determined by reference to applicable accounting standards and is defined as vendor specific objective evidence (VSOE). If there is no VSOE of the fair value of the delivered element (which is usually the software) there is VSOE of the fair value of each of the undelivered elements (which are usually maintenance and professional services) then the residual method is used to determine the revenue for the delivered element. The revenue for each of the undelivered elements is set at the fair value of those elements using VSOE of the price paid when each of the undelivered elements is sold separately. The revenue remaining after allocation to the undelivered elements (i.e., the residual) is allocated to the delivered element.

VSOE supporting the fair value of maintenance is based on the optional renewal rates for each product and is typically 18% to 20% of the software license fee per year. VSOE supporting the fair value of professional services is based on the standard dair rates charged when those services are sold separately.

In some multiple-element arrangements that include software licenses and services, the services rates are discounted. In these cases, a portion of the software license fee is deferred and recognized as the services are performed based on VSOE of the services.

Unbilled receivables are created when services are performed or software is delivered and revenue is recognized in advance o billings. Deferred revenue is created when billing occurs in advance of performing certain services.

Cash and Cash Equivalents

Cash and cash equivalents consist of investments that are readily convertible into cash and have original maturities of three months or less.

Concentration of Credit Risk

Financial instruments that potentially subject the Company to concentrations of credit risk consist primarily of accounts receivable. The Company sells a significant portion of its products and services to the financial services industry and could be affected by the overall condition of that industry. The Company believes that any credit risk associated with accounts receival is substantially mitigated by the relatively large number of customer accounts and reasonably short collection terms. Accounts receivable are stated at estimated net realizable value, which approximates fair value. By policy, the Company places its avail cash and short-term investments with institutions of high credit-quality and limits the amount of credit exposure to any one issue.

F-8

Foreign Currency Translation

The functional currency of each of the Company s foreign operations is generally the local currency of the country in which operation is located. All assets and liabilities are translated into U.S. dollars using exchange rates in effect at the balance shee date. Revenue and expenses are translated using average exchange rates during the period.

Increases and decreases in net assets resulting from foreign currency translation are reflected in stockholder s equity as a component of accumulated other comprehensive income (loss).

Property and Equipment

Property and equipment are recorded at cost and depreciated on the straight-line method over the estimated useful lives of the assets (three to eight years for equipment and ten to 40 years for buildings and improvements). Leasehold improvements are amortized ratably over their remaining lease term or useful life, if shorter. Depreciation and amortization of property and equipment was \$212 million in 2006, \$219 million in 2007 and \$240 million in 2008.

Software Products

Product development costs are expensed as incurred and consist primarily of design and development costs of new products a significant enhancements to existing products incurred before the establishment of technological feasibility. Costs associated purchased software, software obtained through business acquisitions, and new products and enhancements to existing product that are technologically feasible and recoverable are capitalized and amortized over the estimated useful lives of the related products, generally two to eleven years (average life is seven years), using the straight-line method or the ratio of current reve to current and anticipated revenue from such software, whichever provides the greater amortization. Amortization of all softw products aggregated \$223 million in 2006, \$246 million in 2007 and \$267 million in 2008. Capitalized development costs wer \$21 million in 2006, \$26 million in 2007 and \$17 million in 2008.

Customer Base Intangible Assets

Customer base intangible assets represent customer contracts and relationships obtained as part of acquired businesses and are amortized using the straight-line method over their estimated useful lives, ranging from three to 19 years (average life is 13 years).

Other Tangible and Intangible Assets

Other tangible and intangible assets consist primarily of deferred financing costs incurred in connection with debt issued in the Transaction and for the acquisition of GL TRADE S.A. (GL TRADE) (see Notes 2 and 5), noncompetition agreements obtain business acquisitions, long-term accounts receivable, prepayments and long-term investments. Deferred financing costs are amortized over the term of the related debt. Noncompetition agreements are amortized using the straight-line method over the stated terms, ranging from two to five years.

Future Amortization of Acquisition-Related Intangible Assets

Based on amounts recorded at December 31, 2008, total expected amortization of all acquisition-related intangible assets in ear of the years ended December 31 follows (in millions):

2009	\$ 508
2010	499
2011	472
2012	424
2013	370

F-9

Trade Name and Goodwill

The trade name intangible asset primarily represents the fair value of the SunGard trade name at August 11, 2005 and is an indefinite-lived asset and therefore is not subject to amortization but is reviewed at least annually for impairment.

Goodwill represents the excess of cost over the fair value of net assets acquired. At least annually, the Company compares the carrying value of its reporting units to their estimated fair value. If the carrying value is greater than the respective estimated fair value, the Company then determines if the goodwill is impaired and whether some or all of the goodwill should be written off a charge to operations. The estimate of fair value requires various assumptions including the use of projections of future cash flows and discount rates that reflect the risks associated with achieving the future cash flows. Changes in the underlying busing could affect these estimates, which in turn could affect the fair value of the reporting unit.

The following table summarizes changes in goodwill by segment (in millions):

	FS	HE	PS	AS	Tot
Balance at December 31, 2006	\$ 2,918	\$ 976	\$ 904	\$ 2,153	\$ 6,9
2007 acquisitions	47		12	129	1

Balance at December 31, 2008	\$ 3,431	\$ 965	\$ 685	\$ 2,247	\$ 7,3

The Company completes its annual goodwill impairment test as of July 1 and generally estimates the fair value of its reporting units using the present value of expected future cash flows. As a result of the change in the economic environment in the secon half of 2008 and completion of the annual budgeting process, the Company reviewed its annual impairment test in December 2008 and concluded that the decline in expected future cash flows in the PS reporting unit was sufficient to result in an impairment of goodwill of \$128 million.

Stock Compensation

Statement of Financial Accounting Standards (SFAS) Number 123R (revised 2004), Share-Based Payment (SFAS 123R companies to expense the fair value of employee stock options. Using the fair value recognition provisions of SFAS 123R, stock-based compensation cost is measured at the grant date based on the fair value of the award or using the Black-Scholes pricing model and is recognized as expense over the appropriate service period.

Income Taxes

The Company recognizes deferred income tax assets and liabilities based upon the expected future tax consequences of events that have been included in the financial statements or tax returns. Deferred income tax assets and liabilities are calculated base on the difference between the financial and tax bases of assets and liabilities using the currently enacted income tax rates in efforting the years in which the differences are expected to reverse. Valuation allowances are recorded to reduce deferred tax as when it is more likely than

F-10

not that a tax benefit will not be realized. Deferred tax assets for which no valuation allowance is recorded may not be realize upon changes in facts and circumstances. Tax benefits related to uncertain tax positions taken or expected to be taken on a tax return are recorded when such benefits meet a more likely than not threshold. Otherwise, these tax benefits are recorded when tax position has been effectively settled, which means that the appropriate taxing authority has completed their examination e though the statute of limitations remains open, or the statute of limitation expires. Considerable judgment is required in assess and estimating these amounts and differences between the actual outcome of these future tax consequences and estimates may could have a material effect on the consolidated financial results.

Effect of Recent Accounting Pronouncements

In December 2007, the Financial Accounting Standards Board (FASB) issued Statement of Financial Accounting Standards (SFAS) No. 141R, Business Combinations, (SFAS 141R), which changes accounting principles for business acquisition SFAS 141R requires the recognition of all the assets acquired and liabilities assumed in the transaction based on the acquisition-date fair value. Certain provisions of this standard will, among other things, impact the determination of considera paid or payable in a business combination and change accounting practices for transaction costs, acquired contingencies, acquisition-related restructuring costs, in-process research and development, indemnification assets, and tax benefits. SFAS 1 is effective for business combinations and adjustments to all acquisition-related deferred tax asset and liability balances occur after December 31, 2008. This standard could have a significant impact on the consolidated financial statements.

In December 2007, the FASB also issued SFAS No. 160, Noncontrolling Interests in Consolidated Financial Statements, an amendment of ARB No. 51 (SFAS 160). The objective of SFAS 160 is to improve the relevance, comparability and transp of the financial information that a reporting entity provides in its consolidated financial statements by establishing accounting reporting standards for the noncontrolling interest in a subsidiary and for the deconsolidation of a subsidiary. SFAS 160 is effective January 1, 2009. The Company does not expect the adoption of SFAS 160 to have a material impact on the consolid financial statements.

In March 2008, the FASB issued SFAS No. 161, Disclosures about Derivative Instruments and Hedging Activities (SFAS 1 SFAS 161 is intended to help investors better understand how derivative instruments and hedging activities affect an entity s financial position, financial performance and cash flows through enhanced disclosure requirements. SFAS 161 is effective as January 1, 2009. The Company does not expect the adoption of SFAS 161 to have a material impact on the consolidated finar statements.

In April 2008, the FASB issued FASB Staff Position (FSP) No. FAS 142-3, Determination of the Useful Life of Intangible Assets. FSP 142-3 amends the factors that should be considered in developing renewal or extension assumptions used to determine the useful life of a recognized intangible asset under SFAS No. 142, Goodwill and Other Intangible Assets (SFAS 142). FSP 142-3 is intended to improve the consistency between the useful life of an intangible asset determined under SFAS and the period of expected cash flows used to measure the fair value of the asset under SFAS 141R and other GAAP. FSP 142 is effective as of January 1, 2009. The Company does not expect the adoption of FSP 142-3 to have a material impact on the consolidated financial statements.

In November 2008, the Emerging Issues Task Force (EITF) issued Issue No. 08-7, Accounting for Defensive Intangible As (EITF 08-7). EITF 08-7 applies to all acquired intangible assets in which the acquirer does not intend to actively use the as intends to hold (lock up) the asset to prevent its competitors from obtaining access to the asset (a defensive asset), assets that acquirer will never actually use, as well as assets that will be used by the acquirer during a transition period when the intention the acquirer is to discontinue the use of those assets. EITF 08-7 is effective as of January 1, 2009. The Company does not expet the adoption of EITF 08-7 to have a material impact on the consolidated financial statements.

On August 11, 2005, the Company (i) entered into a \$5.0 billion senior secured credit facility, consisting of a \$3.69 billion ter loan facility with SunGard as the borrower, a \$315 million-equivalent term loan facility with a U.K. subsidiary as the borrower (denominated in euros and pounds sterling), and a \$1.0 billion revolving credit facility (\$483 million available as of December 31, 2008 after giving effect to certain outstanding letters of credit), and (ii) issued \$3.0 billion aggregate principal amount of senior notes and senior subordinated notes. The amounts outstanding under the term loan facility denominated in eand pounds sterling was \$181 million and \$119 million, respectively, at December 31, 2008. In February 2007 the Credit Agreement was amended to reduce the effective interest rates on the term loan facility, increase the size of that facility from \$10 billion to \$4.4 billion, extend the maturity by one year and change certain other terms. The Company used the additional borrowings to redeem \$400 million of senior floating rate notes that were due 2013. The related redemption premium of \$19 million and write-off of approximately \$9 million of deferred financing costs were included in other expense. In September 20 the Credit Agreement was amended to increase the amount of term loan borrowings by the Company under the Credit Agreement by \$500 million (Incremental Term Loan), and the Company issued at a \$6 million discount \$500 million aggregate principal amount of 10.625% Senior Notes due 2015, together with the Incremental Term Loan, to fund the acquisition of GL TRADE repay \$250 million of senior notes due in January 2009.

