¹ Figures before Non-Recurring Charges (NRC) related to the Transformation Plan

PARIS, France May 3rd 2016 CGG (ISIN: 0000120164 NYSE: CGG), **world leader in Geoscience**, announced today its non-audited 2016 first quarter results.

Commenting on these results, Jean-Georges Malcor, CGG CEO, said:

As we have already indicated, we have been navigating this quarter in a very depressed market. Our clients are reacting strongly to the prevailing very unfavorable oil prices by continuing to significantly reduce their capital expenditure and headcounts, and this has had a strong impact on our activities. This environment has mostly penalized Sercel and our multi-client after-sales, although the latter had a very good fourth quarter in 2015.

In this context, we are staying focused on what is within our control and in particular operational and HSE performance, adaptation of the Group and delivery of our Transformation Plan, tight control of costs and Capex, and stringent cash management. As a result of this and a positive change in working capital this quarter, we were able to post a positive free cash flow, showing a strong improvement compared to the first quarter of 2015.

Our successful 350 million euro capital increase in February 2016 safeguards the Company's liquidity. It will enable us, as we announced, to finance our Transformation Plan which we are implementing with vigor and determination and put the Group in the best position for when the market bounces back. We recently received the relevant authorizations for our staff reduction plans and our offshore fleet is now operating with five vessels.

While we continue to expect a depressed environment for the whole year, we should fully benefit from our Transformation Plan in the second half. We remain fully committed to refocusing on our high added-value Geoscience activities and actively managing our cash situation and our balance sheet. We confirm that we are aiming to reach a net debt of less than 2.4 billion dollars by the end of 2016.

Post-closing events

CGG announced on April 29 that it has entered into a binding agreement with NEOS for the sale of its Multi-Physics Business Line. The Transaction is expected to close during the summer following the receipt of required approvals and licenses. The financial terms of the Transaction are not being disclosed.

Contractual Marine Data Acquisition revenue was \$58 million, down 66% year-on-year and 17% sequentially. Our vessel availability rate was 94%. This compares to a 92% availability rate in the fourth quarter of 2015 and an 84% rate in the first quarter of 2015. Our vessel production rate was 94%. This compares to an 89% production rate in the fourth quarter of 2015 and a 92% rate in the first quarter of 2015. Sequentially, the perimeter effect, as we progressively stacked vessels during the quarter, was partially compensated by a very strong operational performance.

Land and Multi-Physics Data Acquisition revenue was \$31 million, down 34% year-on-year and 29% sequentially.

Contractual Data Acquisition EBITDAs was \$(14) million, a margin of (15.6)%.

Contractual Data Acquisition Operating Income was \$(34) million. Contractual Marine Acquisition continued to suffer from a very difficult market, similar to Q4 2015, but as a result of the fleet reduction we are gradually reducing our exposure to this activity.

The sale of our Multi-Physics Business Line was initiated at the end of April and is expected to close during summer.

The contribution from Investments in Equity was \$5 million and can be mainly explained by the positive contribution from the Seabed Geosolutions JV.

Contractual Data Acquisition Capital Employed was \$0.6 billion at the end of March 2016.