(A) Senior Secured Credit Facilities

Borrowings under the senior secured credit facilities bear interest at a rate equal to an applicable margin plus, at the Company option, either (a) a base rate that is the higher of (1) the prime rate of JP Morgan Chase Bank, N.A. and (2) the federal funds replus 1/2 of 1% or (b) LIBOR based on the costs of funds for deposits in the currency of such borrowing for either 30, 60, 90 of 180 days. The applicable margin for borrowings under the revolving credit facility may change subject to attaining certain leverage ratios. In addition to paying interest on outstanding principal under the senior secured credit facilities, the Company a commitment fee to the lenders under the revolving credit facility in respect of the unutilized commitments. The commitment rate is 0.375% per annum and may change subject to attaining certain leverage ratios.

All obligations under the senior secured credit agreement are fully and unconditionally guaranteed by SunGard Holdco LLC aby substantially all domestic, 100% wholly owned subsidiaries, referred to, collectively, as U.S. Guarantors.

F-14

The Company is required to repay installments on the loans under the term loan facilities in quarterly principal amounts of 0.2 of their funded total principal amount through March 2013, with the remaining amount payable in May 2013, provided, howe that such date will automatically become February 2014 if all the Senior Notes due 2013 are extended, renewed or refinanced or prior to May 15, 2013.

The senior secured credit facilities also require the Company to pay outstanding term loans, subject to certain exceptions, with excess cash flow and proceeds from certain asset sales, casualty and condemnation events, other borrowings and certain financings under the Company s accounts receivable securitization program (terminated in December 2008). Any required payments would be applied pro rata to the term loan lenders and to installments of the term loan facilities in direct order of maturity.

Principal amounts outstanding under the revolving credit facility are due and payable in full at maturity in August 2011.

The second amendment to the Credit Agreement in September 2008 changed certain terms applicable to the Incremental Term Loan. Borrowings can be at either a Base Rate or a Eurocurrency Rate. Base Rate borrowings reset daily and bear interest at a minimum of 4.0% plus a spread of 2.75%. Eurocurrency borrowings can be made for periods of 30, 60, 90 or 180 days and be interest at a minimum of 3.0% plus a spread of 3.75%. The interest rate at December 31, 2008 was 6.75%.

The senior secured credit facilities contain a number of covenants that, among other things, restrict, subject to certain exception the Company s (and most or all of its subsidiaries) ability to incur additional debt or issue preferred stock, pay dividends and distributions on or repurchase capital stock, create liens on assets, enter into sale and leaseback transactions, repay subordinate indebtedness, make investments, loans or advances, make capital expenditures, engage in certain transactions with affiliates, amend certain material agreements, change its lines of business, sell assets and engage in mergers or consolidations. In additional transactions with affiliates, the Company is required to satisfy certain total leverage and interest coverage ratios.

The Company uses interest rate swap agreements to manage the amount of its floating rate debt in order to reduce its exposure variable rate interest payments associated with the senior secured credit facilities. The Company pays a stream of fixed interest payments for the term of the swap, and in turn, receives variable interest payments based on LIBOR (2.39% at December 31, 2008). The net receipt or payment from the interest rate swap agreements is included in interest expense. A summary of the Company s interest rate swaps follows:

	Notional				Inte

February 2008	February 2010	\$	750	2.71%	LII	
Total/Weighted Average interest rate		\$	3,100	3.96%		

In early 2009, the Company entered into 3-year interest rate swaps that expire in February 2012 for an aggregate notional amount of \$1.2 billion under which the Company pays a stream of fixed interest payments (at 1.78%) for the term of the swap, and in turn, receives variable interest payments based on LIBOR.

The interest rate swaps are designated and qualify as a cash flow hedge under SFAS 133, Accounting for Derivative Instrume and Hedging Activities, and included at estimated fair value as an asset or a liability in the consolidated balance sheet based of discounted cash flow model using applicable market swap rates and assumptions. For 2006, 2007 and 2008, the Company included an unrealized after-tax gain of \$3 million, an unrealized after-tax loss of \$23 million and an unrealized after-tax loss \$39 million, respectively, in Other

Comprehensive Income (Loss) related to the change in market value on the swaps. The market value of the swaps recorded in Other Comprehensive Income (Loss) may be recognized in the statement of operations if certain terms of the senior secured credit facilities change or if the loan is extinguished. The \$98 million fair value of the swap agreements at December 31, 2008 included in accrued expenses. The effects of the November 2005, the February 2006, the January 2008 and the February 2008 swaps are reflected in the effective interest rate for the senior secured credit facilities in the table above.

(B) Senior Notes due 2009 and 2014

On January 15, 2004, the Company issued \$500 million of senior unsecured notes, of which \$250 million 3.75% notes were d and paid in full in January 2009 and \$250 million are 4.875% notes due 2014, which are subject to certain standard covenants a result of the Transaction, these senior notes became collateralized on an equal and ratable basis with loans under the senior secured credit facilities and are guaranteed by all subsidiaries that guarantee the senior notes due 2013 and 2015 and senior subordinated notes due 2015. The senior notes due 2009 and 2014 are recorded at \$470 million and \$480 million as of December 31, 2007 and 2008, respectively, reflecting the remaining unamortized discount caused by the Transaction. The \$20 million discount at December 31, 2008 will be amortized and included in interest expense over the remaining periods to mature

(C) Senior Notes due 2013 and 2015 and Senior Subordinated Notes due 2015

The senior notes due 2013 and 2015 are senior unsecured obligations that rank senior in right of payment to future debt and of obligations that are, by their terms, expressly subordinated in right of payment to the senior notes, including the senior subordinated notes. The senior notes (i) rank equally in right of payment to all existing and future senior debt and other obligations that are not, by their terms, expressly subordinated in right of payment to the senior notes, (ii) are effectively subordinated in right of payment to all existing and future secured debt to the extent of the value of the assets securing such deand (iii) are structurally subordinated to all obligations of each subsidiary that is not a guarantor of the senior notes. All obligations under the senior notes are fully and unconditionally guaranteed, subject to certain exceptions, by substantially all domestic, 100% wholly owned subsidiaries of the Company.

The senior subordinated notes due 2015 are unsecured senior subordinated obligations that are subordinated in right of paymen to the existing and future senior debt, including the senior secured credit facilities, the senior notes due 2009 and 2014 and the senior notes due 2013 and 2015. The senior subordinated notes (i) rank equally in right of payment to all future senior subordinated debt, (ii) are effectively subordinated in right of payment to all existing and future secured debt to the extent of t value of the assets securing such debt, (iii) are structurally subordinated to all obligations of each subsidiary that is not a guarantor of the senior subordinated notes, and (iv) rank senior in right of payment to all future debt and other obligations that are, by their terms, expressly subordinated in right of payment to the senior subordinated notes.

The senior notes due 2013 and 2015 and senior subordinated notes due 2015 are redeemable in whole or in part, at the option the Company, at any time at varying redemption prices that generally include premiums, which are defined in the applicable indentures. In addition, upon a change of control, the Company is required to make an offer to redeem all of the senior notes a senior subordinated notes at a redemption price equal to 101% of the aggregate principal amount thereof plus accrued and unjinterest.

The indentures governing the senior notes due 2013 and 2015 and senior subordinated notes due 2015 contain a number of covenants that restrict, subject to certain exceptions, the Company s ability and the ability of its restricted subsidiaries to incuadditional debt or issue certain preferred shares, pay dividends on or make other distributions in respect of its capital stock or make other restricted payments, make certain investments, enter into certain types of transactions with affiliates, create liens securing certain debt without securing the senior notes due 2013 and 2015 or senior subordinated notes due 2015, as applicable sell certain assets, consolidate, merge, sell or otherwise dispose of all or substantially all of its assets and designate its subsidia as unrestricted subsidiaries.

F-16

The senior notes due 2015 contain registration rights by which the Company has agreed to use its reasonable efforts to registe with the U.S. Securities & Exchange Commission notes having substantially identical terms. The Company will use its reasonable best efforts to cause the exchange offer to be completed or, if required, to have one or more shelf registration statements declared effective, within 360 days after the issue date of the senior notes due 2015.

If the Company fails to meet this target (a registration default) with respect to the senior notes due 2015, the annual interes on the senior notes due 2015 will increase by 0.25% for each subsequent 90-day period during which the registration default continues, up to a maximum additional interest rate of 1.0% per year over the applicable interest rate. If the registration default corrected or, if it is not corrected, upon the two year anniversary of the issue date of the senior notes due 2015, the applicable interest rate on such senior notes due 2015 will revert to the original level.

(D) Off Balance Sheet Debt Accounts Receivable Securitization Program

In December 2008, the Company terminated its accounts receivable securitization program. Under the accounts receivable facility, eligible receivables were sold to third-party conduits through a wholly owned, bankruptcy remote, special purpose en that is not consolidated for financial reporting purposes. The Company serviced the receivables and charged a monthly service fee at market rates. The third-party conduits were sponsored by certain lenders under the Company senior secured credit facilities. Sales of receivables under the facility qualified as sales under the provisions of SFAS No. 140 Accounting for Tra and Servicing of Financial Assets and Extinguishment of Liabilities (SFAS 140). Accordingly, these receivables, totaling \$6 million and \$363 million as of December 31, 2007 and 2008, respectively, net of applicable allowances, and the correspondin borrowings, totaling \$441 million and \$77 million at December 31, 2007 and 2008, respectively, are excluded from the Company s consolidated balance sheets. The Company s retained interest in receivables sold as of December 31, 2007 and \$243 million and \$285 million, respectively. The loss on sale of receivables and discount on retained interests are included in other expense and totaled \$29 million for each of 2006 and 2007 and \$25 million for 2008. The gain or loss on sale of receival was determined at the date of transfer based upon the fair value of the assets sold and the interests retained. The Company estimated fair value based on the present value of expected cash flows.

Future Maturities

At December 31, 2008, annual maturities of long-term debt during the next five years and thereafter are as follows (in million

2009	\$	322
2010		67
2011		558
2012		49

Floating rate debt	4,374	4,228	5,248	4,4
Fixed rate debt	3,111	3,142	3,627	2,9

F-17

The fair values of cash and cash equivalents, accounts receivable, accounts payable and accrued expenses, to the extent the underlying liability will be settled in cash, approximate carrying values because of the short-term nature of these instruments. derivative financial instruments are carried at fair value. The fair value of the Company s floating rate and fixed rate long-ter debt is based on market rates.

6. Fair Value Measurements:

In September 2006, the FASB issued SFAS No. 157, Fair Value Measurements (SFAS 157). SFAS 157 clarifies the definifair value, prescribes methods for measuring fair value, establishes a fair value hierarchy based on inputs used to measure fair value, and expands disclosure about the use of fair value measures. The Company adopted SFAS 157 for financial assets and liabilities on January 1, 2008 with no impact on its financial position or operating results. FASB Staff Position SFAS 157-2, Effective Date of FASB Statement 157, permits the Company to defer recognition and measurement of nonfinancial assets an liabilities measured on a nonrecurring basis until January 1, 2009.

The fair value hierarchy, as defined by SFAS 157, is as follows:

Level 1 quoted prices in active markets for identical assets or liabilities

Level 2 quoted prices for similar assets and liabilities in active markets or inputs that are observable

Level 3 inputs that are unobservable (for example, cash flow modeling inputs based on assumptions)

The following table summarizes assets and liabilities measured at fair value on a recurring basis at December 31, 2008 (in millions):

	Fair Value Measures Using			
	Level 1	Level 2	Level 3	7
Assets Clearing broker assets securities owned Retained interest in accounts receivable sold	\$ 44	\$	\$ 285	\$
	\$ 44	\$	\$ 285	\$
Liabilities Clearing broker liabilities customer securities sold short, not yet purchased Interest rate swap agreements	\$ 3	\$ 98	\$	\$
	\$ 3	\$ 98	\$	\$

Clearing broker assets and liabilities—securities owned and customer securities sold short, not yet purchased are recorded at clearchange-quoted prices. Retained interest in accounts receivable sold is calculated using a discounted cash flow model using applicable market interest rate and assumptions based upon collection period. Fair values of the interest rate swap agreements currency option are calculated using a discounted cash flow model using applicable market swap rates and assumptions and a compared to market valuations obtained from brokers. During 2008, the fair value of retained interest in accounts receivable sincreased \$42 million from \$243 million at December 31, 2007 resulting from purchases, issuances and settlements.

7. Stock Option and Award Plans and Stock-Based Compensation:

To provide long-term equity incentives following the Transaction, the SunGard 2005 Management Incentive Plan (Plan) we established. The Plan authorizes the issuance of equity subject to awards made under the Plan for up to 60 million shares of Class A common stock and 7 million shares of Class L common stock of SunGard Capital Corp. and 2.5 million shares of preferred stock of SunGard Capital Corp. II.

F-18

Under the Plan, awards of time-based and performance-based options have been granted to purchase Units in the Parent Companies. Each Unit consists of 1.3 shares of Class A common stock and 0.1444 shares of Class L common stock of Sun Capital Corp. and 0.05 shares of preferred stock of SunGard Capital Corp. II. The shares comprising a Unit are in the same proportion as the shares issued to all stockholders of the Parent Companies. Option Units are exercisable only for whole Units and cannot be separately exercised for the individual classes of stock. Beginning in 2007, hybrid equity awards generally were granted under the Plan, which awards are composed of restricted stock units (RSUs) for Units in the Parent Companies and options to purchase Class A common stock in SunGard Capital Corp. All awards under the Plan are granted at fair market valon the date of grant.

Time-based options vest over five years as follows: 25% one year after date of grant, and 1/48th of the remaining balance each month thereafter for 48 months. Time-based RSUs vest over five years as follows: 10% one year after date of grant, and 1/48th the remaining balance each month thereafter for 48 months. Performance-based options and RSUs vest upon the attainment of certain annual or cumulative earnings goals based on Internal EBITA (defined as income from operations before amortization acquisition-related intangible assets, stock compensation expense and certain other items) targets for the Company during a specified performance period, generally five or six years. Time-based and performance-based options can partly or fully vest upon a change of control and certain other termination events, subject to certain conditions, and expire ten years from the date grant. Once vested, time-based and performance-based RSUs become payable in shares upon the first to occur of a change of control, separation from service without cause, or the date that is five years after the date of grant.

The total fair value of options that vested for 2006, 2007 and 2008 was \$50 million, \$31 million and \$32 million, respectively. The total fair value of RSUs that vested for the years 2007 and 2008 was \$0.7 million and \$3 million, respectively. At December 31, 2007 and 2008, approximately 32,000 and 163,000 RSU Units were vested.

The fair value of option Units granted in each year using the Black-Scholes pricing model and related assumptions follow:

		Year ended D	ecember 31,
	2006	200	7 2008
Weighted-average fair value on date of grant	\$ 9.	.99 \$ 1	1.47 \$ 7.6

The fair value of options on Class A shares granted in 2007 and 2008 using the Black-Scholes pricing model and related assumptions follow:

	Year ended l	December 31,
	2007	2008
Weighted-average fair value on date of grant	\$ 1.49	\$ 1.7
Assumptions used to calculate fair value:		
Volatility	79%	8
Risk-free interest rate	4.1%	2.
Expected term	5.0 years	5.0 year
Dividends	zero	zei

The fair value of each option award is estimated on the date of grant using the Black-Scholes option-pricing model. Since the Company is not publicly traded, the Company utilizes equity valuations based on (a) stock market

F-19

valuations of public companies in comparable businesses, (b) recent transactions involving comparable companies and (c) any other factors deemed relevant. The risk-free rate for periods within the contractual life of the option is based on the U.S. Treasyield curve in effect at the time of grant. Expected volatilities are based on implied volatilities from market comparisons of certain publicly traded companies and other factors. The expected term of stock options granted is derived from historical experience and expectations and represents the period of time that stock options granted are expected to be outstanding. The requisite service period is generally five years from the date of grant.

For 2006, 2007 and 2008, the Company included non-cash stock compensation expense of \$38 million, \$32 million and \$35 million, respectively, in sales, marketing and administration expenses. At December 31, 2008, there is approximately \$42 mil and \$38 million, respectively, of unearned non-cash stock-based compensation related to time-based options and RSUs that the Company expects to record as expense over a weighted average of 2.4 and 4.4 years, respectively. In addition, at December 3 2008, there is approximately \$110 million and \$40 million, respectively, of unearned non-cash stock-based compensation related to performance-based options and RSUs that the Company could record as expense over a weighted-average of 2.2 and 3.7 ye respectively, depending on the level of achievement of financial performance goals. For time-based options and RSUs, compensation expense is recorded on a straight-line basis over the requisite service period of five years. For performance-based options and RSUs, recognition of compensation expense starts when the achievement of financial performance goals becomes probable and is recorded over the remaining service period. The following table summarizes option/RSU activity:

Clearing broker securities cons of trading and investment securities at fair market values, which are based on quoted market rates. Securities borrowed and loaned are collateralized financing transactions which are cash deposits made to or received from other broker/dealers. Receivables from and payables to customers represent amounts due or payable on cash and margin transactions.

4. Debt and Derivatives:

Receivables facility

In March 2009, SunGard entered into a syndicated three-year receivables facility. At June 30, 2009, the maximum commitme of \$316.5 million was fully drawn. It may be repaid at any time at SunGard s option and is therefore accounted for as an on-balance sheet secured borrowing. At June 30, 2009, \$720 million of accounts receivable secure the borrowings under the receivables facility.

Under the receivables facility, SunGard is generally required to pay interest on the amount of each advance at the one month LIBOR rate (with a floor of 3%) plus 4.50% per annum. The facility is subject to a fee on the unused portion of 1.00% per annum. The receivables facility contains certain covenants, and SunGard is required to satisfy and maintain specified facility performance ratios, financial ratios and other financial condition tests.

Credit facility

In June 2009, SunGard amended its existing Credit Agreement (Amended Credit Agreement) to (a) extend the maturity da \$2.5 billion of its dollar-denominated term loans, £40 million of pound sterling-denominated term loans, and 120 million of Euro-denominated term loans from February 2014 to February 2016, (b) reduce existing revolving credit commitments to \$82 million and extend the termination date of \$580 million of those commitments to May 2013, and (c) amend certain other provisions including those related to negative and financial covenants.

As of June 30, 2009, the interest rate for the extended term loans, after adjusting for interest rate swaps, and revolving credit loans was 4.41% and 5.5%, respectively, and for the unextended term loans, after adjusting for interest rate swaps, and revolv credit loans was 2.51% and 4.25%, respectively. The commitment fee on the daily unused portion of the 2013 and 2011 revol credit commitments was 0.75% and 0.50%, respectively.

Derivatives

Edgar Filing: TransDigm Group INC - Form 10-Q

In early 2009, the Company entered into three-year interest rate swaps that expire in February 2012 for an aggregate notional amount of \$1.2 billion under which SunGard pays a stream of fixed interest payments (at 1.78%) for the term of the swap, and turn, receives variable interest payments based on LIBOR.

F-39

The Company uses interest rate swap agreements to manage the amount of its floating rate debt in order to reduce its exposure variable rate interest payments associated with the senior secured credit facilities. Each of these swap agreements is designate a cash flow hedge. The Company pays a stream of fixed interest payments for the term of the swap, and in turn, receives varia interest payments based on LIBOR. The net receipt or payment from the interest rate swap agreements is included in interest expense. The Company does not enter into interest rate swaps for speculative or trading purposes. A summary of the Compan interest rate swaps follows:

Inception	Maturity	Am	otional ount (in Illions)	Interest rate paid	Interest receiv

8. Related Party Transactions:

In accordance with the Management Agreement between the Company and affiliates of the Sponsors, the Company recorded million and \$2 million of management fees in sales, marketing and administration expenses during the three months ended June 30, 2008 and 2009, respectively. In the six month periods ended June 30, 2008 and 2009, the Company recorded \$10 mil and \$7 million of management fees in sales, marketing and administration expenses. At December 31, 2008 and June 30, 2009 \$10 million and \$2 million, respectively, was included in other accrued expenses.

Certain of the Company s sponsors and/or their affiliates were paid approximately \$2 million for customary fees and expense connection with the Amended Credit Agreement.

9. Supplemental Guarantor Condensed Consolidating Financial Statements:

SunGard s senior notes are jointly and severally, fully and unconditionally guaranteed on a senior unsecured basis and the set subordinated notes are jointly and severally, fully and unconditionally guaranteed on an unsecured senior subordinated basis, each case, subject to certain exceptions, by substantially all wholly owned, domestic subsidiaries of SunGard (collectively, the Guarantors). Each of the Guarantors is 100% owned, directly or indirectly, by SunGard. None of the other subsidiaries of SunGard, either direct or indirect, nor any of the Holding Companies guarantee the senior notes and senior subordinated notes

 $(\ \ Non-Guarantors\ \).\ The\ Guarantors\ also\ unconditionally\ guarantee\ the\ senior\ secured\ credit\ facilities.$

F-43

The following tables present the financial position, results of operations and cash flows of SunGard (referred to as Parent Company for purposes of this note only), the Guarantor subsidiaries, the Non-Guarantor subsidiaries and Eliminations as of December 31, 2008 and June 30, 2009, and for the three- and six-month periods ended June 30, 2008 and 2009 to arrive at the information for SunGard on a consolidated basis. SCC and SCCII are neither parties nor guarantors to the debt issued as described in the notes to consolidated financial statements included in the Form 10-12G/A for SCC and SCCII filed in June 20 or the Form 10-K for SunGard filed in March 2009.

GL TRADE SA

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

GL TRADE SA (the Company) is a French domiciled company.

The address of the Company s registered office is 42, rue Notre Dame des Victoires, 75002 Paris. The consolidated financial statements as at and for the years ended 31 December 2007, 2006 and 2005 comprise the Company and its subsidiaries (toget referred to as the Group) and the Group s share in associated companies. The Group provides the international financial community with a full range of software solutions to cover the entire order flow, from the dispatch of an order to post-trade settlement.

Accounting principles and methods

Statement of compliance

The consolidated financial statements have been prepared in accordance with the International Financial Reporting Standards (IFRS) effective as of December 31, 2007, 2006, and 2005 respectively as issued by the IASB and in accordance with IFRS a adopted by the European Union as of December 31, 2007, 2006 and 2005 respectively.

The standards, amendments and interpretations effective as from 1 January 2007 were applied to the 2007 consolidated accou and have had no material effect on the financial statements for that year. These standards, amendments and interpretations are follows:

Amendments to IAS 1 on additional information regarding share capital;

IFRIC 7 Applying the Restatement Approach under IAS 29

IFRIC 8 Scope of IFRS 2, regarding share-based payments;

IFRIC 9 Reassessment of Embedded Derivatives;

IFRIC 10 Interim Financial Reporting and Impairment.

Additional information required by IFRS 7 is presented in the consolidated financial statements.

The following new standards, amendments and interpretations effective as from 1 January 2009, were not applied for 2007:

IAS 1 (revised) Presentation of financial statements

IFRS 8 Operating Segments,

Amendments to IAS 23 regarding borrowing costs,

IFRIC 11 Group and Treasury Share Transactions,

IFRIC 12 Service Concession Arrangements,

IFRIC 13 Customer Loyalty Programmes,

IFRIC 14 Limit on a Defined Benefit Asset and Minimum Funding Requirement.

The potential impact of the above pronouncements on Group consolidated financial statements is being assessed by managements.

The consolidated financial statements have been authorized by the Board of Directors of the Company on 10 March 2008, 6 March 2007, 7 March 2006 for years ended in 2007, 2006 and 2005, respectively, and then amended on 26 November 2008 order to translate them in English, to issue one set of financial statements covering the three years ended 31 December 2007, 2 and 2005, respectively, and also to disclose that the financial statements have also been prepared in accordance with IFRS as issued by the IASB.

F-57

BASIS OF PREPARATION

The consolidated financial statements are presented in euros, which is the Company's functional currency. All financial information presented in euro has been rounded to the nearest thousand. The consolidated financial statements are established the basis of historic cost, except for the following assets and liabilities which are recorded at fair value: derivative financial instruments, financial instruments held for trading, and available-for-sale financial assets.

Non-current assets and groups of assets held for sale are valued at the lower of their book value and their fair value less disposents.

The preparation of the financial statements in conformity with IFRS requires the Group's management to make estimates and assumptions that affect the application of policies and reported amounts of assets, liabilities, income and expenses. The underlying estimates and assumptions are made on the basis of past experience and of other factors considered to be reasonab the circumstances. These estimates and assumptions serve as the basis for the exercise of judgment, as required when determine values for assets and liabilities that can not be obtained directly from other sources. Actual results may differ from these estimates

Estimates and the underlying assumptions are reviewed on an ongoing basis. The effect of changes in estimates is recognized the period in which the estimates are revised, and in any future periods affected.

Information about significant areas of judgments in applying accounting policies that have the most significant effect on the amounts recognized in the consolidated financial statements and which may carry substantial risk of adjustment in subsequen years is included in the notes to the consolidated financial statements. The major line items affected by such judgments are Or Intangible assets, Goodwill, Deferred taxation, Financial liabilities and Provisions.

Accounting methods have been consistently applied by all Group entities.

Note 1 - PRINCIPLES OF CONSOLIDATION

BASIS OF CONSOLIDATION

Subsidiaries

Subsidiaries are entities controlled by the Group. Control exists when the Group has the power to govern the financial and operating policies of an entity so as to obtain benefits from its activities. The financial statements of subsidiaries are included the consolidated financial statements from the date that control commences until the date that control ceases.

Acquisitions of subsidiaries are accounted for using the purchase method of accounting; subsidiaries are consolidated on the footnotes consolidation method under which all balance sheet and income statement accounts of the consolidated companies are integra (after necessary consolidation adjustments and elimination of intra-group transactions and balances). Shareholders equity an income (loss) are then allocated to other shareholders and minority interests.

The cost of an acquisition corresponds to the total of the fair value of the assets acquired, equity instruments issued and liabilities assumed or incurred at the date of transfer, plus costs directly related to the acquisition. The identifiable assets and liabilities assumed in a business combination are initially assessed at fair value at the date of acquisition, regardless of minority interest Goodwill represents the excess of the cost of an acquisition over the fair value of the identifiable net assets acquired. Where the acquisition cost is lower than the fair value of the subsidiary acquired, the difference is recognized directly in the income statement.

F-58

Associates

Associates are those entities in which the group has significant influence, but not control, over the financial and operating policies. The consolidated financial statements include the Group s share of net income /loss of equity accounted investees, f the date that significant influence commences until the date that significant influence ceases. When the Group s share of loss exceeds its interest in an equity accounted investee, the carrying amount of that interest (including any long-term investments reduced to nil and the recognition of further losses is discontinued except to the extent that the Group has an obligation or has made payments on behalf of the investee.

Transaction eliminated on consolidation

Intra-group balances and transactions, and any unrealized income and expenses arising from intra-group transactions, are eliminated in preparing the consolidated financial statements.

Foreign currency translation

The euro is the functional currency of GL TRADE SA and is the currency in which the accounts of the company are presented

Monetary assets and liabilities denominated in foreign currencies at the reporting date are converted to the functional currency the exchange rate effective on that date. Foreign currency differences arising on translation are recognized in profit or loss in income statement.

Non-monetary assets and liabilities denominated in foreign currencies and valued at their historic cost are translated to the functional currency using the exchange rate in effect on the transaction date. Non-monetary assets and liabilities denominated foreign currencies and valued at fair value are translated to the functional currency at the exchange rate at the date that the fair value was determined.

The assets and liabilities of foreign operations, including goodwill and fair value adjustments arising from acquisition, are translated to euros at exchange rates at the reporting date. The income and expenses of foreign operations, are translated to euros are recorded as currency translation adjustment direction equity.

Net investment in a foreign business

Translation differences arising from the conversion of a net investment in a foreign business and the associated hedging are accounted as currency translation adjustment. They are accounted for in the income statement if and when the Group withdrafrom the foreign business.

Deferred tax

Deferred taxes are determined using the balance sheet method. The group treats deferred tax using the liability method for timing differences between the inclusion of assets and liabilities on the consolidated balance sheet at their reported value and value for tax purposes, with the exception of:

goodwill which is not tax deductible

the initial recognition of assets or liabilities in a transaction that is not a business combination and that affects neith accounting nor taxable profit or loss; and,

differences relating to investments in subsidiaries and jointly controlled entities to the extent that it is probable that they will not reverse in the foreseeable future.

F-59

The valuation of deferred tax assets or liabilities is determined by the manner in which the Group expects to recover or settle value of assets or liabilities on the balance sheet, using the tax rates that have been adopted, or effectively adopted, at the bala sheet date.

The net balance of deferred tax items is determined on the basis of the tax status of each Group entity or the income for tax purposes of all Group entities included in the tax consolidation scope. A deferred tax asset is recognized only to the extent that is probable that future taxable profits will be available against which the asset can be utilized. Deferred tax assets are reduced the extent that it is no longer probable that the related tax benefit will be realized.

Dividends

Any dividends paid by one of the Group entities to another of the Group entities are eliminated in the calculation of net profit the Group.

Goodwill

The purchase method of accounting is used to account for business combinations.

For business combinations occurring after the Group s transition to IFRS on 1 January 2004, goodwill represents the difference between the acquisition cost and the corresponding share of the fair value of the identifiable assets acquired, any identifiable liabilities and any contingent liabilities.

For business combinations occurring prior to the Group s transition to IFRS on 1 January 2004, goodwill is maintained at its value as calculated under previous accounting methods. In preparing the opening balance sheet under IFRS at 1 January 2004 Group did not change the classification and accounting treatment of acquisitions occurring prior to 1 January 2004.

Goodwill is measured at cost less accumulated impairment losses. Goodwill is allocated to Cash Generating Units and is not amortized, but is subject to an impairment test on an annual basis or at any time that there is an indication that value may have been impaired. In respect of equity accounted investees, the carrying amount of goodwill is included in the carrying amount of the investment.

Negative goodwill on an acquisition is immediately accounted for in the income statement after a re-examination of the fair values of the assets, liabilities and contingent liabilities acquired.

Note 2 - Significant accounting policies

Revenue recognition

Revenue is reported for the financial year to which it relates. Revenue from operating activities is generated from the services provided by GL TRADE to its clients. Revenue from these services is recognized according to one of the following models, depending on the type of product sold:

Solutions sold as a subscription: under this billing model, GL TRADE grants its clients the right to use software and provides them with associated maintenance, technical support, hot-line and update services, at no extra cost, over the subscription period. Revenue is billed in advance and recognized straight line over the life of the contract starting from the installation date.

Associated services: the sale of solutions is often bundled with associated services, such as project management, installation and training. These services are billed and revenue is recognized upon the performance of the service. Revenues from bundled arrangements are allocated to the individual elements based on their relative fair value.

Solutions sold in the form of a license with associated maintenance contract: licenses give the right to use software and are generally granted for a limited period (3 to 5 years). Revenue from licenses is

F-60

recognized in its entirety at the time of installation at the latest, with revenue from annually renewable maintenance contracts recognized straight line over the contract period.

Projects including a license and specific development and/or significant integration services: at the contract proposal phase complex projects are divided up into a number of phases corresponding to the services accepted by client. Revenue is recognized as work is completed, on the basis of technical milestones achieved. The percentage completion is determined by assessing the work already completed at the end of the financial period.

Royalty fees are paid to stock markets based on the number of displays utilized by end-user customers, and are recharged to such customers. Access to stock market data is part of a full service offering and the related fees are recognized as revenue since GL Trade is the primary obligor.

Leases

Leases are accounted for as finance leases if they transfer nearly all the risks and rewards of the ownership of the leased asset the lessee.

In particular, contracts are considered as financial lease contracts if:

they allow for automatic transfer of ownership at the end of the contract, or

they offer a purchase option that is likely to be exercised during or at the end of the contract, or

they have a term close to the expected useful life of the asset, or

the present value of minimum payments under the contract is close to the fair value of the asset.

Assets financed through finance leases are classified in the balance sheet as property and equipment at the lower of the fair value of the asset and the present value of minimum payments under the lease contract at the reception date and are depreciated, and corresponding liabilities are classified as short- or long-term debt.

Lease payments are broken down between financial costs and principal payment of the debt.

Assets under finance lease are depreciated using the same method used for property and equipment of the same type.

Payments made under operating leases are charged to the income statement on a straight line basis over the period of the lease Lease incentives received are recognized on a straight line basis over the term of the lease.

Employee benefits

Retirement benefits

Defined contribution retirement plan

Contributions relating to the defined contribution retirement plans are reported as expenses in the income statement when incurred.

Defined benefit plans

The Group s liabilities under defined benefit retirement plans are calculated separately for each plan by estimating the amour future benefit that employees have earned in return for their service in the current and prior periods; that benefit is discounted determine its present value and the fair value of any plan assets is deducted. Valuation and other calculations are performed by qualified actuary using the projected unit credit method. The Company s actuarial debt is the sum of the liabilities thus calculated for each of its employees.

The Group recognizes all actuarial gains and losses arising from defined benefit plans directly in equity immediately.

F-61

When the valuation of the net obligations results in the recognition of an asset at the Group s level, the amount recorded in reto this asset is limited to the unrecognized prior service costs and the fair value of any future plan repayment.

Share-based payment transactions

The Group provides non-transferable share-based payment plans that give some employees options to acquire shares in the Group. The cost of share-based payment plans is recognized in the income statement with an offset to equity over the vesting period, after which the employees become the beneficial owners of the shares.

When the options are exercised, equity is increased by the amount of the payment received. The cost of share-based payment plans is the grant date fair value of options granted to employees. Fair value of the options is determined using the Black-Schomodel

The Group applied the transitional provisions of IFRS 1 regarding share-based payments, limiting its application to grants ma after 7 November 2002.

Earnings per share

Earnings per share is calculated on the basis of the weighted average number of ordinary shares outstanding during the period

The weighted average number of ordinary shares outstanding is calculated on the basis of any changes in the share capital and corrected for shares held in treasury by the Group.

Diluted earnings per share is calculated by dividing net income by the weighted average number of shares outstanding adjuste for the effects of all dilutive potential ordinary shares. Potentially dilutive ordinary shares are those stock options where the st price is lower than the fair value price of the Group s share.

The method used to calculate the dilutive effect of these instruments is the share purchase method. This method determines the theoretical number of shares that could be bought at the market price for the amount of the option strike price. The number of shares thus calculated is subtracted from the total number of shares that would be issued if all options outstanding were exerct to give the additional number of shares to be used in calculating the diluted earnings per share figure.

Net finance income (cost)

Net financial income (cost) includes interest on financial liabilities, calculated using the effective interest rate method, interest earned on investments, dividends income, foreign exchange gains and losses, and gains and losses on hedging instruments reported in the income statement.

Interest income is recorded in the income statement when earned, using the effective interest rate method.

Dividend income is recorded in the consolidated income statement when the Group acquires the right to receive payments.

Interest costs included in payments under finance lease contracts are recorded using the effective interest rate method.

Income tax

Income tax expense comprises current and deferred tax. Income tax expense is recognized in profit or loss except to the extent that it relates to items recognized directly in equity, in which case it is recognized in equity.

Current tax is the expected tax payable on the taxable income for the year, using tax rates enacted or substantively enacted at reporting date, and any adjustment to tax payable in respect of previous years.

F-62

Intangible assets

Research and development costs

Expenditure on research activities, undertaken with the prospect of gaining technical knowledge, is recognized as an expense incurred.

Development costs with a view to developing or industrializing a new product or production process are capitalized as intangassets if the company can demonstrate that:

it is technically feasible to develop the intangible asset to the stage of use or sale;

it has the intention, and financial capacity, to pursue the development project to completion;

it has the capacity to use or sell the intangible asset thus created;

it has available financial and technical resources which will enable the development and the sale;

the intangible asset will generate probable future economic benefits in a given manner;

the cost of this asset can be assessed in a reliable way.

The expenditure capitalized includes the direct labor and overhead costs that are directly attributable to preparing the asset for intended use.

These capitalized expenditures are recorded as an intangible asset at cost less amortization and any cumulative impairment of value.

Other development expenditure is recognized as expense as incurred.

Other intangible assets

Other intangible assets that are acquired by the Group are measured at cost less accumulated amortization and accumulated impairment losses.

Amortization

Amortization is recognized in the consolidated income statement on a straight-line basis or on an accelerated basis over the estimated useful life of the intangible asset, based on which ever method provides a more accurate rate at which the future economic benefits of the intangible asset are consumed. Amortization is not recognized for intangible assets where the estima useful life is indefinite.

Goodwill is not subject to amortization. Instead, the Group performs impairment tests at the balance sheet date and when ther an indication that the value of goodwill may have been impaired.

Amortization of intangible assets is recognized beginning from the date that the assets are available for use. The estimated use lives for the current and comparative periods range from 1 to 5 years.

Property and equipment

Acquired property and equipment

Property and equipment are measured at cost less accumulated depreciation and accumulated impairment losses. Where components of an item of property and equipment have different useful lives, they are accounted for as separated items of property and equipment.

Expenditure occurring after acquisition

The Group recognizes in the carrying amount of an item of property and equipment the cost of replacing part of such an item when that cost is incurred and if it is probable that the future economic benefits embodied in the item will flow to the Group at the cost of the item can be reliably measured. Other costs are recognized in the income statement as an expense when incurred

F-63

Amortization

Amortization is recognized in the income statement on a straight-line method over the estimated useful life of the asset, or usi the accelerated amortization method when it more accurately reflects the use of the future economic benefits of the asset. Amortization takes into account the residual value corresponding to the amount the Group would currently receive for the disposal of the asset, after deduction of related costs, if the asset was already of the age and in the expected condition at the er its useful life.

Land is not amortized.

Estimated useful lives are as follows:

Property and equipment Building and investment property	Period 20 years	Method Straight line Accelerated
Computer Equipment	3 to 4 yrs	amortization
Leasehold improvements	5 to 10 yrs	Straight line
Vehicles	4 to 5 yrs	Straight line
Office equipment and furniture	3 to 5 yrs	Straight line

Financial instruments

Loans and receivables are non-derivative financial instruments producing payments that are or can be determined and which a not listed on an active market. They exclude those assets that the entity has classified as being held for trading or available for sale. In particular, these loans and receivables include deposits and guarantees on assets held under lease and loans granted to partners.

Held-for-trading financial assets are those financial assets acquired mainly to generate a profit, from price variations, in the sh term.

Available-for-sale financial assets are those financial assets which are not held-for-trading, issued by the group or held until the due date, or designated as such.

Loans granted by the Group are recorded on the balance sheet at their value on the date of grant or of their transfer to the Gro The classification of the financial asset and the valuation method applied is determined on the date of acquisition based on management s intention.

Financial assets are recognized initially at fair value plus, for instruments not at fair value through profit or loss, any directly attributable transaction costs.

Subsequent to initial recognition, held-for-trading and available-for-sale financial assets are measured at fair value. As an exception, financial instruments for which a trading price on a liquid market is not available and whose fair value may not be determined in a reliable manner are kept at cost, net of transaction costs, and deduction of any impairment.

Changes in the fair value of available-for-sale financial assets are recorded directly in shareholders equity. When available-for-sale financial assets are sold, transferred or redeemed, the cumulative gain or loss is recorded in the income statement. When an available-for-sale financial asset experiences an other-than-temporary impairment in value, fair value is adjusted and depreciation is recorded in the income statement under Net financial income (loss), to the extent of the cumul balance in shareholders equity.

Changes in the fair value of held-for-trading financial assets are recorded in the income statement.

Financial liabilities, other than those classified as held-for-trading, are recognized initially at fair value less transaction costs, then at amortized cost calculated using the effective interest rate method. The fair value of financial instruments is determined

Edgar Filing: TransDigm Group INC - Form 10-Q

the market price at the balance sheet date.

F-64

Trade and other receivables

Trade and other receivables are non-derivative financial instruments. They are recorded at fair value when first recognized, at then at their amortized cost less accumulated impairment losses.

Cash and cash equivalents

Cash and cash equivalents comprise cash balances and short-term investments that are readily convertible in cash. Bank overdrafts, repayable on demand and which form an integral part of the Group s cash management activities, are included as element of cash and cash equivalents for the purposes of the consolidated cash flow statement.

Derivatives

Derivative financial instruments are recognized initially at fair value on the contract day, and classified on the consolidated balance sheet line item Non- current financial assets. Subsequent to initial recognition, derivatives are measured at fair value changes therein are recorded in the consolidated income statement.

The fair value of derivative instruments is provided on a quarterly basis by third party financial institutions which ensure the reliability of such information.

The fair value of derivative instruments used in 2007 for interest rate hedging is given in Note 25.

IAS 39 requires that hedge effectiveness is assessed upon the initiation of the hedge strategy and throughout the use of the strategy in order to qualify for hedge accounting. Hedge effectiveness is measured by matching the variations in the value of hedging instrument against the underlying hedged item; the actual results should remain within a range of 80% to 125%.

When a derivative is reclassified (no longer qualifying under IAS 39 for hedge accounting), the fair value of the derivative is

transferred from the shareholders equity to the income statement over its useful life.

The amount of equity transferred to the income statement is adjusted based on the accumulated depreciation at the discontinuation date set against the total number of days of hedge accounting.

The Group uses derivative instruments to hedge against interest rates risk, and not for market speculation purposes.

Impairment

Assets are assessed at each reporting date to determine whether there is any objective evidence that they are impaired. If any sindication exists, then the asset s recoverable amount is estimated.

For goodwill and intangible assets that have indefinite lives or that are not yet available for use, the recoverable amount is estimated each year at the same time, even in the absence of impairment indicators.

The recoverable amount of an asset is the greater of its value in use and its fair value less costs to sell. In assessing value in us the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. For an asset that does not generate largely independent cash flow, the recoverable amount is determined for the lowest cash generating unit of assets.

Impairment tests are carried out using discounted future cash flow methods. Their purpose is to ensure that the recoverable amount at the balance sheet date is greater than the net book value of the asset recorded on the balance sheet. Should this not the case, an impairment loss will be recognized equal to the difference between the recoverable value of these assets and their book value.

For goodwill, intangible assets with an indefinite useful life and intangible assets which are not yet available for use, the recoverable amount is estimated at each balance sheet date. An impairment loss is recognized whenever the carrying amount an asset or its cash generating unit exceeds its estimated recoverable amount. Impairment losses are recognized in the consolidated income statement.

Impairment losses recognized in respect of cash generating units are allocated first to reduce the carrying amount of any good allocated to the units and then to reduce the carrying amount of the other assets in the unit (group of units) on a *pro rata* basis

An impairment loss in respect of goodwill is not reversed. In respect of other assets, an impairment loss may be reversed if the has been a change in the estimates used to determine the recoverable amount.

An impairment loss is reversed only to the extent that the asset s carrying amount does not exceed the carrying amount that whave been determined, net of depreciation or amortization, if no impairment loss had been recognized.

Financial liabilities

Financial liabilities related to undertakings to buy out minority interests

Put Options to acquire minority interests in fully consolidated subsidiaries are recorded as Financial liabilities. The counterpa this debt is booked against minority interests with the balance being recorded as goodwill. The exercise price of the put is revalued at its fair value at each financial year end and changes in its fair value are recorded to goodwill.

Loans

Interest-bearing loans are initially recorded at fair value after deduction of related transaction costs. Subsequently loans are recorded at amortized cost and the difference between the cost and the redemption value is recognized in the income statemer over the period of the borrowings using the effective interest rate.

Provisions

A provision is recognized if, as a result of a past event, the Group has a present legal or constructive obligation that can be reliably estimated, and it is probable that an outflow of economic benefits will be required to settle the obligation.

If the effect is material, provisions are determined by discounting the expected future cash flows at a pre-tax rate that reflects current market assessments of the time value of money and, where appropriate, the risks specific to the liability.

A provision for loss-making contracts is recorded when the Group s expected future benefits relating to a specific contract arthur the costs that will be incurred to meet contractual obligations.

Trade payables and other liabilities

Trade payables and other liabilities are stated at their amortized cost.

Current assets held for sale and discontinued operations

Immediately before classification as held for sale, the assets (or components of a disposal group) are remeasured in accordance with the Group s accounting policies. Thereafter, generally the assets (or disposal group) are measured at the lower of their carrying amount and fair value less costs to sell.

Impairment losses on initial classification of an asset (or group of assets) as held for sale and subsequent gains and losses on remeasurement are recognized in the consolidated income statement, irrespective of whether or not the assets have previously been recorded under the periodic revaluation method. Gains are not recognized in excess of any cumulative impairment loss.

Segment reporting

A segment is a distinguishable component of the Group that is engaged either in providing related products or services (busin segment), or in providing products or services within a particular economic environment (geographical segment), which is suft to risks and returns that are different from those of other segments. The Group has identified various segments within its rang products.

Segmentation by product type is the primary segmentation used.

For the marketing of its products, GL TRADE has structured its segment reporting by product lines:

Trading Solutions / Client Connectivity

Post Trade Derivatives

Post Trade Securities

Capital Market Solutions

Information Services

With the exception of the activities of GL SETTLE INC, no changes of the Business Lines resulted in a reallocation of their respective activities relative to previous years in 2007. The Capital Market Solutions (CMS) Business Line now includes the Group, acquired in February 2007. CMS now handles the TxPress product from GL SETTLE INC., which was formerly part the PTS Business Line.

The new Information Services Business Line was created in 2007, subsequent to the acquisition of INFOTEC, and specializes the distribution of the Group s financial data. Decision Software, which specializes in Fixed Income, was acquired in mid-November of 2007, and is currently consolidated by the Group.

Each business unit is in a position to sell all of the product s line, and adapts the Group s overall strategy into regional and leaction plans. Each has its own inherent risks and returns.

The Group s financial reporting system is organized in such a way that it is able to monitor the accounts of each Product Line Budgeting and quarterly budget reporting are carried out by Product Line in order to monitor the profitability of each business unit.

Geographical segmentation is the secondary segmentation used.

Income statement details in 2007

On actual figures, revenue rose by 10.0% to 203.3 million in 2007, and 13% at constant exchange rates.

At constant scope of consolidation and exchange rates from 2006 through 2007, revenue would have risen by 7%.

The adjusted figure is calculated by subtracting EMOS and NYFIX OVERSEAS revenues purchased in 2006, the FERMAT business sold early in 2007 and the revenue of FNX Ltd BUSINESS CORPORATION, INFOTEC and DECISION SOFTWA Inc., acquired in 2007.

Income statement details in 2006

On actual figures, revenue rose 3.1% to 184.8m in 2006. At constant scope of consolidation, revenue would have been 182 2006. The adjusted figure is calculated by subtracting revenue at EMOS and GL OVERSEAS INC (formerly Nyfix Overseas which were acquired on 1 July and 25 August 2006 respectively.

There was no significant impact from currency movements in 2006 (less than 0.5%). At constant exchange rates revenue wou have reached 185.6 million for the year.

Income statement details in 2005

On actual figures, revenue rose 19.4% to 179.2 million in 2005. Adjusted for changes in the scope of consolidation, revenue would have been 177.7 million in 2005. The adjusted figure is calculated by subtracting revenue at OASIS (now GL SETTLUS), which was acquired on 1 July 2005, and including revenue at DAVIDGE and UBITRADE for a full year in 2004.

The impact of currency movements was not significant in 2005. At constant exchange rates revenue would have reached 180.3 million for the year.

For purposes of comparison, clients in 2005 and 2006 were regrouped to match the 2007 breakdown. Revenue by client was determined based on legal entities belonging to the same Group, even if orders were not centralized at that particular Group sheadquarters.

In spite of constant concentration in the financial sector, the weighting of our main clients by revenue remains very stable from one year to the next. The slight slip in the weighting of our main clients in 2007 compared to 2005 and 2006 can be attributed the discontinuation of FERMAT products, which was distributed to some of our top ten clients.

Concerning long term contracts including a significant part of specific developments or integrations, GL Trade applies IAS 1 and recognizes the revenue based upon the percentage of completion method.

Note 5 - Personnel costs

Analysis of personnel costs by type

	Year ended	Year ended	Year ei
000s	12/31/07	12/31/06	12/31

Total	103,165	88,288	85

Personnel costs amounted to 103 million, the largest cost item for the Group, accounting for 50.7% of revenue compared to 50.5% in 2006, excluding discontinued operations (FERMAT distribution, mainly outsourced).

Since December 2006, the number of employees has increased by 253 persons, with 151 employees from the FNX Group (essentially in the US with 87 employees, and in Serbia with 56 employees), 41 employees from the INFOTEC Group (mainly Switzerland) and 14 employees from DECISION SOFTWARE Inc. in the US.

At a constant scope of consolidation, the number would have risen by 47 persons (4.1%, which is less than the organic growth rate). Teams were reinforced in Tunisia, our main growth center in Europe after Paris (115 employees at end December), as was Singapore (19 employees) to handle the implementation of a large client contract. In its other locations, the Group has continued its resource rationalization efforts in line with trends in revenue.

At 31 December 2007, GL TRADE Group had 1,408 salaried employees in all its subsidiaries.

Valuation of share-based payments

The Group applies IFRS 2 to stock option plans granted after 7 November 2002. This standard requires that the company recognize personnel costs corresponding to the fair value of services received over the vesting period. Personnel costs therefo include the fair value of stock options awarded to the Group s employees on 13 August 2007. In 2006 and 2005, Personnel costs also include the fair value of stock options awarded to the Group s employees on 29 November 2004. In 2005, Personnel costs also include the fair value of stock options awarded to the Group s employees on 24 October 2003.

The expense is spread over three years corresponding to the vesting period. Acquisition is subject to a presence obligation.

In 2007, 160,000 stock options were awarded, and the corresponding compensation expense booked for this stock option plan amounts to 126,000.

Previous share option plans generated no personnel costs for 2007, as the vesting period for previous share option plans has ended.

F-75

The reduction in direct costs resulted from 3 factors:

lower distribution fees paid to SIA subsequent to the mid-2006 renegotiation of the distribution agreement with this Italian partner;

the sale of the FERMAT distribution business early in 2007, which reduced to nil the distribution fees to FERMAT (3.3 million in 2006) and decreased outsourced consulting for contracts by 90%;

the July 2007 acquisition of INFOTEC, whose business is providing stock market data to its clients. This accounts the sharp increase in the costs for acquisition of financial market information.

In 2006, the reduction in direct costs of around 2% was mainly due to the reduction in distribution royalties paid to SIA, which were renegotiated by GL TRADE and SIA over the course of the year, and to the internalization of consulting fees for Fermat clients in Germany.

Leases

The Group has entered into operating lease contracts for its vehicle fleet and some office equipment. The Group has signed standard leases for its office property in compliance with local laws. These contracts were initially signed for periods ranging between 3 and 9 years, with options to renew on expiry. In general, rent levels are reviewed on an annual basis to account for market conditions.

000s Future aggregate minimum lease payments	12/31/2007	12/31/2006	12/31/

Later than 5 years	3,608	2,324	3
Total	25,692	16,115	20

Some leases on GL TRADE SA s Paris locations came up for renewal in the first half of 2007, which explains the increase in lease commitments.

The impact of acquisitions on the schedule of lease payments due at less than one year amounts to 500,000.

Other mainly refers to the difference in tax rates on income from di	iscontinued businesses	, totaling 985,000.	

Income tax was adjusted for the capital loss on the sale of the FERMAT operations. The 48,000 impact is taken into account the disposed activities. Presentation of this capital loss as a value net of tax diminishes the Group s consolidated net income tax, giving rise to a permanent difference of 985,000 to offset the presentation impact. The other permanent differences derive from consolidation treatment, spread over all of the Group s subsidiaries.

Difference in foreign company tax rates refers to the differences between tax rates of individual foreign companies and the theoretical tax rate of the parent company. The Group s Tunisian subsidiaries are corporate tax exempt, representing a theore tax charge of 1,115,000.

Note 9 - Net income from discontinued operations

The 1,834,000 figure corresponds to the net profit from the sale of UBITRADE Gmbh, the company in which the Group s FERMAT business was lodged at 1 January 2007.

Ubitrade

Changes in 2006

The final valuation of the price supplement determined in April 2006 was due to former shareholders of Ubitrade SA at that the and was below the amount estimated at 31 December 2005. The difference between the two figures was 472,000. This was recorded as a reduction in goodwill on Ubitrade in June 2006, and then reclassified as an asset classified as held for sale at 31 December 2006, given that it related to an adjustment of the price of the Fermat business.

Changes in 2005

The 3,722,000 increase in goodwill on the UBITRADE SA acquisition relates to the provision made for a price supplement payable under the acquisition contract and based on the performance of Fermat.

In accordance with IFRS 3, GL TRADE has allocated part of the goodwill to identifiable assets. The assets identified are as follows:

The price supplement values the client portfolio of the Fermat distribution business, and this constitutes an identifiable asset under the criteria of IAS 38. This asset is recorded as an intangible asset, set against a reduction in goodwill, for its value, net tax, of 2,320,000.

Within the period of allocation of twelve months allowed under IFRS 3, the GL TRADE Group allocated the goodwill initiall recorded to identifiable assets, valuing the client portfolio and technology assets at their fair value. The Group used the earnings method to value these intangible assets at 3,211,000. This increase in intangible assets was counterbalanced by a 2,089,000 reduction in goodwill (net of deferred tax).

The amount of goodwill on the UBITRADE acquisition was affected by 3,198,000 of tax loss carry-forwards of certain subsidiaries dating from before the acquisition. In order to offset the effect of these gains on profits, goodwill was reduced by same amount.

GL TRADE BV

The acquisition price for Robijn Groep, acquired in 2004, has been adjusted due to the meeting of targets defined in the price adjustment clause of the purchase contract. An additional 200,000 was paid to former shareholders.

GL SETTLE Inc.

The acquisition of GL SETTLE Inc (ex OASIS) in July 2005 gave rise to goodwill of 3 million. Within the period for determination of goodwill of 12 months from the date of acquisition, as allowed under IFRS 3, GL TRADE allocated part of goodwill to identifiable assets, valuing the client list asset at fair value. The Group valued this intangible asset at 399,000. T increase in intangible assets was counterbalanced by a 261,000 reduction in goodwill (net of deferred tax). The maximum pr supplement payable on this acquisition is US\$3 million. Currently, no price supplement has been recorded as the likelihood the triggering conditions will be met has not been demonstrated.

Impairment tests

In accordance with IAS 36, the GL TRADE Group has carried out tests for impairment of value on all goodwill recorded on the balance sheet at 31 December 2007, 2006 and 2005. The Group has allocated each goodwill element to a Cash-Generating Urand has performed tests to ensure that the recoverable value of each Cash-Generating Unit is greater than its book value.

To perform this test at 31 December 2007, GL TRADE has used the discounted future cash flow method over a five-year peribased on the budget for 2008 and the business plan forecasts for the remaining four years.

The before tax discount rates used were 17.3%, 13.05% and 13.27% at 31 December 2007, 2006 and 2005, respectively.

The terminal value assumes perpetual growth in revenue of 2.5%.

With respect to the tests at 31 December 2006, GL TRADE has used the discounted future cash flow method over a five-year period, based on the budget for 2007 and the business plan forecasts at 31 December 2006 for the remaining four years.

With respect to the tests at 31 December 2005, GL TRADE used a discounted cash flow model, based on the 2006 budget and forecasts of the three-year business plan at 31 December 2005.

The impairment tests carried out at 31 December 2007, 2006 and 2005 did not result in any charge for impairment of goodwil Sensitivity tests, in which key assumptions of the valuation are changed, were carried out by the Group. These tests did not cathe recoverable values of the Cash Generating Units into question.

At 31 December 2007, the total liability was 825,000.

The assessment of retirement benefit liabilities was carried out by an independent actuary using the projected unit credit meth in accordance with IAS 19.

Each period of service gives rise to an additional unit of rights to benefits. These are allocated as a function of periods of serv according to the benefits formula defined in the SYNTEC collective employment agreement.

Retirement benefit liabilities were calculated using a discount rate of 5.25%, inflation of 2%, an average increase in employee salaries of 2.5%, and a retirement age of 65 for managerial and non-managerial employees.

The Group s French subsidiaries have each taken out an insurance policy with a well know insurance company to cover their retirement benefit liabilities.

Retirement assets are invested in a fund guaranteeing virtually all euro-denominated commitments of the collective retiremen contracts managed by the insurance company. The fund is two-thirds invested in bonds, with some 17% in equities and 10% i property assets. In 2007, the gross yield on the underlying assets was 5.1%.

GL TRADE SA has applied the amended version of IAS 19. In accordance with this standard, the effects of changes in actuar assumptions were recorded as shareholders—equity for a total of (137,000).

Employees of newly acquired US companies do not have a defined benefit retirement plan, so the inclusion thereof in the scop of consolidation had no impact on retirement benefit liabilities at 31 December 2007.

The Group did not subscribe to any mutual or multi-employer retirement benefit plans.

At 31 December 2006, the total liability was 830,000. Retirement benefit liabilities were calculated using a discount rate of 4.50%, inflation of 2%, an average increase in employee numbers of 2%, and a retirement age of

The 18,688,000 in borrowings represents payments due in less than one year for loans from CALYON, Société Générale and HSBC (see Note 20) and includes 11 million in credit lines contracted with Société Générale and HSBC in February 2007.

Other borrowings include mainly a 4,029,000 loan contracted with the parent company, EURONEXT PARIS.

F-93

Current financial liabilities in 2006

The 6,216,000 in borrowings represents payments on the CALYON loan which fall due in less than one year.

Other borrowings mainly cover deposits received on GL multimedi@ decoders.

The Group recorded as a financial liability for the year the total of preferred dividends allowed for in the shareholders agree and payable to the minority shareholders of GLESIA. This liability was offset through an adjustment to goodwill.

Current financial liabilities in 2005

In 2005, 3 million of the borrowings corresponded to the CALYON loan which falls due in less than one year. Other borrow cover mainly deposits received on GL multimedi@ decoders.

In 2005, the Group recorded as a financial debt its undertaking to buy out the shares of the minority shareholder in its Italian subsidiary, GLESIA, in accordance with IAS 32. At 31 December 2005, this liability was recorded as a debt of 4,893,000. T debt has been assessed at the exercise price of the option, which is determined by criteria set out in the shareholders agreement and corresponds to the fair value of the minority stake in GLESIA Any subsequent change in the value of this undertaking is recorded through an adjustment to goodwill (other than for discounting effects).

Note 25 - Derivative instruments relating to the management of interest rates risks

The risk management policy at Group consists of protecting its income against rapid and significant changes in interest rates.

For this purpose, the Group has used conditional interest rate derivatives (CAPS).

The portfolio of derivative instruments at 31 December 2007 for hedging euro-denominated debt, is broken down in the table below:

000s	At 31 December 2007								
Contract date	Beginning of hedge	End of hedge	Notional amount	Premium amount	Base rate	Period 02/15/2007	Guarantied	Fair value at 12/31/2007	Impact incom

In September 2005, US company Trading Technologies (TT) confirmed its claim against GL TRADE SA and GL TRADE Americas Inc before the Illinois Court, accusing the companies of having included in their software elements that TT claims v protected by its patents in the USA. This claim follows a dozen others claims launched against some of its competitors and clients.

To date, the plaintiff s demands are not quantified. GL TRADE SA, created several years before TT, believes that it has substantial prior art that would be an important point in its defense. Considering this, no provision was made against this clair 31 December 2007.

The provision made in 2007 for legal fees in connection with this dispute amounted to 1,600,000.

To the best of the Group s knowledge, there is no other unprovisioned claim or exceptional event that could have an impact of Group s financial position.

Note 29 - Liabilities classified as held for sale

Liabilities classified as held for sale at 31 December 2006 included solely the liabilities of Ubitrade GmbH, the sale of which completed on 1 January 2007.

Note 30 - Reporting segment

Product type is the primary segmentation used. The Group s historical Front Office product line was expanded by the Back Oproducts of GL SETTLE in 2003 and then by Ubitrade s products in 2004. The Group has organized itself into Business Line the purpose of marketing its products, each of which has its own inherent profitability and specific risks.

The Group s financial reporting system is organized in such a way as to monitor the accounts of each business line. The 2007 budget has been prepared using the same basis, and Quarterly Business Line budget reporting is performed to ensure that profitability can be monitored in each area.

This structure was introduced over the course of 2005, the year in which the businesses acquired had their most significant effort on the Group s accounts.

Geographical segmentation is the secondary segmentation used.

The Group has created Business Units which are responsible for action plans to implement locally the Group s global strateg. They adapt the plans to suit the potential and the technical, regulatory and cultural specificities of each market. Each has its or inherent profitability and specific risks.

	F-107

At 31 December 2007, the GL TRADE Group held only derivative financial instruments used for managing interest rate risks Initially, fair value is equivalent to the premium amount. Bank institutions provide updates on the value of theses instruments the end of each quarter to enable the company to adjust the fair value of its financial assets.

Performance

Trade receivables at 31 December 2007 showed 54,460,000 versus 47,519,000 in 2006 and 68,945,000 in 2005, increa 14.61 % between 2006 and 2007, proportional to the increase in revenue over the same period. The revenue increase reflects t Group s organic growth and acquisitions over FY 2007.

Impairment on uncertain trade receivables due to client insolvency was valued at 411,000 at 31 December 2007, compared t 340,000 in 2006 and 606,000 in 2005.

The GL TRADE Group does not engage in speculation, but makes only risk-free investments in financial instruments available for sale, recognized at fair value. They are money market mutual funds and short-term investments which generated net fair v of 775,000. At 31 December 2007, financial instruments available for sale amounted to 315,000 compared to 2,765,000 is and 6,174,000 in 2005.

At 31 December 2007, Trade payables amounted to 16,808,000 compared to 11,096,000 in 2006 and 12,002,000 in 20 5,712,000 variation between 2006 and 2007 is related to new companies in the scope of consolidation (2.7 million), a time payment to suppliers due to the implementation of SAP software in the Group s two largest subsidiaries and of the early invo of certain trade creditors (3 million).

Derivative financial instruments used by the Group for managing interest rate risks were recognised at fair value on the balansheet under Financial assets. Subsequent changes in fair value are recognised directly in the income statement as financial At 31 December 2007, the fair value of these financial instruments amounted to 141,000 (see Note 25).

Financial instruments are valued by the financial institutions which provided them to the Group.

Borrowings taken out in 2007 financed the acquisitions of the Group s new subsidiaries. The total debt for this purpose amou 30,518,000. The direct impact on the year s net income was a 1,690,000 increase in interest expense, up by 1,051,000 cc 2006 and by 1,297,000 in 2005.

The various covenants (see Note 33) in connection with these loans were complied with at 31 December 2007.

Measuring risk on financial instruments

Credit risk

The Group s clients are mainly financial institutions or stock brokers. At 10 March 2008, the Group is not directly affected b subprime crisis and considers that its clients are credit worthy. The in advance payment terms for the Group s subscribed partly protect it from this risk.

The outstanding balance of Trade receivables at 31 December 2007 stood at 54,460,000 (see Note 15) and their overdue tless than 120 days.

The Group follows its trade receivables with particular attention. Each subsidiary submits a monthly statement of customer receivables to the parent company, which reviews how long such payments have been overdue. This data is also reviewed on quarterly basis by central management to assess which outstanding receivables are potentially at risk based on time overdue, a ensures that steps have been taken to cover such risk (collection action, provisions). Accounting impact is assessed based on t probability of risk on a case-by-case basis.

F-108

At 31 December 2007, Impairment provisions on trade receivables amounted to 411,000, or about 1% of outstanding tradereceivables.

The impact on the income statement of so-called doubtful receivables at 31 December 2007 was as follows:

34,000 for bad debts written off

70,000 for provisions for impairment of trade receivables

60,000 for reversals of provisions for impairment on trade receivables for a total impact of 44,000 on 2007 net income.

Liquidity risk

The invoicing terms implemented by the Group (payment in advance) for subscriptions to its services create a large cash reser at the beginning of a period and generate structurally negative working capital. The recurring contract base at the beginning of financial year (subscriptions and maintenance) accounts for approximately 80% of the Group s annual revenue.

The Group entered into borrowings for 30,518,000 over the year to finance its acquisitions. The Group s net debt amounts t 27,252,000 including 9,909,000 financial liabilities for undertakings to buy out GLESIA and INFOTEC shares, which excluding supplements due for companies acquired.

The Group has not encountered any payment defaults, and has been able to honor its payable debts all through 2007 and previous financial years.

Detailed due dates for financial liabilities (see Note 20 & 24):

Market risk

This risk concerns:

Interest rates risk

The GL TRADE Group invests most of its available cash in short-term money market mutual funds or in interest-bearing accounts that are risk free and track market interest rates. As a result, GL TRADE is not exposed to significant interest rate risk on its investments.

The Group has debt with lending institutions for 41 million (see Notes 20 & 24). These loans are at variable rates based on 3-month and 12-month Euribor depending on the due date. Loans initially taken out with due dates over one year out are hedged by derivative instruments.

The sensitivity of financial charges to a 1% change in short-term interest rates is insignificant.

Exchange rate risks

Each GL TRADE subsidiary bills mainly in its own local currency, with Asian subsidiaries also billing clients in US dollars. portion of revenue now generated by subsidiaries outside the euro zone amounted to 61% of the 2007 total, with 16% in the U 20% in the UK, 16% in Asia and 9% in other countries.

In 2007, the impact of foreign exchange trends on revenue was negative and affected growth by 3%.

GL TRADE has limited the effect on margins by pursuing a policy of strict cost control and ensuring that costs are incurred in currency zones where they generate revenues. In addition to distribution costs, which are local in nature, development costs a increasingly being decentralized from the Group s headquarters.

The Group does not use Forex hedging instruments to guarantee its cash flows.

The evaluation of consolidated net assets held in foreign currencies shows that the Group is exposed to a risk of 227,000, assuming a negative and uniform movement in the euro s exchange rate of 1 euro centime compared to all of the currencies considered from its rate at 31 December 2007.

Translation differences from converting foreign business revenues and affecting the Group's consolidated reserves at 31 December 2007 amounted to 7,113,000, an increase of 5,590,000 compared to 31 December 2006 and of 7,457,000 co to 31 December 2005.

Price risk

The price risk is low due to the amount of financial assets exposed, and was negligible for both 2005 et 2006 for reasons involving the Group s financial policy. Cash assets are invested in short-term money market mutual funds or placed in risk fi interest bearing accounts.

Risk of hedge accounting

The GL TRADE Group is not exposed to hedge accounting risk because it has opted not to use hedge accounting for its derivative financial instruments.

GL TRADE S.A.

Notes to the unaudited consolidated financial statements

Accounting rules and methods

GL Trade SA is a company domiciled in France. The Company s interim consolidated financial statements for the six month ended 30 June 2008 include the Company and its subsidiaries (together referred to as the Group) and the Group s equity in associate or jointly controlled companies.

All the accounting rules and methods used by the Group are presented in the Group s consolidated financial statements for the

year ended 31 December 2007.

The Group s consolidated financial statements for the year ended 31 December 2007 are available upon request from the Company s registered offices at 42, rue Notre Dame des Victoires, 75002 Paris, or from the www.gltrade.com website.

Statement of compliance

The interim consolidated financial statements have been prepared in accordance with IAS 34, Interim financial reporting . Should be read in conjunction with the Group s financial statements for the year ended 31 December 2007. The financial statements for the six months ended 30 June 2008 were prepared in accordance with the International Financial Reporting Standards (IFRS) as those used to prepare the full-year consolidated 2007 financial statements.

The interim consolidated financial statements were approved by the Board of Directors on 27 August 2008.

Basis of preparation

The interim consolidated financial statements are presented in thousands of euros. They are established on the basis of historicost, with the exception of those assets and liabilities recorded at fair value, i.e. derivative financial instruments, financial instruments held for trading purposes and financial instruments classified as available for sale.

Non-current assets and groups of assets held for sale are measured at the lower of their carrying amount and fair value less co to sell.

Estimates

The preparation of the interim consolidated financial statements requires management to exercise judgment, make estimates a use assumptions that affect the application of accounting policies and reported amounts of asset, liability, income and expense amounts. Actual values may differ from the estimated amounts.

For the preparation of the interim consolidated financial statements, methods used in the exercising of judgement by manager in applying the Group s accounting methods and the main sources of uncertainty regarding its estimates are identical to those described in the full-year consolidated financial statements for 2007.

Accounting methods have been applied in a uniform manner by all Group companies.

Changes in the first half of 2008 came mainly from the increase in financial and stock market data procurement costs (up 4,085,000). This increase was attributable to the acquisition in July 2007 of the INFOTEC group specialized in the distributifinancial data.

Other expenses varied in proportion to revenue owing notably to the external growth transactions completed in 2007. The acquisitions of the INFOTEC group and of DECISION SOFTWARE Inc. were completed during the second half of 2007. Sin the acquisition of the FNX group was completed on 28 February 2007, only four months of activity were included in the inter 2007 consolidated financial statements.

GL TRADE OVERSEAS Inc.

The final earn-out payment to the former shareholders of GL OVERSEAS Inc. (previously NYFIX OVERSEAS Inc.) was may on 17 June 2008 amounting to US\$2.296 million.

At 31 December 2007, the Group recognised US\$2.714 million in respect of this earn-out payment.

FNX group

The GL TRADE group finalised its additional analysis concerning the allocation of the FNX goodwill to identifiable items separable from goodwill within the twelve-month period from the date of acquisition available under IFRS 3.

The goodwill value was impacted by an increase of US\$143,000 following adjustments made to the opening balance sheet of FNX group s subsidiaries concerning current assets and a reduction of US\$5.072 million deriving from the recognition of tax losses recognized prior to the acquisition of FNX LIMITED BUSINESS CORPORATION (see Note 12 on deferred tax asset

In addition, the GL TRADE group revised its assumptions concerning the earn-out payment due to the former shareholders of FNX group. It considers that no earn-out payment will have to be made and has recognised a reduction in goodwill of US\$2.2 million.

INFOTEC group

Edgar Filing: TransDigm Group INC - Form 10-Q

The GL TRADE is currently carrying out additional analysis concerning the allocation of the INFOTEC goodwill to identifial items separable from goodwill within the twelve-month period from the date of acquisition allowed under IFRS 3.

The goodwill value was impacted solely by the recognition of the tax losses recorded prior to the acquisition amounted by of CHF10.272 million (see Note 12 on deferred tax assets).

F-124

The assumptions concerning the measurement of the debt arising on the option to buy out minority shareholders were maintai and the value recognised in goodwill stands at CHF4.239 million, which is identical to that recognised at 31 December 2007.

DECISION SOFTWARE Inc.

The acquisition of 100% of the shares in DECISION SOFTWARE Inc. on 16 November 2007 gave rise to the recognition of US\$9.841 million in goodwill.

In parallel, the Group is conducting additional analyses to ensure that there are no other identifiable items separable from goodwill. Depending on the outcome, the value determined at 31 December 2007 may possibly be modified within the twelve-month period from the date of acquisition available under IFRS 3.

The acquisition agreement provides for an earn-out payment to be assessed based on projected revenue as at year-end 2008. A 31 December 2007, the Group set aside a provision for an earn-out payment of US\$1.902 million. At 30 June 2008, this amound did not change.

Note 18 - Litigation

In September 2005, US company Trading Technologies (TT) confirmed its claim against GL TRADE SA and GL TRADE Americas Inc before the Illinois Court, accusing the companies of having included in their software elements that TT claims v protected by its US patents. This claim follows a dozen other claims launched against some of its competitors and clients.

The proceedings are ongoing. To date, the plaintiff s demands have not been quantified. The GL TRADE SA group, created several years before TT, believes that it has substantial prior art that would be an important point in its defence. Accordingly, provision was set aside to cover this claim in the financial statements at 30 June 2008.

F-128

The legal fees recognised in relation to this dispute in the first half of 2008 amounted to 401,000.

The Group has not identified any other unprovisioned risks, litigation or exceptional event liable to have an impact on the Grofinancial position.

Edgar Filing: TransDigm Group INC - Form 10-Q

consolidated net cash would remain above 15 million. All these covenants were met at as at 31 December 2007.

Early redemption of LCL and CALYON loans

GL TRADE SA may, at each interest payment date, make a full early reimbursement of the borrowing, solely by making paying to the banks of:

F-130

the outstanding principal due under the loan,
accrued interest on the loan,
the re-application indemnity due under the loan agreement,
all other sums due under the loan agreement.

Contingent liabilities

GLESIA:

As part of SIA s purchase of an equity stake in GLESIA, formerly GL TRADE Italia, GL TRADE SA (51% owner) and SIA (49% owner) renewed their agreement for a three-year period from 1 January 2007, with the following main provisions:

SIA granted GLESIA non-exclusive distribution rights for its GAM and FinestWay products;

SIA provided GLESIA with all Facility Management and Help Desk services.

The General Meeting of Shareholders held in April 2008 for the 2007 financial year approved the payment of a 1,379,000 dividend, of which 703,000 was for GL TRADE SA. It was paid out in May 2008. There are no further preferred dividends paid from the 2007 financial year onwards.

As a reminder, under the terms of the new agreement, SIA and GL TRADE SA agreed that if one of the parties decides to terminate the agreement, SIA will sell its shares in Glesia, and GL TRADE SA will be obliged to purchase them at a price determined as follows: (0.49 x EBIT x n net liabilities), where n is 4.2x if GL TRADE SA terminates the contract and 2.5x it terminates the contract. This commitment was recognised under the Group s non-current financial liabilities.

FNX group

Earn-out clause

The acquisition price for FNX will be increased by an amount based on 2007 revenue, backlog and 2008 FNX group, and GL Settle Inc. s revenue.

This earn-out payment is capped at a maximum of US\$5,000,000 at year-end 2007. Given the results recorded by the FNX business, no earn-out payment is due in respect of this period.

The earn-out payment is capped at a maximum of US\$7,500,000 at year-end 2008 and payable during the second quarter of 2 At 31 December 2007, a liability of US\$2,500,000, i.e. 1,698,000, was recognised in respect of this item (excluding the unwinding of the discount). The discounted value of the liability stood at 1,607,000 at 31 December 2007. Given the results recorded by the FNX business, no provision was booked for an earn-out payment at 30 June 2008. The existing liability at 31 December 2007 was cancelled.

FERMAT

Earn-out clause

The disposal price set in the sale agreement for FERMAT distribution agreement will be increased by 10% of the amount of services performed in 2007 by the FERMAT group in Germany and Austria, or for its existing customers at the date of the discontinuation of the business, capped at 500,000. Where appropriate, Fermat will make any earn-out payment during the f half of 2008.

A balance of 250,000 on the initial price is also due by FERMAT in the first quarter of 2009. At this stage of the year, no eapayments have been recognised in the financial statements.

INFOTEC group

Put Option clause

Edgar Filing: TransDigm Group INC - Form 10-Q

On 1 July 2007, GL TRADE SA acquired more than 90% of the shares in Swiss company INFOTEC SA. Each minority shareholder undertook to sell its shares on the terms set out below, and GL TRADE SA took a put option to buy out the Infote SA shares held by minorities in 2009.

F-131

The share disposal price depends on the turnover growth of the INFOTEC business in 2007 and 2008, and on EBIT margin for 2008

The total consideration for the shares may not exceed CHF6 million and will be paid in the second quarter of 2009.

At 30 June 2008, this liability was recognised at a value of CHF4.5 million, i.e. 2,803,000 (excluding the discounting effect) the Group's financial statements. The discounted value of this liability amounts to 2,720,000 at 30 June 2008.

The merger of INFOTEC SA into GL TRADE Suisse SA, formerly GL TRADE Schweiz AG, did not change the terms of the undertaking.

DECISION SOFTWARe Inc.

Earn-out clause

The acquisition price will be increased by an amount depending on revenue from new contracts signed in 2008 and is capped US\$2 million.

At 30 June 2008, a US\$2m liability, i.e. 1,269,000, was recognised (excluding the discounting effect). The discounted value this liability stands at 1,231,000 at 30 June 2008. The definitive amount will be payable in the first quarter of 2009.

Notes to Unaudited Pro Forma Combined Condensed Financial Data

(Unaudited)

The pro forma combined condensed financial information is presented for illustrative purposes only and should not be relied as necessarily being indicative of the historical results that would have been obtained if the companies had been combined du the period presented or the results that may be obtained in the future.

Note 1 GL TRADE Historical Financial Information

GL TRADE S.A. (GL TRADE) has a calendar yearend. GL TRADE s financial position and results of operations have been translated into English from previously issued financial statements. The GL TRADE financial data included in this pro forma combined condensed financial data is prepared in accordance with accounting principles generally accepted in the United Stat This financial data is derived from GL TRADE s historical financial statements, which have been prepared in accordance wi International Financial Reporting Standards (IFRS) as issued by the IASB and in accordance with IFRS adopted by the Europ Union. SunGard has concluded that there are no material differences between GL TRADE s financial position and results of operations under IFRS compared to accounting principles generally accepted in the United States. Historical GL Trade amount were converted to US dollars using the average exchange rates during the period for the Pro Forma Combined Condensed Statement of Operations. GL TRADE s historical results are for the nine months ended September 30, 2008.

Note 2 SunGard Historical Financial Information

SunGard s historical financial information as previously filed with the Securities and Exchange Commission which includes results of GL TRADE from October 1, 2008 through December 31, 2008.

Note 3 Allocation of the purchase price

The allocation of the estimated \$629 million purchase price is preliminary and is subject to change based on the completion of independent appraisals of intangible assets, actual costs as compared with estimated costs used in the preliminary purchase prallocation, and completion of financial information as of October 1, 2008, the date of closing of the acquisition. The finalization of the allocation of the purchase price which we expect to be completed in mid-2009 will result in adjustment to certain assets acquired and liabilities assumed, with an offsetting increase or decrease to goodwill, and could impact amortization of acquisition-related intangible assets and therefore results of operations.

Note 4 Other tangible and intangible assets

The Company is completing its determination of the fair values of certain acquired technology, contracts, customer relationsh and trade name. To assist with this determination, the Company has engaged an independent appraisal firm. The estimated fair values and useful lives of identified intangible assets are based on many factors, including estimates and assumptions of futur operating performance and cash flows of the acquired business, the nature of the business acquired, the specific characteristic the identified intangible assets, and our historical experience and that of the acquired business. The estimates and assumptions used to determine the fair values and useful lives of identified intangible assets could change due to numerous factors, including product demand, market conditions, technological developments, economic conditions and competition. The fair value of the intangible assets will be amortized, on a straight line basis, over their estimated useful lives, which for software, customer base and trade name, we currently estimate to be approximately seven years, ten years and ten years, respectively. In accordance we Statement of Financial Accounting Standards Number 142, goodwill is not amortized and will be evaluated for impairment. Deferred income taxes have been provided for the step-up in basis of intangible assets excluding goodwill.

Note 5 Financing of the acquisition

In connection with the acquisition of GL TRADE, SunGard borrowed \$500 million under a secured incremental credit facility and \$500 million through issuance of Senior unsecured notes. The interest rate of credit facility debt will adjust periodically. I purposes of the pro forma financial statements, the weighted interest rate on the debt is assumed to be approximately 9.2%. For every one-eighth percent adjustment to the interest rate, interest expense increases or decreases by \$1.25 million per year and income increases or decreases by \$0.8 million per year. The pro forma rules require using current borrowing rates and do not reflect rates that would have been charged during the periods presented. In addition, estimated fees associated with the financial of the acquisition have been capitalized and will be amortized over the relevant period of the debt.

Note 6 Income taxes

Assumes an effective income tax rate equal to the statutory rates in France and the US, as appropriate. The actual effective tax rate may be different due to the mix of income from different jurisdictions.
